THE CITY OF SAN DIEGO

June 5, 2008

Jay M. Goldstone, Chief Operating Officer
City of San Diego
202 C Street
San Diego, CA 92101

Enclosed is our report regarding our audit of the permits granted for the Blackwater Worldwide facility located at 7685 Siempre Viva Road. Management's response to our audit report can be found as Attachment X. Internal Audit staff members that participated in the preparation of this report are Kyle Elser, Judy Zellers, and Tricia Mendenhall.

We would like to thank Development Services' and City Treasurers' staff, as well as Blackwater officials for their assistance and cooperation during this audit. All of their valuable time and efforts spent on providing us information is greatly appreciated.

Respectfully submitted,

A handwritten signature in black ink, reading "Eduardo Luna".

Eduardo Luna
Internal Auditor

cc: Honorable Mayor Jerry Sanders
Honorable City Councilmembers
Michael Aguirre, City Attorney
William Anderson, Deputy Chief Operating Officer, Land Use & Economic Development
Kelly Broughton, Development Services Director

INTRODUCTION

On May 5, 2008, Mayor Jerry Sanders directed the Chief Operating Officer to conduct an investigation into the permits issued to Blackwater USA for a facility in Otay Mesa. On May 6, 2008, the Chief Operating Officer requested the Internal Auditor to conduct an audit of the permits granted related to Blackwater's operations at 7685 Siempre Viva Road.

The audit objectives were to answer the following questions:

- Did Blackwater misrepresent its identity or intended use of the facility located at 7685 Siempre Viva Road, Otay Mesa Development District?
- Did Development Services' staff properly issue permits in compliance with codes and regulations for the Blackwater facility?
- Is the designation of Vocational / Trade School appropriate for the Otay Mesa site?

A detailed Audit Objectives, Scope and Methodology section is presented in Attachment I. A detailed timeline of events is presented in Attachment II.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

BACKGROUND

Blackwater Worldwide (Blackwater)

Blackwater, formerly Blackwater USA, is a security services corporation that provides a multitude of security-related services, such as law enforcement training to government entities. Blackwater has plans to operate a training center in the City of San Diego to train U.S. Navy personnel. Blackwater obtained a contract with the U.S. Navy to provide security training to Navy personnel, including the fundamentals of watch standing and the use of weapons. According to a Blackwater official, Blackwater has provided this type of training to approximately 2,500 Navy personnel in the San Diego area. A Blackwater official indicated that in the past, this training was provided at American Shooting Center, located at 5590 Ruffin Road, San Diego. However, according to the Blackwater official, a more realistic training site was needed to address the U.S. Navy training needs.

In August 2007, E&J Holdings, a sister entity to Blackwater, leased a 61,599 square foot warehouse located at 7685 Siempre Viva Road in the Otay Mesa Development District of San Diego (zip code 95154). Safchild Investments LLC owns the warehouse, which originally was completed in 2003 and occupied for a period by Hometex, Inc., a towel manufacturing company. The map that follows shows the location of the facility.

Location of 7685 Siempre Viva Road, San Diego, CA

Source: Google.

In order to provide security training at the warehouse, Blackwater needed to modify the facility, including adding interior walls, installing air conditioning and exhaust systems, installing an indoor firing range, and constructing a shipboard simulator. A Blackwater official stated that they planned to begin training at this site in June 2008.

Development Services Department

The Development Services Department (DSD) is a Division of City Planning and Development, reporting to the Chief Operating Officer of the City. DSD provides review, permit issuance, inspection, and code enforcement services for building and development projects throughout the City of San Diego.

In the City of San Diego, the Land Development Code establishes the City's planning, zoning, sub-division, and building regulations as documented in Chapters 11 to 15 of the Municipal Code. The City of San Diego has adopted several codes, among them the Uniform Building, Mechanical and Plumbing, and National Electrical codes. In addition, there are federal, state and local laws that govern construction, such as those covering energy conservation. Reviewing and issuing building permits is a complex process requiring multiple disciplines to review the Municipal Code, zoning use, and plans prior to permit approval and issuance. Contractors can begin work on projects once a permit for that work has been issued. Several permits may be required for one project. Once the contractor completes the work, the City inspects the project for compliance with the approved plans. In the prior three fiscal years, Development Services staff has issued approximately 29,400 permits.

Did Blackwater Misrepresent Their Identity or Intended Use of the Facility?

Allegations were made that Blackwater potentially used misleading names, such as Southwestern Law Enforcement to inappropriately disguise their identity or hide the intended use of the facility. We reviewed the building permit and business tax certificate applications that were filed for the Blackwater facility. Based on this review, we determined that Blackwater did not misrepresent their identity. Regarding the use of the facility, it was inconclusive if two of the applications submitted for the use of the facility were intentionally misrepresented or an oversight.

Identity Recorded on Permit Applications

In the City of San Diego, building permit applications do not require the name of the business owner. According to the DSD Director, building permit approval is not based on the applicant or owner name. Building permits are issued if the facility changes are permissible under the Municipal Code. The Municipal Code Section 112.0102 permits either an owner, an agent of the owner, or a party with a legal interest to be named on the permit application.

We found that building contractors submitted and signed all four applications for tenant improvements submitted for the subject property. Blackwater did not complete, sign, or file any of the building permit applications, nor were they required to do so. As shown on the next page, Noble Construction signed two of the applications; Rowen Electric completed one application, as did TSA Contracting.

Use Listed on Permit Applications

We found that Blackwater's contractor Noble Construction incorrectly listed the use of the facility on the permit application as "Warehouse with offices," and their contractor Rowen Electric incorrectly left the "use" question blank on a permit application. However, there were two other permit applications completed near the same time period that did indicate the use was for "Training." We could not determine if the incorrect or missing information on the applications for projects 138862 and 140766 was intentionally misrepresented or an oversight.

Building Permit Applications Associated With 7685 Siempre Viva Road

Project Number	Application Date	Property Owner/Lessee Tenant Name	Property Owner or Lessee / Tenant	Applicant	Project Description	Proposed Use
138862	9/5/07	Southwest Law Enforcement Training Enterprises	Lessee / Tenant	Noble Construction Consultants	44 feet of Partitions in existing office space	Warehouse with offices
140766	10/1/07	Blank	Blank	Noble Construction Consultants	Install air conditioning and exhaust	Training
140766	2/7/08	Safchild Investments LLC	Property Owner	Rowen Electric	Electrical tenant improvement	Blank
150059	2/7/08	Raven Development Group	Lessee / Tenant	TSA Contracting Inc.	Add indoor firing range	Training facility

Source: Development Services Department.

We should also note that the building plans associated with project number 138862 identified the project title as, “Southwest Law Enforcement Training Enterprises.” According to a Blackwater official, Blackwater was originally planning to use Southwest Law Enforcement as a sub-contractor to its predecessor American Shooting Center. According to the Blackwater official they were unable to come to terms with Southwest Law Enforcement Training Enterprises, so they decided to proceed with the project without them.

