**Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
OTAY 2ND PIPELINE PHASE 4
CITY OF SAN DIEGO
AGE Project No. 223 GS-22**

Dear Mr. Dorner:

In accordance with your request, we are pleased to submit the attached report which presents the findings, opinions and recommendations of a Phase I Environmental Site Assessment (ESA) study that we have performed for the above-mentioned subject project.

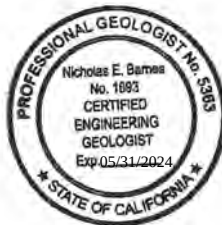

We greatly appreciate the opportunity to be of service on this important project for the City of San Diego. Should you have any questions or need further assistance, please feel free to give us a call.

Sincerely,

ALLIED GEOTECHNICAL ENGINEERS, INC.

Nicholas E. Barnes, P.G./C.E.G.
Senior Geologist

1.0 INTRODUCTION**1.1 Site and Project Description**

In accordance with the request of Rick Engineering Company, Inc. (Rick Engineering), Allied Geotechnical Engineers, Inc. (AGE) has performed a Phase I Environmental Site Assessment (ESA) study for the Otay 2nd Pipeline Phase 4 (Otay 2nd PL Phase 4) Project for the City of San Diego (City). The report made references to AGE's previously submitted Geotechnical Desktop Study of the Otay 2nd PL Phase 4 Project dated July 20, 2022.

As described in the Desktop Study (AGE, 2022), the proposed Otay 2nd PL Phase 4 is located in the City of Chula Vista and the unincorporated community of Bonita, California (See Alignment Map, Figure 1). The southeast terminus of the pipeline is on Telegraph Canyon Road in Chula Vista, approximately 1,450 feet east of the intersection with Paseo Ladera. The northwest terminus is located near the intersection of Sweetwater Road and Willow Street in Bonita. The pipeline is to be installed using conventional cut and cover construction methods, with trenchless technology utilized to install segments of the pipeline alignment at various roadway and river channel crossings. The proposed trenchless crossings are located at Telegraph Canyon, East H Street at Rice Canyon, and the Sweetwater River. Trenchless technology is also being considered for an approximately 5,600 foot length of the pipeline between East J Street and open space southeast of the Glen Abbey Cemetery. This trenchless segment would include the trenchless crossing at East H Street.

Various alternate alignments have been proposed for the southeasterly portions of the pipeline between Telegraph Canyon Road and East H Street. The proposed alignment and various alternate alignments traverse existing public roadways, an existing utility corridor, open space, the east border

of Glen Abbey Cemetery, a medical center parking lot, and Sweetwater County Park. Other land uses in the study area include residential and retail developments. Elevations along the proposed pipeline corridor and various alternates vary from a low of approximately 60 feet above the mean sea level (msl) at the Sweetwater River to a high of 420 feet msl on top of the mesa.

The project alignment and the alternate alignments are more fully described in the following sections of this report. Names of the pipeline alignment and proposed alternate alignments were provided by Rick Engineering, and are shown on the Alignment Map (Figure 1).

Otay 2nd Pipeline Phase 4

The most direct alignment generally follows an existing utility corridor. From Telegraph Canyon Road the alignment extends northwesterly through open space, crosses Paseo Ladera and continues through open space between housing developments. The alignment crosses Paseo Del Rey and an empty lot at the southwest corner of the intersection with East J Street, then follows the alignment of East J Street. Approximately 300 feet northwest of La Senda Way the alignment turns northwest and descends through open space into Rice Canyon. The alignment makes a trenchless crossing of

East H Street, then ascends to the mesa top through open space, crossing Terra Nova Drive and then continuing northwest between residential homes and the east property boundary of Glen Abbey Cemetery. The alignment then turns northeast, crosses Bonita Road and then turns northwesterly and crosses the parking lot of a Kaiser Permanente facility. The alignment then makes a trenchless crossing of the Sweetwater River in Sweetwater County Park, terminating near the intersection of Sweetwater Road and Willow Street. The total length of the alignment is approximately 17,200 feet (3.25 miles).

Paseo Ladera Alternate

From the southeast terminus of the pipeline this alternate alignment follows Telegraph Canyon Road in a westerly direction, turns north at Paseo Ladera and continues to the Otay 2nd PL Phase 4 alignment. This alternate alignment segment negates the need of a trenchless crossing at Telegraph Canyon Road, and avoids crossing open space between Telegraph Canyon Road and Paseo Ladera. However, this alternate alignment will require the crossing of Telegraph Canyon Creek north of the intersection of Telegraph Canyon Road and Paseo Ladera. The creek is contained in a concrete box culvert below Paseo Ladera, but it is unknown whether the alternate alignment will include a trenchless crossing below the culvert or if the pipeline can be supported on the roadway overpass.

The Paseo Ladera alternate alignment segment is approximately 2,325 feet in length, as opposed to a length of approximately 1,480 feet for the segment of the Otay 2nd PL Phase 4 alignment between the southeast end of the alignment and Paseo Ladera.

Telegraph Alternate

From the southeast terminus of the pipeline this alternate alignment follows Telegraph Canyon Road in a west to northwesterly direction, turning northeast at Paseo Del Rey before intersecting the Otay 2nd PL Phase 4 alignment on Paseo Del Rey near the intersection with East J Street. As with the Paseo Ladera alternate, the Telegraph alternate segment negates the need of a trenchless crossing at Telegraph Canyon Road, and avoids crossing open space between Telegraph Canyon Road and Paseo Del Rey. However, this alternate alignment will require the crossing of Telegraph Canyon Creek north of the intersection of Telegraph Canyon Road and Paseo Del Rey. As with Paseo Ladera, the creek is contained in a concrete box culvert below Paseo Del Rey, but it is unknown whether the alternate alignment will include a trenchless crossing below the culvert or if the pipeline can be supported on the roadway overpass.

The Telegraph alternate alignment segment is approximately 8,720 feet in length, as opposed to a length of approximately 4,950 feet for the segment of the Otay 2nd PL Phase 4 alignment between the southeast end of the alignment and Paseo Del Rey.

East J Street Alternate

The East J Street alternate begins where the Otay 2nd PL Phase 4 alignment crosses Paseo Ladera. The alignment extends in a north to northeast direction along Paseo Ladera, then turns west at East J Street. The alignment then follows East J Street, crosses Paseo Del Rey and merges with the Otay 2nd PL Phase 4 alignment near the intersection with Mesa Court. This alternate alignment avoids the crossing of open space between Paseo Ladera and Paseo Del Rey. No creek crossings are located along this alternate alignment.

The East J Street alternate alignment segment is approximately 5,760 feet in length, as opposed to a length of approximately 3,730 feet for the segment of the Otay 2nd PL Phase 4 alignment between Paseo Ladera and Mesa Court.

H Street Alternate

The H Street alternate begins where the Otay 2nd PL Phase 4 alignment crosses Paseo Del Rey. The alignment extends north along Paseo Del Rey, crosses East J Street and continues to East H Street. The alignment turns northwest on East H Street, and merges with the Otay 2nd PL Phase 4 alignment at the proposed trenchless crossing. This alternate alignment avoids the crossing of open space between East J Street and East H Street. In the event that this alternate alignment is located in the northern lanes of East H Street, the alignment may also avoid the trenchless crossing of East H Street.

The H Street alternate crosses a tributary of Rice Canyon along Paseo Del Rey between East J Street and East H Street. Paseo Del Rey was built on a filled causeway which crosses the canyon. The causeway is on the order of 600 feet in length, and the fill thickness is estimated to be on the order of 60 feet at the center of the canyon. It is presumed that the pipeline would be installed using conventional cut and cover construction methods in the fill materials which comprise the causeway.

The H Street alternate alignment segment is approximately 4,150 feet in length, as opposed to a length of approximately 3,680 feet for the segment of the Otay 2nd PL Phase 4 alignment between Paseo Del Rey and the East H Street crossing.

Trenchless Crossings

Based on the information provided by Rick Engineering, it is our understanding that trenchless technology is being considered at the following locations:

Telegraph :	Telegraph Canyon Road and Telegraph Canyon Creek
East H Street:	East H Street at Rice Canyon
Sweetwater River:	Sweetwater River adjacent to Willow Street
Trenchless Alternate:	East J Street to open space on a hilltop location approximately 300 feet southeast of Glen Abbey Cemetery

Trenchless crossings of Telegraph Canyon Creek may also be required if the Paseo Ladera or Telegraph alternate alignment segments are selected. The approximate locations of the trenchless crossings are shown on Figure 1.

1.2 Objective and Scope of Services

The objective of this Phase I ESA study is to review past and present land use practices and site operations to evaluate the potential presence of recognized environmental conditions to within a one mile distance from the project alignments. The scope of this ESA study included a reconnaissance visit of the project study area and adjacent properties, and a review of pertinent records/files maintained by various local regulatory agencies.

