¹ The City of San Diego approved an update to the Jurisdictional Runoff Management Plan (JRMP) in FY 16. The update of the JRMP was performed in compliance with Order No. R9-2013-0001.

² See the JRMP Annual Report FY 2022 Appendix, Attachment 1 for a citywide summary of this data.

³ The number of enforcement actions issued does not equal the number of identified illicit discharges or connections because some discharge complaints in the last quarter of FY 2022 were still under investigation at the end of FY 2022.

⁴ The Storm Water Standards Manual was updated in October 2018, and additional modifications were made in May 2021.

⁵ The number of ongoing Standard and Priority Development Projects in review as of 6/30/22. The Development Services Department processes other types of permits, in addition to those included in the JRMP Annual Report, that are not subject to the requirements of the MS4 Permit.

⁶ The number of ongoing Priority Development Projects in review as of 6/30/22. Only a portion of the projects that the Development Services Department processes qualify as a Priority Development Project.

⁷ The number of Priority Development Projects approved in FY 2021.

⁸ This number includes the of permits associated with Priority Development Projects (PDP) approved in FY 2021. A single PDP may have multiple permits that cover different types of work at the project.

⁹ Represents the total number of completed Priority Development Projects in the City's inventory at the end of FY 2021. These projects include completed projects that were entered into the inventory in previous years.

¹⁰ The number of Priority Development Project structural BMP violations included Notices of Violation, Notices of Deficient Maintenance, and Administrative Citations that were issued to public and private entities within the City's jurisdiction in this watershed.

¹¹ The number of enforcement actions included Notices of Violation and Notices of Deficient Maintenance issued to public and private entities within the City's jurisdiction in this watershed.

¹² Each City (municipal) facility is to be inspected twice per year by staff of the department responsible for the facility, as described in the JRMP. This is higher than the MS4 Permit minimum inspection frequency standard, which requires each site to be inspected once per Permit term and 20% of the overall existing development inventory (industrial, commercial, and municipal) to be inspected each year.

¹³ The reported number of commercial businesses includes stationary, fixed facilities, such as gas stations or restaurants, located within the watershed management area. Mobile business inspections are not required by the municipal permit, and mobile businesses are not reported as part of commercial inventory on the JRMP Annual Report form due to the lack of a related, stationary facility to inspect. Mobile businesses are mainly addressed through the City's education and IDDE programs. Inspections of mobile businesses are conducted on an as needed basis if a mobile business is identified as a source of illicit discharges.

¹⁴ Existing facilities for residential uses are characterized as Residential Management Areas (RMA), which could include hundreds of residences. When all of the residences in an RMA are inspected by City staff, they are only counted as one inspection. However, individual issues noted at each residence during an RMA inspection are counted as separate violations and/or enforcement actions. In the event that only a portion of the overall RMA is investigated (e.g., in response to a complaint), violations and enforcement actions may be recorded, but it is not counted as an RMA inspection. RMAs are required to be inspected once every five years.

¹⁵ See the JRMP Annual Report FY 2022 Appendix for the FY 2022 Fiscal Analysis.

¹ The City of San Diego approved an update to the Jurisdictional Runoff Management Plan (JRMP) in FY 16. The update of the JRMP was performed in compliance with Order No. R9-2013-0001.

² See the JRMP Annual Report FY 2022 Appendix, Attachment 1 for a citywide summary of this data.

³ The number of enforcement actions issued does not equal the number of identified illicit discharges or connections because some discharge complaints in the last quarter of FY 2022 were still under investigation at the end of FY 2022.

⁴ The Storm Water Standards Manual was updated in October 2018, and additional modifications were made in May 2021.

⁵ The number of ongoing Standard and Priority Development Projects in review as of 6/30/22. The Development Services Department processes other types of permits, in addition to those included in the JRMP Annual Report, that are not subject to the requirements of the MS4 Permit.

⁶ The number of ongoing Priority Development Projects in review as of 6/30/22. Only a portion of the projects that the Development Services Department processes qualify as a Priority Development Project.

⁷The number of Priority Development Projects approved in FY 2022.

⁸ This number includes the permits associated with Priority Development Projects (PDP) approved in FY 2022. A single PDP may have multiple permits that cover different types of work at the project.

⁹ Represents the total number of completed Priority Development Projects in the City's inventory at the end of FY 2022. These projects include completed projects that were entered into the inventory in previous years.

¹⁰ The number of Priority Development Project structural BMP violations included Notices of Violation, Notices of Deficient Maintenance, and Administrative Citations that were issued to public and private entities within the City's jurisdiction in this watershed.

¹¹ The number of enforcement actions included Notices of Violation and Notices of Deficient Maintenance issued to public and private entities within the City's jurisdiction in this watershed.

¹² Each City (municipal) facility is to be inspected twice per year by staff of the department responsible for the facility, as described in the JRMP. This is higher than the MS4 Permit minimum inspection frequency standard, which requires each site to be inspected once per Permit term and 20% of the overall existing development inventory (industrial, commercial, and municipal) to be inspected each year.

