

DSD ONLINE PERMITS

Apply for a Discretionary Permit

Overview

The Development Services Department's (DSD) online permitting system is a full cloud-based application that allows customers to apply for permits online and upload plans and documents for review 24/7.

Before you begin, please review the information about the permit submittal requirements at sandiego.gov/dsd.

When new permit applications are received, DSD will review the documents for completeness, assess required permit fees and assign that project to a reviewer. Reviewers will send out their cycle issues report as they complete each cycle, but resubmittal can only happen after all reviews have been complete. Applicants must address all cycle issues prior to resubmitting any new plans. You cannot resubmit to each specific discipline – resubmittals are for all disciplines at the same time.

APPENDIX C – REQUIREMENTS TO UPLOAD PLANS AND DOCUMENTS

Sheet Numbering

Please make sure your sheet numbers are located in the bottom right corner of your plans. Use [the designated templates](#) or follow [sheet numbering styles](#) to ensure the timely processing of reviews.

File Size

The max size of each file you can upload cannot exceed 200MB. File sizes larger than 200MB will be rejected.

FIX: Return to the source document and create PDF files that are below the file size limitation.

Page Size

PDF files with page sizes 8.5- by 11-inches are accepted for DSD-approved fillable documents and required reports. However, plans must be at minimum 11- by 17-inches and a maximum of 36- by 48-inches.

FIX: Return to the source document and change the paper size to meet the requirements.

Page Orientation

Having a mix of paper sizes and orientations is not a problem, as orientation issues will not prevent the file from being accepted. However, this will generate more difficult reviewing conditions for review teams. A warning will pop-up if different orientations are found to help you research whether any pages are upside down or improperly oriented.

FIX: Verify that pages are not upside down or improperly oriented.

Password Protection

Files must not be password protected. If the PDF cannot be opened, the file will be rejected.

FIX: Remove the password protection to allow users to open the PDF.

Annotations and Comments

An annotation is any 'object' that appears in the Adobe Reader 'Comment' panel. It could be a 'comment' or 'stamp' or font issue like SHX Text from AutoCad.

FIX: To remove annotations in a PDF, use the print to PDF option. This process eliminates annotations by "flattening" the PDF.
