January 27, 1999

Mr. Earl Rod Bar, Chairman
The City of San Diego Historical Site Board
City Administration Building
Community Concourse MS4A
San Diego, CA 92101

Dear Chairman Bar:

Attached is a notebook that inventories the potential historic resources within the Ballpark District. The notebook contains DPR Forms for 38 different sites that we would like the Historic Site Board (HSB) to address. These 38 sites can be summarized as follows:

- 4 sites have already been considered by the HSB and not designated.
- 7 of the sites have been considered by the HSB and are on the local register at this time. Of these seven, we ask that the HSB clarify the status of 215 Seventh Avenue, the Western Metals Supply Company buildings, which were placed on the local register in 1978. Our understanding is that in 1978 the entire parcel, which contains both a five-story and a single story building, was put on the local register. We would like a better understanding of whether or not the single story building has the same significance as the five-story building.
- 3 buildings are considered HSB eligible in the evaluation performed by CCDC’s cultural resource consultant, Marie Burke Lia, for the Ballpark EIR.
- 24 of the buildings are considered not eligible for the HSB register by CCDC’s cultural resource consultant.

We would respectfully request that the HSB consider all of the resources which have been determined to either be eligible or not eligible, along with a clarification on the Western Metals low rise building. Please provide us with direction on the historical status of these resources so that we can continue to move the Ballpark planning forward. We appreciate your consideration and effort and we are prepared to assist you in any way that we can. Due to the schedule of the Ballpark planning effort, it is important that we receive your input on these buildings as soon as possible.

We look forward to the HSB’s findings. Please contact me if we can be of any assistance.

Sincerely,

Greg Shannon

Greg S. Shannon

Legend

"Address": This refers to the resource address-addresses.

"Resource Name": This refers to the resource historic or common name.

"Status": This refers to whether the resource is currently listed on the San Diego Historical Site Board Register ("On Local Register"); whether the resource appears eligible for listing on the San Diego Historical Site Board Register ("HSB Eligible"); whether the resource has been considered by the San Diego Historical Site Board and found to be ineligible for listing, and therefore, not designated as historic ("Considered/Not Designated"); or whether the resource has been considered to be, based upon previous or current surveys, historically insignificant, and therefore not considered eligible for listing on the San Diego Historical Site Board Register ("Not Eligible").

"Inventoried": This refers to the inventory or inventories in which the resource was previously identified. The Centre City Inventory, comprising the Bayside, Centre City East, El Cortez, Harborview (Little Italy), and Core areas in 1988-1989 is referred to as "CC," and the Warehouse District Inventory in 1995 is referred to as "WD." Those resources not previously identified in earlier surveys are included as part of the current study and are referred to as "Ballpark." Note that sites identified in the Bayside Addendum Survey (SOHO) in 1994 were evaluated in the current Ballpark study.

*P2. Location: □ Not for Publication □ Unrestricted * (P2b and P2c or P2d. Attach a Location Map as necessary.)

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

808 and 810 appear to be a separate single-story structure which wraps around the corner of Imperial and 8th Avenues. Constructed of concrete, and stucco, it is a rather formidable building extending nearly the full length of the 8th Avenue block, on the east side of the street. 808 Imperial Avenue is plain, with several window openings which are vertical and multi-paned. The surface of the fabric is plain, with several entrances, one on 8th Avenue and one at 808 Imperial Avenue. The roof is flat, has no parapet; the landscaping is minimal and confined largely to the area between the curb and the sidewalk.

Judge Charles B. Richards, director of the First National Bank, started his cold storage plant at this location in 1902. He enlarged the 1889 dated Silver Gate Warehouse to accommodate his equipment which was planned to produce 10 tons of ice per day. This was considered one of the finest plants in the country with the possible exception of one in Kansas City. In 1890, Richards erected a new two-story cold storage plant at 9th and "M" (now Imperial). The San Diego Ice and Cold Storage Company remained here through the 1920s when the business was moved to a new location across the street. From 1924 until 1930, the Campbell Creamery was located at this address. In 1932, the California Goose Packers Ltd. Plant and the Dairy Delivery Company of San Diego inhabited this structure. The Balboa Brewing Company along with various other companies such as S.A. Rich, wholesale meats, and national Dry Ice, leased space here from 1934 through 1938. From 1943 until 1945, the Bridgeford Company, a frozen foods outlet, ran their business here. Moody’s Sandwich and Catering Service leased quarters here from 1955 through 1960. In 1970, Berkheimer’s Warehouse inhabited this structure.

Date of Evaluation:

(This space reserved for official comments.)
The buildings as we see them today are evidence of the growth of the San Diego ice & Cold Storage Company at the turn of the century. There are single hung sash windows beneath segmental arches with six over six lights on the second-floor additions. There is also some frame construction behind 810 Imperial Avenue with a round window or vent frame within the shed roof. These buildings exhibit the hallmarks of industrial buildings: differently sized and designed windows and door openings for different functions.

This building is not historically significant as an example of its genre. The building has been extensively modified, and is not associated with significant persons or events in San Diego. Additionally, this building was considered by the Historical Site Board and rejected on July 27, 1994.

In 1918, the San Diego Ice & Cold Storage Co., purchased this block from the Los Angeles & San Diego Beach Railway Co. With single and three-story refrigeration buildings and a cold storage capacity of 200,000 cubic feet, the company produced more than 1/4 of the ice produced in the territory in 1925. That year, J.B. Dunbar, V.P. of the Southwestern Ice & Cold Storage Co. of Yuma, purchased the buildings for $750,000. Dunbar, an ice engineer, assumed active management of the company. The plant occupied 1 1/4 blocks located "in the heart of the industrial district." Excellent shipping facilities were afforded by both spur tracks to the Santa Fe railroads and the site's proximity to the waterfront. From 1941 to 1948, Hamilton Meat Company also operated from these premises. In 1955, California Cold Storage & Distribution Co. purchased this property and inhabited these structures along with Fred W. Jillson, and the San Diego Food Sales Company, until 1970.

