

# MITIGATED NEGATIVE DECLARATION

Project No. 524566 SCH No. N/A

SUBJECT: Paseo Mews Townhomes CDP PDP - COASTAL DEVELOPMENT PERMIT and PLANNED DEVELOPMENT PERMIT for a mixed-use development consisting of 24 residential townhomes/live work lofts for a total of 46,256 square feet of construction. The project would be constructed in two phases. Phase one would include seven 1,260 square foot three 2-bedroom lofts, four 800 square foot one 1-bedroom apartments, four 2-bedroom lofts and seven 1,878 square foot townhouses. The existing 7,450 square feet of retail space on Garnet Avenue will remain. Phase two would include 6,000 800 square feet of retail; eight 1,260 square foot lofts, four 800 square foot one-bedroom apartments, and twelve 1,878 square foot five townhouses; and one 2-bedroom loft. The 0.86-acre site is located at 875 Garnet Avenue in the CC-4-2 base zone within the Coastal Overlay Zone (Non-Appealable) in the Pacific Beach Community Planning Area, Council District 2. Pedestrian ingress/egress to the project site would be the pedestrian entrances at Garnet Avenue and Hornblend Avenue. The vehicular ingress/egress would be at Hornblend Avenue and mid-block Paseo Mews. Planned landscaping includes Australian Willow, Dwarf Southern Magnolia, and Sword Fern. LEGAL DESCRIPTION: Lots 15-26 of Map 15287 Avalon Plaza Map 854 Pacific Beach Amended Trustees Maps, Block 423, Page 4, Sheet 1 of 2.

# Update 1/18/2018:

Minor revisions have been made to the draft Mitigated Negative Declaration (MND). Added language would appear in a strikeout and <u>underlined</u> format. Minor revisions include a clarification of the description of the project.

In accordance with the California Environmental Quality Act, Section 15073.5 (c)(4), the addition of new information that clarifies, amplifies, or makes insignificant modification does not require recirculation as there are no new impacts and no new mitigation identified. An environmental document need only be recirculated when there is identification of new significant environmental impact or the addition of a new mitigation measure required to avoid a significant environmental impact.

### I. PROJECT DESCRIPTION:

See attached Initial Study.

### II. ENVIRONMENTAL SETTING:

See attached Initial Study.

#### III. DETERMINATION:

The City of San Diego conducted an Initial Study which determined that the proposed project could have a significant environmental effect in the following areas(s): **CULTURAL RESOURCES** (**ARCHAEOLOGY**), **TRIBAL CULTURAL RESOURCES**. Subsequent revisions in the project proposal create the specific mitigation identified in Section V of this Mitigated Negative Declaration. The project as revised now avoids or mitigates the potentially significant environmental effects previously identified, and the preparation of an Environmental Impact Report will not be required.

#### IV. DOCUMENTATION:

The attached Initial Study documents the reasons to support the above Determination.

- V. MITIGATION, MONITORING AND REPORTING PROGRAM:
- A. GENERAL REQUIREMENTS PART I

  Plan Check Phase (prior to permit issuance)
- 1. Prior to the issuance of a Notice To Proceed (NTP) for a subdivision, or any construction permits, such as Demolition, Grading or Building, or beginning any construction related activity on-site, the Development Services Department (DSD) Director's Environmental Designee (ED) shall review and approve all Construction Documents (CD), (plans, specification, details, etc.) to ensure the MMRP requirements are incorporated into the design.
- 2. In addition, the ED shall verify that the MMRP Conditions/Notes that apply ONLY to the construction phases of this project are included VERBATIM, under the heading, "ENVIRONMENTAL/MITIGATION REQUIREMENTS."
- 3. These notes must be shown within the first three (3) sheets of the construction documents in the format specified for engineering construction document templates as shown on the City website:

http://www.sandiego.gov/development-services/industry/standtemp.shtml

- 4. The **TITLE INDEX SHEET** must also show on which pages the "Environmental/Mitigation Requirements" notes are provided.
- 5. **SURETY AND COST RECOVERY** The Development Services Director or City Manager may require appropriate surety instruments or bonds from private Permit Holders to ensure the long term performance or implementation of required mitigation measures or programs. The City is authorized to recover its cost to offset the salary, overhead, and expenses for City personnel and programs to monitor qualifying projects.

- B. GENERAL REQUIREMENTS PART II

  Post Plan Check (After permit issuance/Prior to start of construction)
- 1. PRE CONSTRUCTION MEETING IS REQUIRED TEN (10) WORKING DAYS PRIOR TO BEGINNING ANY WORK ON THIS PROJECT. The PERMIT HOLDER/OWNER is responsible to arrange and perform this meeting by contacting the CITY RESIDENT ENGINEER (RE) of the Field Engineering Division and City staff from MITIGATION MONITORING COORDINATION (MMC). Attendees must also include the Permit holder's Representative(s), Job Site Superintendent and the following consultants:

Qualified Archaeologist, Native American Monitor

#### Note:

Failure of all responsible Permit Holder's representatives and consultants to attend shall require an additional meeting with all parties present.