Recommendation:

1. DSD should ensure permits are not approved unless the permit application includes all required information (i.e. “Property Owner or Lessee Tenant” and “Proposed Use”). Applicants should not be allowed to leave sections of the application blank.

Business Tax Certificate

All businesses operating in the City of San Diego are required to obtain a business tax certificate. On their business tax certificate application, as shown on the following page, Blackwater indicated its primary business activity at the facility would be security training for the U.S. Navy,

specifically to conduct a course called, "Ship Reactionary Force Basic" (SRF-B).¹ The business tax certificate application was dated February 6, 2008. Based on this we determined that Blackwater did not misrepresent their identity. In our opinion, the business tax certificate application is direct evidence that Blackwater represented to the City their intent to operate a training facility at the address.

Did Development Services' Staff Properly Issue Permits for 7685 Siempre Viva Road?

Questions have been raised whether DSD properly issued permits for the Blackwater facility. We reviewed the Municipal Code, the City Attorney's opinion, and interviewed DSD staff, as well as Blackwater officials. Based on this review we determined that DSD staff had the authority under Municipal Code Section 111.0205 to classify Blackwater's use of the building as a vocational / trade school. Although the Municipal Code states that the subject matter taught at the vocational / trade school must be related to a use permitted within the Industrial Sub-district, the Municipal Code does not address whether the subject matter should be directly or indirectly related to the use.

Classification as Vocational / Trade School

DSD staff had the authority under the Municipal Code to classify Blackwater's use of the building as a vocational / trade school.

- Section 111.0205 states that the City, without a public hearing, is authorized to make a determination of the proper usage.²
- Section 131.0620(e) states that for any use that cannot be readily classified, the City Manager shall determine the appropriate use category and use subcategory upon request of the applicant or property owner.

In our opinion, based on this code language, DSD has the authority to classify the use of the facility as vocational / trade school. DSD classified the American Shooting Center, another shooting range located in the City, as a vocational / trade school. Vocational / trade school, a permitted use, may be approved or denied by staff in accordance with a process one review. Process one applies to construction permits including Building Permits, Electrical Permits,

² SDMC 111.0205 states the City Manager may designate a staff member to make an impartial decision, without a public hearing, on a permit, map or other matter in accordance with the decision making procedures of the Land Development Code.

Plumbing or Mechanical Permits, Demolition/Removal Permits, Grading Permits, Public Right-of-Way Permits, and Sign Permits.³

However, the Municipal Code states that instruction at the vocational / trade schools should be related to a use permitted in the Otay Mesa Development District (OMDD).⁴ We reviewed the following communications pertaining to how the use related to other industries in the industrial zone:

- The Development Service Director's memo dated April 24, 2008 (Attachment III)
- Email from Development Services Senior Planner dated May 12, 2008 (Attachment IV)
- The City Attorney's Memo dated May 16, 2008 (Attachment V)
- Blackwater's Letter to Mr. Luna dated May 16, 2008 (Attachment VI)
- Blackwater's Letter to Mayor Jerry Sanders dated May 19, 2008 (Attachment VII)

The Municipal Code states that instruction at the vocational / trade schools should be related to a use permitted in the Otay Mesa Development District (OMDD). However, the Municipal Code does not state if the subject taught should be directly or indirectly related to a permitted use. Further, the Municipal Code does not indicate how security training should be classified. A DSD official informed us that:

“The facility will be providing training for uses allowed in the zone. The project proposes security, law enforcement and/or military training. Security guard type uses would be classified as a business support use. Business support uses are permitted in the OMDD by SDMC 1517.0301(a)(7). There are many examples of security guards at other properties in Otay Mesa that have the same zoning designation. Law enforcement and military uses are classified within the government office use category. Government offices are permitted in the OMDD by SDMC 1517.0301(a)(1).”

³ SDMC 129.0102 and 129.0107.

⁴ SDMC 1517.0301 lists the uses permitted within the Industrial Sub-district.

On the other hand, the City Attorney indicated that “neither a shooting range nor law enforcement/security training operation clearly qualify or fall within any of the permitted uses of the IH-1-1 or IH-2-1 zones.”⁵

The complexity and lack of clarity for certain sections of the Municipal Code contribute to these differing interpretations. In our opinion, the City should develop a process for reviewing and approving projects that may be subject to interpretation or the Municipal Code may not clearly define the use. At a minimum, the process should include notifying the Chief Building Official of the project and requiring final sign-off. Further, the City should regulate the location of law enforcement or security training related facilities to facilitate future land-use decisions.

Recommendations:

2. The City’s Chief Building Official and City Attorney should review the additional information provided in the attachments of this report to determine the correct course of action regarding the permits issued for the facility located at 7685 Siempre Viva Road.
3. DSD should implement a process for reviewing and approving projects that may be subject to interpretation or the Municipal Code may not clearly define the use.
4. The City should add regulations for law enforcement and security training facilities in the Municipal Code.

Additional Issues that Came to Our Attention During the Course of Our Audit

During our audit, we also reviewed and identified issues related to firearms, the Hazardous Materials Questionnaire, DSD’s documentation retention, the Certificate of Occupancy, and a non-permitted structure.

Firearms

During our audit, we identified issues with the discharge of firearms at target or shooting ranges. We reviewed the Municipal Code for regulations pertaining to the firing of firearms within the City limits. Municipal Code section 53.10 states “It is the purpose and intent of the Council of

⁵ SDMC 131.0604 states that IH-1-1 and IH-2-1 zones are Industrial Heavy zones. These zones are differentiated based on the uses allowed: IH-1-1 allows primarily manufacturing uses; IH-2-1 allows manufacturing uses with some office. The Blackwater facility is located in zone IH-2-1.

the City of San Diego that firing of firearms and other explosives within the city limits be strictly regulated for the protection of all persons and property located in the City.” However, section (d) provides exceptions to this requirement. These exceptions include:

- Firearms fired under the authority of the United States or the State of California, and
- Shooting galleries or target ranges.

The City Attorney stated the shooting gallery exception listed above does not apply to the Blackwater facility because “this exception does not include vocational or trade schools.”

However, this section of the Municipal Code is not related to the Land Development Code, which establishes the zoning use and building regulations for permits issued by DSD. In the City of San Diego, shooting galleries are regulated by the San Diego Police Department (SDPD).⁶ The SDPD confirmed that a police permit was not required for Blackwater to operate as a firing range. It is the responsibility of Blackwater Officials to contact the SDPD (Permits and Licensing Unit) to ensure they are in compliance with all local police regulations.

Hazardous Materials Questionnaire

In addition to the permit application for the indoor firing range, a “Hazardous Materials Questionnaire” was also submitted. The permit applicant is to complete this questionnaire and the Fire Department staff reviews it during the Fire Plan check portion of DSD’s plan approval process. Per the completed questionnaire, the applicant stated that the business will not “use, process, store or dispense” any “explosive or blasting agents.”