The scope of this study does not include the collection of soil and groundwater samples for analytical laboratory testing, nor does it include a survey to evaluate the possible presence of radon and/or methane gases in the project study area. Furthermore, the study does not include an assessment of potential hazards associated with the presence of asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor quality or electromagnetic fields.

The guidelines used for the definition of hazardous materials/hazardous wastes, as used in this report, are referenced in the California Code of Regulations (CCR) "Title 22, Division 4.5". The report has been prepared in general accordance with the procedures presented in ASTM E1527 - 13 (Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process) and ASTM E2600-10 (Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions).

The ASTM E1527 - 13 standard was specifically developed to assess potential environmental concerns/issues pertaining to commercial real estate transactions. Considering that the ASTM standard does not apply to the proposed project which involves the proposed water main installation, we have modified some of the ASTM procedures as described below:

- Exclude a review of Building Department Records, Property Tax Files, Land Title Records, Local Street Directories, Zoning/Land Use Records, and Environmental Liens and Chain-of-Title searches; and
- Limit field reconnaissance to sites that were readily accessible.

It is noted that the main purpose of the ASTM E1527 - 13 standard is to provide the user to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bonafide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability which is not the purpose of this report. Therefore, the modifications that we have made in this study are not expected create data gaps that would impact the evaluation of the proposed project.

1.3 Credentials

This report has been prepared by AGE under the professional supervision of the project manager whose name and signature appears on the letter of transmittal. The information presented in this report has received appropriate technical review, and the opinions represent professional judgements which are based upon an interpretation of the data gathered during this Phase I ESA study and AGE's experience in geotechnical and environmental consulting engineering services.

1.4 Geologic Conditions

The project study area is located within the Peninsular Ranges geomorphic province, a north-south oriented mountain range which extends from the southern edge of the Los Angeles Basin into Baja California, Mexico. Basement rocks of the Peninsular Ranges province include Cretaceous crystalline rocks of the Southern California Batholith and Jurassic metasedimentary and metavolcanic rocks of the Santiago Peak Volcanics.

The project alignment and alternates are situated within the San Diego Embayment, a deep sedimentary-filled basin which is underlain at depth by the basement rock complex. The sedimentary formations consist of nearly flat-lying to gently southwest dipping, marine and non-marine sediments which range from Cretaceous to Holocene in age. Mapped geologic units along the project alignment include Eocene to Holocene age sedimentary deposits. Man-made fills are also known to occur at various locations along the project alignments and alternates. The Project study area is crossed by several strands of the potentially active La Nacion fault zone (LNFZ).

1.5 Hydrogeologic Conditions

The project study area is located in the Telegraph and La Nacion Hydrologic subareas of the Lower Sweetwater Hydrologic Area of the Sweetwater Hydrologic Unit. (San Diego Regional Water Quality Control Board, 1995).

Groundwater in the La Nacion Hydrologic subarea has beneficial use for municipal and domestic supply, agricultural supply, and industrial service and process supply uses. Groundwater in the Telegraph Hydrologic subarea has beneficial agricultural supply use, potential municipal and domestic supply use, and potential industrial service and process supply uses.

The Sweetwater HU is an elongated northeasterly trending strip with an area of approximately 230 square miles. It is traversed by the Sweetwater River. Sweetwater and Loveland reservoirs are located within the unit, with San Diego Bay at the west end of the unit.

The depth of the regional groundwater table is anticipated to vary widely along the project alignments. In the Sweetwater River valley shallow groundwater is anticipated, whereas groundwater on the mesa tops is unknown but may be assumed to be in excess of 100 feet bgs. However, localized shallow perched water conditions may be encountered along the alignments, particularly during the wet (rainy) season. Shallow perched groundwater is anticipated to be encountered at the Telegraph Canyon and Rice Canyon trenchless crossings.

Portions of the Sweetwater River valley are designated as a floodplain area (channel of a stream) with a 1 percent annual chance of being inundated by flooding up to the Base Flood Elevation. Rice Canyon at the proposed East H Street crossing is designated as having a 0.2% Annual Chance Flood Hazard Area. The potential for flooding along the remainder of the project alignment is considered low. The project alignments is located outside the tsunami inundation area (USGS, 2009).

2.0 SCOPE OF WORK

The scope of this Phase I ESA study included the performance of several tasks which are more fully described in the following sections.

2.1 Records Review

In order to assess whether current or past land uses at or adjacent to the project alignments may have created a potential for contamination of the project alignments, we performed a review of readily available public records maintained by various Federal, State, and Local environmental regulatory agencies, such as San Diego County Department of Environmental Health (DEH) and San Diego Air Pollution Control District. The database search was performed by Environmental Data Resources, Inc. (EDR). A copy of EDR's Area/Corridor Report is presented in Appendix A. The limit of the database search extends 0.25 miles from the project alignments as shown on the EDR Key Map which is included in the Radius Map Report and on Figure 2.

The available database records were reviewed for the following areas:

- To 0.25 mile outside the limits of the project alignments for the Department of Toxic Substance Control (DTSC), ENVIROSTOR database, an equivalent to the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). The database includes State and Federal superfund sites, military sites, and school sites;
- To 0.25 mile outside the limits of the project alignments for leaking underground storage tanks (USTs);

- To 0.25 mile outside the limits of the project alignments for San Diego County Site Assessment and Mitigation (SAM) sites;
- To 0.25 mile outside the limits of the project alignments for and solid waste storage and recycling facilities, and landfill sites;
- To 0.25 mile outside the limits of the project alignments for Cleanup Program Sites (CPS), formerly referred to as Spills, Leaks, Investigations and Cleanups (SLIC) sites;
- To 0.25 mile outside the limits of the project alignments for registered USTs, Resource Conservation and Recovery Act (RCRA) large-quantity generators, or on-site treatment; and
- To 0.25 mile outside the limits of the project alignments for HAZNET sites listed by DTSC regarding hazardous waste transport.

A description of the databases searched by EDR is presented on Pages GR-1 through GR-53 of the EDR report. A summary of the sites of potential concern identified in the EDR report is presented on pages 2 through 20 of the EDR report, and the Map Findings are presented on pages 38 through 959 of the report. The approximate locations of these sites are shown on the EDR Key Map (Figure 2).

EDR was also requested to provide historical topographic maps and aerial photographs of the study area. The historical topographic maps and aerial photographs were used to evaluate historical development and land usage along the project alignments. Copies of the topographic maps and aerial photographs are included in Appendices B and C, respectively.

2.2 Site Reconnaissance

Mr. Nicholas Barnes from AGE conducted a site reconnaissance visit on August 9, 2022. The purpose of this site reconnaissance was to observe the existing site conditions with regard to the presence of the Recognized Environmental Conditions (RECs) which were identified in the EDR report as discussed in this report.

Pursuant to ASTM E 1527-13, a REC is described as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The term includes the presence of hazardous substances or petroleum products even under conditions in compliance with laws and regulations. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

A summary of the site reconnaissance is presented herein. Selected photographs taken during the site reconnaissance visit are presented in Appendix D. The sites discussed herein are identified by their EDR Map ID numbers.

The site reconnaissance started near the northwest end of the alignment in the parking lot of a Kaiser Permanente medical office at 3955 Bonita Road (EDR Map ID Nos. E21 thru E27). The proposed alignment will cross the parking lot before extending below the Sweetwater River in a trenchless crossing. A documented groundwater contaminant plume extended beneath the south portion of the

parking lot due to petroleum hydrocarbon leakage from an adjacent Union 76 gasoline service station at 3995 Bonita Road (EDR Map ID Nos. H43 thru H63). An environmental consultant recommended natural attenuation as the method of site remediation, and the Site Status has been Closed since 2011. No groundwater monitoring has been performed since the second quarter of 2011, and the monitoring wells were destroyed in 2012 as a condition of the Site Closure.

We observed concrete patches in the Kaiser parking lot at the locations of former monitoring wells. Based on the environmental consultants' last episode of groundwater monitoring in 2011, it is our opinion that there is a high likelihood of encountering residual petroleum hydrocarbon contamination from the gasoline service station during the pipeline construction. Groundwater occurs at reported depths on the order of 7 feet to 11 feet below the parking lot, and will also likely be encountered during the pipeline excavation. There are no documented ongoing petroleum leaks from the service station, which is currently a Chevron station.

The Kaiser medical office is a large quantity generator of hazardous waste, but there are no reported unauthorized releases or spills from the facility. The Kaiser facility is not considered a contributing cause of the documented petroleum hydrocarbon contamination.

From the Kaiser parking lot the Willow Street Bridge over the Sweetwater River was observed (EDR Map ID No. 11). A widening project for the bridge was performed in 2017-19, which required California Integrated Water Quality System (CIWQS) and National Pollution Discharge Elimination System (NPDES) permits. The NPDES permit remains active, apparently due to stormwater runoff from the bridge being directed into the Sweetwater River.

