INTRODUCTION
INTRODUCTION

The signing and information element of the Balboa Park Master Plan recommends the development of a comprehensive sign manual to uniformly regulate all park signs.

Previous sign programs failed to regulate individual park tenants who undertook their own signing without regard to a unifying standard. The lack of park-wide signing authority resulted in the current collection and proliferation of unrelated signs in Balboa Park.

If a park sign program is to succeed, then all park institutions, concessionaires, special interests and special events must conform to a unified signing program with no exceptions.

Citizens, park committees, park institutions and city staff agree that the image of Balboa Park is incomplete, inconsistent and not equal to the Park’s potential. Therefore, the purpose of this manual is to correct the undesirable conditions by introducing an image and signing guidelines for Balboa Park that is enforceable in Balboa Park.
SIGN GUIDELINES

Balboa Park is composed of the historical Central Mesa with almost all of the buildings representing the 1915 and 1935 Exposition style, and two other mesas that have evolved to the present with no particular architecturally dominant style. The sign program in the park must be flexible enough physically and visually to adapt to all three mesas of Balboa Park.

The premises for the sign program in Balboa Park is based on signs used in the park for the 1915 Exposition. As shown in the photo next page, the new sign program will take the basic concepts and adapt them to present and future needs and constraints.

Replacement, reconstruction and new construction of signs shall strictly adhere to standards set herein. Standards include sign size and shape, letter weight and styles, logo use, content and length of message, pole standard style, attachment method, materials, color and sign locations.

All traffic signs within park land (i.e. parking, handicapped, stop) shall be regulated by city sign regulations. This manual covers sign position on pole and pole standard selection. (FIGURE 13)

All specific institution, concessionaire or special interest signs, shall be limited to pedestrian orientation signs (specific area map), pedestrian directional signs, and location building ID signs.

All automobile signs shall be limited to generic destinations. No specific institution signs shall be allowed. The San Diego Zoo is the only exception to this rule due to the area it occupies. The word “Zoo” is all that shall be labeled. All automobile directional signs shall be restricted to areas where public vehicles are allowed.

All listings on directional signs will be hierarchy of locations starting with the straight ahead arrow, to the right arrow and to the left arrow. At the top will be the Balboa logo, underneath where the message area is will include walking time and at the bottom will be the district name and color. Directions to restrooms should appear on all pedestrian directionals when within 500 feet of a public restroom. Quantity of listings determined by length of listing and size of sign.

Message, type sized and quantities for permanent signs are limited.
The Park and Recreation Board, through chosen subcommittees (currently the Balboa Park Committee) shall be responsible to certify compliance with the Sign Manual. Signs on city streets in Balboa Park shall be considered as park signs for the purposes of this manual. Park Boards and City Council should be the final authorities on implementation of these guidelines.

Signs proposed for the historical landmark area shall be certified by the Park and Recreation Board and the Historical Resources Board as to compatibility of intent with applicable laws governing the site. *(FIGURES 2 & 20)*

Tenants’ and concessionaires’ signs (includes advertising) which are visible from the street rights-of-way, park roads, park parking lots and open park land shall be subject to this Manual and approval requirements.

Banners shall be certified by the Park Boards in all cases and by the Historical Resources Board when within the historic Landmark District. There will be a time limit on the life of all temporary signs. Park Boards should be the final authorities on implementation of these guidelines.

No existing park and tenant signs, permanent or temporary, shall be granted “grandfather” status, and all are subject to ultimate conformance with this Manual.

Existing 3” diameter pole standards found throughout the park may be retrofitted to current standards by straightening the pole, installing the park base and cap, then painting the standard, sign back and brackets the required park color. *(MP20189 Corinthian Bronze Metallic)*

The 2” square tube standard also found throughout the park is not acceptable under any circumstances. These tubes must be replaced with the 3” diameter pole.

