Science Village Mitigated Negative Declaration PTS No. 647676 / SCH No. N/A September 6, 2023

Subsequent to finalization of the Mitigated Negative Declaration (MND), dated June 12, 2023, revisions to the environmental document have been made. Specifically, Section 6.8 (Historical/Archaeological/Tribal Cultural Resources) Issue 2 and 3 have been revised to correct the box checked Less Than Significant Impact instead of Less Than Significant with Project-Level Mitigation Incorporated. The following revisions to the environmental document have been made and are reflected in a strikethrough and/or underline format.

lssue 2	2: Result in a substantial adverse change in the significance of a prehistoric or historic archaeological resource, a religious or sacred site, or the disturbance of any human remains those interred outside of formal cemeteries?					
Issue 3: Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:						
a.	Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k); or,					
b.	A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.					

These revisions made to the final MND do not affect the environmental analysis or conclusions of the MND. In accordance with the California Environmental Quality Act, Section 15073.5, recirculation is not required when new information is added which merely clarifies, amplifies, or makes insignificant modifications to the MND. An environmental document need only be recirculated when a new, avoidable significant effect is identified, or a new mitigation measure or project revision is required to reduce potential effects to less than significance.