#### CONTACT INFORMATION:

- a) The PRIMARY POINT OF CONTACT is the **RE** at the **Field Engineering Division 858-627-3200**
- b) For Clarification of ENVIRONMENTAL REQUIREMENTS, it is also required to call **RE and MMC at 858-627-3360**
- 2. MMRP COMPLIANCE: This Project, Project Tracking System (PTS) #524566 and /or Environmental Document # 524566, shall conform to the mitigation requirements contained in the associated Environmental Document and implemented to the satisfaction of the DSD's Environmental Designee (MMC) and the City Engineer (RE). The requirements may not be reduced or changed but may be annotated (i.e. to explain when and how compliance is being met and location of verifying proof, etc.). Additional clarifying information may also be added to other relevant plan sheets and/or specifications as appropriate (i.e., specific locations, times of monitoring, methodology, etc

#### Note:

Permit Holder's Representatives must alert RE and MMC if there are any discrepancies in the plans or notes, or any changes due to field conditions. All conflicts must be approved by RE and MMC BEFORE the work is performed.

**3. OTHER AGENCY REQUIREMENTS:** Evidence of compliance with all other agency requirements or permits shall be submitted to the RE and MMC for review and acceptance prior to the beginning of work or within one week of the Permit Holder obtaining documentation of those permits or requirements. Evidence shall include copies of permits, letters of resolution or other documentation issued by the responsible agency.

### None Required

### 4. MONITORING EXHIBITS

All consultants are required to submit, to RE and MMC, a monitoring exhibit on a 11x17 reduction of the appropriate construction plan, such as site plan, grading, landscape, etc., marked to clearly show the specific areas including the **LIMIT OF WORK**, scope of that discipline's work, and notes indicating

when in the construction schedule that work will be performed. When necessary for clarification, a detailed methodology of how the work will be performed shall be included.

#### NOTE:

Surety and Cost Recovery – When deemed necessary by the Development Services Director or City Manager, additional surety instruments or bonds from the private Permit Holder may be required to ensure the long term performance or implementation of required mitigation measures or programs. The City is authorized to recover its cost to offset the salary, overhead, and expenses for City personnel and programs to monitor qualifying projects.

#### 5. OTHER SUBMITTALS AND INSPECTIONS:

The Permit Holder/Owner's representative shall submit all required documentation, verification letters, and requests for all associated inspections to the RE and MMC for approval per the following schedule:

Schedule:							
DOCUMENT SUBMITTAL/INSPECTION CHECKLIST							
Issue Area	Document Submittal	Associated					
SPH-KER-HOR NIC FELLORS IN	THE DISTRICT OF STREET, STREET	Inspection/Approvals/Notes					
General	Consultant Qualification	Prior to Preconstruction					
ODE STORY OF THE PROPERTY OF	Letters	Meeting					
General	Consultant Construction	Prior to or at Preconstruction					
	Monitoring Exhibits	Meeting					
Archaeological Resources	Monitoring Report(s)	Monitoring Report Approval					
Bond Release	Request for Bond Release	Final MMRP Inspections Prior to					
A STATE OF THE PARTY OF THE PAR	Letter	Bond Release Letter					

# B. SPECIFIC MMRP ISSUE AREA CONDITIONS/REQUIREMENTS

### **CULTURAL RESOURCES (ARCHAEOLOGY) and TRIBAL CULTURAL RESOURCES MITIGATION**

#### I. Prior to Permit Issuance

- A. Entitlements Plan Check
  - 1. Prior to issuance of any construction permits, including but not limited to, the first Grading Permit, Demolition Plans/Permits and Building Plans/Permits or a Notice to Proceed for Subdivisions, but prior to the first preconstruction meeting, whichever is applicable, the Assistant Deputy Director (ADD) Environmental designee shall verify that the requirements for Archaeological Monitoring and Native American monitoring have been noted on the applicable construction documents through the plan check process.
- B. Letters of Qualification have been submitted to ADD
  - The applicant shall submit a letter of verification to Mitigation Monitoring Coordination (MMC) identifying the Principal Investigator (PI) for the project and the names of all persons involved in the archaeological monitoring program, as defined in the City of San Diego Historical Resources Guidelines (HRG). If applicable, individuals involved in the archaeological monitoring program must have completed the 40-hour HAZWOPER training with certification documentation.

- 2. MMC will provide a letter to the applicant confirming the qualifications of the PI and all persons involved in the archaeological monitoring of the project meet the qualifications established in the HRG.
- 3. Prior to the start of work, the applicant must obtain written approval from MMC for any personnel changes associated with the monitoring program.

# II. Prior to Start of Construction

- A. Verification of Records Search
  - 1. The PI shall provide verification to MMC that a site specific records search (1/4 mile radius) has been completed. Verification includes, but is not limited to a copy of a confirmation letter from South Coastal Information Center, or, if the search was inhouse, a letter of verification from the PI stating that the search was completed.
  - 2. The letter shall introduce any pertinent information concerning expectations and probabilities of discovery during trenching and/or grading activities.
  - 3. The PI may submit a detailed letter to MMC requesting a reduction to the ¼ mile radius.

# B. PI Shall Attend Precon Meetings

- Prior to beginning any work that requires monitoring; the Applicant shall arrange a
  Precon Meeting that shall include the PI, Native American consultant/monitor (where
  Native American resources may be impacted), Construction Manager (CM) and/or
  Grading Contractor, Resident Engineer (RE), Building Inspector (BI), if appropriate,
  and MMC. The qualified Archaeologist and Native American Monitor shall attend any
  grading/excavation related Precon Meetings to make comments and/or suggestions
  concerning the Archaeological Monitoring program with the Construction Manager
  and/or Grading Contractor.
  - a. If the PI is unable to attend the Precon Meeting, the Applicant shall schedule a focused Precon Meeting with MMC, the PI, RE, CM or BI, if appropriate, prior to the start of any work that requires monitoring.

