

MITIGATED NEGATIVE DECLARATION

Project No. 556536 SCH No. N/A

SUBJECT:

Sunset Home SDP CDP NDP: SITE DEVELOPMENT PERMIT (SDP), COASTAL DEVELOPMENT PERMIT (CDP) and NEIGHBORHOOD DEVELOPMENT PERMIT (NDP) to remodel an existing 1,675-square-foot existing single dwelling unit. The remodel would include a 1,137-square-foot second story addition, a 240-square-foot first floor addition and a 397-square-foot garage totaling 3,449 square feet. The 5,250-square-foot project site is located at 8276 Paseo Del Ocaso, San Diego, CA 92037 and is within the Coastal Overlay Zone (Non-Appealable) in the SF zone(s) of the La Jolla Shores Planned District of the La Jolla Community Plan area within Council District 1. The site supports an existing residential unit with associated improvements. LEGAL DESCRIPTION: Lot 3 in Block 22 of Map 2061.

I. PROJECT DESCRIPTION:

See attached Initial Study.

II. ENVIRONMENTAL SETTING:

See attached Initial Study.

III. DETERMINATION:

The City of San Diego conducted an Initial Study which determined that the proposed project could have a significant environmental effect in the following areas(s): **Cultural Resource** (**Archaeology**) and **Tribal Cultural Resources**. Subsequent revisions in the project proposal create the specific mitigation identified in Section V of this Mitigated Negative Declaration. The project as revised now avoids or mitigates the potentially significant environmental effects previously identified, and the preparation of an Environmental Impact Report will not be required.

IV. DOCUMENTATION:

The attached Initial Study documents the reasons to support the above Determination.

V. MITIGATION, MONITORING AND REPORTING PROGRAM:

A. GENERAL REQUIREMENTS - PART I Plan Check Phase (prior to permit issuance)

- 1. Prior to the issuance of a Notice To Proceed (NTP) for a subdivision, or any construction permits, such as Demolition, Grading or Building, or beginning any construction related activity on-site, the Development Services Department (DSD) Director's Environmental Designee (ED) shall review and approve all Construction Documents (CD), (plans, specification, details, etc.) to ensure the MMRP requirements are incorporated into the design.
- 2. In addition, the ED shall verify that the MMRP Conditions/Notes that apply ONLY to the construction phases of this project are included VERBATIM, under the heading, "ENVIRONMENTAL/MITIGATION REQUIREMENTS."
- 3. These notes must be shown within the first three (3) sheets of the construction documents in the format specified for engineering construction document templates as shown on the City website:

http://www.sandiego.gov/development-services/industry/standtemp.shtml

- 4. The **TITLE INDEX SHEET** must also show on which pages the "Environmental/Mitigation Requirements" notes are provided.
- 5. **SURETY AND COST RECOVERY** The Development Services Director or City Manager may require appropriate surety instruments or bonds from private Permit Holders to ensure the long term performance or implementation of required mitigation measures or programs. The City is authorized to recover its cost to offset the salary, overhead, and expenses for City personnel and programs to monitor qualifying projects.
- B. GENERAL REQUIREMENTS PART II

 Post Plan Check (After permit issuance/Prior to start of construction)
- 1. PRE CONSTRUCTION MEETING IS REQUIRED TEN (10) WORKING DAYS PRIOR TO BEGINNING ANY WORK ON THIS PROJECT. The PERMIT HOLDER/OWNER is responsible to arrange and perform this meeting by contacting the CITY RESIDENT ENGINEER (RE) of the Field Engineering Division and City staff from MITIGATION MONITORING COORDINATION (MMC). Attendees must also include the Permit holder's Representative(s), Job Site Superintendent and the following consultants:

Qualified Archaeological Monitor, Native American Monitor

Note:

Failure of all responsible Permit Holder's representatives and consultants to attend shall require an additional meeting with all parties present.

CONTACT INFORMATION:

a) The PRIMARY POINT OF CONTACT is the **RE** at the **Field Engineering Division – 858-627-3200**

b) For Clarification of ENVIRONMENTAL REQUIREMENTS, it is also required to call **RE and MMC at 858-627-3360**

2. MMRP COMPLIANCE: This Project, Project Tracking System (PTS) #556536 and /or Environmental Document # 556536, shall conform to the mitigation requirements contained in the associated Environmental Document and implemented to the satisfaction of the DSD's Environmental Designee (MMC) and the City Engineer (RE). The requirements may not be reduced or changed but may be annotated (i.e. to explain when and how compliance is being met and location of verifying proof, etc.). Additional clarifying information may also be added to other relevant plan sheets and/or specifications as appropriate (i.e., specific locations, times of monitoring, methodology, etc

Note:

Permit Holder's Representatives must alert RE and MMC if there are any discrepancies in the plans or notes, or any changes due to field conditions. All conflicts must be approved by RE and MMC BEFORE the work is performed.

3. OTHER AGENCY REQUIREMENTS: Evidence of compliance with all other agency requirements or permits shall be submitted to the RE and MMC for review and acceptance prior to the beginning of work or within one week of the Permit Holder obtaining documentation of those permits or requirements. Evidence shall include copies of permits, letters of resolution or other documentation issued by the responsible agency.

Not Applicable

4. MONITORING EXHIBITS

All consultants are required to submit, to RE and MMC, a monitoring exhibit on a 11x17 reduction of the appropriate construction plan, such as site plan, grading, landscape, etc., marked to clearly show the specific areas including the **LIMIT OF WORK**, scope of that discipline's work, and notes indicating when in the construction schedule that work will be performed. When necessary for clarification, a detailed methodology of how the work will be performed shall be included.

NOTE:

Surety and Cost Recovery – When deemed necessary by the Development Services Director or City Manager, additional surety instruments or bonds from the private Permit Holder may be required to ensure the long term performance or implementation of required mitigation measures or programs. The City is authorized to recover its cost to offset the salary, overhead, and expenses for City personnel and programs to monitor qualifying projects.

