In December 2015, the City adopted a Climate Action Plan (CAP) that outlines the actions that City will undertake to achieve its proportional share of State greenhouse gas (GHG) emission reductions. The purpose of the Climate Action Plan Consistency Checklist (Checklist) is to, in conjunction with the CAP, provide a streamlined review process for proposed new development projects that are subject to discretionary review and trigger environmental review pursuant to the California Environmental Quality Act (CEQA).<sup>1</sup>

Analysis of GHG emissions and potential climate change impacts from new development is required under CEQA. The CAP is a plan for the reduction of GHG emissions in accordance with CEQA Guidelines Section 15183.5. Pursuant to CEQA Guidelines Sections 15064(h)(3), 15130(d), and 15183(b), a project's incremental contribution to a cumulative GHG emissions effect may be determined not to be cumulatively considerable if it complies with the requirements of the CAP.

This Checklist is part of the CAP and contains measures that are required to be implemented on a project-by-project basis to ensure that the specified emissions targets identified in the CAP are achieved. Implementation of these measures would ensure that new development is consistent with the CAP's assumptions for relevant CAP strategies toward achieving the identified GHG reduction targets. Projects that are consistent with the CAP as determined through the use of this Checklist may rely on the CAP for the cumulative impacts analysis of GHG emissions. Projects that are not consistent with the CAP must prepare a comprehensive project-specific analysis of GHG emissions, including quantification of existing and projected GHG emissions and incorporation of the measures in this Checklist to the extent feasible. Cumulative GHG impacts would be significant for any project that is not consistent with the CAP.

The Checklist may be updated to incorporate new GHG reduction techniques or to comply with later amendments to the CAP or local, State, or federal law.

<sup>&</sup>lt;sup>1</sup> Certain projects seeking ministerial approval may be required to complete the Checklist. For example, projects in a Community Plan Implementation Overlay Zone may be required to use the Checklist to qualify for ministerial level review. See Supplemental Development Regulations in the project's community plan to determine applicability.

This page intentionally left blank

- The Checklist is required only for projects subject to CEQA review.<sup>2</sup>
- ❖ If required, the Checklist must be included in the project submittal package. Application submittal procedures can be found in <a href="Chapter 11: Land Development Procedures">Chapter 11: Land Development Procedures</a> of the City's Municipal Code.
- ❖ The requirements in the Checklist will be included in the project's conditions of approval.
- The applicant must provide an explanation of how the proposed project will implement the requirements described herein to the satisfaction of the Planning Department.

Application Information

Was a consultant retained to complete this checklist?	☐ Yes ☐ No If Yes, complete the following					
Consultant Name:	Contact Phone:					
Company Name:	Contact Email:					
Project Information						
1. What is the size of the project (acres)?						
2. Identify all applicable proposed land uses:						
$\square$ Residential (indicate # of single-family units):						
$\square$ Residential (indicate # of multi-family units):						
☐ Commercial (total square footage):						
☐ Industrial (total square footage):						
☐ Other (describe):						
3. Is the project or a portion of the project located in a Transit Priority Area?	□ Yes □ No					
4. Provide a brief description of the project proposed:						

<sup>&</sup>lt;sup>2</sup> Certain projects seeking ministerial approval may be required to complete the Checklist. For example, projects in a Community Plan Implementation Overlay Zone may be required to use the Checklist to qualify for ministerial level review. See Supplemental Development Regulations in the project's community plan to determine applicability.

### **PROJECT DESCRIPTION**

The Tijuana Cross Border Amendment project site is located in the OMCP area of the City of San Diego. The project proposes changes to public streets and for land uses approved for specific lots located within portions of the 63.8-acre Otay-Tijuana Cross Border Facility Development Project site. The project site is situated south of Siempre Viva Road, west of La Media Road, east of Britannia Boulevard, and just north of the Tijuana Airport in Mexico. The project site has been previously graded in accordance with VTM No. 609579 and is currently developed with the Cross Border Xpress Facility. Surrounding land uses include a mix of industrial and business park uses to the west and north; undeveloped land to the east; and the Tijuana International Airport in Mexico to the south.

### a. Roadway Vacations

The project proposes changes to the previously approved Otay-Tijuana Cross Border Facility Development Project. The project proposes to vacate the public rights-of-way for Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive and convert these existing public streets to private drives. Currently, Otay Pacific Drive and Las Californias Drive are classified as two-lane Collector streets, and Otay Pacific Place is a three-lane collector street. With the proposed vacation of public rights-of-way, these roadways would be modified for one-way counterclockwise travel, including reconfiguration of pavement markings, modification of traffic signals for one-way counterclockwise travel, and provision of on-street bicycle facilities. Specifically, the project proposes to modify these roadways as described below:

### • Otay Pacific Drive

- o Otay Pacific Drive would provide for one-way travel southbound.
- A dedicated six-foot Class II bicycle lane with a two-foot buffer would be provided southbound along Otay Pacific Drive between Siempre Viva Road and Otay Pacific Place.