**Buildings with Existing Wall-Mount Letters**

Buildings with wall-mount letters may continue to have individual letters on the same wall provided the type style is Christiana using a capital and lower case configuration and the capital height does not exceed the existing capital height on the building with a maximum of 18 inches. Letters must be flush-mount and pinned. A good example of this is the San Diego Automotive Museum letters.
IMPLEMENTATION

Balboa Park is at once a local, regional and pan-regional resource of extraordinary value to the people of San Diego. It is, in fact, a major facet of the image of San Diego. Though these facets legitimize a special sign program, and such program must compete with sorely needed improvements and maintenance for funding. Staged implementation, therefore, is a necessity.

Approximate costs by area are shown in FIGURE 57 for area map.
The thrust of a comprehensive signing program for Balboa Park is to establish a unified and cohesive “look” to all 1,000 acres. The visually fragmented appearance of the signs and the real lack of park identity from one specific area to another has created the need for a park logo.

Balboa Park is an iconic park of San Diego’s fabric that brings life to the destination. It is a vital, living entity that is both rich in history and transformative by nature. Because the park is ever changing, it is full of unexpected surprises and is never the same experience twice. The logo pays homage to the park’s heritage, beauty and abundance through the iconic California Tower. From land or sky, nothing is more recognizable and breathtaking as the California Tower at Balboa Park. For Balboa Park, it’s a symbolic beacon of elegance and classic beauty.

The Balboa Park logo is made up of two components: the Balboa Park symbol and the logotype. These two components are always placed in a fixed relationship and should never be altered or modified in any way. (FIGURE 1 & 2)

The logo, applied to the signage program, will establish the boundaries and interior spaces as Balboa Park land. It will always be white on a dark bronze field.

The Park logo will also be used on all printed matter provided by institutions, committees and special interest groups to further establish the unifying goal of the sign program.

The guidelines of how to and how not to use the Balboa Park logo on signage will be established by this Manual. (FIGURE 6) Please reference brand guidelines for required uses on letterheads, mailers, flyers, brochures, tickets, books, and new releases by tenants and Balboa Park officials alike. Leases shall include a performance clause as a mandate to leases to implement this plan.

The logo will be on all directional and orientation signs and some building and location signs. (FIGURES 15-35)

Graphic lines, known as rules on all signs, will be 1/8” thick. Length depends on sign layout.

Generic banners should be embellished with the Park logo to further establish the unifying mark. (FIGURE 25)

**Arrow Legend:** ST = Straight  LT = Left  RT = Right
Balboa Park sign system consists of two basic shapes.

**The Classic Arch**

60° oval shape on top of a rectangle with radius lower corners. Approved size variations of this basic shape are possible.

**The Oval**

30 oval in 3 basic sizes. (FIGURE 16) Approved size variations of this basic shape are possible. Traffic sign shapes will be the approved city regulation shapes.
SIGN FORMAT COLORS

The Color
All signs for Balboa Park shall have a background color of Matthews Paint MP20189 Corinthian Bronze Metallic, with changing district colors at the base of the select sign types. No other background will be approved. Exceptions are required color for city regulation traffic signs. In most instances the color for all type and graphics will be white Avery Dennison 900 Supercast Opaque Film SC 900-101-0. Exceptions are for maps and the historical landmark logo. In additional all walking times shall be displayed in Avery Dennison 900 Supercast Opaque Film Sandstone SC 900-965-0.

PAINTS
All paints to have Satin Finish unless otherwise specified. All painted surfaces are to be on aluminum.

1. Matthews MP20189 Corinthian Bronze Metallic
2. Matthews MP16211 Gondal Olive
3. Matthews MP11228 Great Falls
4. Matthews MP12385 Clay Beige
5. Matthews MP01126 Davies Crest Reda
6. Matthews MP03697 Indiglo
7. Matthews MP14722 Purple Gallinule
8. Matthews MP02643 Amulet Blue
9. Matthews MP03395 Talavera Tile
10. Matthews MP12994 Malua Mauve
11. Matthews MP02795 Spice Trader
12. Matthews MP12718 Unicor Brown
13. Matthews MP32156 Black Magic
14. Matthews MP20158 Statuary Bronze Metallic
15. Frazee Custom Color CZ-12-2935
16. Avery Dennison SC 900-965-0 Sandstone

VINYL
All materials to be provided as 8” x 8” sample or as part of a mock-up for approval.

