

THE CITY OF SAN DIEGO

Report to the Hearing Officer

DATE ISSUED: July 8, 2020

REPORT NO. HO-20-033

HEARING DATE: July 15, 2020

SUBJECT: La Jolla Mesa CDP/SDP, Process Three Decision

PROJECT NUMBER: <u>639439</u>

OWNER/APPLICANT: LJM, LLC, Owner / Bennett & Associates, Applicant

SUMMARY:

<u>Issue</u>: Should the Hearing Officer approve a Coastal Development Permit and Site Development Permit for an addition to an existing one-story, 4,135 square-foot single-family residence with an attached 689 square-foot garage, and the construction of a detached accessory structure with basement at a site located at 5911 La Jolla Mesa Drive within the La Jolla Community Plan area?

<u>Staff Recommendation</u>: Approve Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696.

<u>Community Planning Group Recommendation</u>: On May 7, 2020, the La Jolla Community Planning Association voted 9-6-1 to recommend approval of the project (Attachment 6).

<u>Environmental Review</u>: The project was determined to be exempt from the California Environmental Quality Act pursuant to Sections 15301(e) - Existing Facilities and 15303(e) -New Construction. The environmental exemption determination for this project was made on May 6, 2020, and the opportunity to appeal the determination ended on May 20, 2020. There were no appeals to the environmental determination.

BACKGROUND

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a one-story, 4,135 square-foot single-family residence with an attached 689 square-foot garage within the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan) area (Attachment 1). The surrounding properties are fully developed and consists of a well-established residential neighborhood (Attachment 3). The site is not located within the First Public Roadway, however, contains Environmentally Sensitive Lands (ESL) in the form of steep hillsides and sensitive biological resources.

The 0.78-acre site is in the RS-1-2 Zone, the Coastal (Non-Appealable) Overlay Zone, the Coastal Height Limitation Overlay Zone, and the Parking Impact Overlay Zone (Coastal). Pursuant to San Diego Municipal Code Section (SDMC) Section 143.0110(b)(4), a project that contains ESL within the Coastal Overlay Zone requires a Process Three Site Development Permit and Coastal Development Permit.

DISCUSSION

The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement. There are no public views or coastal access from the project site, as identified in the Community Plan. The project site is designated for very low-density residential uses (0-5 dwelling units/acre), and results in a density of one dwelling unit per acre, which implements the prescribed density.

The Community Plan recommends maintaining the character of residential areas by ensuring that development occurs in a manner that protects natural features, preserves existing streetscape themes and allows a harmonious visual relationship to exist between the bulk and scale of new and older structures. Another significant goal of the Community Plan is the protection and preservation of sensitive slopes and hillsides, and the conservation of natural hillside amenities.

The project conforms with the above-mentioned Community Plan recommendations. The project is designed to be sensitive to the natural topography of the site by locating the proposed addition and accessory structure on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area. In addition, the relationship between the bulk and scale of the project with the adjacent residential development is considered appropriate since the project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required.

The project will not be detrimental to the public health, safety, and welfare. Staff has reviewed and accepted a Preliminary Geotechnical Report prepared for the site that concluded that the consultant has adequately addressed the soil and geologic conditions for the project. The drainage for the project complies with City's drainage regulations and standards, and the project will not discharge any increase in storm water run-off onto the existing hillside areas. There are no flood hazards at the site.

In addition, the project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-to-property-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water

Page 3

construction best management practices, and requiring a geotechnical report to address the construction plans.

The project site is not located within a coastal bluff, beach, or special flood area. Staff has reviewed and accepted a Biology Report from the applicant that concludes that the project will not result in any impacts to sensitive biological resources. An environmental review determined the project to be exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guideline Sections 15301(e) - Existing Facilities and 15303(e) - New Construction. Section 15301(e) allows for the additions to existing structures as long as the additions will not result in an increase of more than 50 percent of the floor area of the structure before the addition. Section 15303 (e) applies to the new construction of accessory structures so the proposed accessory structure would be covered under the exemptions.

Staff has reviewed the proposal, including all the issues identified through the review process, and has determined that all project issues have been addressed. The project conforms with the Community Plan, and the adopted City Council policies and regulations of the Land Development Code. Therefore, draft findings and conditions to support project approval are presented to the Hearing Officer for consideration. Staff recommends that the Hearing Officer approve Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696 for the project.

ALTERNATIVES

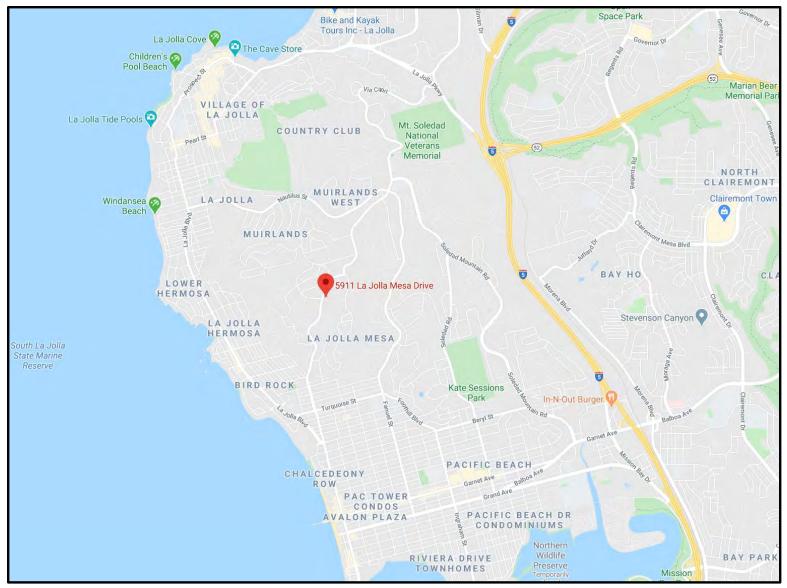

- 1. Approve Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696 with modifications.
- 2. Deny Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696, if the findings required to approve the project cannot be affirmed.