5. OTHER SUBMITTALS AND INSPECTIONS:

The Permit Holder/Owner's representative shall submit all required documentation, verification letters, and requests for all associated inspections to the RE and MMC for approval per the following schedule:

DOCUMENT SUBMITTAL/INSPECTION CHECKLIST					
Issue Area	Document Submittal	Associated			
		Inspection/Approvals/Notes			
General	Consultant Qualification	Prior to Preconstruction			
ALL SURE CONTRACTOR	Letters	Meeting			
General	Consultant Construction	Prior to or at Preconstruction			
<u> </u>	Monitoring Exhibits	Meeting			
Archaeological Resources	Monitoring Report(s)	Monitoring Report Approval			
Bond Release	Request for Bond Release	Final MMRP Inspections Prior to			
	Letter	Bond Release Letter			

C. SPECIFIC MMRP ISSUE AREA CONDITIONS/REQUIREMENTS

ARCHAEOLOGICAL MONITORING PROGRAM AND TRIBAL CULTURAL RESOURCES MITIGATION

I. Prior to Permit Issuance

- A. Entitlements Plan Check
 - Prior to issuance of any construction permits, including but not limited to, the first Grading Permit, Demolition Plans/Permits and Building Plans/Permits or a Notice to Proceed for Subdivisions, but prior to the first pre-construction meeting, whichever is applicable, the Assistant Deputy Director (ADD) Environmental designee shall verify that the requirements for Archaeological Monitoring and Native American monitoring have been noted on the applicable construction documents through the plan check process.
- B. Letters of Qualification have been submitted to ADD
 - The applicant shall submit a letter of verification to Mitigation Monitoring Coordination (MMC) identifying the Principal Investigator (PI) for the project and the names of all persons involved in the archaeological monitoring program, as defined in the City of San Diego Historical Resources Guidelines (HRG). If applicable, individuals involved in the archaeological monitoring program must have completed the 40-hour HAZWOPER training with certification documentation.
 - 2. MMC will provide a letter to the applicant confirming the qualifications of the PI and all persons involved in the archaeological monitoring of the project meet the qualifications established in the HRG.
 - 3. Prior to the start of work, the applicant must obtain written approval from MMC for any personnel changes associated with the monitoring program.

II. Prior to Start of Construction

- A. Verification of Records Search
 - 1. The PI shall provide verification to MMC that a site specific records search (0.25-mile radius) has been completed. Verification includes but is not limited to, a copy of a confirmation letter from South Coastal Information Center, or if the search was inhouse, a letter of verification from the PI stating that the search was completed.
 - 2. The letter shall introduce any pertinent information concerning expectations and probabilities of discovery during trenching and/or grading activities.

3. The PI may submit a detailed letter to MMC requesting a reduction to the 0.25-mile radius.

B. PI Shall Attend Pre-Construction Meetings

- Prior to beginning any work that requires monitoring; the Applicant shall arrange a
 Pre-Construction Meeting that shall include the PI; Native American
 consultant/monitor (where Native American resources may be impacted);
 Construction Manager (CM) and/or Grading Contractor; Resident Engineer (RE);
 Building Inspector (BI), if appropriate; and MMC. The qualified Archaeologist and
 Native American Monitor shall attend any grading/excavation related PreConstruction Meeting to make comments and/or suggestions concerning the
 Archaeological Monitoring program with the Construction Manager and/or Grading
 Contractor.
 - a. If the PI is unable to attend the Pre-Construction Meeting, the Applicant shall schedule a focused Pre-Construction Meeting with MMC, the PI, RE, CM or BI, if appropriate, prior to the start of any work that requires monitoring.

2. Identify Areas to be Monitored

- a. Prior to the start of any work that requires monitoring, the PI shall submit an Archaeological Monitoring Exhibit (AME) (with verification that the AME has been reviewed and approved by the Native American consultant/monitor when Native American resources may be impacted) based on the appropriate construction documents (reduced to 11x17) to MMC identifying the areas to be monitored including the delineation of grading/excavation limits.
- b. The AME shall be based on the results of a site specific records search as well as information regarding existing known soil conditions (native or formation).

3. When Monitoring Will Occur

- a. Prior to the start of any work, the PI shall also submit a construction schedule to MMC through the RE indicating when and where monitoring will occur.
- b. The PI may submit a detailed letter to MMC prior to the start of work or during construction requesting a modification to the monitoring program. This request shall be based on relevant information, such as review of final construction documents that indicate site conditions such as depth of excavation and/or site graded to bedrock, which may reduce or increase the potential for resources to be present.

III. During Construction

- A. Monitor(s) Shall be Present During Grading/Excavation/Trenching
 - 1. The Archaeological Monitor shall be present full-time during all soil-disturbing and grading/excavation/trenching activities that could result in impacts to archaeological resources as identified on the AME. The Construction Manager is responsible for notifying the RE, PI, and MMC of changes to any construction activities, such as in the case of a potential safety concern within the area being monitored. In certain circumstances, OSHA safety requirements may necessitate modification of the AME.
 - The Native American consultant/monitor shall determine the extent of their presence during soil disturbing and grading/excavation/trenching activities based on the AME

- and provide that information to the PI and MMC. If prehistoric resources are encountered during the Native American consultant/monitor's absence, work shall stop and the Discovery Notification Process detailed in Sections III.B–C and IV.A–D shall commence.
- 3. The PI may submit a detailed letter to MMC during construction requesting a modification to the monitoring program when a field condition such as modern disturbance post-dating the previous grading/trenching activities, presence of fossil formations, or when native soils are encountered that may reduce or increase the potential for resources to be present.
- 4. The archaeological and Native American consultant/monitor shall document field activity via the Consultant Site Visit Record (CSVR). The CSVRs shall be faxed by the CM to the RE the first day of monitoring, the last day of monitoring, monthly (Notification of Monitoring Completion), and in the case of ANY discoveries. The RE shall forward copies to MMC.

B. Discovery Notification Process

- In the event of a discovery, the Archaeological Monitor shall direct the contractor to temporarily divert all soil disturbing activities, including but not limited to digging, trenching, excavating or grading activities in the area of discovery and in the area reasonably suspected to overlay adjacent resources and immediately notify the RE or BI, as appropriate.
- 2. The Monitor shall immediately notify the PI (unless Monitor is the PI) of the discovery.
- 3. The PI shall immediately notify MMC by phone of the discovery, and shall also submit written documentation to MMC within 24 hours by fax or email with photos of the resource in context, if possible.
- 4. No soil shall be exported off site until a determination can be made regarding the significance of the resource specifically if Native American resources are encountered.