Description

Floor area is segmental arched and double-paned, operating on a pivot. The tower apparently has windows at each floor level on the north side for light in the passageways. The business sign faces west at the peak of the tower. The strength of the building suggests, as do the buildings to the north, that they were all constructed at the same time and by the same contractor.

Significance

This building is not historically significant as an example of its genre. The building has been extensively modified, and is not associated with significant persons or events in San Diego. Additionally, this building was considered by the Historical Site Board and rejected on July 27, 1994.

and (P2b and P2c or P2d. Attach a Location Map as necessary.)

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This four-story, rectangular concrete building is designed in the Commercial style with early International style influences. It has crisp, clean lines accented with bas-relief sculpture over the main entry, and at several other exterior locations, including the tower at the northeastern corner. The windows are set in industrial frames with pivoting central sections. Major alterations took place in 1944 when the Treppe Construction Company increased the original two-story portion of the building to four stories. Loading docks dominate the 7th Avenue side; awnings were added over the ground floor windows. The northwest tower element has been removed and replaced with a large flag pole.

Required Information
In 1904, Ella Watts sold this property to Melville Klauber. The Klauber-Wagenheim trading post was established in 1859 in San Diego. By 1969, it had become one of the oldest firms in California with a continuous family operation. The great produce firm presumably used the property in connection with another building. In 1929, when they outgrew the other buildings, the structure located at 611 Island Avenue was erected. The style represents the utilitarian monolith, simple and symmetrical, with great window spaces for natural light, built for the growing commercial needs of the area in the 1920s. The Klauber-Wagenheim Company represented the oldest wholesale grocer organization in California.
*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Klauber-Wagenheim building was designed by noted San Diego architect William Henry Wheeler (1873-1956). Wheeler, originally from Australia, migrated to Canada at the age of 20. He eventually made his way down from Vancouver to San Francisco where he studied engineering at the University of California, Berkeley. From there he moved to Arizona and, finally, to San Diego. Among Wheeler's many architectural accomplishments in San Diego are the Eagles Hall (designated by the San Diego Historical Site Board, No. 189) and the Balboa Theatre (designated by the San Diego Historical Site Board, No. 77), located in what is now Horton Plaza.

The Trepte Construction Company was established in San Diego in 1895 by Moritz Trepte. His son, Walter Trepte, eventually took over the business and went on to either build or design many notable San Diego edifices, including the Whitney Building, the Gould Building, the Scripps Residence and the Southern California Baking Company. The Trepte Construction Company was contracted to build the Klauber-Wagenheim building which was completed in 1929. Walter Trepte eventually retired in favor of his son, Eugene Trepte.

The Klauber-Wagenheim is architecturally significant due to the fact that it represents the transition from Victorian symmetry to a twentieth-century commercial structure with apparent applications of the early International style. Further, the building is significant due to its association with master architect William Wheeler.

The Klauber-Wagenheim structure is listed on the San Diego Historical Site Board Register as No. 159, designated on 01/27/82.

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This brick and concrete building is a one-part commercial block which includes two business storefronts. The building appears to be made of concrete with brick pilasters/columns. It has a flat roof with 20 plate glass windows of varying shape and two wood framed doors with plate glass sections. Modern tile work has been applied along the bottom of the storefronts. The top of the storefront appears modified with concrete and paint. The west facade has a stucco exterior and includes three thin windows. The building is in good condition.

Period of Significance 1920  Property Type Commercial  Applicable Criteria C

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

San Diego County Assessors Records indicate that this building was constructed in 1920. The earliest identified building tenant was the Western Produce Company. It remained at this location until 1952. During this year, Charles Bertolino, a wholesale produce merchant also operated from this location. From 1953-1957, this building was occupied by T & R Produce, Wholesalers. From 1958-1960, Gallo & Sons, Wholesale Producers were tenants.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events of individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

Period of Significance: 1912  
Applicable Criteria: C

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This commercial building uses the cornice and bracket style of the Victorian period with a neoclassical use of flat piers and the ornamental simplicity of the new turn-of-the-century architecture. In 1912, Boone Investment Company contracted with A. and H. Brownlee, Contractors, for $11,482.00 to build on Lots K and L. In 1915, Doyle-Barnes, wholesale grocers, occupied the building and were there in 1927. Partner J.L. Doyle, in San Diego since 1887, had at one time, from 1903-1906, done business as Fletcher and Doyle with Ed Fletcher, a prominent San Diego businessman. This industrial structure, which had been acclaimed as "San Diego's largest produce house," serves as a significant example of

P3a. Description

The ground floor has an asymmetrical facade with windows clustered at the corner. The second floor facade is symmetrical with evenly-spaced windows in a horizontal row. Doors are single and enter the building at various points. It is in good condition.

B10. Significance

Early twentieth-century architecture. In this sense, it represents an early use of reinforced concrete in local building practices. In addition, the warehouse is representative of a period in which wholesale produce businesses occupied the section of San Diego's warehouse district known as "Produce Row." It is designated by the San Diego Historical Site Board as #309.

*P3a.** Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):  

This 2½-story building is completely off-set from the street level, with the exception of the lightly detailed, double entry doorway which features a fan-like multi-paned window pediment above the doors. The dark turquoise window frames enhance the effect of the variety of punched windows which reflect the various interior functions. The simple lines and scale of this building place it as an early example of the International style, yet it retains the overall symmetry of 19th century commercial designs. The second floor features both fixed and pivoting multi-paned window sets. The first floor features two roll top loading entrances on the south side and one on the west side. Also on the first floor are fixed, square glass windows beneath multi-paned casement windows.

