

ANNUAL EVALUATION FOR FY26 CITYWIDE GRANT ACTIVITIES

OFFICE OF MAYOR TODD GLORIA

SEPT. 2026

BACKGROUND

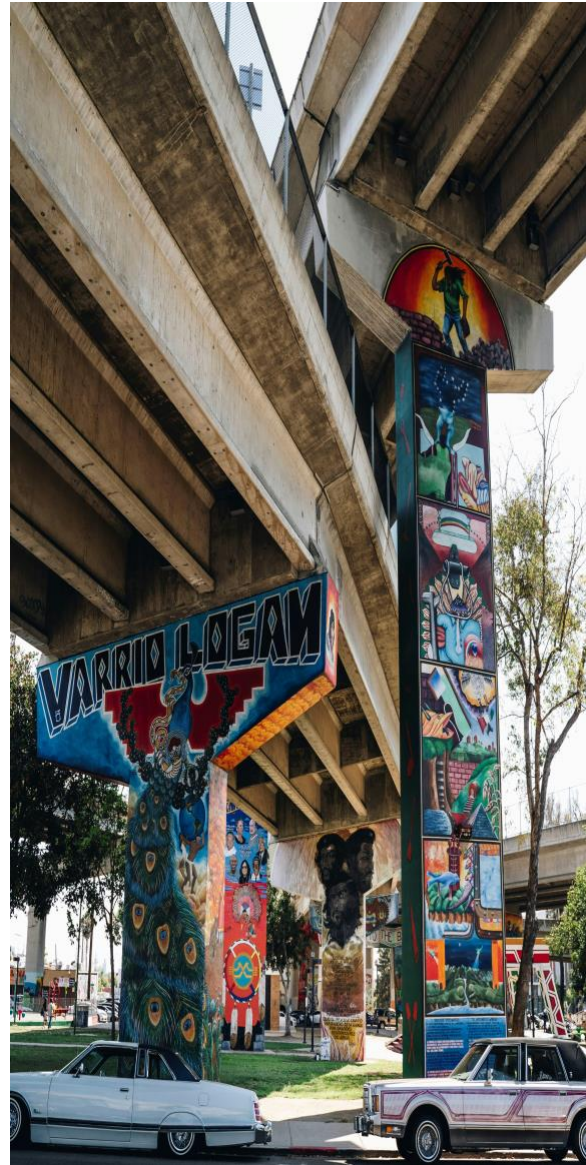

In 2019, the City implemented recommendations from a performance audit of its grant management practices. Since that time, the grants division has built out the Citywide grant management function by developing streamlined processes to strengthen strategic alignment, provide training, facilitate robust internal reviews, share resources and funding opportunities Citywide and improve fiscal accountability.

The Fiscal Year (FY)2026 Citywide Grants Report is the City's eighth annual report containing an inventory and analysis of all grant activity from the previous fiscal year. The report serves to provide a comprehensive overview of all Citywide grant activity, with the goal of documenting the City of San Diego's overall grants performance.

DIVISION ROLE

The Government Affairs Grants Team works closely with the City's grant-active departments to ensure that submitted grant applications are reviewed and approved by our Chief Branch Officers, the Department of Finance, and the Mayor. Since the team's creation, it has implemented the following process enhancements:

- Developed the Grants Review Team process, an automated approval system for grant applications, which has enhanced inter-departmental coordination and internal controls.
- Streamlined communication with City staff, funders, and stakeholders regarding federal, state, local, and private funding programs.
- Designated primary points of contact among departments to provide technical assistance, training, and partnership opportunities with external regional agencies and community-based organizations.
- Established a Grants Working Group led by Government Affairs and attended by designees from grant-active departments as a resource for training, best practices, problem-solving and process improvement.
- Established a new Citywide Grants Library, a central repository for staff across the City to view submitted grant applications, funder debrief notes, and grant agreements.
- Initiated the first Grants Strategic Plan, which will identify funding needs, capacity, and priorities for grants-active departments.