#### • Otay Pacific Place

- o Otay Pacific Place would provide for one-way travel eastbound.
- A shared 16-foot vehicular travel lane and Class III bicycle route would be marked within the eastbound lanes along Otay Pacific Place between Otay Pacific Drive and Las Californias Drive.

#### • Las Californias Drive

- o Las Californias Drive would provide for one-way travel northbound.
- A shared 14-foot vehicular travel lane and a Class III bicycle route would be marked within the northbound lanes along Las California Drive between Otay Pacific Place and Siempre Viva Road.

Because these streets would become private drives, the project would create a public easement for the existing storm drain located within each private drive. The project proposes a deviation in order

to allow for these private streets to be exempt from the minimum required street frontage per the Land Development Code. As a requirement of this deviation, a Reciprocal Access Agreement would be recorded to assure vehicular access to all lots with frontage on the three streets proposed for vacation. A Vesting Tentative Map is proposed to create a new Lot "A" for the private drives. A Community Plan Amendment is proposed to remove Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive from the OMCP Mobility Element's classified roadways network.

### b. Amendment to Planned Development Permit

The project proposes to amend the existing PDP (PDP No. 609801) to change two of the six lots where Retail Sales and Commercial Services uses are permitted from Lots 1 and 2 to Lots 17 and 18. The proposed PDP Amendment would change Condition 52 in the PDP to read: *Uses within the "Retail Sales" and "Commercial Services" categories of the Land Development Code may only be developed on Lots* 1, 2, 17, 18, 19, 20, 29, and 30; hotel/visitor accommodations may only be developed on Lots 5, 6, 7, 11, 12, 13, 23, 24, 25, and 26. All other entitlements of the previously approved Otay-Tijuana Cross Border Facility Development Project would remain unchanged.

### c. Discretionary Actions

The project includes the following actions:

- Vacation of Public Right-of-Way to vacate existing public streets Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive, all of which currently provide two-way directional travel:
- VTM to create a new Lot "A" for new private drives with one-way counterclockwise travel;
- Public Easement to establish a public storm drain easement within private drives;
- PDP Amendment to allow for Retail Sales and Commercial Services uses within Lots 17 and 18 but not Lots 1 and 2, with a deviation to allow the development of lots without a public street frontage; and
- CPA to remove Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive from the OMCP Mobility Element.

## **CAP CONSISTENCY CHECKLIST QUESTIONS**

## Step 1: Land Use Consistency

The first step in determining CAP consistency for discretionary development projects is to assess the project's consistency with the growth projections used in the development of the CAP. This section allows the City to determine a project's consistency with the land use assumptions used in the CAP.

·		
Step 1: Land Use Consistency		
Checklist Item (Check the appropriate box and provide explanation and supporting documentation for your answer)	Yes	No
<ul> <li>A. Is the proposed project consistent with the existing General Plan and Community Plan land use and zoning designations?<sup>3</sup> OR,</li> <li>B. If the proposed project is not consistent with the existing land use plan and zoning designations, and includes a land use plan and/or zoning designation amendment, would the proposed amendment result in an increased density within a Transit Priority Area (TPA)<sup>4</sup> and implement CAP Strategy 3 actions, as determined in Step 3 to the satisfaction of the Development Services Department?; OR,</li> <li>C. If the proposed project is not consistent with the existing land use plan and zoning designations, does the project include a land use plan and/or zoning designation amendment that would result in an equivalent or less GHG-intensive project when compared to the existing designations?</li> </ul>		
If " <b>Yes</b> ," proceed to Step 2 of the Checklist. For question B above, complete Step 3. For question C above, provide emissions under both existing and proposed designation(s) for comparison. Compare the maximum buildout and the maximum buildout of the proposed designation.  If " <b>No</b> ," in accordance with the City's Significance Determination Thresholds, the project's GHG impact is significance nonetheless incorporate each of the measures identified in Step 2 to mitigate cumulative GHG emissions impartment a measure is infeasible in accordance with CEQA Guidelines Section 15091. Proceed and compare the measure is infeasible in accordance with CEQA Guidelines Section 15091. Proceed and compare the measure is infeasible in accordance with CEQA Guidelines Section 15091. Proceed and compare the measure is infeasible in accordance with CEQA Guidelines Section 15091.	of the existing of the existin	designation et must decision

<sup>&</sup>lt;sup>3</sup> This question may also be answered in the affirmative if the project is consistent with SANDAG Series 12 growth projections, which were used to determine the CAP projections, as determined by the Planning Department.