### 2. Identify Areas to be Monitored

- a. Prior to the start of any work that requires monitoring, the PI shall submit an Archaeological Monitoring Exhibit (AME) (with verification that the AME has been reviewed and approved by the Native American consultant/monitor when Native American resources may be impacted) based on the appropriate construction documents (reduced to 11x17) to MMC identifying the areas to be monitored including the delineation of grading/excavation limits.
- b. The AME shall be based on the results of a site specific records search as well as information regarding existing known soil conditions (native or formation).

### 3. When Monitoring Will Occur

- a. Prior to the start of any work, the PI shall also submit a construction schedule to MMC through the RE indicating when and where monitoring will occur.
- b. The PI may submit a detailed letter to MMC prior to the start of work or during construction requesting a modification to the monitoring program. This request shall be based on relevant information such as review of final construction documents which indicate site conditions such as depth of excavation and/or site graded to bedrock, etc., which may reduce or increase the potential for resources to be present.

### III. During Construction

- A. Monitor(s) Shall be Present During Grading/Excavation/Trenching
  - The Archaeological Monitor shall be present full-time during all soil disturbing and grading/excavation/trenching activities which could result in impacts to archaeological resources as identified on the AME. The Construction Manager is responsible for notifying the RE, PI, and MMC of changes to any construction activities such as in the case of a potential safety concern within the area being monitored. In certain circumstances OSHA safety requirements may necessitate modification of the AME.
  - 2. The Native American consultant/monitor shall determine the extent of their presence during soil disturbing and grading/excavation/trenching activities based on the AME and provide that information to the PI and MMC. If prehistoric resources are encountered during the Native American consultant/monitor's absence, work shall stop and the Discovery Notification Process detailed in Section III.B-C and IV.A-D shall commence.
  - 3. The PI may submit a detailed letter to MMC during construction requesting a modification to the monitoring program when a field condition such as modern disturbance post-dating the previous grading/trenching activities, presence of fossil formations, or when native soils are encountered that may reduce or increase the potential for resources to be present.
  - 4. The archaeological and Native American consultant/monitor shall document field activity via the Consultant Site Visit Record (CSVR). The CSVR's shall be faxed by the CM to the RE the first day of monitoring, the last day of monitoring, monthly (Notification of Monitoring Completion), and in the case of ANY discoveries. The RE shall forward copies to MMC.

#### B. Discovery Notification Process

- 1. In the event of a discovery, the Archaeological Monitor shall direct the contractor to temporarily divert all soil disturbing activities, including but not limited to digging, trenching, excavating or grading activities in the area of discovery and in the area reasonably suspected to overlay adjacent resources and immediately notify the RE or BI, as appropriate.
- 2. The Monitor shall immediately notify the PI (unless Monitor is the PI) of the discovery.
- 3. The PI shall immediately notify MMC by phone of the discovery, and shall also submit written documentation to MMC within 24 hours by fax or email with photos of the resource in context, if possible.
- 4. No soil shall be exported off-site until a determination can be made regarding the significance of the resource specifically if Native American resources are encountered.

### C. Determination of Significance

- 1. The PI and Native American consultant/monitor, where Native American resources are discovered shall evaluate the significance of the resource. If Human Remains are involved, follow protocol in Section IV below.
  - a. The PI shall immediately notify MMC by phone to discuss significance determination and shall also submit a letter to MMC indicating whether additional mitigation is required.

- b. If the resource is significant, the PI shall submit an Archaeological Data Recovery Program (ADRP) which has been reviewed by the Native American consultant/monitor, and obtain written approval from MMC. Impacts to significant resources must be mitigated before ground disturbing activities in the area of discovery will be allowed to resume. Note: If a unique archaeological site is also an historical resource as defined in CEQA, then the limits on the amount(s) that a project applicant may be required to pay to cover mitigation costs as indicated in CEQA Section 21083.2 shall not apply.
- c. If the resource is not significant, the PI shall submit a letter to MMC indicating that artifacts will be collected, curated, and documented in the Final Monitoring Report. The letter shall also indicate that that no further work is required.

# IV. Discovery of Human Remains

If human remains are discovered, work shall halt in that area and no soil shall be exported off-site until a determination can be made regarding the provenance of the human remains; and the following procedures as set forth in CEQA Section 15064.5(e), the California Public Resources Code (Sec. 5097.98) and State Health and Safety Code (Sec. 7050.5) shall be undertaken:

### A. Notification

- 1. Archaeological Monitor shall notify the RE or BI as appropriate, MMC, and the PI, if the Monitor is not qualified as a PI. MMC will notify the appropriate Senior Planner in the Environmental Analysis Section (EAS) of the Development Services Department to assist with the discovery notification process.
- 2. The PI shall notify the Medical Examiner after consultation with the RE, either in person or via telephone.