*Required Information
On April 25, 1927, the Western Wholesale Drug Company filled the notice of completion for this structure, built for them by Storm and Butts. The Western Wholesale Drug & Robbins, Inc., another wholesale drug company, moved in. From 1967 to the early 1990s, Elon of California Swim Wear occupied this structure. Thereafter, the building was occupied by the Unicorn Antique Mall, the current tenants. This typical commercial structure is individualized by its distinctive front door and by its setting within the block of surrounding buildings. It shows that the simplest ornamentation, done well and in the right proportion, can distinguish a structure from many others.

B11. Additional Resource Attributes: (List attributes and codes)
*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Although the building was built in 1927, it is reminiscent of the earlier, 19th-century brick commercial designs that are so common to this area of downtown San Diego. In addition, there are also traces of the International style, such as the ribbon-style metal casement windows, the flat roof, the smooth wall surfaces, the lack of adornment around windows and doorways, and the asymmetrical facade. In spite of the early International influences, however, the style of the building is still similar to many other industrial/commercial buildings.

The building does not have any distinguishing architectural characteristics and the design of the building is not unique to the building period in which it was built. The building, therefore, has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

*Required Information
The Simon Levi Company, one of the oldest wholesale grocery firms in the city, had this building designed by architect Walter S. Keller. Keller was born in New York City in 1881 and attended the Weingart Architectural Institute. After graduation, he worked for architects Bernstein and Bernstein. Keller came to San Diego in 1909, and served as the superintendent of engineering specialties at the U.S. Grant Hotel. Keller opened his own office in 1911 and quickly established a reputation as an architect who specialized in residential designs of fine craftsmanship and quality cabinetwork. Over the years, Keller designed many homes in Kensington, Mission Hills, North Park, and Loma Portal areas of San Diego. Keller’s eclectic style of design ranged from Mission and Prairie to Art Deco and neo-classicism. Keller left San Diego in 1916 and participated in World War One, during which, in 1918, he died.
**P3a. Description** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

Concrete "brackets." Windows are 12/12 and 6/6 double hung sash on the upper floors and have a concrete upper lintel. Ground floor windows have a storefront appearance. Alterations through the years appear to have been minimal, and do not detract from the architectural integrity. Decorative brickwork at the rooftop adds interest to the facade and draws attention to the large concrete signs with the words "SIMON LEVI COMPANY." The entrance is off-center on the otherwise symmetrical facade and a marquee-style canvas canopy shades the entrance. The building is in good condition.

**B10. Significance:** (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Keller's design originally called for the building to be six stories in height. Work was authorized under two contracts: one for excavation in June 1913 with M.D. Goodbody, and another with the building contractor Armstrong & Pefley on July 15, 1913. Although the building was never built to its original height, the warehouse was very modern for its day. Devices such as a double-spiral chute rushed orders from the top to the ground floor, while freight elevators moved goods up for storage. Moveable platforms received goods from freight cars on the 7th Avenue spur tracks. Delivery doors that slid into wall pockets were utilized to save space. The fireproof building featured metal doors and window frames.

This particular property was purchased by Austrian-born businessman, Simon Levi, in 1905. Although supposedly retired at this point, Levi immediately began plans to construct a warehouse building with his son Bernard, then president of the Simon Levi Company. After Simon Levi's death in 1918, Safeway Stores and Western States Grocery leased the property until 1945, when the site was purchased by Safeway Stores. Safeway Stores leased the building to Equitable Life Assurance of New York. In 1954, Safeway and the R.K.H. Realty Corporation transferred title to Rita K. Hillman, who was also a leasee. In 1963, the title was transferred to Dallas J. and Mary H. Clark. This property was listed on the San Diego Historical Site Board Register as #177 on July 27, 1983.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This is a 1½-story, block long, industrial brick building. Its exposed brick exterior clearly expresses the structural bays and the functional variations within. Chicago-style steel windows are used throughout, even to form corners to embrace and define the entrance with an extreme, hard edge, modern result. The columns rise above the parapet, terminating with an art deco stepped of layered brick, with sporadically placed ornamental colored tile. A clerestory spire, the result of long-span steel row trusses, illuminates the open interior. Multiple loading dock areas are located at the southeastern side of the building.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Julius Kraft & Sons, San Francisco architects, were chosen by San Francisco-based Wellman Peck & Company to design their wholesale grocery warehouse in San Diego. The one-story building, with mezzanine, featured brick walls, steel frame interior, steel rolling doors, steel sash, metal skylights, concrete floor and composition roof at a cost of $15,000. Wellman Peck & Company owned the property until 1966, but began leasing it in 1957 to the San Diego Division of the Admiral Corporation, which continued at this address through 1970. From early 1970s to the present, T. R. Produce, Inc. has occupied the edifice.

*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Trepte Construction Company was established in San Diego in 1895 by Moritz Trepte. His son, Walter Trepte, eventually took over the business and went on to either build or design many notable San Diego edifices, including the Whitney Building, the Gould Building, the Scripps Residence, the Southern California Baking Company, and the Klauber-Wagenheim Building. The Trepte Construction Company was contracted to build the Wellman-Peck & Company building which was completed in 1933. Walter Trepte eventually retired in favor of his son, Eugene Trepte.

Although previous research has determined that the building was a “rare and important example of the French and German modern influences on small scale industrial applications in the United States,” current research has not found any evidence to substantiate this conclusion. In fact, the style of the building is similar to many other industrial/commercial buildings in the Centre City East area. The building, therefore, has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

In 1900, Frederick C. Nason purchased M.C. Nason & Co., San Diego's oldest commission firm, from his brother, after having had sole charge of the enterprise since 1895. He erected this two-story brick and stucco structure for the business in 1913. In 1922, Ellis Brown and P.M. Follinsbee purchased this building for their Triangle Transfer and Storage Company. Their business remained at this address through 1955. From 1957 through 1958, San Diego Van and Storage occupied this edifice. Philips Electrical Supply Company inhabited this structure in 1960.

This structure gains its significance as an example of Edwardian Commercial architecture.
"K" Street has four pilasters which reach from the street level to the nearly-flat roofline. Doors are recessed and are single wooden and glass doors. The building is in good condition.

