# Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment, Carmel Mountain Ranch Country Club, 14050 Carmel Ridge Road, San Diego California 92026 was prepared by Stantec Consulting Services Inc. (Stantec) for NUWI Country Club LLC. The material in it reflects Stantec's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Stantec accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

Geologic Project Specialist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

SUMMARY

April 11, 2018

## 1.0 SUMMARY

Stantec has completed a Phase I Environmental Site Assessment (ESA) for The Lakes, which consists of several parcels of real property occupied by Carmel Mountain Ranch Country Club and Golf Course located at 14050 Carmel Ridge Road, City of San Diego, County of San Diego, California (the "Property"), on behalf of NUWI Country Club LLC (the "Client"). The work was performed in accordance with the Master Services Agreement between New Urban West, Inc. and Stantec (the "MSA"). NUWI Country Club LLC (the "User") has been designated as the User of this report.

The Phase I ESA was conducted in conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13 and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM practice are described in Section 2.3.

The Property consists of approximately 121 acres of land developed with a golf course, club house area, and a maintenance building. The club house area consists of the main clubhouse building with a kitchen, dining area, pro shop, bridal suite, and a basement electrical golf cart maintenance and storage area. Immediately outside of the clubhouse is a small putting green, fenced driving range, associated asphalt parking area, and a cellular server building. Surrounding properties are primarily residential. A property location map is illustrated on Figure 1. A property plan illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

Stantec observed a two-stage grease trap located in the loading area west of the club house related to the kitchen. There are no reported issues or violations known associated with the grease trap. A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area there are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The grease trap is not considered an environmental concern to the Property; however, prior to redevelopment the grease trap will need to be properly removed per regulatory requirements. The clarifier is identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier as a result of maintenance activities.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E-1527-13 (and Final Rule 40 CFR Part 312 et seq.) with respect to the Property. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property with the exception of the following:

- Maintenance Building. A maintenance building used for servicing vehicles at the country club is located at the southeastern portion of the Property. The maintenance building has

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

SUMMARY

April 11, 2018

five service bays with one single-post in-ground hydraulic lift. Minor staining was observed around the in-ground hydraulic lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.

- **Golf Course Maintenance.** A storage room inside the maintenance building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; and a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water. Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.
- **Clubhouse Building Clarifier.** A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area there are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The clarifier is identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier, as a result of maintenance activities.
- **Former USTs.** The Property was listed in the environmental database report as having a former 500-gallon UST containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

Stantec identified the following de minimis conditions associated with the Property:

- **Soil Staining.** During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel in the southeast portion of the maintenance building. The ASTs appeared in good condition and located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

SUMMARY

April 11, 2018

condition with no visible cracks or staining. Dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations. Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.

INTRODUCTION

April 11, 2018

## 2.0 INTRODUCTION

The objective of this Phase I ESA was to perform appropriate inquiry into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-13. The purpose of this Phase I ESA was to identify adverse environmental conditions including recognized environmental conditions ("RECs") of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions ("HRECs"), and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

- (1) Due to any release to the environment;
- (2) Under conditions indicative of a release to the environment; or
- (3) Under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a REC that has occurred in connection with the property but has been addressed to the satisfaction of the applicable regulatory authority and meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional must determine whether the past release is a REC when the current Phase I ESA is conducted (for example, if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

*De minimis* conditions are not RECs. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. As indicated, the term REC does not include *de minimis* conditions, which generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

INTRODUCTION

April 11, 2018

This ESA was conducted in accordance with ASTM E 1527-13 and AAI. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform any independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this ESA Report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

- (1) Information that is publicly available;
- (2) Information that is obtainable from its source within reasonable time and cost constraints;  
and
- (3) Information that is practicably reviewable.

## 2.1 PROPERTY DESCRIPTION

The Property consists of approximately 121 acres of land developed with a golf course, club house area, and a maintenance building. The club house area consists of the main clubhouse building with a kitchen, dining area, pro shop, bridal suite, and a basement electrical golf cart maintenance and storage area. Immediately outside of the clubhouse is a small putting green, fenced driving range, associated asphalt parking area, and a cellular server building. Surrounding properties are primarily residential. A property location map is illustrated on Figure 1. A property plan illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

## 2.2 SPECIAL TERMS, CONDITIONS, AND SIGNIFICANT ASSUMPTIONS

There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

## 2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

INTRODUCTION

April 11, 2018

uncovered all potential and actual liabilities and conditions associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. (40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information.) Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

This report relates solely to the specific project for which Stantec was retained and the stated purpose for which this report was prepared and shall not be used or relied upon by the client identified herein for any variation or extension of this project, any other project, or any other purpose.

This report has been prepared for the exclusive use of NUWI Country Club LLC, New Urban West Inc., and their respective assigns and designees, and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the site conditions encountered by Stantec at the time the work. Accordingly, additional studies and actions may be required. As the purpose of this report is to identify selected site conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the site is beyond the scope of this assessment. The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the site which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. Issues raised by the report should be reviewed by client legal counsel.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

INTRODUCTION

April 11, 2018

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

## 2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP).

USER-PROVIDED INFORMATION  
April 11, 2018

### 3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire	Yes	The completed user questionnaire was provided and included in Appendix D.
Environmental Liens or Activity Use Limitations	Yes	The user provided an amended preliminary title report for the Property dated February 22, 2018. No environmental liens or activity use limitations were identified within the title report.
Previous Environmental Permits or Reports Provided by User	No.	No previous reports or permits for the Property were provided by the user.
Purpose of the Phase I ESA	Yes	Due diligence.

RECORDS REVIEW  
April 11, 2018

## 4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area, in order to evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the Property's first developed use. Stantec's research included the reasonably ascertainable and useful records described in this section.

### 4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections.

Topography:	The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018).
Soil/Bedrock Data:	The vicinity of the Property consists of recent alluvium and floodplain deposits which are underlain by the sandstone and conglomerates of the Mission Valley Formation (CDMG, 1965).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	According to the Site Assessment Report, Site Conceptual Model, and Corrective Action Plan report dated November 13, 2007 for the Shell Service Station located approximately 500 feet to the north of the Property, depth to groundwater ranges between 17.25 and 20.72 feet below ground surface (bgs) with a groundwater flow direction to the north.
<i>Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.</i>	

#### 4.1.1 Property Topography and Surface Water Flow

The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018). Surface runoff is expected to follow the topography, which is variable throughout the Property.

#### 4.1.2 Regional and Property Geology

The Property is located in San Diego County. The area is located within the Peninsular Ranges Geomorphic Province, which includes northwest-southeast trending mountain ranges and valleys

RECORDS REVIEW  
April 11, 2018

that have been developed by the San Andreas Fault system (California Geological Survey [CGS], 2002). The stratigraphy underlying the Property consists of recent alluvium and floodplain deposits which are underlain by the sandstone and conglomerates of the Mission Valley (CDMG, 1965).

#### 4.1.3 Regional and Property Hydrogeology

The Property is located within the Poway Hydrologic Area of the Penasquitos Hydrologic Unit (906.2) within the San Diego Region of the State of California Regional Water Quality Control Board Hydrologic Basin Planning Area (SA 9.00). Lake Hodges is located approximately 5 miles to the north of the Property.

According to the Site Assessment Report, Site Conceptual Model, and Corrective Action Plan report dated November 13, 2007 for the Shell Service Station located approximately 500 feet to the north of the Property, depth to groundwater ranges between 17.25 and 20.72 feet below ground surface (bgs) with a groundwater flow direction to the north.

#### 4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix B.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

##### 4.2.1 Listings for Property

The Property was listed as AT&T Mobility in the San Diego Co. HMMD and SWEEPS UST databases, as Carmel Mountain Ranch Country in the HAZNET database, and as Verizon Wireless: Carmel Mountain Country Club in the FINDS database. The AT&T listings for the Property in the environmental databases are regarding the historical presence of a single 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993, and the handling and storage of lead-acid batteries, dated in 2017. The environmental database report reference the San Diego Department of Environmental Health case number DEH2014-HUPFP-001141, DEH2016-HCHEM-0124052, and 68476-34-6. The report also references the APN 313-043-09-00, which correlates to a cellular server structure located in the parking area of the clubhouse located on the Property. No other information is listed in the environmental database report regarding the UST and lead-acid batteries. The Carmel Mountain Ranch listing refers to the handling and disposal of 1.0425 tons of "unspecified oil-containing waste" in 1998. This is likely in reference to the grease trap and two-stage clarifier observed during the Property visit. The Verizon

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

RECORDS REVIEW

April 11, 2018

Wireless listing is in reference to the communications building observed in the clubhouse parking area. No details are listed under the FINDS listing.

Based on records obtained from the SDCDEH, the 500-gallon double walled gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

#### 4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions to pose a REC, CREC, or HREC for the Property.

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases does or does not create a REC for the property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Sun Valet Service 11965 Meriden Lane, San Diego, CA	EDR Hist Cleaner	1006 feet southeast	No
This facility is listed as being a historical dry cleaner operator from 2000 through 2005. The address listed for the business is for a residence. No other information is listed. Due to the address being related to a residence and not for a commercial property, and the distance of the facility being over 1,000 feet from the Property, Stantec considers this listing unlikely to represent a REC to the Property. Therefore, Stantec recommends no further investigation related to this listing.			
KC-130 Refuel Hose Mishap 13891 Fontanelle Place San Diego, CA	FINDS, SLIC	1457 feet south	No
A refueling hose for a military aircraft stationed at Marine Corps Air Station (MCAS) Miramar detached during a local flight on October 2, 2010. A portion of the hose landed on the roof of a house in the Carmel Mountain Ranch neighborhood of the City of San Diego. Residual jet fuel (JP-5) in the three-inch diameter hose was			

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

RECORDS REVIEW  
April 11, 2018

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
released to the side-yards of the residences at 13885 and 13891 Fontanelle Place. Excavation activities and confirmation sampling was performed at these locations, and a total of approximately 65 cubic feet of soil was removed. This case received regulatory closure from the San Diego DEH in 2010. Due to the nature of the listing being very limited, and the case receiving regulatory closure, Stantec considers this listing unlikely to represent a REC to the Property. Therefore, Stantec recommends no further investigation related to this listing.			

The remaining listings in the database search report provided in Appendix C do not constitute a REC for the Property.

#### 4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,

<p>San Diego County Department of Environmental Health (SDCDEH) 5500 Overland Avenue #170 San Diego, CA 92123 (619) 338-2222</p>	<p>Stantec submitted a request to SDCDEH regarding files for the Property. Based on records obtained from the SDCDEH, the 500-gallon double walled gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.</p> <p>Additional records available included inspection reports for the AT&amp;T and Verizon Wireless Communication tower, and the Carmel Mountain Ranch Country Club. No violations were reported in the inspection reports.</p> <p>Copies of the records are provided in Appendix D.</p>

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

RECORDS REVIEW  
April 11, 2018

4.3.2 Regional Water Quality Control Board

Agency Name Contact Information	Finding
Regional Water Quality Control Board (RWQCB) – San Diego Region 2375 Northside Drive, Suite 100 San Diego, CA 92108 (619) 516-1990 <a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>	Stantec submitted a request to RWQCB regarding files for the Property. According to agency correspondence, no records are available for the Property.  Additionally, Stantec searched for available records on the RWQCB's online database Geotracker. No records were available for the Property address
Department of Toxic Substances Control (DTSC) 2375 Northside Drive, Suite 100, San Diego, California 92108	Stantec submitted a request to DTSC regarding files for the Property. A letter was received from this agency, dated March 27, 2018, indicating that no records exist for the Property address at this agency.  Additionally, Stantec searched for available records on the DTSC's online database Envirostor. No records were available for the Property address.

4.3.3 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of San Diego Development Services Department 1222 First Avenue, 2 <sup>nd</sup> Floor San Diego, California 92101	Stantec reviewed available records for the Property at the City of San Diego Development Services Department. These records indicated several different addresses related to the Property. After a thorough review, the address of 14050 Carmel Ridge Road had multiple documents titled Hazardous Materials Questionnaire and indicated the presence of an underground storage tank (UST) containing either gasoline or diesel. No other documents were identified confirming the presence of the UST at this agency. Other permitting documents were on file related to the construction of the club house at this address.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Stantec was provided with a preliminary title report for the Property from New Urban West, Inc. prepared by First American Title Company dated March 02, 2018. A copy of the title report is provided in Appendix D. Stantec identified no environmental liens associated with the Property.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

RECORDS REVIEW  
April 11, 2018

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1939	1" = 1250'	The Property and surrounding area appears undeveloped land. An area to the southeast of the Property appears to be cleared but the use of this area is indiscernible due to the scale of the photograph.
1949	1" = 1250'	The Property and surrounding area appears largely similar to the previous photograph. A road is present to the west of the Property, in the location of present-day Interstate-15.
1953 1964	1" = 1250'	The Property and surrounding area appears similar to the previous photograph. A single access road is visible in the area of the Property, leading to what appears to be a small quarry. Minor development is observable west of Interstate-15.
1967	1" = 1250'	The Property and surrounding area appears to be undeveloped. There appear to be unpaved access roads and trails in the area of the Property. New development is observable west of Interstate-15.
1970	1" = 1250'	The Property and surrounding area appears to be undeveloped. There appear to be unpaved access roads and trails in the area of the Property. The area west of Interstate-15 appears mostly developed.
1979	1" = 1250'	The Property and surrounding area appears similar to the previous photograph.
1985	1" = 1250'	The Property and surrounding area appears to be under development. The area west of Interstate-15 appears fully developed.
1989	1" = 1250'	The Property appears to be developed as a golf course and country club. Immediately adjacent properties are developed with residential houses. Nearby property appears to be under development as a residential neighborhood, with what appears to a commercial development north of the Property.
1996 2002 2005 2010 2014	1" = 1250'	The Property is fully developed with the country club, and the surrounding residences are fully developed. Commercial development is present north of the Property. Minor changes are observable in the surrounding area throughout the years, but the area is largely unchanged from 1996 to 2014.

EDR, 2018

The Property and adjacent land have been historically undeveloped land until circa 1985. At this time, development of the gold course, country club, and nearby Carmel Ridge neighborhood

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

RECORDS REVIEW  
April 11, 2018

began. No RECs were identified from the historical aerial photography of the Property and surrounding area.

Copies of the historical aerial photographs are located in Appendix C.

#### 4.4.3 City Directories

Stantec reviewed the historical city directory abstract provided by EDR. City directories were available from 1903 until 2014. The following is a summary of Stantec's review of the city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Property: 14050 Carmel Ridge Road	2014	Club Mr Boutique
Property: 14050 Carmel Ridge Road	2010 – 2014	Pacs Enterprises LLC
Property: 14050 Carmel Ridge Road	2000 - 2006	Carmel Mtn Ranch Country Club
Property: 14050 Carmel Ridge Road	1991-1995	Maintenance / Gold Course Pro Shop / Clubhosue
Property: 11747 Cedarhurst Lane	--	Not listed
Property: 11730 Boulton Avenue	--	Not listed
Property: 14424 Highland Ranch Road	--	Not listed
Property: 14404 Highland Ranch Road	--	Not listed
Property: 12153 Ted Williams Parkway	--	Not listed
Property: 12107 Ted Williams Parkway	--	Not listed
Property: 12253 Ted Williams Parkway	--	Not listed

Name of city directories and source: EDR, 2018

Addresses for the surrounding area were listed primarily as residential properties. No RECs were identified in the city directories. A copy of the complete City Directory Abstract is provided in Appendix C.

RECORDS REVIEW  
April 11, 2018

#### 4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, there is no coverage for the Property. The Sanborn® Map Search Report is presented in Appendix C.

#### 4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps of the Property vicinity to help identify past Property usage and areas of potential environmental concern.

Stantec identified no additional RECs based on its review of the topographic maps. Copies of the historical maps are provided in Appendix C. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1903 1930	1:62,500	The Property and surrounding area appears to be undeveloped; however, given the scale, no Property detail is visible. There appears to be two roads in the area, transecting from southwest to northeast, but no identifying descriptions are provided on the map.
1942	1:24,000	The Property and surrounding area is depicted as undeveloped. Chicarita Creek is shown to the west of the Property, with an unpaved, unnamed road. Highway-395 is shown east of the Property.
1952	1:24,000	The Property and surrounding area remains undeveloped. A "Gravel Pit" and access road is depicted in the area of the Property. A new highway is shown to the west of the Property and is now identified as Highway-395. The highway located east of the Property, formerly identified as Highway-395, now has no identifying marks.
1967	1:24,000	The Property and surrounding area appears similar to the previous map. Minor development has occurred west of the highway west of the Property. Some development has occurred along the road east of the Property and is now identified as Pomerado Road.
1975	1:24,000	The Property appears similar to the previous topographic map. New development is depicted along each of the nearby highways, shown as a purple shading.
1996 2012	1:24,000	The Property and surrounding area is fully developed with the present-day configuration.

USGS via EDR, 2018

RECORDS REVIEW

April 11, 2018

#### 4.4.6 Other Historical Sources

Stantec did not review any additional historical sources for the Property.

PROPERTY RECONNAISSANCE  
April 11, 2018

## 5.0 PROPERTY RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Joshua Sargent, Geologic Project Specialist with Stantec, on March 30, 2018. Access to the Property was provided by Mr. Jonathan Frankel with New Urban West, Inc. Mr. Frankel coordinated access to the Property with the Property Owners. Stantec was accompanied by Mr. Frankel and Mr. Kevin Hwang, Property owner, during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of the shallow soil samples. Photographs collected during the Property visit are included in Appendix A.

### 5.1 PROPERTY RECONNAISSANCE METHODOLOGY

The Property reconnaissance focused on observation of current conditions and observable indications of past uses and conditions that may indicate the presence of RECs. The Property reconnaissance was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across the Property.
- Traverse the periphery of all structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related property access restrictions encountered during the reconnaissance visit.