C. Determination of Significance

- 1. The PI and Native American consultant/monitor, where Native American resources are discovered, shall evaluate the significance of the resource. If human remains are involved, the PI and Native American consultant/monitor shall follow protocol in this section.
 - a. The PI shall immediately notify MMC by phone to discuss significance determination and shall also submit a letter to MMC indicating whether additional mitigation is required.
 - b. If the resource is significant, the PI shall submit an Archaeological Data Recovery Program (ADRP) that has been reviewed by the Native American consultant/monitor, and obtain written approval from MMC. Impacts to significant resources must be mitigated before ground disturbing activities in the area of discovery will be allowed to resume. Note: If a unique archaeological site is also an historical resource as defined in CEQA, then the limits on the amount(s) that a project applicant may be required to pay to cover mitigation costs as indicated in CEQA Section 21083.2 shall not apply.
 - c. If the resource is not significant, the PI shall submit a letter to MMC indicating that artifacts will be collected, curated, and documented in the Final Monitoring Report. The letter shall also indicate that that no further work is required.

IV. Discovery of Human Remains

If human remains are discovered, work shall halt in that area and no soil shall be exported off site until a determination can be made regarding the provenance of the human remains, and

the following procedures as set forth in CEQA Section 15064.5(e), the California Public Resources Code (Sec. 5097.98), and State Health and Safety Code (Sec. 7050.5) shall be undertaken:

A. Notification

- 1. The Archaeological Monitor shall notify the RE or Bl, as appropriate, the MMC, and the Pl, if the Monitor is not qualified as a Pl. MMC will notify the appropriate Senior Planner in the Environmental Analysis Section (EAS) of the Development Services Department to assist with the discovery notification process.
- 2. The PI shall notify the Medical Examiner after consultation with the RE, either in person or via telephone.

B. Isolate Discovery Site

- Work shall be directed away from the location of the discovery and any nearby area reasonably suspected to overlay adjacent human remains until a determination can be made by the Medical Examiner in consultation with the PI concerning the provenance of the remains.
- 2. The Medical Examiner, in consultation with the PI, will determine the need for a field examination to determine the provenance.
- 3. If a field examination is not warranted, the Medical Examiner will determine with input from the PI, if the remains are or are most likely to be of Native American origin.

C. If Human Remains are determined to be Native American

- 1. The Medical Examiner will notify the Native American Heritage Commission (NAHC) within 24 hours. By law, **ONLY** the Medical Examiner can make this call.
- 2. NAHC will immediately identify the person or persons determined to be the Most Likely Descendent (MLD) and provide contact information.
- The MLD will contact the PI within 24 hours or sooner after the Medical Examiner
 has completed coordination to begin the consultation process in accordance with
 CEQA Section 15064.5(e), the California Public Resources, and Health and Safety
 Codes.
- 4. The MLD will have 48 hours to make recommendations to the property owner or representative for the treatment or disposition with proper dignity of the human remains and associated grave goods.
- 5. Disposition of Native American human remains will be determined between the MLD and the PI and if:
 - a. The NAHC is unable to identify the MLD, OR the MLD failed to make a recommendation within 48 hours after being notified by the Commission; or
 - b. The landowner or authorized representative rejects the recommendation of the MLD and mediation in accordance with PRC 5097.94 (k) by the NAHC fails to provide measures acceptable to the landowner, THEN
 - c. In order to protect these sites, the Landowner shall do one or more of the following:
 - (1) Record the site with the NAHC
 - (2) Record an open space or conservation easement on the site
 - (3) Record a document with the County
 - d. Upon the discovery of multiple Native American human remains during a ground-disturbing land development activity, the landowner may agree that additional conferral with descendants is necessary to consider culturally appropriate treatment of multiple Native American human remains. Culturally appropriate treatment of such a discovery may be ascertained from review of the site utilizing cultural and archaeological standards. Where the parties are unable to agree on the appropriate

treatment measures the human remains and items associated and buried with Native American human remains shall be reinterred with appropriate dignity, pursuant to Section 5(c).

D. If Human Remains are NOT Native American

- 1. The PI shall contact the Medical Examiner and notify them of the historic era context of the burial.
- 2. The Medical Examiner will determine the appropriate course of action with the PI and City staff (PRC 5097.98).
- 3. If the remains are of historic origin, they shall be appropriately removed and conveyed to the San Diego Museum of Man for analysis. The decision for internment of the human remains shall be made in consultation with MMC, EAS, the applicant/landowner, any known descendant group, and the San Diego Museum of Man.

V. Night and/or Weekend Work

- A. If night and/or weekend work is included in the contract, the following will occur:
 - 1. When night and/or weekend work is included in the contract package, the extent and timing shall be presented and discussed at the pre-construction meeting.
 - 2. The following procedures shall be followed:
 - a. No Discoveries
 In the event that no discoveries were encountered during night and/or weekend work, the PI shall record the information on the CSVR and submit to MMC via fax by 8 a.m. of the next business day.
 - b. Discoveries All discoveries shall be processed and documented using the existing procedures detailed in Sections III, During Construction, and IV, Discovery of Human Remains. Discovery of human remains shall always be treated as a significant discovery.
 - c. Potentially Significant Discoveries If the PI determines that a potentially significant discovery has been made, the procedures detailed under Section III, During Construction, and IV, Discovery of Human Remains, shall be followed.
 - d. The PI shall immediately contact MMC, or by 8 a.m. of the next business day to report and discuss the findings as indicated in Section III-B, unless other specific arrangements have been made.
- B. If night and/or weekend work becomes necessary during the course of construction:
 - 1. The Construction Manager shall notify the RE or BI, as appropriate, a minimum of 24 hours before the work is to begin.
 - 2. The RE, or BI, as appropriate, shall notify MMC immediately.
- C. All other procedures described previously shall apply, as appropriate.

VI. Post Construction

- A. Preparation and Submittal of Draft Monitoring Report
 - 1. The PI shall submit two copies of the Draft Monitoring Report (even if negative), prepared in accordance with the Historical Resources Guidelines (Appendix C/D) that describes the results, analysis, and conclusions of all phases of the Archaeological Monitoring Program (with appropriate graphics) to MMC for review and approval within 90 days following the completion of monitoring. It should be noted that if the PI is unable to submit the Draft Monitoring Report within the allotted 90-day timeframe resulting from delays with analysis, special study results or other

complex issues, a schedule shall be submitted to MMC establishing agreed due dates and the provision for submittal of monthly status reports until this measure can be met.

