Footnotes for Table 1512-03C

- ¹ Remainder Lot Provision: If all properties abutting a MR-1500B or MR-1250B lot are developed at a density greater than one dwelling unit per 1,000 square feet, then the bonus density may be developed regardless of lot size.
- ² The bonus density given for parcel accumulation may be used only if at least 90 percent of all required resident parking is either underground or enclosed within the rear 50 percent of the lot, or provided in some combination of those 2 formats.
- ³ Exception. MR-800B zoned lots with a depth of less than 100 feet are permitted the bonus density of one dwelling unit per 600 square feet of lot area for lots 10,000 square feet or more.

(d) Yard and Setback Requirements

- (1) Minimum Size of Street Yard. A street yard shall be provided at a minimum area calculated by multiplying the lot frontage by "X" feet shown in the second column in Table 1512-03D. See Figure 1 for a graphic example.

Table 1512-03D

- (2) In all residential zones, the required street yard shall not be measured beyond the front 70 feet or 50 percent of the lot depth, whichever is less, as measured from the front property line.
- (3) Minimum Yard Dimensions (Linear Feet) and Setbacks.

(4) Exceptions:

- (A) Zero Yard Option. The following zero-foot size yard option shall be granted by right in the MR-400 Zone, and through approval of a Mid-City Communities Development Permit in all other MR zones:
- (i) In the MR-1000B, MR-1000, MR-1250B, MR-1500B, and MR-1500 zones, up to 60 linear feet of the interior side wall may be on the interior property line, provided that no single plane exceeds 30 feet in length with a minimum 6-foot separation between multiple planes, and provided that access to the rear of the property from all units is provided and maintained. (Exception: A building wall in the rear 50 percent of a lot is not restricted to the 30-foot single-plane limit.) Any third story shall be set back at least 6 feet; each story above the third requires an additional 3-foot setback per story (calculated from the minimum requirement for the story below). The maximum required setback with this option is 15 feet.
 - (ii) In the MR-400 and MR-800B zones, no building shall be developed on the interior property line in the front 50 percent of the depth of the lot. Up to 60 linear feet of the interior side wall may be on an interior property line, provided no single plane exceeds 30 feet in length with a minimum 6-foot separation between multiple planes. Any second story shall be set back at least 6 feet in the front 50 percent of the lot; the third story shall be set back 6 feet and each story above the third requires an additional 3-foot setback per story.
- (B) Side Yard Setback. Each story (or portion of a story) above the second shall be set back an additional 3 feet (calculated from the minimum requirement for the story below). The maximum total required setback from the property line is 15 feet.

- (C) Interior Side Yards. On lots 50 feet wide or less, each interior side yard shall be calculated as 10 percent of the lot width provided that in no case shall such side yard be reduced to less than 4 feet.
- (D) Corner Lots. No structure may be located within the triangular areas established by: (1) the street intersection corner of the lot and the points on the street right-of-way lines which are 25 feet from the intersection corner; and (2) the street-side rear corner of the lot and points on the rear property line and the street side property line that are 10 feet from the street-side rear corner.
- (E) Rear Yard With Alley. In the residential zones with densities equal to or greater than one dwelling unit per 1,500 square feet, a rear yard of one foot dimension is required. However, each story (or portion of a story) above the second shall be set back from the property line 7 feet (calculated from the minimum requirement for the story below). The maximum required setback is 14 feet.
- (F) Street Side Yard. In the MR-400 Zone the minimum street side yard shall be 15 feet for lot frontages on Upas Street, Quince Street, and Laurel Street.
- (G) Front Yard. In the MR-400 Zone, the maximum setback for 65 percent of the street frontage shall be 15 feet.

(e) Height Limits

(f) Floor Area Ratio (FAR) and Lot Coverage

- (1) The maximum FAR and coverage shall be as indicated in Table 1512-03G.

Table 1512-03G

MR-1250B	.75	40
MR-1500B	.60	35
MR-1500	.55	35
MR-1750	.45	35
MR-2500	.40	35
MR-3000	.40	35

- (2) Enclosed parking may be excluded from the calculation of FAR and coverage.