The applicant signed the form on February 2, 2008, and a Fire Prevention Inspector completed the Fire Plan check on March 17, 2008. However, the Fire Plan check was only approved after the applicant was required to note on the plans the following: “The storage and use of small arms ammunition must be in accordance with the requirements of Chapter 33 of the 2007 California Fire Code.”

⁶ SDMC 33.1601.

This section of the 2007 California Fire Code provides exceptions for possession, storage and use of small arms ammunition when packaged in accordance with Department of Transportation packaging requirements. We reviewed the plans and verified that the note was included.

Additionally, the Fire Prevention Supervisor indicated that there were no areas of concern regarding the completed “Hazardous Materials Questionnaire” submitted for the indoor firing range. He stated that the storage of ammunition is not uncommon as long as it was in compliance with the California Fire Code, and cited examples of vendors in the City of San Diego who stock ammunition for sale.

We also noted that according to a Blackwater official, 100 percent lead-free ammunition will be used at the facility.

Other Concerns

DSD could not provide the following requested documentation during our review:

- Original Certificate of Occupancy issued when building was completed in 2003.
- Original approved plans for the indoor firing range. (Only the resubmitted plans are on file.)
- Permit application for the construction of the ship simulator.

During our review, DSD staff could not locate certain requested records. Specifically, we requested the original approved plans for the indoor firing range (project 150059) and the Certificate of Occupancy for 7685 Siempre Viva Road. DSD staff advised that they could not locate these records. This raised concerns regarding DSD’s internal controls over their records retention. We did not do any additional detailed testing to determine if controls over record retention are weak.

The Municipal Code states that no structure shall be used or occupied, and no change in the existing occupancy classification of a structure or portion of a structure shall be made until the

Building Official has issued a Certificate of Occupancy approving the use for occupancy⁷. DSD could not provide the original Certificate of Occupancy.

We should also note that a permit was not obtained for the construction of the ship simulator at the facility, even though it was shown on the plans as a future structure to be built. During a site visit of the facility, we took a photograph (Attachment VIII) of the structure and asked DSD if a permit was required to construct this structure. DSD Inspection Supervisor advised that a permit is required and they have notified the contractor.

Recommendations:

5. DSD should clarify whether a Certificate of Occupancy was issued for the building. If not, Development Services Code Enforcement should not allow any part of the building to be occupied until the certificate is issued.
6. DSD should notify Blackwater in writing that training may not be conducted in any areas for which City permits have not been issued.
7. DSD should determine the appropriate actions to be taken regarding the ship simulator structure that was built without an approved permit.
8. DSD should take additional steps to locate missing records and review controls over records retention to ensure they are adequate.

⁷ SDMC 129.0113 (a).

Audit Objectives, Scope, and Methodology

The scope and objectives of our audit were to determine if 1) Blackwater misrepresented its identity or intended use of the facility located at 7685 Siempre Viva Road, Otay Mesa Development District; 2) Development Services was in compliance with codes and regulations in issuing the permits for the Blackwater facility; and 3) the designation of vocational / trade school for the Otay Mesa site was appropriate.

The following audit procedures were used to achieve the audit objectives:

- Reviewed Development Services' on-line procedures available to the public for obtaining building permits.
- Reviewed the Municipal Code regulations related to firearms, permit issuance and project development for the Otay Mesa Development District, Industrial Sub-district.
- Contacted the San Diego Police Department to obtain information related to permit requirement for operating a firing range within the City of San Diego.
- Performed a site visit of the facility located at 7685 Siempre Viva Road.
- Interviewed Development Services, City Treasurer's and Blackwater Worldwide staff.
- Reviewed permit applications, project plans, print outs from Development Services' Project Tracking System, and Business Tax Certificate information related to the facility located at 7685 Siempre Viva Road.
- Met with City Attorney staff to discuss legal issues and they advised they are doing their own investigation and will be issuing a separate report.

We evaluated specific internal controls related to the audit objectives. Our review focused on the controls related to the issuance of specific permits for the facility located at 7685 Siempre Viva Road. We did not perform in depth testing of the overall effectiveness of the internal controls related to Development Services permitting process. Our conclusions on the effectiveness of the controls related to the particular permits that we reviewed are detailed in our audit report.

THE CITY OF SAN DIEGO
MAYOR JERRY SANDERS

M E M O R A N D U M

Date: April 24, 2008
To: Jay Goldstone, Chief Operating Officer
From: Kelly Broughton, Development Services Director
Subject: Building Improvements
7685 Siempre Viva Road

Per your request, I have prepared this summary of work proposed and the current status of the project located at the above address.

The project site has an existing industrial warehouse building built as part of Britannia Corporate Center. The current structure was permitted August 14, 2001 and was completed March 26, 2003. The property is zoned as Otay Mesa Development District – Industrial Subdistrict. This zone allows heavy industrial uses by right such as heavy manufacturing, light manufacturing, research & development, trucking & transportation terminals, as well as heavy commercial and other compatible uses. The uses permitted in this zone were approved by City Council on December 9, 1997 and made effective on January 1, 2000.

Construction permits that are either in process or recently completed for this property were applied for as tenant improvements/building permits and include the construction of partition walls, mechanical systems, electrical work, and a modular structure to be placed inside the existing industrial structure. These permits were applied for by agents for the lessee/tenant (Raven Development Group) between September 9, 2007 and February 7, 2008. The last permit was issued on March 19, 2008 and work is still being inspected.

Based on the plans submitted to date, there are a small number of rooms shown to be used for training purposes. In addition to the heavy industrial and commercial uses, vocational/trade schools are permitted in the Otay Mesa Development District Zone. Training for any vocation or trade including training for security work would, therefore, be allowed by right. Once final inspections are complete the rooms identified on the approved plans could be occupied for training purposes. The plans that have been

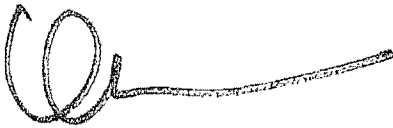

Page 2

Jay Goldstone, Chief Operating Officer

April 24, 2008

submitted to the department too date refer to the remaining portion of this industrial building as being used for warehouse purposes. If the project applicant wanted to use this remaining area for uses other than warehousing, such as training, they would need to submit another set of construction plans for our review. This is required because other uses could have different exiting, fire/life safety, parking impacts, etc. that would need to be reviewed by Development Services Department staff before these areas could be occupied.

We will continue to monitor this proposed project and insure compliance with all applicable Municipal and Building Codes.