- a. For significant archaeological resources encountered during monitoring, the Archaeological Data Recovery Program shall be included in the Draft Monitoring Report.
- b. Recording Sites with State of California Department of Parks and Recreation The PI shall be responsible for recording (on the appropriate State of California Department of Park and Recreation forms-DPR 523 A/B) any significant or potentially significant resources encountered during the Archaeological Monitoring Program in accordance with the City's Historical Resources Guidelines, and submittal of such forms to the South Coastal Information Center with the Final Monitoring Report.
- 2. MMC shall return the Draft Monitoring Report to the PI for revision or, for preparation of the Final Report.
- 3. The PI shall submit revised Draft Monitoring Report to MMC for approval.
- 4. MMC shall provide written verification to the PI of the approved report.
- 5. MMC shall notify the RE or BI, as appropriate, of receipt of all Draft Monitoring Report submittals and approvals.

B. Handling of Artifacts

- 1. The PI shall be responsible for ensuring that all cultural remains collected are cleaned and catalogued.
- 2. The PI shall be responsible for ensuring that all artifacts are analyzed to identify function and chronology as they relate to the history of the area; that faunal material is identified as to species; and that specialty studies are completed, as appropriate.
- 3. The cost for curation is the responsibility of the property owner.
- C. Curation of artifacts: Accession Agreement and Acceptance Verification
 - The PI shall be responsible for ensuring that all artifacts associated with the survey, testing and/or data recovery for this project are permanently curated with an appropriate institution. This shall be completed in consultation with MMC and the Native American representative, as applicable.
 - 2. The PI shall include the Acceptance Verification from the curation institution in the Final Monitoring Report submitted to the RE or BI and MMC.
 - 3. When applicable to the situation, the PI shall include written verification from the Native American consultant/monitor indicating that Native American resources were treated in accordance with state law and/or applicable agreements. If the resources were reinterred, verification shall be provided to show what protective measures were taken to ensure no further disturbance occurs in accordance with Section IV(5), Discovery of Human Remains.

D. Final Monitoring Report(s)

- 1. The PI shall submit one copy of the approved Final Monitoring Report to the RE or BI as appropriate, and one copy to MMC (even if negative), within 90 days after notification from MMC that the draft report has been approved.
- 2. The RE shall, in no case, issue the Notice of Completion and/or release of the Performance Bond for grading until receiving a copy of the approved Final Monitoring Report from MMC, which includes the Acceptance Verification from the curation institution.

The above mitigation monitoring and reporting program will require additional fees and/or deposits to be collected prior to the issuance of building permits, certificates of occupancy and/or final maps to ensure the successful completion of the monitoring program.

San Diego, California 92101

Subject:

Draft Mitigated Negative Declaration

Sunset Home SDP CDP Project No. 556536

Dear Ms. Holowach:

I have reviewed the subject DMND on behalf of this committee of the San Diego County Archaeological Society.

Based on the information contained in the DMND, initial study, and cultural resources report for the project, we agree with the impact analysis and mitigation measures proposed, with one addition. As we requested in several recent project reviews, the mitigation measures should explicitly permit the project archaeologist to make 3D scans of any material, other than human remains as she/he deems necessary to preserve the scientific research potential. All such scans should be 3D printed to confirm the result and those prints and the digital files should be curated for future research.

The City's response to the previously-submitted comments was that "The project archaeologist would not be precluded from implementing the 3D methodology as described". We ask that that statement be included in the mitigation wording, to make it explicitly, rather than implicitly, permitted.

Thank you for the opportunity to participate in the City's public review period for this project's DMND.

Environmental Review Committee

P.O. Box 81106 San Diego, CA 92138-1106 (858) 538-0935

1) Comment noted. All cultural artifacts recovered from the project will be either curated at the San Diego Archaeological Center (SDAC) or will be repatriated the MLD/Kumeyaay representative. No artifacts will be discarded as part of this mitigation program. Therefore, there will be no need for additional document within the archaeological reports.

Courtney Holowach City of San Diego Development Service Center 1222 First Avenue, MS 501 San Diego, CA 92101

Re: Sunset Home SDP CDP

Dear Ms. Holowach:

This letter is written on behalf of the Rincon Band of Luiseño Indians. Thank you for inviting us to submit comments on the above mention project. Rincon is submitting these comments concerning your projects potential impact on Luiseño cultural resources.

The Rincon Band has concerns for the impacts to historic and cultural resources and the finding of items of significant cultural value that could be disturbed or destroyed and are considered culturally significant to the Luiseño people. This is to inform you, your identified location is not within the Luiseño Aboriginal Territory. We recommend that you locate a tribe within the project area to receive direction on how to handle any inadvertent findings according to their customs and traditions.

If you would like information on tribes within your project area, please contact the Native American Heritage Commission and they will assist with a referral.

Thank you for the opportunity to protect and preserve our cultural assets.

Sincerely,

2)

Destiny Colocho, RPA Tribal Historic Preservation Officer

Rincon Cultural Resources Department

2) The City of San Diego provides draft environmental documents to Native American Tribes from San Diego County when a cultural resources report has been prepared and/or archaeological monitoring is required. The requirement for Native American monitoring is included in Section V. of the Mitigated Negative Declaration, which identifies the applicant to confer with appropriate persons/organizations when inadvertent discoveries occurs during grading activities. In addition, draft copies of the Mitigated Negative Declaration were sent to all Native American groups in San Diego

County.

Courtney Holowach Environmental Planner City of San Diego Development Services Center 1222 First Avenue, MS 501 San Diego, CA 92101

RE: Sunset Home SDP CDP Project No. 556536

Dear Ms. Holowach.

The Viejas Band of Kumeyaay Indians ("Viejas") has reviewed the proposed project and at this time we have determined that the project site has cultural significance or ties to Viejas.

Viejas Band request that a Kumeyaay Cultural Monitor be on site for ground disturbing activities to inform us of any new developments such as inadvertent discovery of cultural artifacts, cremation sites, or human remains.

Please call me at 619-659-2312 or Ernest Pingleton at 619-659-2314 or email, rteran@viejas-nsn.gov or repingleton@viejas-nsn.gov , for scheduling. Thank you.

Sincerely

Ray Teran, Resource Management VIEJAS BAND OF KUMEYAAY INDIANS 3) A record search of the California Historic Resources Information System (CHRIS) digital database was reviewed by qualified archaeological City staff to determine presence or absence of potential resources within the project site. Although no recorded archaeological sites were located within or adjacent to the project site, there is a potential for the project to impact archaeological resources due to the project's proximity to a known archaeological site. Therefore, mitigation measures related to Cultural Resources (Archaeology) and Tribal Cultural Resources are required. The requirement for Native American monitoring is included in Section V of the Mitigated Negative Declaration, which identifies the applicant confer with appropriate person/organizations when inadvertent discoveries occur during grading activities.