Respectfully submitted,

Xavier Del Valle, Development Project Manager

<u>La Jolla Mesa CDP/SDP</u> Project No. 639439 – 5911 La Jolla Mesa Drive

HEARING OFFICER RESOLUTION NO. _____ COASTAL DEVELOPMENT PERMIT NO. 2312695 SITE DEVELOPMENT PERMIT NO. 2312696 LA JOLLA MESA CDP/SDP - PROJECT NO. 639439

WHEREAS, LJM, LLC, California Limited Liability Company, Owner/Permittee, filed an application with the City of San Diego for an addition to the existing single-family residence, and construction of a detached accessory structure with basement (as described in and by reference to the approved Exhibits "A" and corresponding conditions of approval for the associated Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696), on portions of a 0.78acre site;

WHEREAS, the project site is located at 5911 La Jolla Mesa Drive and contains Environmentally Sensitive Lands and is in the RS-1-2 Zone, the Coastal (Non-Appealable) Overlay Zone, the Coastal Height Limitation Overlay Zone, and the Parking Impact Overlay Zone (Coastal) within the La Jolla Community Plan Area;

WHEREAS, the project site is legally described as Lot 3, Muirlands Panorama, in the City of San Diego, County of San Diego, State of California, according to Map thereof 3329;

WHEREAS, on May 6, 2020, the City of San Diego, as Lead Agency, through the Development Services Department, made and issued an Environmental Determination that the project is exempt from the California Environmental Quality Act (CEQA) (Public Resources Code Section 21000 et seq.) under CEQA Guideline Sections 15301(e) - Existing Facilities and 15303(e) - New Construction. Section 15301(e) allows for the additions to existing structures as long as the additions will not result in an increase of more than 50 percent of the floor area of the structure before the addition. Section 15303 (e) applies to the new construction of accessory structures so the proposed accessory structure would be covered under the exemptions. There was no appeal of the Environmental Determination filed within the time period provided by San Diego Municipal Code

Section 112.0520;

WHEREAS, on July 15, 2020, the Hearing Officer of the City of San Diego considered Coastal

Development Permit No. 2312695 and Site Development Permit No. 2312696 pursuant to the Land

Development Code of the City of San Diego; NOW, THEREFORE,

BE IT RESOLVED by the Hearing Officer of the City of San Diego, that it adopts the following

findings with respect to Coastal Development Permit No. 2312695 and Site Development Permit No.

2312696:

A. <u>COASTAL DEVELOPMENT PERMIT [San Diego Municipal Code Section (SDMC) Section</u> <u>126.0708]</u>

- 1. <u>Findings for all Coastal Development Permits:</u>
 - a. The proposed coastal development will not encroach upon any existing physical accessway that is legally used by the public or any proposed public accessway identified in a Local Coastal Program land use plan; and the proposed coastal development will enhance and protect public views to and along the ocean and other scenic coastal areas as specified in the Local Coastal Program land use plan.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The site is not located within the First Public Roadway, and there are no public views or coastal access from the project site, as identified in the Community Plan. The project site is designated for very low-density residential uses (0-5 dwelling units per acre), and project results in a density of one dwelling unit per acre, which implements the prescribed density. The Community Plan recommends maintaining the character of residential areas by ensuring that development occurs in a manner that protects natural features, preserves existing streetscape themes and allows a harmonious visual relationship to exist between the bulk and scale of new and older structures. Another significant goal of the Community Plan is the protection and preservation of sensitive slopes and hillsides, and the conservation of natural hillside amenities.

The project conforms with the above-mentioned Community Plan recommendations. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, the project complies with the community goals regarding public view preservation and enhancement since the project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. Therefore, the project will not encroach upon any existing physical accessway that is legally used by the public or any proposed public accessway identified in a Local Coastal Program land use plan; and the proposed project will enhance and protect public views to and along the ocean and other scenic coastal areas as specified in the Local Coastal Program Land Use Plan.

b. The proposed coastal development will not adversely affect environmentally sensitive lands.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project site contains Environmentally Sensitive Lands (ESL) in the form of steep hillsides and sensitive biological resources. The closest Multiple Habitat Planning Area designated lands are approximately 1,150 feet from the site. Staff has reviewed and accepted a Biology Report from the applicant that indicates that the project will not result in any impacts to sensitive biological resources. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, the project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-toproperty-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water construction best management practices, and requiring a geotechnical report to address the construction plans. The project site not located within a coastal bluff, beach, or special flood area. An environmental review determined the project to be exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guideline Sections 15301(e) - Existing Facilities and 15303(e) - New Construction. Therefore, the proposed coastal development will not adversely affect environmentally sensitive lands.

