Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT
SAN YSIDRO COMMUNITY PLAN UPDATE AND
SAN YSIDRO HISTORIC VILLAGE SPECIFIC PLAN
CITY OF SAN DIEGO, CALIFORNIA
AGE Project No. 127GS-10

Dear Mr. McIntyre,

In accordance with your request, we have completed a Phase I Environmental Site Assessment of
the proposed San Ysidro Community Plan Update (SYCPU) and the San Ysidro Historic Village
Specific Plan (SYHVS). We are pleased to submit the accompanying report to present a summary
of our findings, opinions and recommendations.

Should you have any questions regarding the contents of the report or if we may be of further
assistance, please feel free to contact our office.

Sincerely,

ALLIED GEOTECHNICAL ENGINEERS, INC.

1.0 INTRODUCTION

1.1 Project Background

In accordance with the request of Helix Environmental Planning, Inc. (HELIX EPI), Allied Geotechnical Engineers, Inc. (AGE) has performed a Phase I Environmental Site Assessment (ESA) study for the San Ysidro Community Plan Update (SYCPU) and the San Ysidro Historic Village Specific Plan (SYHVSP) located in the San Ysidro community in San Diego, California.

1.1.1 San Ysidro Community Plan Update (SYCPU)

The SYCPU is a comprehensive update to the current community plan, which was adopted in 1990. The San Ysidro Community Plan covers a total of 1,863 acres within the southern tip of the City of San Diego, adjacent to Otay Mesa-Nestor, Otay Mesa, the Tijuana River Valley, and the international border with Mexico (See Figure 1).

The SYCPU includes the following eight individual elements intended to guide development: Land Use; Mobility; Urban Design; Economic Prosperity; Public Facilities, Services & Safety; Recreation; Conservation; and Historic Preservation. Each element would be updated to bring the community plan into conformance with the City of San Diego's General Plan as well as embrace current urban planning and sustainability concepts.

The Land Use Element is designed to guide future development within the community. It establishes land use designations for each portion of the community. The majority of the plan area (41 percent) would be designated for residential uses. Commercial uses and industrial development would comprise 18 percent and 2 percent of the community plan area, respectively. A total of 11 percent of the plan area would be designated for institutional uses. Parks and Open Space would cover 5 and 13 percent of the area, respectively. The balance would be occupied by transportation facilities.
SECTION ONE

INTRODUCTION

The Mobility Element is intended to improve mobility throughout the community through the development of a balanced multi-modal transportation network. The Element recommends future improvements to specific roadway segments ranging from restriping to new roadway connections. The Element also contains a number of policies designed to encourage the use of public transit including promoting pedestrian movement in the vicinity of transit and by enhancing existing bus and trolley stops.

The Urban Design Element establishes goals and policies that enhance the urban fabric of San Ysidro while retaining the historic elements that contribute to the overall character of the community.

The Economic Prosperity Element envisions a strategic approach that is focused on increasing opportunities for densification of residential and commercial development in selected parts of the community, while protecting the existing strong neighborhoods through enhancement of neighborhood villages.

The Public Facilities, Services & Safety Element identifies existing facilities and services, and addresses the capacity and needs for future services including potential sites and desired characteristics for future facilities.

The Recreation Element is intended to assure that the recreational needs of the community are met. The Element establishes goals and policies for population-based parks and recreation facilities within the community. In addition, the Element establishes goals and policies related to open space and resource-based parks.

The Conservation Element contains policies designed to meet the City's sustainable development goals in areas that have been identified as suitable for development. The Conservation Element also addresses open space and habitat protection.
The Historic Preservation Element contains specific recommendations to address the history and cultural resources, unique to San Ysidro, in order to encourage protection and appreciation of

1.1.2 San Ysidro Historic Village Specific Plan (SYHVSP)

The SYHVSP, identified on Figure 1, is a comprehensive planning document that will implement the vision for the SYCPU for this Specific Plan Area. The SYHVSP covers approximately 112 acres, and is bounded by Beyer Boulevard to the north, I-5 to the south, I-805 to the east, and Smythe Avenue to the west.

The overall goal of the Specific Plan is to create an attractive, intensified urban environment with a mix of land uses surrounding the Beyer Trolley Station and along San Ysidro Boulevard, while preserving the low-scale single- and multi-family character of the residential areas.

The Land Use Component of the Specific Plan includes guidelines intended to: (1) preserve the historic character of the area, (2) attract community-oriented development, (3) promote alternate forms of transportation (e.g. walking and biking), and (4) focus increased residential density on major transportation corridors and near transit. The Specific Plan Area includes the following five land use designations, as specified by the SYCPU: Low-Medium Density Residential, Medium Density Residential, Community Commercial (Residential Permitted), Institutional, and Park.

The Mobility Component of the Specific Plan sets forth a number of polices and guidelines to promote mobility including (1) install new, and widen existing, sidewalks, (2) improve lighting and landscaping along sidewalks, (3) improve street crossings, and (4) incorporate bikeway facilities on select roadways.
SECTION ONE INTRODUCTION

The Urban Design Component of the Specific Plan identifies policies intended to enhance public spaces, including parks, public plazas, and roadways. The Specific Plan encourages the creation of pocket parks and neighborhood plazas. Enhanced streetscape is encouraged including benches, bicycle parking, and improved landscaping and lighting. Bioswales and pervious pavement are encouraged to reduce stormwater runoff and pollutants. Signage improvements are recommended to increase transit usage, and facilitate movement within the community. Lastly, the inclusion of public art is encouraged.

The Infrastructure and Public Facilities Component of the Specific Plan establishes policies and describes improvements necessary for the upgrading and expansion of public facilities, including water, wastewater, solid waste, stormwater, natural gas, police and fire protection, schools, libraries, parks, and other public services. Water conservation measures are identified to help assure a reliable water supply. Stormwater facilities are encouraged to convey runoff through the Specific Plan Area, and reduce water pollution. Adequate staffing and equipment are identified as important to assuring adequate police and fire protection. A new location for the community library in the Specific Plan Area is proposed. Mini and pocket park locations are identified in the Specific Plan area to enhance recreational opportunities within the Specific Plan Area as well as the overall Community Plan Area.

1.2 Objective and Scope of Services

The objective of this Phase I ESA study is to review past and present land use practices and site operations to evaluate the potential presence of recognized environmental conditions to within a one mile distance outside the limit of the SYCPU project study area. The scope of this ESA study included several reconnaissance visits of the project study area, and a review of pertinent records/files maintained by various local regulatory agencies. This report has been prepared for the
exclusive use of HELIX EPI and the City in their preparation of the community plan update as described herein. The information presented in this report is not sufficient for any other uses or the purposes of other parties.

The scope of this study did not include a subsurface investigation to collect soil and groundwater samples for analytical laboratory testing nor did it include a survey to evaluate the possible presence of radon and/or methane gases on the project site. Furthermore, our study also did not include an assessment of potential hazards associated with the presence of asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor quality or electromagnetic fields.

The guidelines used for the definition of hazardous materials/hazardous wastes, as used in this report, are referenced in the California Code of Regulations (CCR) “Title 22, Division 4.5”.

1.3 Credentials

This report has been prepared by AGE under the professional supervision of the senior project manager whose name and signature appears on the letter of transmittal. The information presented in this report has received appropriate technical review, and the opinions represent professional judgements which are based upon an interpretation of the data gathered during this Phase I ESA study and AGE’s experience in geotechnical engineering and environmental sciences.
1.4 Geologic Conditions

Topography of the San Ysidro community is generally level within the Tijuana River flood plain, gently sloping to moderately level in the mid-portions of the planning area, with hilly terrain dominating the planning area east of I-805.