3)

INITIAL STUDY CHECKLIST

- 1. Project title/Project number: Sunset Home SDP CDP NDP/556536
- Lead agency name and address: City of San Diego, 1222 First Avenue, MS-501, San Diego,
 California 92101
- 3. Contact person and phone number: Courtney Holowach / (619) 446-5187
- 4. Project location: 8276 Paseo Del Ocaso, San Diego, CA 92037
- 5. Project Applicant/Sponsor's name and address: Warren Treisma, 6203 Rockhurst Dr., San Diego, CA 92120
- 6. General/Community Plan designation: La Jolla Community Plan
- 7. Zoning: Single Family (SF) Zone
- 8. Description of project (Describe the whole action involved, including but not limited to, later phases of the project, and any secondary, support, or off-site features necessary for its implementation.):

SITE DEVELOPMENT PERMIT (SDP), COASTAL DEVELOPMENT PERMIT (CDP) and NEIGHBORHOOD DEVELOPMENT PERMIT (NDP) to remodel an existing 1,675-square-foot existing single dwelling unit. The remodel would include a 1,137-square-foot second story addition, a 240-square-foot first floor addition and a 397-square-foot garage totaling 3,449 square feet. The 5,250-square-foot project site is located at 8276 Paseo Del Ocaso, San Diego, CA 92037 and is within the Coastal Overlay Zone (Non-Appealable) in the SF zone(s) of the La Jolla Shores Planned District of the La Jolla Community Plan area within Council District 1. The site supports an existing residential unit with associated improvements.

The two-story residence would include a stucco exterior with wood siding, a wooden garage door, and a flat roof. Planned site improvements include new landscape and hardscape, a pool, spa, covered deck and built-in BBQ. The existing driveway would be removed, and a new driveway would be installed. The proposed project would connect to the existing public drainage system, existing public sewer main, and existing public water main. The landscaping plan would consist of small trees; and native and drought-tolerant landscaping which would minimize irrigation needs. The landscape plan has been reviewed by Landscape Review staff would determine that the landscape areas conform to the landscape plan requirements of \$1510.0304(h) of the City of San Diego's Municipal Code.

9. Surrounding land uses and setting:

The project site is in the LJSPD-SF (Single Family) and within the La Jolla Shores Planned District, Coastal Height Limit Overlay Zone, Coastal Overlay Zone (non-appealable area-2), Beach Impact Area of the Parking Impact Overlay Zone, Residential Tandem Parking, and the La Jolla Community Plan (LJCP) and Local Coastal Program, Council District 1. The LJCP and Local Coastal Program designates the site as Low Density Residential Use (5-9 du/ac). The

proposed single dwelling unit on a 5,250 square foot lot is consistent with the residential density identified in the land use plan.

The project site is located at the west side of Paseo del Ocaso and is surround by similar developed properties. Vegetation on-site is varied and consists of non-native landscaping flora, including shrubs, trees, and lawn areas. Additionally, the project site is situated in a developed area currently served by existing public services and utilities.

- 10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

 None required.
- 11. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, has consultation begun?

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

In accordance with the requirements of Assembly Bill (AB) 52, the City of San Diego sent notification to two Native American Tribes traditionally and culturally affiliated with the project area on July 19, 2017. Both the lipay Nation of Santa Ysabel and the Jamul Indian Village responded within the 30-day period requesting consultation and additional information. Consultation took place on August 11, 2017.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

			d be potentially affected by the checklist on the following		t, involving at least one impact that is a	
	Aesthetics		Greenhouse Gas Emissions		Population/Housing	
	Agriculture and Forestry Resources		Hazards & Hazardous Materials		Public Services	
	Air Quality		Hydrology/Water Quality		Recreation	
	Biological Resources		Land Use/Planning		Transportation/Traffic	
\boxtimes	Cultural Resources		Mineral Resources	\boxtimes	Tribal Cultural Resources	
	Geology/Soils		Noise		Utilities/Service System	
				\boxtimes	Mandatory Findings Significance	
DETER	MINATION: (To be com	pleted l	oy Lead Agency)			
On the b	asis of this initial evaluation:					
	The proposed project COUL be prepared.	D NOT ha	ve a significant effect on the o	environme	ent, and a NEGATIVE DECLARATION will	
		evisions ir	n the project have been made		ment, there will not be a significant eed to by the project proponent. A	
	The proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.					
	The proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (a) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (b) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required.					
	Although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or (MITIGATED) NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or (MITIGATED) NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.					

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact answer should be explained where it is based on project specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis.)
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses", as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or (mitigated) negative declaration. *Section 15063(c)(3)(D).* In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. Mitigation Measures. For effects that are "Less Than Significant With Mitigation Measures Incorporated", describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a. The significance criteria or threshold, if any, used to evaluate each question; and
 - b. The mitigation measure identified, if any, to reduce the impact to less than significant.

Issue		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

including but outcroppings	damage scenic resources, not limited to, trees, rock , and historic buildings scenic highway?				
_	nated scenic resources c highway within the p the project.			•	•
	degrade the existing visual			\bowtie	

According to the Thresholds projects that severely contrast with the surrounding neighborhood character may result in a significant impact. To meet this significance threshold one or more of the following conditions must apply: the project would have to exceed the allowable height or bulk regulations and the height and bulk of the existing patterns of development in the vicinity of the project by a substantial margin; have an architectural style or use building materials in stark contrast to adjacent development where the adjacent development follows a single or common architectural theme (e.g., Gaslamp Quarter, Old Town); result in the physical loss, isolation or degradation of a community identification symbol or landmark (e.g., a stand of trees, coastal bluff, historic landmark) which is identified in the General Plan, applicable community plan or local coastal program; be located in a highly visible area (e.g., on a canyon edge, hilltop or adjacent to an interstate highway)

surroundings?

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	--	------------------------------------	-----------

and would strongly contrast with the surrounding development or natural topography through excessive height, bulk signage or architectural projections; and/or the project would have a cumulative effect by opening up a new area for development or changing the overall character of the area. None of the above conditions apply to the project.

