7. Plaza de las Americas

Design Objective:

Restore the southern portion of the 1935 Plaza area of the Palisades to its original use as a pedestrian plaza. This plaza should function as a pleasant southern destination point for the Central Mesa and offer amenities that will serve the needs of a variety of user groups from nighttime playgoers to museum patrons who might spend half a day in the immediate area. It should provide pooling space for the Starlight Bowl areas for outdoor display, circulation space, food service, visitor information, public restrooms, a variety of seating, and visual interest features that will invite the Park visitor to pause, relax, and enjoy spending time outdoors.

Morley Field Restroom

- Existing restrooms to be demolished.
- New fully accessible gender-neutral restroom facilities.
- New design will come to Committee as a future workshop item.