Hello, I am following-up on your question concerning SDMC 1517.0301(a)(8). Only training for uses that are permitted in the zone are allowed. Even though SDMC 1517.0301(a)(1) states that all uses permitted in the IH-2-1 zone are allowed the restriction on training for only those uses allowed in the zone is still a requirement because SDMC 1517.0103 states that when there is a conflict between the Land Development Code (Chapters 11-14 of the SDMC) and the Otay Mesa Development District (OMDD) the OMDD applies. However, the facility will be providing training for uses allowed in the zone. The project proposes security, law enforcement and/or military training. Security guard type uses would be classified as a business support use. Business support uses are permitted in the OMDD by SDMC 1517.0301(a)(7). There are many examples of security guards at other properties in Otay Mesa that have the same zoning designation. Law enforcement and military uses are classified within the government office use category. Government offices are permitted in the OMDD by SDMC 1517.0301(a)(1). An example of a government law enforcement facility at a property that shares the same zoning designation is the Border Patrol facility located at 6651 Gateway Park Drive. The Border Patrol facility obtained a Site Development Permit to allow for an over-height fence, a Conditional Use Permit to allow for dog kennels, and grading and building permits from the City. As a part of the review for the many permits that were issued to the Border Patrol the City did determine that the Border Patrol use is allowed in the zone. Please let me know if there is anything else that you need. Thanks, Chris

5/28/2008

Office of
The City Attorney
City of San Diego

MEMORANDUM
MS 59

(619) 236-6220

DATE: May 16, 2008
TO: Honorable Mayor and Members of the City Council
FROM: City Attorney
SUBJECT: 7685 Siempre Viva Road, Blackwater Law Enforcement/Security Operations in Otay Mesa

INTRODUCTION

On or about May 5, 2008, Mayor Sanders requested an investigation concerning the issuance of permits by the City for the use and construction of a training facility operated at 7685 Siempre Viva Road, in Otay Mesa, by an entity commonly known as Blackwater. On May 1, 2008, the Honorable Congressman Bob Filner requested a similar investigation. In response to these requests, the City Attorney's office conducted a legal analysis of the process used to issue the permits and the mechanisms available to Blackwater for compliance with the law.

BACKGROUND

On or about September 5, 2007, an entity operating under the project name "Southwest Law Enforcement Training Enterprise," filed a general application with the City of San Diego's Development Services Department [DSD] to conduct "Tenant Improvements" at 7685 Siempre Viva Road located within the Otay Mesa Development District. The existing use identified on the application was warehouse with offices. The proposed use identified on the application was identified as "same (no change)." The purpose of the application was to construct 44 feet of new partitions in existing office space. Accompanying the application was a signed Hazardous Materials Questionnaire where the applicant disclosed that there were no uses of explosives or blasting agents or other health hazards associated with the activity.

On or about February 7, 2008, another general application was submitted to the City of San Diego's DSD to conduct electrical work at the 7685 Siempre Viva Road site for a project entitled

“South West Police.” The scope of the work included the installation of two new AC units and six exhaust fans.

On or about February 7, 2008, a separate General Application was also submitted to DSD for structural work for this same site. The project description on the application was to “[a]dd [an] indoor firing range.” The identified proposed use on the application was for a training facility. The existing use was identified on the application as warehouse use and the project title was now “Southwest Law Enforcement.” The Lessee or Tenant was identified on this application as “Raven Development Group” with an address in North Carolina. However, the September 5, 2007 application had identified the Lessee or Tenant as “Southwest Law Enforcement Training Enterprises” with an address in San Diego. The Hazardous Materials Questionnaire dated February 7, 2008 for the construction of the firing range did not identify any uses of explosives or blasting agents or other health hazards associated with this operation.

QUESTIONS PRESENTED

1. May the project applicant operate a law enforcement/security training facility within an Industrial Subdistrict of the Otay Mesa Development District with only ministerial processing and approvals?
2. What processes and approvals must be followed in order for the project applicant to operate a law enforcement/security training facility within an Industrial Subdistrict of the Otay Mesa Development District?

SHORT ANSWERS

1. No. The project applicant may not operate a law enforcement/security training facility within an Industrial Subdistrict of the Otay Mesa Development District with only ministerial processing and approvals.
2. The project applicant may operate such a facility within an Industrial Subdistrict of the Otay Mesa Development District after the City has complied with the requirements of the California Environmental Quality Act [CEQA] and after the City of San Diego’s Planning Commission through a Process Four Hearing has authorized such use, pursuant to Section 1517.0301(c)(2) of the San Diego Municipal Code [SDMC]. However, if the project applicant intends to use firearms as part of the training conducted at this same training facility, the project applicant should also obtain permission from the City Council pursuant to SDMC Section 53.10(e) and (f). Furthermore, to be consistent with the purpose and intent of SDMC Section 112.0103, the highest decisionmaking body should hear all discretionary actions together; therefore, both the underlying approval of the use of the site for a law enforcement/security training facility should be made by the City Council in conjunction with the decision to allow the use of firearms on-site.

ANALYSIS

The legal authority of the City of San Diego to regulate the use of land for training facilities and firearm use falls squarely within the City's police powers. Exercising this authority, the City of San Diego strictly limits how and when firearms may be used within the City. Specifically, Section 53.10(a) states, "It is the purpose and intent of the Council of the City of San Diego that the firing of firearms and other explosives within the city limits be strictly regulated for the protection of all persons and property located in the City." With the exception of shooting galleries or target ranges (note: this exception does not include vocational or trade schools) and government authorized use, no firing of firearms is allowed without City Council approval by resolution. *See* SDMC Section 53.10(d) and (e). Approval by City Council is a discretionary act and will trigger the need to comply with CEQA. In addition, as explained in more detail below, the underlying zone and use restrictions may also limit where shooting ranges may be allowed.

7685 Siempre Viva Road is located in the IH-2-1 zone of the Otay Mesa Industrial Subdistrict within the Otay Mesa Development District. As stated in SDMC Section 131.0604(a), the purpose of the IH (Industrial—Heavy) zone

is to provide space for land-intensive industrial activities emphasizing base-sector manufacturing. The IH zones are intended to promote efficient industrial land use with minimal development standards, while providing proper safeguards for adjoining properties and the community in general. It is the intent of these zones to limit the presence of nonindustrial uses in order to preserve land that is appropriate for large-scale industrial users.

The IH-1-1 zone allows primarily manufacturing uses and the IH-2-1 zone allows manufacturing uses with some office use. *See* SDMC Section 131.0604(b). Neither a shooting range nor a law enforcement/security training operation clearly qualify or fall within any of the permitted uses of the IH-1-1 or IH-2-1 zones. Table 131.06B of Section 131.0622, however, does permit vocational/trade schools in the IH-2-1 zone and SDMC Section 1517.0301(a)(1) cross-references Table 131.06B as applicable within the Otay Mesa Industrial Subdistrict. However, as of the date of this memo, no available information indicates clearly that the law enforcement/security training facility, as proposed by the applicant, would qualify as a vocational or trade school. In addition, SDMC Section 1517.0301(a)(8)(A) further restricts trade schools within the Otay Mesa Industrial Subdistrict to those "trade schools instructing in subjects related to a use permitted within the Industrial Subdistrict." However, SDMC Section 1517.0301(c)(1) and (2) states other uses not otherwise identified are permitted under the following circumstances:

(1) Accessory uses for any of the foregoing permitted uses including signs. As specified in Land Development Code Chapter 14, Article 2, Division 12 (Sign Regulations), for sign

regulatory purposes this Otay Mesa Development District shall be deemed to be an industrial zone.¹

(2) Any other uses which the Planning Commission finds, in accordance with Process Four, to be similar in character to the uses enumerated in the Otay Mesa Development District Ordinance and which are clearly within the intent and purpose of the Otay Mesa Development District. The adopted resolution embodying any such finding shall be filed in the office of the City Clerk.