¹³ The reported number of commercial businesses includes stationary, fixed facilities, such as gas stations or restaurants, located within the watershed management area. Mobile business inspections are not required by the municipal permit, and mobile businesses are not reported as part of commercial inventory on the JRMP Annual Report form due to the lack of a related, stationary facility to inspect. Mobile businesses are mainly addressed through the City's education and IDDE programs. Inspections of mobile businesses are conducted on an as needed basis if a mobile business is identified as a source of illicit discharges.

¹⁴ Existing facilities for residential uses are characterized as Residential Management Areas (RMA), which could include hundreds of residences. When all of the residences in an RMA are inspected by City staff, they are only counted as one inspection. However, individual issues noted at each residence during an RMA inspection are counted as separate violations and/or enforcement actions. In the event that only a portion of the overall RMA is investigated (e.g., in response to a complaint), violations and enforcement actions may be recorded, but it is not counted as an RMA inspection. RMAs are required to be inspected once every five years.

¹⁵ See the JRMP Annual Report FY 2022 Appendix for the FY 2022 Fiscal Analysis.

¹ The City of San Diego approved an update to the Jurisdictional Runoff Management Plan (JRMP) in FY 16. The update of the JRMP was performed in compliance with Order No. R9-2013-0001.

² See the JRMP Annual Report FY 2022 Appendix, Attachment 1 for a citywide summary of this data.

³ The number of enforcement actions issued does not equal the number of identified illicit discharges or connections because some discharge complaints in the last quarter of FY 2022 were still under investigation at the end of FY 2022.

⁴ The Storm Water Standards Manual was updated in October 2018, and additional modifications were made in May 2021.

⁵ The number of ongoing Standard and Priority Development Projects in review as of 6/30/22. The Development Services Department processes other types of permits, in addition to those included in the JRMP Annual Report, that are not subject to the requirements of the MS4 Permit.

⁶ The number of ongoing Priority Development Projects in review as of 6/30/22. Only a portion of the projects that the Development Services Department processes qualify as a Priority Development Project.

⁷ The number of Priority Development Projects approved in FY 2022.

⁸ This number includes the permits associated with Priority Development Projects (PDP) approved in FY 2022. A single PDP may have multiple permits that cover different types of work at the project.

⁹ Represents the total number of completed Priority Development Projects in the City's inventory at the end of FY 2022. These projects include completed projects that were entered into the inventory in previous years.

¹⁰ The number of Priority Development Project structural BMP violations included Notices of Violation, Notices of Deficient Maintenance, and Administrative Citations that were issued to public and private entities within the City's jurisdiction in this watershed.

¹¹ The number of enforcement actions included Notices of Violation and Notices of Deficient Maintenance issued to public and private entities within the City's jurisdiction in this watershed.

¹² Each City (municipal) facility is to be inspected twice per year by staff of the department responsible for the facility, as described in the JRMP. This is higher than the MS4 Permit minimum inspection frequency standard, which requires each site to be inspected once per Permit term and 20% of the overall existing development inventory (industrial, commercial, and municipal) to be inspected each year.

¹³ The reported number of commercial businesses includes stationary, fixed facilities, such as gas stations or restaurants, located within the watershed management area. Mobile business inspections are not required by the municipal permit, and mobile businesses are not reported as part of commercial inventory on the JRMP Annual Report form due to the lack of a related, stationary facility to inspect. Mobile businesses are mainly addressed through the City's education and IDDE programs. Inspections of mobile businesses are conducted on an as needed basis if a mobile business is identified as a source of illicit discharges.

¹⁴ Existing facilities for residential uses are characterized as Residential Management Areas (RMA), which could include hundreds of residences. When all of the residences in an RMA are inspected by City staff, they are only counted as one inspection. However, individual issues noted at each residence during an RMA inspection are counted as separate violations and/or enforcement actions. In the event that only a portion of the overall RMA is investigated (e.g., in response to a complaint), violations and enforcement actions may be recorded, but it is not counted as an RMA inspection. RMAs are required to be inspected once every five years.

¹⁵ See the JRMP Annual Report FY 2022 Appendix for the FY 2022 Fiscal Analysis.

¹ The City of San Diego approved an update to the Jurisdictional Runoff Management Plan (JRMP) in FY 16. The update of the JRMP was performed in compliance with Order No. R9-2013-0001.

² See the JRMP Annual Report FY 2022 Appendix, Attachment 1 for a citywide summary of this data.

³ The number of enforcement actions issued does not equal the number of identified illicit discharges or connections because some discharge complaints in the last quarter of FY 2022 were still under investigation at the end of FY 2022.

⁴ The Storm Water Standards Manual was updated in October 2018, and additional modifications were made in May 2021.

⁵ The number of ongoing Standard and Priority Development Projects in review as of 6/30/22. The Development Services Department processes other types of permits, in addition to those included in the JRMP Annual Report, that are not subject to the requirements of the MS4 Permit.

⁶ The number of ongoing Priority Development Projects in review as of 6/30/22. Only a portion of the projects that the Development Services Department processes qualify as a Priority Development Project.

⁷ The number of Priority Development Projects approved in FY 2022.

⁸ This number includes the of permits associated with Priority Development Projects (PDP) approved in FY 2022. A single PDP may have multiple permits that cover different types of work at the project.