c. The proposed coastal development is in conformity with the certified Local Coastal Program land use plan and complies with all regulations of the certified Implementation Program.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The site is not located within the First Public Roadway, and there are no public views or coastal access from the project site, as identified in the Community Plan. The project site is designated for very low-density residential uses (0-5 dwelling units per acre), and results in a density of one dwelling unit per acre, which implements the prescribed density. The Community Plan recommends maintaining the character of residential areas by ensuring that development occurs in a manner that protects natural features, preserves existing streetscape themes and allows a harmonious visual relationship to exist between the bulk and scale of new and older structures. Another significant goal of the Community Plan is the protection and preservation of sensitive slopes and hillsides, and the conservation of natural hillside amenities.

The project conforms with the above-mentioned Community Plan recommendations. The project is designed to be sensitive to the natural topography of the site by locating the proposed addition and accessory structure on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, the relationship between the bulk and scale of the project with the adjacent residential development is considered appropriate since the project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. Therefore, the proposed project is in conformity with the certified Local Coastal Program land use plan and complies with all regulations of the certified Implementation Program.

d. For every Coastal Development Permit issued for any coastal development between the nearest public road and the sea or the shoreline of any body of water located within the Coastal Overlay Zone the coastal development is in conformity with the public access and public recreation policies of Chapter 3 of the California Coastal Act.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement. The site is not located within the First Public Roadway, and there are no public views or coastal access from the project site, as identified in the Community Plan. In addition, the project site not located within a coastal bluff or shoreline, and will not adversely impact any public recreation opportunities. Therefore, the project conforms with the public access and public recreation policies of Chapter 3 of the California Coastal Act.

B. <u>SITE DEVELOPMENT PERMIT [SDMC Section 126.0505]</u>

1. <u>Findings for all Site Development Permits</u>:

a. The proposed development will not adversely affect the applicable land use plan.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The site is not located within the First Public Roadway, and there are no public views or coastal access from the project site, as identified in the Community Plan. The project site is designated for very low-density residential uses (0-5 dwelling units per acre), and results in a density of one dwelling unit per acre, which implements the prescribed density. The Community Plan recommends maintaining the character of residential areas by ensuring that development occurs in a manner that protects natural features, preserves existing streetscape themes and allows a harmonious visual relationship to exist between the bulk and scale of new and older structures. Another significant goal of the Community Plan is the protection and preservation of sensitive slopes and hillsides, and the conservation of natural hillside amenities.

The project conforms with the above-mentioned Community Plan recommendations. The project is designed to be sensitive to the natural topography of the site by locating the proposed addition and accessory structure on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, the relationship between the bulk and scale of the project with the adjacent residential development is considered appropriate since the project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. Therefore, the proposed development will not adversely affect the applicable land use plan.

b. The proposed development will not be detrimental to the public health, safety and welfare.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project will not be detrimental to the public health, safety, and welfare. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area. In addition, staff has reviewed and accepted a Preliminary Geotechnical Report prepared for the site that concluded that the consultant has adequately addressed the soil and geologic conditions for the project. The drainage for the project complies with City's drainage regulations and standards, and the project will not discharge any increase in storm water run-off onto the existing hillside areas. There are no flood hazards at the site.

In addition, the project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-to-property-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water construction best management practices, and requiring a geotechnical report to address the construction plans. Therefore, the project will not be detrimental to the public, health, safety, and welfare.

c. The proposed development will comply with the regulations of the Land Development Code including any allowable deviations pursuant to the Land Development Code.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The site is not located within the First Public Roadway, and there are no public views or coastal access from the project site, as identified in the Community Plan. In addition, the project complies with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. Therefore, the project will comply with the regulations of the Land Development Code.

2. <u>Supplemental Findings – Environmentally Sensitive Lands Findings</u>:

a. The site is physically suitable for the design and siting of the proposed development and the development will result in minimum disturbance to environmentally sensitive lands.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project contains Environmentally Sensitive Lands (ESL) in the form of steep hillsides and sensitive biological resources. The closest Multiple Habitat Planning Area designated lands are approximately 1,150 feet from the site. Staff has reviewed and accepted a Biology Report from the applicant that indicates that the project will not result in any impacts to sensitive biological resources. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, staff has reviewed and accepted a Preliminary Geotechnical Report prepared for the site that concluded that the consultant has adequately addressed the soil and geologic conditions for the project. The drainage for the project complies with City's drainage regulations and standards, and the project will not discharge any increase in storm water run-off onto the existing hillside areas. There are no flood hazards at the site. The project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-to-property-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water construction best management practices, and requiring a geotechnical report to address the construction plans.

The project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. An environmental review determined the project to be exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guideline Sections 15301(e) - Existing Facilities and 15303(e) - New Construction. Therefore, the site is physically suitable for the design and siting of the proposed development and the development will result in minimum disturbance to environmentally sensitive lands.

b. The proposed development will minimize the alteration of natural forms and will not result in undue risk from geologic and erosional forces, flood hazards, or fire hazards.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project will not result in undue risk from geologic and erosional forces, flood hazards, or fire hazards. The project is designed to be sensitive to the natural topography of the site by locating the project in the previously disturbed portion of the site. Staff has reviewed and accepted a Preliminary Geotechnical Report prepared for the site that concluded that the consultant has adequately addressed the soil and geologic conditions for the project. Drainage for the project complies with City's drainage regulations and standards, and the project will not discharge any increase in storm water run-off onto the existing hillside areas. There are no flood hazards at the site.