### 5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located in a mixed residential and commercial area of northern San Diego City, California. The majority of the country club is bordered with residential development, with commercial retail located to the northwest of the Property.
Property Operations:	The Property is currently occupied by an operating country club and golf course. The Property is bordered with residential properties.
Structures, Roads, Other Improvements:	An asphalt driveway at 14050 Carmel Ridge Road leads to a large parking lot that <b>serves as the country club's clubhouse</b> . The clubhouse is three stories and is used as a pro shop, kitchen and dining area, guest check-in, bridal suite, and an electric golf cart service area in the partial basement area. Three temporary trailers are located in the southwestern portion of the southwestern portion of the parking lot and serve as auxiliary county club offices. A single-story masonry structure is located adjacent to these

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PROPERTY RECONNAISSANCE

April 11, 2018

	temporary trailers and is utilized by a communications company as a server building with a backup generator. No access was provided for this communications building. A maintenance building used for servicing vehicles used at the country club is located at the southeastern portion of the Property. The maintenance building has five service bays with one single-post in-ground hydraulic lift. A storage room inside this building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water; a dispenser island with one 500-gallon AST containing gasoline and one 500-gallon AST containing diesel. A suspect concrete patch was noted in the parking area of the maintenance building, possibly related to a former underground storage tank (UST).
Property Size (acres):	Approximately 121 acres
Estimated % of Property Covered by Buildings and/or Pavement:	5%
Observed Current Property Use/Operations:	Operating country club.
Observed Evidence of Past Property Use(s):	Golf course, club house, and maintenance shop.
Sewage Disposal Method (and age):	City sewer system.
Potable Water Source:	City of San Diego.
Electric Utility:	SDG&E

### 5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	Various greases and cleaners were noted in the electric golf cart maintenance area located in the basement of the clubhouse. A "chemical shed" was observed near the maintenance building and housed various pesticides. Two 500-gallon ASTs were observed southeast of the maintenance building within a concrete secondary containment. These ASTs contained gasoline and diesel. Small containers of various greases and other lubricants were observed inside the maintenance building.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PROPERTY RECONNAISSANCE

April 11, 2018

Observations	Description/Location
Drums (≥ 5 gallons):	Multiple drums were located inside of the maintenance building. A list of these drums and their contents are as follows: <ul style="list-style-type: none"> <li>• (1) 55-gallon drum of used motor oil</li> <li>• (1) 55-gallon drum of used antifreeze</li> <li>• (1) 55-gallon drum of used oil filters</li> <li>• (1) 55-gallon drum of eco animal-based solvent with a metal sink and pump attached to the top</li> </ul>
Strong, Pungent, or Noxious Odors:	None detected.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	Stantec observed three pad mounted transformers near the clubhouse building. A pad mounted transformer was also observed east of the maintenance building. All transformers appeared to be in good condition with no leaks or staining present. They do not represent an environmental concern to the Property.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

#### 5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors at the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	According to the Property owner, the club house is cooled and heated through multiple roof-mounted HVAC systems, and one concrete-mounted HVAC system located outside of the clubhouse.
Surface Stains or Corrosion:	Surface stains were noted in the basement electric golf cart maintenance area. Additional surface staining was observed in the maintenance building near drum storage areas.
Floor Drains and Sumps:	Approximately eight (8) floor drains were observed in the basement electric golf cart maintenance and storage area, with one floor drain located in the wash area close by. Approximately five (5) floor drains were noted in the kitchen of the clubhouse. No floor drains were observed in the maintenance building; however, a large drain was observed outside of the maintenance building with the surrounding concrete stained green from fertilizer.
Other Interior Observations:	Due to site access limitations, Stantec was unable to observe the interior of the communications building located in the southern

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PROPERTY RECONNAISSANCE

April 11, 2018

Observations	Description
	part of the clubhouse parking lot. According to signage on the exterior of this building, there appears to be a diesel fuel tank located inside, likely used in conjunction with a backup generator.

### 5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-Property Pits, Ponds, or Lagoons:	Stantec observed a small pond on hole number 11. Additional water crossings are present throughout the course; however, at the time of the Property visit, these water features were dry.
Stained Soil or Pavement:	Stantec observed minor staining adjacent to the gasoline and diesel ASTs located south of the maintenance building.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	No areas indicative of solid waste disposal were observed.
Potential Areas of Fill Placement:	No mounds, piles or depressions suggesting the placement of old fill material were observed on the Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	No storm water was present during the Property visit. Stormwater is expected to infiltrate through unpaved areas of the Property, and, where applicable, flow over hardscaped surfaces to the local drain and gutter system.
Wells:	No wells were observed.
Septic Systems:	Stantec observed a grease trap in the loading bay area along the west side of the club house. It appears this grease trap is connected the sewer system.
Other Exterior Observations:	Multiple cellular antennas were observed on the exterior of the club house.

### 5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the Property reconnaissance.
Former USTs:	The Property was listed in the environmental database report as having a former 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PROPERTY RECONNAISSANCE  
April 11, 2018

	<p>the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.</p>
<p>Other Underground Structures:</p>	<p>Stantec observed a two-stage grease trap located in the loading area west of the club house related to the kitchen. There are no reported issues or violations known associated with the grease trap. Additionally, a two-stage clarifier was observed east of the club house, related to the electric golf cart wash area. There are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The grease trap is not considered an environmental concern to the Property; however, prior to redevelopment the grease trap will need to be properly removed per regulatory requirements. The clarifier is identified as an REC to the Site due to the potential that oils and solvents could have been released into this structure.</p> <p>Stantec also observed a single-post in-ground hydraulic lift located within the maintenance building. Minor staining was observed around this lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.</p>

## 5.7 ABOVEGROUND STORAGE TANKS

<p>Existing ASTs:</p>	<p>Stantec observed a 500-gallon diesel and a 500-gallon gasoline aboveground storage tanks with a concrete secondary containment located southeast of the maintenance building. Additionally, Stantec observed a 1,000-gallon fertilizer and water tank located east of the maintenance building. Stantec observed the a 100-gallon tractor hydraulic fluid and a 100-gallon new oil ASTs located inside the maintenance building.</p>
<p>Former ASTs:</p>	<p>No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.</p>

## 5.8 ADJOINING PROPERTIES

### 5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PROPERTY RECONNAISSANCE  
April 11, 2018

NORTH	Residential.
SOUTH	Residential.
EAST	Residential.
WEST	Residential.

Refer to Figure 2.

### 5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

### 5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining properties:

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

## 5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018).
--	--

INTERVIEWS  
April 11, 2018

## 6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and contact information	Relationship to Property	Key findings:
Mr. Kevin Hwang	Owner	Mr. Hwang is familiar with the Property for the past 15 years. Mr. Hwang indicated that the gold course was developed in 1984 and the club house was developed in circa 1986. This information is consistent with findings from permitting in that time period. Mr. Hwang was unaware and had no knowledge of historical USTs being located on the Property.

EVALUATION  
April 11, 2018

## 7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

### 7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data review, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

Finding 1: An environmental records search was performed and identified sites within their respective ASTM E 1527-13 search radii of the Property that may represent RECs, HRECs, or *de minimis* conditions.

Opinion 1: Based on one or more of the following reasons: distance from the Property, position of sites with respect to assumed groundwater flow direction, the native soils, and regulatory status, none of the nearby sites identified in the environmental records search report represents an environmental concern to the Property. The environmental records search identified no RECs, HRECs or *de minimis* conditions at or near the Property.

Finding 2: The Property was listed in the environmental database report as having a former 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required.

Opinion 2: The former UST is considered an REC to the Property. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST.

Finding 3: Stantec observed a two-stage clarifier was observed east of the club house, related to the electric golf cart wash area. There are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

EVALUATION  
April 11, 2018

- Opinion 3: The clarifier is considered an REC to the Property. The clarifier will need to be properly removed per regulatory requirements. Soil samples should be collected at that time to verify no impact exists that would require remedial action.
- Finding 4: During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel southeast of the maintenance building. The ASTs appeared in good condition located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good condition with no visible cracks or staining, dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations.
- Opinion 4: Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.
- Finding 5: During the site visit, Stantec identified the presence of a single-post in-ground hydraulic lift located within the maintenance building in the southeastern portion of the Property. Oil staining was observed around the piston of the lift.
- Opinion 5: Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.
- Finding 6: During the site visit, Stantec identified the presence of a chemical storage shed located east of the maintenance building containing pesticide products used throughout the Property.
- Opinion 6: Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.
- Finding 7: During the site visit, Stantec identified a floor drain with visible staining on the surrounding concrete located southeast of the maintenance building.
- Opinion 7: Although the staining was determined to be related to fertilizer disposal, it is anticipated that other chemicals have been disposed of at this location. Therefore, Stantec has identified this feature as a potential REC to the Property and suggests performing an assessment at this located for the presence of other chemicals of concern.

## 7.2 DATA GAPS

The federal AAI rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

EVALUATION  
April 11, 2018

Gap	Discussion
Deletions or Exceptions From Scope of Work Referenced in Section 1.4:	None
Weather-Related Restrictions To Property Reconnaissance:	None
Facility Access Restrictions to Property Reconnaissance:	Stantec was unable to access the interior of the Verizon Wireless building located in the parking area of the club house. A sign posted on the door indicated that the building stored diesel fuel. It is unknown if the fuel is contained aboveground or underground.
Other Property Reconnaissance Restrictions:	None
Data Gaps From Environmental Records Review:	None
Data Gaps From Historical Records Review:	None
Data Gaps From Interviews:	None
Other Data Gaps:	None

### 7.3 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E-1527-13 (and Final Rule 40 CFR Part 312 et seq.) with respect to the Property. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property with the exception of the following:

- **Maintenance Building.** A maintenance building used for servicing vehicles used at the country club is located at the southeastern portion of the Property. The maintenance building has five service bays with one single-post in-ground hydraulic lift. Minor staining was observed around the in-ground hydraulic lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.
- **Golf Course Maintenance.** A storage room inside the maintenance building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; and a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water. Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.
- **Maintenance Building Clarifier.** A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area. There are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The clarifier is

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

EVALUATION  
April 11, 2018

identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier, as a result of maintenance activities.

- Former USTs. The Property was listed in the environmental database report as having a former 500-gallon UST containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

Stantec identified the following de minimis conditions associated with the Property:

- Soil Staining. During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel in the southeast portion of the maintenance building. The ASTs appeared in good condition and located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good condition with no visible cracks or staining. Dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations. Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.

NON-SCOPE CONSIDERATIONS  
April 11, 2018

## 8.0 NON-SCOPE CONSIDERATIONS

No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA with the following exceptions:

### 8.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows: maximum risk is from paint applied before 1950.

- There is severe risk from paint applied before 1960.

- There is moderate risk from deteriorated paint applied before 1970.

- There is slight risk from the paint that is intact but applied before 1977.

- The condition of the painted surfaces.

- The presence of children and certain types of households in the building.

- Previously reported cases of lead poisoning in the building or area.

Due to the age of the structures (constructed circa 1985), LBP is unlikely to be present at the Property in the main clubhouse and nearby structures.

### 8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is an Asbestos Containing Material (ACM) that can be reduced to powder by hand pressure. Friable asbestos can become airborne and be inhaled, and has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

NON-SCOPE CONSIDERATIONS  
April 11, 2018

Stantec makes no warranty as to the possible existence or absence of inaccessible materials or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition, in order to determine the need for compliance with EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

Given the age of the existing buildings on the Property (circa 1985), the presence of ACM is considered unlikely.

### 8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA (<http://www.epa.gov/radon/zonemap.html>) on average indoor radon concentrations in the vicinity of the Property.

Zip Code 92128	San Diego County
EPA Radon Zones (w/Average Measured Indoor Radon concentrations)	
100% below 4 pCi/L	Zone 3 – low (<2 pCi/L); average first floor concentration 0.400 pCi/L
Normally-occupied sub grade areas (i.e. basement apartments, offices, stores, etc.)?	
A partial basement is present under the club house and it utilized for the storage, charging, maintenance, and cleaning of the electric golf carts use on the Property.	

The Property is located in Zone 3 and is considered to have low potential for radon. Stantec concludes that radon is unlikely to represent an environmental concern to the Property and recommends no further investigation regarding this issue.

### 8.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the Property is not located within a 100-year or 500-year flood plain. Stantec also searched the FEMA flood plain map service at [www.msc.fema.gov](http://www.msc.fema.gov) and the Property is not located in a flood plain.

NON-SCOPE CONSIDERATIONS

April 11, 2018

8.5 DRY-CLEANING OPERATIONS

No dry-cleaning operations were reported or observed at or near the Property.

PHASE I ENVIRONMENTAL SITE ASSESSMENT, CARMEL MOUNTAIN RANCH COUNTRY CLUB,  
14050 CARMEL RIDGE ROAD, SAN DIEGO CALIFORNIA 92026

PHOTOGRAPHS  
OF THE  
PROPERTY AND  
VICINITY

**Photo #1** View of clubhouse from parking area located at 14050 Carmel Ridge Drive.

**Photo #2** View of exterior of clubhouse. This view shows the pro shop and a partial view of the bridal suite.

**Photo #3** View of grease trap located in the loading bay area near the kitchen of the clubhouse.

**Photo #4** View of floor drain and household cleaners in loading bay area near the kitchen.

**Photo #5** View of remodeling area in the restroom and locker room area of the clubhouse. The remodeling is a result of water flooding damage.

**Photo #6** View of dining area in clubhouse.

**Photo #7** View of pro shop located in the ground floor of the clubhouse.

**Photo #8** View of bridal suite located on the ground floor of the clubhouse.

**Photo #9** View of electric golf cart storage area located in the partial basement of the clubhouse.

**Photo #10** Alternate view of electric golf cart storage area located in the partial basement of the clubhouse.

**Photo #11** View of electric golf cart maintenance area located in the partial basement of the clubhouse.

**Photo #12** View of electric golf cart wash area located in the partial basement of the clubhouse.

**Photo #13** View of two-stage clarifier unit located near the electric golf cart wash area located on the west side of the clubhouse.

**Photo #14** Overview look of kitchen area located inside of the clubhouse on the ground floor.

**Photo #15** View of floor drain located in the kitchen area within the clubhouse.

**Photo #16** View of walk-in refrigerator located within the kitchen area inside the clubhouse.

**Photo #17** View of gasoline and diesel ASTs located southeast of the maintenance building.

**Photo #18** View of gasoline and diesel AST secondary containment. Minor staining observed on the concrete secondary containment.

**Photo #19** View of pesticide storage shed, and fertilizer/water AST, located east of the maintenance building.

**Photo #20** Close-up view of pesticide storage shed.

**Photo #21** View of chemicals stored inside pesticide shed.

**Photo #22** Close-up view of fertilizer/water AST. Minor staining visible on ground near the AST.

**Photo #23** View of fertilizer storage room located in the eastern portion of the maintenance building.

**Photo #24** Interior view of fertilizer storage area. This room was previously used for cellular communications equipment.

**Photo #25** Exterior view of maintenance building.

**Photo #26** View of flammable materials cabinet located in the eastern bay of the maintenance building. Minor staining observed beneath the cabinet.

**Photo #27** View of equipment stored in the eastern bay of the maintenance station. Minor staining visible on concrete in this area is associated with leaking equipment.

**Photo #28** View of a machinist lathe located in the maintenance shop. Flooring located beneath the lathe was observed to be heavily stained with gear lubricant.

**Photo #29** View of waste oil, waste antifreeze, waste oil filters, and waste absorbent drums located within the maintenance building. The waste oil and waste anti-freeze drums are located within a secondary containment unit, while the waste oil filters and waste absorbent drums are stored on bare flooring.

**Photo #30** View inside secondary containment unit for the drums. Free liquid was observed in the bottom on the secondary containment unit.

**Photo #31** View of a single-post in-ground hydraulic lift centrally located within the maintenance building. Surface staining was visible around the piston of the lift.

**Photo #32** View of compressor located along the back wall inside the maintenance building. Minor staining was observed in the area of the compressor unit.

**Photo #33** View of 100-gallon tractor hydraulic fluid AST, 100-gallon new oil AST, animal-based solvent wash station with sink, and 55-gallon drum of granular absorbent. No secondary containment was observed for these features.

**Photo #34** View of 5-gallon buckets of lubricants, oils, and greases. These containers are stored on a secondary containment unit.

**Photo #35** View of office space located in the western portion of the maintenance building.

**Photo #36** View of locker room and break room located in the western portion of the maintenance building.

**Photo #37** View of drain located southeast of the maintenance building. Green staining was visible on the concrete surrounding this drain.

**Photo #38** View of wood pile located east of the maintenance building.

**Photo #39** View of miscellaneous equipment stored east of the maintenance building.

**Photo #40** View of cellular infrastructure located east of the maintenance building. This equipment appears to be electrical-based only.

**Photo #41** View of suspect concrete patch located southeast of maintenance building.

**Photo #42** Exterior view of Verizon Wireless building located in the southwestern portion of the clubhouse parking lot.

**Photo #43** Exterior view of Verizon Wireless building located in the southwestern portion of the clubhouse parking lot.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 7 RCRA-LQG sites within approximately 1.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 8 RCRA-SQG sites within approximately 1.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are

## EXECUTIVE SUMMARY

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 5 ENVIROSTOR sites within approximately 2 miles of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 12 SLIC sites within approximately 1.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 1.25 miles of the target property.

### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 SWEEPS UST sites within approximately 1.25 miles of the target property.

### **Records of Emergency Release Reports**

HMIRS: The Hazardous Materials Incident Report System contains hazardous material spill incidents reported to the Department of Transportation. The source of this database is the U.S. EPA.

A review of the HMIRS list, as provided by EDR, and dated 01/19/2018 has revealed that there is 1 HMIRS site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 1.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/21/2018 has revealed that there are 76 FINDS sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2016 has revealed that there are 139 HAZNET sites within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 1.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 1.125 miles of the target property.

### EDR RECOVERED GOVERNMENT ARCHIVES

#### *Exclusive Recovered Govt. Archives*

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 15 RGA LUST sites within approximately 1 mile of the target property.