1. Avery Dennison SC 900-101-0 White
2. Avery Dennison SC 900-965-0 Sandstone

MATERIALS
All materials to be provided as 8” x 8” sample or as part of a mock-up for approval.

1. Avery Dennison SC 900-101-0 White

NOTES

1. Avery Dennison SC 900-101-0 White vinyl lettering applied to painted aluminum panel with clear coat finish

2. #5052 min. aluminum alloy grade painted aluminum with clear coat finish

3. Color determined by district
   Please reference figure 8 and 9

4. iZone or custom high pressured laminate (CHPL)

5. Avery Dennison SC 900-965-0 Sandstone vinyl lettering applied to painted aluminum panel with clear coat finish

6. 1' high precast concrete with ornate detailing
SIGN FABRICATION SPECIFICATIONS

All single-sided, aluminum sign to be 1/16" min. #5052 min. aluminum alloy grade.

All double-sided aluminum can signs to be 3/16" min. #5052 min. aluminum alloy grade.

Single-sided sign blanks to have smooth edges and surfaces. Paint all surfaces with three (3) color coats of polyurethane, gloss finish.

Aluminum can signs to be tack welded and filled with bondo. All surfaces to be sanded smooth free of voids, warping or canning. Then sprayed with three coats: 1 coat of filler primer, sand, 1 color coat of sealer primer, sand and 1 color coat of polyurethane, gloss finish.

The sign and pole primer is Calspar Val-Chem Epoxy Primer (13-F-62). The color coating is Valspar V Thane Hi Solids Urethane Enamel (54 series), color to match MP20189 Corinthian Bronze Metallic.

All graphics to be premium grade computer cut white vinyl.

Use only stainless steel fasteners on signs and supports.

Casted brackets and caps must follow general design requirements set forward in FIGURES 42 & 43. Fabricator must supply shop drawings and specifications for approval. Casted items must be painted with three (3) coats of polyurethane.

The casted brackets, sign pipes and connections must be engineered for sheer stress and vertical weight prior to fabrication and installation. (FIGURE 42) The signs must meet current sign codes for the City of San Diego.

Historical Landmarks

The intent of the Historical Landmarks sign is to identify buildings and sites that are a result of the 1915 & 1935 Expositions held in the park.

The sign can be wall-mount or pole-mount. The park logo will be incorporated into a diamond shape background with the identification of the 1915 Expo or the 1935 Expo. (FIGURE 26)

There will be one color for the logos on the dark bronze background:
White (SC 900-101-0)

Banners

Banners located in the Historical Landmark Area should follow as closely as possibly to the banners and standards used in the 1935 Exposition. (FIGURE 25A) Banners outside of the Historical Landmark Area may follow banner standards exhibited in FIGURE 25.
POLE STANDARDS

The areas designated as a historical landmark will incorporate pole standards reflecting the pole design used in the park during the exposition periods. The signs however will remain true to the park sign guidelines.

The Prado

The pole standards for the Prado shall be compatible with the historical architecture of the 1915 Exposition. The style is Capistrano, manufactured by Western Lighting Standards, a subsidiary of Spring City Lighting or approved equal. The pole standard color for the Prado is a bronze green, Frazee #6125N based on writings of Carlton Monroe Winslow - Architecture & Gardens- San Diego Exposition 1915. For sign attachment possibilities see FIGURE 43.

Poles will be 3” and 5” diameter aluminum tubing. Pole wall thickness to be 1/8” min. for the 3” pole, and 3/16” min. for the 5” pole. Pole bracket and footing to be engineered by fabricator. Depending on pole height and loading, anchor bolts may change. Poles to be painted with three (3) color coats of polyurethane.

Sign Pole Color Prado

The sign standards in the Prado area of the park, which include the Capistrano pole, base, brackets, horizontal pipe & the cap will be Frazee Custom Color CZ-12-2935.