The next site is a commercial strip mall on the southeast side of Bonita Road, which formerly housed Bonita Village Cleaners at 4050 and 4054 Bonita Road (EDR Map ID Nos. AI188 and AI223 thru AI225). There are no reported unauthorized releases from the former cleaners, and the listed addresses are currently respectively occupied by Bonita Shoe Repair and CV Graphics and Printing. A former Chevron service station (EDR Map ID No. AW331) occupied a portion of the strip mall until the early 1970s. Aerial photo review suggests that the former service station site is currently part of the mall's parking lot. There were no reported unauthorized releases from the former gasoline service station.

Across from the mall along the northwest side of Bonita Road is the Bonita Valley Suites office building at 4045 Bonita Road. An AT&T mobility unit (EDR Map ID NO. AF186) in the building is identified as a chemical storage facility due to the presence of lead-acid batteries. An adjacent American Medical Response building at 4035 Bonita Road (EDR Map ID No. X157) is also identified as a chemical storage facility. There are no reported hazardous waste spills or leaks from either facility.

Records indicate that a former gasoline service station occupied the north corner of the intersection of Bonita Road and Willow Street between 1971 and 1979 (4015 Bonita Road, EDR Map ID Nos. X150). There were no known (reported) unauthorized releases from the former service station. The site was redeveloped by 1979, and is currently occupied by a Jack-In-The-Box restaurant whose address is 4011 Bonita Road (EDR Map ID No. L128).

The next site visited was a private residence at 4128 Hill Road (EDR Map ID No. 145). This was a Cleanup Program Site due to a waste oil spill that occurred in 1989. The case was mistakenly referred to the Site Assessment and Mitigation (SAM) program through the DEH, and then referred back to the emergency response unit. The case was administratively closed in 2012, and there is no evidence of the past oil spill.

From Hill Road the reconnaissance proceeded to a Home Depot store at 725 Plaza Court (EDR Map ID Nos. K82 thru K87). The store is listed as a large quantity hazardous waste generator and chemical storage facility, but there are no known leaks or investigations of the facility. A nearby Chevron gasoline service station at 770 Plaza Court (EDR Map ID Nos. J72 thru J77 and J81) is also listed as a large quantity hazardous waste generator and chemical storage facility. There are no reported leaks from the USTs at the service station, and observations indicate that the facility is well maintained. The service station is newer, and USTs are double-walled and equipped with various sensors, monitors and containment areas to alert the station in the event of a leak and to prevent the leak from contaminating the soil.

Proximal to the Chevron station are a Ross Dress For Less and Dollar Tree store at 820 and 816 Paseo Del Rey (EDR Map ID Nos. P102 thru P104, P106, P110 and P111). The two stores abut each other in a shared building, and are each listed as hazardous waste generators. Both facilities are well maintained, and there are no reported unauthorized releases.

The reconnaissance was continued on streets along the project alignment and proposed alternate alignments. Developments along these streets include mostly newer single-family residences that in general are in a well maintained condition. Available records indicate that asbestos removal and offsite transport to landfills has been performed at some residences in the study area, but the waste transport will not affect the project alignments. Several minor spill events are also documented in the study area, but these isolated spill incidents will not impact the project. Surficial staining typical of leaking vehicle undercarriages was also observed on asphalt and concrete pavement in the project study area.

Walking reconnaissance was also made along the existing pipeline alignment in open space extending northwest and southeast from Terra Nova Drive. A dirt walking/riding trail is present along the general pipeline alignment, and several manholes and concrete structures associated with the pipeline were observed. No significant quantities of trash were observed along the trail, nor was there evidence of past illegal dumping of hazardous wastes.

2.3 Data Interpretation and Reporting

This task involves the preparation of a written report to present a summary of our findings, opinions and recommendations based on the information gathered from our site reconnaissance and records review.

2.4 Interviews

The scope of this ESA study also included a telephone interview with Mr. John Senaha of the County of San Diego Department of Environmental Health. His telephone number is (858) 505-6874.

3.0 GOVERNMENTAL AGENCIES RECORDS REVIEW**3.1 Environmental Data Resources Radius Map Report**

For the purpose of this study, AGE retained the services of Environmental Data Resources (EDR) to conduct a search of Federal, State and Local environmental regulatory agency databases in conformance with the ASTM E1527 - 13 search parameters.

3.2 Records Review

Records with regard to the history/background and current status information for the sites of concern were obtained from the Geotracker website database records.

3.3 Historic Aerial Photographs and Topographical Maps

Available aerial photographs and topographical maps pertaining to the general area were reviewed to assess historical usage along the project alignments and surrounding areas. Historical aerial photographs that were reviewed cover the years 1949, 1953, 1964, 1966, 1971, 1979, 1985, 1989, 1996, 2002, 2005, 2009, 2012 and 2016. Topographical maps that were reviewed cover the years 1904, 1930, 1943, 1944, 1953, 1967, 1975, 1991, 1996, 2012, 2015, and 2018.

4.0 SITE HISTORY

The project alignments are located approximately 8 to 10 miles southeast of downtown San Diego. The alignments were once part of Rancho De La Nacion, a Mexican land grant. The 1904 topographic map gives place names of Bonita, Bonnie Brae and Sunnyside in the Sweetwater River valley, as well as several unnamed roadways near the present-day alignments of Bonita Road, Sweetwater Road and Willow Street. A railroad identified as the Sweetwater Branch of the National City & Otay Railroad (N. C. & O) traversed the valley near the southeast side of the river. The N.C.&O line extended to the community of La Presa, with a spur line extending to a quarry near Sweetwater Dam (www.sandiegohistory.org). Long Canyon and Telegraph Canyon are named on the map, with unnamed roadways traversing the canyon bottoms.

The Sweetwater Dam was completed in 1888 at a height of 90 feet, and was the tallest masonry arch dam in the United States at that time. Heavy floods in 1916 damaged the side spillways but did not result in damage to the main dam. Subsequent modifications have been made to the dam, with the majority of the work completed by 1940 (www.asce.org).

By 1930 the Sweetwater Branch of the N.C.&O. was no longer present in the Sweetwater River valley, but review of the topographic map reveals no other significant changes in the study area. The 1943 and 1944 topographic maps show Bonita Road, Sweetwater Road, Otay Lakes Road, Willow Street and Telegraph Canyon Road as improved roadways. A number of unimproved roads are also shown on the maps, as well as Glen Abbey Cemetery which opened in 1924.

Aerial photos from 1949 and 1953 reveal agricultural developments in the Sweetwater River valley, with much of the cultivated land on the relatively level stream terraces on the north and south sides of the valley. These agricultural areas were gradually developed and replaced with mostly residential housing during the 1970s. The photos also reveal the original Otay 2nd PL Phase 4 alignment extending between Telegraph Canyon Road and Sweetwater Road. The original pipeline dates to 1930, and is identified as an aqueduct on the 1967 topographic map.

Beginning in the mid 1970s and continuing into the early 2000s a number of large-scale residential and commercial developments were built in the study area. These development projects included substantial grading, as well as the construction of East H Street, East J Street, Paseo Ladera, Paseo Del Rey, and Terra Nova Drive. Bonita Road and Telegraph Canyon Road were also widened during that time period.

Today, the County of San Diego's Sweetwater Regional Park occupies the Sweetwater River valley near the project alignment. Chula Vista Municipal Golf Course is located in the river valley east of Willow Road. The golf course opened in 1961.

5.0 DISCUSSION, FINDINGS AND OPINIONS**5.1 Summary**

Based on the results of this ESA study, we would like to present the following summary of our findings, opinions and recommendations with regard to the historic and current environmental conditions and issues at the project site.

The EDR report lists a total of 345 sites/cases of Historical Recognized Environmental Condition (HREC) and Controlled Recognized Environmental Condition (CREC) within the boundary of the project study area. A review of these sites/cases reveals that many of them are duplicate listings due to changes in ownership and/or multiple agency listings/jurisdictions. One of the sites is actually located in the City of Anaheim, California, and should not have been included in the EDR report.

Based on a review of the available background information and visual site observations gathered during our site reconnaissance visits, it is our opinion that the majority of sites/cases identified in the EDR report and Geotracker website are not likely to pose a significant environmental hazard to the proposed project alignment. The sites/cases which were eliminated include the following:

- cases/sites which only involve administrative violations;
- temporary construction permits;
- Notify 65 cases;
- small quantity generators and handlers;

- cases/sites involving hazardous waste transport; and
- EDR Historic U.S. Auto Station and Cleaner Listing without follow-up reference and/or documentation.