Carmel Mountain Ranch neighborhood of the City of San Diego. Residual jet fuel (JP-5) in the three-inch-diameter hose was released to the side-yards of the residences at 13885 and 13891 Fontanelle Place. Emergency response contractors removed a combined total of approximately 60 cubic feet of soil and landscaping materials (i.e., gravel and weed abatement fabric) observed to be stained by JP-5. Six soil samples were collected from the yards and analyzed for total petroleum hydrocarbons (TPH) as JP-5 and volatile organic compounds (VOCs). JP-5 was detected in one of the samples collected adjacent to a fence-line between the residential lots at a concentration of 155 milligrams per kilogram (mg/kg). TPH was not detected in the remaining five samples and VOCs were not detected in any of the samples. On October 12, 2010, additional soil was removed from the location of the sample in which JP-5 was detected. Approximately two cubic feet of soil were excavated. Three confirmation samples were collected from the sides and base of the excavation. JP-5 was detected in one of the confirmation samples at a concentration of 13.4 mg/kg. The sample was collected at the base of the excavation from a depth of 1.5 below the ground surface. Soil and landscaping materials removed from the site were placed in a roll-off bin and transported to MCAS Miramar pending sample analytical results. The soil was then transported offsite to a licensed disposal facility. The site is located in a beneficial use area; however, the nearest production well is located 4,775 feet to the northwest and is used for golf course irrigation. Due to the absence of VOCs in the soil samples, the low levels of TPH detected, the removal of the impacted materials, the lack of surface water and/or groundwater receptors, and the lack of risk to human health, DEH concurs that no further action is necessary at the site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 RB Case Number: Not reported  
 Local Agency: SAN DIEGO COUNTY LOP  
 File Location: Local Agency  
 Local Case Number: H32744-001  
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil  
 Potential Contaminants of Concern: Gasoline  
 Site History: In December 2003, soil samples were collected under the direction of DEH during dispenser and product piping upgrade activities. Based on laboratory data, Case H32744-001 was opened on April 12, 2004. During upgrade activities, approximately 82 cubic yards of soil was removed from the site. Between August 2004 and June 2007, six soil borings were advanced and five groundwater monitoring wells were installed. At total of 91 soil samples were collected for analysis to define the vertical and horizontal extent of soil contamination. The chemicals of concern in soil were MTBE and TBA. The highest concentration for TPHg was reported at 1.1 mg/kg. BTEX concentrations were report below laboratory detection limits. The consultant concluded that soil contamination is defined vertically and horizontally and has not migrated offsite. The consultant also stated that residual MTBE and TBA in soil do not pose a risk to human health, nearby sensitive receptors, or the environment. The groundwater was monitored and sampled for 19 consecutive quarters beginning in June 2005. Dissolved-phase benzene concentrations have been below the MCL in all wells since October 2007. Dissolved-phase MTBE concentrations have been below the secondary MCL in all wells since January 2008. Dissolved-phase TBA concentrations are currently above the State

Action Level (AL) in wells MW-1 (52 ug/l), MW-3 (190 ug/l), and MW-5 (730 ug/l) and are showing a decreasing trend. The consultant estimates TBA will reach the AL by 2019. Based on the data, the consultant concluded that groundwater contamination has been adequately defined and does not pose a risk to human health, nearby sensitive receptors, or the environment. Based on available data, DEH concurs with the consultants conclusions.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Local Case Number: H29570-002  
Potential Media Affect: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Gasoline  
Site History:

Please see "Site Documents" for additional information. The site consists of the combined Carmel Mountain Ranch Car Wash and Chevron gasoline service station, constructed in 1990. A convenience store building is also located on the property. This case (H29570-002) was opened in August 2002 after fuel-related contamination was reported in soil samples collected below dispensers during a product piping upgrade. A Voluntary Assistance Program (VAP) case (H29570-001, currently being considered for closure) had previously been opened in August 2001 at the site to address potential health risks from contaminated soil/soil vapors associated with a chlorinated solvent release at the dry cleaning facility previously located on the adjacent property to the north (11040 Rancho Carmel Drive). Limited soil and soil gas investigations conducted from 1998-2000 indicated that dissolved chlorinated volatile organic compounds (VOCs) had migrated to the property from the dry cleaners site. Closure of this case applies only to the contamination associated with the unauthorized release of petroleum products at the car wash site. The Regional Water Quality Control Board (RWQCB) is overseeing the assessment and mitigation of the adjacent site release (Former Marstons Cleaners) under Case 2090006 (H25987-001). However, because several of the downgradient monitoring wells installed for the chlorinated solvent release are located on the car wash property, data from these wells (MW-3, MW-4, MW-5, and MW-9) are included in the car wash site characterization. Elevated concentrations of trichloroethene (TCE), perchloroethene (PCE), and chlorinated by-products are present in several of the wells located in the northern portion of the car wash site. Petroleum hydrocarbon contaminants were reported in soil samples collected below the eight dispensers and piping during an April 2002 piping upgrade at the site. Benzene was not detected in any of the samples, but elevated concentrations of toluene, ethylbenzene, and xylenes were detected in the sample collected approximately 5.5 feet below one dispenser (D1). Methyl tertiary butyl ether (MTBE) was detected only in the sample collected below the dispenser (D2) adjacent to D1. Petroleum hydrocarbon contaminant concentrations in the remaining dispenser/piping soil samples were very low or below detection limits. In May 2002, approximately 36 tons of petroleum

hydrocarbon-impacted soil was excavated from the D1/D2 dispenser area and disposed of at an off-site facility. Subsequently, four soil borings were installed in the dispenser area in November 2004. Total petroleum hydrocarbons as gasoline (TPH-g) was not detected in the soil boring samples, but MTBE (only) was detected in soil samples collected from each boring for VOCs analysis. The consultant concluded that the source of benzene, toluene and MTBE from leaking pipes and/or dispensers had likely been removed. In May 2007, approximately 332 tons of chlorinated-solvent bearing soil was removed from an area along the northern portion of the site and the southern portion of the adjacent property as part of a remedial action for the dry cleaners site. Analytical results for soil vapor samples collected at the car wash site in 1998 and 2000 indicated the presence of elevated levels of PCE and TCE, along with lower concentrations of BTEX, MTBE, and other chlorinated VOCs. The highest PCE and TCE concentrations were detected in samples collected near the northern border of the property. DEH reviewed the risk assessment data submitted in 2001 and concurred that there was acceptable risk to the employees of the convenience store from benzene, but requested that soil vapor probes be installed adjacent to the store in order to fully assess the chlorinated VOCs risk. In July 2004, six additional soil vapor probes were installed in borings across the car wash property, including three near the perimeter of the store building. Based on 5-foot vapor sample results from all of the borings, the cumulative health risk for PCE, TCE, 1,1-dichloroethene, vinyl chloride, benzene, and MTBE in soil vapor for an adult worker in the store was calculated as  $1 \times 10^{-6}$ , and the combined hazard index was  $2.8 \times 10^{-2}$ . The consultant concluded that the measured concentrations do not pose an unacceptable risk to on-site receptors based on the site use, and DEH concurred with the findings in a meeting held on February 23, 2005. For the March 2011 Corrective Action Plan prepared for the site, the consultant recalculated the human health risks using only data from the three soil vapor probes installed near the store building. An estimated cancer risk of  $3 \times 10^{-7}$  (less than the threshold cancer risk of  $1 \times 10^{-6}$ ), and a non-cancer hazard index of  $3.0 \times 10^{-4}$  (acceptable level is less than one) were calculated. The consultant stated that the risk associated with on-site workers was less than significant. Seven site groundwater monitoring wells were installed at the site between 2003 and 2010, including four wells associated with the dry cleaners investigation and one cross-gradient well installed on an adjacent hotel parking lot (11002 Rancho Carmel Drive) located west of the dispenser area. Analytical results for groundwater samples collected from the wells indicate that the primary fuel contaminant of concern at the car wash site is dissolved MTBE. Only very low concentrations of non-chlorinated VOCs and TPH-g have been detected in site groundwater. As discussed above, the high concentrations of several chlorinated VOCs (above MCLs) in wells near the northern boundary of the site are being addressed under the Former Marstons Cleaners case. The site is located in a groundwater basin with designated beneficial uses. However, the consultant contacted the City of San Diego, and in a letter dated October 21, 2011, the City stated that they have no immediate plans to install wells close to the site. However, they reserve the right to develop all available groundwater resources on City property. The consultant determined that there were no sensitive receptors that would be impacted by the groundwater. An irrigation well is located at the Carmel Mountain Highlands Golf and Tennis Resort at 14455 Penasquitos

Drive, but the resort is located greater than one-half mile away from the site to the north. The most recent (November 2010) groundwater data submitted for the site showed maximum MTBE concentrations of 180 micrograms per liter (ug/l) in monitoring well NM-MW-1 (near dispensers) and 32 ug/l in northern well MW-5. Both concentrations exceed the maximum contaminant level (MCL) for MTBE of 13 ug/l. MTBE concentrations reported in the other site wells were less than 1 ug/l, including the most downgradient well (NM-MW-3) located near the southern boundary of the car wash property. In the DEH-approved March 2011 Corrective Action Plan prepared for the site, the consultant recommends natural attenuation as the site remedy. The extent of soil and groundwater contamination has been adequately delineated, and the consultant concludes that the likely fuel contaminant sources have been removed; the plume is stable and contracting; the dissolved-phase petroleum hydrocarbons will remediate by natural attenuation; and dissolved MTBE should naturally attenuate to below the MCL in approximately 15 years. Based on the assessment and remediation activities conducted at the site and vicinity, the consultant recommends case closure. DEH concurs with these conclusions and the recommendation for case closure.

MAP FINDINGS

**CARWASH OF AMERICA (Continued)**

**U003789889**

Case Worker: TS  
Local Agency: SAN DIEGO COUNTY LOP  
RB Case Number: Not reported  
File Location: Local Agency  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Gasoline  
Site History: PLEASE SEE DEH LOP CASE# H29570-002 FOR SITE DOCUMENTS RELATED TO THE CARMEL MOUNTAIN RANCH CAR WASH SITE. The site consists of the combined Carmel Mountain Ranch Car Wash and Chevron gasoline service station, constructed in 1990. A convenience store building is also located on the property. This Voluntary Assistance Program (VAP) case (H29570-001) for the site was opened in August 2001 to address potential human health risks to site workers from contaminated soil/soil vapor associated with a chlorinated solvent release at a dry cleaning facility previously located on the adjacent property to the north (11040 Rancho Carmel Drive). Limited soil and soil gas investigations conducted in 1998-2000 indicated that dissolved chlorinated volatile organic compounds (VOCs) had migrated to the property from the dry cleaners site. Fuel-related contaminants were also reported in some of the soil vapor samples. This case involves only the soil vapor contamination and on-site human health risks associated with the chlorinated VOCs release and an unauthorized release of petroleum products at the car wash site. The Regional Water Quality Control Board is overseeing the assessment and mitigation of the dry cleaners release (Former Marstons Cleaners) under Case #H25987-001. The fuel-related contamination at the car wash site is addressed under DEH Local Oversight Program (LOP) Case #H29570-002. Analytical results for soil vapor samples collected at the car wash site in 1998 and 2000 indicated the presence of elevated levels of perchloroethene (PCE) and trichloroethene (TCE), along with lower concentrations of benzene, toluene, ethylbenzene and xylenes (BTEX), methyl tertiary butyl ether (MTBE), and other chlorinated VOCs. The highest PCE and TCE concentrations were detected in samples collected near the northern border of the property. DEH reviewed the risk assessment data in 2001 and concurred that there was acceptable risk to the employees of the convenience store from benzene, but requested that soil vapor probes be installed adjacent to the store in order to assess the chlorinated VOCs risk. In July 2004, six additional soil vapor probes were installed in borings across the car wash property, including three near the perimeter of the store building. Based on 5-foot vapor sample results from all of the borings, the cumulative health risk for PCE, TCE, 1,1-dichloroethene, vinyl chloride, benzene, and MTBE in soil vapor for an adult worker in the store was calculated as  $1.06 \times 10^{-6}$ , and the combined hazard index was  $2.8 \times 10^{-2}$ . The consultant concluded that the measured concentrations do not pose an unacceptable risk to on-site receptors based on the site use. DEH concurred with the risk assessment results in a meeting held on February 23, 2005. In the CAP for the LOP site, dated March 31, 2011, the consultant recalculated the risks using only the data from the three perimeter soil vapor probes, and the results were lower. The consultant estimated a cancer risk of  $2.72 \times 10^{-7}$  (less than the threshold cancer risk of  $1.0 \times 10^{-6}$ ) and a non-cancer hazard index of  $3.0 \times 10^{-4}$  (less than one).

**FINDS:**

Registry ID: 110002804421

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

**HAZARDOUS AIR POLLUTANT MAJOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Description:	The contractor's right fuel tank was punctured in a prior accident. 50 gallons were released onto USPS property and cleaned up by a contractor. There was an additional unknown amount released elsewhere including some diesel that leaked from this truck into the gutter and storm drain across from the post office (11251 Rancho Carmel Dr.).

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 29240

Waste code: D035  
Waste name: METHYL ETHYL KETONE  
Amount (Lbs): 30

Violation Status: No violations found

Environmental Interest/Information System  
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Global Id: T0619756977  
 Latitude: 32.977081  
 Longitude: -117.090076  
 Status: Completed - Case Closed  
 Status Date: 10/16/2014  
 Case Worker: NS  
 RB Case Number: Not reported  
 Local Agency: SAN DIEGO COUNTY LOP  
 File Location: Local Agency  
 Local Case Number: 113134-001  
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil  
 Potential Contaminants of Concern: Gasoline  
 Site History:

This case was opened in March 2008, following the discovery of contaminated soil beneath the dispenser islands during station upgrade activities in February 2008. Gasoline was detected in soil at a maximum concentration of 490 mg/kg, diesel fuel at 230 mg/kg, benzene at 20 mg/kg, and xylenes at 9.5 mg/kg. Soil samples were collected and analyzed from beneath the dispenser islands, and from soil borings, including borings for monitoring wells. Higher concentrations were limited to the dispenser islands. Low concentrations of contaminants were discovered outside of the dispenser area to a depth of 30 feet below ground surface (bgs). The consultant estimated that there are approximately 8 cubic yards of contaminated soil onsite. Six monitoring wells (MW-4 through MW10) were installed at the site between 2009 and 2011. Groundwater was monitored at the site from October 2009 through March 2013. Free product was not detected at the site. Dissolved phase gasoline and its constituents toluene, ethylbenzene, xylenes, and additives methyl tertiary butyl ether (MTBE) and tert butyl alcohol (TBA) were detected in groundwater. The maximum concentrations of gasoline and MTBE: 140 and 150 ug/l, respectively, were detected in onsite well MW-7. The other dissolved contaminants were below the maximum contaminant levels (MCLs) for all wells. Active remediation has not been conducted at the site. The consultant concluded that the groundwater plume has been delineated and did not extend off-site. The concentrations of MTBE and gasoline have decreased over time. The consultant estimated that it would take 1.6 years for MTBE to remain

below the MCL based on first order decay rate equations and trend analysis. The consultant contacted the City of San Diego regarding current and future uses of groundwater in the site vicinity. The City indicated that there was a private well within a 1/4 mile radius of the site. The City stated that it had no immediate plans to install production wells in the site vicinity. The consultant evaluated potential sensitive receptors in the site vicinity including surface water and human health. A small pond, is located approximately 500 feet north and upgradient of the site, and Chicarita Creek is located approximately 1/2 mile east-southeast. The consultant stated that based on the location of the pond and the distance to the Creek, the exposure pathways were incomplete. The site is an active gasoline station and a soil vapor survey was not warranted. The consultant reported that subsurface utilities in the site vicinity include gas, electric, water, sewer and storm drain lines, which are buried between 2 and 10 feet bgs. The consultant stated that since the depth to water in site wells had ranged from 22.67 to 36.40 feet, the potential for groundwater to migrate along utility lines is unlikely. The consultant prepared a Low Threat UST Case Closure report for the site which recommended no further action and the destruction of all site monitoring wells. This case meets the criteria for closure under the Low Threat Closure Policy. DEH concurs with the recommendation for no further action.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

**FINDS:**

Registry ID: 110002936486

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Latitude: 32.975046  
 Longitude: -117.091571  
 Status: Completed - Case Closed  
 Status Date: 07/02/2012  
 Case Worker: CH  
 RB Case Number: 9UT2127  
 Local Agency: SAN DIEGO COUNTY LOP  
 File Location: Local Agency  
 Local Case Number: H06042-001  
 Potential Media Affect: Aquifer used for drinking water supply  
 Potential Contaminants of Concern: Gasoline

Site History:

The site is currently occupied by a maintenance/rental office for the adjacent residential rental housing. Previous site use included refueling of vehicles used on site, and on January 8, 1992, an underground storage tank (UST) containing gasoline and a dispenser located to the east of the UST were removed from the site. DEH-directed soil sampling was completed at each end of the UST excavation and under the dispenser. Petroleum hydrocarbons were detected in all three samples, with a maximum concentration of 13,400 milligrams per kilograms (mg/kg) detected in the sample from under the dispenser. Based upon these results, Unauthorized Release H06042-001 was opened. In May 1992, the UST excavation was enlarged and extended to approximately 10.5 feet below ground surface (bgs), and the area where the dispenser was located was excavated to 6 feet bgs and extended west to the UST excavation. The excavations were back-filled with clean fill, and approximately 65 cubic yards of soil was removed from the site. Confirmation soil sampling was completed at the north, south, and west ends of the UST excavation and at the bottom of the UST and dispenser excavations. Xylenes were detected in the sample from the bottom of the UST excavation at 0.0339 mg/kg, and were the only gasoline constituents detected in the confirmation samples. Based upon these results, the consultant concluded that the contaminants had been removed from the site and requested that the case be closed. DEH did not concur with case closure and required vertical delineation of soil impacts and groundwater sampling. Further investigation of the site was initiated in 2011 as a result of enforcement action by DEH. A groundwater monitoring well was installed in the location of the former UST and a boring was completed in the location of the former dispenser. Petroleum constituents were not detected in three soil samples collected at 10,

15, and 45 feet bgs during installation of the groundwater monitoring well or in the soil sample collected at 6 feet bgs from the soil boring. DEH had directed that the boring be completed to at least 10 feet bgs; however, shallow bedrock encountered at 7 feet bgs and limited access prevented further drilling in this location. Groundwater monitoring and sampling was conducted at the site in June and September 2011, and petroleum constituents were not detected in groundwater samples collected during these monitoring events. The groundwater monitoring well was destroyed under permit LMON 108257 in March 2012. Based upon current and historical soil and groundwater sampling data, the consultant concludes that petroleum-impacted soils were removed from the site in 1992 and that there is no remaining petroleum-impacted soil on site. The consultant further concludes that groundwater was not impacted by the release. Based upon these findings, the consultant recommends that the case be closed. DEH concurs with the consultants conclusions and recommendation to close the case.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact email: KKFITZPATRICK@UPS.COM  
EPA Region: 09  
Classification: Small Small Quantity Generator  
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name: UPS-UNITED PARCEL SERVICE  
Owner/operator address: Not reported  
Not reported  
Owner/operator country: US  
Owner/operator telephone: Not reported  
Owner/operator email: Not reported  
Owner/operator fax: Not reported  
Owner/operator extension: Not reported  
Legal status: Private  
Owner/Operator Type: Operator  
Owner/Op start date: 06/01/2016  
Owner/Op end date: Not reported

Owner/operator name: CLPF-CARMEL MOUNTAIN LP  
Owner/operator address: PARK AVE 12TH FLR C/O CLARION PARTNERS  
NEW YORK, NY 10169  
Owner/operator country: US  
Owner/operator telephone: 619-515-0100  
Owner/operator email: Not reported  
Owner/operator fax: Not reported  
Owner/operator extension: Not reported  
Legal status: Private  
Owner/Operator Type: Owner  
Owner/Op start date: 04/08/2005  
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

**FINDS:**

Registry ID: 110069707151

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Actual:  
674 ft.