The San Ysidro community is underlain by Miocene age and younger sedimentary deposits that non-conformably overlie basement rocks consisting of the Jurassic age Santiago Peak Volcanics and Cretaceous age plutonic rocks of the Southern California Batholith (Walsh and Demere, 1991). The basement rocks are not exposed within the San Ysidro study area. The sedimentary units consist of both marine and non-marine deposits that display a gentle regional southwest dip (Vanderhurst, Hart, and Warren, 2011). Regional uplift of the sedimentary units has created a stair-stepping series of relatively level terraces/mesa tops which comprise the majority of the San Ysidro community. The terraces have been dissected by erosion and are locally covered by Quaternary age fluvial deposits within the Tijuana River floodplain. The major structural feature within San Ysidro is the La Nacion fault zone (LNFZ), a north-south trending series of near-vertical normal faults that downdrop to the west. The LNFZ is classified as potentially active (City of San Diego Seismic Safety). Several strands of the LNFZ are mapped in the San Ysidro community.

The geologic conditions and description of the geologic units are addressed in a separate report entitled “Geotechnical Desktop Study” prepared by AGE for the subject project.
1.5 Hydrogeologic Conditions

The subject study area lies within the Tijuana Valley Hydrologic Area of the Tijuana Hydrologic Unit as designated by the California Regional Water Quality Control Board (CRWQCB), San Diego Region 9. Groundwater in this area has beneficial use for municipal, agricultural and industrial supply.

The Tijuana River watershed encompasses a region of approximately 1,750 square miles on either side of the California/Baja California border, and in terms of water quality degradation is probably the most severely impacted watershed in San Diego County. Although only 27% of the watershed area is within California, the river discharges to the Tijuana Estuary and Pacific Ocean on the U.S. side of the International Border. On the U.S. side of the border, the cities of Imperial Beach and San Diego, and San Diego County have portions of their jurisdictions within the watershed. The cities of Tijuana and Tecate are the most important urban centers on the Mexican side. The current population of the entire watershed is approximately one million people.

The Tijuana River watershed is classified as a Category I (impaired) watershed by the State Water Resources Control Board due to a wide variety of water quality problems. These problems are largely a result of agricultural sources on both the U.S. and Mexican sides of the border. The Tijuana Estuary, a National Estuarine Sanctuary that supports a variety of threatened and endangered plants and animals, is threatened by inflows from the Tijuana River containing high concentrations of coliform bacteria, sediment, trace metals (copper, lead, zinc, chromium, nickel, and cadmium), PCBs, and other urban, agricultural, and industrial pollutants (RWQCB, 2007).
The southwesterly portion of the study area is located within the Tijuana River Valley. Historically, large volumes of groundwater have been withdrawn from the Tijuana River aquifer and water surface elevations were as low as Elevation -15 feet from the Mean Sea Level (MSL) in the past. Periodic flooding of the Tijuana River may be assumed to recharge the aquifer relatively quickly. Groundwater in the river valley has been designated as having beneficial use for groundwater recharge. During a 1997 investigation by AGE at the site of the Hollister Street Bridge north of the Tijuana River, groundwater was encountered at depths of 10 to 18 feet bgs (approximate Elevation +17 to +8 feet MSL).

In 2005 AGE performed a desktop study to evaluate groundwater conditions beneath Via de San Ysidro, San Ysidro Boulevard and Center Street. The results of the study indicate that groundwater elevation along these streets remained relatively level during the 5- to 15-year period for which well records were available for review. Regional groundwater elevation within this segment ranged from +29 to +36 feet MSL (10 feet to 17 feet bgs). Both perched water between elevation +41 to +45 feet MSL (10 feet to 14 feet bgs) and confined water at approximately +38 feet MSL (17 feet bgs) were encountered in the vicinity of Center Street.

Based on AGE’s previous work performed for the City’s Otay Mesa Trunk Sewer project Phase 1A, 1B, 3A and 3B between 2002 to 2008, the depth of groundwater within the study area north of Beyer Boulevard is estimated to be in excess of 100 feet bgs. Groundwater gradient is generally in a southerly/southwesterly direction toward the Tijuana River Estuary.
2.0 SCOPE OF WORK

The scope of this Phase I ESA study included the performance of several tasks which are more fully described in the following sections.

2.1 Records Review

In order to assess whether current or past land uses at or adjacent to the project site may have created a potential for contamination of the project site, we performed a review of readily available public records maintained by various Federal, State, and Local environmental regulatory agencies. The database search was performed by Environmental Data Resources, Inc. (EDR).

The approximate boundary of the SYCPU, limits of database search and location of listed sites are shown on the EDR Data Map Area Study Map which is included in Appendix A. A copy of EDR’s Data Map Area Study Report is presented in Appendix B.

The available database records were reviewed for the following areas:

- To 1.0 mile outside the limit of the project study area for registered underground storage tanks (USTs) and Resource Conservation and Recovery Act (RCRA) generators;

- To 1.0 mile outside the limit of the project area for leaking USTs, landfill sites, and Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) sites; and
• To 1.0 mile outside the limit of the project area for RCRA treatment, storage and disposal facilities, and State and Federal superfund sites.

A description of the databases searched by EDR is presented on Pages GR-1 through GR-33 of the EDR report. A summary of the sites of potential concern identified in the EDR report is presented in Table 1. The sites are identified using the EDR Map ID numbers. The approximate locations of these sites are shown on Figure 1.

EDR was also requested to provide well data, historical topographic maps, aerial photographs and Sanborn Fire Insurance Maps. The well data was used to evaluate groundwater elevations within SYCPU study area. The historical topographic maps and aerial photographs were used to evaluate historical development and land usage within the SYCPU study area.

The Sanborn Maps were originally created for assessing fire insurance liability in urbanized areas in the United States. The maps include detailed information regarding town and building information in approximately 12,000 US towns and cities from 1867 to 2007. The Sanborn maps themselves are large-scale lithographed street plans at a scale of 50 feet to one inch (1:600) on 21 by 25 inches (53 by 64 cm) sheets of paper. The maps were published in volumes, bound and then updated until the subsequent volume was produced. Today, Sanborn maps are primarily used for historical research. EDR, however, reported that no historical Sanborn Fire Insurance Maps are available for the SYCPU study area and surrounding area. EDR Certified Sanborn Map Report is included in Appendix C.

Copies of the EDR Data Map Well Search, topographic maps and aerial photographs are included in Appendices D, E and F, respectively.
2.2 Site Reconnaissance

Messrs. Sani Sutanto and Nicholas Barnes from AGE conducted a site reconnaissance visit on March 28, 2012. The purpose of this site reconnaissance was to confirm the presence of the Recognized Environmental Conditions (RECs) which were identified in the EDR report. A summary of these REC sites is presented in Table 1.

Pursuant to ASTM E 1527-05, a REC is described as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into ground, groundwater, or surface water of a property.

The term includes the presence of hazardous substances or petroleum products even under conditions in compliance with laws and regulations. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

A summary of our site observations is presented in the following section. Selected photographs taken during the site visit are presented in Appendix G. The sites discussed herein are identified by their EDR Map ID numbers. The reconnaissance primarily was conducted through areas that predominantly developed with commercial facilities and single and multi-family residences along the adjacent streets. The only exception is the section of Dairy Mart Road, south of the Interstate 5, which extends through primarily undeveloped open area.
Our site reconnaissance started at the intersection of Beyer Boulevard and State Highway 905, and proceeded in southeasterly direction along Beyer Boulevard to the San Ysidro U.S. Border Patrol Station (EDR Map ID No. 40). The U.S. Border Patrol Station facility is enclosed with a security fence, and we were unable to enter the facility. We then continued on along Beyer Boulevard to the 7-Eleven Food Store #13589 (EDR Map ID No. 47). At the intersection of Otay Mesa Road and Beyer Boulevard, we turned north along Otay Mesa Road to the San Ysidro Senior Community Center (EDR Map ID No. 27), and made a U-turn back to the intersection, and followed Beyer Boulevard south to Antonio Gallegos/Valleros Gas Station (EDR Map ID No. 64) and Union Auto Wrecking (EDR Map ID No. 66).