Overall

Bases are the Mariner and Mini-Mariner manufactured by Western Lighting Standards, a subsidiary of Spring City Lighting or approved equal. Bases to be anchored to pole/ base footing as per manufacturer’s specifications. Bases to be painted with three (3) color coats of polyurethane.

Fabricator is responsible for isolating dissimilar materials to prevent electrolysis.

Sign Pole Color Overall

The color for the sign standards, which include the Mariner and Mini-Mariner pole, base, brackets, horizontal pipe & the cap will be Matthews Paint MP201189 Corinthian Bronze Metallic.
SECTION 2

THE BRAND
The following diagrams illustrate the approved logo variations for the signage throughout the park. The white Balboa Park logo without the tag line will be used on most signage throughout the park. The white historical Balboa Park logo will be used on the signs in the historical area of the park.
FIGURE 3
LOGO REGULATIONS

The following diagrams illustrate the approved and disapproved logo variations for the signage throughout the park. The white Balboa Park logo without the tag line will be used on most signage throughout the park. The white historical Balboa Park logo will be used on the signs in the historical area of the park. The colored Balboa Park logo and white Balboa Park logo with the tag line may not be used on any signage.

APPROVED VARIATIONS

- White logo on dark bronze
- White logo on white for historical signage

DISAPPROVED VARIATIONS

- Colored logo on dark bronze
- White logo with tag-line on dark bronze
Christiana

Christiana was designed for Berthold in 1991 by Gudrun Zapf-von Hesse. It's varied stroke weights and angled endings give this typeface an elegant, hand-lettered impression. It is similar in form and inspiration as Optima, but is a bit more humanistic and is easier to read on signage due to its many weights and strokes.

Christiana Regular

All subheadings on location / building signs, Pedestrian Orientation Signs, and Parking Lot Signs. Collateral and printed material body copy.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
a b c d e f g h i j k l m n o p q r s t u v w x y z
0 1 2 3 4 5 6 7 8 9

Christiana Italic

To be used for walking times on select sign types as a subhead to the destination on Directional Signs, Pedestrian Orientation Signs, Pedestrian Directory/Directional signs, and Pedestrian Flag Signage.

The following identifies the primary pedestrian districts within the Central Mesa. Because this is where the majority of users will interface within the park it is important to identify sub-districts or areas within the various districts.

1. Scout Camp Area
2. Sixth Avenue Area
   recommend naming West Mesa
3. San Diego Zoo
4. War Memorial Area
5. Florida Canyon
6. Morley Field
7. Municipal Golf Courses
8. Golden Hill Area
9. Inspiration Point
10. The Prado
11. The Palisades
The following illustrates the different areas or potential sub districts within the overall district of The Prado. The intent is to maintain the district color at the bottom and reverse side of the sign, while changing the messaging at the base of the sign panel that identifies the district.

A : Plaza de California
B : Old Globe
C : West Prado
D : Alcazar Gardens
E : Palm Canyon
F : Plaza De Panama
G : Spreckels Organ Pavilion
H : Botanical Gardens
I : East Prado
J : Moreton Bay Fig Lawn
K : Spanish Village
L : Desert Garden
M : Rose Garden
N : Plaza De Balboa
O : Pepper Grove
The following illustrates the different areas or potential sub districts within the overall district of The Prado. The intent is to maintain the district color at the bottom and reverse side of the sign, while changing the messaging at the base of the sign panel that identifies the district.
FIGURE 13
THE PALISADES

The following illustrates the different areas or potential sub districts within the overall district of The Palisades Area. The intent is to maintain the district color at the bottom and reverse side of the sign, while changing the messaging at the base of the sign panel that identifies the district.

A: International Cottages
B: Pan American Plaza
C: Federal Parking Lot

recommend naming

Presidents Way Parking Lot
The following illustrates the mapping strategy for each highlighted district throughout the park. Panel will include area identification, location description, a macro map graphic, a micro map graphic and a legend. (This mapping strategy is used with the Pedestrian Orientation sign type) Final map to be developed by others.