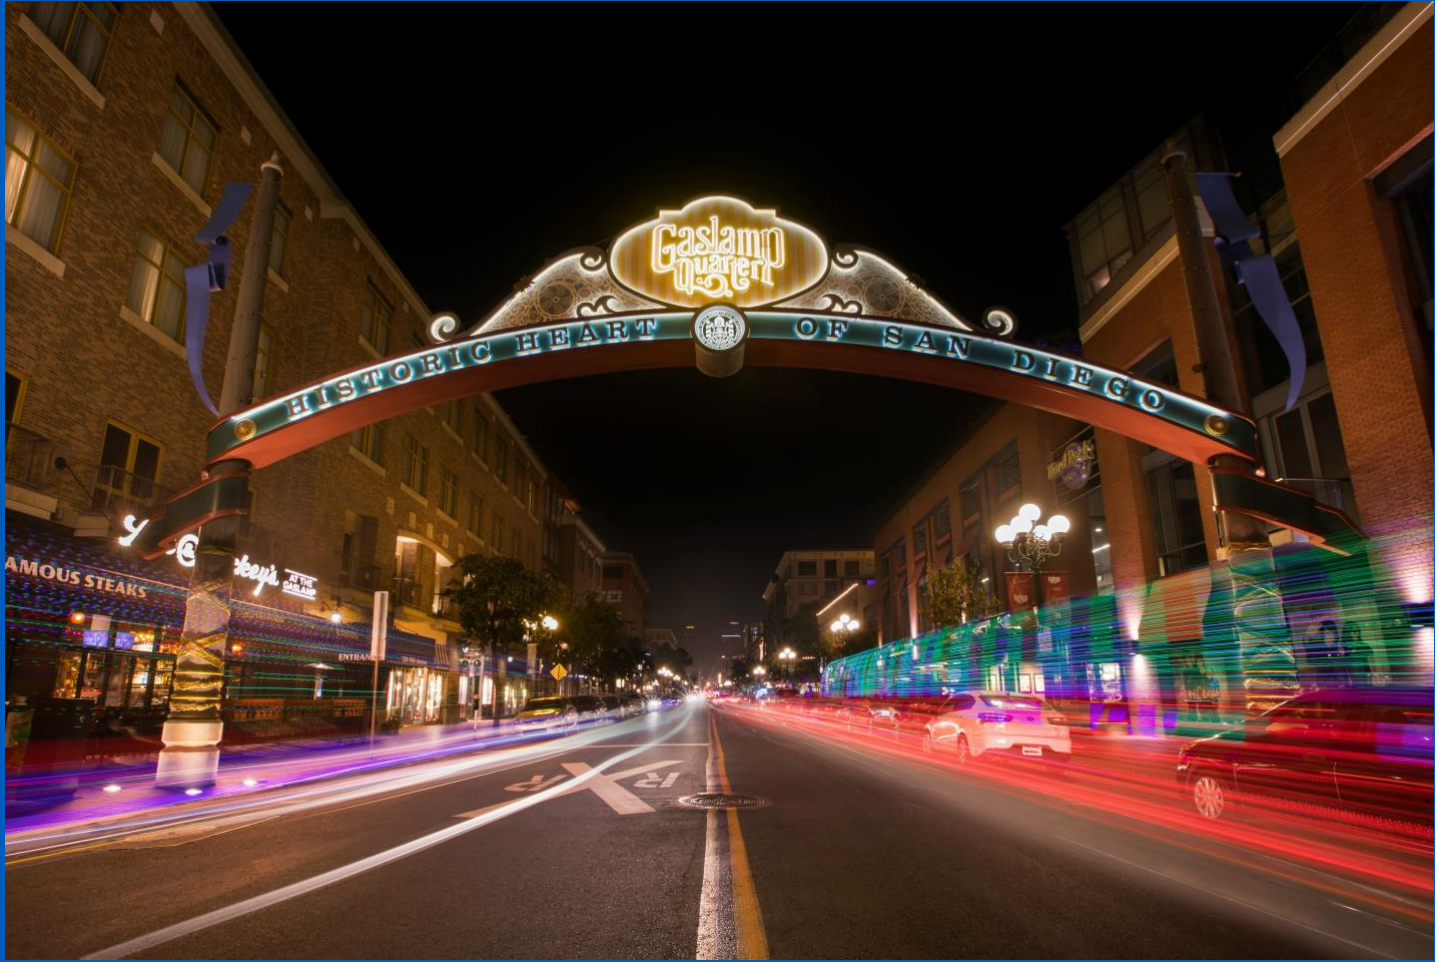

As the City continues building on its grant successes, the City Council approved two additional Grants Program Coordinator positions in the FY22 budget to support operational departments in their pursuit of funding opportunities. These positions were filled in early 2023 and reported to the Office of the Chief Operating Officer. In FY25, these positions were reorganized to fall under Government Affairs in the Office of the Mayor, bringing the grants staff to three full-time employees. To balance the budget, one Grants Program Coordinator position was eliminated in FY27 which reduced grants staff to two full-time employees: a Grants Program Manager and a Grants Program Coordinator. The Grants Program Manager oversees the Grant Review Team process in OnBase and issues grant approval memos, manages the implementation of new programs and initiatives, coordinates the quarterly meetings and presentations for the Grants Working Group, processes letters of support for both internal and external applications, and develops the Annual Grants Strategic Plan. The Grants Program Coordinator assists in identifying funding opportunities, recommending competitive projects for submittal, and developing and submitting grant applications.

OVERVIEW

The annual Citywide Grants Report tracks grant funding applied by, and awarded to, the City each fiscal year. The City defines grant funding as “monetary funding, equipment, in-kind goods or services, or other assets provided by a granting agency to the City. Grants awarded to the City are funds or products to fund a specific project, activity, or program that requires some level of compliance and reporting.”

The FY26 report illustrates a continued multi-year decline in the City’s grant awards, with awards consistent with last year’s figures. This can be attributed to budget reductions, which impacts both project readiness and availability of matching funds. Due to multi-year reductions in City revenues, there have been fewer Capital Improvement Program (CIP) projects initiated and progressed far enough in the design process to pursue grant funding. Additionally, shifting political priorities, especially at the federal level has resulted in a mismatch of available funding. While the State continues to fund infrastructure projects related to sustainability