Our reconnaissance then continued along Beyer Boulevard to Camino De La Plaza, passing the San Ysidro Land Port Entry (EDR Map ID No. 74). We then continued in a westerly direction on Camino De La Plaza to the Coral Gates & Soil Disposal site (EDR Map ID No. 75). This site is classified as a former solid waste Class III landfill but it is now occupied by the Las Americas Outlet Center (EDR Site ID No. 81), Larsen Field Park and the Coral Gate Residential Development. The reconnaissance then continued along Camino De La Plaza, and north along Dairy Mart Road to the location identified in the EDR report as the North Chollas Burn site (EDR Map ID No. 51). The site is located in the Tijuana River Valley open space, and no indication of a former burn site was observed.

The reconnaissance continued north along Dairy Mart Road and east along San Ysidro Boulevard, passing Arco Service Station #6075 (EDR Site ID No. 50) to the intersections of San Ysidro Boulevard, Via De San Ysidro and Calle Primera which are occupied by multiple gas stations and a former Unocal Service station listed under EDR Site ID Nos. 56 and 65. It is noted that the Mobil
Station at 120 West San Ysidro Boulevard (EDR Site ID No. 56) is no longer in operation. A chainlink fence has been erected around the property, and several drums were observed inside the fenced area. From this location the reconnaissance continued east along San Ysidro Boulevard to the intersection with Center Drive where a Shell Service Station, a Valero Service Station (formerly ARCO), and the defunct Sevel Garage (EDR Site ID No. 62) are present.

In addition to the visual indications of the presence of underground storage tanks and/or activities involving the usage, storage or disposal of hazardous materials within the properties which were discussed in Table 1, we also observed that all the facilities have monitoring wells installed on the properties, and sometimes within adjacent public right of ways. Surficial staining typical of leaking vehicle undercarriages was observed on asphalt and concrete pavement in areas throughout the project study area. Additionally, retail quantities of paints and/or cleaning or maintenance products and scattered debris were observed at several construction sites within the project study area. However, no chemical odors were detected during the reconnaissance.

In addition to the facilities listed in Table 1, existing improvements observed during the field reconnaissance range from single and multi family residences, retail and office complexes, railroad track, park and recreation facilities, and several large manufacturing facilities toward the southeastern corner of the project area.

2.3 Data Interpretation and Reporting

This task involves the preparation of a written report to present a summary of our findings, opinions and recommendations based on the information gathered from our site reconnaissance and records review.
3.0 GOVERNMENTAL AGENCIES RECORDS REVIEW

3.1 Environmental Data Resources Radius Map Report

For the purpose of this study, AGE retained the services of Environmental Data Resources (EDR) to conduct a search of Federal, State and Local environmental regulatory agency databases in conformance with the ASTM E1527 search parameters.

3.2 Records Review

Records with regard to the history/background and current status information for the sites of concern were retrieved through Geotracker.

3.3 Historic Aerial Photographs, Topographical and Sanborn Maps

Available aerial photographs and topographical maps pertaining to the general site area were reviewed to assess historical usage of the project site and surrounding areas. Historical aerial photographs that were reviewed cover the years 1953, 1963, 1974, 1989, 1994, and 2002. Topographical maps that were reviewed covers 1904, 1930, 1943, 1953, 1967, 1975, 1991, and 1996. No historical Sanborn Fire Insurance Maps are available for the project area.
4.0 SITE HISTORY

A review of the topographic maps and aerial photographs dating as far back as 1904 indicates that the area was relatively undeveloped at that time. The Southern Pacific Rail Road Line, Beyer Boulevard and San Ysidro Boulevard were first observed on the 1930 topographic map. Subsequently, additional developments were observed between 1943 and 1953 which were concentrated primarily along the railroad tracks and the Beyer Boulevard and San Ysidro Boulevard corridors. Interstate 5 was first observed on the 1963 aerial photograph, followed by Interstate 805 in the 1967 topographic map. Rapid development to the north and south of the corridor was observed throughout the 1970s, 1980s, 1990s and 2000s. No major changes appear to have occurred within the project study area between 2002 and the present.

Prior to 1953, both the topographical maps and aerial photographs show that development within the project study area was mostly limited along the railroad line, Beyer Boulevard and San Ysidro Boulevard corridors. The remaining areas predominantly consisted of open field and farmland. Interstate 5 and 805, and State Highway 905 had not been constructed.

Interstate 5 is shown in the post 1963 maps and photographs, Interstate 805 in the post 1967 maps and photographs, and State Highway 905 was shown to be under construction in the 1974 and 1975 maps and photographs. In general, between 1908 and 1953 the photographs show a gradual increase in residential development which tended to be isolated and sporadic.

Most of the major developments occurred in the 1970s and 1980s. More housing developments were observed in the 1990s primarily to the south of Interstate 5 and along the eastern portion of the project study area. As of 2002, the configuration of most residential development resembles that of the present time.
5.0 DISCUSSION, FINDINGS AND RECOMMENDATIONS

Based on the results of this ESA study, we would like to present the following summary of our findings, opinions and recommendations with regard to the historic and current environmental conditions and issues within the SYCPU and SYHVSP.

5.1 Low Risk Sites

The EDR report identifies a total of 184 occurrences within the SYCPU project study area as having potential environmental risks. Based on a review of the available background information and visual site reconnaissance, it is our opinion that 157 out of the 184 occurrences identified in the EDR report do not pose a significant environmental hazard in the project study area. These 157 occurrences are highlighted in “blue” in Table 1, and pertain to: isolated incidents ranging from traffic accidents; sewer blockage/spills; accidental spills; unauthorized dumping into the storm drain system; sites with Underground Storage Tanks (USTs) which are located outside the northern project study area boundary, construction Storm Water Pollution Prevention Plan (SWPP) and National Pollutant Discharge Elimination System (NPDES) permits; and disposal of asbestos-containing construction demolition debris.

One of the occurrences is identified in the EDR report as the North Chollas Burn Site (EDR Map ID No. 51). The EDR map shows the location of this site south of the intersection of Dairy Mart Road and Servando Avenue. Our site reconnaissance visit, however, revealed that this location is in an open space area of the Tijuana River Valley. The address given for this site in the EDR report is...

Allied Geotechnical Engineers, Inc.
2470 Caminito Chollas, which is located north of Highway State 94 in the City of San Diego. Furthermore, a listing of abandoned landfills/burn sites in San Diego County indicates that the only “North Chollas Burn Site” is located in Ramona. We therefore suspect that the North Chollas Burn Site was misidentified in the EDR database search. It is our opinion, that this site is not considered to be an environmental risk for the SYCPU study area.

The sites which were formerly occupied by the Union Oil Service Station #624 (EDR Map ID No. 56) and Union Auto Wrecking (EDR Map ID No. 66) are currently occupied by office complexes. Coral Gates & Soil Disposal facility (EDR Map ID No. 75) which is located near Camino de la Plaza and Sipes Lane was classified as a Solid Waste Site - Class III Landfill for non-hazardous solid wastes. This facility has had one unauthorized release LUST case, which resulted in the detection of pesticides in soil and volatile organic compounds (VOCs) in groundwater. The case regarding impacts to groundwater from VOCs is currently considered closed. The site has since been developed and is currently occupied by the Las Americas Outlet Shopping Center (EDR Map ID No. 81), the 16-acre Larsen Field Park, and single and multi family residences. Based on the aforementioned information, these three sites are not considered to pose an environmental risk to the SYCPU study area.

5.2 High Risk Sites

5.2.1 San Ysidro Community Plan Update (SYCPU)

The remaining 24 occurrences are considered to pose a risk for environmental contamination within the SYCPU project study area, and are highlighted in “red” in Table 1. These 24 occurrences consist of sites with known USTs and unauthorized releases. The majority of these occurrences are located
along the San Ysidro Boulevard and Beyer Boulevard corridor. Seventeen of these sites are classified as “open case”. Unauthorized releases at 14 of the 24 sites may have impacted the groundwater. Several of the larger cases are more fully discussed below.