**AREA IDENTIFICATION**
Defines where the directory is located, a specific color for each district.

**LOCATION DESCRIPTION**
The following gives a brief history and description of the location in which the sign is located. Providing both an educational component for the guest as well as beneficial information about the park.

**MACRO MAP GRAPHIC**
A small version of the entire project.

**MICRO MAP GRAPHIC**
Shows the zoomed in area of where the directory is located and closely surrounding areas.

**LEGEND**
To help orient and understand the map with bold icons and graphics.
SECTION 3

SIGNAGE SPECIFICATIONS
FIGURE 15
OFF-SITE DIRECTIONALS

The following sign is to be used off-site within the surrounding neighborhoods to help direct guests to the park from both a vehicular and pedestrian orientation.

NOTES

Parking & Vehicular Signage
The ultimate goal should be to efficiently and effectively guides guests to the various parking lots and get them out of their cars so that they can walk, explore, and experience the park from a pedestrian orientation. Therefore it is essential to ensure the vehicular directionals clearly direct users to the parking lots and the different destinations as well as having parking signs that help guests orient themselves and remember where they parked.

Tram and Trolley Signage
The current issue with the tram and trolley signage is visibility, awareness and comfort. Therefore the signage will need to grow in scale and become more prominent while being located in comfortable / safe areas that guest frequent and don’t mind waiting. This is a major amenity for the park, but if people cannot find the stops then it is not being utilized like it should be.
Clearly Identify Park Entrances
Adding and updating park identity signage at prominent park entrances not only to help define the Park’s edges but also provide certainty to users that they have arrived.

Update signage at Critical Intersections
While Balboa Park is very large, there are only a few critical nodes or intersections that play a part in the wayfinding throughout the park. Therefore it is important to update and enhance these critical decision making points with clear signage to guide guests to the different areas of the park.

Update all the Signage on the West Mesa
The West Mesa would be a great opportunity to test out and begin phasing the signage refurbishing overhaul. It is somewhat isolated from the rest of the park but has a variety of amenities and destinations that would be great to test out the new signage masterplan guidelines.

Roll out of Signage Guidelines on any new signs developed in all areas of the park.
Any new signs that are to be installed within the park should follow the new guidelines, even though they may be in areas that still have the older style and colors. It will be several years until the new signage guidelines is fully implemented so there will be a period of juxtaposition during the transition and that is okay. The goal is to help improve the wayfinding through out the park and while it may not feel cohesive the variation in style will still work towards the desired result.
These budgetary estimates are intended to provide price range information for budget allotment, and are accurate to within 20% of actual fabrication costs, in 2019 dollars.

Variables which will affect the actual pricing structures include:

**Graphics**

- We assume camera ready art will be provided to the fabricator, in size sufficient to successfully render all logos and maps.
- All vinyl copy prices are based on copy as indicated on drawings. Changes in the quantity of characters required on each sign will change the price.

**Installation**

Excavation, footing and installation of sign poles included. Pricing assumes installation of all signs on level ground. Installation on sloped terrain will significantly increase installation prices.

- Concrete cutting, if required, will be additional ($30.00 to $50.00 per location, in quantity).
- Installation pricing assumes access to job site during normal working hours (8am-5pm, M-F) and unobstructed access to all sign locations. Pricing assumes normal billing rates, not prevailing wage rates.
- Removal of existing signage not included.

**Banners**

- Assumes the banner background color is a standard, available color in a high quality awning fabric, such as Unitex or Sunbrella.

**General**

- Quantity discounts noted assumes at least the indicated quantity would be ordered concurrently.
- City of San Diego sign permits and permit processing fees not included. Sign poles and bases are as provided by the manufacturer, including finish quality and color matching.

The following is recommended to maximize cost savings:

- Provide a sign storage area for the installation process.
- Screen print maps directly on sign panel. Provide long term storage area for future stock of sign parts.
- Purchase all foundry cast and fabricated brackets and caps at the onset of the first phase to realize quantity discounts.
The final budgetary estimates will be updated upon approval of the signage at a later date upon review and coordination with a local fabricator.