### B. Isolate discovery site

- 1. Work shall be directed away from the location of the discovery and any nearby area reasonably suspected to overlay adjacent human remains until a determination can be made by the Medical Examiner in consultation with the PI concerning the provenance of the remains.
- 2. The Medical Examiner, in consultation with the PI, will determine the need for a field examination to determine the provenance.
- 3. If a field examination is not warranted, the Medical Examiner will determine with input from the PI, if the remains are or are most likely to be of Native American origin.

# C. If Human Remains ARE determined to be Native American

- 1. The Medical Examiner will notify the Native American Heritage Commission (NAHC) within 24 hours. By law, **ONLY** the Medical Examiner can make this call.
- 2. NAHC will immediately identify the person or persons determined to be the Most Likely Descendent (MLD) and provide contact information.
- 3. The MLD will contact the PI within 24 hours or sooner after the Medical Examiner has completed coordination, to begin the consultation process in accordance with CEQA Section 15064.5(e), the California Public Resources and Health & Safety Codes.
- 4. The MLD will have 48 hours to make recommendations to the property owner or representative, for the treatment or disposition with proper dignity, of the human remains and associated grave goods.
- 5. Disposition of Native American Human Remains will be determined between the MLD and the PI, and, if:

- a. The NAHC is unable to identify the MLD, OR the MLD failed to make a recommendation within 48 hours after being notified by the Commission; OR;
- b. The landowner or authorized representative rejects the recommendation of the MLD and mediation in accordance with PRC 5097.94 (k) by the NAHC fails to provide measures acceptable to the landowner, THEN,
- c. In order to protect these sites, the Landowner shall do one or more of the following:
  - (1) Record the site with the NAHC;
  - (2) Record an open space or conservation easement on the site;
  - (3) Record a document with the County.
- d. Upon the discovery of multiple Native American human remains during a ground disturbing land development activity, the landowner may agree that additional conferral with descendants is necessary to consider culturally appropriate treatment of multiple Native American human remains. Culturally appropriate treatment of such a discovery may be ascertained from review of the site utilizing cultural and archaeological standards. Where the parties are unable to agree on the appropriate treatment measures the human remains and items associated and buried with Native American human remains shall be reinterred with appropriate dignity, pursuant to Section 5.c., above.

### D. If Human Remains are **NOT** Native American

- 1. The PI shall contact the Medical Examiner and notify them of the historic era context of the burial.
- 2. The Medical Examiner will determine the appropriate course of action with the PI and City staff (PRC 5097.98).
- 3. If the remains are of historic origin, they shall be appropriately removed and conveyed to the San Diego Museum of Man for analysis. The decision for internment of the human remains shall be made in consultation with MMC, EAS, the applicant/landowner, any known descendant group, and the San Diego Museum of Man.

# V. Night and/or Weekend Work

- A. If night and/or weekend work is included in the contract
  - 1. When night and/or weekend work is included in the contract package, the extent and timing shall be presented and discussed at the precon meeting.
  - 2. The following procedures shall be followed.
    - a. No Discoveries In the event that no discoveries were encountered during night and/or weekend work, the PI shall record the information on the CSVR and submit to MMC via fax by 8AM of the next business day.
    - Discoveries
       All discoveries shall be processed and documented using the existing procedures detailed in Sections III During Construction, and IV Discovery of Human Remains. Discovery of human remains shall always be treated as a significant discovery.
    - c. Potentially Significant Discoveries

      If the PI determines that a potentially significant discovery has been made, the procedures detailed under Section III During Construction and IV-Discovery of Human Remains shall be followed.

- d. The PI shall immediately contact MMC, or by 8AM of the next business day to report and discuss the findings as indicated in Section III-B, unless other specific arrangements have been made.
- B. If night and/or weekend work becomes necessary during the course of construction
  - 1. The Construction Manager shall notify the RE, or BI, as appropriate, a minimum of 24 hours before the work is to begin.
  - 2. The RE, or BI, as appropriate, shall notify MMC immediately.
- C. All other procedures described above shall apply, as appropriate.

#### VI. Post Construction

- A. Preparation and Submittal of Draft Monitoring Report
  - 1. The PI shall submit two copies of the Draft Monitoring Report (even if negative), prepared in accordance with the Historical Resources Guidelines (Appendix C/D) which describes the results, analysis, and conclusions of all phases of the Archaeological Monitoring Program (with appropriate graphics) to MMC for review and approval within 90 days following the completion of monitoring. It should be noted that if the PI is unable to submit the Draft Monitoring Report within the allotted 90-day timeframe resulting from delays with analysis, special study results or other complex issues, a schedule shall be submitted to MMC establishing agreed due dates and the provision for submittal of monthly status reports until this measure can be met.
    - a. For significant archaeological resources encountered during monitoring, the Archaeological Data Recovery Program shall be included in the Draft Monitoring Report.
    - b. Recording Sites with State of California Department of Parks and Recreation The PI shall be responsible for recording (on the appropriate State of California Department of Park and Recreation forms-DPR 523 A/B) any significant or potentially significant resources encountered during the Archaeological Monitoring Program in accordance with the City's Historical Resources Guidelines, and submittal of such forms to the South Coastal Information Center with the Final Monitoring Report.
  - 2. MMC shall return the Draft Monitoring Report to the PI for revision or, for preparation of the Final Report.
  - 3. The PI shall submit revised Draft Monitoring Report to MMC for approval.
  - 4. MMC shall provide written verification to the PI of the approved report.
  - 5. MMC shall notify the RE or BI, as appropriate, of receipt of all Draft Monitoring Report submittals and approvals.
- B. Handling of Artifacts
  - 1. The PI shall be responsible for ensuring that all cultural remains collected are cleaned and catalogued
  - 2. The PI shall be responsible for ensuring that all artifacts are analyzed to identify function and chronology as they relate to the history of the area; that faunal material is identified as to species; and that specialty studies are completed, as appropriate.
  - 3. The cost for curation is the responsibility of the property owner.
- C. Curation of artifacts: Accession Agreement and Acceptance Verification
  - 1. The PI shall be responsible for ensuring that all artifacts associated with the survey, testing and/or data recovery for this project are permanently curated with an