One of the high risk areas is in the vicinity of the intersections of San Ysidro Boulevard, Via De San Ysidro and Calle Primera (EDR ID Nos. 56 and 65). This area is underlain by deep alluvial deposits which are generally composed of highly permeable poorly to well-consolidated sands with some gravels, and shallow groundwater. As indicated in the EDR report and based on visual observations, multiple gas stations with ongoing investigations are located in this area. A review of the available information indicates that commingling of the dissolved contaminant plumes from the different gas stations has occurred at this location.

The site of the former Red Cab facility (EDR Map ID No. 79) is located in the eastern portion of the project study area, north of the Old Customs House. According to DEH files, the Red Cab Taxi Company leased this property from the Metropolitan Transit District as a maintenance and filling station from 1940 until 1994. It previously contained a single-story building, a 6,000-gallon gasoline UST with dispenser, and a waste oil storage area. An unauthorized release case is currently still open in association with potential soil and groundwater contamination from the former UST and waste oil storage.

The Las Americas development is located at 4211 Camino de la Plaza (EDR Map ID No. 81), and currently consists of a regional outlet shopping center. According to the 2008 DEH SAM Case Listing, this facility has one open case associated with a former waste oil UST. Furthermore, the site was formerly occupied by Nelson and Sloan/Cays facility.
This facility consisted of an approximately 58-acre site at the current location of the Las Americas shopping center. Based on the site’s listing in the California Integrated Waste Management Board (CIWMB) Solid Waste Landfill-Related Sites database, this property was previously utilized as a solid waste disposal site. Solid waste issues associated with this facility included a sand borrow pit that was backfilled with undocumented fill material, burn ash from another location that was stockpiled in berms, and sandblast material that was placed on the ground. Soil samples collected from the burn ash berms indicated low levels of metals, but below regulatory thresholds. In 2001, the CIWMB issued a letter that the property had been clean-closed and is not considered a solid waste disposal site.

According to the DEH LUST case closure summary, soil and groundwater sampling indicated low levels of VOCs (chlorinated solvents) in groundwater and no VOCs in soil vapor samples. The DEH issued closure in June 2001 prior to the site being developed with the Las Americas shopping center.

One of the occurrences is identified in the EDR Report as Guerrero Negro Drums (EDR Map ID No 56). The EDR map shows the location of this site northwest of the border crossing (near the intersection of W. San Ysidro Blvd. and W. Park Ave). However, the case descriptions indicate that the site is located at the Otay Mesa border crossing. We therefore suspect that the Guerrero Negro Drums site was misidentified in the EDR database search. It is our opinion, that this site should be placed under EDR Map ID No. 79.

5.2.2 San Ysidro Historic Village Specific Plan (SYHVSP)

Out of the 24 high risk occurrences identified during the study, the seven sites listed below are located within the SYHVSP.
5.3 Other Potential Sources of Hazardous Materials Contamination

Interstate 5 and 805, and State Highway 905 traverse SYCPU study area, and State Highway 805 is located along the eastern boundary of SYHVSP. The properties in the proximity of these freeways may contain soils that are contaminated with aerially-deposited lead resulting from vehicular exhaust emissions prior to the elimination of lead from gasoline fuels in the mid-1980s.

Operations at the San Ysidro Land Port of Entry (LPOE) involve processing high volumes of vehicles which generate urban contaminants, including fuels, oils, metals, grease, and other fluids. Considering the large number of vehicles traveling through or parked at the San Ysidro LPOE, there is the potential that contaminants from vehicular sources have leached into the underlying soils at this location.
Pad-mounted and pole-mounted transformers and utility vaults are located in various areas within SYCPU and SYHVSP study areas. Some of these transformers may contain PCB dielectric fluids. Therefore, there is potential to encounter PCBs within SYCPU and SYHVSP study areas.

Asbestos and other hazardous building materials may be present in some of the older buildings/structures that are located within the SYCPU and SYHVSP study areas. Demolition and/or remodeling performed on these buildings/structures could be a possible source of these types of hazardous materials.

5.4 Recommendations

Based on the results of this Phase I ESA, several sites within the SYCPU and SYHVSP study areas have been identified as having known soil and/or groundwater contamination issues. The potential impact from these sites should be considered during the planning and design phases of any future development within the SYCPU and SYHVSP.

It is recommended that a Phase I Environmental Site Assessment be conducted in accordance with ASTM Standard E 1527-05 prior to acquiring or developing a property. Based on the results of the Phase I ESA study, some properties may also require the performance of a Phase II Environmental Site Assessment. The scope of the Phase II ESA should be customized to evaluate the specific environmental concerns that could impact the property, such as the presence of electrical transformers or older buildings which may contain hazardous building materials. In addition, if the property is located in the immediate vicinity of one of the freeways, the Phase II ESA study should include an evaluation of the possible presence of aerially-deposited lead.
6.0 LIMITATIONS

This Phase I ESA report has been prepared for the sole use of HELIX EPI and the City of San Diego. The information obtained is only relevant for the dates of the records that were reviewed and as of the date of our last site visit on March 27, 2012. Consequently, this report will require periodic updates as conditions within the project study area may change or as additional information becomes available. Other parties who use or rely on the findings and conclusions of this report shall do so at their own risk. Furthermore, because the scope of this Phase I ESA was limited, it is possible that currently unrecognized conditions or contamination might exist within the project study area.

AGE has performed this assessment in accordance with the authorized scope of work and generally accepted practices in the field of environmental consulting engineering. No warranties, either expressed or implied, are made by AGE. The records search performed for this study was limited to information available from public sources. This information is subject to continuous change and is frequently incomplete. Unless AGE has actual knowledge to the contrary, information obtained from interviews or provided to AGE by the regulatory agencies has been assumed to be correct and complete. AGE does not assume any liability for misrepresentation of information or for items not visible, accessible, or present at the project site at the time of our site reconnaissance visit.

There is no investigation which is thorough enough to preclude the presence of substances within the study area which presently, or in the future, may be considered hazardous. Because regulatory agency evaluation criteria are constantly changing, concentrations of contaminants that are currently considered to be acceptable may, in the future, become subject to different and more stringent regulatory standards.
Where records indicate that prior remedial work or tank removals have occurred, there is a risk that the work may not have been performed correctly or completely. In these cases, if the regulatory agency has approved the closure of the tank or other work done, we have assumed that the work was done properly and in complete conformance with said regulatory agency standards.

Professional opinions, conclusions, and judgments expressed in this report are based on AGE's understanding and interpretation of current regulatory standards and the available historical information and documents reviewed, and visual observations of the current conditions on the Property, and should not be construed as legal opinions.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2
EXECUTIVE SUMMARY

CERCLIS sites within the searched area.

</tr>
</tbody>
</table>

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERC-NFRAP site within the searched area.

RCRA-LQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 4 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 26 RCRA-SQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-NonGen sites within the searched area.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within the searched area.

MLTS: The Material Licensing Tracking System is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and are subject to NRC licensing requirements.

A review of the MLTS list, as provided by EDR, and dated 06/21/2011 has revealed that there is 1 MLTS site within the searched area.
FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there are 51 FINDS sites within the searched area.

STATE AND LOCAL RECORDS

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 11/07/2011 has revealed that there is 1 SCH site within the searched area.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 27 SWEEPS UST sites within the searched area.

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2010 has revealed that there are 27 CHMIRS sites within the searched area.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2010 has revealed that there are 117 HAZNET sites within the searched area.

EMI: Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies

A review of the EMI list, as provided by EDR, and dated 12/31/2008 has revealed that there are 19 EMI sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/07/2011 has revealed that there are 2 ENVIROSTOR sites within the searched area.
Please refer to the end of the findings report for unmapped orphan sites due to poor or inadequate address information.