Given the type of operation proposed, Planning Commission approval pursuant to Section 1517.0301(c)(2) is appropriate here.² Planning Commission review is a discretionary act and will trigger the requirements of CEQA.³

Since the use of firearms at the site will trigger City Council approval, it would be appropriate under these circumstances for the City Council to determine the whole of the action; namely, whether to authorize the use of 7685 Siempre Viva Road as a law enforcement/security training facility where firearms will be used. This would be consistent with SDMC Section 112.0103.⁴

With respect to the CEQA analysis, at a minimum, potential environmental impacts should be analyzed, including noise impacts, potential for discharges into the storm drain, accidental explosion or release of hazardous substances (e.g., lead discharge), fire hazards and impacts on fire protection services, other safety concerns due to the firing of guns and potential adverse effects due to traffic, such as traffic congestion. To the extent these impacts are determined to be significant, then they should be mitigated and the mitigation documented in a Mitigated Negative Declaration. Mitigation may include, but is not limited to, the following:

- The facility be constructed with impenetrable walls, adequate ventilation and lighting systems for a shooting range, and acoustical treatment for sound attenuation suitable for a firing range;

¹ The training facility does not fall into the category of "accessory use" as defined in Section 113.0103.

² SDMC Section 131.0110(a) gives some discretion to the City Manager to determine the appropriate use category; however, this discretion does not authorize arbitrary determinations. In fact, SDMC Section 131.0110(c) allows for an amendment to the Use Regulations Table where a use category or subcategory cannot be determined. Any amendment will require City Council approval. Planning Commission review under Section 1517.0301(c)(2) provides another means for determining appropriate use, in order to avoid the problem of having to fit a square peg into a round hole.

³ Even if this operation were only characterized as a shooting range and not a training facility, a shooting range is not a use authorized within this zone and would also trigger the need for Planning Commission review, regardless of the applicability of SDMC Section 53.10. See also SDMC Sections 131.0620(a), 131.0630(a) and 1517.0301(a).

⁴ SDMC Section 112.0103 states: "When an applicant applies for more than one permit, map, or other approval for a single development, the applications shall be consolidated for processing and shall be reviewed by a single decision maker. The decision maker shall act on the consolidated application at the highest level of authority for that development as set forth in Section 111.1015. The findings required for approval of each permit shall be considered individually, consistent with Section 126.0105."

- The facility be operated in a manner that minimizes the possibility of a release of hazardous waste and/or hazardous waste constituents (e.g., fine powders of range lead); The facility collect, manage, and dispose of all unreacted gun powders and residues properly as hazardous waste;
- The facility label each container of hazardous waste generated on-site; and,
- The facility complete a Hazardous Waste Manifest for all hazardous wastes generated on-site, and use a registered hazardous waste transporter to transport hazardous wastes off-site to an authorized facility.

CONCLUSION

Because construction permits and other approvals were issued before discretionary approval of the underlying use had been obtained, a stop work order should be issued. The applicant should be required to submit a new application for discretionary approval in order to use the site as a law enforcement/security training facility where firearms will be used.⁵ In addition, no Certificate of Occupancy under SDMC Section 129.0114 should be issued until all discretionary approvals have been obtained, including compliance with CEQA. If a Certificate of Occupancy has already been issued in error, then proceedings to suspend or revoke the Certificate should be initiated pursuant to SDMC Section 129.0118. This Office is open to considering additional information or facts as they become known; at such time, additional legal analysis may be appropriate.

MICHAEL J. AGUIRRE,
City Attorney

MJA:SRE:pev

⁵ SDMC Section 129.0108 states, "After all required approvals, including any required *development permits*, have been obtained and all required fees have been paid, the Building Official may issue a *construction permit*. Construction shall not begin until the required permits have been issued." Section 129.0105(a) further states, "If a proposed *development* requires one or more *development permits*, the required *development permits* must be issued before an application is submitted for a *construction permit* except as provided in Section 129.0105(c)."

16 May 2008

Mr. Eduardo Luna
Internal Auditor
City of San Diego
600 "B" Street, Suite 1440
San Diego, CA 92101

Dear Mr. Luna:

It was my pleasure to give you and members of your staff a tour of our Otay Mesa location on May 13. We welcomed the opportunity to show representatives of the San Diego city government our state-of-the-art facility, which will provide vitally important training to members of our armed services. Toward the end of our meeting, your staff asked several questions regarding the facility. The purpose of this letter is to provide answers to those questions.

One of your staff's primary inquiries was how our training facility fits within the Otay Mesa Development District ("OMDD"). The statute creating the OMDD reads:

The purpose of the [OMDD] Ordinance is to create and promote the development of the City's largest and potentially most significant industrial area. . . . It is intended that this District will provide for a full range of industrial uses . . . including . . . necessary support services. . . . It is also intended that the [OMDD] provide commercial use types necessary to support both the industrial area and the border crossing.¹

Thus, from its very outset, the ordinance establishing the OMDD establishes several themes that should guide its application. First, the ordinance makes clear that attracting thriving industry to Otay Mesa is a major municipal priority. Moreover, the ordinance states plainly that the OMDD should contain a complete range of uses, industrial and commercial, including "support services."

Our Otay Mesa facility meets these objectives. As you know, Blackwater Worldwide is a defense contractor. The defense industry "continues to drive San Diego's economy."² And the city has welcomed other defense contractors into the OMDD.³ We believe continuing to foster relationships between the city and the companies that support our armed forces is not only the right thing to do, but that it obeys the mandate of the OMDD ordinance to stimulate the location within the OMDD of flourishing and stable businesses and industries.

Moreover, the Blackwater Otay training facility can provide an important commercial use that will support other businesses in the area. Specifically, your staff inquired how Municipal Code section

¹ San Diego Municipal Code § 1517.0101 (Otay Mesa Development District "Purpose and Intent").

² Marty Graham, *San Diego's Defense Industry Adapts To The Pentagon's Changing Needs*, SAN DIEGO METROPOLITAN UPTOWN EXAMINER AND DAILY BUSINESS REPORT, March 2006.

³ For example, NGN Design & Manufacturing, located at "7560 Bristol Court, Suite A" (two building over from our facility). NGN manufactures realistic models of foreign military hardware. *See also* Mandy Jackson, *San Diego Industrial Market a Mix of Highs and Lows*, CALIFORNIA REAL ESTATE JOURNAL, Feb. 3, 2008 (noting that Otay Mesa has the highest vacancy rate in San Diego county, but that a trend is emerging of defense contractors putting to use vacant warehouse buildings).