Based on our review and evaluation of the EDR report and Geotracker website, and visual observations during our field reconnaissance visits, we have identified a total of 38 REC sites/cases which are considered to pose a minimal risk to the project site. These sites/cases previously or currently have underground and/or above-ground storage tanks (UST and/or AST), documented Leaking Underground Storage Tanks (LUST) leaks/releases, documented major or minor spills, environmental site investigations, mitigations and cleanups, or storm water construction permits. These cases/sites are generally considered to pose minimal risk to the project alignment based on the following factors:

- The age and status of the case.
- The unauthorized release at the site generally impacted soil only.
- The distance of the site from the project site.
- Direction of groundwater at the site is away from the project site.
- Depth to groundwater or lack of groundwater.
- Other factors specifically described.

A listing and summary descriptions of these sites/cases are presented in Table 1 on the next page.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
1	East H Street at Paseo Del Rey Chula Vista, CA	Hazardous material spill incident	Site listed in the California Hazardous Material Incident Reporting System (CHMIRS). Records indicate that on July 27, 2001, a one-gallon container of muriatic acid fell off a truck and spilled onto the roadway. Cleanup was performed by the San Diego County Health Services Department. This isolated spill incident will not impact the project.
3	Paseo Ladera and Paseo Entrada Chula Vista, CA	Storm water construction project	Site listed in the California Integrated Water Quality System (CIWQS) database for a residential storm water construction project. Permit date was effective January 22, 1996 and terminated on January 2, 1998. There were no enforcement actions or violations within 5 years. This stormwater construction project will not impact the project.
C7	700 E. J Street Chula Vista, CA 91910	Hazardous material spill incident	Records indicate that on August 8, 2001 a homeowner poured one gallon of muriatic acid and sodium hypochlorite down a toilet to relieve a blockage. The chemicals reacted, causing a chlorine gas release and resulting in minor respiratory injuries to the family. Cleanup was performed by the San Diego County Health Services Department. This isolated spill incident will not impact the project.
C9	Redhawk Gas & Auto Center, Inc. 867 Entrada Place Chula Vista, CA 91910	EDR historic auto	Site is listed as a historic auto facility between 2006 and 2014. This address is a private residence. There are no known (reported) leaks. This site is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
10	650 Douglas Street Chula Vista, CA 91910	Spill incident	CHMIRS case, records indicate that on May 16, 2016, a blockage in a sewer main resulted in the release of 7 gallons of sewage, 2 gallons of which spilled onto the street through a manhole. The spill was contained and recovered by the San Diego County Health Services Department. This isolated spill incident is not anticipated to impact the project.
11	Willow Street Bridge Replacement Phase I and II Willow Astreet over Sweetwater River Chula Vista, CA 91902	Bridge construction project	A National Pollution Discharge Elimination System (NPDES) permit was obtained for the construction of the replacement Willow Street Bridge spanning the Sweetwater River, Permit No. CAS 000002 with a received date of March 19, 2014. The purpose of the permit was for bridge and roadway construction with water lines. The permit remains active. A CIWQS permit was also obtained for storm water construction during the bridge replacement project. The CIWQS permit was effective April 7, 2014 and terminated on October 16, 2019. There were no enforcement actions or violations within 5 years. The bridge replacement project will not impact the Project.
D13	Corto Road Corto Road and Timken Road Anaheim, CA 92808	Construction projects	NPDES and CIWQS permits. Although included in the EDR report, this site is actually located in the City of Anaheim, California. This site will not impact the Project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
E21 thru E29	Kaiser Permanente 3955 Bonita Road Bonita, CA 91902	Medical facility	The Kaiser Permanente facility is located near the northwest end of the Project alignment, at the west corner of the intersection of Bonita Road and Willow Street. Site is listed as a Resource Conservation and Recovery Act Large Quantity Generator (RCRA-LQG) of hazardous waste. Listed wastes include ignitable metals, general medical wastes, laboratory wastes, and pharmaceutical wastes. Methods of disposal include incineration, storage/bulking and/or transfer to offsite facilities, and recycling. Site is also listed in the Hazardous Waste Tracking System (HWTS), HAZNET, Hazardous Waste Tracking System (HWTS), California Environmental Reporting System (CERS) HAZ WASTE, and CERS databases, due to the onsite storage of hazardous materials and hazardous wastes. Site is classified as a hazardous waste generator and chemical storage facility. Other listed databases include the Facility Index System/Facility Registration System (FINDS), and Enforcement and Compliance History Information (ECHO). There are no reported unauthorized releases of the various hazardous materials and hazardous wastes. Site is located approximately 100 feet west of the project alignment, which will traverse the facilities' parking lot. The medical facility is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
E30	Bonita MOB Parking Lot 3955 Bonita Road Bonita, CA 91902	Construction project for Kaiser Permanente parking lot	A CIWQS permit was also obtained for storm water construction during a reconstruction project for the parking lot of the Kaiser Permanente facility. The CIWQS permit was effective December 1, 2011 and terminated on February 6, 2012. There were no enforcement actions or violations within 5 years. Aerial photo review suggests that the project may have included re-paving of the existing parking lot which dates to the late 1970s. The parking lot construction project will not impact the Project.
64	755 Paseo De Luz Chula Vista, CA	Spill incident	CHMIRS case, records indicate that on May 1, 2012, a blockage in a sewer main resulted in the release of 200 gallons of sewage through a manhole. The spillage flowed into a storm drain. The San Diego County Health Services Department recovered about 50 gallons of the sewage. This isolated spill incident is not anticipated to impact the project.
69	East J St. & Cordova Drive Chula Vista, CA 91910	Residential stormwater construction project	A CIWQS permit was obtained by Rancho Del Rey Investment LP for a residential storm water construction project. The permit was effective August 15, 1995 and terminated on December 31, 1997. There were no enforcement actions or violations within 5 years. This past construction project is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
J71	770 Plaza Court Chula Vista, CA 91910	Spill incident	CHMIRS case, records indicate that on March 31, 2018, about 2/3 gallon of gasoline spilled onto the ground during a vehicle fueling. The spillage was contained and cleaned up by the San Diego County Health Services Department. This isolated spill incident is not anticipated to impact the project.
J72 thru J81	Chevron Station #203217 / 1837 770 Plaza Court Chula Vista, CA 91910	Gasoline service station	Chevron gasoline service station with a mini market and car wash that dates to at least 2001. Site maintains three USTs containing unleaded fuel. The USTs are each double-walled, and equipped with various monitoring sensors and alarms. There are no known (reported) leaks. Site is listed in the CERS HAZ WASTE and CERS databases as a hazardous waste generator and chemical storage facility, and is also in the CERS TANKS database due to the on-site USTs. Other listed databases include RCRA-LQG, FINDS, ECHO, HAZNET and HWTS. Listed means of hazardous waste disposal include recycling, reclamation for re-use and transfer station. Site has received past violation citations, mainly pertaining to tank filling operations, monitoring, alarm systems, inadequate training, improper paperwork, and waste handling issues. This service station site is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
K82 thru K87	Home Depot 0658 725 Plaza Court Chula Vista, CA 91910	Home improvement store	Site is listed in the CERS HAZ WASTE and CERS databases as a hazardous waste generator and chemical storage facility, and is also a RCRA-SQG. Other listed databases include FINDS, ECHO, HAZNET and HWTS. A wide variety of hazardous wastes are listed, generally consisting of petroleum hydrocarbons, lead, acids, alkaline solutions without metals, off-spec, aged or surplus inorganics, hydrocarbon solvents, waste oil and mixed oils, paints, fertilizers, pesticides, refrigerants, fluorescent tubes, flammable liquids, and aerosols. Listed means of hazardous waste disposal include incineration, recycling, fuel blending and recovery at a different site, and storage, bulking and transfer offsite without treatment or recovery. There are no known (reported) unauthorized releases. Site has received past violation citations, mainly pertaining to not having an adequate business plan, inadequate employee training, and various waste handling issues. An NPDES permit for construction has a Returned status of February 27, 2020. No other permit details are provided. This Home Depot store is located approximately 100 feet north of the H Street alternate in the downgradient direction. The Home Depot is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
L88 thru L91	Bonita Point Dental Arts 145 Willow Street Bonita, CA 91902	Dental office	Site is listed in the CERS and HWTS databases as a chemical storage facility. Listed wastes include oxygenated solvents, unspecified aqueous solutions, and photo chemicals. Listed means of hazardous waste disposal include fuel blending and recovery at a different site, treatment, and storage, bulking and transfer offsite without treatment or recovery. There are no known (reported) unauthorized releases. This medical office is located approximately 450 feet northeast of the project alignment in the upgradient direction. The site is not anticipated to impact the project.
97	Auto Transmission 1069 Pacific Hill Street Chula Vista, CA 91911	EDR Historic automotive site	Site is listed as a historic auto facility between 1999 and 2008. This address is a private residence. There are no known (reported) leaks. This site is located 370 feet south of the Telegraph Alternate alignment, in the upgradient direction. This site is not anticipated to impact the project.
O101	630 Douglas Street Chula Vista, CA 91910	Spill incident	CHMIRS case dated July 10, 1990. No other details are provided. This isolated spill incident is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
P102 thru P104	Dollar Tree 816 Paseo Del Rey Chula Vista, CA 91910	Retail store	Site is listed in the CERS HAZ WASTE, HAZNET, CERS and HWTS databases as a hazardous waste generator. Other listed databases include FINDS and ECHO. Listed hazardous wastes include alkaline solutions without metals and pH greater than 12.5, off-spec, aged or surplus organics, and unspecified solvent mixtures. Listed means of hazardous waste disposal include storage, bulking and transfer offsite without treatment or recovery. There are no known (reported) unauthorized releases. The Dollar Tree store is identified as a RCRA NonGen/NLR in a date form received by the agency on January 3, 2018. This retail store is located 450 feet northeast of the H Street Alternate alignment, in the cross-gradient direction. This site is not anticipated to affect the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