and climate action, there has been a clear shift away from sustainability practices at the federal level and a shift from funding major cities in favor of funding rural areas. Locally, the City has slowed its development of new City facilities and infrastructure in favor of repairing or improving existing infrastructure, due to concerns about increasing General Fund costs for operating and maintaining new facilities without proportionate growth in General Fund revenue. Despite this local shift, both state and federal grant opportunities still skew toward awards for new facilities and infrastructure over funding maintenance and repair of existing infrastructure.

In FY25, the City received no direct federal or state budget allocations due to the exclusion of community projects in the federal appropriations process and a constrained State FY24-25 budget. In FY26, Government Affairs celebrated more success in securing federal and state community project funding allocations. Differing from traditional application-based grant funds, these competitive allocations are secured through Government Affairs’ continued advocacy and partnership with our federal and state elected delegations. Their availability is subject to changes in policy, political climate, budgetary conditions, and leadership changes in Sacramento and Washington, D.C. In FY25, the City saw a sharp rise in grant application submissions, up 80% over FY24. In FY26, this number declined to 99 grant applications, compared to 111 in FY25, with total value of applications falling to \$418 million from nearly \$600 million in FY25. While the number and value of the City’s collective grant applications declined this year, staff managing the City’s 348 active grants remain at- or over-capacity with grant administration activities, including invoicing, reporting, and compliance. The Parks and Recreation Department manages the most active grants of any department, with 46 awards as of the time of this report.

FY26 GRANTS PROGRAM HIGHLIGHTS

- FY26 Citywide Grant Activity
- Performance Audit
- Accomplishments
- Trump Administration Impacts
- Looking Ahead

FY26 CITYWIDE GRANT ACTIVITY

It is important to note that many awards contained in this report were applied for in or before FY26, and we include multi-year grant disbursements every year until the end of their grant terms.