- (3) Except in the MR-2500 and MR- 3000 zones, for any project which does not exceed the dwelling unit threshold in Section 1512.0203(b)(1), and for any project with a density less than or equal to one dwelling unit per 1,000 square feet of lot area, an FAR bonus shall be provided equivalent to the area of enclosed parking and any portion of a building which covers enclosed parking shall be excluded from the coverage calculation. This FAR bonus shall not exceed 1.0 FAR.
 - (4) For any project with a density greater than one dwelling unit per 1,000 square feet of lot area and which exceeds the dwelling unit threshold for a Mid-City Communities Development Permit (Section 1512.0203(b)(1), an FAR bonus shall be provided equivalent to the area of underground parking and any portion of a building which covers underground parking shall be excluded from the coverage calculation. This FAR bonus shall not exceed 1.0. FAR.
 - (5) In the MR-800B zone, the FAR in the front 40 percent of a lot shall be limited to 0.75.
 - (6) In the MR-400 Zone, the FAR for that portion of the building above a height of 100 feet shall be limited to 1.0.
- (g) Maximum Lot Dimensions and Areas
- In the MR-3000 and MR-2500 zones, lot consolidations created through maps or by means of building across property lines shall be prohibited without a Mid-City Communities Development Permit and the maximum street frontage along the front property line shall be 60 feet.
- (h) Pedestrian Access. At least one separate pedestrian entry per 50 linear feet of street wall frontage facing the front property line shall be provided from the street into or through the residential use area. Senior citizen projects may be exempted from this requirement through the approval of a Conditional Use Permit.
- (i) Diagonal Plan Dimension

- (1) The Diagonal Plan Dimension regulations shall be used for structures containing dwelling units in all residential projects, except for lots equal to or less than 50 feet in width. The maximum diagonal plan dimension shall be measured between the 2 most extreme points on that floor of the structure containing the most gross floor area (see Figure 2). For lots where the depth is 2 and one-half times or more than the width (see Figure 3), the maximum diagonal plan dimension shall be measured between the first extreme building corner to the point of the first building modulation along the length of the building with subsequent measurements allowed between modulations.

The modulation shall have a minimum 3-foot differential and shall extend for a minimum of 10 feet in length.

- (2) Maximum Dimension. The maximum diagonal plan dimension shall not exceed that numerical figure obtained from the percentage of the lot frontage as established in Table 1512-03H.

Table 1512.03H

§1512.0307 Commercial Nodes - CN-1, CN-1A, CN-2, CN-2A, CN-3, and CN-4 Zones

(a) Purpose And Intent

The Commercial Node (CN) zones are intended to provide for pedestrian oriented commercial and mixed-use districts in selected higher activity areas such as major intersections. The standards are designed to create street frontage conditions conducive to a rich, diverse and pleasurable walking experience. Parking and vehicle access are located so as to minimize disruption of pedestrian continuity. Residential use above street level commercial use is encouraged to intensify development on major transportation corridors where transit and other services are generally available and to foster pedestrian activity.

(b) Property Development Regulations

(1) Residential Density

One dwelling unit is permitted for each "X" square feet of lot area shown in the third column in Table 1512-03M.

**Table 1512-03M
Residential Density**

Zone	Lot Size (sq. ft.)	One Unit per "X" (sq. ft.)
CN-1, CN-1A	30,000 or more	400
CN-1, CN-1A	less than 30,000	600
CN-2, CN-2A	10,000 or more	800

(2) Yard and Setback Requirements

(A) Commercial, Residential and Mixed Commercial/Residential Development. No minimum front, side street side or rear yards are required unless:

(i) The property abuts residentially zoned property or commercial transition zoned property, in which case a 6-foot interior side or rear yard shall be provided adjacent to that property. The third story shall be set back 9 feet and additional stories shall be set back a minimum 15 feet from the property line. Also, a 10-foot front or street side yard shall be provided when that yard is abutting any residentially zoned property. Zero Yard Option. The following zero foot side yard option shall only be granted through approval of a Mid-City Communities Development Permit:

A building wall not exceeding 2 stories may be on a property line abutting MR-400, MR-800B, MR-1000B, MR-1000, or commercial transition zoned property. Any third story shall be set back at least 6 feet; each story above the third requires a 15-foot setback from the property line.

- (ii) Where parking spaces are accessed directly from the street right-of-way with no turnaround area, there shall be a 20-foot setback for said parking spaces.
- (B) That portion of structures exceeding 48 feet in height on Washington Street or 36 feet in height in all other areas shall be set back at least 15 feet from all property lines which are shared with another parcel.
- (3) Height Limits.
 - (A) For the CN-1A zone, the height limit shall be 200 feet except as follows:
 - (i) For CN-1A zoned properties within the area bounded by Kalmia Street, Laurel Street, and Third and Sixth Avenues, the height limit shall be 100 feet.
 - (ii) For CN-1A zoned properties within the area bounded by Laurel Street, Maple Street, and Third and Sixth Avenues, the height limit shall be 150 feet.
 - (B) In the CN-2A Zone, the height limit shall be 150 feet.
 - (C) For the CN-4 Zone, the height limit shall be 30 feet.
- (4) Floor Area Ratio (FAR) and Coverage.
 - (A) There shall be a minimum coverage of 35 percent.
 - (B) The permitted FAR for a commercial development in any CN zone is listed in the first column below. In all CN zones each square foot of the residential floor area in a mixed-use project earns an additional square foot of commercial floor area up to the maximum commercial FAR listed in the second column in Table 1512-03N.