P106, P110 and P111	Ross Dress for Less #1995 820 Paseo Del Rey Chula Vista, CA 91910	Retail store	Site is listed in the CERS HAZ WASTE, HAZNET, CERS and HWTS databases as a hazardous waste generator. Other listed databases include FINDS and ECHO. Listed hazardous wastes include acidic and basic corrosive liquids, flammable liquids, toxic liquids, broken fluorescent tubes, and unspecified aerosols. Listed means of hazardous waste disposal include storage, bulking and transfer offsite without treatment or recovery. There are no known (reported) unauthorized releases. The Ross store is identified as a RCRA NonGen/NLR in a date form received by the agency on May 8, 2017. This retail store is located 450 feet northeast of the H Street Alternate alignment, in the cross-gradient direction. This site is not anticipated to affect the project.
T125	601 Telegraph Canyon Road Chula Vista, CA 91910	Spill incident	CHMIRS case, on October 29, 2007 a total of 75 gallons of sewage was released due to a root blockage on a residential line. The spill was contained by the City of Chula Vista and the San Diego County Health Services Department. This isolated spill incident is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
L128	Jack-In-The Box #68 4011 Bonita Road Bonita, CA 91902	Restaurant	Site is listed in the CERS database as a chemical storage facility. Listed waste and material is carbon dioxide. There are no known (reported) unauthorized releases. This restaurant site is located 500 feet northeast of the project alignment in the upgradient direction. This site will not impact the project.
X140	4011 Bonita Road Bonita, CA 91902	Spill incident	CHMIRS case, on February 12, 2008 a grease blockage at the Jack-In-the-Box restaurant caused the release of an unknown quantity of sewage into a storm drain. All of the sewage was recovered by the City of Chula Vista and the San Diego County Health Services Department. This isolated spill incident is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
145	Waste Oil - No Business Name 4128 Hill Road Bonita, CA 91902	Spill incident	DEH Case No. H29205-001 was opened on March 2, 1989 due to a complaint of oil spillage onto the ground. The case was entered into through the Voluntary Assistance Program (VAP) with the DEH. The site address is a private residence. The listed contaminants of concern are waste oil, motor, hydraulic, and lubricating oil. This was a Cleanup Program Site-Spills, Leaks, Investigations and Cleanup (CPS-SLIC), and is listed in the CERS database. The case was administratively closed by the DEH on October 3, 2012, and no paper records exist for this file. The closure letter states that the case was mistakenly referred to the DEH's Site Assessment and Mitigation (SAM) Program, and then referred back to the emergency response unit. This site is located 500 feet east of the project alignment in the downgradient direction. The isolated spill incident will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
X150 and X151	Smith's ARCO Service/ James W.Stepp 4015 Bonita Road Bonita, CA 92002	EDR historic automotive site	EDR historic gasoline service station site dating from at least 1971 to 1979. Based on aerial photo review it appears that the service station may have occupied the site since at least 1949. By 1979 the original structures had been removed and the site redeveloped. The site is currently occupied by a Jack-In-The Box restaurant (EDR Map ID No. L128). There are no known (reported) leaks associated with the former service station. This site is not anticipated to impact the project.
X157	American Medical Response 4035 Bonita Road Bonita, CA 91902	Ambulance service	Site is listed in the CERS database as a chemical storage facility. There are no listed wastes, nor are there any known (reported) unauthorized releases. This ambulance service site is located 650 feet northeast of the project alignment in the upgradient direction. This site will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AE176	AT&T California- D31C9 602 Telegraph Canyon Road Chula Vista, California 91910	Telecommuni cations site	Site is listed in the CERS database as a chemical storage facility. The listed waste is nickel-cadmium batteries. There are no known (reported) unauthorized releases. This site consists of a small metal vault mounted on a concrete pedestal adjacent to the sidewalk. This site will not impact the project.
AH182, AH183 and AH194	Unnamed tributary to Bonita Canyon, San Diego Chula Vista, California	Dredging operation and emergency repair	CIWQS permit obtained for a dredge/fill site in an undeveloped canyon bottom The permit was effective January 7, 2013 and terminated on January 24, 2013. An expiration/review date was January 7, 2014. There were no enforcement actions or violations within 5 years. A CIWQS permit to perform emergency repair of a gabion structure was effective January 7, 2013 and terminated on April 4, 2013. Based on the project coordinates the dredge/fill operation and gabion repair were at the same site. Review of aerial photography available from Google Earth reveals what appears to be a gabion (rock-filled dam) spanning the canyon bottom, with riprap present downstream of the gabion. The gabion has created a small wetland area upstream. Site is also listed in the CERS database as Wetlands - fill and dredge material. This site is located in a remote canyon 800 feet east of Project alignment in the downgradient direction. This site will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AF186	AT&T Mobility - Bonita (USID 14143) 4045 Bonita Road, Bonita, CA 91902	Telecommuni cations site	Site is listed in the CERS database as a chemical storage facility. The listed waste is lead-acid batteries. There are no known (reported) unauthorized releases. The listed address is occupied by Dominion West office suites, and is located 700 feet northeast of the Project alignment in the upgradient direction. This site will not impact the project.
AI188	Bonita Village Cleaners 4050 Bonita Road Bonita, CA	Historic cleaners site	EDR Historic Cleaners site dating from 1971. The site occupies a unit of a commercial strip mall. There are no known (reported) unauthorized leaks from this establishment. This site is currently occupied by Bonita Shoe Repair, and will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AL204 and AL205	659 E. Naples Street Chula Vista, CA 91911	Construction project	CIWQS and NPDES permits were obtained for a storm water construction project in a residential neighborhood. The CIWQS permit was effective August 9, 2007 and terminated on July 8, 2009. There were no enforcement actions or violations within 5 years. The NPDES permit status is expired as of September 30, 2015. The project appears to be associated with development of an empty lot for residential construction. This site will not impact the project.
AE210, AE212, and AE214	Telegraph Canyon Road Animal Medical Center 577 Telegraph Canyon Road Chula Vista, CA 91910	Veterinary medical office	Site is listed in the CERS database as a chemical storage facility. The listed wastes are infectious waste and sharps. There are no known (reported) unauthorized releases. The site is also listed in the ECHO and HWTS databases, and is also listed as a RCRA Non Gen/NLR. The site is located 1,100 feet west of the Telegraph Alternate alignment in the downgradient direction, and will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AE216	591 Telegraph Canyon Road Chula Vista, CA 91913	Spill incident	CHMIRS case, on February 23, 2017 a small amount of mercury leaked from a package at a UPS Store, spilling onto the floor of the delivery truck and in the store. The spill was contained and cleaned up by the San Diego County Health Services Department and the San Diego Hazardous Materials Department. This isolated spill incident will not impact the project.
AI223 thru AI225	Bonita Village Cleaners 4054 Bonita Road Bonita, CA 91902	Dry cleaners	Dry cleaning and laundry business, site is listed as a RCRA - SQG of hazardous waste. Listed wastes include various halogenated solvents. Disposal includes recycling and storage/bulking and/or transfer offsite without treatment or recovery. There are no known (reported) unauthorized releases. Site is also listed in the CERS, FINDS, ECHO, HAZNET and HWTS databases. The HWTS database indicates an Inactive date for the listed business address of April 17, 2008. An internet search indicated an address for Bonita Village Cleaners at 3003 Highland Avenue, National City, CA 91950. The cleaners is listed as permanently closed. The former cleaners is currently occupied by CV Graphics and Printing, and occupies a unit of a commercial strip mall. The former cleaners site is located 700 feet east of the project alignment in the upgradient direction. The former Bonita Village Cleaners is not anticipated to impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AI230	4070 Bonita Road San Diego, CA	Spill incident	CHMIRS case, on January 14, 2006 approximately 5 gallons of mineral oil leaked from SDG&E equipment and entered a storm drain. The spill was contained and cleaned up by the San Diego County Health Services Department. This isolated spill incident will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AS248 thru AS257	Veterans Home of California- Chula Vista/ /AT&T Mobility 700 E. Naples Street Chula Vista, CA 91911	Veterans home and Telecommuni cations site	Site is listed in the CERS database as a chemical storage facility, the listed wastes are lead-acid batteries, pharmaceutical, photochemicals, infectious wastes, and sharps. There are no known (reported) unauthorized releases. Site is also listed as a RCRA NonGen/NLR. Other listed databases include HWTS, FINDS, and ECHO. Site has received past violation citations, mainly pertaining to a failure to annually review and certify a business plan, failure to dispose of hazardous waste in 180 days, and inadequate or missing paperwork regarding hazardous waste disposal. CHMIRS case at the address on February 15, 2011. Records indicate that a grease blockage resulted in the release of 50 gallons of sewage. The spill was contained at a catch basin by the City of Chula Vista and the San Diego County Health Services Department. Site is located in a residential neighborhood 1,200 feet south of the Telegraph Alternate alignment. This site will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AO266	Quest Diagnostics 563 Telegraph Canyon Road Chula Vista, CA 91910	Medical center	Site is listed in the CERS database as a chemical storage facility, but there are no listed wastes nor are there any known (reported) unauthorized releases. Site is located in a commercial strip mall 1,200 feet west of the Telegraph Alternate alignment in the downgradient direction. This medical facility will not impact the project.
282	East J Street & Camino Meil Chula Vista, CA 91910	Residential storm water construction	CIWQS permit obtained for a residential storm water construction project. The permit was effective August 15, 1995 and terminated on March 5, 1998. There were no enforcement actions or violations within 5 years. Site is located in a residential neighborhood 1,200 feet east of the East J Street Alternate alignment in the upgradient direction. This storm water project will not impact the project.