⁹ Represents the total number of completed Priority Development Projects in the City's inventory at the end of FY 2022. These projects include completed projects that were entered into the inventory in previous years.

¹⁰ The number of Priority Development Project structural BMP violations included Notices of Violation, Notices of Deficient Maintenance, and Administrative Citations that were issued to public and private entities within the City's jurisdiction in this watershed.

¹¹The number of enforcement actions included Notices of Violation and Notices of Deficient Maintenance issued to public and private entities within the City's jurisdiction in this watershed.

¹² Each City (municipal) facility is to be inspected twice per year by staff of the department responsible for the facility, as described in the JRMP. This is higher than the MS4 Permit minimum inspection frequency standard, which requires each site to be inspected once per Permit term and 20% of the overall existing development inventory (industrial, commercial, and municipal) to be inspected each year.

¹³ The reported number of commercial businesses includes stationary, fixed facilities, such as gas stations or restaurants, located within the watershed management area. Mobile business inspections are not required by the municipal permit, and mobile businesses are not reported as part of commercial inventory on the JRMP Annual Report form due to the lack of a related, stationary facility to inspect. Mobile businesses are mainly addressed through the City's education and IDDE programs. Inspections of mobile businesses are conducted on an as needed basis if a mobile business is identified as a source of illicit discharges.

¹⁴ Existing facilities for residential uses are characterized as Residential Management Areas (RMA), which could include hundreds of residences. When all of the residences in an RMA are inspected by City staff, they are only counted as one inspection. However, individual issues noted at each residence during an RMA inspection are counted as separate violations and/or enforcement actions. In the event that only a portion of the overall RMA is investigated (e.g., in response to a complaint), violations and enforcement actions may be recorded, but it is not counted as an RMA inspection. RMAs are required to be inspected once every five years.

¹⁵ See the JRMP Annual Report FY 2022 Appendix for the FY 2022 Fiscal Analysis.

FY 2022 JRMP Annual Report Appendix

1.0 Stormwater Strategic Program updates

The following are operational adaptive management improvements that the City made during Fiscal Year (FY) 2022:

1.A Funding Strategy Implementation Update

Raising new revenue for stormwater services through a parcel tax or a property-related fee requires a public vote. The Stormwater Department (SWD) continues to evaluate the potential viability of a future ballot measure that would generate new revenue and help ensure clean water and clean beaches for all of San Diego. The latest update on the progress on meeting the funding gap can be viewed at https://www.thinkblue.org/action-strategy/.

1.B Stormwater Program Online Dashboards

The City has created online reporting dashboards that illustrate detailed information from the City's JRMP and WQIP Annual Reports which are available at https://www.sandiego.gov/think-blue/data-maps. The dashboards incorporate FY 2021 and FY2022 data collected in association with multiple programs within SWD, including FY 2022 updates of the following:

- Street Sweeping
- Storm Drain Structure Inspection & Cleaning
- Development Planning Program: Structural Best Management Practices Inspections
- Water Conservation Rebate Program
- Illicit Discharge Detection and Elimination Program
- Existing Development Management Program: Commercial and Industrial Business Inspections
- Existing Development Management Program: Municipal Facility Inspections

2.0 Notable Water Quality Efforts

The City continued to implement the key elements of the JRMP. The following are stormwater accomplishments and notable updates that occurred during the FY 2022 reporting period.

FY 2022 Annual Report 1 January 2023

2.A Water Quality Improvement Plans

In FY 2022 the City continued to implement the Water Quality Improvement Plans (WQIPs) that included City jurisdiction. The goal of the WQIPs is to protect, preserve, enhance, and restore the water quality of receiving water bodies. These WQIPs identify the adaptive planning and management process necessary to address the highest priority water quality conditions within a watershed. The WQIPs also identify strategies to achieve improvements in the quality of discharges from the Responsible Agencies' storm drain systems. The City is the lead on the WQIP for the San Dieguito, Los Peñasquitos, and Mission Bay watersheds. The City is also a participating agency in the San Diego River, San Diego Bay, and Tijuana River watersheds.

2.C General Plan and Community Plan Amendments

The Planning Department is developing Community Plan updates that incorporate measures to address stormwater quality. The Community Plan updates include recommended best practices to enhance the quality of experiences the public. The planned circulation networks in these Community Plan updates can incorporate street enhancements that provide water quality benefits such as tree plantings, pervious pavements, and stormwater capture. The Planning Department completed or worked on developing Community Plan updates that incorporate stormwater best management practices for the following areas in FY 2022:

- Clairemont Community Plan Update
- Mira Mesa Community Plan Update
- University Community Plan Update
- College Area Community Plan Update
- Hillcrest Focused (Uptown) Community Plan Update
- De Anza Revitalization Plan/MB Plan Amendment
- Citywide Parks Master Plan

2.D Notice of Violation

NOV R9-2010-0135 and Time Schedule Order (TSO) No. R9-2014-0034:

In 2010, the San Diego Regional Water Quality Control Board (San Diego Water Board) Regional Board issued NOV No. R9-2010-0135 to the City of San Diego for failure to take measures to reduce the discharge of pollutants to the maximum extent practicable (MEP), failure to implement its Standard Urban Stormwater Mitigation Plan (SUSMP), and failure to verify correct installation of permanent post-construction structural BMP requirements. The NOV and subsequent TSO identified 163 private and public development sites that had either missing or ineffective structural BMPs. In FY 2017, the City achieved full compliance with the Regional Board's NOV (TSO R9-2014-0034). The Regional Board acknowledged the

TSO had been resolved via communication sent to the City on 9/6/2017, and the Board updated the California Integrated Water Quality System (CIWQS) project database to reflect this.