**Table 1512-03N
Floor Area Ratio (FAR) and Lot Coverage**

Zone	Permitted FAR for Commercial Development	Maximum Commercial FAR for Mixed Commercial/Residential Development
CN-1	1.00	1.25
CN-1A	2.00	4.00
CN-2	0.75	1.25
CN-2A	2.00	3.00
CN-3, CN-4	0.75	1.25

- (C) There is no maximum FAR for residential development in a mixed commercial/residential project.
 - (D) For each floor that an atrium penetrates through a structure, 25 percent of the square footage per floor shall be included in the calculation of the FAR.
- (5) **Minimum Commercial Area.** For mixed commercial/ residential projects, a minimum square footage of the ground floor shall be reserved for commercial use (other than parking facilities), said square footage to be calculated by multiplying the linear footage of all street frontage by 20.
- (6) **Maximum Premised Area.** In the CN-3 zone no premises shall contain an establishment exceeding a total of 5,000 square feet in gross floor area.
- (7) **Pedestrian Access.** At least one separate pedestrian entry per 100 linear feet of street wall frontage or part thereof shall be provided from the street into or through the commercial use. Separate entries provided to satisfy this requirement may be spaced no closer than 25 feet apart.
- (8) **Street Wall.**

- (A) Expect as provided in Section 1512.0307(b)(2)(A)(i), there shall be a building wall of at least 13 feet in height located within 6 feet of any street frontage property line, along not less than 65 percent of both the front and if applicable street side street property lines, except as required for driveway access where no alternative access is available. The setback may be increased to 15 feet if a sidewalk café, public plaza, retail courtyard or arcade is provided for exclusive use of pedestrians. Structures not requiring a building permit are exempt from this requirement.
- (B) The street wall shall not exceed 48 feet in height on Washington Street or 36 feet in height in all other areas, with additional height of the structure set back at least 15 feet from the base of the street wall, except as may be required on one side of the building for fire or safety access, in which case no setback is required.

(“Commercial Nodes - CN-1, CN-1A, CN-2, CN-2A, CN-3, and CN-4 Zones” added 3-27-2007 by O-19598 N.S.; effective 4-26-2007.)

§1512.0308 Commercial Linear Zones - CL-1, CL-2, CL-3, CL-5, CL-6, (CL-4 is Renamed CV-3, See Section 1512.0309)

(a) Purpose And Intent

The Commercial Linear (CL) zones provide for automobile oriented commercial districts in which residential or mixed-use development is also encouraged. It is normally applied to linear areas between commercial nodes. Automobile use is accommodated by permitting parking in the street yard with certain access limitations to provide for traffic operations and to accommodate pedestrians as well. Incentives are provided for residential development for the purpose of concentrating multi-family residential use on major transportation corridors and to provide a desirable mixture of uses. The CL-5 Zone is intended for neighborhood-oriented commercial areas. The expansion of such uses, which may not have been previously zoned and/or are not now designated in the community plan for neighborhood commercial use, may be considered with the application of the CL-5 Zone and, if appropriate, the approval of a Mid-City Communities Development Permit to address hours of operation, uses, relaxation of parking requirements as well as other issues.

 - (ii) Zero Yard Option. The following zero-foot side yard option shall only be granted through approval of a Mid-City Communities Development Permit:

Up to 100 linear feet of a building wall may be on a property line abutting MR-400, MR-800B, MR-1000B, MR-1000 or transition zoned property. Any third story shall be set back at least 6-feet; each story above the third requires a 15-foot setback.
 - (iii) Where parking spaces are accessed directly from the street right-of-way with no turnaround area, there shall be a 20-foot setback for said parking spaces.
- (B) That portion of structures exceeding 36 feet in height stories shall be set back at least 15 feet from all property lines which are shared with another parcel.

(3) Height Limits

**Table 1512-03T

(4) Floor Area Ratio (FAR) and Coverage.