- appropriate institution. This shall be completed in consultation with MMC and the Native American representative, as applicable.
- 2. The PI shall include the Acceptance Verification from the curation institution in the Final Monitoring Report submitted to the RE or BI and MMC.
- 3. When applicable to the situation, the PI shall include written verification from the Native American consultant/monitor indicating that Native American resources were treated in accordance with state law and/or applicable agreements. If the resources were reinterred, verification shall be provided to show what protective measures were taken to ensure no further disturbance occurs in accordance with Section IV Discovery of Human Remains, Subsection 5.

# D. Final Monitoring Report(s)

- 1. The PI shall submit one copy of the approved Final Monitoring Report to the RE or BI as appropriate, and one copy to MMC (even if negative), within 90 days after notification from MMC that the draft report has been approved.
- 2. The RE shall, in no case, issue the Notice of Completion and/or release of the Performance Bond for grading until receiving a copy of the approved Final Monitoring Report from MMC which includes the Acceptance Verification from the curation institution.

The above mitigation monitoring and reporting program will require additional fees and/or deposits to be collected prior to the issuance of building permits, certificates of occupancy and/or final maps to ensure the successful completion of the monitoring program.

### VI. PUBLIC REVIEW DISTRIBUTION:

Draft copies or notice of this Mitigated Negative Declaration were distributed to:

Ms. Courtney Holowach

Development Services Department

City of San Diego

1222 First Avenue, Mail Station 501 San Diego, California 92101

Subject:

Draft Mitigated Negative Declaration

Pasco Mews Project No. 524566

Dear Ms. Holowach:

I have reviewed the subject DMND on behalf of this committee of the San Diego County Archaeological Society.

 Based on the information contained in the DMND, we agree with the archaeological monitoring program included as mitigation for potential impacts of this project.

Thank you for providing for our participation in the environmental review process for this project.

Sincerely,

lames W. Royle, Jr., Chairperson Environmental Review Committee

Courtney Holowach Environmental Planner City of San Diego Development Services Center 1222 First Avenue, MS 501 San Diego, CA 92101

RE: Paseo Mews Townhomes CDP PDP

Dear Ms. Holowach,

In reviewing the above referenced project the Viejas Band of Kumevaay Indians ("Viejas") would like to comment at this time.

The project area may contain many sacred sites to the Kumeyaay people. We request 2) that these sacred sites be avoided with adequate buffer zones.

Additionally, Viejas is requesting, as appropriate, the following:

 All NEPA/CEQA/NAGPRA laws be followed 3)

Immediately contact Viejas on any changes or inadvertent discoveries.

Thank you for your collaboration and support in preserving our Tribal cultural resources. I look forward to hearing from you. Please call me at 619-659-2312 or Ernest Pingleton at 619-659-2314, or email, rteran@viejas-nsn.gov or epingleton@viejas-nsn.gov, for scheduling. Thank you.

Sincerely

Ray Teran/Resource Management VIEJAS BAND OF KUMEYAAY INDIANS RESPONSE TO COMMENT

Viejas

December 20, 2017

2) Comment noted. A record search of the California Historic Resources Information System (CHRIS) digital database was reviewed by qualified archaeological City staff to determine presence or absence of potential resources within the project site. Although no recorded archaeological sites were located within or adjacent to the project site, there is a potential for the project to impact archaeological resources due to the project's proximity to a known Native American village and archaeological site. Therefore, mitigation measures related to Cultural Resources (Archaeology) are required. The requirement for Native American monitoring is included in Section V of the Mitigated Negative Declaration, which identifies the applicant confer with appropriate person/organizations when inadvertent discoveries occur during grading activities. Furthermore, in accordance with the requirements of Assembly Bill (AB) 52, the City of San Diego sent notification to two Native American Tribes traditionally and culturally affiliated with the project area on August 11, 2017. Both the lipay Nation of Santa Ysabel and the Jamul Indian Village responded within the 30-day period requesting consultation and additional information. Consultation was conducted on August 11, 2017, Please see Section XVII of the Initial Study for more detail. It was determined that there are no sites, features, places or cultural landscapes that would be substantially adversely impacted by the proposed project. The lipay Nation of Santa Ysabel and the Jamul Indian Village both identified no further evaluation was required and concluded consultation. Both the lipay Nation of Santa Ysabel and the Jamul Indian Village agreed with the City's position that archaeological and Native American monitoring will be included in the Mitigation, Monitoring and Reporting Program (MMRP).