Beginning in FY 2014, as part of its continuing inspections of completed structural BMPs, the City discovered an additional 74 sites which initially appeared to be out of compliance due to a variety of circumstances. The City is currently performing enforcement on each of the projects identified to be non-compliant. Established escalating enforcement procedures previously outlined to the Board are being followed to achieve compliance. Compliance will be achieved by demonstrating adherence to the requirements of the MS4 permit in effect at the time of each particular project's approval. To date, 70 of the 74 sites which were identified as non-compliant, have been brought into compliance. The four remaining cases have been issued a Hearing Notice but have opted to come into compliance, rather than go to hearing. These four entities are currently working with DSD Engineering Review staff to bring the site and or documentation, into compliance. Compliance is anticipated to be achieved by February 28th, 2023.

2.E Responses to San Diego Water Board Comments

2.E.1 Stormwater Program Funding

San Diego Water Board comment letters on the FY21 WQIP Annual Reports included the following comment directed to the City of San Diego.

The Funding Strategy Update is in response to a June 2018 performance audit of the City's Stormwater Department by the Office of the City Auditor. The Funding Strategy Update identifies shortfalls in the City's obligations to fully implement the Order. Provision E.8.a of the Order states that "Each Copermittee must secure the resources necessary to meet all the requirements of this Order." The next WQIP annual report, due January 31, 2023, must include an explanation of how the City will address compliance with Provision E.8.a of the Order.

City Response

The City of San Diego (City) is in compliance with Provision E.8.a and E.8.b of Order No. R9-2015-0001, as amended by Order Nos. R9-2015-0001 and R9-2015-0100 (Order) that requires "Each Copermittee must secure the resources necessary to meet all the requirements of this Order." According to Provision E.8.b of the Order the fiscal analysis must include "Source(s) of funds that meet the necessary expenditures described in Provisions E.8.a and E.8.b (2) including legal restrictions on the use of such funds for the current fiscal year and next fiscal year". Provision E.8 does not require the City to identify and secure sources of funds that might be needed beyond the term of the Order.

The language in 40 CFR 122.26(d)(2)(vi), which is the basis for the fiscal analysis requirements in the Order, clarifies that the requirements of Provision E.8 of the Order

regarding identification of necessary resources do not extend beyond the term of the Order: "For each fiscal year to be covered by the permit, a fiscal analysis of the necessary capital and operation and maintenance expenditures necessary to accomplish the activities of the programs under paragraphs (d)(2) (iii) and (iv) of this section.

- Paragraph (d)(2)(iv) is "proposed management program." This corresponds to the JRMP (MS4 Permit Provision E) and the WQIP (MS4 Permit Provision B).
- Paragraph (d)(2)(iii) is "characterization data." This is monitoring programs, which are detailed in Provision D of the MS4 Permit. The monitoring programs required under Provision D are incorporated into the JRMP and the WQIP."

The City Council has approved funding necessary to meet the requirements for the Order for provisions II.B Water Quality Improvement Plans (WQIP) Strategies, II.D Monitoring, and II.E Jurisdictional Runoff Management Plan (JRMP) annually through a combination of sources including the City General Fund, Enterprise Funds from ratepayers, and other sources such as grants and loans. Based on a stormwater asset inventory and asset management system developed by SWD it is estimated that there is still a funding gap to upgrade and modernize aging infrastructure and comply with future water quality regulations of approximately \$274 million annually. In order to address this funding deficit, the City is actively pursuing and attaining other funding mechanisms. The following discussion provides additional detail on the following existing funding sources and future funding needs:

- 1. Existing funding sources for the WQIP Strategies, Monitoring, and JRMP
- 2. Strategy to secure funding needs for MS4 Maintenance for Public Safety and Bacteria TMDL compliance

1. <u>Funding Sources for WQIP Strategies, Monitoring, and JRMP</u>

Fiscal Year (FY) 2021 and FY 2022 Expenditures

A total of \$42,847,234 was expended by the Stormwater Department (SWD) in FY 2021 to implement the following JRMP and WQIP activities in accordance with the requirements of the Order. A total of \$51,557,489 was budgeted for expenditures in FY 2022 (ending June 2022) for the same activities.