- (A) There shall be a minimum coverage of 20 percent.
- (B) The permitted FAR for commercial development shall be as indicated in Table 1512-03U.
 - (i) On any lot within the CV-1 Zone, each .01 of residential FAR in a commercial/residential project earns an additional .01 of commercial FAR up to a maximum commercial FAR of 3.00.
 - (ii) On any lot within the CV-2 or CV-3 Zones, each square-foot of residential floor area in a commercial/residential project earns an additional square-foot of commercial floor area up to a maximum commercial FAR of 1.00.

- (C) There is no maximum FAR for residential development.

**Table 1512-03U
Floor Area Ratios**

Zone	Permitted Commercial FAR
CV-1	1.50
CV-2	0.50
CV-3	0.50
CV-4	2.00

- (5) Maximum Premises Area. In the CV-3 Zone, no premises shall contain an establishment exceeding as total of 5,000 square feet in gross floor area.
- (6) Pedestrian Access. At least one separate pedestrian entry per 100 linear feet of street wall frontage shall be provided from the street into or through the structure. Separate entries meeting this requirement must be spaced no closer than 25 feet apart.
- (7) Street Wall
 - (A) Projects must meet one of 2 options:
 - (i) No parking in the 50 percent of the parcel abutting the street, except that enclosed and covered parking may be permitted in accordance with the yard and setback requirements; or

(ii) Except as provided in Section 1512.0309(b)(2)(A), there shall be a building wall of at least 13 feet in height located within 5 feet of any street frontage property line for commercial or mixed-use projects, or within 10 feet of any street frontage property line for residential projects, along not less than 65 percent of the total of both the front and if applicable street side property lines, except as required for driveway access where no alternative access is available. The setback may be increased to 15 feet if a sidewalk café, public plaza, retail courtyard or arcade is provided for exclusive use of pedestrians. Structures not requiring a building permit are exempt from this requirement.

(B) The street wall shall not exceed 36 feet in height with additional height of the structure set back at least 15 feet from the base of the street wall, except as may be required on one side for fire or safety access.

§1512.0310 Neighborhood Professional Zones - NP-1, NP-2, NP-3

(a) Purpose And Intent

The Neighborhood Professional (NP) zones are intended to provide for business and professional offices, certain allied services normally associated with such offices, and residential user. They will generally be located near hospitals or adjacent to major concentrations of commercial activities. The standards are designed to ensure compatibility between office development and existing or new residential development by providing for appropriate setbacks and limitations on floor area and signage.

The NP-1 Zone encourages a mixture of office and residential use at a high density, while the NP-3 Zone is intended to encourage more of an office orientation and less residential use. The intent of the NP-2 Zone is to preserve the existing higher quality and historic residential structures by permitting their reuse as apartments or offices.

(b) Property Development Regulations

- (1) Residential Density. One dwelling unit is permitted for each "X" square feet of lot area shown in the third column in Table 1512-03V.

**Table 1512-03V
Residential Density**

Zone	Lot Size (sq. ft.)	One Unit Per "X" (sq. ft.)
NP-1	15,000 or more	600
NP-1	less than 15,000	800
NP-2	any size legal lot	1,000
NP-3	any size legal lot	1,500

(2) Yard and Setback Requirements

- (A) Minimum Size of Street Yard. A street yard shall be provided at a minimum area calculated by multiplying the lot frontage by 20 feet. In all NP zones, the required street yard shall not be measured beyond the front 70 feet or 50 percent of the lot depth, whichever is less, as measured from the front property line.
- (B) Minimum Yard Dimensions (Linear Feet) and Setbacks

**Table 1512-03W
Minimum Yard Dimensions and Setbacks**

Yard Location	Setback (Ft.)
Front (ft)	10
Interior Side (ft)	6 ⁽¹⁾⁽²⁾⁽³⁾
Street Side (ft)	6
Rear (ft)	1 ⁽⁴⁾ , if alley; 15, if not alley

Footnotes for Table 1512-03W

- 1 Zero Yard Option. The following zero foot size yard option shall only be granted through approval of a Mid- City Communities Development Permit: Up to 60 linear feet of a 2-story interior side wall may be on the interior property line, provided that no single plane exceeds 30 feet and provided that access to the rear of the property from all units is provided and maintained. (Exception: A building wall in the rear 50 percent of a lot is not restricted to the 30-foot single-plane limit.) Any third story shall be set back at least 6 feet; each story above the third requires an additional 3-foot setback per story (calculated from the minimum requirement for the story below). The maximum required setback with this option is 15 feet.
- 2 Setback. Each story (or portion of a story above the second shall be set back an additional 3 feet (calculated from the minimum requirement for the story below). The maximum total required setback is 15 feet.
- 3 Exception. Interior Side Yards. On lots less than 50 feet wide, each interior side yard shall be calculated as 12 percent of the lot width.
- 4 Rear Yard. A rear yard of one foot dimension is required. However, each story (or portion of a story) above the second shall be set back 7 feet (calculated from the minimum requirement for the story below). The maximum required setback is 14 feet.