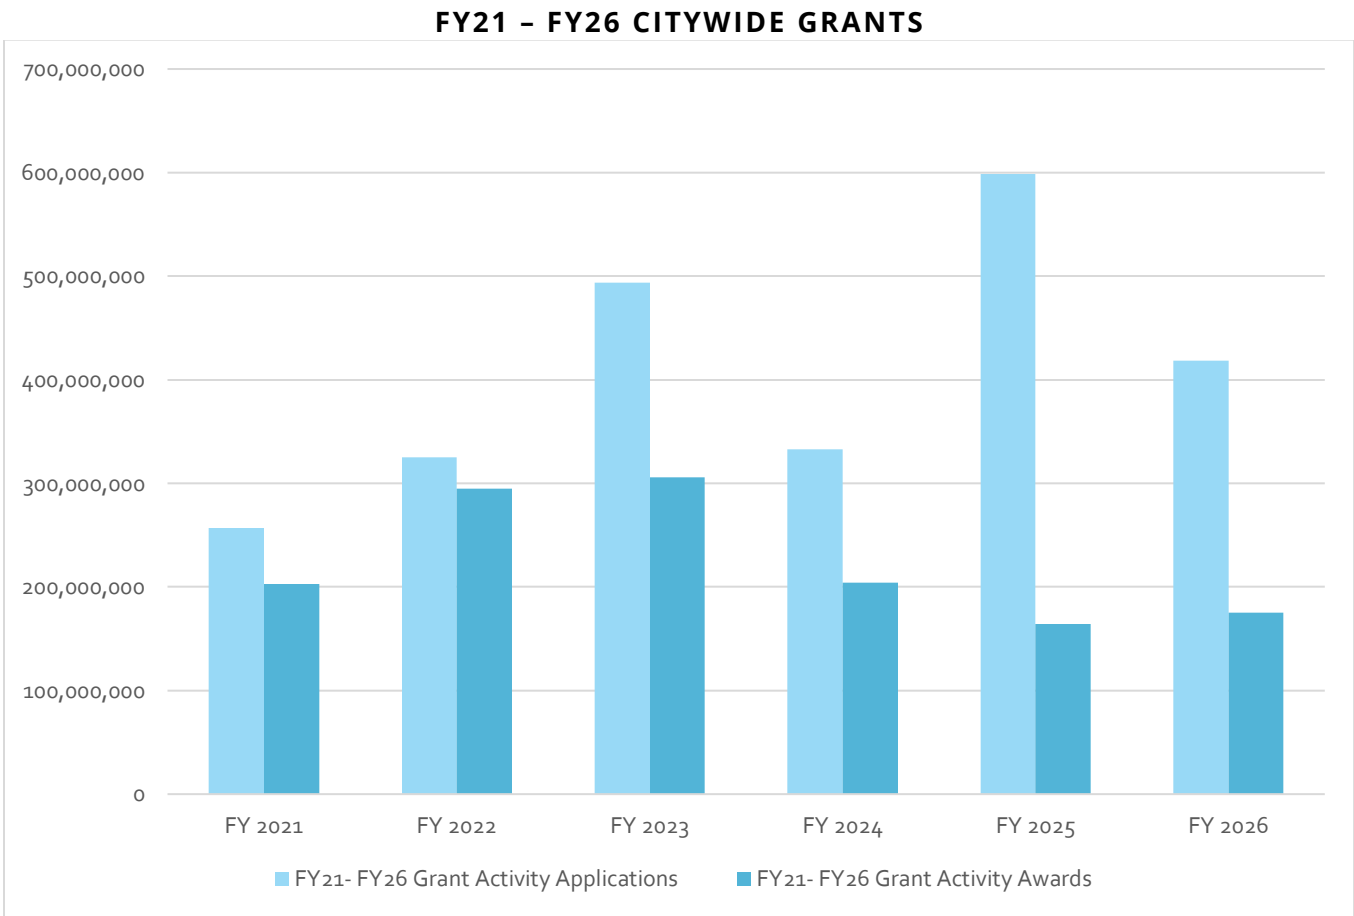

FY 2026 Grant Activity	Total #	Value
Applications	99	\$ 418,165,400
Awards	45	\$ 175,472,086

APPLICATIONS

In FY26, the City submitted a total of **99 grant applications valued at \$418,165,400**, compared with 111 applications valued at \$598,953,201 in FY25.

