**Notes**

L - Likely, UL - Unlikely, N - No, UK - Unknown

The SIC and NAICS code systems were designed for businesses and are not considered applicable to municipal facilities.

Because virtually all lands in the City's Jurisdiction discharge to, or are tributary to, a 303(d) listed water body, lagoon, or water body on environmentally sensitive lands, all City facilities in this inventory are considered to fall under that category.

<sup>1</sup> Potential pollutants were populated based on information from Table 3-10 in the Copermittees' Baseline Long-Term Effectiveness Assessment (LTEA).

<sup>2</sup> No equivalent category exists in Table 3-10 in the LTEA.

<sup>3</sup> The inventory presented in this appendix of municipal facilities to be inspected by the City as part of the industrial and commercial inspections program is based on the best information available at the time this table was prepared.

Inspections completed by the City only cover areas that have active industrial/commercial operations occurring on site. As program implementation progresses, modifications to the municipal facilities inventory will be made based on any changes to active industrial/commercial activities that occur to municipal facilities. For the most updated information, please contact the City's Transportation & Stormwater Department.