TABLE 1
Summary of Low Risk Sites

EDR Map ID	Site Name/ Address	Description	Reasons for Low Risk Designation
AW331	Aarlie Herb Bonita Chevron Service 4126 Bonita Road Chula Vista, CA	Historic gasoline service station	Site is listed in the EDR Historic Auto database in 1971 only. There are no known (reported) unauthorized releases from this historic gasoline service station. The listed address is now part of a commercial shopping center which has been present since at least 1979. The former service station site is located 1,300 feet east of the Project alignment in the upgradient direction, and will not impact the project.
AZ343	Goodwill Industries of San Diego County 865 East H Street Chula Vista, CA 91910	Goodwill retail store	Site is listed in the CERS HAZ WASTE and CERS databases as a hazardous waste generator and chemical storage facility. Listed wastes include household hazardous waste flammable liquids, oil based paints, thinners acetone, corrosive liquids, pesticides, flammable gas cylinders, and aerosols. There are no known (reported) unauthorized releases. This retail store site is located 1,300 feet east of the East H Street Alternate alignment in the upgradient direction, and will not impact the project.

Based on our review and evaluation of the EDR report and visual observations during our field reconnaissance visit, we have also identified one site/case which has a high likelihood of posing an environmental risk to the Otay 2nd PL Phase 4 project. This site/case is listed and summarized in Table 2 on the next page.

TABLE 2

Summary of High Risk Sites

EDR Map ID	Site Name/Address	Primary Business Activity/Operation	Reasons for Potential Risk Designation
H43 thru H63	Bonita Valley Auto Care/ Unocal Service Station #6409 3995 Bonita Road Bonita, CA 91902	Gasoline service station	Historic gasoline service station site dating to at least 1971. Site maintains two USTs containing unleaded fuel and one UST containing diesel fuel. A UST containing waste oil was removed in 1997. Following the removal Total Recoverable Petroleum Hydrocarbon (TRPH) concentrations of up to 460 parts per million (ppm) were detected in the waste oil tank excavation. In October of 1997 the diesel and unleaded USTs were exposed to allow installation of spill protection, which involved the removal of up to 4-feet of soil. Gasoline range hydrocarbons with maximum Total Petroleum Hydrocarbon as Gasoline (TPH-g) concentration of up to 6,950 milligrams/kilogram (mg/kg) were detected in the stockpiled soils, with benzene detected at concentrations of up to 0.33 mg/kg, and the fuel additive MTBE at concentrations of up to 5.3 mg/kg. The diesel UST stockpile revealed a TPH-d concentration of up to 3,500 mg/kg. Due to the contamination, DEH Case No. H12355-001 was opened on October 15, 1997. The case oversight was provided through the DEH's Site Assessment and Mitigation (SAM) program. Investigation including soil borings and the installation of fifteen (15) onsite and offsite monitoring wells was performed between 1999 and 2011. URS Corporation (2011) performed quarterly monitoring of fourteen (14) onsite and offsite wells in June of 2011.

TABLE 2

Summary of High Risk Sites

EDR Map ID	Site Name/Address	Primary Business Activity/Operation	Reasons for Potential Risk Designation
H43 thru H63 (cont'd)	Bonita Valley Auto Care/ Unocal Service Station #6409 3995 Bonita Road Bonita, CA 91902	Gasoline service station	The groundwater was analyzed for TPH-g, benzene, toluene, ethylbenzene and total xylenes (BTEX), and the fuel additives MTBE, TBA, DIPE, ETBA, TAME, naphthalene, and ethanol. TPH-g was detected at concentrations ranging from 75 micrograms/liter (ug/l) to 21,000 ug/l. Benzene was detected at concentrations above maximum contaminant levels (MCLs) for drinking water in three wells, and MTBE was detected above MCLs in two wells. TBA was detected below MCLs in all wells. URS (2011) submitted a Corrective Action Plan (CAP) report, which recommended natural attenuation with no further action be the preferred means of site remediation. This opinion was based on the absence of liquid-phase hydrocarbons at the site, that the dissolved-phase concentrations were not significant and showed decreasing trends over time, and that the contaminant plume was adequately assessed. URS estimated that the dissolved-phase benzene, ethylbenzene and MTBE would attenuate to concentrations below MCLs in the years 2041, 2020 and 2013, respectively. URS also determined that the site posed no significant risk to human health or to the environment. The DEH (2011) concurred, and the case was closed on December 20, 2011.

TABLE 2

Summary of High Risk Sites

EDR Map ID	Site Name/Address	Primary Business Activity/Operation	Reasons for Potential Risk Designation
H43 thru H63 (cont'd)	Bonita Valley Auto Care/ Unocal Service Station #6409 3995 Bonita Road Bonita, CA 91902	Gasoline service station	The URS (2011) monitoring report included maps showing contaminant concentration contours for the dissolved-phase plume. Review of the maps indicates that elevated concentrations of TPH-g, benzene, MTBE and TBA above MCLs had migrated southwest from the service station site to below the southeast portion of the Kaiser Permanente parking lot. These high contaminant concentrations are near the proposed alignment of the Otay 2nd PL Phase 4. Therefore, based on the URS monitoring there is a high likelihood of encountering petroleum hydrocarbon constituents where the proposed pipeline crosses the Kaiser Permanente parking lot. No additional monitoring has been performed since June of 2011, and all of the wells were destroyed in 2012 as per the requirements of the Site Closure. Groundwater was measured at depths of 7 feet to 11 feet bgs (elevations of 54 feet msl to 55 feet msl) during the sampling event in June of 2011. The reported direction of groundwater flow was to the west at a gradient of 0.003 ft/ft. Site is currently occupied by a Chevron gasoline service station and Bonita Valley Auto Care. Site has received past violation citations, mainly pertaining to tank filling operations, monitoring, and alarm systems. Site is also listed in the HAZNET, HWTS, CERS HAZ WASTE and CERS TANKS databases, and is identified as a RCRA-small quantity generator (RCRA-SQG) of hazardous waste.

TABLE 2

Summary of High Risk Sites

EDR Map ID	Site Name/Address	Primary Business Activity/Operation	Reasons for Potential Risk Designation
H43 thru H63 (cont'd)	Bonita Valley Auto Care/ Unocal Service Station #6409 3995 Bonita Road Bonita, CA 91902	Gasoline service station	In a telephone interview on August 11, 2022, Mr. John Senaha of the DEH stated that there is a likelihood of encountering petroleum-hydrocarbon impacted groundwater below the Kaiser Permanente parking lot. The potential of encountering contaminated soil was considered less likely, and would more likely be limited to the capillary fringe. He stated that for the underground pipeline installation work the City could enter the Voluntary Assistance Program with the DEH, who would provide environmental oversight during the construction. Mr. Senaha also stated that an NPDES permit would be required to address the potentially contaminated groundwater encountered during the pipeline construction. The NPDES permit would be obtained from the California Regional Water Quality Control Board's San Diego Regional office.