Registry ID: 110070085953

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**FINDS:**

Registry ID: 110002869673

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 1740

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 97

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 3

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 4060

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

 Case Type: Cleanup Program Site  
 Case Worker: CF  
 Local Agency: SAN DIEGO COUNTY LOP  
 RB Case Number: Not reported  
 File Location: Local Agency  
 Potential Media Affected: Soil, Surface water  
 Potential Contaminants of Concern: Gasoline  
 Site History: A tanker truck transporting gasoline overturned on northbound Interstate-15 on September 18, 2014. The accident occurred approximately one mile northeast of the Poway Road overpass and resulted in a gasoline spill to the emergency traffic shoulder lane adjoining the right side of the freeway. An estimated 2,000 to 2,200 gallons of gasoline was released. A portion of the gasoline release entered freeway storm drain grates, flowed through a subsurface storm drain culvert, and discharged into Chicarita Creek, an intermittent drainage that receives natural and urban runoff. Chicarita Creek is a tributary of Los Penasquitos Creek. A private emergency response contractor was dispatched to the accident scene and implemented cleanup measures to contain and mitigate the release. Spill response activities continued for three days following the release. The storm

drain culvert was flushed with approximately 1,000 gallons of water. Absorbent materials were used to remove gasoline from surface soil and boom socks were deployed into the intermittently-flowing creek. Approximately 14 cubic yards of soil impacted by the release was removed by excavation. The petroleum transport company entered the DEH Voluntary Assistance Program (VAP) on October 1, 2014. Following DEH review and approval of a work plan, a soil assessment was performed to evaluate the lateral and vertical extents of gasoline impacts. The consultant, GeoEnviro Services, Inc. (GESI), initially collected 23 sediment samples along the waterline of Chicarita Creek, as well as five background samples from dry channels of the creek. Gasoline was not detected in soil samples collected near the outfall of the storm drain into Chicarita Creek, but were detected in two sediment samples collected 260 feet downstream of the outfall. The maximum detected concentrations of total petroleum hydrocarbons as gasoline (TPH-g) in these samples were 1,130 and 48 milligrams per kilogram (mg/kg), respectively. The volatile organic compounds xylene and trimethylbenzenes were detected in one of these stream sediment samples. GESI estimates that TPH-g impacts to the upper two inches of stream sediment occur within a 480-square foot area. Five borings were advanced near the center of the gasoline spill on the shoulder of the freeway to depths of 14 to 25 feet below the adjoining roadway. Twenty-four soil samples were collected from the borings at approximately 4-foot intervals. The maximum detected concentration of TPH-g in the samples was 5.12 mg/kg. Detected VOCs included benzene, toluene, ethylbenzene, and xylene (at a total concentration of 1.62 mg/kg) and trimethylbenzenes at a total concentration of 0.46 mg/kg. Gasoline and its constituents were not detected below a depth of 16 feet. Based on the soil assessment findings, GESI recommends no further action and case closure. DEH concurs with these recommendations.

 RB Case Number:        9UT3717  
 Local Agency:          SAN DIEGO COUNTY LOP  
 File Location:          Local Agency  
 Local Case Number:    H20713-002  
 Potential Media Affect: Aquifer used for drinking water supply  
 Potential Contaminants of Concern: Gasoline  
 Site History:

On August 25, 1998, two 10,000 gallon and one 6,000 gallon Underground Storage Tanks (USTs) were removed from the site. As a part of the removal process soil samples were collected beneath the USTs. Laboratory results indicated Total Petroleum Hydrocarbons as gasoline (TPHg) ranging from below laboratory reporting limit (ND) to 2,100 milligrams per kilogram (mg/kg). As a result, Unauthorized Release H20713-002 was opened. To mitigate hydrocarbons in soil observed following tank removal activities, approximately 582 tons of hydrocarbon impacted soil were excavated and treated offsite. Between 1999 and 2001, several site assessments were conducted to delineate the extent of hydrocarbons in soil and groundwater. During these assessments, TPHg concentrations in soil ranged from ND to 1.5 mg/kg, Xylene concentrations ranged from ND to 0.01 mg/kg, Methyl Tertiary Butyl Ether (MTBE) concentrations ranged from ND to 0.016 mg/kg. All other constituents in soil were not reported above laboratory reporting limits. The site is located in a basin designated for beneficial municipal, agricultural, and potential industrial service uses. Groundwater flow direction has been consistently towards the southwest. Groundwater monitoring wells installed onsite and offsite have shown that groundwater has been impacted by the unauthorized release. Quarterly groundwater monitoring and sampling has been conducted at the site from February 1999 through June 2008. Dissolved phase concentrations of TPHg, Benzene, Toluene, Ethylbenzene, Xylenes, Ethyl-tert-butyl ether, di-isopropyl ether, and tert-Amyl-methyl ether are below laboratory limits in all wells. Dissolved phase concentrations of MTBE and tert-Butyl Alcohol (TBA) have remained in wells MW-2 and MW-8 but show a decreasing trend. A receptor search was conducted within \\\% mile radius of the site as a part of the Corrective Action Plan (CAP). One irrigation well was located. According to the consultant, this well is located hydraulically upgradient. There is no estimation of residual hydrocarbon impacts in soil, as they were removed during the 1998 tank upgrades. A trend analysis was completed to estimate the timeframe for MTBE and TBA to reach their cleanup goals proposed in the CAP. According to the consultant, MTBE concentrations in monitoring wells MW-2 and MW-8 will reach the primary MCL in less than one year. TBA concentrations in monitoring wells MW-2 and MW-8

 RB Case Number: Not reported  
 Local Agency: SAN DIEGO COUNTY LOP  
 File Location: Local Agency  
 Local Case Number: 202471-001  
 Potential Media Affect: Other Groundwater (uses other than drinking water)  
 Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
 Site History: On January 25, 2005, a 550-gallon capacity waste oil underground storage tank (UST) was removed from the site. Standing water with free product and stained soil were observed in the excavation. The two soil samples collected from the bottom of the tank excavation were impacted by petroleum hydrocarbons. Between 2006 and 2012, eight soil borings/groundwater monitoring wells were installed to delineate the extent of contamination. Initially, four wells were installed in 2006 in the vicinity of the excavation. MW-1, located in the tank pit and screened to a depth of 21 feet below ground surface, is currently dry, but a maximum of 0.36 feet of free product was measured in the well in 2008. In 2007, free product was also observed in monitoring well MW-3 (located 10 feet south of MW-1, but screened deeper). Prior to 2015 (see below), a maximum free product thickness of 1.6 feet was measured in well MW-3. The primary dissolved contaminant of concern at the site is methyl tertiary butyl ether (MTBE). Prior to December 2012, recoverable product was removed by hand bailing (total volume not available). From December 2012 to February 2013, oil-absorbing

socks were placed in well MW-3 to further mitigate free product. A product thickness of approximately 0.01 feet was measured in MW-3 in December 2013. In order to verify that free product had been removed to the extent practicable, MW-3 was re-checked on June 15, 2015, and no free product was present. However, when the consultant returned to the site on June 30, 2015 to collect groundwater samples, they found approximately 3 to 4 feet of what appeared to be waste oil in MW-3. The consultant suspected that waste oil had been dumped in the well, and installed new locking mechanisms on the site wells. From July 6, 2015 through October 9, 2015, vacuum truck extractions and hand bailing removed approximately 23 gallons of free product from MW-3. Free product was not observed in subsequent monitoring events, and the consultant concludes that free product has been removed to the extent practicable. The groundwater basin beneath the site has designated beneficial uses in the San Diego Region Water Quality Control Boards Basin Plan. With the exception of MTBE, reported dissolved concentrations of benzene, toluene, ethylbenzene, xylenes, and naphthalene in all of the wells were below their respective Maximum Contaminant Levels (MCLs) in the last sampling event (October 21, 2015). The primary MCL for MTBE is 13 micrograms per liter (µg/l), and dissolved MTBE concentrations of 16.2 µg/l and 29.9 µg/l were reported in two wells. The consultant estimates that approximately 50 cubic yards of impacted soil remains at the site, primarily in the immediate vicinity of the former waste oil UST. The consultant concludes that concentrations of petroleum hydrocarbons at the site have demonstrated stable to decreasing trends over time, and residual petroleum constituents do not pose a risk to human health. The consultant further concludes that this site fulfills the closure criteria in the State Water Resources Control Boards Low-Threat UST Case Closure Policy, and recommends no further action. DEH concurs with this recommendation. A 60-day public comment period for DEHs Notification of Intent to Close Case was completed, and no comments were received. DEH issued permit #DEH2016-LMWP-002366 for the destruction of the monitoring wells associated with the case.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/26/2017	Telephone: 800-424-9346
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

Next Scheduled EDR Contact: 05/14/2018  
Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/30/2018  
Date Data Arrived at EDR: 01/31/2018  
Date Made Active in Reports: 03/19/2018

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 01/19/2018

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/09/2018  
Date Data Arrived at EDR: 01/24/2018

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 02/08/2018	Source: DTSC and SWRCB
Date Data Arrived at EDR: 02/08/2018	Telephone: 916-323-3400

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895

Number of Days to Update: 97	Next Scheduled EDR Contact: 06/04/2018
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 10/13/2017
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/22/2018
	Data Release Frequency: Semi-Annually

### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 12/31/2005	Source: U.S. Geological Survey
Date Data Arrived at EDR: 02/06/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 10/11/2017

	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Date of Government Version: 12/20/2017

Number of Days to Update: 55	Next Scheduled EDR Contact: 05/07/2018
	Data Release Frequency: Varies

## Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 11/14/2017	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 11/17/2017	Telephone: 916-341-6066
Date Made Active in Reports: 12/18/2017	Last EDR Contact: 02/08/2018
Number of Days to Update: 31	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2016	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/12/2017	Telephone: 916-255-1136

Next Scheduled EDR Contact: 06/25/2018  
Data Release Frequency: Varies

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018  
Date Data Arrived at EDR: 02/14/2018  
Date Made Active in Reports: 03/22/2018

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

North Map: 5641298 ESCONDIDO, CA  
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06073C1352G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06073C1351F	FEMA FIRM Flood data
06073C1356G	FEMA FIRM Flood data
06073C1354G	FEMA FIRM Flood data
06073C1358G	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
POWAY	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.6
2	14 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.6
3	31 inches	35 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

#### Soil Map ID: 2

Soil Component Name: LINNE

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	14 inches	37 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	37 inches	40 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

### Soil Map ID: 3

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.6
2	9 inches	27 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.6
3	27 inches	31 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

### Soil Map ID: 4

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

1	0 inches	7 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6 Min: 5.6
2	7 inches	11 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 2640 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Permit # AT 4385  
Establishment # H 26588  
Date: February 16, 1999  
Expiration Date: February 16, 2000

**Permit for Underground Storage Tank Construction/Closure**

SITE NAME: Carmel MT. Ranch Country Club  
SITE ADDRESS: 14050 Carmel Ridge, San Diego, CA, 92128  
OWNER NAME: Cobblestone  
OWNER ADDRESS: SAME

DESCRIPTION OF PROPOSED WORK: Remove one Underground storage tank(s) and all associated product piping

**PERMIT CONDITIONS:**

For tank systems that are to be removed, the excavation shall be exposed prior to the scheduled inspection and sampling points identified by the Site Assessment and Mitigation Division (SAM) inspector. Sampling is required for both tank(s) and piping. The tank(s) and piping must remain in the excavation until the SAM inspector approves the removal.

**Please Note:**

- 1) All product piping and underground storage tanks must be removed at the same time. Failure to do so will result in a re-inspection and \$300.00 re-inspection fee.

**Please be advised:**

All underground storage tanks that are to be removed or closed in place must be cleaned and properly inerted prior to the removal

- 1) The tanks are visually free from all product, sludge, rinsate and debris. Residual staining caused by soil and waste consisting of light shadows, slight streaks, or minor discoloration's, and soil and waste in cracks, crevices and pits may be present.
- 2) Tanks that held a Hazardous material or hazardous waste that had the potential to generate flammable vapors, must be properly inerted. A combustible gas indicator (CGI) which is properly calibrated shall be used to measure the concentration of flammable vapor at the top, center and bottom of the underground storage tank. The concentration of flammable vapor must be below twenty percent of the Lower Explosive Limit (LEL) for the material that was contained in the tank(s) and the oxygen concentration shall be the same as that of ambient air, approximately 20.8%. The underground storage tank(s) must inerted with dry ice using a minimum of 15 pounds for every 1000 gallons of tank capacity.
- 3) Failure to have the tank properly cleaned prior to the time of the removal will result in the cancellation of the removal and will require a re-inspection and \$300.00 re-inspection fee.

This office must be given at least 48 hours notice for all required Underground Storage Tank Activity. Please contact the Site Assessment and Mitigation Division, Plan Check desk at (619) 338-2214 to schedule or cancel inspections

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS

Submit one (1) original and two (2) copies of this application package, including plan drawings with the required fee to the Department of Environmental Health, Site Assessment and Mitigation Division (SAM), 1255 Imperial Avenue, San Diego, CA 92101. Or mail to P. O. Box 85261, San Diego, CA 92186-5261. Checks should be made payable to the County of San Diego.

A permit will be issued by SAM upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in the application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit is issued.

Once the permit has been issued, it is the responsibility of the permittee to notify SAM at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III, IV, & V).

F. PROJECT WORK TO BE COMPLETED: Check Applicable Box	COMPLETE APPLICATION PARTS	FEE CODE TABLE G
<input type="checkbox"/> Installation/Construction of new tank(s) systems only (without closing any existing tanks)	I & II	1
<input type="checkbox"/> Closure of existing tank(s) systems with installation of new tanks (tank replacement)	I, II & III	1 & 2
<input type="checkbox"/> Closure of existing tank(s) systems with no new tank installation	I & III	2

PERMIT APPLICATION  
PART III  
APPLICATION FOR PERMIT TO CLOSE UNDERGROUND STORAGE TANK SYSTEM

- A. TOTAL NUMBER OF TANK SYSTEMS TO BE CLOSED 1  
NOTE: UST SYSTEMS INCLUDE TANK AND ALL ASSOCIATED PIPING.  
B. DESCRIPTION OF TANKS TO BE CLOSED:

TANK NO.	CAPACITY	DATE INSTALLED	TANK COMPOSITION	TANK PRESENTLY IN USE?	MATERIALS STORED IN TANK
1	500	1989	JOOR DW	YES	GASOLINE

C. HAS THE TANK SYSTEM EVER FAILED OR LEAKED? YES  NO  UNKNOWN

D. REASON FOR TANKS TO BE CLOSED:

Meet current state/federal requirements

Replacement of existing tanks

Tank system failure, briefly describe \_\_\_\_\_

Other, briefly describe \_\_\_\_\_

E. PREVIOUS OWNERS AND OPERATORS OF THE TANKS:

Dates

Owner/Operator

NONE

NONE

F. PROPOSED METHOD OF CLOSURE:  REMOVAL  CLOSURE IN PLACE

SAMPLING PROTOCOL Tank owner/authorized representative responsible for all sampling analyses and associated costs

for tank systems that are to be removed. The excavation shall be exposed prior to the scheduled inspection and sampling points identified by the SAM inspector. Sampling is required for both tank and piping. The tank and piping must remain in the excavation until the SAM inspector approves the removal.

tank systems to be closed in place. Submit an alternate plan which must include soil sampling, reason for closing the tank system in place and type of material to be used to fill the tank. Soil sampling and/or hydrostatic testing is also required for piping closures. Tank system closure in place will only be considered after evaluating the risks and hazards if the tank system were removed.

G. DISPOSAL SITE OF TANK: LEES IRON & STEEL 1715 LEE AVE VISTA

Note: You must inform SAM of the address of where the tank and piping is to be disposed. Plans will be disapproved without this information.

H. ATTACH THREE COPIES OF PLANS SHOWING THE FOLLOWING:

1. Property lines, site address, scale, north arrow.
2. Location of all existing structures.
3. Location of all existing underground storage tank facilities.
4. Location of underground storage tanks and piping to be closed.
5. Location of underground utility lines and vaults.

E. REQUIRED INSPECTION-PERMIT TO CLOSE

A representative from SAM must be on site at the time the tank(s) are closed.