- Plan check review services, field inspections related to grading permits, public improvements, and building activities for private and public projects;
- Construction site inspections;
- Street sweeping;
- Storm drain, channel maintenance, and BMP maintenance;

FY 2022 Annual Report 4 January 2023

- Municipal facility inspections;
- Industrial and commercial facilities inspections;
- Public and Private structural BMP inspections and maintenance verification;
- Illicit Discharge, Detection, and Elimination (IDDE) program implementation;
- Educational materials, outreach efforts and events, public service announcements (PSAs), household hazardous waste (HHW) and used oil outreach, and community events;
- Dry and Wet Weather Monitoring;
- Structural BMP Development in association with Capital Improvement Program (CIP)
- Water Quality Response Team that identifies and tracks sources of harmful bacteria that pose human health and water quality risks throughout the City;
- Implementation of non-structural strategies identified in the WQIPs for the San Diego River, San Diego Bay, Tijuana River, Mission Bay, Los Penasquitos, and San Dieguito watersheds.

FY 2023 Stormwater Department Budget

The SWD is the lead department in meeting MS4 Permit requirements. The City has been consistently increasing the SWD operating budget in recent years, including the addition of 82 new positions since FY 2021 which indicates the City's commitment to meeting stormwater requirements.

The City adopted a total expenditure budget of \$66,457,083 for the SWD in FY 2023. This represents a 30% increase over the FY 2021 expenditure budget of \$47,521,439 and a 24% increase over the FY 2022 expenditure budget of \$51,557,489. The source of the funding is the City General Fund. The approved SWD FY 2023 budget can be viewed at: (https://www.sandiego.gov/finance/annual#:~:text=The%20Fiscal%20Year%202023%20Proposed,Fiscal%20Year%202022%20Adopted%20Budget.) The SWD is currently using these funds to implement City programs listed above under the FY 2021 and FY 2022 expenditures discussion.

The City allocated a total of \$191,190,991 to SWD in FY 2023 for CIP projects. This budget funds planning, design, and construction of SWD projects to achieve stormwater requirements. This represents a 1,486% increase over the FY 2021 CIP budget of \$12,057,807 and a 194% increase over the FY 2022 CIP budget of \$64,932,278.

Additionally, the SWD has been aggressively pursuing supplemental federal and state funding sources for its stormwater CIP which culminated in securing approximately \$400 million in state and federal funding as described below:

Water Infrastructure Innovation Act (WIFIA) Loan

The City secured a low interest WIFIA loan from the U.S. Environmental Protection Agency (EPA), in the amount of \$359.2 million to fund Stormwater CIP projects over the next five

FY 2022 Annual Report 5 January 2023

years. The City submitted a programmatic loan application, the first in the nation, for \$733 million in Stormwater CIP needs. The maximum amount that EPA finances through a WIFIA loan is 49% of eligible programmatic costs of the \$733 million, which results in \$359.2 million in project proceeds amount. The City is obligated to fund the remaining 51%, which equals \$364 million, through pay-go funds, grants, loans, Lease Revenue bonds, and Commercial Paper. The City's commitment to fund the 51% (\$364 million) reflects the City's commitment to improving water quality by building green infrastructure, restoring waterways, and rehabilitating habitat.

The following is a summary of how the WIFIA loan funds will be invested across stormwater assets:

- \$36 million for green infrastructure projects to remove pollution and support greening of urbanized communities;
- \$91 million for revitalization and restoration of watersheds to improve water quality;
- \$552 million to replace aging metal pipes with reinforced concrete pipes that last for 100 years;
- \$30 million to upgrade pump stations that are critical to preventing neighborhood flooding;
- \$24 million for the rehabilitation and replacement of deteriorating stormwater infrastructure.

State Revolving Fund (SRF) Loan

The City has secured a \$27 million SRF loan from the State Water Resources Control Board, for the South Mission Beach Storm Drain and Green Infrastructure Project. The project will reduce flood risk and inundation within the Project vicinity and improve water quality within Mission Bay by treating dry and wet weather runoff via Green Infrastructure features. Water quality is one of the main objectives of these Projects and this is achieved through implementation of Green Infrastructure, low flow sewer diversion systems, and Low-Impact Development features which include eight proposed biofiltration/bioretention basins and nine low flow sewer diversion systems. The City also applied for a \$56 million SRF loan for the Los Peñasquitos Lagoon Restoration, which is pending final approval from the State Water Board.

Grants

The City has tremendously increased its effort in applying for grants in the last several years. As a result of this effort, the City has been awarded the following grants:

FY 2022 Annual Report 6 January 2023

- \$5.9 million for Maple Canyon Restoration, from Economic Development Agency (2021) was awarded on January 19, 2021;
- \$3.1 million for Southcrest Green Infrastructure, State Allocation was awarded on September 23, 2021;
- \$1.4 million for Auburn Creek Revitalization, CA Department of Water Resources was awarded on November 2, 2022.

In addition to the CIP grants mentioned above, in FY 2022, the SWD partnered with the San Diego County Water Authority (SDCWA) and was awarded a grant through the California Department of Water Resources' Proposition 1 round 2 grant solicitation under the San Diego Integrated Regional Water Management Program (IRWM) to help administer and enhance the City's Water Conservation Rebate Program. The IRWM project selection workgroup approved the City's project for funding and SDCWA will act as the lead to implement the project. The City's portion of the project seeks to expand awareness of the City's Rebates Program and potentially incorporate program expansions to increase participation in the programs and facilitate accessibility to residents across the City, including those within Communities of Concern and areas that have had historically lower participation in the programs. The City will be awarded \$500,000 in grant funding through the project and will coordinate with SDCWA, DWR, and the IRWM program over the next year on establishing necessary grant sub-award agreements. All grant funds must be expended by fiscal year 2028 and will specifically be used to fund water conservation rebates issued to residents, increase education and outreach to raise awareness of the program, and implement a pilot project to implement expanded or enhanced adjustments to the program to increase engagement.

