SCIENCE, TECHNOLOGY, ENGINEERING, AND MATH IN CLAIREMONT KIDS' BACKYARD
Councilmember Cate to speak at Festival that Sparks a Love of STEM for School-Aged Youth

San Diego, CA: On Saturday, November 18th from 10:00 a.m. to 1:00 p.m., Madison High School will be filled with scientists, engineers, educators, and chief executives, all to provide Clairemont youth with the opportunity to interact with STEM-related professionals to learn more about this economically-thriving industry.

Science, Technology, Engineering, and Mathematics is known to many as "STEM." According to the Proceedings of the National Academy of Sciences, parents who expose their children to a STEM education at an early age have a 12 percentage point competitive advantage on the math and science portions of the American College Testing (ACT) college readiness assessment.

Biocom Institute's "STEM in Your Backyard" brings pocket-sized versions of the popular San Diego Festival of Science & Engineering to neighborhoods all over the county throughout the year. Students, families, and business leaders interact in a dynamic setting, including the chance to engage in quality discussions and in-depth learning.

"San Diego is an innovative city with some of the brightest minds making cutting-edge discoveries in science and engineering. STEM in Your Backyard engages students by giving them a hands-on experience in this evolving industry," stated Councilmember Chris Cate.

WHAT: STEM in Your Backyard – Clairemont

WHERE: Madison High School, 4833 Doliva Drive, San Diego, CA 92117

WHEN: Saturday, November 18, 2017 10:00 a.m. to 1:00 p.m.