1. TANK SYSTEM CLOSURE BY REMOVAL:

- excavation shall be exposed prior to the scheduled inspection. The tank owner/authorized representative on site must submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. A combustible gas instrument and soil sampling equipment must be on site. The SAM inspector will identify sampling points. The tank and piping must remain in the excavation until SAM approves the removal.

2. TANK SYSTEM CLOSURE IN PLACE:

- after approval of the alternate plan, the tank owner/authorized representative on site shall submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. The SAM inspector shall verify that the tank system has been properly emptied and will witness the filling with an approved inert substance. Piping approved to be closed in place by hydrostatic testing shall also be witnessed by SAM.

J. DECLARATION

I declare that to the best of my knowledge and belief, the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Site Assessment and Mitigation Division.

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for further development (e.g. soil compaction testing) are in addition to the requirements of the Site Assessment and Mitigation Division.

I will notify the Site Assessment and Mitigation Division at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared or assumed by the County of San Diego.

WORKPLAN  
FOR  
UNDERGROUND STORAGE TANK CLOSURE

1. Site Name CARMEL MT. RANCHO COUNTRY CLUB  
2. Site Address 14050 CARMEL RIDGE RD  
S.D. 92128

3. Describe the existing land use in the surrounding area. (residential, commercial, schools)  
Describe the locations of nearest receptors and the prevailing wind.  
RESIDENTIAL / GOLF COURSE

4. Explain how the excavation will be secured. Describe fencing/site security and other methods that insure public safety.  
FENCED & B.F.

5. If soil is to be stockpiled, describe the location on the Plan Check map. Describe method of soil containment (berming/covers, run-off control).  
PLACED ON PLASTIC & COVERED

6. Do you plan to conduct site assessment or remedial work beyond what is necessary to remove the underground storage tank(s) and perform the mandatory soil sampling required by the Environmental Health Services?  
 Yes  No

If Yes, a Workplan for Post-Tank Removal Investigation must be completed under the direction of a registered professional.

**WORKPLAN FOR POST-TANK REMOVAL INVESTIGATION**

Complete this Workplan only if you intend to utilize a backhoe to investigate the extent of hydrocarbon contamination within 72 hours of the removal of an underground storage tank (UST). This site investigation work must be implemented in accordance with the DEH-SAM Manual and under the direction of an appropriately Registered Geologist (RG), Certified Engineering Geologist (CEG) or Registered Civil Engineer (RCE). A complete site assessment report, signed by the above referenced registered professional, must be submitted to DEH within 60 days of the date of the field investigation. This workplan must be signed by the above referenced registered professional.

1. Establishment Name/Address CARMEL MT. RANCH COUNTRY CLUB  
14050 CARMEL RIDGE RD S.D. 92128

2. Contractor, Contact & Phone No.  
Gary Pedretti Service Station Maintenance, Mr. Gary Pedretti, (619) 728-3514

Environmental Consultant, Contact & Phone No.  
Environmental Business Solutions, Inc., Ms. Nicki Field, (619) 571-5500

Registered Professional (defined above) & Phone No.  
Mr. Barry Pulver (EBS), (619) 571-5500 (CEG 1364)

3. Describe how the backhoe will be utilized to conduct the site investigation (ie. potholing, trenching, etc.) and estimate the maximum quantity of soil to be excavated.  
See attachment A.

4. Describe the soil sample collection methods and laboratory analyses to be used (reference Section 4, B. 1. of the SAM Manual). Soil analysis must be performed by a California DTSC Certified Laboratory.  
Soil samples will be collected in general accordance with the guidelines set forth in the 1997 SAM Manual.  
Soil samples will either be collected from the "teeth" of the backhoe bucket and packed into laboratory-supplied glass jars, or collected in brass sleeves with a manual drive sampler. In the case that soil samples are collected in brass sleeves, the sleeves will be covered with Teflon tape and capped. Samples will be transported to an on-site California State-certified mobile laboratory under chain-of-custody protocol and tested in general accordance with appropriate analytical methods detailed in the 1997 SAM Manual.

5. Attach a site drawing (scale) which includes at a minimum: site structures, subsurface utility lines and fuel lines, UST(s) location, site investigation area, stockpiled soil area, prevailing wind direction, adjacent street and property uses, subsurface water and wells.

6. Describe methods to monitor and control hydrocarbon vapor emissions at the excavation site.

The excavated soil will be placed on and covered with 10 mil plastic sheeting. We will also be monitoring vapors with a photoionization detector at periodic intervals (generally not exceeding 15 minutes) and will have available for use benzene-specific draeger tubes. Should organic vapors be judged excessive during the excavation assessment, the excavation will be discontinued or vapor control measures will be undertaken.

7. Describe the procedures for the management of excavated soil, i.e. soil segregation, engineering controls for the stockpile soil (reference Section 5. C. 4. of the SAM Manual), soil characterization, on-site soil management, off-site disposal, on-site treatment, etc.

Soil interpreted to be less likely to be impacted by petroleum hydrocarbons will be segregated into a separate stockpile. The stockpile(s) will be configured in such a way as to minimize runoff from rain. While soil stockpile characterization and disposal are not part of our contracted scope of services, we anticipate that soil will not remain on-site for an extended period of time. Depending on the results of excavation and stockpile sampling, we anticipate that soil containing elevated concentrations of petroleum hydrocarbons will be transported off-site for treatment and disposal at a facility such as Soil Wash Technologies in San Diego, California.

8. A Public Notification Program must be implemented prior to commencing the site investigation. Attach a copy of the public notice and provide a written description of the program (reference Section 6. A. of the SAM Manual). Identify the targeted population and the method of public notice distribution.

---

---

---

---

---

---

---

---

---

---

Please Note:

- \* The investigation trench or excavation must be logged under the direction of a RG, CEG or RCE and include a complete description of the subsurface soil and/or rock.
- All contaminated soil should either be removed from the site or be treated on-site (with agency approval) within 45 days of site excavation.
- The site excavation **must** be secured with fencing, site security and other methods as required to ensure public safety. DEH recommends backfilling the excavation site for safety reasons within 72 hours of the post-tank removal investigation.

## ATTACHMENT A

### UST Excavations

Trenches and/or potholes will be excavated at the UST excavation margins and/or bottoms to attempt to assess the horizontal and vertical extent of petroleum hydrocarbon-bearing soil (if any) in the vicinity of the USTs. We anticipate that a total of 75 yards of soil will be excavated from the UST and pipeline excavations.

### Pipeline Excavations

Trenches and/or potholes will be excavated along the pipelines to attempt to assess the horizontal and vertical extent of petroleum hydrocarbon-bearing soil (if any) in the vicinity of the pipelines and remote fill ports. We anticipate that a total of 75 yards of soil will be excavated from the UST and pipeline excavations.

# PUBLIC NOTIFICATION THIS SITE IS CLOSED TO THE PUBLIC

A underground storage tank (UST) removal and soil excavation program is being performed at this Site (\_\_\_\_\_). The Site is marked by the fencing along the property boundaries. Activities will include UST removal, soil sampling, and possibly soil excavation and stockpiling. Activities will be conducted on \_\_\_\_\_. Onsite work will be limited to business hours, approximately 7:00 AM to 5:00 PM. Primary potential hazards include physical and chemical hazards associated with Site work, such as heavy equipment and petroleum vapors. Precautions will be taken during the UST removal/excavation activities to restrict Site access. In addition, precautions will be taken to minimize vapors, and air monitoring will frequently be performed.

**UNIFIED PROGRAM FACILITY PERMIT APPLICATION**

New Cingular Wireless PCS, LLC - Carmel Mountain Ranch Country Club  
NS0627-01

This business or service is required to obtain a Unified Program Facility Permit from the San Diego County Department of Environmental Health. I answered "yes" to one or more of the questions on the "Business Activities" form.

Date assumed business ownership at this location:

This permit does not excuse any owner or operator from complying with all applicable federal, state, county or local laws, ordinances or regulations. The owner or operator is required to determine if another permit or approval from any other agency or department is necessary. The County, by issuing this permit, does not relinquish its right to enforce any violation of law.

I have determined that this business or service does not require a Unified Program Facility Permit from the San Diego County Department of Environmental Health.

I declare under penalty of perjury that to the best of my knowledge and belief the statements made herein are correct and true. I consent to all necessary inspections allowed by law and incidental to the issuance of required permit(s) and the operation of this business.

Signature: *Mike Bossom*

Title: Operations Manager

Printed Name: Mike Bossom

Date: 8/21/06

Type of Business: Telecommunications

Phone #: (858) 774-5904

Please complete the business information on the following page and return this application to the San Diego County Department of Environmental Health at:

SAN DIEGO COUNTY  
DEPARTMENT OF ENVIRONMENTAL HEALTH  
HAZARDOUS MATERIALS DIVISION  
P.O. BOX 129261  
SAN DIEGO CA 92112-9261

If a San Diego County Unified Program Facility Permit is required for your business or service a representative of this Department will contact your business. Permit fees will be determined from the contact and a billing statement will be mailed.

**NOTE:** If you do not use hazardous materials, generate hazardous waste, or have underground storage tanks you are still required to return this form.

A representative of the San Diego County Department of Environmental Health may contact you to verify the information provided on this application.

PLEASE INACTIVATE THIS SITE.

- There are no Hazardous Materials at this site at this time.
- A call to Jackie Schnell of AT&T EHS Department confirm no batteries are planned for this site
- If Hazardous Materials are later added, or the site generates Hazardous Waste, then you must re-apply for a permit.

RECEIVED FEB 01 2008

This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

**PART III: SAN DIEGO COUNTY AIR POLLUTION CONTROL DISTRICT (APCD):** If the answer to Question #1 below is no or the answer to any of the Questions #2-5 is yes, applicant must contact the APCD at 10124 Old Grove Road, San Diego, CA 92131-1649 or telephone (858) 586-2600 prior to the issuance of a building or demolition permit. If the answer to questions #4 or #5 is yes, applicant must also submit an asbestos notification form to the APCD at least 10 working days prior to commencing demolition or renovation. (Some residential projects may be exempt from the notification requirements. Contact the APCD for more information.)

YES	NO	
1. <input type="checkbox"/>	<input checked="" type="checkbox"/>	Has a survey been performed to determine the presence of Asbestos Containing Materials?
2. <input type="checkbox"/>	<input checked="" type="checkbox"/>	Will the subject facility or construction activities include operations or equipment that emit or are capable of emitting an air contaminant? (See the APCD factsheet at <a href="http://www.sdapcd.org/info/facts/permits.pdf">http://www.sdapcd.org/info/facts/permits.pdf</a> , and the list of typical equipment requiring an APCD permit on the reverse side of this form. Contact APCD if you have any questions).
3. <input type="checkbox"/>	<input type="checkbox"/>	(ANSWER ONLY IF QUESTION 1 IS YES) Will the subject facility be located within 1,000 feet of the outer boundary of a school (K through 12)? (Search the California School Directory at <a href="http://www.cde.ca.gov/rs/sd/">http://www.cde.ca.gov/rs/sd/</a> for public and private schools or contact the appropriate school district).
4. <input type="checkbox"/>	<input checked="" type="checkbox"/>	Will there be renovation that involves handling of any friable asbestos materials, or disturbing any material that contains non-friable asbestos?
5. <input type="checkbox"/>	<input checked="" type="checkbox"/>	Will there be demolition involving the removal of a load supporting structural member?

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Verizon Wireless: Carmel Mountain Country Club  
 ADDRESS: 14050 CARMEL RIDGE RD  
 CITY/ZIP: SAN DIEGO /92128-4307

INSPECTION DATE: 09/08/2015 PAGE 1 OF 4  
 RECORD ID #: DEH2014-HUPFP-001141  
 TIME START: 11:30 AM END: 12:00 PM  
 SPECIALIST: Khan, Steven  
 INSPECTION CONTACT: Antonio Perez  
 TITLE: Site Tech  
 PHONE: (619) 417-8333  
 E-MAIL: Myrna.allende@verizonwireless.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Antonio Perez

TITLE: Site Tech

### INTRODUCTION:

Routine/Initial Cell Site inspection:

Onsite with Antonio Perez/ Site Tech to conduct the following:

- Initial/Routine cell site inspection.

### Observations:

-Verified quantities of the following inventory items disclosed via CERS:

\*Battery electrolyte ( 48.96 gallons)

\*DSL generator (210 gallons)

- Facility is accessible, clean and well maintained.
- No other Hazardous Materials above reportable threshold onsite.
- No Hazardous Wastes reported /maintained/observed/ onsite.
- CERS reviewed.

### INSPECTION REMARKS:

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Verizon Wireless: Carmel Mountain Country Club  
 ADDRESS: 14050 CARMEL RIDGE RD  
 CITY/ZIP: SAN DIEGO /92128-4307

INSPECTION DATE: 12/07/2015 PAGE 1 OF 4  
 RECORD ID #: DEH2014-HUPFP-001141  
 TIME START: 10:30 AM END: 10:45 AM  
 SPECIALIST: Khan, Steven  
 INSPECTION CONTACT: Antonio Perez  
 TITLE: Site Tech  
 PHONE: (619) 417-8333  
 E-MAIL: Myrna.allende@verizonwireless.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Antonio Perez

TITLE: Site Tech

### INTRODUCTION:

Routine/Initial Cell Site inspection:

Onsite with Antonio Perez/ Site Tech to conduct the following:

- Initial/Routine cell site inspection.

### Observations:

-Verified quantities of the following inventory items disclosed via CERS:

\*Battery electrolyte ( 49 gallons)

\*DSL generator (210 gallons)

- Facility is accessible, clean and well maintained.
- No other Hazardous Materials above reportable threshold onsite.
- No Hazardous Wastes reported /maintained/observed/ onsite.
- CERS reviewed.

### INSPECTION REMARKS:

## COMPLIANCE INSPECTION REPORT Handlers of Hazardous Materials and Small and Large Quantity Generators of Hazardous Waste

INSPECTION DATE: 12/07/2015 PAGE 3 OF 4  
RECORD ID #: DEH2014-HUPFP-001141

FACILITY NAME: \* Verizon Wireless: Carmel Mountain Country Club

ADDRESS: \* 14050 CARMEL RIDGE RD

CITY/ZIP: \* SAN DIEGO

92128-4307

Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. Incorporated provisions of Title 40 of the Code of Federal Regulations (CFR) are noted for reference. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions. HMBP = Hazardous Materials Business Plan; CUPA = Certified Unified Program Agency; CERS = California Environmental Reporting System; SQG = Small Quantity Hazardous Waste Generator; LQG = Large Quantity Hazardous Waste Generator

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Verizon Wireless: Carmel Mountain Country Club  
 ADDRESS: 14050 CARMEL RIDGE RD  
 CITY/ZIP: SAN DIEGO /92128-4307

INSPECTION DATE: 11/07/2017 PAGE 1 OF 2  
 RECORD ID #: DEH2014-HUPFP-001141  
 TIME START: 11:00 AM END: 11:30 AM  
 SPECIALIST: Chantal Eivaz  
 INSPECTION CONTACT: Daryl Bowen  
 TITLE: Engineer III  
 PHONE: (619) 517-8855  
 E-MAIL: daryl.bowen@verizonwireless.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Daryl Bowen TITLE: Engineer III

### INTRODUCTION:

#### ROUTINE INSPECTION

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, HMD implements the Unified Program in the County and regulates facilities that store reportable quantities of hazardous materials, and generate hazardous waste and medical waste.

Today I conducted a routine compliance inspection at **Verizon Wireless: Carmel Mountain Country Club** to verify compliance with Hazardous Materials Business Plan (HMBP) requirements. Consent to inspect was granted by Daryl Bowen, Engineer III. This facility is an unstaffed cellular/telecommunications site and stores reportable quantities of hazardous materials on-site in the form of an emergency diesel generator used for powering VZW cellular equipment. HMBP last certified in the California Environmental Reporting System (CERS) on 12/13/16. CERS ID: 10593163.

#### The following was observed on-site during today's inspection:

- 1x210 gallon aboveground storage tank of diesel (emergency generator)
- 24x2V lead acid batteries

*No violations were observed during today's inspection.*

Per Daryl Bowen, Verizon Wireless Engineer staff are trained online via training modules at least once a year on hazardous materials management and emergency response/evacuation procedures. Online training last completed on 06/28/17.

Per Daryl Bowen, the emergency diesel generator is serviced by Electronic Environments Corporation.

### INSPECTION REMARKS:

**Per California Health and Safety Code section 25508.1:**

Within 30 days of any one of the following events, a business subject to this article shall electronically update the information submitted to the statewide information management system via CERS:

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: **11/07/2017** PAGE **2** OF **2**  
RECORD ID #: **DEH2014-HUPFP-001141**

- (a) A 100 percent or more increase in the quantity of a previously disclosed material.
- (b) Any handling of a previously undisclosed hazardous material subject to the inventory requirements of this article.
- (c) Change of business or facility address.
- (d) Change of business ownership.
- (e) Change of business name.
- (f) (1) A substantial change in the handler's operations occurs that requires modification to any portion of the business plan.
- (2) For the purpose of this subdivision, "substantial change" means any change in a facility that would inhibit immediate response during an emergency by either site personnel or emergency response personnel, or that could inhibit the handler's ability to comply with Section 25507, change the operational knowledge of the facility, or impede implementation of the business plan.

*Note: Substantial change also includes the removal of a previously disclosed chemical from the facility because the chemical is no longer handled or stored.*

CONSENT TO CONDUCT INSPECTION GRANTED BY: Paul Weiss

TITLE: Environmental Manager

### INTRODUCTION:

Routine /Initial Cell Site inspection:

Today I conducted an initial/ routine inspection to determine facility compliance regarding the handling, storing, and reporting of hazardous materials.

Consent for today's inspection was granted by Paul Weiss/ Environmental Manager representing AT&T.

At the time of this inspection, this facility handles reportable amounts of hazardous materials and they are subject to hazardous materials business plan requirements.

During today's inspection I observed the following:

I verified quantities of the following inventory items disclosed via CERS:

\*Battery electrolyte ( 100 gallons)

At the time of inspection, this facility stores on-site reportable amounts of hazardous materials in the form of batteries containing electrolytes used for powering AT&T cellular equipment.