2. <u>Strategy to Address Long Term funding needs for MS4</u> <u>Maintenance for Public Safety and Bacteria TMDL</u> <u>Compliance</u>

Bacteria TMDL Structural BMP Requirements

As noted above, the City has secured resources to implement its JRMP and the City's WQIP strategies and monitoring programs during the term required by the MS4 Permit. The SWD has also identified a need for additional funding for future structural BMPs to meet water quality requirements with due dates in future fiscal years, including the Bacteria TMDL. Projected costs for these water quality needs are considered tentative because future permit and TMDL requirements/amendments are unknown at this time and will impact what projects/strategies we need to implement to attain compliance. The City also continues to maintain that adjustments to the wet weather compliance targets in the Bacteria TMDL are necessary to reflect the most recent science and to consider a

reasonable relationship between benefits and costs of actions taken to meet the TMDL targets. Revisions to wet weather Bacteria TMDL targets, which the City and other Copermittees have been discussing with the Water Board for the past several years, would also affect projected funding needs.

MS4 Maintenance for Public Safety

Components of the stormwater system, which includes pipes, channels, pumps stations, inlets, and levees, are over 100 years old. Like all infrastructure, the system has aged and deteriorated. However, the stormwater system is also subject to the added wear and tear from extreme rainfall events from climate change causing harmful flows, expansive urbanization generating increasing runoff, and historical underfunding resulting in deferred maintenance. As noted in Chapter 10 of the JRMP, the costs to implement the Flood Risk Management requirements of the City were estimated to be \$1,184,808,460 in 2016. These cost estimates were updated in FY 2022 by the SWD as a part of the funding strategy effort currently being conducted by the City.

At the start of FY 2021, there were 17 sites where pipe failures or undersized pipes required that SWD operate temporary bypass pumps during rainstorms to reduce flooding risk. By adding funding for two in-house pipe repair teams, and strategically prioritizing pipe repairs and replacements at those locations, the SWD was able to reduce the number of active bypass locations to four by the end of FY 2021. However, there are many more pipe locations that are at risk of failing and causing flooding each year (see 2021 Stormwater Department Interim Funding Strategy Implementation Update, Appendix B https://www.sandiego.gov/sites/default/files/interim-stormwater-funding-strategy-reportnov21 0.pdf. Responding to these emergency repairs often must be prioritized over proactive maintenance of other components of the City's MS4 infrastructure. Notably, many of the 200 channel segments (totaling over 69.2 miles of priority channels) are overdue for their routine proactive maintenance. While the City is currently in compliance with the requirements in Provision II.E of the Order to implement a schedule of operation and maintenance activities for its MS4 and related structures, the City's approach has historically been more reactive in nature due to the lack of adequate funding. Responding to emergency repairs has often expended much of the funding that would otherwise be allocated to implementing our robust and comprehensive maintenance plans for other portions of our system. However, as previously discussed, increases in staffing, the creation of new in-house pipe repair crews, and the aggressive pursuit of additional funding is allowing the City to begin transitioning to a more proactive approach to implementing our maintenance plans.

Stormwater Funding Strategy

Raising new revenue for stormwater services through a parcel tax or a property-related fee requires a public vote. The SWD continues to evaluate the potential viability of a future

FY 2022 Annual Report 8 January 2023

CITY OF SAN DIEGO JURISDICTIONAL RUNOFF MANAGEMENT PLAN FISCAL YEAR 2022 ANNUAL REPORT APPENDIX

ballot measure that would generate new revenue and help ensure clean water and clean beaches for all of San Diego. The latest update on the progress on meeting the funding gap can be viewed at https://www.thinkblue.org/action-strategy/.

3.0 Fiscal Analysis

3.A General Budget Information

SWD collects information from other City departments and combines that with data from SWD programs to produce the JRMP Annual Report each year. A summary of program implementation numbers as presented in the JRMP Annual Report is included in Attachment 1.

SWD is also responsible for reporting annual expenditures in accordance with the requirements in Regional Board Order No. R9-2013-0001 (as amended by Order Nos. R9-2015-0001 and R9-2015-0100) (2013 Permit). During the reporting period, SWD collected and analyzed financial data from 23 City departments/divisions through its "Annual Report Form" questionnaire, as well as data provided by SWD. A summary of the fiscal analysis findings is included in following sections.

3.B Fiscal Analysis Methods

The City used the format and guidelines included in the Fiscal Analysis Method for reporting purposes except where modifications were necessary to address how the City tracks accounts internally. Modifications to the expenditure categories are described in the relevant sections below. In many cases, estimated percentages were used to allocate expenditures into the appropriate municipal permit component categories, including watershed and regional.

3.B.1 Fiscal Analysis Results

3.B.1.1 Expenditures

The City's FY 2022 JRMP Regional Program total expenditures for implementing the Municipal Permit requirements are summarized in Table 3.1.