In addition, the project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the ESL, implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-to-property-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water construction best management practices, and requiring a geotechnical report to address the construction plans.

An environmental review determined the project to be exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guideline Sections 15301(e) -Existing Facilities and 15303(e) - New Construction. Therefore, the proposed development will minimize the alteration of natural forms and will not result in undue risk from geologic and erosional forces, flood hazards, or fire hazards.

c. The proposed development will be sited and designed to prevent adverse impact on any adjacent environmentally sensitive lands.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project contains Environmentally Sensitive Lands (ESL) in the form of steep hillsides and sensitive biological resources. The closest Multiple Habitat Planning Area designated lands are approximately 1,150 feet from the site. Staff has reviewed and accepted a Biology Report from the applicant that indicates that the project will not result in any impacts to sensitive biological resources. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area.

In addition, the project permit contains specific requirements to ensure compliance with the regulations of the Land Development Code, including those adopted to protect the public health, safety and welfare. Permit requirements include implementing a Brush Management Program, dedicating an additional two feet of right-of-way along La Jolla Mesa Drive to provide a minimum 10-foot curb-toproperty-line distance, entering into an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, constructing a new 19-foot wide City standard driveway along La Jolla Mesa Drive, implementing storm water construction best management practices, and requiring a geotechnical report to address the construction plans.

The project was designed to comply with all of the development standards required by the underlying RS-1-2 Zone, including height, density, building setbacks, floor area ratio, and lot coverage. No deviations or variations are required. An environmental review determined the project to be exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guideline Sections 15301(e) - Existing Facilities and 15303(e) - New Construction. Therefore, the proposed development will be sited and designed to prevent adverse impact on any adjacent environmentally sensitive lands.

d. The proposed development will be consistent with the City of San Diego's Multiple Species Conservation Program (MSCP) Subarea Plan and Vernal Pool Habitat Conservation Plan (VPHCP).

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement.

The project contains Environmentally Sensitive Lands (ESL) in the form of steep hillsides and sensitive biological resources. The closest Multiple Habitat Planning Area designated lands are approximately 1,150 feet from the site. Staff has reviewed and accepted a Biology Report from the applicant that indicates that the project will not result in any impacts to sensitive biological resources. The project will be developed on previously disturbed portions of the property that do not contain ESL. As a condition of approval, the project includes a Covenant of Easement over the natural steep hillside portion of the site to ensure preservation of the private open space and the ESL that is outside of the allowable development area. The project is not subject to the Vernal Pool Habitat Conservation Plan. Therefore, the proposed development will be consistent with the City of San Diego's Multiple Species Conservation Program (MSCP) Subarea Plan.

e. The proposed development will not contribute to the erosion of public beaches or adversely impact local shoreline sand supply.

The project site is located at 5911 LaJolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the LaJolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement. The site is not located adjacent to a beach or shoreline. Therefore, the proposed development will not contribute to the erosion of public beaches or adversely impact local shoreline sand supply.

f. The nature and extent of mitigation required as a condition of the permit is reasonable related to, and calculated to alleviate, negative impacts created by the proposed development.

The project site is located at 5911 La Jolla Mesa Drive, and is developed with a onestory, 4,135 square-foot single-family residence with an attached 689 square-foot garage within an established residential area in the La Jolla Community Plan and Local Coastal Program Land Use Plan (Community Plan). The project includes the construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement. There is no mitigation required for the project.

The above findings are supported by the minutes, maps and exhibits, all of which are

incorporated herein by this reference.

BE IT FURTHER RESOLVED that, based on the findings hereinbefore adopted by the Hearing

Officer, Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696 is

hereby GRANTED by the Hearing Officer to the referenced Owner/Permittee, in the form, exhibits,

terms and conditions as set forth in Coastal Development Permit No. 2312695 and Site

Development Permit No. 2312696, a copy of which is attached hereto and made a part hereof.

COASTAL DEVELOPMENT PERMIT NO. 2312695 SITE DEVELOPMENT PERMIT NO. 2312696 LA JOLLA MESA CDP/SDP- PROJECT NO. 639439 HEARING OFFICER

This Coastal Development Permit No. 2312695 and Site Development Permit No. 2312696 is granted by the Hearing Officer of the City of San Diego to LJM, LLC, California Limited Liability Company, Owner/Permittee, pursuant to San Diego Municipal Code [SDMC] section 126.0708 and 126.0505. The 0.78-acre site is located at 5911 La Jolla Mesa Drive and contains Environmentally Sensitive Lands and is in the RS-1-2 Zone, the Coastal (Non-Appealable) Overlay Zone, the Coastal Height Limitation Overlay Zone, and the Parking Impact Overlay Zone (Coastal) within the La Jolla Community Plan Area. The project site is legally described as: Lot 3, Muirlands Panorama, in the City of San Diego, County of San Diego, State of California, according to Map thereof 3329.