Attachment VI

1517.0301(a)(8)(A) might apply to the facility. That section explicitly allows trade schools in the OMDD “instructing in subjects related to a use permitted within the Industrial Subdistrict.”

As a threshold matter, as your staff noted in our meeting, Section 1517.0301 as a whole is somewhat confusing and/or internally conflicted. An earlier subpart, section 1517.0301(a)(1), specifically authorizes “All uses permitted in the IH-2-1 zone.” Thus, based on section 1517.0301(a)(1), a vocational school is permissible in the OMDD as a matter of right, because vocational schools are permitted in the IH-2-1 zone.

But even if section 1517.0301(a)(8)(A) applied, it would still allow a vocational school in the OMDD. Section (8)(A) allows a trade school to operate that instructs in subjects *related* to a use *permitted* in the Industrial Subdistrict. The Industrial Subdistrict allows for a wide variety of uses, including: (1) scientific research and development activities; (2) manufacturing plants requiring advance technology and skills; (3) facilities engaged in the production of experimental products; (4) general industrial uses (defined as “Establishments engaged in the . . . manufacturing . . . testing [or] servicing . . . of a wide range of products”); (4) storage warehouses; and (5) facilities involved in the wholesale distribution of various goods (including machinery, equipment, and supplies).⁴ Thus, if the subjects taught at our vocational facility relate to *any* of these permissible uses, our facility is also permissible.

Our facility will instruct in a variety of subjects, all of which are related to permitted uses in the OMDD. For example, our facility will instruct on proper safety techniques for using the latest state-of-the-art personal weaponry. Because facilities engaged in researching and developing this weaponry are permitted in the OMDD, a vocational school instructing end users on how to properly employ these devices would also be permissible. Our facility will also instruct students on how to assemble and disassemble firearms. Because facilities engaged in the manufacturing of firearms and firearm components are permitted in the OMDD, a vocational school instructing individuals on how to assemble these items would also be permissible.

It should also be noted that a P.O.S.T.-certified police academy is located on the campus of Southwestern College, at 8100 Gigantic Street in Otay Mesa, less than a quarter mile from our facility.⁵ Thus, not only has the city presumably permitted, on private property, a vocational school similar to ours, but this use (police academy) would also provide another practical relationship between the subjects taught at our facility (safe police techniques) and thus, be the grounds for permitted use in the OMDD. Finally, as noted above, because other defense-contracting or aerospace firms would clearly be permissible in the OMDD, a vocational school providing training and support services for the defense industry would also be permissible in the OMDD, and, I submit, a desired, complementary use.

As the above analysis shows, our vocational facility is permitted as a matter of right. It is thus properly located in the OMDD, under *several*, independent grounds.

Another issue raised by your staff was the propriety of Southwest Law Enforcement Training Enterprises being involved in the initial permit requests. This is a non-issue for two reasons. First, Blackwater Worldwide has been completely forthcoming in its dealings with San Diego officials.

⁴ See San Diego Municipal Code §§ 1517.0301(a)(2)(A), (2)(B), (2)(D), (3), (6)(A), (6)(B), etc.

⁵ Southwestern College also apparently runs a nursing and fire vocational school.

Attachment VI

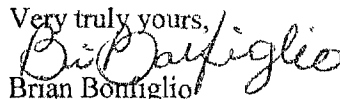

Every planner, every inspector, and every official has known they were dealing with Blackwater, because throughout the process, all individuals working on the project personally identified themselves to city staff as representing Blackwater. As a result, the city has been aware, for quite some time, that Blackwater wished to locate a facility in Otay Mesa. As a matter of fact, the business permit issued to Blackwater in connection with this project not only makes clear that Blackwater is the entity that will do business at the Otay Mesa facility, but it also lists my home address. There has been no deception here.

Secondly, as you know, it is permissible for a variety of entities to be involved in the permitting process for a project.⁶ Southwest Law Enforcement is a respected law-enforcement-training partnership, which was lawfully formed in the state of California and can legally do business in the state. During the early stages of this project, Blackwater Worldwide was considering partnering with Southwest Law Enforcement to take advantage of its expertise.⁷ Instead, we could not come to mutually agreeable contractual terms, and decided to proceed with the project without Southwest. This is no different from three or four developers or contractors being involved with the early stages of a project. As contractors come and go, so do business relationships. Neither affects the validity of the permits, which as you know, relate to a location, not an individual.

In sum, Blackwater has been completely forthcoming during this entire process, from the outset through the present time, even opening up our business to the city's internal auditors (whose jurisdiction is limited to examining the city's internal finances) – an extraordinary gesture under the circumstances.

The final concern raised by your auditors was whether we possessed a permit for the shipping containers on the property that will be used to simulate a navy ship. From our conversations with San Diego Development Services, it appears your auditors misunderstand the usage of the movable shipping containers and the applicable regulations. In any event, our contractor is working steadfastly with Development Services staff to confirm that their approvals of the use were valid and properly issued.

Again, I want to thank you and the Mayor for your interest in our facility. San Diego has traditionally been a city very supportive of our men and women in the armed forces, and as the Navy itself has noted, Blackwater provides indispensable, "highly specialized" training of our "Sailors and Marines [when] no active duty personnel possess[] the requisite experience."⁸ We thank you for the opportunity to enable us to provide this training, critical to national security, in the City of San Diego, while following all applicable local rules and regulations.

Very truly yours,

Brian Bonfiglio
Vice-President, Western Operations
Blackwater Worldwide

⁶ San Diego Municipal Code §§ 112.0102(a)(3); 113.0103.

⁷ Contrary to earlier erroneous reports, Southwest Law Enforcement is an independent entity with which Blackwater entered arm's-length commercial negotiations. There is no common management or ownership.

⁸ Letter from Rear Admiral M. Flanders to Ms. Barbara Simmons (Jul. 31, 2007).

May 19, 2008

Mayor Jerry Sanders
City Administration Building
11th Floor, 202 C Street
San Diego, CA 92101

Dear Mayor Sanders:

This past Friday, City Attorney Aguirre issued a memorandum to the Mayor and Members of the City Council. The memo, which indicates that it was prepared in response to your request for an investigation, purports to analyze certain legal issues relevant to the permitting of the training facility to be operated by our client, Blackwater Worldwide, in Otay Mesa. Based on that analysis, which proceeds on incorrect factual assumptions and reaches faulty legal conclusions, the memorandum recommends that action be taken to prevent the facility from operating.

Certain media reports discussing the City Attorney's memorandum also indicated that, in apparent reliance on the City Attorney's memorandum, the City may be considering imminent action with respect to the facility and its permits. To our understanding, your administration has been conducting its own review of the permitting process with respect to the Otay Mesa facility, with an initial report on the matter not due until May 23. As such, it may well be the case that the media reports of imminent action on your administration's behalf, be it in reliance on the City Attorney's memorandum or otherwise, are inaccurate.