3) Comment noted. All applicable legislation and regulation will be adhered to during the construction stages of the proposed project. As noted above, the applicant must provide verification that a qualified archaeologist and/or monitor has been retained to implement the MMRP as identified in Section V of the Initial Study. Furthermore, the City's MMRP requires that a Native American Monitor be present during all ground disturbing activities associated with the project. The Native American Monitor also has specific responsibilities in the event of a discovery, including notifying the appropriate parties, assisting with determining the significance of the discovery, and isolating the discovery site.

### INITIAL STUDY CHECKLIST

- 1. Project title/Project number: Paseo Mews Townhomes CDP PDP/PTS 524566
- 2. Lead agency name and address: City of San Diego, 1222 First Avenue, MS-501, San Diego, California 92101
- 3. Contact person and phone number: Courtney Holowach / (619) 446-5187
- 4. Project location: 875 Garnet Avenue, San Diego, CA 92109
- 5. Project Applicant/Sponsor's name and address: James Alcorn, AIA, Architect, 9736 Claiborne Square, La Jolla, CA 92037
- 6. General/Community Plan designation: Community Commercial/Pacific Beach Community Plan
- 7. Zoning: CC-4-2
- 8. Description of project (Describe the whole action involved, including but not limited to, later phases of the project, and any secondary, support, or off-site features necessary for its implementation.):

Paseo Mews Townhomes CDP PDP - COASTAL DEVELOPMENT PERMIT and PLANNED DEVELOPMENT PERMIT for a mixed-use development consisting of 24 residential townhomes/live work lofts for a total of 46,256 square feet of construction. The project would be constructed in two phases. Phase one would include seven 1,260 square foot three 2-bedroom lofts, four 800 square foot one 1-bedroom apartments, four 2-bedroom lofts and seven 1,878 square foot townhouses. The existing 7,450 square feet of retail space on Garnet Avenue will remain. Phase two would include 6,000 800 square feet of retail; eight 1,260 square foot lofts, four 800 square foot one-bedroom apartments, and twelve 1,878 square foot five townhouses; and one 2 bedroom loft. The 0.86-acre site is located at 875 Garnet Avenue in the CC-4-2 base zone within the Coastal Overlay Zone (Non-Appealable) in the Pacific Beach Community Planning Area, Council District 2. Pedestrian ingress/egress to the project site would be the pedestrian entrances at Garnet Avenue and Hornblend Avenue. The vehicular ingress/egress would be at Hornblend Avenue and mid-block Paseo Mews. Planned landscaping includes Australian Willow, Dwarf Southern Magnolia, and Sword Fern. LEGAL DESCRIPTION: Lots 15-26 of Map 15287 Avalon Plaza Map 854 Pacific Beach

Amended Trustees Maps, Block 423, Page 4, Sheet 1 of 2.

9. Surrounding land uses and setting:

> The 0.86-acre site is located on 875 Garnet Avenue east of Mission Boulevard, in the CC-4-2 zone, the Coastal Height Limit Overlay Zone, the Coastal Overlay Non-Appealable Area 2, the Residential Tandem Overlay Zone, and the Transportation Overlay Zone of the Pacific Beach Community Plan Area within Council District 2 of the City of San Diego.

- Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):
   None required.
- 11. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, has consultation begun?

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

Yes, two Native American Tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code Section 21080.3.1. The City of San Diego sent notification to these two Native American Tribes on August 11, 2017. Both the lipay Nation of Santa Ysabel and the Jamul Indian Village responded within the 30-day period requesting consultation and additional information. Consultation was conducted and concluded on Aug. 11, 2017. Please see Section XVII of the Initial Study for more information regarding the consultation.

# **ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

			d be potentially affected by the checklist on the following		t, involving at least one impact that is a	
	Aesthetics		Greenhouse Gas Emissions		Population/Housing	
	Agriculture and Forestry Resources		Hazards & Hazardous Materials		Public Services	
	Air Quality		Hydrology/Water Quality		Recreation	
	Biological Resources		Land Use/Planning		Transportation/Traffic	
$\boxtimes$	Cultural Resources		Mineral Resources	$\boxtimes$	Tribal Cultural Resources	
	Geology/Soils		Noise		Utilities/Service System	
				$\boxtimes$	Mandatory Findings Significance	
DETER	MINATION: (To be com	pleted l	oy Lead Agency)			
On the b	asis of this initial evaluation:					
	The proposed project COUL be prepared.	D NOT ha	ve a significant effect on the	environme	ent, and a NEGATIVE DECLARATION will	
$\boxtimes$	Although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.					
	The proposed project MAY has required.	nave a sig	nificant effect on the environi	ment, and	an ENVIRONMENTAL IMPACT REPORT	
	The proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (a) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (b) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required.					
	Although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or (MITIGATED) NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or (MITIGATED) NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.					

#### **EVALUATION OF ENVIRONMENTAL IMPACTS:**

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact answer should be explained where it is based on project specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis.)
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses", as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or (mitigated) negative declaration. *Section 15063(c)(3)(D).* In this case, a brief discussion should identify the following:
  - a. Earlier Analysis Used. Identify and state where they are available for review.
  - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c. Mitigation Measures. For effects that are "Less Than Significant With Mitigation Measures Incorporated", describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a. The significance criteria or threshold, if any, used to evaluate each question; and
  - b. The mitigation measure identified, if any, to reduce the impact to less than significant.