The facility is accessible, clean and well maintained. Facility is located in the NW corner of the receiving area and are painted a faux brick color.

-There are no other Hazardous Materials above reportable threshold onsite.

-There are no Hazardous Wastes reported /maintained/observed/ onsite.

-CERS has been reviewed and accepted.

- No violations were observed during today's inspection.

-Be advised: if amounts of reported hazardous materials fall below reportable threshold, HMD must be notified and a status verification inspection will be scheduled. Facility may be subject to a re-inspection fee if changes occur within the 18 month

**Re: 14050 Carmel Ridge Road, San Diego, California 92128**

Dear Ms. Alicia Jansen:

We have received your Public Records Act Request for records from Department of Toxic Substances Control.

After thorough review of our files we have found that, **no such records** exist in this office pertaining to the site/facility referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at:  
<http://www.envirostor.dtsc.ca.gov/public>.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (619) 516-1982.

Sincerely,

Beatriz Davila  
Office Technician

Alicia,

I can't see anything on the map on my phone. Can you please re-PDF to lock the changes in? PDF converter edits do not come through on the phones.

I'm at the city now looking into permits and have found a few different addresses for you.

Thank you.

Josh,

Attached is a map you can use for the site walk. If you can get a course map or maintenance yard map when you do the site walk even better.

There are 14 different APNs associated with the Golf Course located at 14050 Carmel Ridge Road, San Diego, CA 92128. APNs with different street addresses are in parenthesis but no street number address was provided for any of the APNs.

- 313-031-28-00 – 25.16 ACRES
- 313-031-32-00 – 12.07 ACRES
- 313-040-62-00 – 10.71 ACRES (N. Church Square)
- 313-040-60-00 – 9.61 ACRES (Bond Street)
- 313-653-40-00 – 5.16 ACRES (Bond Street)
- 313-660-43-00 – 3.76 ACRES
- 313-043-01-00 – 7.07 ACRES
- 313-043-02-00 – 7.32 ACRES
- 313-040-79-00 – 12.76 ACRES
- 313-043-03-00 – 5.54 ACRES
- 313-040-80-00 – 4.64 ACRES (Rancho Carmel Drive)
- 313-040-85-00 – 1.85 ACRES (Maintenance Station – North City Pkwy, San Diego, CA 92128)
- 313-704-02-00 – 9.19 ACRES
- 313-704-01-00 – 6.05 ACRES

The City of San Diego's Development Services Department is located at 1222 First Avenue, 2nd Floor, San Diego, 92101. Hours of operation are from 7:00am to 4:00pm, Monday through Thursday, and 10:00am to 4:00pm on Fridays. Please be aware that no walk-ins are accepted after 3:00pm.

Let me know if you have any questions or need anything else.

COMPLIANCE INSPECTION REPORT

BUSINESS NAME Carmel Mountain Ranch CC  
ADDRESS 14050 Carmel Ridge Rd  
CITY/ZIP San Diego 92128

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

PRO 10/13/97 TWT  
OCT 09 1997 File

Office Use Only

Routine Inspection:

- The Business Plan is on site but requires an update due to the removal of used oil & solvent.
- The electronic monitoring system on the underground tank requires annual certification. The last certification 6-95. Within 65 days have the tank monitoring system certified to be in good working order - mail results to this department.
- Note: Up grade requirements for the underground storage tanks are required to be completed by Dec. 1998. Review the requirements - Don't wait till its too late handout provided - and conduct all upgrades.
- \* Employee training is conducted and documentation is on site.
- Complete & submit The Wadden Monitoring page of the underground tank handout.

Re: H-26588

Carmel Mtn. Ranch Country Club  
14050 Carmel Ridge Rd.  
San Diego, Ca 92129

On 12/7/98, our company installed a Pomoco 511-C overspill containment manhole with 5 gallon overspill box. On 12/8/98, we installed OPW 61-SO overfill droptube. Existing system has containment boot under pump, containing flex connector. An M.S.A. tank monitor system, monitoring doublewall piping and interstitial area of tank is existing and in working order.

U.S.T. is a Joor doublewall tank equipped with striker plates.

Any questions please call.

## **PENALTY FEES FOR ESTABLISHMENT NO. H26588**

Dear Ms. Phillips:

This is in response to your request to have the penalty fees waived for the annual Health Permit renewal for the establishment located at 14050 Carmel Ridge Road, San Diego.

Your payment of \$350.00 was received on 12/4/98. The penalty fee in the amount of \$150.00 for this establishment is being waived.

Your Health Permit which expires 9/30/99 is enclosed. If you need additional assistance regarding this matter, please contact Karl Halbritter, Senior Clerk, at (619) 338-2438.

Sincerely,

EVIE EVANS, Senior Accountant

Re: Carmel Mountain Ranch Country Club  
Est. No. H26588

Dear Sir or Madam:

Enclosed please find our check in the amount of \$350.00 (and a copy of the Official Notice we received from your office) needed to renew the Hazardous Materials Establishment Permit for the above-referenced club. We are requesting that the \$50.00 late fee be waived because we have always renewed this permit on time in the past. The renewal application and our first check actually were mailed on September 16<sup>th</sup>, but they apparently never reached your office or cleared the bank. We have enclosed a copy of the first check for your review.

We would appreciate your consideration in this request. If you have any questions, please do not hesitate to give us a call at 972/960-8677. Thank you very much.

Very truly yours,

### \*\* OFFICIAL NOTICE \*\*

Our records indicate that the Health Permit for the business listed below has expired and not been renewed within the 30 day grace period.

CARMEL MOUNTAIN RANCH C.C.  
14050 CARMEL RIDGE RD  
SAN DIEGO CA 92128

#### PENALTIES:

In accordance with the County Code of Regulatory Ordinances, a penalty of 50% of the original fee due or \$50, whichever is less, has been assessed to your account.

THE TOTAL AMOUNT NOW DUE IS:           \$400.00          

YOU ARE HEREBY NOTIFIED TO REMIT PAYMENT TO THIS OFFICE IMMEDIATELY.

If payment is not received within 60 days after the expiration of your Health Permit, an additional penalty of 100% of the original fee due or \$100, whichever is less, will be assessed to your account.

#### BUSINESS CLOSURE:

Be advised that you are operating a Health Regulated Business without a valid Health Permit and are in violation of State law, the California Health and Safety Code and various local ordinances. Failure to obtain a Health Permit is a misdemeanor and may be subject to legal action and/or closure of your business. Every day this violation occurs constitutes a separate offense.

#### QUESTIONS:

If you have any questions regarding this Official Notice, please contact the Dept. of Environmental Health, Permitting Section at (619) 338-2251.

Re: Cobblestone Enterprises of California, Inc.

Dear Ms. Cardenas:

Enclosed please find six (6) applications for Hazardous Materials Health Permits needed for the following clubs:

1. Morgan Run Resort & Club;
2. The Vineyard at Escondido;
3. Carmel Mountain Ranch Country Club (2 applications);
4. El Camino Country Club; and
5. Balboa Park Golf Course.

Cobblestone Enterprises of California, Inc. is the new Operator at each of these clubs. It is leasing the facilities from the current owners.

Per my conversation with Karl Halbridter in your office, the bills for these permits will be mailed out at a later date. If you have any questions regarding these applications, please do not hesitate to give me a call at 972/960-8677. Thank you very much.

Re: Compliance Inspection Report for Carmel Mountain Ranch Country Club  
Dated 11/27/96

Dear Sirs:

This law firm represents Carmel Mountain Ranch Country Club and, in that capacity, we have been provided a copy of the recent Compliance Inspection Report completed for this facility (the "Report"). We have been asked to respond to the final item addressed on page 1 of the Report.

The Report states "There was no agreement between the property owner, National Golf Properties, and the business operator, Cobblestone Group, which specified which party was responsible for UST monitoring, record-keeping and reporting requirements." There are actually two different agreements which address environmental compliance at this facility.

On March 10, 1995, the property was sold from Cobblestone Golf Group, Inc. ("CGG"), to National Golf Operating Partnership, L.P. ("NGOP"), pursuant to a Purchase and Sale Agreement and, on the same date, the property was leased back by CGG from NGOP. The substance of these two transactions left CGG as the tenant rather than the owner of the property. Full compliance with environmental rules and regulations was the sole responsibility of CGG when it owned the facility and this obligation remains one solely of CGG as tenant. We have enclosed copies of both the Purchase and Sale Agreement and the Lease Agreement, each dated March 10, 1995, and each containing the environmental compliance language required, for your records.

In the event any additional information is needed with regard to this matter, please do not hesitate to contact the undersigned.

Very truly yours,

ADDISON LAW FIRM,

**County of San Diego  
Department of Environmental Health**

June 18, 1998

Dear Tank Owner/Operator:

**SECOND NOTIFICATION - UNDERGROUND STORAGE TANK UPGRADE  
DEADLINE: DECEMBER 22, 1998**

A recent review of our records indicates that minor equipment upgrades or verification of upgrades are needed for one or more of the underground storage tanks (USTs) located at your facility in order for you to meet the State and Federal 1998 UST upgrade requirements (California Code of Regulations, Title 23, Division 3, Chapter 16, Article 6 and 40 Code of Federal Regulations Section 280.21). The deadline for compliance with these requirements is **December 22, 1998**. All underground storage tank systems in operation at that time (including those tank systems that store waste oil) must be in compliance or enforcement measures, including restricting the tanks from continued operation, will be initiated.

With the passage of Assembly Bill (AB) 1491, starting January 1, 1999, fuel distributors **will be prohibited from delivering fuel** to facilities that do not meet the 1998 UST upgrade requirements. Facilities whose **motor vehicle fuel** tank systems are in compliance with the 1998 UST upgrade requirements will receive an UST Operating Permit and a State Certification of Compliance prior to January 1, 1999. In order for a facility to receive a State Certification of Compliance **all motor vehicle fuel tank systems on site** must be in compliance with the 1998 UST upgrade requirements and any non-compliant motor vehicle fuel tank systems must be removed or in temporary closure. Without this State Certification your fuel distributor **will not be able to deliver fuel** to your facility after January 1, 1999.

Enclosed is a printout of the tanks this Department has listed as being owned or operated by you and a check list of the necessary upgrades you must do to ensure compliance with the 1998 UST upgrade requirements. Prior to upgrading your tank system (including piping) you must first receive a permit from this Department. Please note that if you

already performed the required upgrades without first obtaining a permit from this Department we would have no record of completion. If this is the case, you must complete the enclosed "Certification of Compliance for Underground Storage Tank 'Minor Upgrade' Requirements" and submit that along with a **proof** of upgrade, such as an itemized work order/invoice, to this Department. Proof of compliance includes either: (1) detailed records showing the date of installation and purchase records including the make and model of the device; or (2) recent records (within the last year) from a qualified technician verifying installation or testing of the device. Test records used to verify electronic leak detectors, automatic tank gauges, pressurized product leak detectors, and high level alarm systems must be detailed including the name and model of the device, the number of devices tested, and the location of each device.

Please be advised, that after review of the certification of compliance along with any work order if DEH determines that the upgrade work required a permit from this office, a 1998 facility compliance certificate will not be issued until an application with fees and as-builts are submitted. In addition, if any or all of these **minor upgrades** have not been performed you must first receive a **permit** from this Department prior to performing the upgrades or modifications. Please mail all certification of compliance and proof of upgrade to:

San Diego County Department of Environmental Health  
P.O. Box 12961  
San Diego, CA 92112-9261  
Attention: UST Plan Check

A 1998 UST upgrade hotline number, (619) 237-8484, has been established to **answer your questions** regarding the 1998 UST upgrade requirements. We encourage you to act now. Please remember it is your responsibility as the owner/operator of your tanks to ensure that they meet the 1998 UST upgrade requirements. Do not be caught without fuel on January 1, 1999.

Sincerely,

JANET ORTIZ, Chief  
Hazardous Materials Management Division

## COMPLIANCE INSPECTION REPORT

EST. NUMBER H 26588

DATE 9/1/99

PAGE 2 OF 2  
SD 92128

BUSINESS ADDRESS: 14050 Camel Ridge Rd.

**VIOLATION REPORT:** The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

### I HAZARDOUS WASTE REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68.905 **V0108 W** \_\_\_\_\_
- No EPA Identification Number 66262.12 **V0105 W** \_\_\_\_\_
- Waste Manifests/Receipts not on-site for 3 years 66262.40 **V0118 W** \_\_\_\_\_
- Manifest not properly completed 66262.23 **V0120 W** \_\_\_\_\_
- Manifest copy not sent to DTSC 66262.23 **V0115 W** \_\_\_\_\_
- TSDF signed-manifest not on-site 66262.40 **V0121 W** \_\_\_\_\_
- Biennial report not sent to DTSC 66262.41 **V0122 W** \_\_\_\_\_
- LDR Documentation not available 66268.7 **V0123 W** \_\_\_\_\_
- Exception Rpt. not filed with DTSC 66262.42 **V0116 W** \_\_\_\_\_
- Operating TSDF without authorization 25201 **V0124 W** \_\_\_\_\_

#### STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262.34 **V0221 W** \_\_\_\_\_
- Failure to clean up hazwaste off of floor surface 66262.10b **V0313 W** \_\_\_\_\_
- Waste container missing/improperly labeled 66262.34 **V0222 W** \_\_\_\_\_
- Haz Materials not properly labeled 25124 **V0223 W** \_\_\_\_\_
- Waste container not kept closed 66265.173 **V0202 W** \_\_\_\_\_
- Waste container in poor condition 66265.171 **V0205 W** \_\_\_\_\_
- Waste container(s) not properly managed 66265.173 **V0210 W** \_\_\_\_\_
- Damaged container not repackaged 66265.171 **V0226 W** \_\_\_\_\_
- Container incompatible with waste 66265.172 **V0207 W** \_\_\_\_\_
- Incompatibles in the same container 66265.177 **V0224 W** \_\_\_\_\_
- Incompatibles not stored separately 66265.177 **V0213 W** \_\_\_\_\_
- Ignitable Waste less than 50 feet 66265.176 **V0214 W** \_\_\_\_\_
- Ignitable Waste not grounded 66265.31 **V0215 W** \_\_\_\_\_
- Storage area not inspected weekly 66265.174 **V0216 W** \_\_\_\_\_

#### DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to \_\_\_\_\_ 25189.5 **V0313 W** \_\_\_\_\_
- Waste determination not made 66262.11 **V0319 W** \_\_\_\_\_
- Unlawful transport of haz. waste 25163 **V0315 W** \_\_\_\_\_
- Waste transported without manifest 66262.20 **V0316 W** \_\_\_\_\_
- Extremely Haz Waste Permit not obtained 25205.7 **V0317 W** \_\_\_\_\_

#### TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.16 **V0405 W** \_\_\_\_\_
- Training program not adequate 66265.16 **V0406 W** \_\_\_\_\_
- Facility not designed to minimize release 66265.31 **V0501 W** \_\_\_\_\_
- Spill control equip not available 66265.32 **V0508 W** \_\_\_\_\_
- Aisle space is obstructed 66265.35 **V0509 W** \_\_\_\_\_
- Contingency plan not prepared and/or on file 66265.51, 66265.53 **V0609 W** \_\_\_\_\_

#### MISCELLANEOUS

- Waste oil contaminated 25250.7 **V0225 W** \_\_\_\_\_
- Used oil filters improperly managed 66266.130 **V0701 W** \_\_\_\_\_
- Damaged batteries improperly managed 66266.81 **V0702 W** \_\_\_\_\_
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) **V0125 W** \_\_\_\_\_
- Onsite treatment of waste without authorization 25201 **V0125 W** \_\_\_\_\_

### II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

#### GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284 **V3002 T** \_\_\_\_\_
- Repair/modify/close permit not obtained 68.1005 **V3007 T** \_\_\_\_\_
- UST Permit Application not submitted 25286(a) **V3010 T** \_\_\_\_\_
- Operating permit conditions violated 2712 **V3011 T** \_\_\_\_\_
- Failed to notify HMMD of changes 25284 **V3012 T** \_\_\_\_\_
- No owner/operator agreement 25284 **V3005 T** \_\_\_\_\_
- No records of financial coverage 25292.2 **V3013 T** \_\_\_\_\_
- No maint/mon/calib records available 2712(b), 2641(j) **V3001 T** \_\_\_\_\_
- Monitoring Equip. not tested annually 2630, 2641 **V3003 T** \_\_\_\_\_

#### MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643 **V3014 T** \_\_\_\_\_
- Integrity test not conducted 25292 **V3015 T** \_\_\_\_\_
- Copy of tank test not submitted to HMMD within 30 days 2643 **V3016 T** \_\_\_\_\_
- Manual tank gauging (<2000 gal) 2645 not done properly **V3017 T** \_\_\_\_\_
- Reconciliation not done properly 2646 **V3018 T** \_\_\_\_\_
- Reconciliation not approved for facility 2646 **V3019 T** \_\_\_\_\_
- Dispenser meter(s) not calib annually 2646 **V3020 T** \_\_\_\_\_
- Improper liquid measurements 2646 **V3021 T** \_\_\_\_\_
- Stick in poor condition 2646 **V3022 T** \_\_\_\_\_
- Improper monthly reconciliation 2646 **V3023 T** \_\_\_\_\_
- Failed to report excessive variation 2646 **V3024 T** \_\_\_\_\_
- Pressurized Product Piping Leak Device not tested annually 25292 **V3025 T** \_\_\_\_\_
- No written monitoring procedure 2641 **V3027 T** \_\_\_\_\_
- No written emergency response plan 2641 **V3027 T** \_\_\_\_\_
- SIR reporting incorrectly done 2646.1 **V3004 T** \_\_\_\_\_

#### MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632 **V3026 T** \_\_\_\_\_
- No written monitoring procedure 2632 **V3027 T** \_\_\_\_\_
- Written emergency response plan not available 2632 **V3028 T** \_\_\_\_\_
- Spill/Overfill equip. not maintained or installed 2635 **V3029 T** \_\_\_\_\_

#### RELEASE REPORTING

- Failure to report an unauthorized release 25295 **V3009 T** \_\_\_\_\_
- Release record log not available 2651, 2650 **V3030 T** \_\_\_\_\_
- No leak report/investigation/action 2652 **V3031 T** \_\_\_\_\_

#### CLOSURE

- Temporary closure req. not completed 2671 **V3006 T** \_\_\_\_\_
- Unused tank not properly closed 25298 **V3032 T** \_\_\_\_\_
- Permanent closure req. not completed 2672 **V3033 T** \_\_\_\_\_
- Failed to apply for temporary closure 25298 **V3008 T** \_\_\_\_\_

### III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68.1105 **V2001 W** \_\_\_\_\_
- Business Plan not established/implemented 25503.5 **V2002 W** \_\_\_\_\_
- Business Plan not submitted to HMMD 25505 **V2007 W** \_\_\_\_\_
- Business Plan not amended 25505 **V2003 W** \_\_\_\_\_
- Personnel Training Records not available 19 CCR 2732 **V2302 W** \_\_\_\_\_

#### RELEASE REPORTING

- Failure to report a release/threatened release 25307 **V2008 W** \_\_\_\_\_

#### BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504 **V2201 W** \_\_\_\_\_
- Emergency Contacts not provided/current 25509 **V2203 W** \_\_\_\_\_
- Personnel Training Program inadequate 25504 **V2301 W** \_\_\_\_\_
- Inventory is incomplete 25504 **V2005 W** \_\_\_\_\_
- Site Map is not sufficient 25509 **V2202 W** \_\_\_\_\_
- Acutely Haz. Mat. not registered 25533 **V2009 W** \_\_\_\_\_

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

DISTRIBUTION: WHITE-RETURN TO HMMD  
YELLOW-BUSINESS RETAINS

## SECTION A - HAZARDOUS WASTE GENERATION

**NOTE:** If you know that your business generates, stores or handles hazardous wastes, please continue with Section B of the questionnaire. All others must complete #1 through #6 that follows.