To the extent your administration is considering such action, and particularly to the extent your administration is relying on the City Attorney's memorandum, we felt it important to apprise you and your administration of the correct facts and proper legal analysis. In doing so, we hope to prevent action taken in error that might irreparably harm Blackwater.¹

¹ Although the City Attorney did not contact Blackwater for information pertaining to its permits, the memorandum's concludes by stating that the "Office is open to considering additional information or facts as they become known; at such time, additional legal analysis may be appropriate." Given the City Attorney's apparent willingness to consider additional information, we are copying the City Attorney on this letter.

May 19, 2008

Page 2

For starters, the memorandum states that because Blackwater will train members of the U. S. Navy on the proper use of firearms at the facility, the San Diego Municipal Code (SDMC) requires a special approval by the city council. This is incorrect.

SDMC section 53.10 governs the discharge of firearms within the city. As the memorandum noted, section 53.10 generally prohibits the use of firearms and allows the city council to issue permits for the same under “conditions as it deems proper.” However, SDMC section 53.10(d) clearly permits the discharge of firearms, without discretionary council approval or CEQA review, if the firearms are discharged at a facility instructing on the proper use of firearms and allowing individuals to engage in target practice. Such facilities are called “target ranges.”² Section 53.10(d) reads: “**Exceptions: This section does not apply to . . . target ranges.**”

By exempting from special approval processes the places where San Diegans (and in this case, the men and women of the U.S. Navy) may practice gun safety and gun accuracy, the Municipal Code is consistent with the public policy of the State of California, which similarly exempts target ranges from even the strictest of gun laws. *See* Cal. Pen. Code § 12026.2(a)(9) (exempting people traveling to target ranges from California’s concealed weapon ban); Cal. Pen. Code § 12027(f) (exempting members of target ranges, whether public or private, from other concealed weapons restrictions); Cal. Pen. Code § 12031(b)(5) (exempting individuals at target ranges from being charged with felony for carrying a loaded weapon); Cal. Pen. Code § 12070(b)(9) (exempting target ranges that loan guns to individuals from California gun-transfer laws); Cal. Pen. Code § 12073(b)(7) (exempting target ranges from certain recordkeeping requirements); Cal. Pen. Code § 12280(k)(1)(C)(i) (exempting target ranges from California assault weapons ban); Cal. Pen. Code § 12285(c)(3) (exempting individuals at target ranges from certain assault weapon registration requirements); and Cal. Civ. Code § 3482.1 (exempting compliant shooting ranges from nuisance liability).

Taken together, these provisions, along with SDMC section 53.10(d), make very clear that it is the policy of the State of California and the City of San Diego to exempt target ranges from even the most onerous of gun restrictions, to encourage learning about the safe operation of firearms. Consequently, it is inaccurate to claim that the target range component of Blackwater’s training facility will require council approval or CEQA review.

The memorandum also states that a law enforcement or security training operation does not “clearly qualify” as a permitted use in Otay Mesa.³ This again is incorrect, as vocational facilities are permitted in Otay Mesa, as a matter of right, under two distinct provisions of the Municipal Code. SDMC section 1517.0301(a)(1) specifically authorizes “All uses permitted in

² While the SDMC does not define “target range,” the dictionary defines “target range” as “a practice range for target practice,” a synonym for “firing range.” *See* <http://wordnet.princeton.edu/perl/webwn?s=target%20range> (last accessed May 18, 2008).

³ City Attorney Memorandum, page 3.

May 19, 2008

Page 3

the IH-2-1 zone.” It further exempts facilities permitted in the IH-2-1 zone from obtaining any special permits, including an Otay Mesa Development Permit. Vocational schools are permitted in the IH-2-1 zone, under SDMC section 131.0622, Table 131-06B. Thus, because Blackwater’s facility, a vocational school, would be permitted in the IH-2-1 zone as a matter of right, it is similarly permissible, as a matter of right, in Otay Mesa.

SDMC section 1517.0301(a)(8)(A) provides additional authority that a vocational school is permissible in Otay Mesa. That section allows a trade school to operate that instructs in subjects *related* to a use *permitted* in the Industrial Subdistrict. The Industrial Subdistrict allows for a wide variety of uses, including: (1) scientific research and development activities; (2) manufacturing plants requiring advance technology and skills; (3) facilities engaged in the production of experimental products; (4) general industrial uses (defined as “Establishments engaged in the . . . manufacturing . . . testing [or] servicing . . . of a wide range of products”); (4) storage warehouses; and (5) facilities involved in the wholesale distribution of various goods (including machinery, equipment, and supplies). *See* San Diego Municipal Code §§ 1517.0301(a)(2)(A), (2)(B), (2)(D), (3), (6)(A), (6)(B), *et seq.* Thus, if the subjects taught at Blackwater’s vocational facility relate to *any* of these permissible uses, it is also permissible.

Blackwater’s facility will instruct in a variety of subjects, all of which are related to permitted uses in the Otay Mesa Industrial Subdistrict. For example, Blackwater’s facility will instruct on proper safety techniques for using the latest state-of-the-art personal weaponry. Because facilities engaged in researching and developing this weaponry are permitted in the subdistrict, a vocational school instructing end users on how to properly employ these devices would also be permissible. Blackwater’s facility will also instruct students on how to assemble and disassemble firearms. Because facilities engaged in the manufacturing of firearms and firearm components are permitted in the subdistrict, a vocational school instructing individuals on how to assemble these items would also be permissible.

One final issue on this subject is worth discussing. The memorandum questions whether the Blackwater facility is indeed a “vocational school.”⁴ Yet, on page two, the memorandum recognizes that the facility will be a “law enforcement/security training facility.” The facility will clearly be a “vocational school,” as that term is commonly understood. While the San Diego Municipal Code does not define “vocational school,” the dictionary defines it as “a school offering instruction in one or more skilled or semiskilled trades or occupations”⁵ There should be no doubt that a facility offering specialized training to the men and women of the U.S. Navy

⁴ *Id.*

⁵ *See* <http://dictionary.reference.com/browse/vocational%20school> (last accessed May 18, 2008).

May 19, 2008

Page 4

would qualify as a vocational school. To state otherwise is to demean the occupational choice of the men and women who chose serving our country in the military as their occupation.⁶

In sum, the Blackwater facility is clearly a vocational school. Vocational schools are permitted in Otay Mesa – as a matter of right with no need for discretionary or CEQA review – under two separate provisions of the Municipal Code. In fact, a P.O.S.T.-certified⁷ police academy is located on the campus of Southwestern College, at 8100 Gigantic Street in Otay Mesa, less than a quarter mile from Blackwater’s facility. There can be no doubt that the Blackwater facility is properly located within Otay Mesa, and that the city’s ministerial review process correctly resulted in the issuance of permits for the facility.⁸

Blackwater Worldwide is keenly aware that this is an election year, but asks that politics stay out of the permitting process. Blackwater has been completely forthcoming with every city inspector and every city official. Just three weeks ago, on April 29, we met with the Chief Building Official, Afsaneh Ahmadi, at the Development Services headquarters. At that meeting, Ms. Ahmadi closely reviewed all of Blackwater’s plans and permit applications, and the next day, approved all permits. On May 12, Blackwater opened the facility to the city’s Internal Auditor, an extraordinary step considering municipal finances have not been (and to our knowledge are not) an issue here.