Is	sue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTI	HETICS – Would the project:				
a)	Have a substantial adverse effect on a scenic vista?				
replace would a materia Tempor potentia project, Per the would be landma project Beach Centrough setback since the consister	riject site is an existing developed site the existing commercial use with a affect the visual environment during eals. Although views may be altered also also also also also also also also	new mixed usexcavation, grad, constructions of large points wing commercions and because of large of l	se development. Cading, and on-site on would be sho construction equipont attemption to the project site on Thresholds (Threas, roads, or parkact. City staff revier ons and land use need to retain and antage points included the project would the PBCP has not do the project is mould not be significial and residential	construction of storage of equal ort term and oment, storage of equal or storage of equal or storage of expensions including the enhance pure devisual according of enhance of esignated a visual according all cantly altered development	of the project pulpment and temporary ge areas, and oletion of the ects that nt visual cosed ag the Pacific liblic views of ess across ew view corridor height and d. Therefore, t, is
b)	Substantially damage scenic resources, including but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				
within a	are no designated scenic resources a state scenic highway within the project.		• •	•	_
c)	Substantially degrade the existing visual				

According to the City's Thresholds projects that severely contrast with the surrounding neighborhood character may result in a significant impact. To meet this significance threshold one or more of the following conditions must apply: the project would have to exceed the allowable height or bulk regulations and the height and bulk of the existing patterns of development in the vicinity of the project by a substantial margin; have an architectural style of use building materials in stark contrast to adjacent development where the adjacent development follows a single or common architectural theme (e.g., Gaslamp Quarter, Old Town); result in the physical loss, isolation or degradation of a community identification symbol or landmark (e.g., a stand of trees, coastal bluff, historic landmark) which is identified in the General Plan, applicable community plan or local

 $\boxtimes$ 

character or quality of the site and its

surroundings?

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	--	------------------------------------	-----------

coastal program; be located in a highly visible area (e.g., on a canyon edge, hilltop or adjacent to an interstate highway) and would strongly contrast with the surrounding development or natural topography through excessive height, bulk signage or architectural projections; and/or the project would have a cumulative effect by opening up a new area for development or changing the overall character of the area.

The site is currently developed with a commercial use. Existing development in the neighborhood does not have a unifying theme of architecture such as the Spanish architecture of Old Town. The new development would be constructed to comply with all height and bulk regulations and is consistent with Visual Resource recommendations as outlined in the PBCP. The structure height is consistent with building envelope regulations which preserve public views through the height, setback, landscaping, and fence transparency parameters of the Land Development Code that limit the building profile and maximize view opportunities. The project would not result in the physical loss, isolation or degradation of a community identification symbol or landmark which is identified in the General Plan, applicable community plan or local coastal program. The project is not located in a highly visible area. Therefore the project would not substantially degrade the existing visual character or the quality of the site and its surroundings. No impact would result due to implementation of the project.

d)	Create a new source of substantial light		
	or glare that would adversely affect day		$\boxtimes$
	or nighttime views in the area?		

The project would not be predominately constructed with light reflective material and all lighting would be required to be shaded and adjusted to fall on the project's site as required in the City's municipal code. In addition, the project would not be located adjacent to a light-sensitive property and therefore the single dwelling unit would not create a substantial light or glare impact. The project would also be subject to the City's Outdoor Lighting Regulations per Municipal Code Section 142.0740. No impact would result due to implementation of the project.

II. AGRICULTURAL AND FOREST RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. – Would the project::

 $\boxtimes$ 

a) Converts Prime Farmland, Unique
Farmland, or Farmland of Statewide
Importance (Farmland), as shown on
the maps prepared pursuant to the
Farmland Mapping and Monitoring
Program of the California Resources
Agency, to non-agricultural use?

The project site is classified as Urban and Built-Up Land by the Farmland Mapping and Monitoring Program (FMMP). Similarly, the land surrounding the project site is not in agricultural production and is not classified as farmland by the FMMP. Therefore, the proposed project would not convert farmland to non-agricultural uses. No impact would result due to implementation of the project.

Iss	ue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b)	Conflict with existing zoning for agricultural use, or a Williamson Act Contract?				
Williams	posed project is not under a Williams on Act Contract. The existing zoning entation of the project.		-	_	
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 1220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				$\boxtimes$
conflict	within the PBCP is designated as fow with existing zoning for or cause resentation of the project.				
d)	Result in the loss of forest land or conversion of forest land to non-forest use?				
designat	ect site is located within a largely de ted as forest land. Therefore, the pr non-forest use. No impact would re	oject would	not convert nor res	ult in the loss	
e)	Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to nonagricultural use or conversion of forest land to non-forest use?				
Therefo	ing agricultural uses are located in re, the project would not convert fa se. No impact would result due to	rmland to no	n-agricultural uses	or forestland	
	QUALITY – Where available, the significance ution control district may be relied on to ma				ement or air
a)	Conflict with or obstruct implementation of the applicable air quality plan?				