*B10. Significance: Theme Architecture* | Property Type Commercial | Applicable Criteria C

| Period of Significance | 1926 | Property Type               | Commercial |

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This single-storied hollow clay tile warehouse-type structure was probably erected in 1926, for the W.D. Ballinger wholesale cigar business, which inhabited the edifice in 1927 and stayed at this address through 1928. From 1930 until 1937, Haas Baruch and Company of San Diego, wholesale grocers, occupied this building. In 1941, Consolidated Aircraft Corporation used this location for a warehouse. From 1942 until 1980, Webb Farm Equipment Company sold agricultural implements and ran a farm equipment repair business here. Farrar Chemical Services leased a portion of this structure from 1959 through 1965.

Although this building is an example of a Spanish Eclectic Industrial style building, excessive street facade modifications render this building architecturally insignificant. This site was considered by the Historical Site Board, but was rejected on August 24, 1994.

Historical research indicates that the building located at 1143-1145 K Street is Rosario Hall, which was moved from its original location at the southeast corner of Arctic (Kettner) and Fifth (F) Streets sometime between 1906-1921. Colonel Manuel Ferrer commenced construction of Rosario Hall in May 1870 after his Occidental Exchange and Billiard Parlor was destroyed by fire. Ferrer, born in Spain in 1829, served as a colonel in the Mexican army during the Mexican-American War, and later settled down in San Diego. Rosario Hall occupied the same location as the Occidental Parlor established by Ferrer. Rosario Hall opened for business on July 4, 1870. Ferrer is also noted as giving San Diego Pantoja Park, at least as long ago as 1869. When constructed, Rosario Hall was a two-story frame building which featured a balustraded balcony with 12 light windows. A saloon

Date June 1998 ☐ Continuation ☐ Update

**P3a. Description** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

- Appears to have been modified. The exterior is stucco on wood frame. The building is in fair condition.

**B10. Significance:** (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

- Was located on the first floor and a dance hall on the second floor. Over the years, Rosario Hall became a social center. Prior to the completion of St. Joseph’s Catholic Church in 1875, Rosario Hall was occasionally used for church services by Fr. Ubach. During the 1870s and 1880s, the hall was frequently used for balls and celebrations.

  During the boom years of the late 1880s, the second floor was turned into a hotel. By 1906, Rosario Hall had become tenements, and by 1921, Rosario Hall had been moved to its current location at the corner of 12th and K Streets.

  At its current location, the ground floor of Rosario Hall (1145 K) had been used by various restaurants until at least 1960. Outdoor stairs lead to a second floor (1143 K), which served a residential use until at least 1960. Since 1926, the restaurant space has changed hands several times with various tenants. In most cases, it is not clear whether the existing restaurant was owned or merely managed by the tenants. E.S. Faulkner, followed by F.C. McKee and L.B. Churden occupied the site in the 1920s. In the 1930s, John Stubbs, W.B. Berling, W.T. Katzunz, R.E. Fischer, E.R. Irwin, A.J. Goddard, Fred Schauer and J.S. Music were all listed as tenants either of the 2nd floor residence, the restaurant, or both. In the 1940s, tenants included Fred Schauer, J.S. Music, W.T. Fields, H.A. Howe, J.J. Dorr and J.R. Willey. Finally, from the 1950s until at least 1960, The Alibi Coffee Shop occupied 1145 K, while Joseph Wenbourne occupied the residence at 1143 K (in 1960, Oral L. Murphy occupied 1143 K).

The building has been determined to be neither historically nor architecturally significant. A property removed from its original or historically significant location can be considered historically significant if it is significant primarily for architectural value or it is the surviving property most importantly associated with a historic person or event. In
terms of architectural value, a moved property must retain enough historic features to convey its architectural values and retain integrity of design, materials, workmanship, feeling, and association. Rosario Hall today has been modified from its original design, and no longer retains its feeling or association with its original location. The balustraded balcony has been removed and the lower storefront areas have been greatly modified as has the interior, and likely the west side of the building. Consequently, Rosario Hall is today architecturally insignificant.

While Rosario Hall was constructed for Colonel Manuel Ferrer, historical research could not substantially determine Colonel Ferrer's contribution to either local, state, or national history, nor could it be determined whether Rosario Hall is the single surviving property that is most closely associated with Ferrer's historical legacy. Pantoja Park, rather than Rosario Hall, may be the property most closely associated with Ferrer's historical contribution, if any. Any association between Rosario Hall and Colonel Ferrer, would be greatly diminished to a level below significance as the Rosario Hall has been relocated from its historically dependent location. Similarly, historical research failed to identify any historically significant events or individuals associated with Rosario Hall at either its former or present location. It is therefore, historically insignificant.

This served as an associative structure to that of the Western Metal Supply Company, located at 215 7th Avenue. Incorporated in November 1902, Western Metal Supply Company took over a metals business begun by McKenzie, Flint & Company in 1888. Used for commercial and industrial purposes, this building was used primarily to house shipments brought in by truck or automobile.

*P3a. Description* (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

Provide ventilation. The moderate pitch roofline also appears constructed of sheet metal. The building is in fair condition.

*B10. Significance:* (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Organized as a wholesale company which dealt in steel, iron, pipe, hardware, metals, and plumbing supplies, the company was sold and reorganized into Western Metal Industries in 1972. It is believed that the Western Metal Supply Company, Warehouse #9 was used to store metal products of various types.

The structure has been determined to be neither historically or architecturally significant. Although it served as an associative structure to the Western Metals Building, historical research could not be identified which would clearly establish it as having been related to significant historical events, and or individuals. Additionally, it does not display any unique or innovative architectural characteristics.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The location of this building was formerly that of the San Diego Lumber Company headquarters. Incorporated in 1884, the San Diego Lumber Company was the oldest lumber yard in San Diego County before being purchased by the Frost Hardwood Lumber Company in later years. San Diego City Directories, however, indicate that the Frost Lumber Company never operated from this location. It is believed that the building was built in 1924 or 1925 for the San Diego Lumber Company. This lumber company formerly had their operations to the south and east of this site, on a pier that extended into the Bay, at which they received their lumber shipments. In the early 1920s dredging of San Diego Bay required that the pier be removed and thus it is believed that this building was built shortly thereafter.