MAP FINDINGS

CRISTAL BLUE ENVIRONMENTAL (Continued) 1001217388

Violaton Status: No violations found

Registry ID: 110009553143

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: D016
Waste name: 2,4-D

Waste code: D018
Waste name: BENZENE
### Findings

**Waste code:** D035  
**Waste name:** METHYL ETHYL KETONE

**Waste code:** F003  
**Waste name:** THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Waste code:** F005  
**Waste name:** THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Violation Status:** No violations found

**FINDS:**

- **Regulatory ID:** 110012207566
- **RCRAInfo** provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
- **RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.**

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Hazardous Waste Summary:
- Waste code: D001
  IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- Waste code: D035
  Waste name: METHYL ETHYL KETONE
- Waste code: F002
  Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

### Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

### EMI:

- **Year:** 1999
- **County Code:** 37
- **Air Basin:** SD
- **Facility ID:** 4207
- **Air District Name:** SD

**HOUSTON, TX 77060**

**Contact:** DALE VIATOR  
**Contact address:** 16945 NORTHCHASE DR RM 538  
**HOUSTON, TX 77060**  
**Contact country:** US  
**Contact telephone:** 281-654-8470  
**Contact email:** DALE.VIATOR@EXXONMOBIL.COM  
**EPA Region:** 09  
**Classification:** Large Quantity Generator  
**Description:** Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less
of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

EXXONMOBIL OIL CORPORATION 12743 (Continued)

Owner/Operator Summary:
Owner/operator name: EXXONMOBIL OIL CORPORATION
Owner/operator address: Not reported
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 12/01/1999
Owner/Op end date: Not reported

Owner/operator name: EXXONMOBIL OIL CORPORATION
Owner/operator address: 3225 GALLOWS RD
FAIRFAX, VA 22037
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 12/01/1999
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Action: Technical Correspondence / Assistance / Other

SAN DIEGO, CA 92154

The property is occupied by 76 Station No. 2987. In November 2007, SECOR advanced four soil borings near the underground storage tanks and dispensers at the Site. Groundwater samples were collected and contamination was detected. The Department of Environmental Health opened release H06181-002 and issued a Notice of Responsibility on August 14, 2008. Subsequently five groundwater monitoring wells were installed. Two monitoring events were performed. Low contaminant levels were detected and the case was deemed ready for closure.

**Hazardous Waste Summary:**
- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

**FINDS:**
- Registry ID: 110002926683
- Violation Status: No violations found

**Environmental Interest/Information System**
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Rock blockage inside a 15 inch VC pipe caused the release. 7,500 gallons was recovered, 26,250 gallons is still in process of being recovered. All sewage landed in the rain water canal that runs along highway 905 in San Diego. The canal leads to Tijuana River, and the recovery is taking place approximately 2 miles from the river. At the 1300 block of West San Ysidro is the first dry spot in the canal indicating none of the sewage made it to the river. Between the 1300 block of West San Ysidro and Beyer Blvd at Hwy 905 is span of area the recovery of the 26,250 gallons of sewage is taking place.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**RCRAInfo** is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### Map Findings

**San Ysidro SD** (Continued)

**Design Flow:**
0

**Baseline Flow:**
0

**Reclamation:**
Not reported

**POTW:**
Not reported

**Treat To Water:**
Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

**Complexity:**
Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRA-NonGen:

Date form received by agency: 10/26/1998
Facility name: SOUTH BAY INTL WW TREATMENT PLANT
Facility address: 2415 DAIRY MART RD
SAN DIEGO, CA 92173
EPA ID: CAR000013391
Contact: JOSEPH CREECH
Contact address: P O BOX 430239
SAN DIEGO, CA 921430239
Contact country: US
Contact telephone: (619) 662-7687
Contact email: Not reported
EPA Region: 09
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name: INTL BOUNDARY AND WATER COMMISSION
Owner/operator address: 4171 N MESA C-310
EL PASO, TX 79902
Owner/operator country: Not reported
Owner/operator telephone: (915) 534-6700
Legal status: Federal
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 06/25/1996
Facility name: SOUTH BAY INTL WW TREATMENT PLANT
Classification: Small Quantity Generator
Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

**SOUTH BAY WATER RECLAM PLANT**
2411 DAIRY MART ROAD
SAN DIEGO, CA  92154

FINDS:

Registry ID: 110009067348

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

SDCYT S BAY WATER REC PLANT  
2411 DAIRY MART ROAD  
SAN DIEGO, CA 92154  

RCRA-SQG:  
Date form received by agency: 04/16/1999  
Facility name: SDCYT S BAY WATER REC PLANT  
Facility address: 2411 DAIRY MART ROAD  
SAN DIEGO, CA 92154  
EPA ID: CAR000051318  
Contact: WILLIAM PIERCE  
Contact address: 2411 DAIRY MART ROAD  
SAN DIEGO, CA 92154  
Contact country: US  
Contact telephone: (619) 662-4900  
Contact email: Not reported  
EPA Region: 09  
Land type: Municipal  
Classification: Small Small Quantity Generator  
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time  

Owner/Operator Summary:  
Owner/operator name: SDCTY ENV SERVICES  
Owner/operator address: 9601 RIDGEHAVEN CRT STE 320  
SAN DIEGO, CA 92123  
Owner/operator country: Not reported  
Owner/operator telephone: (619) 492-5003  
Legal status: Municipal  
Owner/Operator Type: Owner  
Owner/Op start date: Not reported
IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:
- Waste code: D001
- Waste name: Lacquer thinner

Facility Has Received Notices of Violations:
- Regulation violated: Not reported
- Area of violation: Generators - General
- Date violation determined: 05/22/2006
- Date achieved compliance: 06/20/2006
- Violation lead agency: State
- Enforcement action: WRITTEN INFORMAL
- Enforcement action date: 05/22/2006
- Enf. disposition status: Not reported

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of 2-ethoxyethanol, and 2-nitropropane. Lacquer thinner is an example of a commonly used solvent which would be considered as ignitable hazardous waste. The flash point of a waste is to review the material safety data sheet, which can be obtained from the manufacturer or distributor of the material. A closed cup flash point tester. Another method of determining the flash point is to review the material safety data sheet, which can be obtained from the manufacturer or distributor of the material. The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of 2-ethoxyethanol, and 2-nitropropane.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:
- Waste code: D001
- Waste name: COUNTERDRUG

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Address: 2225 DAIRY MART RD
Agency City, St, Zip: SAN DIEGO 92173
Agency Contact: DION MCMICHEAUX
Agency Telephone: 619-662-7600
Agency Type: Federal
SIC Code: 4952
SIC Code 2: Not reported
Primary Waste: Domestic Sewage combined with Industrial Waste
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (e.g., BOD, Hardness, TRF, Chloride). ‘Manageable’ hazardous wastes (e.g., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 25
Baseline Flow: 25
Reclamation: No reclamation requirements associated with this facility.
NPDES:
NPDES Number: CA0108928
Facility Status: Active
Agency Id: 21523
Region: 9
Regulatory Measure Id: 142852
Order No: R9-1996-0050
Regulatory Measure Type: NPDES Permits
Place Id: 257821

Program Type: NPDES
Adoption Date Of Regulatory Measure: 11/14/1996
Effective Date Of Regulatory Measure: 11/14/1996
Expiration Date Of Regulatory Measure: 11/13/2001
Termination Date Of Regulatory Measure: Not reported
Discharge Name: IBWC-US & Mexico Section
Discharge Address: 2225 Dairy Mart Road
Discharge City: San Diego
Discharge State: CA
Discharge Zip: 92173

The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.

Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.

Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxic wastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110006487685

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:  9UT4077
LOC Case Number:  H05847-001
File Location:  Local Agency
Potential Media Affect:  Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:  Gasoline
Site History:  Shell (H03239-001), Mobil (H01577-001), Chevron (H05641-004), and this 76 Case (H05847-001) are being managed by RELLCC. Data from all four cases will be uploaded to the Shell Case H03239-001 (Global ID: T0607302792). Please refer to the Shell case for 76 data newer than April 14, 2011. The site is an active service station with four dispensers at two islands, two USTs, one waste oil UST, and a service station building. The site is located on the northwestern corner of the intersection of San Ysidro Boulevard and Olive Drive in the City of San Diego. The site is approximately 700 feet northeast of Interstate 5. In March 2000, product piping at the station was replaced and the dispensers were upgraded. Soil samples were collected from below the product piping and the dispenser islands.
under the direction of the DEH. Soil concentrations were below laboratory detection limits in 9 of 10 samples for total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as diesel (TPHd), and were 2,000 milligrams per kilogram (mg/kg) TPHg and 730 mg/kg TPHd in sample D-6. No over-excavation of soils was performed. Groundwater was not observed during any site activities.

In February 2001, groundwater monitoring well MW-1 and hand auger boring HA-1 were installed at the site. Concentrations in soil samples from borings MW-1 and HA-1 ranged from below laboratory detection limits to 91 mg/kg TPHg, 0.85 mg/kg benzene, and 1.8 mg/kg methyl tertiary butyl ether (MTBE). Concentrations of TPH for all samples analyzed were below laboratory detection limits.

Dissolved-phase concentrations in monitoring well MW-1 were 2,200 micrograms per liter (fig/l) TPHg, 160 fig/l benzene, and 280 fig/l MTBE, respectively. Dissolved-phase concentrations of the oxygenates tert-butanol (TBA), di-isopropyl etber (DIPE), and ethyl tertiary butyl ether (ETBE), and ethanol were below laboratory detection limits in the groundwater sample. The dissolved-phase concentration of the oxygenate tertiary-amy methyl ether (TAME) was 150 fig/l.

In January 2002, groundwater monitoring wells MW-2 through MW-5 were installed at the site. Measurable liquid-phase hydrocarbons (LPH) were detected in well MW-1. Dissolved-phase concentrations ranged from below laboratory detection limits to 12,000 fig/L TPHg, 130 fig/L benzene, and 18,000 fig/L MTBE. In December 2003, one steel/fiberglass composite 500-gallon waste oil tank was removed under the observation of SAM. The existing underground storage tank (UST) appeared intact upon visual inspection with no evidence of holes or leaks. The UST was not replaced. Stockpiled pea gravel from the UST excavation and imported pea gravel was used to backfill the cavity. Soil sampling below the UST was performed under the direction of SAM. Concentrations of TPHg in soil samples collected were 76 mg/kg. Concentrations of BTEX, MTBE and other oxygenates were below the laboratory detection limits (TRC, 2003). On December 7, 8, and 13, 2006, four groundwater monitoring wells, MW-6 through MW-9, were drilled offsite. On March 15, 2007, well MW-10 was drilled offsite to monitor for plume stability and submittal of a CAP as previously assessed and recommended continued quarterly monitoring and sampling to monitor for plume stability and submittal of a CAP as previously requested by SAM. Routine groundwater monitoring and sampling has been conducted at the site since 2001, and the site is currently sampled on a quarterly basis. The most recent groundwater monitoring and sampling event occurred on December 18, 2007. The groundwater gradient wa

Hazardous Waste Summary:
Waste code: D001
Waste name: BENZENE

Violation Status: No violations found

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

TC3234633.1s  Page 476 of 748
In January 1987, a subsurface due diligence investigation was conducted. Based on laboratory results, Case H03239-001 was opened in January 1987. Shell and nearby former Mobil are applying to the Commingled Plume Fund. For site specific data, refer to the ESI tab. Shell, Mobil, 76, and Chevron cases are being managed by RELLC. Data from all four cases will be uploaded to this case (Global ID: T0607302792).

Environmental Interest/Information System  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.  

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### Historical Generators:
- **Date form received by agency:** 04/13/1990  
- **Facility name:** SHELL OIL CO  
- **Site name:** SHELL OIL CO 204-7026-0108  
- **Classification:** Large Quantity Generator

### Hazardous Waste Summary:
- **Waste code:** D001  
- **Waste name:** BENZENE

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Hazardous Waste Summary:
- Waste code: D001
- Waste name: BENZENE
- Violation Status: No violations found

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

### Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Site History:**

The Former Fire Station #29 site is currently vacant. Fuel systems at the Site are closed and were removed under a permit from DEH on July 29, 2004. A new fire station was constructed directly across the street (West San Ysidro Blvd). A 280-gallon underground storage tank (UST), which was apparently installed in 1959 and contained both diesel and gasoline, failed a precision test in October 1987. The UST was subsequently removed on February 9, 1989. Numerous holes were observed in the tank, and petroleum contamination was visually observed in native soil. The consultant reports that the excavation pit was immediately backfilled with the badly-stained fill, then backfilled to grade with clean imported soil. A second 1,000 gal diesel UST was removed in 2004. Between 2000 and 2007, seven groundwater monitoring wells were installed and six borings were drilled on and off-site to delineate the extent of soil and groundwater contamination associated with the fuel release. Soil vapor sampling was also conducted at the site in May 2006. Total Petroleum Hydrocarbons (TPH) as diesel has been detected in all of the wells, and TPH as gasoline has been reported in wells MW1-4.

With the exception of well MW-1, most of the reported TPH levels have been relatively low or decreasing. Free product has been reported intermittently in well MW-1, located adjacent to the former UST. The site is located in an area with designated beneficial uses for groundwater, and groundwater depth at the site is approximately 19 feet bgs. The extent of soil and groundwater contamination has been adequately defined at the site, and a Corrective Action Plan (CAP) and additional monitoring to establish trends were requested in a DEH letter dated February 11, 2010. Additional monitoring has been completed. Report and CAP are under review.

### Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

LUST:
- Region: STATE
- Global Id: T0607300249
- Latitude: 32.5517329
- Longitude: -117.039832
- Case Type: LUST Cleanup Site
- Status: Open - Remediation
- Status Date: 01/12/1989
- Lead Agency: SAN DIEGO COUNTY LOP
- Case Worker: WR
- Local Agency: SAN DIEGO COUNTY LOP
- RB Case Number: 9UT141
- LOC Case Number: H05395-001
- File Location: Local Agency
- Potential Media Affect: Aquifer used for drinking water supply
- Potential Contaminants of Concern: Gasoline
- Site History: Contamination was identified on this site in 1987. Since that time, site assessment has been required to determine the lateral and vertical extent of contamination on site. This site has an upper perched zone of groundwater and a deeper confined zone of groundwater that have been impacted by the release on this site. Additional site assessment is required to determine the extent of residual contamination remaining at this site and to determine trends of contamination through groundwater monitoring. Please see the Environmental Data tab for additional site specific information.

- Owner/Operator Type: Owner
- Owner/Op start date: Not reported
- Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
CHEVRON STATION NO 95195 (Continued)

Hazardous Waste Summary:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- Waste code: D018
- Waste name: BENZENE

Violation Status: No violations found

FINDS:

- Registry ID: 110013309516

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Year: 1999
Parking attendant discovered abandoned under a parked vehicle in the long term parking lot. Hazmat responded and found 10 unsecured cylinders. They removed them to safekeeping. There were 6 oxygen "K" cylinders and 4 acetylene "N" cylinders. County HHealth will be contacting the registered owner of the vehicle as part of their investigation.

---

**Description:** Parking attendant discovered abandoned under a parked vehicle in the long term parking lot. Hazmat responded and found 10 unsecured cylinders. They removed them to safekeeping. There were 6 oxygen "K" cylinders and 4 acetylene "N" cylinders. County HHealth will be contacting the registered owner of the vehicle as part of their investigation.