Table 3.1: FY 2022 Jurisdictional, Watershed, and Regional Expenditures Summary

Jurisdictional Component	
Administration	\$12,899,183
Development Planning (including public and private projects)	\$990,287
Construction (including public and private projects)	\$2,203,421
Municipal (including Non-Emergency Fire Fighting expenditures)	\$32,310,669
Stormwater Department Capital Improvements Program (CIP)	\$21,712,266
Industrial and Commercial	\$913,158

Jurisdictional Component	
Residential, Education, and Public Participation	\$1,402,015
Illicit Discharge Detection and Elimination (IDDE)	\$7,119,325
Jurisdictional Total	\$79,550,324
Regional Component	
Total Copermittee Cost Share for the City of San Diego	\$4,028
City of San Diego's Regional Cost Share contribution for education efforts, monitoring, document reviews, regional meeting attendance, and special projects	\$167,591
Regional Total	\$171,619
Total Costs	\$79,721,943

JRMP Expenditures

The City's FY 2022 Citywide expenditures for implementing the jurisdictional Municipal Permit requirements are depicted in Figure 1. Expenditures were provided as actual costs in most cases, and when the actual costs could not be determined, estimates of actual costs were provided. SWD used the expenditure categories detailed in the Fiscal Analysis Method for jurisdictional reporting. However, because of implementation overlap with the City's education, public participation, and residential Municipal Permit components, it is difficult to separate out individual component costs. Therefore, the expenditures for residential, education, and public participation are reported as one expenditure category.

A total of \$79,721,943 was expended in FY 2022 to implement JRMP activities citywide. This amount includes costs paid by sewer and water rate payers (which are used for sewer and water-related services) and costs reimbursed by project applicants. An overview of the expenditures reflected in this component is described below.

The Fire and Police departments completed the following activities in FY 2022 in accordance with the requirements of the JRMP:

- Storm Drain inspection & cleaning in part to determine if onsite BMPs were adequately treating or collecting stormwater to ensure that pollutants such as sediment do not enter the storm drain system;
- Municipal facility inspections;
- Parking lot sweeping;
- Training for staff;
- IRMP Annual Report Preparation;
- Public Outreach Activities.

FY 2022 Annual Report 11 January 2023

The costs for the JRMP required activities conducted by the Fire and Police departments in FY 2022 are estimated to be approximately \$123,000. Costs for these inspections are not included in the Citywide summary presented in Table 3.1. However, the City has developed backup documentation regarding the costs that is available for review upon request.

Administration (\$12,899,183)

Activities identified in this section represent personnel and non-personnel expenses for administration and contracts, grant management, citywide management, staff training, reporting, and assessment of the Municipal Permit.

Development Planning (\$990,287)

Activities identified in this section represent personnel and non-personnel expenses for plan check reviews, incorporating BMPs into project designs, BMP Design Manual development, and General Plan updates. This category includes expenses for private and public projects.

Construction (\$2,203,421)

Activities identified in this section represent personnel and non-personnel expenses for plan check review services, field inspections related to grading permits, public improvements, and building activities. This category includes expenses for private and public projects.

Municipal (\$32,310,669)

Activities identified in this section represent personnel and non-personnel expenses for street sweeping, storm drain and channel maintenance, BMP implementation, and municipal facility and activity inspections. Additionally, this section includes the expenditures for Fire Department activities not related to emergency firefighting, such as facility inspections, stormwater BMPs, etc.

Capital Improvement Program (\$21,712,266)

Activities identified in this section represent personnel and non-personnel expenses for implementation of new construction and planned improvements to existing facilities for stormwater management. Projects may include, but are not limited to, the construction, purchase, or major renovation of buildings, utility systems, and other facilities to achieve stormwater requirements. In addition, they may also include land acquisitions and roadway projects to install stormwater facilities.

Industrial and Commercial (\$913,158)

Activities identified in this section represent personnel and non-personnel expenses for inspection of industrial and commercial facilities. This also includes personnel and non-personnel expenses for the stormwater components of the Public Utilities Department's (PUD) Food Establishment Wastewater Discharge Program (FEWD) and Industrial

FY 2022 Annual Report 12 January 2023

Wastewater Control Program (IWCP) inspections. The stormwater components of these PUD inspections are paid by SWD per the terms of an internal agreement between the departments.

Residential, Education, and Public Participation (\$1,402,015)

Activities identified in this section represent personnel and non-personnel expenses for educational materials, outreach efforts and events, public service announcements (PSAs), household hazardous waste (HHW) and used oil outreach, and community events.

Illicit Discharge Detection and Elimination (\$7,119,325)

Activities identified in this section represent personnel and non-personnel expenses for identification and elimination of illicit discharges, enforcing the City's stormwater ordinance and implementation of the administrative civil penalties and citation process, and the urban runoff monitoring program.

Regional Expenditures (\$171,619)

The City's FY 2022 regional expenditures for the implementation of the regional Municipal Permit requirements are primarily the City's share of regional Copermittee stormwater program costs. Additional costs include estimated staff time to attend regional meetings and other related administration costs. SWD used the expenditure categories (administration, cost share contribution, regional activities, and other) detailed in the Fiscal Analysis Method for regional reporting. The regional expenditures included in this report only capture City expenditures, and do not account for any expenditure disbursed by other Copermittees in the region.