Two loading docks are located in the back of the building. The building is in good condition.

*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building was built as a "finish" shed, it stored already milled lumber. Originally its south side was open. It cost $16,000 to build and the contractor was Trepte Construction. The south side was closed in when it was leased to a moving company. The buttresses on the side of the building are in the public right of way.

The earliest recorded tenant of this building, after San Diego Lumber/Frost Lumber use was Western Van & Stage Company in 1958. Ace Van & Stage Company operated from this location from 1960-1971. From 1972-1977, Mapac Inc., Craters & Packers were here. Finally during the late 1970s and early 1980s, Bailey's Moving & Storage operated from here. The building was used for auto storage in later years.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals. Additionally, it does not display any unique or innovative architectural characteristics.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This Western Metal Supply building was designated by architect Henry Lord Gay, the founder of the American Institute of Architects. The steel company was originally McKenzie, Flint and Winsky. They organized in 1896 and changed the name in 1903. By 1920 the firm occupied the entire block and produced "everything in iron and steel from door tacks to structural beams." The architectural design combines a simplified Victorian corbeling with modern metal window frames to create a transitional commercial building of great dignity.

various commercial activities. The first two floors, however, were finished as offices. Hardwoods, finishes and overall interior construction make this an outstanding structure. The building to the north, constructed of brick, is affixed to the main building, but is a later addition and is utilized for a Farmers' Market.

*810. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Architecturally, this building is significant. Designed by renown American architect Henry Lord Gay, the edifice is a fine example of an industrial structure. It is, moreover, in good condition. Some of the building's distinctive features include "special prismatic windows, pneumatic tube message center, mill construction, fire extinguishing system and other examples of construction long since absent in buildings."

This building gains its historical significance from its Industrial/Commercial design, which was influenced by the Chicago school. This building is on San Diego Historical Site Board Register as number 131, placed there on November 3, 1978.
Horton's Addition, Block 123, Lot J, AP# 535-351-09

**P3a. Description** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This twentieth-century Commercial style, single-story brick building was constructed on a concrete floor. Rectangular in shape, the building measures 50' by 100', and has a flat truss roof and a wire glass skylight. The original 1911 building was updated in the late 1920s-1930s to include the stepped parapet facade which is evident today. A more recent renovation includes the new metal roll-up door, entrance door and awnings which help to relieve the otherwise plain facade. Large plate glass windows with metal...

**B7. Moved**: ☐No ☐Yes ☐Unknown  **B8. Date**: __________  **Original Location**: __________

**B9a. Architect**: Walter S. Keller  **B9b. Builder**: Unknown

**B10. Significance**: Theme Architecture  **Area**: San Diego  
**Property Type**: Commercial  **Applicable Criteria**: A & C

Period of Significance: 1911

Although this building was designed by Walter S. Keller, the alterations to this building are such that it does not convey its early historicity. Rather, the structure retains interesting elements of the 1930s (est.) renovation, including the stepped parapet facade, warehouse doors and storefront. The building served as the headquarters of the Julian-Warner Springs Truck Line from 1923-1936, one of San Diego's earliest locally operated automotive trucking lines.

surrounds are present on the main facade. The building appears to be in excellent condition.

**B10. Significance:** (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Walter Keller was born in New York City in 1881 and attended the Weingart Architectural Institute. After graduation, he worked for architects Bernstein and Bernstein. Keller came to San Diego in 1909, and served as the superintendent of engineering specialities at the U.S. Grant Hotel. Keller opened his own office in 1911 and quickly established a reputation as an architect who specialized in residential designs of fine craftsmanship and quality cabinetwork. Over the years, Keller designed many homes in the Kensington, Mission Hills, North Park, and Loma Portal areas of San Diego. Keller's eclectic style of design ranged from Mission and Prairie to Art Deco and neoclassicism. Keller left San Diego in 1916 and participated in World War One, during which, in 1918, he died.

Although this building was designed by noted architect Walter Keller, this building is not considered a particularly unique or innovative design, and is, therefore, historically and architecturally insignificant.

B. Guy Showley erected this three-story brick structure for his wholesale confectionery business in 1924. Showley and his brother, Jesse Ray, had operated a candy company in San Diego since 1905. The building suffered $25,000 worth of fire damage in 1931 and was partially reconstructed. The Showley Bros. Candy Company remained at this address through 1950. Various other enterprises operated here alongside the Showleys, including the Loose-Wiles Biscuit Company from 1934-1935, and the Sunshine Biscuit Company from 1947-1948. Another fire occurred in the building around 1950, prompting the Showley Bros. to sell the business. In 1950, Century Floor Coverings used part of this structure, eventually buying it and filling the entire edifice, adding the Century Distributing Company and later the Century Radio and TV business. In 1959, Robert L. Groff purchased the property and ran his wholesale dry goods business here through 1970.

spaces remain. The ground floor office space was remodeled during the last 30 years, with wood stud walls, gypsum board wall finish and acoustical ceilings. The remainder of the structure has been painted for warehouse and assembly use with much of the structure exposed. The existing floor system, with the exception of the ground floor, is maple. The existing electrical, plumbing, and mechanical systems have been changed during the remodeling of the building in the 1950s. The exterior red brick is unreinforced and exists along all exterior walls. The facade is penetrated by large industrial steel windows which provide ventilation in the large spaces.

*P3a. Description* (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

Established in 1895, the Trepte Construction Company was a prominent and stable San Diego business. Moritz Trepte, father of architect Walter Trepte, founded the company and advertised it as a contracting firm. Walter was a successful director of a local bank, but he also designed and constructed many houses and commercial and industrial buildings. Eventually, Walter became director of this well-known construction company. When he finally retired from this position, he was replaced by his son, Eugene Trepte. Walter died in 1985.

