Historic Preservation Section Policies

Historic Preservation	
HP-1.1	Conduct project-specific Native American consultation early in the development review process to ensure culturally appropriate and adequate treatment and mitigation for significant archaeological sites with cultural or religious significance to the Native American community in accordance with all applicable local, state, and federal regulations and guidelines.
HP-1.2	Consider eligible for listing on the City's Historical Resources Register any significant archaeological or Native American cultural sites that may be identified as part of future development within Kearny Mesa, and refer sites to the Historical Resources Board for designation, as appropriate.
HP-1.3	Identify and evaluate properties within Kearny Mesa for potential historic significance, and preserve those found to be significant under local, state or federal designation criteria. Particular consideration should be given to the properties identified in the Study List contained in the Kearny Mesa Community Planning Area Historic Context Statement.
HP-1.4	Complete a Reconnaissance Survey of the Community Planning Area based upon the Kearny Mesa Community Planning Area Historic Context Statement to assist in the identification of potential historic resources, including districts and individually eligible resources.
HP-1.5	Prepare a focused Historic Context Statement and Reconnaissance Survey regarding the Pan-Asian presence in Kearny Mesa once sufficient time has passed to determine whether or not this represents a significant theme in the development of Kearny Mesa or the city as a whole, and whether any potential resources may be eligible for designation as individual sites, a Multiple Property Listing, or a Historic District.
HP-1.6	Promote opportunities for education and interpretation of the Kearny Mesa community's unique history and historic resources through mobile technology (such as phone applications); printed brochures; walking tours; interpretative signs, markers, displays, and exhibits; and public art. Encourage the inclusion of both extant and non-extant resources.
HP-1.7	Conduct project-specific investigations in accordance with all applicable laws and regulations in order to identify potentially significant tribal cultural and archaeological resources.
HP-1.8	Ensure adequate data recovery and mitigation for adverse impacts to archaeological and Native American sites as part of new development; including measures to monitor and recover buried deposits from the prehistoric and historic periods, under the supervision of a qualified archaeologist and a Native American monitor.