Subject to the terms and conditions set forth in this Permit, permission is granted to Owner/Permittee for an addition to the existing single-family residence, and construction of a detached accessory structure with basement described and identified by size, dimension, quantity, type, and location on the approved exhibits [Exhibit "A"] dated July 15, 2020, on file in the Development Services Department.

The project shall include:

- a. Construction of a 1,175 square-foot master suite addition to the existing residence, a pool, and a detached 907 square-foot accessory structure including a basement; and
- b. Public and private accessory improvements determined by the Development Services Department to be consistent with the land use and development standards for this site in accordance with the adopted community plan, the California Environmental Quality Act [CEQA] and the CEQA Guidelines, the City Engineer's requirements, zoning regulations, conditions of this Permit, and any other applicable regulations of the SDMC.

STANDARD REQUIREMENTS:

1. This permit must be utilized within thirty-six (36) months after the date on which all rights of appeal have expired. If this permit is not utilized in accordance with Chapter 12, Article 6, Division 1 of the SDMC within the 36 month period, this permit shall be void unless an Extension of Time has been granted. Any such Extension of Time must meet all SDMC requirements and applicable guidelines in effect at the time the extension is considered by the appropriate decision maker. This permit must be utilized by July 29, 2023.

2. No permit for the construction, occupancy, or operation of any facility or improvement described herein shall be granted, nor shall any activity authorized by this Permit be conducted on the premises until the Owner/Permittee signs and returns the Permit to the Development Services Department, and the Permit is recorded in the Office of the San Diego County Recorder.

3. While this Permit is in effect, the subject property shall be used only for the purposes and under the terms and conditions set forth in this Permit unless otherwise authorized by the appropriate City decision maker.

4. This Permit is a covenant running with the subject property and all of the requirements and conditions of this Permit and related documents shall be binding upon the Owner/Permittee and any successor(s) in interest.

5. The continued use of this Permit shall be subject to the regulations of this and any other applicable governmental agency.

6. Issuance of this Permit by the City of San Diego does not authorize the Owner/Permittee for this Permit to violate any Federal, State or City laws, ordinances, regulations or policies including, but not limited to, the Endangered Species Act of 1973 [ESA] and any amendments thereto (16 U.S.C. § 1531 et seq.).

7. The Owner/Permittee shall secure all necessary building permits. The Owner/Permittee is informed that to secure these permits, substantial building modifications and site improvements may be required to comply with applicable building, fire, mechanical, and plumbing codes, and State and Federal disability access laws.

8. Construction plans shall be in substantial conformity to Exhibit "A." Changes, modifications, or alterations to the construction plans are prohibited unless appropriate application(s) or amendment(s) to this Permit have been granted.

9. All of the conditions contained in this Permit have been considered and were determined necessary to make the findings required for approval of this Permit. The Permit holder is required to comply with each and every condition in order to maintain the entitlements that are granted by this Permit.

If any condition of this Permit, on a legal challenge by the Owner/Permittee of this Permit, is found or held by a court of competent jurisdiction to be invalid, unenforceable, or unreasonable, this

ATTACHMENT 5

Permit shall be void. However, in such an event, the Owner/Permittee shall have the right, by paying applicable processing fees, to bring a request for a new permit without the "invalid" conditions(s) back to the discretionary body which approved the Permit for a determination by that body as to whether all of the findings necessary for the issuance of the proposed permit can still be made in the absence of the "invalid" condition(s). Such hearing shall be a hearing de novo, and the discretionary body shall have the absolute right to approve, disapprove, or modify the proposed permit and the condition(s) contained therein.

The Owner/Permittee shall defend, indemnify, and hold harmless the City, its agents, officers, 10. and employees from any and all claims, actions, proceedings, damages, judgments, or costs, including attorney's fees, against the City or its agents, officers, or employees, relating to the issuance of this permit including, but not limited to, any action to attack, set aside, void, challenge, or annul this development approval and any environmental document or decision. The City will promptly notify Owner/Permittee of any claim, action, or proceeding and, if the City should fail to cooperate fully in the defense, the Owner/Permittee shall not thereafter be responsible to defend, indemnify, and hold harmless the City or its agents, officers, and employees. The City may elect to conduct its own defense, participate in its own defense, or obtain independent legal counsel in defense of any claim related to this indemnification. In the event of such election, Owner/Permittee shall pay all of the costs related thereto, including without limitation reasonable attorney's fees and costs. In the event of a disagreement between the City and Owner/Permittee regarding litigation issues, the City shall have the authority to control the litigation and make litigation related decisions, including, but not limited to, settlement or other disposition of the matter. However, the Owner/Permittee shall not be required to pay or perform any settlement unless such settlement is approved by Owner/Permittee.

CLIMATE ACTION PLAN REQUIREMENTS:

11. Owner/Permittee shall comply with the Climate Action Plan (CAP) Consistency Checklist stamped as Exhibit "A." Prior to issuance of any construction permit, all CAP strategies shall be noted within the first three (3) sheets of the construction plans under the heading "Climate Action Plan Requirements" and shall be enforced and implemented to the satisfaction of the Development Services Department.

ENGINEERING REQUIREMENTS:

12. Prior to final inspection, the Owner/Permittee shall dedicate an additional two feet of public right-of-way along the project frontage on La Jolla Mesa Drive to provide a minimum of 10-foot curb-to-property-line distance, in a manner satisfactory to the City Engineer.