This structure is listed on the San Diego Historical Site Board Register as Site No.161.

One of many warehouse-type buildings which sprang up in this area following the completion of the San Diego and Arizona Railway, which ran tracks in the Bayside area in 1919. With the completion of the railway, San Diego could take full advantage of its shipping capabilities. These warehouse buildings' close proximity to the rail lines and wharf area made the Bayside district an ideal location for the manufacture and transportation of goods.

(This space reserved for official comments.)
*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

includes an off-center entrance and a non-symmetrical arrangement of glass blocks above the openings. The Showley Brothers Candy Company built this building in the late 1920s, and utilized it for storage and transport of their fine candy. As only ten percent of Showley's product was marketed in San Diego, this shipping facility was most important in the transport of candies as far west as Hawaii and to the east coast of the United States.

The building's simple, unadorned brick construction is indicative of the inexpensive commercial structures which were erected at this time. This common building, however, is not historically or architecturally significant.
The original arch is a notable example of a revival of classical features. The ornate castings are made of a sea sand composed of acanthus leaves, classical turned spirals on the pilasters and classical details. The entry arch is complete with keystone and the two pilasters support the entablature. The arch is centered between two large bays of low arched windows. The bays have a defined base with brick pilasters which separate the low arch windows. The windows are composed of original redwood frames.

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

Each window is divided into three sections vertically by two mullions and by a horizontal mullion about 1/3 of the way down from the top of the arch. The brick facade is composed of a multicolor arrangement of seven different kinds of brick. The parapet has a heavy and strong horizontal influence. The doors are double wood and glass; at the soffit area of the portico are exposed wood beams with terrazzo in a mixture of brown tones and is in excellent condition. The interior structural system of the warehouse is steel bow-string trusses (spanning 50 feet) supporting open wood joists about 16 inches on center. The roof is punctured by five original skylights. There are massive roofs over the vertical "doghouse-like" skylights which influence the character of the building when viewed from across the street.

*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

WWII, the Company operated at this address, but by 1945, began to lease, and then eventually sold, the structure to Safeway Stores, Inc.

330 8th Avenue is architecturally significant. It illustrates the unique blending of California styles, namely, the California Mission and the Spanish Colonial Revival prototypes. These were "prominent styles in San Diego following Bertram Goodhue's Panama-California Exposition and Irving Gill's notable Mission style." While it is known that the Trepte Construction Company designed and constructed the site described herein, it is not known if the actual architect was Walter Trepte. This building is listed on the San Diego Historical Site Board Register as #195.

Safeway Stores, one of the earliest national grocery chains in San Diego, utilized this building as its warehouse from the years of 1932 through the early 1960s. The Safeway Stores were created in American Falls, Idaho in 1918 by M.V. Skaggs. It was the first self-serve, cash and carry grocery store. The company grew, incorporating in 1926. It merged with Sam Seely in Los Angeles when they expanded to the southern California area. Safeway utilized the adjacent Simon Levi building for corporate offices, while utilizing this warehouse portion as a distribution point for their extensive grocery business.

Frank Schiefer had this brick commercial structure erected sometime between 1910 and 1911 for his show case, fixture and furniture manufacturing business. The company, known as Schiefer & Sons, included Paul, Arthur, and Frank Sr. in 1911, with the addition of Frank J., Ernest, and Carl in 1930. Schiefer & Sons featured a factory and sales room at this address through 1939. From 1941 until 1945, Standard Parachute Corporation, run by C.E. Fauntleroy and John Speaks in 1942, and subsequently by Charles G. Morehouse and C.B. King, produced parachutes for the war effort. Gabrillo Cleaners and Laundry operated its business here from 1950 until 1952. In 1958, Willard B. Hage utilized this structure as a warehouse for Hage’s dairy products. Hage’s Limited Divisions of Foremost Dairies inhabited this edifice in 1960, becoming the Foremost Dairies warehouse from 1966 through 1970. From 1972 until 1975, the building was leased by the Salvation Army and used as a warehouse. On the three visible building facades, faint references to the Schiefer & Sons’ business with the words "show case" and "fixtures" can be seen.

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This two-story building with a tower on the southwest corner, is primarily designed in the Art Moderne style. It is a poured reinforced concrete shell, built to last. The distinguishing feature is the tall tower used for fire hose hanging and drying. The frieze and parapet are heavily ventilated and ornamented with art deco motifs. The metal framed pivotal windows are placed symmetrically and have vertical striated relief connecting the stacked arrangement of all first floor windows with the smaller second floor windows. The first floor has an eighteen-foot ceiling, while the second floor is scaled down for firefighters' living quarters.

Simon and Ermance Levi sold this property to the City of San Diego in December 1906. By 1907, Chemical Company No. 5 was on duty. The title was later changed to Fire Station No. 4. This unusual Art Deco fire station, constructed with W.P.A. funds, took two years, from 1936 to 1938, to complete. The total cost was $35,000. It now houses engine companies No. 4 and No. 16 who man Rescue 14, a team which responds city-wide to any type of rescue. The building is significant for its unusual application of the Art Deco/Art Moderne architectural style. Plans in the late 1980s to completely refurbish the building were finally completed in 1992.

*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The original plans of the fire station included three signatures: G. A. Hansen, Phelps and Abrams. None of these men are recognizable as leading San Diego architects, although Hansen was a popular builder in San Diego. He most likely helped design and build the fire station with the help of Phelps and Abrams.

Fire Station No. 4 is significant for its unique modern architectural style. This structure is listed on the San Diego Historical Site Board Register as Site No. 326, designated on 10/26/94.

Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):
This building, constructed of brick or brick blocks with a stucco exterior, has a modified roll-up main entrance, which has been altered to include a door cut into it. The original door, which served as a main entrance has been sealed, and a window has been added along its top. A small group of windows are located along the northwest section of the building, both fixed and sliding. A smaller fixed window with grillwork is located at the southwest section of the building. The building has a flat roof with a small parapet.

The first occupant listing for this address was found to be Samuel E. Gonzales in 1926. He was not identified prior to this year. Gonzales apparently lived here until 1936. Gustave Nelson resided here in 1939. Vacant in 1940, the building served the Milk Containers Service from 1942-1945. Between 1947-1959, the Milk Institute of San Diego County operated from this address. In 1960, the property was vacant.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

This building was likely built around 1897, according to San Diego Sewer Records. These records also show that the address at that time was 427-431 Ninth Avenue. San Diego City Directory research was only able to trace residential history as far back as 1922. At this time, it was occupied by the C. Holle Company, a glass company owned by Christian Holle IV. Born in 1897, Holle was a native of Los Angeles who had moved to San Diego around 1911. Before this glass company occupied 427 Ninth, the business had been located at the corner of Market & State. Thereafter, the Holle Glass Company remained at 427 Ninth until the mid-1990s. San Diego City Directories for 1997-1998 listed Lutes Products as occupants. The facade of the building currently reads "427 Ninth Avenue" in large letters. No other company name is present.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

This electric utility pole once served as part of the SDG&E Complex in this 10th and Imperial Avenues area. Located between SDG&E Station A (formerly located across the street) and next to the SDG&E Service Building, this utility pole served as a supplier of energy in this area. The extent to which, however, is not known. The pole appears in a historic photograph of the Service Building taken in 1930. Historic photographs of Station A in 1912, however, do not show the pole. Based on electric utility poles of the period, from this photograph, however, it is believed that this utility pole was constructed sometime during the 1920s.

*B10. Significance: (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Although this utility pole was associated with the former SDG&E power complex and other buildings in this area, the demolition of several SDG&E buildings, such as Station A, has reduced this component of the complex to a level below significance. Additionally, the utility pole itself has been determined to be neither historically nor architecturally significant. It has not been associated with any significant individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

This massive structure encompasses the major part of the block and houses the service offices of the San Diego Gas and Electric Company. It is rectangular in shape, has a flat roof, with the exception of a half-story projecting above the roof line which houses a penthouse office, and has arched windows. All windows in the concrete and plastered building are industrial-type, opening outward on a pivot. Arches of Spanish Eclectic design, encompassing the entries on both Ninth and Tenth Avenues, are very slightly recessed. On the Imperial Avenue side there are a slightly to the south. When

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This four-story reinforced concrete structure, designed by Byllesby Engineering and Management Company of Chicago, was soundly constructed in 1930 to serve as the Gas and Electric Company’s service building and warehouse. The concrete was mixed to resist 3000 pounds per square inch. Six thousand square feet of glass were installed in the 265 windows. A noted feature of the structure was a monorail of one-ton capacity which made a complete loop of the first floor and also operated within the elevator. The monorail was an electrically-operated crane which ran on an overhead rail, making possible the transfer of material from any location inside to trucks waiting on either side of the building. The largest elevator in San Diego was located here - a 30 ton capacity freight

elevator, 10 feet wide and 25 feet long. A loaded truck could be
driven onto its platform and taken to either the second or third
floors. The building currently provides office space for the Gas
& Electric Company and houses the graphic arts and safety
departments, as well as the lab facility.

This building with Spanish Eclectic influences is noteworthy
primarily for its architectural design, as well as its role in
the history of San Diego power service.

(A discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

A San Diego City Directory search did not show a listing for 262 10th Avenue until 1959. The 1946 Sanborn Map shows a building on this site with the address of 264 10th. This commercial edifice was occupied by Ellis Brown Furniture. In 1959, Cal Tool Grinding & Assembly Company occupied 262 10th. The company remained tenants until 1965. In 1967, Joseph Plum occupied the site for one year. From 1968 until the present, the United Fastener Company occupied the building. The building at 264 10th remained until 1986, whereupon it was no longer listed in the City Directories. Ellis Brown Furniture (later known as Ellis Brown Real Estate during the 1970s and 1980s) continued to be listed as tenants until the last listing in 1985.

(Emphasize importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Currently a residential building, this edifice was, at one time, used as an auto and truck repair shop. It is believed that this building was constructed prior to 1921, most likely c. 1915. Part of the building was called the Auto/Truck Paint & Metal Booth. A possible alternative address used by this building was 1004 K Street. The San Diego City Directories do not show any listings of 301 10th Avenue from 1926 until at least 1960.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building was likely built around 1927, according to San Diego Sewer Records. These records also show that the address at that time was 444 Tenth Avenue. San Diego City Directory research was able to trace residential history to 1930. At this time it was occupied by Kelly Welding Works. In the mid-1930s, G. T. Franck, a dairy supply company, and C. D. Nelson, a wholesale liquors distributor, occupied the building. Then, from 1935 to 1998, machinery manufacturing company called Star Machine Works, Inc. occupied the building. In 1935, Star Machine Works, originally located on the waterfront, moved into the building. The business, owned and operated by Clarence Peterson, produced and manufactured a vast range of products, from rotating sprinklers to special patented parts essential to lead projectiles. In 1952, Peterson’s nephew, Ellard Mock, and a Star Machine Works machinist, Bill Brenizer purchased the company for Clarence Peterson. The business thrived until the 1990s, when it was no longer profitable. In 1997, the building was sold to architect Michael Witkin. Currently, both the Mixon Salon and architect Michael Witkin occupy the premises.

Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.

This Art Deco building has square pilasters and multi-paned windows, elements of this style which was common in the building of commercial structures in the 1920s and 1930s. This solidly constructed single-story building remains in good condition and the exterior appears to have suffered only minor alterations.