<sup>&</sup>lt;sup>4</sup> This category applies to all projects that answered in the affirmative to question 3 on the previous page: Is the project or a portion of the project located in a transit priority area.

### **Step 1: Land Use Consistency**

The Tijuana Cross Border Amendment project proposes to vacate the existing public rights-of-way for Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive and convert those public streets to private drives, along with restriping them for one-way counterclockwise travel within the project site. An Amendment to the Otay Mesa Community Plan (OMCP) would be required to remove Otay Pacific Drive, Otay Pacific Place, and Las Californias Drive from the OMCP Mobility Element's classified roadways network. The project also proposes a Planned Development Permit (PDP) Amendment to change the lots where Retail Sales and Commercial Services uses are permitted. Currently, Retail Sales and Commercial Services are allowed uses on six of the northern lots in the development (Lots 1, 2, 19, 20, 29, and 30.) The PDP Amendment would remove Retail Sales and Commercial Services as permitted uses on Lots 1 and 2 and allow for these uses on Lots 17 and 18. The effect would be to swap the locations of the commercial and industrial/office land uses governed by the permit conditions within these four lots. All other entitlements of the previously approved Otay-Tijuana Cross Border Facility Development Project would remain unchanged. As such, the project would be consistent with the General Plan and develop in accordance with the OMCP land use designation and current zoning, as described below.

Development of the Tijuana Cross Border Amendment project would be consistent with the current OMCP Land Use Designation—"Institutional." The OMCP contains several policies that provide for development of a mix of uses that support a Cross Border Facility, supplementing the "Institutional" land use designation. According to the OMCP, Policy 2.4-6 specifically states: "Allow a Cross Border Facility with its supportive commercial uses to locate in Institutional lands within the approximately 63.8-acre site previously known as the Otay Pacific Business Park directly across from the Rodriguez International Airport." Additionally, Policy 2.7-3 states: "Allow a Cross Border Facility and its ancillary uses in the general area south of Siempre Viva Road and east of Britannia Boulevard directly across from the Rodriguez International Airport." The OMCP's Mobility Element further supports the Cross Border Facility, as well as "ancillary uses such as lodging, car rental, commercial parking, and passenger supported commercial uses" that could provide convenient and time-saving access to ticketed passengers while relieving some congestion at the existing vehicular border crossings. Through Policy 3.6.4, the OMCP recommends to "support efforts to construct a cross border facility that would link ticketed passengers to the Rodriguez International Airport in an area adjacent to and just north of the airport." As such, the uses proposed by the project would be in compliance with the OMCP policies related to the Cross Border Facility.

The project site is zoned International Business and Trade (IBT-1-1). A PDP has been approved for the project, which governs development of the site. As stipulated in the existing PDP conditions, unless developed with Retail Sales and Commercial Services, which are subject to the development regulations of the CV-1-1 zone, all lots shall be developed according to the regulations of the IH-2-1 zone. Retail Sales and Commercial Services uses would also be allowed in accordance with the CV-1-1 regulations. No additional new construction or development is proposed by the Tijuana Cross Border Amendment project.

The project proposes to change the permitted location of Retail Sales and Commercial Services on certain lots because of the conversion of the on-site streets from two-way to one-way traffic. As part of the project's proposed PDP Amendment, Retail Sales and Commercial Services would be removed as permitted uses on Lots 1 and 2 and would be added as allowed uses on Lots 17 and 18. Allowed uses on Lots 1 and 2 would revert to those described in the previously approved PDP. Retail Sales and Commercial Services uses shall follow the development regulations of the CV-1-1 zone. All of these requirements would be governed by conditions in the PDP. These uses are also consistent with policies and recommendations in the OMCP, as presented above. As such, approval of the PDP Amendment would keep the project and its proposed uses in compliance with the General Plan and OMCP.

## Step 2: CAP Strategies Consistency

The second step of the CAP consistency review is to review and evaluate a project's consistency with the applicable strategies and actions of the CAP. Step 2 only applies to development projects that involve permits that would require a certificate of occupancy from the Building Official or projects comprised of one and two family dwellings or townhouses as defined in the California Residential Code and their accessory structures. All other development projects that would not require a certificate of occupancy from the Building Official shall implement Best Management Practices for construction activities as set forth in the Greenbook (for public projects).