Throughout the permitting process, Blackwater has collaborated with city officials to make sure it proceeded lawfully and openly. As a result, we know Blackwater’s permits are proper, and we trust that with this letter, we have cleared up the factual or legal misconceptions concerning the facility contained in the City Attorney’s memorandum. We also trust that no actions will be taken by your office or administration based on the City Attorney’s memorandum.⁹

⁶ As the memorandum also noted, the facility also has the capability to instruct members of law enforcement and those wanting a career in security. This should also remove any doubt that the facility is a vocational school, as surely law enforcement is a vocation; law-enforcement techniques are not typically taught at conventional universities.

⁷ P.O.S.T. stands for Peace Officer Standards and Training. P.O.S.T. certification means a facility follows the standards and training courses outlined by the state of California for the training of peace officers.

⁸ There also appears to be a misconception in the memorandum that a facility must be *either* a “target range” *or* a “vocational school.” But those terms address different concepts in the statutory scheme. A “vocational facility” is a zoning “use.” *See, e.g.*, SDMC section 131.0622. Other such permitted uses, for example, include universities or sports arenas, and others listed in the zoning ordinance. *See, e.g.*, SDMC §§ 131.0112(a), 131.0622. A “target range” on the other hand, is not a “use” and the code does not define it as such. Indeed, a “target range” is a component or feature of other uses, because a “target range” can be on the campus of a university, within a sports club, or part of the instruction taught at a vocational facility. Thus, a “vocational facility” can feature a “target range.”

⁹ We also note, at a minimum, before any action is taken on any of its permits, Blackwater would need to be provided formal notice of whatever “problems” allegedly were found, and an opportunity to be challenge those

(cont’d)

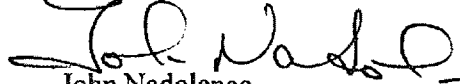

May 19, 2008

Page 5

As the Navy itself has noted, Blackwater provides indispensable, "highly specialized" training of our "Sailors and Marines [when] no active duty personnel possess[] the requisite experience."¹⁰ San Diego has a proud history of being a city very supportive of our men and women in the U.S. Navy, and there is no good reason for San Diego to deprive them of training at this critical time. Blackwater Worldwide knows it will make the community proud by offering this training, vital to national security, in the City of San Diego.

We would be happy to provide the city additional information as necessary. Please do not hesitate to contact me with any questions.

Very truly yours,

John Nadolenco

THE CITY OF SAN DIEGO

June 3, 2008

Mr. Eduardo Luna, Internal Auditor
Office of the Auditor and Comptroller
600 B Street, Suite 1440
San Diego, CA 92101

Dear Mr. Luna,

Subject: Audit of Permits Issued for the Blackwater Facility

In response to your review of the above noted matter, the Development Services Department has the following responses:

Recommendation No. 1 – DSD should ensure permits are not approved unless the permit application includes all required information (i.e. “Property Owner or Lessee Tenant” and “Proposed Use”). Applicants should not be allowed to leave sections of the application blank.

Response: The Department agrees with this recommendation and will reinforce this with employees that accept permit applications.

Recommendation No. 2 – The City’s Chief Building Official and City Attorney should review the additional information provided in the attachment of this report to determine the correct course of action regarding the permits issued for the facility located at 7685 SiempreViva Road.

Response: The Department agrees with this recommendation.

Recommendation No. 3 – DSD should implement a process for reviewing and approving projects that may be subject to interpretation or the Municipal Code may not clearly define the use.

Response: The Department has several formal processes for employees to use to evaluate interpretations of the code. They can work directly with their supervisors. They can take interpretations before their senior line supervisor meetings. Staff can also bring items before the Department’s Policy Team (Management Team and key technical staff). Where the code is not clear, they can bring proposed code amendments to the Department’s Code Update team. Each of these options provide staff with ways to validate their decisions and, where necessary, their interpretations. The Department will reinforce these formal processes with staff.

Recommendation No. 4 – The City should add regulations for law enforcement and security training facilities in the Municipal Code.

Response: The Department will bring this recommendation to the Code Update team and to the outside advisory group, the Code Monitoring Team (created by the Land Use and Housing Committee) for their consideration.

Recommendation No. 5 – DSD should clarify whether a Certificate of Occupancy was issued for the building. If not, Development Services Code Enforcement should not allow any of the building to be occupied until the certificate is issued.

Response: The Department agrees with this recommendation.

Recommendation No. 6 – DSD should notify Blackwater in writing that training may not be conducted in any areas for which City permits have not been issued.

Response: The Department has already notified Blackwater. See Attached.

Recommendation No. 7 – DSD should determine the appropriate actions to be taken regarding the ship simulator structure that was built without and approved permit.

Response: The ship simulator structure was shown on one set of plans that the Department reviewed but it was identified as a future facility. No permits had been obtained. Upon the Department's learning of the existence of the structure, Blackwater was immediately notified of the requirement to obtain permits for the structure prior to using it. Blackwater has submitted an application for a permit and staff is reviewing their application.

Recommendation No. 8 – DSD should take additional steps to locate missing records and review controls over records retention to ensure they are adequate.

Response: The Department's record management and control is being reviewed through the Mayor's Business Process Reengineering program. The Department is also coordinating record management and controls with the City Clerks Business Process Reengineering efforts since both departments have overlapping responsibilities.

Thank you for the opportunity to respond to your audit's recommendations.

Sincerely,

Kelly Broughton, Director,
Development Services Department

THE CITY OF SAN DIEGO

May 19, 2008

Mr. Brian Bonfiglio
Vice President
Blackwater Worldwide
PO Box 710897
San Diego, CA 92171-0897

Subject: 7685 Siempre Viva Road, Raven Development Group

Dear Mr. Bonfiglio,

The City will not issue a certificate of occupancy for the above referenced project pursuant to Section 129.0114 of the San Diego Municipal Code (SDMC). The portions of the building identified for use as a shooting range and vocational/trade school shall not be occupied until a certificate of occupancy has been issued for this change of use or occupancy pursuant to SDMC Section 129.0113.

As outlined in the attached opinion from the City Attorney's office, no certificate of occupancy will be issued until the appropriate discretionary processes associated with the use of firearms in city limits and determination of use for the vocational/trade school by the Planning Commission has been completed. Since Planning Commission and City's Council's actions will be considered discretionary, these actions are subject to review under the California Environmental Quality Act (CEQA).

As the majority of the structure is still identified for warehouse uses, no other uses are permitted until a submission for a request of change in occupancy has been made and approved by the Development Services Department.

Sincerely,

Kelly Broughton, Director
Development Services Department

Cc: Jay Goldstone, Chief Operating Officer
Michael J. Aguirre, City Attorney
William Anderson, Executive Director of City Planning and Development
Afsaneh Ahmadi, Chief Building Official