13. Prior to the issuance of any construction permits, the Owner/Permittee shall obtain an Encroachment Maintenance Removal Agreement for the planter area and irrigation located within the public right-of-way, in a manner satisfactory to the City Engineer.

14. Prior to the issuance of any construction permits, the Owner/Permittee shall assure by permit and bond the reconstruction of the existing driveway with a new 19-foot wide City standard driveway along La Jolla Mesa Drive, in a manner satisfactory to the City Engineer.

15. Prior to the issuance of any construction permits, the Owner/Permittee shall submit a Water Pollution Control Plan (WPCP). The WPCP shall be prepared in accordance with the guidelines in Part 2 Construction BMP Standards Chapter 4 of the City's Storm Water Standards.

BRUSH MANAGEMENT PROGRAM REQUIREMENTS:

The Owner/Permittee shall implement the following requirements in accordance with the Brush Management Program as shown on Exhibit "A" on file in the Development Services Department:

16. The Brush Management Program shall be based on a standard Zone One of 35 feet in width and a Zone Two of 65 feet in width extending out from the structure towards the native/naturalized vegetation, which is consistent with SDMC Section 142.0412. Zone One shall be a minimum of 21 feet in width and Zone Two shall range between 74 feet to 79 feet in width, exercising Zone Two reduction options under SDMC Section142.0412(f).

17. Prior to the issuance of any grading permit, landscape construction documents required for the engineering permit shall be submitted showing the brush management zones on the property in substantial conformance with Exhibit "A."

18. Prior to issuance of any construction permits, a complete Brush Management Program shall be submitted to the Development Services Department for approval, and shall be in substantial conformance with Exhibit "A." The Brush Management Program shall comply with the City's Landscape Regulations and Standards.

19. Combustible accessory structures (including, but not limited to decks, trellises, gazebos, etc.) shall not be permitted in Zone One. Accessory structures of non-combustible, one-hour fire-rated, and/or Type IV heavy timber construction may be approved in Zone One subject to the Fire Marshal's approval.

20. The Brush Management Program shall be maintained at all times in accordance with the City's Landscape Standards.

PLANNING/DESIGN REQUIREMENTS:

21. All Environmentally Sensitive Lands on the premises shall be included within a Covenant of Easement, in accordance with the procedures set forth in SDMC Section 143.0152.

22. A topographical survey conforming to the provisions of the SDMC may be required if it is determined, during construction, that there may be a conflict between the building(s) under construction and a condition of this Permit or a regulation of the underlying zone. The cost of any such survey shall be borne by the Owner/Permittee.

23. All private outdoor lighting shall be shaded and adjusted to fall on the same premises where such lights are located and in accordance with the applicable regulations in the SDMC.

GEOLOGY REQUIREMENTS:

24. The Owner/Permittee shall submit a geotechnical investigation report or update letter that specifically addresses the proposed construction plans. The geotechnical investigation report or update letter shall be reviewed for adequacy by the Geology Section of the Development Services Department prior to issuance of any construction permits.

25. The Owner/Permittee shall submit an as-graded geotechnical report prepared in accordance with the City's "Guidelines for Geotechnical Reports" following completion of the grading. The asgraded geotechnical report shall be reviewed for adequacy by the Geology Section of the Development Services Department prior to exoneration of the bond and grading permit close-out.

INFORMATION ONLY:

- The issuance of this discretionary permit alone does not allow the immediate commencement or continued operation of the proposed use on site. Any operation allowed by this discretionary permit may only begin or recommence after all conditions listed on this permit are fully completed and all required ministerial permits have been issued and received final inspection.
- Any party on whom fees, dedications, reservations, or other exactions have been imposed as conditions of approval of this Permit, may protest the imposition within ninety days of the approval of this development permit by filing a written protest with the City Clerk pursuant to California Government Code-section 66020.
- This development may be subject to impact fees at the time of construction permit issuance.

APPROVED by the Hearing Officer of the City of San Diego on July 15, 2020 and [Approved Resolution Number].

La Jolla Community Planning Association Trustee Meeting Agenda

7 May 2020

Regular Meetings: 1st Thursday each month, La Jolla Recreation Center, 615 Prospect St

PO Box 889, La Jolla CA 92038 https://lajollacpa.org info@lajollacpa.org President: Diane Kane 1st Vice President: Greg Jackson 2nd Vice President: Helen Boyden Secretary: Suzanne Weissman Treasurer: Mike Costello

Due to the COVID-19 public health emergency, LJCPA meetings are being held temporarily as online video/voice teleconferences. Instructions for registering, attending, or making written comments at this meeting are at https://gregj.us/3alzCbU. Those who wish to attend (including viewing, listening, and possibly speaking at the meeting) must register in advance.