On January 10, 2006, a Phase II investigation was conducted at the site based on the historical uses of the site. A total of seven soil samples were collected and analyzed for petroleum hydrocarbon constituents. Based on laboratory analysis, The Department of Environmental Health (DEH) opened Unauthorized Release Case 201329-001. Between 2006 and 2009, additional investigations were conducted to define the extent of hydrocarbon impacts to soil and groundwater. Total Recoverable Petroleum Hydrocarbons ranged from 15 milligrams per kilogram (mg/kg) to 2,500 mg/kg. TPH as gasoline (TPHg) concentrations ranged from not detected below laboratory limits (ND) to 10,000 mg/kg, TPH as diesel ranged ND to 3,200 mg/kg, benzene concentrations ranged ND to 1.82 mg/kg, toluene concentrations ranged from ND to 6.8 mg/kg, ethybenzene concentrations ranged from ND to 160 mg/kg, total xylenes ranged from ND to 1,240 mg/kg. All oxygenate concentrations in soil were ND.

According to the consultant, approximately 55 cubic yards of hydrocarbon impacted soil remains onsite. The site is located in an area that has been designated as having potential beneficial groundwater uses. To verify hydrocarbon impacts to groundwater, three groundwater monitoring wells were installed. No Liquid-Phase Hydrocarbons were observed. TPHg, benzene, toluene, ethybenzene, total xylenes, and oxygenates concentrations were below laboratory limits in all groundwater samples collected. The consultant concludes based on benzene concentrations in soil, there is no human health risk exists since impacts are in an outdoor area. DEH concurs with this conclusion. Additionally, the consultant concludes hydrocarbon impacts are adequately defined and recommends closure of this unauthorized release. DEH concurs with their conclusion and recommendation.

- **Status Date:** 12/17/2009
- **LOC Case Number:** 203754-001
- **File Location:** Local Agency
- **Potential Media Affect:** Aquifer used for drinking water supply, Soil
- **Potential Contaminants of Concern:** Gasoline
- **Site History:** A 500-gallon underground storage tank (UST) was encountered at the Las Americas Development site during grading activities in April 2004. Leighton Consulting, Inc. (Leighton) collected a sample of the UST contents in June 2004. Analytical results for the sample indicated that the UST contained petroleum hydrocarbons. During removal of the petroleum UST on September 2, 2004, the UST was observed to be heavily corroded and staining was noted in excavation soils. Two soil samples were collected from the excavation and analyzed. The sample results confirmed that a release of petroleum hydrocarbons had occurred, resulting in the opening of DEH Case 203754-001. Eight borings were advanced to a depth of 25 feet below ground surface (bgs) at the site in May 2005, including one
boring located within the footprint of the former UST excavation. All of the borings terminated in alluvium of the Tijuana River. Total Recoverable Petroleum Hydrocarbons (TRPH) were detected in the soil sample collected at depth of 15 feet bgs at a concentration of 13,000 milligrams per kilogram (mg/kg). Excavation of approximately 369 tons (246 cubic yards) of petroleum hydrocarbon-impacted soils was initiated by the Responsible Party in January 2007 in anticipation of further site development. Excavation activities proceeded until analytical results for soil confirmation samples indicated less than 100 mg/kg TRPH remained at the excavation boundaries. The impacted soil was stockpiled on site and later disposed to Otay Landfill. Leighton estimated that 170 cubic yards of impacted soil remained in place after excavation activities due to its presence beneath the water table, which was encountered at a depth of approximately 20 feet bgs. A groundwater monitoring well was installed adjacent to the former UST excavation in May 2007. Analytical results for a groundwater sample collected from the well indicated that methyl-tert-butyl ether (MTBE) was a chemical of concern. Nine additional monitoring wells were installed at the site from 2007 through 2008. Quarterly sampling events performed through August 2009 indicated concentrations of MTBE in groundwater that exceed its Primary and Secondary Maximum Contaminant Levels (MCLs) for drinking water (13 and 5 micrograms per liter [µg/l], respectively). A Corrective Action Plan was approved by DEH on July 2, 2009, for remediation of the site through natural attenuation. MTBE concentrations detected in samples most recently collected from site monitoring wells located down gradient of the UST excavation are less than its Primary MCL. However, MTBE concentrations ranging from its Primary MCL to 128 µg/l have been reported for up-gradient wells for past sampling events, which Leighton attributes to potential off-site sources (e.g., discharge from culverts beneath Camino de la Plaza and other potential up-gradient sources in the Tijuana River watershed). DEH concurs with this interpretation. Because the on-site source of petroleum hydrocarbons has been removed and use of groundwater for municipal purposes is not anticipated in the foreseeable future, DEH concurs with consultant’s request for no further action and case closure.

Hazardous Waste Summary:

<table>
<thead>
<tr>
<th>Waste code</th>
<th>Waste name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D001</td>
<td>CHROMIUM</td>
<td>Waste which has a PH of less than 2 or greater than 12.5 is considered to be a reactive hazardous waste. These caustic or acid solutions become contaminated and must be disposed, the waste would be a corrosive hazardous waste.</td>
</tr>
<tr>
<td>D002</td>
<td>BARIUM</td>
<td>A material is considered to be a reactive hazardous waste if it is normally unstable, reacts violently with water, generates toxic gases when exposed to water or corrosive materials, or if it is capable of detonation or explosion when exposed to heat or a flame. One example of such waste would be waste gunpowder.</td>
</tr>

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

- **Waste code:** D001
- **Waste name:** IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- **Waste code:** F003
- **Waste name:** THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Violations Status:** No violations found

**FINDS:**

- **Registry ID:** 110002919708

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**FEDERAL RECORDS**

**NPL:** National Priority List  
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/30/2011  
Date Data Arrived at EDR: 07/12/2011  
Date Made Active in Reports: 09/29/2011  
Number of Days to Update: 79  
Source: EPA  
Telephone: N/A  
Last EDR Contact: 10/12/2011  
Next Scheduled EDR Contact: 01/23/2012  
Data Release Frequency: Quarterly

**Proposed NPL:** Proposed National Priority List Sites  
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011  
Date Data Arrived at EDR: 07/12/2011  
Date Made Active in Reports: 09/29/2011

Last EDR Contact: 10/12/2011  
Next Scheduled EDR Contact: 01/23/2012  
Data Release Frequency: Quarterly

**DELISTED NPL:** National Priority List Deletions  
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011

Next Scheduled EDR Contact: 01/23/2012  
Data Release Frequency: Quarterly
NPL LIENS: Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56
Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011
Date Made Active in Reports: 05/02/2011
Number of Days to Update: 62
Next Scheduled EDR Contact: 03/12/2012
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011
Date Made Active in Reports: 05/02/2011
Number of Days to Update: 62
Next Scheduled EDR Contact: 03/12/2012
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 09/09/2011
Date Data Arrived at EDR: 09/16/2011
Date Made Active in Reports: 09/29/2011
Number of Days to Update: 13
Next Scheduled EDR Contact: 02/13/2012
Data Release Frequency: Varies

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/09/2011
Date Data Arrived at EDR: 03/15/2011
Date Made Active in Reports: 06/14/2011
Number of Days to Update: 91
Next Scheduled EDR Contact: 02/27/2012
Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.
RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011  
Date Data Arrived at EDR: 07/07/2011  
Date Made Active in Reports: 08/08/2011  
Number of Days to Update: 32

Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2011  
Date Data Arrived at EDR: 07/07/2011  
Date Made Active in Reports: 08/08/2011

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011  
Date Data Arrived at EDR: 07/07/2011  
Date Made Active in Reports: 08/08/2011  
Number of Days to Update: 32  
Source: Environmental Protection Agency  
Telephone: (415) 495-8895  
Last EDR Contact: 01/05/2012  
Next Scheduled EDR Contact: 04/16/2012  
Data Release Frequency: Varies

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/15/2011

Telephone: 202-366-4595
Last EDR Contact: 11/08/2011

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.
US BROWNFIELDS:  A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments–EPA’s Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA’s Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients–States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