This building, as many other SDG&E buildings, was constructed in response to San Diego’s growth and expansion, and an ever increasing need for gas and electric power. While building by the power company fell off in the early years of the Great Depression,

openings is somewhat different. Along the south facade, or entrance area, eight large, multi-paned windows provide natural light, while the small entrance to the west is flanked by two smaller, multi-paned windows. Most of the larger windows contain a center portion which pivots outward, thus providing ventilation. The north facade consists of a series of large warehouse doors.

**B10. Significance:** (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building served as SDG&E Garage Number 2. Although the building was associated with the former SDG&E power complex and other buildings in this area, the demolition of several SDG&E buildings, such as Station A, have reduced this building to a level below significance. Additionally, the building itself has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

San Diego Water and Sewer Records indicate that service was provided to this address in September 1928. The owner of this property was F.A. Sutherland. Sutherland’s garage was located at 1715 C Street until at least April 1925. Between 1928-1933, however, no business is listed as having operated from this building. In 1934, however, Sutherland’s Tijuana Stages Garage operated from this location. This lasted until 1936, when the Pacific Greyhound Lines Garage operated from this address. It remained here until 1952, before the Arden Farms Company, wholesalers, moved in. Arden Farms remained until at least 1960.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

The earliest occupant listing for this address was Borderland Express/W.H. Gibson Express in 1925. In 1932, J.H. Dawson operated an auto repair shop from this building. The building was vacant in 1938. Between 1943-1948, the Standard Parachute Corporation used this building as a supply stockroom. Between 1950-1955, the Henry Levy Furniture Company used this building as a warehouse. Finally, from 1957 until at least 1960, the Qualitee Dairy Products Association used this building.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

San Diego Sewer and Water records indicate that service was provided to this address in February 1920. At the time, the property was owned by Val A. Turner. Turner was employed as a plumber, who never operated out of this building. It is believed that this building originally served as an Auto Truck Line Depot. The first listed building tenant was Desert Express, Inc. in 1926. Desert Express remained until 1930. From 1931-1933, the building was vacant. From 1934-1935, J.W. Meade operated a restaurant from this building. From 1937-1940, Challenge Freight Lines/F.V. Parker Trucking was a tenant. In 1941, W.H. Oliver, Dry Ice was a tenant, and in 1942-1943, so was the National Dry Ice Agency. From 1944-1960, the Cardox Corporation, Dry Ice was located here.

The building has been determined to be neither historically nor architecturally significant. The building has not been associated with any significant events or individuals in San Diego, nor does it display any unique or innovative architectural characteristics.

Some vacant property on site

Architect: Quayle Brothers, 1928
Builder: James B. McGrath, 1928

Significance: Theme Architecture Area San Diego

Period of Significance: 1923, 1928
Property Type: Comm./Indus.
Applicable Criteria: C

This two- to four-storied brick industrial structure was built in 1928 from designs created by the Quayle Brothers, noted San Diego architects. The 1928 building has been modified with the south and east facades receiving later additions which did not alter the original architectural design. The 1923 buildings and subsequent supplemental structures were destroyed by an 8-alarm fire on February 8, 1956. The Milk Producers' Association formed the Qualitee Dairy Company as a subsidiary of its association in 1923 to solve a marketing problem confronting scores of San Diego County dairy farmers. The group, one of the oldest cooperative marketing associations in California, found it was handicapped by a lack of satisfactory outlets through the processing and distributing organizations

for trucks are available on different sides, and a loading dock is west of the building. A wooden storage tower and gas pumps are visible. The building has deteriorated through lack of maintenance and through the many functions which the building has served in the past ten years. Because of its terribly poor and deteriorated condition, it barely made this inventory.

Architecturally, this building is significant. It is the only known example of contemporary French and German Modern influence upon the work of the Quayle Brothers, allowing for transition to the new "machine age aesthetic." The building is the earliest example of the transition to this style, which is especially significant given the "conservative, small-town" nature of industry during this time in San Diego.

The San Diego Historic Site Board found this building to be historically significant. The basis for historical significance is that the oldest cooperative marketing association in California, the Milk Producers Association, built this factory. The Qualitee Dairy Products Company occupied the building throughout the Depression years until its merge with the Carnation Company from Los Angeles in 1959. During this period, Qualitee Dairy was one of the top ten largest employers in San Diego and delivered milk to over 11,000 homes and over 450 wholesale companies. The building was designated by the San Diego Historic Site Board in 1990 as #335.

In 1924, Carl Winter and William Sick, hired noted San Diego architect, Eugene Hoffman, to design a new structure for their bakery, which had been in operation in San Diego since 1894, (as noted on the north and west building facades). The Southern California Baking Company remained at this address through 1952. From 1953 through 1988, the Continental Baking Company, the producers of Wonder Bread, has inhabited this edifice. The Wonder Bread Thrift Store was located in this building from 1965 through 1970.

**P3a. Description** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries):

the building; several large window areas have been covered over at the first floor. Seven garage doors face 14th Avenue, suggesting that this is an area where vehicles are stored, or perhaps loaded. The building is very similar to other structures designed by Eugene Hoffman during the era when he was the John D. Spreckles Company architect.

**B10. Significance:** (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

German-born architect, Eugene Hoffman came to San Diego in 1910 after earning a solid reputation as an architect in New York. He attracted the attention of many business leaders and developers in the San Diego community, including John D. Spreckels. Spreckels commissioned Hoffman to design a variety of buildings, ranging from industrial plants to commercial and office buildings. Later, during his partnership with George S. Walker (their office was located in the Spreckels Building), some of Hoffman's projects included designs and construction supervision for hotel remodeling and residences. For the remainder of his life, Hoffman continued to design residences, department stores and office buildings. He died in 1948, at the age of 78.

Although this building was designed by noted architect Eugene Hoffman, due to the substantial modifications that have occurred to the primary street facade and other facades, the historic fabric of this building has been compromised. It is, therefore, historically insignificant. Additionally, this building was considered by the Historical Site Board and rejected on September 28, 1994.