The site is currently developed with a single dwelling unit. The project would remodel the existing dwelling unit. The remodeled dwelling unit would be constructed to comply with all height and bulk regulations. The project is consistent with General Design guidelines as outlined in the LJCP. The project site is located in a developed neighborhood. Existing homes in the neighborhood do not have a unifying theme of architecture such as the architecture of Gaslamp Quarter. The remodeled dwelling unit would not be substantially different in architecture than the current existing homes. The project would not result in the physical loss, isolation or degradation of a community identification symbol or landmark which is identified in the General Plan, applicable community plan or local coastal program. The remodel of an existing dwelling unit would not open a new area for development or changing the overall character of the area.

Therefore, since none of the above conditions apply, the project would not substantially degrade the existing visual character or the quality of the site and its surroundings. Implementation of the project would result in a less than significant impact.

d)	Create a new source of substantial light		
	or glare that would adversely affect day		\boxtimes
	or nighttime views in the area?		

The project would not be predominately constructed with light reflective material and all lighting would be required to be shaded and adjusted to fall on the project's site as required in the City's municipal code. In addition, the project would not be located adjacent to a light-sensitive property and therefore the single dwelling unit would not create a substantial light or glare impact. The project would also be subject to the City's Outdoor Lighting Regulations per Municipal Code Section 142.0740. No impact would result due to implementation of the project.

II.	AGRICULTURAL AND FOREST RESOURCES: In determining whether impacts to agricultural resources are significant
	environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment
	Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing
	impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are
	significant environmental effects, lead agencies may refer to information compiled by the California Department of
	Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment
	Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest
	Protocols adopted by the California Air Resources Board. – Would the project:

a)	Converts Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources		\boxtimes
	Agency, to non-agricultural use?		

The project site is classified as Urban and Built-Up land by the Farmland Mapping and Monitoring Program (FMMP). Similarly, the land surrounding the project site is not in agricultural production

	Iss	ue	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
		ot classified as farmland by the FMN d to non-agricultural uses. No impa			-	
	b)	Conflict with existing zoning for agricultural use, or a Williamson Act Contract?				\boxtimes
	oun	posed project is not zoned for agricult ding land under a Williamson Act Con ect.				-
	c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 1220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				
confl	lict v	within the LJCP is designated as forwith existing zoning for, or cause resentation of the project.				
	d)	Result in the loss of forest land or conversion of forest land to non-forest use?				
desig	gnat	ect site is located within a largely de ted as forest land. Therefore, the pro would result due to implementation	oject would r	not convert forest l	-	
	e)	Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to nonagricultural use or conversion of forest land to non-forest use?				
Ther	efo	ing agricultural uses are located in t re, the project would not convert far se. No impact would result due to	mland to no	n-agricultural uses	or forestland	
III.		QUALITY – Where available, the significance ution control district may be relied on to mal				ment or air
	a)	Conflict with or obstruct implementation of the applicable air quality plan?				

The San Diego Air Pollution Control District (SDAPCD) and San Diego Association of Governments (SANDAG) are responsible for developing and implementing the clean air plan for attainment and

Issue	Potentially Significant	Less Than Significant with Mitigation	Less Than Significant	No Impact
	Impact	Incorporated	Impact	

maintenance of the ambient air quality standards in the San Diego Air Basin (SDAB). The County Regional Air Quality Strategy (RAQS) was initially adopted in 1991, and is updated on a triennial basis (most recently in 2009). The RAQS outlines the SDAPCD's plans and control measures designed to attain the state air quality standards for ozone (03). The RAQS relies on information from the California Air Resources Board (CARB) and SANDAG, including mobile and area source emissions, as well as information regarding projected growth in San Diego County and the cities in the county, to project future emissions and then determine the strategies necessary for the reduction of emissions through regulatory controls. CARB mobile source emission projections and SANDAG growth projections are based on population, vehicle trends, and land use plans developed by San Diego County and the cities in the county as part of the development of their general plans.

The RAQS relies on SANDAG growth projections based on population, vehicle trends, and land use plans developed by the cities and by the county as part of the development of their general plans. As such, projects that propose development that is consistent with the growth anticipated by local plans would be consistent with the RAQS. However, if a project proposes development that is greater than that anticipated in the local plan and SANDAG's growth projections, the project might be in conflict with the RAQS and may contribute to a potentially significant cumulative impact on air quality.

The project would remodel an existing single dwelling unit within a developed neighborhood of similar residential uses. The project is consistent with the General Plan, community plan, and the underlying zoning for residential development. Therefore, the project would be Consistent at a subregional level with the underlying growth forecasts in the RAQS, and would not obstruct implementation of the RAQS. No impact would result due to implementation of the project.

b)	Violate any air quality standard or			
	contribute substantially to an existing		\boxtimes	
	or projected air quality violation?			

Short-term Emissions (Construction)

Project construction activities would potentially generate combustion emissions from on-site heavy duty construction vehicles and motor vehicles transporting the construction crew and necessary construction materials. Exhaust emissions generated by construction activities would generally result from the use of typical construction equipment that may include excavation equipment, forklift, skip loader, and/or dump truck. Variables that factor into the total construction emissions potentially generated include the level of activity, length of construction period, number of pieces and types of equipment in use, site characteristics, weather conditions, number of construction personnel, and the amount of materials to be transported on or off-site. It is anticipated that construction equipment would be used on-site for four to eight hours a day; however, construction would be short-term and impacts to neighboring uses would be minimal and temporary.

Fugitive dust emissions are generally associated with land clearing and grading operations. Due to the nature and location of the project, construction activities are expected to create minimal fugitive dust, as a result of the disturbance associated with grading. The project would remodel an existing single-family residence with attached garage. Construction operations would include standard measures as required by the City of San Diego grading permit to reduce potential air quality impacts to less than significant. Therefore, impacts associated with fugitive dust are considered less than

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	---	------------------------------------	-----------

significant, and would not violate an air quality standard or contribute substantially to an existing or projected air quality violation. Impacts related to short term emissions would be less than significant.

Long-term Emissions (Operational)

Long-term air emission impacts are those associated with stationary sources and mobile sources related to any change caused by a project. The project would produce minimal stationary source emissions. Once construction of the project is complete, long-term air emissions would potentially result from such sources as fireplaces, heating, ventilation, and cooling (HVAC) systems, and other motorized equipment typically associated with residential uses. The project is compatible with the surrounding development and is permitted by the community plan and zone designation. Based on the residential land use, project emissions over the long-term are not anticipated to violate any air quality standard or contribute substantially to an existing or projected air quality violation. Impacts would be less than significant.