FUDS:  Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

LUCIS:  Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

CONSENT:  Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.
ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/31/2011
Date Data Arrived at EDR: 09/14/2011
Date Made Active in Reports: 09/29/2011
Number of Days to Update: 41
Source: Department of Justice, Consent Decree Library
Telephone: Varies
Last EDR Contact: 12/27/2011
Next Scheduled EDR Contact: 04/16/2012
Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010
Date Data Arrived at EDR: 10/21/2010
Date Made Active in Reports: 01/28/2011
Number of Days to Update: 99
Source: Department of Energy
Telephone: 505-845-0011
Last EDR Contact: 11/29/2011
Next Scheduled EDR Contact: 03/12/2012
Data Release Frequency: Varies

DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations
A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009
Date Data Arrived at EDR: 05/07/2009
Date Made Active in Reports: 09/21/2009
Number of Days to Update: 137
Source: EPA, Region 9
Telephone: 415-947-4219
Last EDR Contact: 12/21/2011
Next Scheduled EDR Contact: 04/09/2012
Data Release Frequency: No Update Planned

ODI: Open Dump Inventory
An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985
Date Data Arrived at EDR: 08/08/2004
Date Made Active in Reports: 09/17/2004
Number of Days to Update: 39
Source: Environmental Protection Agency
Telephone: 800-424-9346
Last EDR Contact: 06/09/2004
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

MINES: Mines Master Index File
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011
Date Data Arrived at EDR: 09/08/2011
Date Made Active in Reports: 09/29/2011
Number of Days to Update: 21
Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959
Last EDR Contact: 12/07/2011
Next Scheduled EDR Contact: 03/19/2012
Data Release Frequency: Semi-Annually

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.
TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSPI: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.
SSTS:  Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all
registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March
1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices
being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009     Source:  EPA
Date Data Arrived at EDR: 12/10/2010
Date Made Active in Reports: 02/25/2011
Number of Days to Update: 77
Next Scheduled EDR Contact: 02/13/2012
Data Release Frequency: Annually

ICIS:  Integrated Compliance Information System
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement
and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES)
program.

Date of Government Version: 01/07/2011     Source:  Environmental Protection Agency
Date Data Arrived at EDR: 01/21/2011
Date Made Active in Reports: 03/21/2011
Number of Days to Update: 59
Next Scheduled EDR Contact: 04/09/2012
Data Release Frequency: Quarterly

PADS:  PCB Activity Database System
PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers
of PCB’s who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010      Source:  EPA
Date Data Arrived at EDR: 11/10/2010
Date Made Active in Reports: 02/16/2011
Number of Days to Update: 98
Next Scheduled EDR Contact: 01/30/2012
Data Release Frequency: Annually

MLTS:  Material Licensing Tracking System
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which
possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency,
EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011     Source:  Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011
Date Made Active in Reports: 09/13/2011
Number of Days to Update: 60
Next Scheduled EDR Contact: 03/26/2012
Data Release Frequency: Quarterly

RADINFO:  Radiation Information Database
The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S.
Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011      Source:  Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011
Date Made Active in Reports: 02/16/2011
Number of Days to Update: 34
Next Scheduled EDR Contact: 01/23/2012
Data Release Frequency: Quarterly
FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

BRS: Biennial Reporting System
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.
PCB TRANSFORMER: PCB Transformer Registration Database
The database of PCB transformer registrations that includes all PCB registration submittals.

- Date of Government Version: 01/01/2008
- Date Data Arrived at EDR: 02/18/2009
- Date Made Active in Reports: 05/29/2009
- Number of Days to Update: 100
- Next Scheduled EDR Contact: 02/13/2012
- Data Release Frequency: Varies

COAL ASH DOE: Steam-Electric Plan Operation Data
A listing of power plants that store ash in surface ponds.

- Date of Government Version: 12/31/2005
- Date Data Arrived at EDR: 08/07/2009
- Date Made Active in Reports: 10/22/2009
- Number of Days to Update: 76
- Next Scheduled EDR Contact: 01/30/2012
- Data Release Frequency: Varies

FEMA UST: Underground Storage Tank Listing
A listing of all FEMA owned underground storage tanks.

- Date of Government Version: 01/01/2010
- Date Data Arrived at EDR: 02/16/2010
- Date Made Active in Reports: 04/12/2010
- Number of Days to Update: 55
- Next Scheduled EDR Contact: 03/26/2012
- Data Release Frequency: Varies

COAL ASH EPA: Coal Combustion Residues Surface Impoundments List
A listing of coal combustion residues surface impoundments with high hazard potential ratings.

- Date of Government Version: 08/17/2010
- Date Data Arrived at EDR: 01/03/2011
- Date Made Active in Reports: 03/21/2011
- Number of Days to Update: 77
- Next Scheduled EDR Contact: 02/06/2012
- Data Release Frequency: Varies

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

- Date of Government Version: 03/07/2011
- Date Data Arrived at EDR: 03/09/2011
- Date Made Active in Reports: 05/02/2011
- Number of Days to Update: 54
- Next Scheduled EDR Contact: 05/25/2009
- Data Release Frequency: No Update Planned

STATE AND LOCAL RECORDS

HIST CAL-SITES: Calsites Database
The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

- Date of Government Version: 08/08/2005
- Date Data Arrived at EDR: 08/03/2006
- Date Made Active in Reports: 08/24/2006
- Number of Days to Update: 21
- Next Scheduled EDR Contact: 02/23/2009
- Data Release Frequency: No Update Planned
CA BOND EXP. PLAN:  Bond Expenditure Plan
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989  
Source: Department of Health Services  
Telephone: 916-255-2118  
Date Data Arrived at EDR: 07/27/1994

HIST UST: Hazardous Substance Storage Container Database
The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Date Data Arrived at EDR: 01/25/1991
Date Made Active in Reports: 02/12/1991
Number of Days to Update: 18
Source: State Water Resources Control Board
Telephone: 916-341-5851
Last EDR Contact: 07/26/2001
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

LIENS: Environmental Liens Listing
A listing of property locations with environmental liens for California where DTSC is a lien holder.
SWEEPS UST: SWEEPS UST Listing
Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

CHMIRS: California Hazardous Material Incident Report System
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

LDS: Land Disposal Sites Listing
The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units.

AST: Aboveground Petroleum Storage Tank Facilities
Registered Aboveground Storage Tanks.

MCS: Military Cleanup Sites Listing
The State Water Resources Control Board and nine Regional Water Quality Control Boards partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities.

NOTIFY 65: Proposition 65 Records
Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.
DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

VCP: Voluntary Cleanup Program Properties
Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

DRYCLEANERS: Cleaner Facilities
A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner’s agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

WIP: Well Investigation Program Case List
Well Investigation Program case in the San Gabriel and San Fernando Valley area.

ENF: Enforcement Action Listing
CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
### HWP: EnviroStor Permitted Facilities Listing
Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Data Release Frequency: Varies

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.
ALAMEDA COUNTY:

Contaminated Sites
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Underground Tanks
Underground storage tank sites located in Alameda county.

CONTRA COSTA COUNTY:

Site List
List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

KERN COUNTY:

Underground Storage Tank Sites & Tank Listing
Kern County Sites and Tanks Listing.

LOS ANGELES COUNTY:

San Gabriel Valley Areas of Concern
San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

UNMAPPED PROPERTY
This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Limited Permission To Make Copies
Allied Geotechnical (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Telephone: 916-324-2208  
Radon Database for California

Area Radon Information  
Source: USGS  
Telephone: 703-356-4020  
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones  
Source: EPA  
Telephone: 703-356-4020  
Sections 307 & 309 of ICAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

USGS Water Wells: USGS National Water Inventory System (NWIS)  
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database  
Source: Department of Water Resources  
Telephone: 916-651-9648

California Drinking Water Quality Database  
Source: Department of Health Services  
Telephone: 916-324-2319  
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

EDR Historical Topographic Map Report
Environmental Data Resources, Inc.'s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

The EDR Aerial Photo Decade Package
Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.