(3) Height Limits

Height Limitations**

Zone	Height Limitations (ft.)
NP-1	50; 60 where a building is above enclosed parking
NP-2	40; 50 where a building is above enclosed parking
NP-3	50; 60 where a building is above enclosed parking

(4) Floor Area Ratio (FAR) and Coverage

- (A) There shall be a minimum coverage of 20 percent.
- (B) The permitted FAR and coverage for commercial and/or residential development are specified in Table 1512-03Y.

- (C) A FAR bonus shall be provided equivalent to the area of enclosed parking. Any portion of the building which covers enclosed parking shall be excluded from the coverage calculation.

§1512.0311 Additional Development Regulations - All Mid-City Zones

- (a) Offsetting Planes Requirement.
 - (1) For each entire building elevation facing a street, there shall be at least the number of separate building planes as shown in Table 1512-03Z. A separate building plane is distinguished by an average horizontal difference between planes of 3 feet, measured perpendicular to the subject plane (see Figure 4). Building elements such as roofs with a minimum slope of 30 percent shall qualify as offsetting planes only when they constitute the highest element of the structure. For sloped roofs, the average horizontal difference of 4 feet is measured to the midpoint of the slope.

**Table 1512-03Z
Offsetting Planes Requirement**

Length of Building Elevation (ft.)	Minimum Number of Building Planes
50 or less	3
Over 50, but less than or equal to 100	5
Over 100, but less than or equal to 200	6
More than 200	An additional one plane for each 50 ft., or increment thereof, over 200 ft.

- (2) For residential development on lots 50 feet or greater in width, there shall be at least 3 separate building planes on each interior side elevation.
- (3) The proportions of the 3 building planes along each elevation shall meet the criteria as shown in Table 1512-03AA.

**Table 1512-03AA
Building Plane Proportions**

Percentage of 50 Foot Increment Building Elevation Area		
Zones	Minimum Area (%)	Maximum Area (%)

(b) Transparency Requirement

- (1) For all commercial or mixed-use projects in the CN and CV zones and for any such projects in the CL zones that have building walls 15 feet or less from a street property line, a minimum of 50 percent of street wall area between 3 feet and 10 feet above the sidewalk shall be transparent with visibility into a commercial or residential use area. This may include all types of non-reflective windows and openings, with a light transmittance factor no less than 75 percent.

Exception. The minimum transparency requirement shall not apply to parking structures or auto repair facilities with service bays facing a street for that portion of the street wall occupied by the service bays.

- (2) For that portion of all facades above the ground floor, no more than a combined total of 50 percent of each of the facades shall be vision glass or reflective spandrel construction.

All vision glass and reflective spandrel construction shall be of material which is no more than 30 percent in reflectivity.

- (3) Except as provided in Section 1512.0311(b)(1) above, in all projects, a minimum of 15 percent of each story’s street wall shall be transparent (such as windows).
- (4) No window or other transparency into a garage or similar area shall qualify toward the minimum transparency requirement in any zone.

(c) Private Exterior Usable Area

- (1) Private exterior usable areas shall be provided for residential and mixed residential/commercial projects. Such areas shall be adjacent to and accessible from selected dwelling units and shall be bounded by a minimum 36 inch high barrier. These areas shall be exclusive of public rights-of-way, shall have a minimum dimension of 5 feet and, in their entirety, shall have a natural or man-made gradient of 10 percent or less.
- (2) Private exterior usable areas shall have a minimum size of 25 square feet, with a project average of 50 square feet per dwelling unit. At least 50 percent of all units in a development shall have private exterior usable area.
- (3) In the MR-1500 zones that permit equal or higher residential densities, up to 50 percent of the requirement for private exterior usable area may be provided instead as common exterior usable area. However, for each 2-square-foot reduction in private area, 3 square feet of common area must be provided. Common exterior usable areas must be open to the sky, no less than 1,500 square feet in area and must have a minimum dimension of 30 feet and a gradient of 10 percent or less. Trees and trellises are permitted in such areas.

(d) Storage Facilities

A minimum of 100 cubic feet of secured storage spaces accessible from a common circulation area or garage and not part of a habitable area shall be provided per dwelling unit.

(e) Variety of Street Walls

The street wall of any project, defined by but not limited to the configuration of offsetting planes, transparencies and architectural features, shall not be substantially identical to the street wall of any other project within a 600 foot radius.