Overall, the project is not expected to generate substantial emissions that would violate any air quality standard or contribute to an existing or projected air quality violation; therefore, impacts would be less than significant.

c)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				
emissio short-te potentia project v which t	ribed above in response III (b), construins of dust and other pollutants. Howe rm in duration. Implementation of Beal impacts related to construction active would not result in a cumulatively combe project region is non-attainment uds. Therefo any criteria p	oorary and educe ore, the pollutant for

Short-term (Construction)

d) Create objectionable odors affecting a

substantial number of people?

Odors would be generated from vehicles and/or equipment exhaust emissions during construction of the project. Odors produced during construction would be attributable to concentrations of unburned hydrocarbons from tailpipes of construction equipment and architectural coatings. Such odors are temporary and generally occur at magnitudes that would not affect a substantial number of people. Therefore, impacts would be less than significant.

 \boxtimes

Long-term (Operational)

Typical long-term operational characteristics of the project are not associated with the creation of such odors nor anticipated to generate odors affecting a substantial number of people. The project

Less Than

Less Than Potentially **Less Than** Significant with Issue Significant Significant No Impact Mitigation Impact Impact Incorporated established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? The project site is fully developed, in a highly urbanized setting. The project site is not located within a wildlife corridor, or within a migratory passageway for any native resident or migratory fish or wildlife species. No impact would result due to implementation of the project. e) Conflict with any local policies or ordinances protecting biological \boxtimes resources, such as a tree preservation policy or ordinance? The project would be consistent with all relevant goals and policies of the City's General Plan and of the LJCP and Local Coastal Land Use Plan regarding the preservation and protection of biological resources. Although the proposed project is not within the City's Multi-Habitat Planning Area (MHPA), the project would be consistent with all relevant goals and policies regarding the preservation and protection of biological resources, as outlined in the City's Multiple Species Conservation Program (MSCP). Additionally, project implementation would be consistent with all biological resources policies in the LJCP and Local Coastal Land Use Plan. No impact would result due to implementation of the project. Conflict with the provisions of an adopted Habitat Conservation Plan, \boxtimes Natural Community Conservation Plan, П П or other approved local, regional, or state habitat conservation plan? As previously stated, the project is not within the City's MHPA and the project would be consistent

with all relevant goals and policies regarding the preservation and protection of biological resources, as outlined in the City's MSCP. In addition, implementation of the project would be consistent with all biological resources policies outlined in the LJCP and Local Coastal Land Use Plan. No impact would result due to implementation of the project.

V. CULTURAL RESOURCES - Would the project:

Cause a substantial adverse change in the significance of an historical \boxtimes resource as defined in §15064.5?

The purpose and intent of the Historical Resources Regulations of the Land Development Code (Chapter 14, Division 3, and Article 2) is to protect, preserve and, where damaged, restore the historical resources of San Diego. The regulations apply to all proposed development within the City of San Diego when historical resources are present on the premises. Before approving discretionary projects, CEQA requires the Lead Agency to identify and examine the significant adverse environmental effects which may result from that project. A project that may cause a substantial adverse change in the significance of a historical resource may have a significant effect on the environment (sections 15064.5(b) and 21084.1). A substantial adverse change is defined as demolition, destruction, relocation, or alteration activities, which would impair historical significance (sections 15064.5(b)(1)). Any historical resource listed in, or eligible to be listed in the California Register of Historical Resources, including archaeological resources, is considered to be historically or culturally significant.

Issue	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
-------	--------------------------------------	---------------------------------------	------------------------------------	-----------

Archaeological Resources

Many areas of San Diego County, including mesas and the coast, are known for intense and diverse prehistoric occupation and important archaeological resources. The region has been inhabited by various cultural groups spanning 10,000 years or more. The project site is located on the City of San Diego's Historical Resources Sensitivity map. Furthermore, the project site is located within an area of La Jolla Shores that requires special considerations due to the area's archaeological sensitivity with respect to the Spindrift archaeological site and the high potential for project grading to impact unknown prehistoric resources including human remains.

A Cultural Resource Survey was performed by Brian Smith and Associates (May 2017). No evidence of any historic or prehistoric cultural resources were identified with the property during the survey. However, due to the project being within the recorded boundary of prehistoric Site SDI-20,130, the presence of recorded cultural resources within a one-quarter-mile radius of the project, and the limited visibility encountered during the archaeological survey, the potential exists that buried cultural deposits may be present under the landscaping, hardscape, and structures that cover the property. Based upon the potential to encounter buried archaeological deposits or artifacts associated with the prehistoric occupation of SDI-20,130, and other known sites within the La Jolla Neighborhood over the past 8,000 years, as well as the historic use and development of La Jolla since the late 1800s, archaeological and Native American monitoring of grading or trenching is recommended. Therefore, mitigation measures related to Cultural Resources (Archaeology) and Tribal Cultural Resources are required. See section V of the MND for further details.

Built Environment

The City of San Diego reviews projects requiring the demolition of structures 45 years or older for historic significance in compliance with the California Environmental Quality Act (CEQA). CEQA Section 21084.1 states that "A project that may cause a substantial adverse change in the significance of an historical resource is a project that may cause a significant effect on the environment." Historic property (built environment) surveys are required for properties which are 45 years of age or older and which have integrity of setting, location, design, materials, workmanship, feeling, and association.

The property located at 8276 Paseo del Ocaso, is not an individually designated resource and is not located within a designated historic district. However, San Diego Municipal Code Section 143.0212 requires City staff to review all projects impacting a parcel that contains a structure 45 years old or older to determine whether a potentially significant historical resource exists on site prior to issuance of a permit. Qualified City staff has reviewed site photos; Assessor's Building Record; water and sewer records; written description of the property and alterations; chain of title; and listing of occupants; as well as any available historic photographs; Sanborn maps; and Notices of Completion.

In addition, staff has considered input received through applicable public noticing and outreach and have made the following determination, that the property does not meet local designation criteria as an individually significant resource under any adopted Historical Resources Board Criteria and a historic report was not required. Therefore EAS finds that the project site does not meet the criteria of being a significant historical resource as defined by the City of San Diego's Significance Determination Thresholds. No impact to the built environment would result due to implementation of the project.

Staff assessed Geotracker and Envirostor databases, and reviewed the Cortese list. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground fuel tanks (LUFT), Department of Defense (DoD), Spills-Leaks-Investigations-Cleanups (SLIC), and Landfill sites. Envirostor is an online database search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which where may be reasons to investigate further. It also identifies facilities that are authorized to treat, store, dispose or transfer (TSDTF) hazardous waste.