1. Does your business or service generate, store or handle any of the by-products or wastes listed in the box below?

YES  NO

Circle the letters of the categories found at your business.

- A. Solvents
  - a. Halogenated - chloroform, methyl chloride.
  - b. Oxygenated - acetone, butanol, ethyl acetate.
  - c. Hydrocarbons - benzene, hexane, toluene.
  - d. Unspecified solvent mixtures.
- B. Sludges - Alum, paint, degreasing, caustic, paper, tetraethyl lead, lime, tank bottom waste and metal sludge.
- C.** Waste Oil/Mixed Oil - Waste motor oil, fuel tank cleaning residue, oil separation waste, lube oil processing waste.
- D. Pesticides and Pesticide Rinse Water - Parathion, Malathion, Diazinon, and other pesticides; pesticide residue from container rinsing.
- E. PCB - Mineral oil contaminated-electrical capacitors, ballasts, and electrical transformers.
- F. Monomer/Polymeric Resin Waste - Plastic coating and laminating waste, resin coating, metal binding and coating resin rinse waters.
- G. Biological Waste - Infectious hospital waste, laboratory and pharmaceutical research waste exceeding 100 kg/month.
- H. Organic Liquid/Solids - Polymer extrusion waste, PVC coating residue, adhesive waste, organic stripper from semiconductor processing waste.
- I. Contaminated Aqueous Solutions:
  - a. With reactive anions - azide, bromate, chlorate, cyanide, fluoride, hypochlorate, nitrite, perchlorate, sulfide anions, plating rinse solutions, metal coatings and metal parts cleaning solutions.
  - b. With heavy metals - including antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium and zinc.
  - c. With organic residues - including degreasing and metal cleaning solutions, equipment cleaning, dry cleaning, anticorrosion and coolant solution wastes.
- J. Acid Solutions - Wastes battery acid, plating waste, printed circuit etching residue, silicon wafer reclamation and cleaning wastes, galvanizing wastes, other acidic solution wastes with  $pH \leq 2$ .
- K. Alkaline Solutions - Wastes from metal plating, anodizing and etching, containing sodium or calcium hydroxide, and other solutions with  $pH \geq 12.5$ .
- L. Asbestos - Insulation products, old pipe lagging.
- M. Metal Sludges and Dusts - Metal machining coolant sludges, metal pickling sludges, metal machining dusts.
- N. Miscellaneous - Chemical toilet waste, photochemical processing waste, laboratory chemical wastes, drilling mud, soap and detergent production wastes.

2. Do you dispose of any items in #1 by discharging them into the sewer system including down sinks, floor drains, toilets, etc.?

YES  NO  If yes, which category(ies) of by-product or wastes?

---

3. Do you dispose of any items listed in #1 in a way other than disposal into the sewer system (for example, trash cans, dumpster, storm drain, on the ground, evaporation ponds, land fills, etc)? YES  NO

If yes, which category(ies) of by-products or wastes? \_\_\_\_\_

---

4. Do you recycle any of the items listed in #1 through another company/contractor or by yourself? YES  NO

If yes, which category(ies) of by-products or wastes? \_\_\_\_\_

---

5. Do you manifest (prepare the required transportation document for hazardous wastes) any items listed in #1? YES  NO

6. If you answered "yes" to any of the questions (1, 3, 4, or 5) your business or service does generate hazardous waste and a permit from the San Diego County Department of Environmental Health is required. Continue with Section B of the questionnaire.

PLEASE RETURN THIS SECTION

SECTION B - INVENTORY OF HAZARDOUS MATERIALS

A "hazardous substance" is a chemical compound, or product for which a manufacturer or producer is required by law to prepare a Material Safety Data Sheet (MSDS) for that substance. An MSDS is a document (usually 2 or 3 pages) which contains chemical composition information, fire and explosive data, health hazard data, reactivity data, spill or leak procedures, special protection information and special precaution information. An MSDS for a hazardous substance can be obtained from the supplier of that substance. Hazardous substances also include materials requiring placard warnings during transportation.

1. Does your establishment use or handle hazardous substances in quantities equal to or greater than 55 gallons, 500 pounds, or 200 cubic feet of compressed gas at any one time?

Yes  No

2. Review the health hazards data or health and safety section of the Material Safety Data Sheets (MSDS) to see if any chemicals or substances you use are designated as a cancer-causing substance (carcinogen) or substance which may cause birth defects, miscarriages, or damage to the human reproductive system (reproductive toxin). Does your establishment use or handle carcinogens or reproductive toxins?

Yes  No

3. Does your establishment use or handle gases with Threshold Limit Values (TLV) or Time Weighted Average (TWA) of 10 parts per million or less?

Yes  No

If you have answered "Yes" to any of the above questions (1, 2, or 3), you do use or handle hazardous materials that are subject to inventory requirements and a permit from the San Diego County Department of Environmental Health is required. Continue with Section C of the questionnaire.

SECTION C - UNDERGROUND STORAGE TANKS

An "underground storage tank" is a tank, including piping, which holds hazardous wastes (as defined in Section A) or hazardous substances (as defined in Section B, regardless of volume) and has 10% or more of the total volume located below grade.

Does your business have underground storage tanks as defined above?

Yes  No

If you answered "yes", a permit from the San Diego County Department of Environmental Health is required.

Underground storage tanks may not be installed, removed, destroyed, repaired or operated without permits from this Department.

Continue with the Hazardous Materials Summary on page 4.

PLEASE RETURN THIS SECTION

HAZARDOUS MATERIALS SUMMARY

Complete the following information regarding the handling of hazardous materials at your business or service. Check one statement.

- This business or service does generate hazardous waste, handles hazardous materials subject to the inventory requirements and/or has underground storage tanks that requires a permit from the San Diego County Department of Environmental Health.
- I have determined that this business or service does not generate hazardous waste, handle hazardous materials subject to the inventory requirements or has underground storage tanks requiring permits from the San Diego County Department of Environmental Health.

I declare under penalty of perjury that to the best of my knowledge and belief the statements made herein are correct and true. I consent to all necessary inspections allowed by law and incidental to the issuance of required permit(s) and the operation of this business.

Type of Business GOLF Course

Please complete the business information on the following page and return this questionnaire to the San Diego County Department of Environmental Health in the pre-addressed return envelope or mail using the following address.

SAN DIEGO COUNTY  
DEPARTMENT OF ENVIRONMENTAL HEALTH  
HAZARDOUS MATERIALS MANAGEMENT DIVISION  
P.O. BOX 129261  
SAN DIEGO CA 92112-9261

If a San Diego County Hazardous Materials Management Permit is required for your business or service a representative of this Department will complete an inspection of your business. Permit fees will be determined from the inspection and a billing statement will be mailed.

NOTE: If you do not use hazardous materials, generate hazardous waste, or have underground storage tanks you are still required to return this form.

A representative of the San Diego County Department of Environmental Health may contact you to verify the information provided on this questionnaire.

Attn: Paz

Paz:

Per our conversation last week I am faxing over a list of Properties our company is in the processing of taking over. These courses were all previously owned by Cobblestone Entorprisus of California Inc. We need to get Hazardous Material permit in the new owners name (American Golf Corporation). The properties are as follows:

El Camino Country Club  
3202 Vista Way  
Oceanside, CA 92056  
Est.# H06016

Balboa Park Golf Course  
2600 Golf Course Drive  
San Diego, CA 92102  
Est.# H32905

Carmel Mountain Ranch  
14050 Carmel Ridge Road  
San Diego, CA 92128  
Est.# H29689  
Est.# H26588

Eagle Crest Golf Club  
2942 Old Ranch Road  
Escondido, CA 92027  
Est.# H29628

The Vineyard at Escondido  
925 San Pasqual Road  
Escondido, CA 92025  
Est.# H34027

Please call me with instructions on what needs to be done in this matter. The effective take over date is April 1, 1999.

Thank you,

  
Tara Jackson  
Corporate Accountant

## COMPLIANCE INSPECTION REPORT

DATE 12/21/00

PAGE 2 OF 2

BUSINESS ADDRESS: 14650 Carmel Ridge Rd. San Diego 92128

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

### I HAZARDOUS WASTE REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68.905 V0108 W
- No EPA Identification Number 66262.12 V0105 W
- Waste Manifests/Receipts not on-site for 3 years 66262.40 V0118 W
- Manifest not properly completed 66262.23 V0120 W
- Manifest copy not sent to DTSC 66262.23 V0115 W
- TSDf signed-manifest not on-site 66262.40 V0121 W
- Biennial report not sent to DTSC 66262.41 V0122 W
- LDR Documentation not available 66268.7 V0123 W
- Exception Rpt. not filed with DTSC 66262.42 V0116 W
- Operating TSDf without authorization 25201 V0124 W

#### STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262.34 V0221 W
- Failure to clean up hazwaste off of floor surface 66262.10b V0313 W
- Waste container missing/improperly labeled 66262.34 V0222 W
- Haz Materials not properly labeled 25124 V0223 W
- Waste container not kept closed 66265.173 V0202 W
- Waste container in poor condition 66265.171 V0205 W
- Waste container(s) not properly managed 66265.173 V0210 W
- Damaged container not repackaged 66265.171 V0226 W
- Container incompatible with waste 66265.172 V0207 W
- Incompatibles in the same container 66265.177 V0224 W
- Incompatibles not stored separately 66265.177 V0213 W
- Ignitable Waste less than 30 feet 66265.176 V0214 W
- Ignitable Waste not grounded 66265.31 V0215 W
- Storage area not inspected weekly 66265.174 V0216 W

#### DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to 25189.5 V0313 W
- Waste determination not made 66262.11 V0319 W
- Unlawful transport of haz. waste 25163 V0315 W
- Waste transported without manifest 66262.20 V0316 W
- Extremely Haz Waste Permit not obtained 25205.7 V0317 W

#### TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.16 V0405 W
- Training program not adequate 66265.16 V0406 W
- Facility not designed to minimize release 66265.31 V0501 W
- Spill control equip not available 66265.33 V0508 W
- Aisle space is obstructed 66265.35 V0509 W
- Contingency plan not prepared and/or on file 66265.51, 66265.53 V0609 W

#### MISCELLANEOUS

- Waste oil contaminated 25250.7 V0225 W
- Used oil filters improperly managed 66266.130 V0701 W
- Damaged batteries improperly managed 66266.81 V0702 W
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) V0125 W
- Onsite treatment of waste without authorization 25201 V0125 W

### III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68.1105 V2001 W
- Business Plan not established/implemented 25503.5 V2002 W
- Business Plan not submitted to HMMD 25505 V2007 W
- Business Plan not amended 25505 V2003 W
- Personnel Training Records not available 19 CCR 2732 V2302 W

#### RELEASE REPORTING

- Failure to report a release/threatened release 25507 V2008 W

### II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

#### GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284 V3002 T
- Repair/modify/close permit not obtained 68.1005 V3007 T
- UST Permit Application not submitted 25286(a) V3010 T
- Operating permit conditions violated 2712 V3011 T
- Failed to notify HMMD of changes 25284 V3012 T
- No owner/operator agreement 25284 V3005 T
- No records of financial coverage 25292.2 V3013 T
- No main/monit/calib records available 2712(b), 2641(j) V3001 T
- Monitoring Equip. not tested annually 2630, 2641 V3003 T

#### MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643 V3014 T
- Integrity test not conducted 25292 V3015 T
- Copy of tank test not submitted to HMMD within 30 days 2643 V3016 T
- Manual tank gauging (<2000 gal) 2645 not done properly V3017 T
- Reconciliation not done properly 2646 V3018 T
- Reconciliation not approved for facility 2646 V3019 T
- Dispenser meter(s) not calib annually 2646 V3020 T
- Improper liquid measurements 2646 V3021 T
- Stick in poor condition 2646 V3022 T
- Improper monthly reconciliation 2646 V3023 T
- Failed to report excessive variation 2646 V3024 T
- Pressurized Product Piping Leak Device not tested annually 25292 V3025 T
- No written monitoring procedure 2641 V3027 T
- No written emergency response plan 2641 V3027 T
- SIR reporting incorrectly done 2646.1 V3004 T

#### MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632 V3026 T
- No written monitoring procedure 2632 V3027 T

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS:

Submit three (3) copies of this application package, including plan drawings, with the required fee to the Department of Health Services, Hazardous Materials Management Unit, Room 311, 1700 Pacific Highway, San Diego, CA 92101. Checks should be made payable to the County of San Diego.

A permit will be issued by the Department of Health Services (DHS) upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in this application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit has been issued.

Once the permit has been issued, it is the permittee's responsibility to notify the DHS at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III and IV).

UNDERGROUND HAZARDOUS MATERIALS STORAGE TANK FACILITY

PART II

APPLICATION FOR A PERMIT TO CONSTRUCT

A. Total number of tanks to be installed 1

B. Type of primary containers:

Tank #	Manufacturer	Composition	Capacity	Double or Single Wall	Material to be Stored
1	JOCR	PLASTEEL	500	DOUBLE	GAS
2					
3					
4					

Attach additional sheets as needed for primary containers.

C. Type of secondary containment:

- Double Wall Tanks       Flexible Liner (liner thickness) \_\_\_\_\_  
 Vault       Other \_\_\_\_\_

Manufacturer JOCR

If other than Double Wall Tanks, will all tanks be in the same secondary containment enclosure? Explain \_\_\_\_\_

Will a system be installed to de-water the containment area? Explain \_\_\_\_\_

NO

D. Tank leak detection/monitoring system:

- Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.  
Manufacturer PETROSENTRY LEAK MONITOR SYSTEM
- Daily manual monitoring of the space between the primary and secondary containers using "dip stick" readings or visual determination.  
Please specify: \_\_\_\_\_
- Daily Inventory Control/Records reconciliation (for motor vehicle fuels only)

NOTE: If daily gauging and records reconciliation is to be used as the monitoring system, a letter from the property owner must be provided to this Department outlining the frequency and method of monitoring the space between the primary and secondary containers, as well as a statement that the tanks will be tested using an approved testing method every year.

Other. Explain \_\_\_\_\_

E. Piping Materials and Construction:

Primary Containment FLG PIPE 2" Manufacturer/Model SMITH  
Secondary Containment FLG PIPE 3" Manufacturer/Model # 1 TELEFLEX  
(if applicable)

F. Type of product delivery system (i.e., pressurized, suction) SUCTION

G. Piping leak detection/monitoring system:

- Leak detector on pressurized line (for motor vehicle fuels only)  
Manufacturer [REDACTED]
- Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.  
Manufacturer PETROSENTRY LEAK MONITOR SYSTEM
- Daily manual monitoring of the space between the primary and secondary contain-ers using "dip stick" readings or visual determinations.  
Please specify \_\_\_\_\_
- Other \_\_\_\_\_

H. Describe the tank overflow protection system you plan to use. Check all that apply.

- Product level sensing device equipped with high level alarm and/or automatic shut off device. Specify type: \_\_\_\_\_
- Ball float valve on vent and vapor lines
- Other. Explain POMECO III-A SPILL CONTAINMENT MH SYSTEM

I. Indicate type/manufacturer of vapor recovery system to be used:

EMCO

NOTE: Those systems with product flow thru the vapor lines during normal operation require secondary containment of these lines. NO

J. What is the approximate depth to ground water? \_\_\_\_\_

Basis of determination \_\_\_\_\_

K. Attach a certification from the manufacturer, or his authorized representative, of the tank and piping materials as to the capability of the tank and piping materials to store the proposed hazardous substances.

L. Attach three copies of Plans showing:

1. Location of all existing and proposed structures
2. Location of all existing underground tanks and piping (indicate if tanks are to be removed or abandoned)
3. Location of all proposed tanks and piping and their secondary containment
4. Cross section of tank and piping system including secondary containment, overflow protection equipment, monitor ports and equipment, extension of all pipes and ports to finish grade

5. Location and detail of monitoring/leak detection systems
6. Location of underground utility lines and vaults
7. Site address, property lines, scale, north arrow
8. Surface elevation and location of 100 year flood plain, if applicable
9. Equipment summary

M. Required Inspections - New Tank Installations

Each new tank installation must be inspected by the DHS at each of the following stages:

1. installation of secondary containment (liner) system, where applicable
2. delivery and test of tank on site; excavation complete; placement of tank in excavation
3. product line and associated piping - pressure test on lines and tank; overfill protection devices installed
4. monitoring system installed; monitor ports brought to surface

Projects involving repiping only will normally require just one inspection (at the line pressure-test stage).

