(1) Reflects gross rent. Actual cash paid by tenant = gross rent minus utility allowance. See the "San Diego Housing Commission Utility Allowance" to calculate the utility allowance based on a project's actual utility profile.

(2) Per Health & Safety Code section 50052.5(h). This does not serve as a limit on the actual household size occupying the unit, but rather is a limit on the gross rent that may be charged for that unit.

(3) Household income for units must be restricted below 60% AMI to avoid falling within the "60% to 80% AMI" category per SB 341. If not, no more than 20% of monies can be spent on these units.

(4) Per State of California Department of Housing and Community Development (HCD) 2022 income limits. Limits are consistent with HUD.

(5) Per California Tax Credit Allocation Committee 2023 Income Limits (based on HUD formula income).

(6) Per HCD 2023 income limits.

**NOTE: The above affordable rent and income charts should be used only as a guide to determine maximum rents and qualification of affordable households and should be used in conjunction with the Housing Affordability Levels Memorandum and Rent Charts prepared annually for the City of San Diego. Always refer to the Regulatory Agreements governing each affordable housing project as restrictions vary by project.**