Grant Funding for Special Studies

In addition to resources identified for Municipal Permit requirements, the City actively seeks grants, and other funding sources, for special studies and Capital Improvement Projects. For the most part, funding for these projects may be limited to the projects specified and the City may restrict funding reallocation to other projects. Therefore, these resources are currently not incorporated in calculations for total Municipal Permit requirements expenditures. Table 3.2 lists the grants that were issued in FY 22. See below and section 1.A for additional information on SWD's funding sources.

Table 3.2: FY 2022 City Stormwater Department Grant Funding

Funding Source	Project	Amount (\$)	Matching Fund Amount (\$)		
U.S. Department of	Maple Canyon	\$5,975,582.00	\$5,975,582.00		
Commerce EDA	Restoration	\$5,975,562.00	\$5,975,562.00		
California Natural	Southcrest GI	\$3,100,000.00	\$0.00		
Resources Agency (CNRA)	Southcrest GI	φ5,100,000.00 	Φ0.00		

FY 2022 Annual Report 13 January 2023

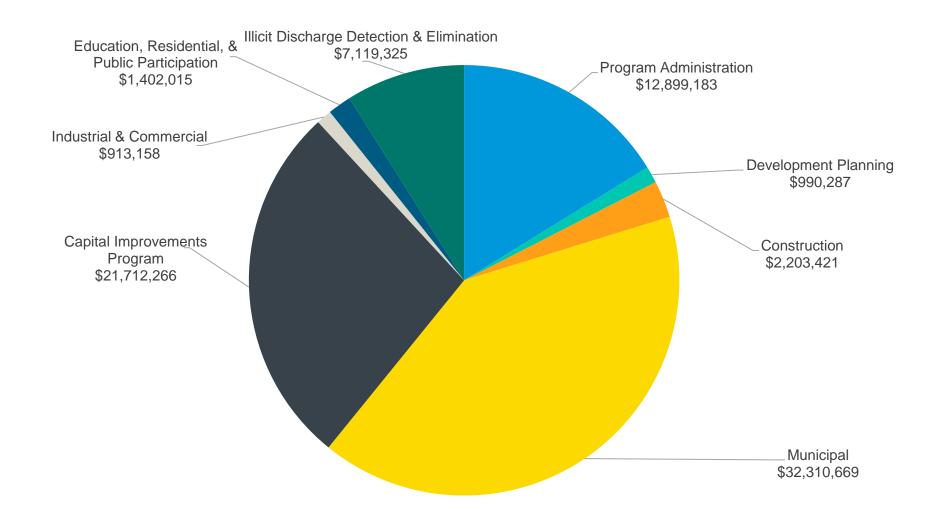

Figure 1: FY 2022 Citywide JRMP Expenditures by Permit Area

Funding Sources

Citywide implementation of Municipal Permit requirements is funded through four main types of governmental funds: The General Fund, Special Revenue Funds, Enterprise Funds, and Internal Service Funds. See section 1.A for additional information on SWD funding sources.

1.1.1.1.1 General Fund

The General Fund is the main fund for the City and is supported by major revenue sources, including property tax, sales tax, transient occupancy tax, and franchise fees. Departments funded by the General Fund provide core community services.

1.1.1.1.2 Special Revenue Funds

Special Revenue Funds account for revenues received for specifically identified purposes. Some of the larger funds that fall under this category include TransNet, Gas Tax, and Special Promotion programs.

1.1.1.1.3 Enterprise Funds

Enterprise Funds are initiated for specific purposes and funded through fees for services. This funding type is designated for the operations, management, maintenance, and development of the department providing the service. The implementation of citywide JRMP activities is funded through the following enterprise funds:

- Airports Fund
- Development Services Enterprise Fund
- Golf Course Enterprise Fund
- Recycling Fund
- Refuse Disposal Fund
- Sewer Revenue Funds
- Water Utility Fund

1.1.1.1.4 Internal Service Funds

Internal Service Funds are comprised of fees for services provided by one City department to another City department or division. The implementation of citywide JRMP activities is funded through the following internal service funds:

- Engineering and Capital Projects Fund
- Equipment Division Funds

Attachment 1 Summary of JRMP Annual Report Numbers by Watershed

Table A-1. JRMP Annual Report Form Section IV – Illicit Discharge Detection and Elimination Program

		Lillilliatio	Jii Pi Ogi ai	11			
JRMP Annual Report Form Section IV - Illicit Discharge Detection and Elimination Program	San Dieguito Watershed	Los Peñasquitos Watershed	Mission Bay Watershed	San Diego River Watershed	San Diego Bay Watershed	Tijuana River Watershed	Total Citywide FY22
Number of non-storm water discharges reported by the public	88	336	526	530	779	54	2,313
Number of non-storm water discharges detected by Copermittee staff or contractors	12	53	67	62	118	99	411
Number of non-storm water discharges investigated by the Copermittee	100	389	593	592	897	153	2,724
Number of sources of non- storm water discharges identified	100	389	593	592	897	153	2,724