Supplemental materials for the meeting are online via https://lajollacpa.org/ljcpa-5-7-2020-documents/

1. Welcome and Call to Order (6:00pm)

This is a full agenda, recorded meeting therefore, the following rules will be enforced:

- A. Mobile devices off or on silent mode.
- B. All public and trustee comment will be addressed to the chair.
- C. Public & trustee comment will be limited to 2 minutes.
- D. Comments will be directed to the project or matter stated in the third person for the purpose of respect & clarity.
- E. Chair may ask for member votes. Please keep hands raised until the vote tally is announced.
- F. Chair will alternate order of trustee comment. Upon consensus, Chair will close discussion and call for a motion.
- G. Please notify chair of any organized public presentation requests one week prior to meeting

2. Adopt the Agenda

3. Meeting Minutes Review & Approval

3.1. 2 April 2020—regular meeting minutes

The public is encouraged to attend and participate in Community Joint Committee & Board meetings before the item/project is considered by the LJCPA:

PDO – Planned District Ordinance Committee, Chair Deborah Marengo, 2nd Monday, 4:00 pm

DPR – Development Permit Review Committee, Chair Brian Will, 2nd & 3rd Tuesday, 4:00 pm

PRC – La Jolla Shores Permit Review Committee, Vice Chair, Andy Fotsch, 3rd Monday, 4:00 pm

T&T – Traffic & Transportation Board, Chair David Abrams, 3rd Wednesday, 4:00 pm

4. Consent Agenda

The Consent Agenda allows the LJCPA to ratify recommendations of the community joint committees and boards in a single vote with no presentation or debate. It is not a decision regarding the item but a decision whether to accept the recommendation of the committee/board as the recommendation of the LJCPA. The public may comment on consent items. See Committee minutes and/or agenda for description of projects, deliberations, and vote. Anyone may request a consent item be pulled for full discussion by the LJCPA.

La Jolla Community Planning Association 7 May 2020 Regular Meeting Page **2** of **3**

4.1. 7365 Remley Place (McNeil)

LA JOLLA (Process 3) Coastal Development Permit and Site Development Permit for slope stabilization with soil nail wall located at 7365 Remley Place. The 0.49-acre site is in the RS-1-4 Base Zone and the Coastal (Non-Appealable) Overlay Zone within the La Jolla Community Planning Area, and Council District 1.

DPR action: Passes 5-1-1

			SHEET	<u>19</u> OF <u>20</u>

San Diego Municipal Code §142.0412 - Brush Management

Table 142-04H

(f) The Zone Two width may be decreased by 11/2 feet for each 1 foot of increase in Zone One width.

(g) Zone One Requirements

- (1) The required Zone One width shall be provided between native or naturalized vegetation and any structure and shall be measured from the exterior of the structure to the vegetation.
- (2) Zone One shall contain no habitable *structures*, *structures* that are directly attached to habitable structures, or other combustible construction that provides a means for transmitting fire to the habitable structures. Structures such as fences, walls, palapas, play structures, and non-habitable gazebos that are located within brush management Zone One shall be of noncombustible, one hour fire-rated or heavy timber construction.
- (3) Plants within Zone One shall be primarily low-growing and less than 4 feet in height with the exception of trees. Plants shall be low-fuel and fire-resistive.
- (4) Trees within Zone One shall be located away from *structures* to a minimum distance of 10 feet as measured from the structures to the drip line of the tree at maturity in accordance with the Landscape Standards of the Land Development Manual.
- (5) Permanent irrigation is required for all planting areas within Zone One except as follows:
 - (A) When planting areas contain only species that do not grow taller than 24 inches in height, or
 - (B) When planting areas contain only native or naturalized species that are not summer-dormant and have a maximum height at plant maturity of less than 24 inches.
- (6) Zone One irrigation overspray and runoff shall not be allowed into adjacent areas of native or naturalized vegetation.
- (7) Zone One shall be maintained on a regular basis by pruning and thinning plants, controlling weeds, and maintaining irrigation systems.
- (h) Zone Two Requirements
 - (1) The required Zone Two width shall be provided between Zone One and the undisturbed, native or naturalized vegetation, and shall be measured from the edge of Zone One that is farthest from the habitable structure, to the edge of undisturbed vegetation.
 - (2) No structures shall be constructed in Zone Two.
 - (3) Within Zone Two, 50 percent of the plants over 24 inches in height shall be cut and cleared to a height of 6 inches.
 - (4) Within Zone Two, all plants remaining after 50 percent are reduced in height, shall be pruned to reduce fuel loading in accordance with the Landscape Standards in the Land Development Manual. Non-native plants shall be pruned before native plants are pruned.
 - (5) The following standards shall be used where Zone Two is in an area previously graded as part of legal development activity and is proposed to be planted with new plant material instead of *clearing* existing native or naturalized vegetation:
 - (A) All new plant material for Zone Two shall be native, low-fuel, and fire-resistive. No non-native plant material may be planted in Zone Two either inside the MHPA or in the Coastal Overlay Zone, adjacent to areas containing sensitive biological resources.
 - (B) New plants shall be low-growing with a maximum height at maturity of 24 inches. Single specimens of fire resistive native trees and tree form shrubs may exceed this limitation if they are located to reduce the chance of transmitting fire from native or naturalized vegetation to habitable structures and if the vertical distance between the lowest branches of the trees and the top of adjacent plants are three times the height of the adjacent plants to reduce the spread of fire through ladder fueling.
 - (C) All new Zone Two plantings shall irrigated temporarily until established to the satisfaction of the City Manager. Only lowflow, low-gallonage spray heads may be used in Zone Two. Overspray and runoff from the irrigation shall not drift or flow into adjacent areas of native or naturalized vegetation. Temporary irrigation systems shall be removed upon approved establishment of the plantings. Permanent irrigation is not allowed in Zone Two.