Step 2: CAP Strategies Consistency			
Checklist Item (Check the appropriate box and provide explanation for your answer)	Yes	No	N/A
Strategy 1: Energy & Water Efficient Buildings			
1. Cool/Green Roofs.			
<ul> <li>Would the project include roofing materials with a minimum 3-year aged solar reflection and thermal emittance or solar reflection index equal to or greater than the values specified in the voluntary measures under <u>California Green Building Standards Code</u> (Attachment A)?; <u>OR</u></li> <li>Would the project roof construction have a thermal mass over the roof membrane, including areas of vegetated (green) roofs, weighing at least 25 pounds per square foot as specified in the voluntary measures under <u>California</u></li> </ul>			
<ul> <li>Green Building Standards Code?; OR</li> <li>Would the project include a combination of the above two options?</li> </ul>			
Check "N/A" only if the project does not include a roof component.			

Actions that are not subject to Step 2 would include, for example: 1) discretionary map actions that do not propose specific development, 2) permits allowing wireless communication facilities, 3) special events permits, 4) use permits or other permits that do not result in the expansion or enlargement of a building (e.g., decks, garages, etc.), and 5) non-building infrastructure projects such as roads and pipelines. Because such actions would not result in new occupancy buildings from which GHG emissions reductions could be achieved, the items contained in Step 2 would not be applicable.

2.	Plumbing fixtures and fittings		_
	With respect to plumbing fixtures or fittings provided as part of the project, would those low-flow fixtures/appliances be consistent with each of the following:		
	Residential buildings:		
	Kitchen faucets: maximum flow rate not to exceed 1.5 gallons per minute at 60		
	psi; • Standard dishwashers: 4.25 gallons per cycle;		
	<ul> <li>Compact dishwashers: 3.5 gallons per cycle; and</li> </ul>		
	<ul> <li>Clothes washers: water factor of 6 gallons per cubic feet of drum capacity?</li> </ul>		
	Nonresidential buildings:		
	<ul> <li>Plumbing fixtures and fittings that do not exceed the maximum flow rate specified in <u>Table A5.303.2.3.1 (voluntary measures) of the California Green</u> <u>Building Standards Code</u> (See Attachment A); and</li> </ul>		
	Appliances and fixtures for commercial applications that meet the provisions of		
	Section A5.303.3 (voluntary measures) of the California Green Building Standards Code (See Attachment A)?		
	Check "N/A" only if the project does not include any plumbing fixtures or fittings.		

<sup>&</sup>lt;sup>6</sup> Non-portable bicycle corrals within 600 feet of project frontage can be counted towards the project's bicycle parking requirements.

If the project includes nonresidential development that would accommodate over 10 tenant occupants (employees), would the project include changing/shower facilities in accordance with the voluntary measures under the California Green Building Standards Code as shown in the table below?    Number of Tenant Occupants (Employees)   Shower/Changing Facilities Required   Two-Tier (12" X 15" X 72") Personal Effects Lockers Required   D-10	5. Shower fo	acilities

	A" only if the project is a residential use in a TPA.	ential project, or if it does not ir	nciude		

Transportation Demand Management Program		
If the project would accommodate over 50 tenant-occupants (employees), would it include a transportation demand management program that would be applicable to existing tenants and future tenants that includes:		
At least one of the following components:		
Parking cash out program		
<ul> <li>Parking management plan that includes charging employees market-rate for single-occupancy vehicle parking and providing reserved, discounted, or free spaces for registered carpools or vanpools</li> </ul>		
<ul> <li>Unbundled parking whereby parking spaces would be leased or sold separately from the rental or purchase fees for the development for the life of the development</li> </ul>		
And at least three of the following components:		
<ul> <li>Commitment to maintaining an employer network in the SANDAG iCommute program and promoting its RideMatcher service to tenants/employees</li> </ul>		
On-site carsharing vehicle(s) or bikesharing		
Flexible or alternative work hours		
Telework program		
Transit, carpool, and vanpool subsidies		
<ul> <li>Pre-tax deduction for transit or vanpool fares and bicycle commute costs</li> </ul>		
<ul> <li>Access to services that reduce the need to drive, such as cafes, commercial stores, banks, post offices, restaurants, gyms, or childcare, either onsite or within 1,320 feet (1/4 mile) of the structure/use?</li> </ul>		
Check "N/A" only if the project is a residential project or if it would not accommodate over 50 tenant-occupants (employees).		

## Step 3: Project CAP Conformance Evaluation (if applicable)

The third step of the CAP consistency review only applies if Step 1 is answered in the affirmative under option B. The purpose of this step is to determine whether a project that is located in a TPA but that includes a land use plan and/or zoning designation amendment is nevertheless consistent with the assumptions in the CAP because it would implement CAP Strategy 3 actions. In general, a project that would result in a reduction in density inside a TPA would not be consistent with Strategy 3. The following questions must each be answered in the affirmative and fully explained.