5.2 Conclusions

The Otay 2nd PL Phase 4 study area occupies the Sweetwater River valley and mostly hilly terrain to the south of the river valley. The study area includes a mix of residential and commercial developments, Glenn Abbey Cemetery, as well as open space. Shallow groundwater is anticipated

in the Sweetwater River valley, with shallow perched groundwater anticipated for the Telegraph and Rice canyon trenchless crossings.

The EDR records indicate that there are no sites/cases listed in the ENVIROSTOR database maintained by the DTSC, for sites with known contamination or for sites where there may be reason to investigate further. Additionally, there are no sites on the National Priority (Superfund) List, nor are there any landfill or solid waste disposal sites in the study area.

LUST Cases

EDR listings indicate a total of two LUST cases occurring at one gasoline service station site within 0.25 miles of the project alignments, as documented by the San Diego County DEH. The cases involved petroleum hydrocarbon contamination of soil and groundwater at the Bonita Union 76/Tosco 76 gasoline service station at 3995 Bonita Road (See EDR Map ID Nos. H43 thru H63). Analytical sampling of up to 15 onsite and offsite monitoring wells determined that a contaminant plume originating from the service station site had migrated to the west, below the parking lot of an adjacent Kaiser Permanente facility. Contaminants of concern included benzene, ethylbenzene and MTBE which were at concentrations above MCLs for drinking water as of the last sampling event in the second quarter of 2011. An environmental consultant, URS Corporation, determined that the contaminant plume did not pose a threat to human health or to the environment with the given site conditions. The consultant further determined that the contaminants would decrease to below their respective MCLs through natural attenuation without additional mitigation. The case was closed by the DEH in December of 2011, and all of the monitoring wells were destroyed in 2012.

The groundwater contaminant plume as determined by the 2nd quarter of 2011 sampling event was located in the general area of the proposed Otay 2nd PL Phase 4 Project alignment. The depth to groundwater varied from approximately 7 feet to 11 feet bgs in nearby wells, and therefore it is considered likely that petroleum hydrocarbon-impacted soil and groundwater originating from the Bonita Union 76/Tosco 76 will be encountered along the portion of the project alignment below the Kaiser Permanente parking lot which is shown on Figure 1. There is also a potential of encountering elevated petroleum hydrocarbon vapors along this portion of the project alignment.

CPS-SLIC Cases

The EDR listings indicate one CPS-SLIC case within 0.25 miles of the project alignments. This case involved a minor surface oil spill that occurred in 1989. The case has been administratively closed since 2012. Any residual contamination from this case will not affect the Project.

Active USTs and ASTs

The EDR database indicate that there are three active UST sites at two gasoline service stations within 0.25 miles of the project alignments (See EDR Map ID Nos. H43, J73 and J79). One of these sites was also a former LUST case at a Bonita Union 76/Tosco 76 gasoline service station (See EDR Map ID Nos. H43 thru H63). There are no known active leaks from the registered USTs at either of these active service stations.

There are no reported ASTs in the project study area.

CERS HAZ WASTE List

This is a list of sites in the Cal EPA's Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste on-site Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA Large Quantity Hazardous Waste Generator programs. A total of eight CERS HAZ WASTE sites are located within 0.25 miles of the project alignments. None of these sites are anticipated to impact the proposed project.

Other Potential Hazards

The EDR listing indicate a total of twelve CHMIRS sites within 0.25 miles of the project alignments. Five of these cases were relatively minor sewage spills, two cases involved acid spills, one case involved a small leak of mineral oil from SDG&E equipment, one case involved a release of mercury at a UPS facility, one case reported a small surface release of gasoline at a service station, and one case is of an unknown nature. These spills were cleaned up and contained, and will not impact the Project.

One other CHMIRS case was the reporting leakage of gasoline from USTs at the Bonita Union 76/Tosco 76 service station. This case appears to have initiated DEH Case No. H12355-001 (See EDR Map ID Nos. H43 thru H63).

EDR listings indicate a total of 9 storm water permits issued through CIWQS involving temporary construction projects, and 4 NPDES permits for storm water discharge to waters of the U.S. One CIWQS permit and one NPDES permit were for a site in Anaheim, California. None of these cases are anticipated to impact the Otay 2nd PL Phase 4 Project.

The EDR records also indicate a total of 7 historic automotive sites at 6 addresses, and 1 historic cleaners site in the study area. Two of the automotive sites are operating gasoline service stations, and the remainder of historic automotive and cleaners sites are no longer in operation. There are no active cases at any of these sites.

The EDR records also report a total of 73 HAZNET sites within 0.25 miles of the project alignments. These cases involve the transport of hazardous waste only, and therefore will not affect the project alignment. EDR records also indicate 121 sites/cases on the HWTS database, 59 sites/cases on the Facility Index System/Facility Registration System (FINDS) and Enforcement and Compliance History Information (ECHO) databases, and 20 sites/cases on the CERS database. These sites/cases involve the storage, transport and disposal of hazardous materials and waste, and will not affect the Project alignments.

Although not contained in the EDR records, there is a potential for contaminated soil conditions caused by past agricultural usage of fertilizers, pesticides, and herbicides. Review of aerial photographs and topographic maps indicates that portions of the Sweetwater River valley near the project alignment were previously utilized for agricultural. The agricultural developments have since been largely replaced with residential housing. It is our opinion that there is a low potential of encountering agricultural chemicals in the study area.

Soil contamination due to other undocumented releases or illegal dumping of hazardous wastes may be encountered in the study area. Additionally, there is a potential of encountering aerially-deposited lead resulting from vehicular exhaust emissions prior to the elimination of lead from gasoline fuels in the mid-1980s. The project alignments are covered by pavement and/or extend through open space areas, which serves to minimize the potential of lead contamination.

5.3 Recommendations

Based on currently available information, it is our opinion that there is a high potential that trenched excavations and dewatering operations performed in the Kaiser Permanente parking lot in the northwest portion of the Project alignment will encounter contaminated soil and groundwater (see Figure 1). There is also a potential of exposure to vapor intrusion during earthwork construction along this portion of the project alignment. Therefore, we recommend that soil and groundwater analytical samples be collected from geotechnical borings located within this segment of the project alignments. The testing program should include, but not limited to, the following tests.

- Total Petroleum Hydrocarbon as Gasoline, BTXE and MTBE (EPA 8015 & 8021);
- Oil and Grease Compounds (EPA 1664);
- Title 22 Metals (TTLC);
- Title 22 Metals (STLC); and
- Hexavalent Chromium.

Prior to the start of the demolition and earthwork activities it is recommended that the contractor prepare a Community Health and Safety Plan (CHSP) for review and approval by the City and County of San Diego. The issues to be addressed in the CHSP should at a minimum include the monitoring, testing and handling of petroleum-impacted soil and groundwater, if encountered. An NPDES permit obtained through the California Regional Board will also likely be required. The contractor should be prepared to handle and dispose of such materials in accordance with current industry practices and applicable Local, State and Federal regulations. The CHSP should also address the proper Personal Protective Equipment (PPE) for construction workers doing the pipeline installation.

A Soil Management Plan (SMP) is recommended as a means of preventing delays in the event that petroleum-hydrocarbon contaminated soil is encountered during the project. The SMP can be included as part of the CHSP.

With the exception of the Kaiser Permanente parking lot, the potential of encountering contaminated soil and groundwater along the remainder of the project alignments is considered low. Shallow groundwater is known to exist in the Sweetwater River valley, and is anticipated to be encountered at the Telegraph Canyon and Rice Canyon trenchless crossings. It is recommended that the groundwater, if encountered, be tested for the presence of hazardous substances.

6.0 LIMITATIONS

This Phase I ESA report has been prepared for the sole use of Rick Engineering and the City. The information obtained is only relevant for the dates of the records that were reviewed and as of the date of our last site visit on August 9, 2022. Consequently, this report will require periodic updates as conditions within the project study area may change or as additional information becomes available. Other parties who use or rely on the findings and conclusions of this report shall do so at their own risk. Furthermore, because the scope of this Phase I ESA was limited, it is possible that currently unrecognized conditions or contamination might exist along the project alignments.

AGE has performed this assessment in accordance with the authorized scope of work and generally accepted practices in the field of environmental consulting engineering. No warranties, either expressed or implied, are made by AGE. The records search performed for this study was limited to information available from public sources. This information is subject to continuous change and is frequently incomplete. Unless AGE has actual knowledge to the contrary, information obtained from interviews or provided to AGE by the regulatory agencies has been assumed to be correct and complete. AGE does not assume any liability for misrepresentation of information or for items not visible, accessible, or present at along the project alignments at the time of our field reconnaissance visit.

There is no investigation which is thorough enough to preclude the presence of substances on the subject property which presently, or in the future, may be considered hazardous. Because regulatory agency evaluation criteria are constantly changing, concentrations of contaminants that are currently considered to be acceptable may, in the future, become subject to different and more stringent regulatory standards.