Fire safety in the landscape is achieved by reducing the readily flammable fuel adjacent to structures. This can be accomplished by pruning and thinning of native and naturalized vegetation, revegetation with low fuel volume plantings or a combination of the two. Implementing brush management in an environmentally appropriate manner requires a reduction in the amount and continuity of highly flammable fuel while maintaining plant coverage for soil protection. Such a transition will minimize the visual, biological and erosion impacts while reducing the risks of wildland fires.

San Diego Landscape Standards Section III - Brush Management

3-1 BRUSH MANAGEMENT – DESCRIPTION

3-2 BRUSH MANAGEMENT- REQUIREMENTS

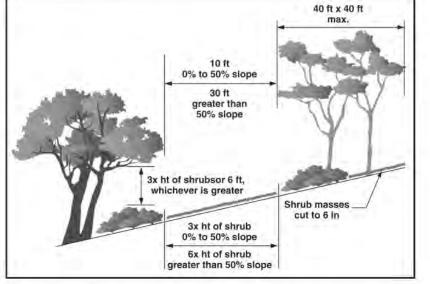

3.2-1 Basic requirements – All Zones

3.2-1.01 For zone two, plants shall not be cut below six inches.

- 3.2-1.02 Debris and trimmings produced by thinning and pruning shall be removed from the site or if left, shall be converted into mulch by a chipping machine and evenly dispersed, non-irrigated, to a maximum depth of 6 inches.
- 3.2-1.03 Trees and large tree form shrubs (e.g., Oaks, Sumac, Toyon) which are being retained shall be pruned to provide clearance of three times the height of the under story plant material or six feet whichever is higher (Figure 3-1). Dead and excessively twiggy growth shall also be removed.

Figure 3-1

Pruning Trees to Provide Cleareance for Brush Management

- 3.2-1.04 All plants or plant groupings except cacti, succulents, trees and tree-form shrubs shall be separated by a distance three times the height of the tallest adjacent plants (Figure 3-1).
- 3.2-1.05 Maximum coverage and area limitations as stated herein shall not apply to indigenous native tree species (i.e., Pinus, Quercus, Platanus, Salix and Populus).

3.2-2 Zone 1 Requirements - All Structures

- 3.2-2.01 Do not use, and remove if necessary, highly flammable plant materials (see Appendix "B").
- 3.2-2.02 Trees should not be located any closer to a structure than a distance equal to the tree's mature spread.
- 3.2-2.03 Maintain all plantings in a succulent condition.
- 3.2-2.04 Non-irrigated plant groupings over six inches in height may be retained provided they do not exceed 100 square feet in area and their combined coverage does not exceed 10 percent of the total Zone 1 area.

3.2-3 Zone 2 Requirements – All Structures

3.2-3.01 Individual non-irrigated plant groupings over 24 inches in height may be retained provided they do not exceed 400 square feet in area and their combined coverage does not exceed 30 percent of the total Zone 2 area.

Brush Management Maintenance Notes

1. General Maintenance ~ Regular inspections and landscape maintenance are necessary to minimize the potential damage or loss of property from brush fires and other natural hazards such as erosion and slope failures. Because each property is unique establishing a precise maintenance schedule is not feasible. For effective fire and watershed management, however, property owners should expect to provide maintenance according to each brush management zone: Zone 1: Year-round maintenance, Zone 2: Seasonal maintenance. Brush management activities are prohibited within coastal sage scrub, maritime succulent scrub, and coastal sage-chaparral habitats from March 1 through August 15, except where documented to the satisfaction of the City Manager that the thinning would be consistent with conditions of species coverage described in the City of San Diego's MSCP Subarea Plan.

2. Brush Management Zone 1 ~ This is the most critical area for fire and watershed safety. All ornamental plantings should be kept well watered and any irrigation run-off should drain toward the street. Rain gutters and drainage pipes should be cleaned regularly and all leaves removed from the roof before the fire season begins. All planting, particularly non-irrigated natives and large trees should be regularly pruned to eliminate dead fuels, to reduce excessive fuel and to provide adequate space between plants and structures.

3. Brush Management Zone 2 ~ Seasonal maintenance in this zone should include removal of dead woody plants, eradication of weedy species and periodic pruning and thinning of trees and shrubs. Removal of weeds should not be done with hand tools such as hoes, as this disturbs valuable soil. The use of weed trimmers or other tools which retain short stubble that protects the soil is recommended. Native shrubs should be pruned in the summer after the major plant growth occurs. Well pruned healthy shrubs should typically require several years to build up excessive live and dead fuel. On slopes all drainage devices must be kept clear. Re-inspect after each major storm since minor soil slips can block drains. Various groundcovers should be periodically sheared and thatch removed. Diseased and dead wood should be pruned from trees. Fertilizing trees and shrubs is not typically recommended as this may stimulate excessive growth.

4. Long-term Maintenance Responsibility ~ All Landscaping / Brush Management within the Brush Management Zone(s) as shown on these plans shall be the responsibility of please Specify, e.g. Owner, H.O.A.]. The Brush Management Zone areas shall be maintained free of debris and litter and all plant material shall be maintained in a healthy growing condition.