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	---	------------------------------------	-----------

The Cortese List is a Hazardous Waste and Substances Sites (Cortese) List, which is a planning resource use by the State, local agencies, and developers to comply with the California Environmental Quality Act (CEQA) requirements in providing information about the location of hazardous materials release sites. Government Code sections 65962.5 requires the California Environmental Protection Agency to develop, at least annually, an updated Cortese List. The Department of Toxics and Substance Control (DTSC) is responsible for a portion of the information contained in the Cortese List. Other State and local government agencies are required to provide additional hazardous material release information for the Cortese List.

Based on the searches conducted, no contaminated sites are on or adjacent to the project site. Furthermore, the project site was not identified on the DTSC Cortese List. Therefore, the project would not create a significant hazard to the public or the environment. No impact would result due to implementation of the project.

to impl	ementation of the project.

X. LAND	USE AND PLANNING – Would the project:				
a)	Physically divide an established community?				\boxtimes
The pro	iast is consistant with the Conoral Pl	an's and LICI	D'e land usa design	ation The ar	olost sito is

The project is consistent with the General Plan's and LJCP's land use designation. The project site is located within a developed residential neighborhood and surrounded by similar residential development. Remodeling a single dwelling unit would not affect adjacent properties and is consistent with surrounding land uses. Therefore, the project would not physically divide an established community. No impact would result due to implementation of the project.

Iss	ue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b)	Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				
See response X(a) above. The proposed project will require a Site Development Permit (SDP), for development in the La Jolla Shores Planned District, per Section 1510.0201(d). The proposed project will require a Coastal Development Permit (CDP) for development within the Coastal Overlay Zone, per Section 126.0707. A Neighborhood Development Permit (NDP) will also be required for the alteration of a structure with a previously conforming structural envelope that also requires a Coastal Development Permit, per Section 127.0104(b). The project is compatible with the area designated for residential development by the General Plan and Community Plan, and is consistent with the existing underlying zone and surrounding land uses. Construction of the project would occur within an urbanized neighborhood with similar development. Furthermore, the project would not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including but not limited to the general plan community plan, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect. No impact would result due to implementation of the project.					
c)	Conflict with any applicable habitat conservation plan or natural community conservation plan?

Potentially Less Than
Potentially Significant with Less Than
Issue Significant Mitigation Impact
Impact Incorporated

significance of the resource to a California Native American tribe.

In accordance with the requirements of Assembly Bill (AB) 52, The City of San Diego sent notification to two Native American Tribes traditionally and culturally affiliated with the project area on July 19, 2017. Both the lipay Nation of Santa Ysabel and the Jamul Indian Village requested consultation within the 30-days. Consultation took place on August 11, 2017 with the lipay Nation of Santa Ysabel and the Jamul Indian Village. It was determined that there are no sites, features, places or cultural landscapes that would be substantially adversely impacted by the proposed project. Although no Tribal Cultural Resources were identified within or adjacent to the project site, there is a potential for the construction of the project to impact buried and unknown Tribal Cultural Resources due to its location within the Spindrift archaeological area. Therefore, both groups agreed that Archaeological and Native American monitoring should be included in the MMRP. The lipay Nation of Santa Ysabel and the Jamul Indian Village both identified no further evaluation was required and concluded consultation. Mitigation in the form of archaeological and Native American monitoring would reduce all impacts to Tribal Cultural Resources to below a level of significance. See section V of the MND and the Mitigation, Monitoring and Reporting Program (MMRP) for further details.

would r	reduce all impacts to Tribal Cultural R MND and the Mitigation, Monitoring a	Resources to	below a level of si	gnificance. Se	e section V
XVIII. UT	TILITIES AND SERVICE SYSTEMS – Would the pr	roject:			
a)	Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				
surrour the proj amount accorda Control Adequa	nentation of the project would not intending uses. No increase in demand for ject, as compared to current conditions of waste water. Wastewater treatmence with the applicable wastewater Board (RWQCB). Additionally, the protest services are already available to standard. No impact would result due to in Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental	or wastewate ons. The proj nent facilities treatment re oject site is l erve the pro	er disposal or treat ect is not anticipat s used by the project equirements of the ocated in an urban ject and no mitiga	tment would be ted to generate ect would be o Regional Wat nized and deve tion measures	e created by e significant perated in er Quality eloped area.
constru	effects? Dject would not result in an increase act a new water or wastewater treatmentation of the project. Require or result in the construction of		-		required to

g) Comply with federal, state, and local statutes and regulation related to solid waste?				

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	--	------------------------------------	-----------

The project would comply with all Federal, State, and local statutes and regulations related to solid waste. The project would not result in the generation of large amounts of solid waste, nor generate or require the transport of hazardous waste materials, other than minimal amounts generated during the construction phase. All demolition activities would comply with any City of San Diego requirements for diversion of both construction waste during the demolition phase and solid waste during the long-term, operation phase. No impact would result due to implementation of the project.

XIX. MAI	NDATORY FINDINGS OF SIGNIFICANCE -		
a)	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?		

The site has been fully developed within an urban setting, and does not contain or support any sensitive biological resources as defined by the Biology Guidelines of the City's Land Development Manual. Implementation of the project would not have a substantial adverse effect on candidate, sensitive, or special-status species as identified in local or regional plans, policies, or regulations, and the project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in the LJCP, the City of San Diego General Plan, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service. No impact would result due to implementation of the proposed project.

b)	Does the project have impacts that are individually limited but cumulatively considerable ("cumulatively considerable" means that the		
	incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?		

Impacts associated with Cultural Resources (Archaeology) and Tribal Cultural Resources are individually significant and when taken into consideration with other past projects in the vicinity, may contribute to a cumulative impact; specifically with respect to non-renewable resources. However, with implementation of the MMRP, any information associated with these resources would be collected catalogued and included in technical reports available to researchers for use on future projects, thereby reducing the cumulative impact to below a level of significance.

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
 Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly? 		\boxtimes		

The City of San Diego conducted an Initial Study which determined that the project could have a significant environmental effect in the following area Cultural Resources (Archaeology) and Tribal Cultural Resources. However, with the implementation of mitigation identified in Section V of this MND the project would not have environmental effects which would cause substantial direct or indirect adverse effects on human beings.
