MTS Chair Stephen Whitburn Calls for Special Board Meeting on the Heels of Ongoing Strike

“Our riders need access to reliable and uninterrupted services immediately. The workers have been on strike for three weeks too long and deserve a fair contract. As MTS Chair, I am calling for a special meeting to address the ongoing strike impacting essential transit services.

The disruption in services has caused hardship for countless individuals who rely on these services. The board should know about all the available options, including a termination of contract and or bringing services in-house. The absence of essential transit has had far-reaching consequences and the restoration of services is of paramount importance to ensure the well-being of the impacted individuals and communities.”