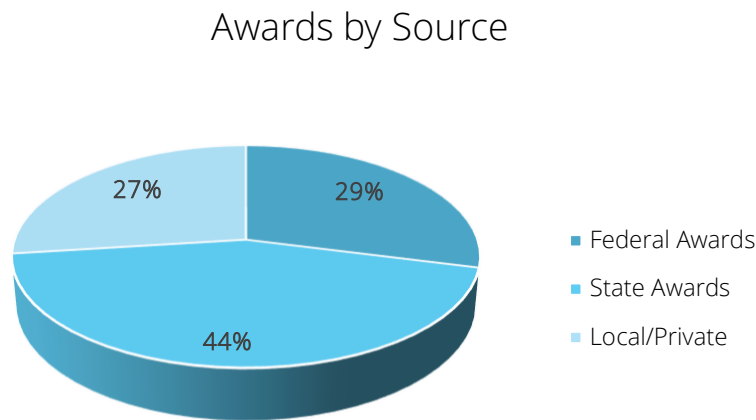

AWARDS

In FY26, the City received a total of **45 awards valued at \$175,472,086** compared to 36 awards valued at \$164,168,103, in FY25.

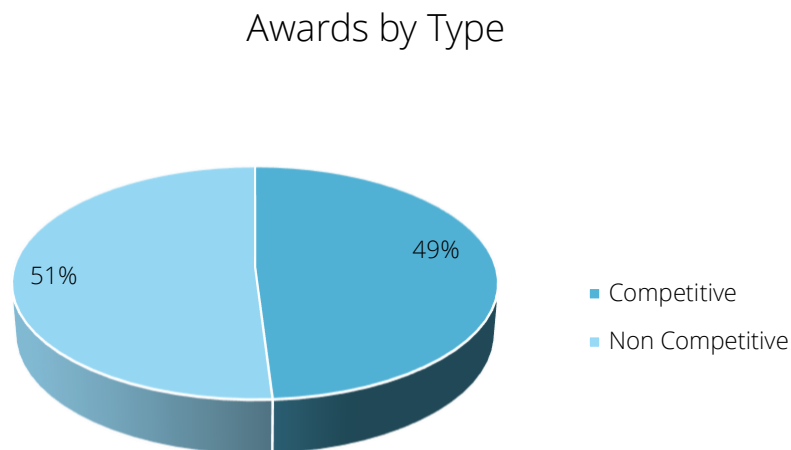

AWARDS BY SOURCE

The City's FY26 grant awards consisted of 44% State funding, 29% Federal funding, and 27% came from local and private sources.

AWARDS BY TYPE

51% of the FY26 awards were noncompetitive (formula-based) awards, while the remaining 49% came from competitive grant programs.

PERFORMANCE AUDIT

In FY25, the City Auditor concluded their second performance audit of the grants program to determine if the City of San Diego is competitive in their planning and pursuit of grant funding, and if the City's grant policies and procedures align with industry best practices. The City Auditor noted significant improvements and increased success of the Citywide Grant Program since their first audit in FY18. The City Auditor concluded that since Mayor Gloria has taken office, the Citywide Grant Program has increased its funding awards by 81%, with over \$1 billion in awards. However, the City Auditor also concluded that the grant program would benefit from additional budget investment and process improvements.

In FY26, the Grants Team continued work on implementing the Auditor's recommendations. This included developing a Grants Library to store previous grant applications, materials and funder debrief notes, as well as implementing an annual Grants Strategic Plan to better understand funding needs and priorities and improve resource coordination. The Grants Library was officially launched in summer 2026 and will help create a bank of institutional knowledge, promote cross-pollination of project and program opportunities, and offer wider access and experience to staff seeking to learn from previous grant pursuits. Additionally, the Grants Team developed a framework and protocols for a Citywide Grants Strategic Plan, which will be composed of department-identified goals, priorities, opportunities, and capacity to apply for and manage grants. Government Affairs issued a Call Memo in August 2026 requesting grant-active departments provide information on their active grants, priority projects, target grant program, project priorities, and staff capacity and constraints. Department memos are due in October 2026. Government Affairs will review, evaluate, and synthesize department memos and release an FY28 Citywide Grants Strategic Plan in early 2027, ahead of the FY28 City budget adoption.

ACCOMPLISHMENTS

From 2018 to 2024, the vetting and approval of grant applications was managed through a Microsoft SharePoint website, which sent Grants Review Team forms ("GRTs") to the Grants Review Team, comprised of Department of Finance, Government Affairs, Deputy Chief Operation Officers and the Chief Operating Officer, for review and approval prior to the application's submittal to the grant funder.