Please refer to "Underground Tank Inspection Record - New Tank Installation" (DHS:HW-914) for additional details, or call 236-2222.

- N. I declare that to the best of my knowledge and belief the statements and information provided above are correct and true. I understand that information in addition to that provided above may be needed in order to obtain a permit from the Department of Health Services (DHS) and that no work is to begin on this project until the permit is issued.

I understand that any changes in design, materials or equipment will void my permit to construct if prior approval is not obtained.

I understand that a permit to operate the underground storage tank system must be obtained from the Department within 60 days of putting the system into use. This is the responsibility of the tank owner. Conditions of the permit to operate include an acceptable tank monitoring and testing schedule, submittal of an annual report form, and regular inspection by the DHS.

I will notify the Department of Health Services at least two working days (48 hours) in advance to schedule each required inspection. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

## SECONDARY CONTAINMENT BOOTS FOR DOUBLE WALL PIPING SYSTEMS

Designed specifically to contain flexible connectors, Teleflex Secondary Containment Boots are engineered for the extremes of the underground environment.

Teleflex Boots consist of a 3-9/16 inch ID boot and cap available for 1½ inch and 2 inch ID connectors. Each boot is made of a nitrile innercore, inner spring and a reinforced nitrile/neoprene cover. Special ozonites and fungicides are added to this blend for long life underground. Teleflex Secondary Containment Boots resist all types of fuel blends and chemicals including hydrocarbons, methanol, ethanol, chlorinated hydrocarbons, aromatic and aliphatic oils, solvents and dilute acids and alkalies. The operating temperature range is -26°F to 212°F. The boots are easily attached with stainless steel wormgear clamps to standard 3 inch FRP pipe.

ASSEMBLY NUMBER	HOSE BOOT I.D. SIZE	"A" HEX SIZE	CONNECTOR I.D. SIZE
60-10523-0240	3-9/16"	2"	1½"
60-10524-0240	3-9/16"	2½"	2"

DO NOT APPLY WRENCH OR HEX KEY TO THE POINT OF THE DRILL BIT. WRENCH OR HEX KEY ON THE POINT OF THE DRILL BIT WILL DESTROY THE POINT AND CAUSE THE DRILL BIT TO BREAK.

**NEW!**  
**PRELIMINARY**

24-HOUR MONITORING FOR LEAKING UNDERGROUND STORAGE TANKS ■

Leaking underground storage tanks have recently been identified as potential sources for both soil and groundwater contamination. Local, state and federal agencies are already taking action to help reduce possible environmental damage by legislating tough new guidelines regarding the installation, location and monitoring of underground storage tanks.

To help facilities comply with both current and proposed pollution control measures, Petro Vend is introducing the Petro Sentry Tank Leak Detection System. This low-cost, low maintenance instrument can detect gasoline and other light hydrocarbon vapors that can leak from underground storage tanks. A liquid sensor is also available to detect the presence of liquid buildup.

The instrument is comprised of four long-life, solid-state sensors. The vapor or liquid sensors are connected to a centrally located monitoring and alarm module. The sensors can be located up to 500 feet from the monitor. Placed in bore holes around the perimeter of the tank or between the tank's walls, the sensors continuously monitor for vapor or liquid presence. Signals are then sent back to the alarm module.

## FEATURES

- Interfaces with Petrosonic III.
- Simple setup and operation. No complex procedures or calibration equipment.
- Background interferences (such as methane) cancelled during setup.
- Long-life, solid-state sensors that are not degraded by high vapor concentrations or liquid submersions.
- Intrinsically safe sensors for Class I, Division 1, Groups C&D, as defined by the National Electrical Code. UL listed.
- Maintenance is reduced to a simple sensitivity check. (Expose the vapor sensor to hydrocarbon vapors and check its response.)
- Relays are standard for remote alarm and remote trouble.
- Audible and visual alarms provided with front panel test button. Discrete LED's inside the unit provide indication of which sensor has caused the alarm or trouble.
- Built-in time delay to prevent false alarms.
- Up to 4 interchangeable liquid or vapor sensors.
- Miniature vapor or liquid sensors are available for use between the walls of small tanks.

## SPECIFICATIONS

### OPERATING

#### Operating Temperature:

Sensor:  $-5^{\circ}\text{F}$  to  $+122^{\circ}\text{F}$  ( $-20^{\circ}\text{C}$  to  $+50^{\circ}\text{C}$ )  
 Monitor:  $-5^{\circ}\text{F}$  to  $+122^{\circ}\text{F}$  ( $-20^{\circ}\text{C}$  to  $+50^{\circ}\text{C}$ )

#### Response Time:

Vapor sensor: 30 seconds max  
 Liquid sensor: 30 seconds max

#### Recover Time:

Vapor sensor: 1 minute max  
 Liquid sensor: 1 minute max

#### Alarm Delay Time: Immediate or $3 \pm 0.5$ hours (can be bypassed)

#### Sensor Life:

Vapor sensor: 2 years min  
 Liquid sensor: 2 years min

#### Effects of Liquid Immersion:

Vapor sensor: No damage  
 Liquid sensor: Activates alarm

#### Max Wire Distance: 500 ft using 18 AWG (monitor to sensor)

### PHYSICAL

**Power Requirement:** 115/220 Vac, 60 VA, 60 Hz

#### Dimensions:

Monitor:  $8\frac{1}{4}''$  h x  $6\frac{1}{4}''$  w x  $4\frac{1}{4}''$  d  
 Large liquid or vapor sensor:  $\frac{3}{8}''$  dia x  $2\frac{1}{2}''$  long  
 Miniature liquid sensor:  $\frac{1}{2}''$  dia x  $1\frac{1}{2}''$  long  
 Miniature vapor sensor:  $\frac{3}{8}''$  dia x  $1\frac{1}{2}''$  long  
 (14 ft of lead wire is attached to all sensors)

#### Weight: 7 lb

#### Equipment Classification:

Liquid or Vapor Sensors: Intrinsically safe for Class I,  
 Div. 1, Groups C&D\*  
 Monitor: General purpose

\*As defined by the National Electric Code and UL listed 2481

Piping removed?	Yes				safe and secure manner.

REINSPECTION REQUIRED YES (NO) If yes, explain

NOTICE: You are hereby notified that on 3/18/99, an Environmental Health Specialist conducted an inspection for the closure of 1 (one) hazardous substance underground storage tank(s). A summary of the conditions follows:

An unauthorized release of a hazardous substance has been observed by the Environmental Health Specialist. You are hereby required to initiate Corrective Action measures (See Page 4 for details).

A determination of this site's status is pending the Site Assessment and Mitigation (SAM) Program's receipt and review of analytical results for the samples taken from the tank and/or piping closure site. A laboratory report must be submitted to SAM within 30 days. Please request that the laboratory send a copy of the analytical report directly to Beatrice Griffey at the address provided below.

The SAM Program has completed its review of the analytical results for samples collected at the tank closure site and has determined the following:

TANK CLOSURE COMPLETE - NO FURTHER ACTION REQUIRED

INITIATE CORRECTIVE ACTION MEASURES (See enclosed information)

Reviewed by: Beatrice Griffey Date Reviewed: 5/14/99 Supervisor (Initial): MB

RECEIVED BY Gary M. Pedretti Beatrice Griffey  
 PRINTED NAME GARY M. PEDRETTI Environmental Health Specialist  
 PHONE NUMBER 728-3514 SAM - P.O. Box 129261 San Diego, CA 92112-9261 (619) 338-2222

DISTRIBUTION: WHITE-RETURN TO SAM  
YELLOW-BUSINESS RETAINS

Type(s) of hazardous substance(s) released (mark all that apply):

Gasoline     Diesel     Waste Oil     Other \_\_\_\_\_

Is hazardous material ponded?     Yes\*     No    Estimated amount? Discontinuous Sheen

Estimated depth to groundwater below this site: ~7.5' feet    Patched Beneficial use?     Yes     No

SOIL CONDITIONS (Odors, Staining, Volume):

Describe backfill and its condition: Sand- staining and odors

Describe native soil and its condition: Sand- no staining or odors

How was hazardous substance released? Based on information provided by contractor, it seems steel UST and fiberglass secondary containment failed.

Tank condition (holes, corrosion, wrapping, seams, evidence or overfill) 100% of fiberglass secondary containment in place, no holes or cracks. Unable to visually inspect exterior of steel UST, interior of steel UST rusted.

Estimated length of piping removed? 6 feet    Date tanks last used? Recently

Nearby water wells or surface waters?     Yes\*     None noted

\*Describe \_\_\_\_\_

Any known sensitive receptors, i.e., underground vaults, utilities or basements nearby?     Yes\*     None noted

\*Describe \_\_\_\_\_

**COMMENTS:** Contractors comments- water seeping into annular space between steel UST and secondary containment. Water also seeping into steel UST. Both UST and containment would be pumped dry and then you could watch water seep back into steel UST along seams between two plates. Plates not welded along the entire length of seams. Had difficulties getting LEL down, had to rewash out UST and second time. Note: this is a country club with a lot of irrigation of landscape being performed.

Contractor instructed to run 8260 (BTEX & MTBE) on sample with highest TPH concentration. If both samples do not contain detectable concentrations of TPH run sample 26588-T-1.

UST LAB RESULTS REVIEW

TO: MIKE VERNETTI, UST PROGRAM SUPERVISOR

FROM: Beatrice Griffey, SAM FIELD INSPECTOR

RE: ESTABLISHMENT NO. H26588 PLAN CHECK NO. AT4385

Date of Inspection: 3/18/99

SAM Field Inspector has completed review of the analytical results for samples collected at the tank closure site and has determined the following:

TANK CLOSURE COMPLETE - NO FURTHER ACTION REQUIRED

INITIATE CORRECTIVE ACTION MEASURES

Reviewed by: Beatrice Griffey Date Reviewed: 4/20/99 Supervisor (initial) MOV

This form documents the review of the laboratory analysis report by the field inspector for a UST system removal inspection. Please consider the recommendations of the SAM Field Inspector, and, if you concur, complete the "Underground Storage Tank Closure Report" located in the permit file.

**SUBJECT: DATA REPORT - CARMEL MOUNTAIN RANCH COUNTRY CLUB - 14050  
CARMEL RIDGE ROAD - SAN DIEGO, CA - PEDRETTI PROJECT #26588-4385**

TEG Project # 990318-9

Mr. Pedretti:

Please find enclosed a data report for the above referenced location. Soil samples were analyzed in TEG's DOHS certified mobile laboratory (CERT #1839).

#### Project Summary

The following analyses were conducted:

- 2 soils for total petroleum hydrocarbons (TPH) by DOHS Modified EPA Method 8015

The samples were received chilled in appropriate containers with appropriate labels, seals, and chain-of-custody documentation.

#### Project Narrative

The results for all analyses and required QA/QC analyses are summarized in the enclosed tables. All calibrations, blanks, surrogates, and spike recoveries fulfill quality control criteria. No data qualifiers (flags) apply to any of the reported data.

TEG appreciates the opportunity to provide analytical services to Pedretti Construction on this project. If you have any questions relating to this data or report, please do not hesitate to contact us.

Sincerely,

James E. Picker, Ph. D.  
Lab Director

Mr. Gary Pedretti  
PO Box 302  
Fallbrook CA 92088

Project Name: Carmel Mountain Ranch Country  
Project No.: H#26588 AT#4385

Attention: Mr. Gary Pedretti

Mobile One Laboratories received and analyzed the following sample(s):

Date Received	Quantity	Matrix	Date Received	Quantity	Matrix
3/23/99	1	soil			

The samples were analyzed by one or more of the EPA methodologies or equivalent methods as specified below.

- TPH -- CA DHS "Total Petroleum Hydrocarbons"
- BTEX -- EPA Method 8020
- TRPH -- EPA Method 418.1, modified for soils
- VOCs -- EPA Method 8260

The results are included with a summary of the quality control procedures. Please note that the symbol "nd" indicates a value below the reporting limit for the particular compound in the sample. Flags qualifying the data are explained in footnotes on the same report page as they occur.

Please feel free to call us to discuss any part of this report or to schedule future projects.

Sincerely,

  
 Rebecca L. Johnson  
 President

  
 James E. Picker, Ph.D

Alicia,

I can't see anything on the map on my phone. Can you please re-PDF to lock the changes in? PDF converter edits do not come through on the phones.

I'm at the city now looking into permits and have found a few different addresses for you.

Thank you.

Josh,

Attached is a map you can use for the site walk. If you can get a course map or maintenance yard map when you do the site walk even better.

There are 14 different APNs associated with the Golf Course located at 14050 Carmel Ridge Road, San Diego, CA 92128. APNs with different street addresses are in parenthesis but no street number address was provided for any of the APNs.

- 313-031-28-00 – 25.16 ACRES
- 313-031-32-00 – 12.07 ACRES
- 313-040-62-00 – 10.71 ACRES (N. Church Square)
- 313-040-60-00 – 9.61 ACRES (Bond Street)

### **PRELIMINARY REPORT**

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

**Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.**

**It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.**

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of February 22, 2018 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

PACS ENTERPRISES, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee as to Parcel(s) A through C, D-1, E, F, G-1, H, I-1, J, K-1, L, M, N-1, O and P-1, an easement as to Parcel(s) D-2, D-3, G-2, G-3, I-2, K-2, N-2, P-2 and P-3.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2018-2019, a lien not yet due or payable.
  
2. General and special taxes and assessments for the fiscal year 2017-2018.

Description: San Diego, CA Assessor Map 313.4 Page: 4 of 4  
 Order: 2 Comment: 09041E

***NOTICE***

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

**EXHIBIT A**  
**LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)**

**CLTA STANDARD COVERAGE POLICY – 1990**  
**EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
  - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
  - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
  - (c) resulting in no loss or damage to the insured claimant;
  - (d) attaching or created subsequent to Date of Policy; or
  - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.  
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)**  
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
  - a. building;
  - b. zoning;
  - c. land use;
  - d. improvements on the Land;
  - e. land division; and
  - f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
  - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
  - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
  - c. that result in no loss to You; or
  - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
  - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
  - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

**LIMITATIONS ON COVERED RISKS**

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	<u>Your Deductible Amount</u>	<u>Our Maximum Dollar Limit of Liability</u>
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or \$2,500 (whichever is less)	\$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or \$5,000 (whichever is less)	\$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or \$5,000 (whichever is less)	\$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or \$2,500 (whichever is less)	\$5,000

**2006 ALTA LOAN POLICY (06-17-06)**

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;

- (iii) the subdivision of land; or
- (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
- 2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
- 3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
- 4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
- 5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
- 6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
- 7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II, [ t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

#### [PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

- 1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
- 2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
- 3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
- 4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
- 5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
- 6. Any lien or right to a lien for services, labor or material not shown by the public records.

#### PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

### 2006 ALTA OWNER'S POLICY (06-17-06)

#### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

- 1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

- (i) the occupancy, use, or enjoyment of the Land;
- (ii) the character, dimensions, or location of any improvement erected on the Land;
- (iii) the subdivision of land; or
- (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of: [The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

#### **ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)**

#### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d),

- 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
  3. Defects, liens, encumbrances, adverse claims, or other matters
    - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
    - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
    - (c) resulting in no loss or damage to the Insured Claimant;
    - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
    - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
  4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
  5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
  6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
  7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
  8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
  9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
    - (a) a fraudulent conveyance or fraudulent transfer, or
    - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
  10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
  11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

**Privacy Information**

**We Are Committed to Safeguarding Customer Information**

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

**Applicability**

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

**Types of Information**

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

**Use of Information**

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

**Former Customers**

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

**Confidentiality and Security**

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

**Information Obtained Through Our Web Site**

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site. There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

**Business Relationships**

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

**Cookies**

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive. [FirstAm.com](http://FirstAm.com) uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

**Fair Information Values**

**Fairness** We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

**Public Record** We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

**Use** We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

**Accuracy** We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

**Education** We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

**Security** We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Redlands, California 92374-4515

**Re: 14050 Carmel Ridge Road, San Diego, California 92128**

Dear Ms. Alicia Jansen:

We have received your Public Records Act Request for records from Department of Toxic Substances Control.

After thorough review of our files we have found that, **no such records** exist in this office pertaining to the site/facility referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at:  
<http://www.envirostor.dtsc.ca.gov/public>.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (619) 516-1982.

Sincerely,

Beatriz Davila  
Office Technician

## PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser, or contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec Consulting Services Inc.

1. Property Information

Property Name: Carmel Mountain Ranch Country Club

Property Address: 14050 Carmel Ridge Road

City: San Diego State CA Zip 92128

Property Owner Name: PACS Enterprises

Property Owner Phone #: \_\_\_\_\_

2. Contact For Site Access

Name: Jonathan Frankel

Company/Organization/Title: New Urban West, Inc.

Phone # 925-708-3638 E-Mail Address: jonathanf@nuwi.com

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

\_\_\_\_\_ Yes                       No

If yes, describe or attach details of the lien \_\_\_\_\_

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

\_\_\_\_\_ Yes                       No

If yes, describe or attach details of the limitations \_\_\_\_\_  
\_\_\_\_\_

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

\_\_\_\_\_ Yes                       No

If yes, describe or attach details of your specialized knowledge or experience \_\_\_\_\_  
\_\_\_\_\_

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

\_\_\_\_\_ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

\_\_\_\_\_ Not applicable. User is not involved in a purchase of the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

Yes (describe) Golf course and associated clubhouse uses with  
restaurant and banquet space

No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

Yes (describe) \_\_\_\_\_

No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

Yes (describe) \_\_\_\_\_

No

Do you know of any environmental cleanups that have taken place at the property?

Yes (describe) \_\_\_\_\_

No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

Yes (describe) \_\_\_\_\_

\_\_\_\_\_

No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

Yes (describe) \_\_\_\_\_

\_\_\_\_\_

No