# 1. Would the proposed project implement the General Plan's City of Villages strategy in an identified Transit Priority Area (TPA) that will result in an increase in the capacity for transit-supportive residential and/or employment densities?

Considerations for this question:

- Does the proposed land use and zoning designation associated with the project provide capacity for transit-supportive residential densities within the TPA?
- Is the project site suitable to accommodate mixed-use village development, as defined in the General Plan, within the TPA?
- Does the land use and zoning associated with the project increase the capacity for transit-supportive employment intensities within the TPA?

# 2. Would the proposed project implement the General Plan's Mobility Element in Transit Priority Areas to increase the use of transit? Considerations for this guestion:

- Does the proposed project support/incorporate identified transit routes and stops/stations?
- Does the project include transit priority measures?

# 3. Would the proposed project implement pedestrian improvements in Transit Priority Areas to increase walking opportunities? Considerations for this guestion:

- Does the proposed project circulation system provide multiple and direct pedestrian connections and accessibility to local activity centers (such as transit stations, schools, shopping centers, and libraries)?
- Does the proposed project urban design include features for walkability to promote a transit supportive environment?

## 4. Would the proposed project implement the City of San Diego's Bicycle Master Plan to increase bicycling opportunities? Considerations for this guestion:

- Does the proposed project circulation system include bicycle improvements consistent with the Bicycle Master Plan?
- Does the overall project circulation system provide a balanced, multimodal, "complete streets" approach to accommodate mobility needs of all users?

## 5. Would the proposed project incorporate implementation mechanisms that support Transit Oriented Development? Considerations for this question:

- Does the proposed project include new or expanded urban public spaces such as plazas, pocket parks, or urban greens in the TPA?
- Does the land use and zoning associated with the proposed project increase the potential for jobs within the TPA?
- Do the zoning/implementing regulations associated with the proposed project support the efficient use of parking through mechanisms such as: shared parking, parking districts, unbundled parking, reduced parking, paid or time-limited parking, etc.?

## 6. Would the proposed project implement the Urban Forest Management Plan to increase urban tree canopy coverage?

Considerations for this question:

- Does the proposed project provide at least three different species for the primary, secondary and accent trees in order to accommodate varying parkway widths?
- Does the proposed project include policies or strategies for preserving existing trees?
- Does the proposed project incorporate tree planting that will contribute to the City's 20% urban canopy tree coverage goal?

This attachment provides performance standards for applicable Climate Action Pan (CAP) Consistency Checklist measures.

Table 1 Roof Design Values for Question 1: Cool/Green Roofs supporting Strategy 1: Energy & Water Efficient Buildings of the Climate Action Plan						
Land Use Type	Roof Slope	Minimum 3-Year Aged Solar Reflectance	Thermal Emittance	Solar Reflective Index		
Low-Rise Residential	≤2:12	0.55	0.75	64		
Low-Rise Resideridal	> 2:12	0.20	0.75	16		
High-Rise Residential Buildings,	≤ 2:12	0.55	0.75	64		
Hotels and Motels	> 2:12	0.20	0.75	16		
Non-Residential	≤2:12	0.55	0.75	64		
NOTERESIDENTIAL	> 2:12	0.20	0.75	16		

Source: Adapted from the California Green Building Standards Code (CALGreen) Tier 1 residential and non-residential voluntary measures shown in Tables A4.106.5.1 and A5.106.11.2.2, respectively. Roof installation and verification shall occur in accordance with the CALGreen Code.

CALGreen does not include recommended values for low-rise residential buildings with roof slopes of ≤ 2:12 for San Diego's climate zones (7 and 10). Therefore, the values for climate zone 15 that covers Imperial County are adapted here.

Solar Reflectance Index (SRI) equal to or greater than the values specified in this table may be used as an alternative to compliance with the aged solar reflectance values and thermal emittance.

Table 2 Fixture Flow Rates for Non-Residential Buildings related to Question 2: Plumbing Fixtures a Fittings supporting Strategy 1: Energy & Water Efficient Buildings of the Climate Action Pla				
	Fixture Type	Maximum Flow Rate		
	Showerheads	1.8 gpm @ 80 psi		
Lavatory Faucets  Kitchen Faucets  Wash Fountains  Metering Faucets  Metering Faucets for Wash Fountains  Gravity Tank-type Water Closets  Flushometer Tank Water Closets		0.35 gpm @60 psi