Where records indicate that prior remedial work or tank removals have occurred, there is a risk that the work may not have been performed correctly or completely. In these cases, if the regulatory agency has approved the closure of the tank or other work done, we have assumed that the work was done properly and in complete conformance with said regulatory agency standards.

Professional opinions, conclusions, and judgments expressed in this report are based on AGE's understanding and interpretation of current regulatory standards and the available historical information and documents reviewed, and visual observations of the current conditions along the project alignments, and should not be construed as legal opinions.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Worker: JC
RB Case Number: 9UT3620
Local Agency: SAN DIEGO COUNTY LOP
File Location: Local Agency
Local Case Number: H12355-001
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The Site is located on the western corner of the intersection of Bonita Road and Willow Street in the Community of Bonita, California. The above ground structures at the Site consist of a single-story convenience store and a two service bay automotive repair shop, five dispenser islands, and an above ground waste oil storage tank. Two 10,000-gallon unleaded fuel underground storage tanks (USTs) are located in the southern portion of the Site, and one 12,000-gallon UST is located in the northern portion of the Site. During October 1997, one diesel UST and two unleaded gasoline USTs were exposed to facilitate the installation of spill protection around the fills and turbines. The upper four feet of fill was removed during this

operation. Gasoline-range hydrocarbons with a maximum TPH-g concentration of 6,950 milligrams per kilogram (mg/kg) were detected in stockpiled soil generated during the uncovering of gasoline product tanks. Benzene (0.33 mg/kg) was detected in one of four soil samples collected from the gasoline product tanks stockpiles, MTBE (5.3 mg/kg) was detected in soil samples collected from the gasoline product tanks cavity, Total petroleum hydrocarbons as diesel (TPH-d) (3,500 mg/kg) was detected in diesel product tank stockpile. Since the USTs were not removed, the vertical and lateral extent of hydrocarbon-affected soil was not defined during this investigation. During November 1997, one 500-gallon steel waste oil tank was replaced at the site, Total recoverable petroleum hydrocarbons (TRPH) (460 mg/kg) were detected in waste oil tank excavation soil samples. Subsequently, the DEH issued a letter identifying unauthorized release number H12355-001 at the Site and requesting a work plan for assessment. Fifteen groundwater monitoring wells have been installed at the Site. Groundwater was monitored and sampled between November 1999 and June 2011. Distribution of soil contamination is limited to the gasoline dispensers, USTs and in capillary fringe soils approximately 120 feet downgradient of the dispensers and USTs. The dissolved phase groundwater plume extends approximately 150 feet offsite to the southwest. Based on historical soil sampling and groundwater monitoring data, it appears that the on-site station building, which is the nearest occupied structure, does not lie over areas where soil or groundwater contain significant concentrations of petroleum hydrocarbons. In addition, the groundwater plume does not appear to extend beneath any offsite buildings. The total residual hydrocarbon mass in soil in the subsurface is estimated to be approximately 303 pounds or approximately 51 gallons. This represents an approximate soil volume of 2,250 cubic yards. LPH has not been present in the monitoring wells since groundwater monitoring/sampling began in 1999. The dissolved-phase plume has been adequately assessed. Dissolved-phase benzene concentrations are expected to attenuate to a concentration at or below the MCL, which is 1.0 ug/l, in approximately the year 2041. Dissolved-phase ethylbenzene concentrations are expected to attenuate to a concentration at or below the MCL, which is 300 ug/l, in approximately the year 2020. Dissolved-phase MTBE concentrations are expected to attenuate to a concentration at or below the primary MCL, which is 13 ug/l, in approximately the year 2013. A Corrective Action Plan (CAP) was submitted on July 9, 2011. The CAP concludes that remediation of residual hydrocarbon concentrations in soil and groundwater are expected to achieve the targeted cleanup goals through the natural attenuation process. The Public Participation process for the above-referenced Corrective Action Plan (CAP) has been completed. The public comment period ended on September 27, 2011. The Site Assessment and Mitigation Program (SAM) received no comments. . No active supply wells were identified within ½ mile of the Site. According to the environmental consultants registered professional, the Site presents no significant risk to human health and the environment. DEH concurs with this conclusion.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Inspection Date: 2019-01-30T00:00:00.000
Violation Code: 2060020 (TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

Last Update: 2022-01-15T02:08:43.000
Inspection Date: 2019-01-30T00:00:00.000
Violation Code: 2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

F005

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

U002

Waste Description:

2-PROPANONE (I) (OR) ACETONE (I)

Waste Code:

U240

Waste Description:

2,4-D, SALTS & ESTERS (OR) ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS (OR) DICHLOROPHENOXYACETIC ACID 2,4-D

Waste Code:

U279

Waste Description:

U279

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	A United Parcel Service (UPS) driver picked up a shipment from a local UPS store. During the loading of the truck, the driver identified a damaged package that was leaking. UPS personnel identified the substance as mercury. The mercury dripped onto the floor of the store as well as the floor of the delivery truck. The driver and five store personnel remained at the front of the store while the store owner contacted the fire department. The San Diego Fire Department, Chula Vista Police Department, San Diego Hazardous Materials Department, National Response Corporation (NRC), and the San Diego County Environmental Health Department responded to the scene. The San Diego Hazardous Materials Department performed testing of store personnel and impacted areas. No injuries were reported. The staff were given a brief and allowed to leave the area. The NRC will be performing a cleanup. The store is expected to remain closed until further notice. No evacuations of adjacent areas were necessary. The item inside the damaged package was later identified as a Metering Stick.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110055875012

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/14/2022

Date Data Arrived at EDR: 06/15/2022

Date Made Active in Reports: 06/21/2022

Number of Days to Update: 6

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 06/15/2022

Next Scheduled EDR Contact: 10/03/2022

Data Release Frequency: Quarterly

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/25/2022

Date Data Arrived at EDR: 04/26/2022

Date Made Active in Reports: 07/15/2022

Number of Days to Update: 80

Source: Department of Toxic Substances Control

Last EDR Contact: 04/26/2022

Next Scheduled EDR Contact: 08/08/2022

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Date Data Arrived at EDR: 04/15/2020

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/03/2021

Date Data Arrived at EDR: 02/11/2022

Date Made Active in Reports: 05/06/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Contact: Sani Sutanto, Principal

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Allied Geotechnical were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

APPENDIX D

PHOTOGRAPHS

EDR Map ID Nos. H43 through H63 - View across Kaiser Permanente parking lot.
A groundwater contaminant plume from a former Union 76 service station
has migrated underneath the parking lot in the general vicinity of the project alignment.

EDR Map ID No. 11 - View from Kaiser Permanente parking lot to Willow Street bridge
over Sweetwater River. CIWQS and NPDES permits were required for the bridge construction.
The NPDES permit remains active.

**PHOTOGRAPHS
OTAY 2ND PIPELINE PHASE 4**

**PROJECT NO.
223 GS-22**

ALLIED GEOTECHNICAL ENGINEERS, INC.

PHOTOGRAPH D-1

EDR Map ID No. AI188 - Former Bonita Village Cleaners at 4050 Bonita Road.
There are no documented leaks or spills from the former cleaners.
Site is currently occupied by Bonita Shoe Repair.

EDR Map ID Nos. X150 and X151 - Remodeling of Jack-In-The-Box at 4011 Bonita Road.
A gasoline service station occupied the site from at least 1949 until the mid 1970s,
but there are no documented unauthorized releases from the former service station.
Jack-In-The-Box is listed as a chemical storage facility.

**PHOTOGRAPHS
OTAY 2ND PIPELINE PHASE 4**

**PROJECT NO.
223 GS-22**

ALLIED GEOTECHNICAL ENGINEERS, INC.

PHOTOGRAPH D-2

EDR Map ID No. AF186 - Dominion West Office Suites at 4045 Bonita Road.
An AT&T Mobility suite is listed as a chemical storage site due to lead-acid batteries.
The adjacent American Medical Response at 4035 Bonita Road is also listed as a chemical storage facility.
There are no documented leaks or spills from either facility.

EDR Map ID Nos. K82 through K87 - Home Depot at 725 Plaza Court.
This store is listed as a hazardous waste generator and chemical storage facility,
but there are no undocumented releases.

**PHOTOGRAPHS
OTAY 2ND PIPELINE PHASE 4**

**PROJECT NO.
223 GS-22**

ALLIED GEOTECHNICAL ENGINEERS, INC.

PHOTOGRAPH D-3

EDR Map ID Nos. P102 through P104 - Ross Store and Dollar Tree at 820 and 816 Paseo Del Rey.
Both stores are listed as hazardous waste generators, but there are no undocumented releases.

EDR Map ID No. AW331 - Chevron service station at 770 Plaza Court.
The station is listed as a hazardous waste generator and chemical storage facility,
but there are no undocumented releases.
