## Methodology

Haystaq was directed to clean up several splits by the commission on 12/9/2021. This modified map 91107. It includes the changes below.
NOTE1: Districtr, the mapping platform, does not allow the splitting of census blocks, but a previous change to split a block to keep the Del Mar Mesa Preserve is reflected in the .shp file image below and will be reflected in the final map.
NOTE2: There are a number of small or 0 population splits that could not be remedied either because the split itself was approved by the commission or because the split represents a conflict between Neighborhood and Community Planning Association Lines.

Image from the Shape File Rendition of plan 92973 (with the Del Mar Preserve Modification:

Change to the underlying .shp file to split census blocks 060730083663008 and 060730083661006 to separated Del Mar Mesa Preserve from the Torrey Highlands Population -- 0 Population change

| 3 | 3 | 3 | 2 |

## How to Read Map Reports

Full reports from the Haystaq-created draft maps, as well as community-submitted district plans (through 10/12) can be found on the city website as Excel files. These reports were created by proprietary python code written by HaystaqDNA. Here is a basic primer on the components/tabs of these reports:

## Maps:

These are just images from the city's Districtr hosted website of each map.

## Populations:

When we create a plan or export a plan from Districtr, we export it as a 'block equivalency file'. Basically the U.S. Census divided all of the geography of the City of San Diego up into 'blocks'. At its most basic, a block can correspond to a city block, but the census will also use permanent geographic features (a waterway, a canyon, a ridge, a highway) to define a block. The census then published population and demographic data associated with each block (a P.L 94-171 file). Then the Statewide Database on behalf of the state of California takes that PL file and does prisoner reallocation and reassigns in-state prisoners back to their original blocks. To create the 'Populations' report we match up the blocks of each district with the blocks in this file and summarize all of the population within this district.

Defining some of the abbreviations: NL = non-Latino, AIAN=American Indian and Alaskan Native, VAP = Voting Age Population (age 18+), CVAP19 $=2019$ Citizen Voting Age Population (an estimate of eligible voters).

Deviations are calculated against an ideal population of each district. To find the ideal population we simply divide the population of San Diego $(1,389,899)$ by the number of districts(9) to find 154,433 . The raw deviation is how far off this number a district population is. The final deviation number is found by adding the absolute value of the lowest negative deviation to the highest absolute value of the highest positive deviation. Example: District 9 has the lowest negative deviation of $-3.06 \%$. District 5 has the highest positive deviation of $2.80 \%$. So the final deviation is $3.06 \%+2.80 \%=5.86 \%$

## Components:

The Component report is a list of all of the Community Planning Areas and Neighborhoods and their populations that make up a district.

## OldDistrict:

This report lists what existing city council districts and their populations make up the new proposed districts.

## Compactness:

For more information on the math behind compactness measures, here is a good resource: https://fisherzachary.github.io/public/r-output.html. For these tests, the closer the score is to 1 , the more compact the district, and the closer to 0 , the less compact the district is.

## Splits

There are two versions of the splits report. One that looks at how many districts each Community Planning Association is in and one that looks at how many districts each Neighborhood is in.

## Community Splits:

'Military Facilities', 'Reserve’ and 'Not Identified’ show up as splits, mostly because there are multiple areas with those names. They will show up as splits on almost every map.

Keep in mind physical geography when looking at neighborhood and CPA splits. For example, Los Penasquitos Canyon will show a 0 population split on some maps. This is because there is a very long and very narrow canyon that extends eastward from the community. It falls between Park Village and Mira Mesa and has 0 population. In many of the maps for reasons of compactness we will place this canyon in a different district than the area with residents.

## Neighborhood Splits:

Specifically regarding neighborhood splits: when we reduced the number of splits on the map we optimized for CPAs. Many times CPAs and Neighborhoods follow similar but not identical boundaries. Often the CPA will have its line on one side of a highway and the neighborhood the other. So there are 'many' neighborhoods that will show 0 population splits. We hold that in general you should ignore the 0 population splits.

## List of Splits That are NOT being Adjusted in Map 92973

## CPA Splits

DOWNTOWN<br>District $8 \quad$ Population 86

Commission added to unite with Barrio Logan

LINDA VISTA District $2 \quad$ Population 37
Commission Made this change based on community feedback

LOS PENASQUITOS CANYON District 6 Population 0
Purposeful Decision as this part of the canyon is non-contigous and would have impacted compactness

## Neighborhood Splits

AZALEA/HOLLYWOOD PARK District 3 Population 0
Conflict between CPA and Neighborhood boundaries.

BAY HO District $6 \quad$ Population 0
Conflict between CPA and Neighborhood boundaries.

CARMEL VALLEY District 6 Population 0
Conflict between CPA and Neighborhood boundaries.

CASTLE
District 3 Population 0
Conflict between CPA and Neighborhood boundaries.

CHEROKEE POINT District 3 Population 0
Conflict between CPA and Neighborhood boundaries.

GRANT HILL District 3 Population 0
Conflict between CPA and Neighborhood boundaries.

GRANTVILLE District $9 \quad$ Population 60
The commission did not follow the Neighborhood boundary, they followed the Highway, this segment is below the highway

LA JOLLA District $6 \quad$ Population 0
Conflict between CPA and Neighborhood boundaries.

## MIDTOWN District $2 \quad$ Population 59

Conflict between CPA and Neighborhood boundaries.

## MISSION BAY District $1 \quad$ Population 31

These are a couple of blocks that were grabbed when the commission pushed out Pacific
Beach to the neighborhood boundary

MISSION VALLEY WEST District 2 Population 0
Conflict between CPA and Neighborhood boundaries.

## NORTH CLAIREMONT

District $6 \quad$ Population 0
Conflict between CPA and Neighborhood boundaries.

NORTH PARK District $9 \quad$ Population 0
Conflict between CPA and Neighborhood boundaries.

## OLD TOWN District 3 Population 145

Conflict between CPA and Neighborhood boundaries.

RANCHO PENASQUITOS
District 6 Population 0
Conflict between CPA and Neighborhood boundaries.

## SHERMAN HEIGHTS District 3 Population 0

Conflict between CPA and Neighborhood boundaries.

SORRENTO VALLEY
District $1 \quad$ Population 74
Conflict between CPA and Neighborhood boundaries.

## STOCKTON District $3 \quad$ Population 0

Conflict between CPA and Neighborhood boundaries.

TIERRASANTA District $6 \quad$ Population 0
Conflict between CPA and Neighborhood boundaries.