To take advantage of operational efficiencies and reporting capabilities, Government Affairs led the effort to transition the GRT process from SharePoint to OnBase in FY25. The transition to OnBase resulted in a net positive experience for department staff, who no longer needed to route items through multiple software applications. The transition was seamless, as most staff already had proficiency in the OnBase system and OnBase allows originators to route GRTs to other internal department staff and department directors, facilitating pre-review coordination that was not possible under the previous SharePoint process. For compliance tracking and reporting, Government Affairs now generates weekly status reports for City leadership that outline each grant application at various stages of its development.

Each year, Government Affairs hosts quarterly meetings for grants-active staff called the Grants Working Group (GWG). This year, staff led four GWG meetings with 21 different grants-active departments and an average of 60 regular attendees per meeting. The GWG covered a variety of topics, such as training on grant application requirements, grant compliance issues, annual report numbers, the FY25 performance audit recommendations and implementation, and changing grant requirements in light of Trump Administration executive orders.

In addition to requesting letters of support for the City's own grant applications, Government Affairs also produced letters of support from the Mayor to dozens of external agencies in support of their grant applications. Supporting other governmental agencies and community-based organization's grant applications is one way that we leverage our collective efforts to bring more grant dollars and investment to the San Diego region.

TRUMP ADMINISTRATION IMPACTS

The change in presidential administration mid-FY25 has resulted in ongoing changes and disruptions to federal grant programs. This is an ever-evolving environment that requires continual monitoring. The changes have included reversals in policy to no longer fund green and sustainable infrastructure, the pause and/or elimination of federal funding opportunities that the City would normally have applied for, the ineligibility of entities with "DEI" policies, and issuing executive orders that conflict with existing federal law. In FY26, the federal government proceeded to amend grant application requirements to include certifications that applicants will comply with Trump administration policies and executive orders. In response, City departments and the City Attorney's Office worked together to craft individual, tailored disclaimers to be included with each federal grant application that preserve the City's rights to challenge the administration's assertions. The City Attorney continues to celebrate successes in court on federal grant issues. Additionally, in FY26, the Government Affairs team worked closely with the County of San Diego and the City Attorney's Office to oppose the proposed Office of Management and Budget (OMB) Rule, released in May 2026, that sought to: eliminate fixed grant awards, politicize the grant award process by shifting decision-making to senior political officials, allow changes to the grant requirements mid-term and at will, and allow the cancellation of grant awards at any time during their grant term if the political priorities from the federal administration change. The proposed OMB Rule was meant to take effect October 1, 2026; however, as of the time of this report, the OMB Rule implementation has been delayed to December 2026 due to the passage of H.R. / Continuing Resolution (P.L. 119-103), which contained a provision to delay its implementation.

LOOKING AHEAD

As part of the audit recommendations, the City would benefit from additional resources to support Citywide grant efforts including a grant-research service and as-needed grant writing contracts. The need for additional revenues to support application matching fund requirements remains the biggest inhibitor to long-term growth and success in the City's grants program. To develop competitive grant applications in the current federal and state funding landscapes, significantly more work will need to be done with departments to build a pipeline of competitive capital projects that have been vetted, developed, and paired with matching funds.

Currently, the Grants Team in Government Affairs allocates approximately 50% of staff time toward the research and vetting of Notices of Funding Opportunity (NOFOs) to match available funding with existing or planned City projects and programs. This year, over 200 different grants were vetted. Departments also perform their own research and vetting of opportunities, resulting in duplicative efforts and significant City resources spent finding appropriate and eligible grants. If the City were to subscribe to a grant-research service (e.g., Euna Grants) at an estimated \$150,000 per year, it would free up staff time that could be better spent on application development and managing active grants. A grant-research service would also help identify funding opportunities that staff may otherwise miss due to competing workload demands.

Further, the City Auditor recommended that the City would benefit from having an as-needed grant writing contract to supplement staff in preparing grant applications. A budget allocation of \$250,000 for a grant writing contract could provide more capacity and supplement staff expertise. This funding is estimated to support the development of five to seven additional grant applications.

Due budget constraints in FY26, these resources were not funded. However, Government Affairs will continue to advocate for these services for future budget consideration.

Government Affairs is committed to supporting the legislative priorities set by the Mayor and City Council to aggressively compete for grants that fund the needs of our communities, while also supporting our partner agencies with shared regional benefits.