The San Diego Air Pollution Control District (SDAPCD) and San Diego Association of Governments (SANDAG) are responsible for developing and implementing the clean air plan for attainment and maintenance of the ambient air quality standards in the San Diego Air Basin (SDAB). The County Regional Air Quality Strategy (RAQS) was initially adopted in 1991, and is updated on a triennial basis (most recently in 2009). The RAQS outlines the SDAPCD's plans and control measures designed to attain the state air quality standards for ozone (03). The RAQS relies on information from the

California Air Resources Board (CARB) and SANDAG, including mobile and area source emissions, as well as information regarding projected growth in San Diego County and the cities in the county, to project future emissions and then determine the strategies necessary for the reduction of emissions through regulatory controls. CARB mobile source emission projections and SANDAG growth projections are based on population, vehicle trends, and land use plans developed by San Diego County and the cities in the county as part of the development of their general plans.

The RAQS relies on SANDAG growth projections based on population, vehicle trends, and land use plans developed by the cities and by the county as part of the development of their general plans. As such, projects that propose development that is consistent with the growth anticipated by local plans would be consistent with the RAQS. However, if a project proposes development that is greater than that anticipated in the local plan and SANDAG's growth projections, the project might be in conflict with the RAQS and may contribute to a potentially significant cumulative impact on air quality.

The project would develop a mixed use project in a neighborhood of similar uses. The project is consistent with the General Plan, community plan, and the underlying zoning for residential development. Therefore, the project would be consistent at a sub-regional level with the underlying growth forecasts in the RAQS, and would not obstruct implementation of the RAQS. No impact would result due to implementation of the project.

b)	Violate any air quality standard or			
	contribute substantially to an existing		$\boxtimes$	
	or projected air quality violation?			

### **Short-term Emissions (Construction)**

Project construction activities would potentially generate combustion emissions from on-site heavy duty construction vehicles and motor vehicles transporting the construction crew and necessary construction materials. Exhaust emissions generated by construction activities would generally result from the use of typical construction equipment that may include excavation equipment, forklift, skip loader, and/or dump truck. Variables that factor into the total construction emissions potentially generated include the level of activity, length of construction period, number of pieces and types of equipment in use, site characteristics, weather conditions, number of construction personnel, and the amount of materials to be transported on or off-site. It is anticipated that construction equipment would be used on-site for four to eight hours a day; however, construction would be short-term and impacts to neighboring uses would be minimal and temporary.

Fugitive dust emissions are generally associated with land clearing and grading operations. Due to the nature and location of the project, construction activities are expected to create minimal fugitive dust, as a result of the disturbance associated with grading. The project would remodel an existing single-family residence with an attached garage. Construction operations would include standard measures as required by the City of San Diego grading permit to reduce potential air quality impacts to less than significant. Therefore, impacts associated with fugitive dust are considered less than significant, and would not violate an air quality standard or contribute substantially to an existing or projected air quality violation. Impacts related to short term emissions would be less than significant.

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
-------	--------------------------------------	--	------------------------------------	-----------

# **Long-term Emissions (Operational)**

Long-term air emission impacts are those associated with stationary sources and mobile sources related to any change caused by a project. The project would produce minimal stationary source emissions. Once construction of the project is complete, long-term air emissions would potentially result from such sources as heating, ventilation, and cooling (HVAC) systems, and other motorized equipment typically associated with mixed use development. The project is compatible with the surrounding development and is permitted by the community plan and zone designation. Based on the residential land use, project emissions over the long-term are not anticipated to violate any air quality standard or contribute substantially to an existing or projected air quality violation. Impacts would be less than significant.

Overall, the project is not expected to generate substantial emissions that would violate any air quality standard or contribute to an existing or projected air quality violation; therefore, impacts would be less than significant.

c)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?			$\boxtimes$	
----	---	--	--	-------------	--

As described above in response III (b), construction operations may temporarily increase the emissions of dust and other pollutants. However, construction emissions would be temporary and short-term in duration. Implementation of Best Management Practices (BMP's) would reduce potential impacts related to construction activities to a less than significant level. Therefore, the project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under applicable federal or state ambient air quality standards. Impacts would be less than significant.

d) Create objectionable odors affecting a substantial number of people?		
---	--	--

### Short-term (Construction)

Odors would be generated from vehicles and/or equipment exhaust emissions during construction of the project. Odors produced during construction would be attributable to concentrations of unburned hydrocarbons from tailpipes of construction equipment and architectural coatings. Such odors are temporary and generally occur at magnitudes that would not affect a substantial number of people. Therefore, impacts would be less than significant.

# **Long-term (Operational)**

Typical long-term operational characteristics of the project are not associated with the creation of such odors nor anticipated to generate odors affecting a substantial number of people. The project would redevelop existing commercial development into a new mixed used development. Mixed use developments, in the long-term operation, are not typically associated with the creation of such odors nor are they anticipated to generate odors affecting a substantial number or people. Therefore, impacts would be less than significant.

Issue		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact		
IV. BIOLOGIC	AL RESOURCES – Would the project:		co.poracca				
dire mo as a stat poli Cali	ve substantial adverse effects, either ectly or through habitat difications, on any species identified a candidate, sensitive, or special cus species in local or regional plans, icies, or regulations, or by the ifornia Department of Fish and me or U.S. Fish and Wildlife Service?						
commercial sensitive bid	The project site is currently fully developed with a commercial use and surrounded by similar commercial uses. Onsite landscaping in non-native and the project site does not contain any sensitive biological resources on site nor does it contain any candidate, sensitive or special status species. No impact would result due to implementation of the project.						
any con reg or b and	re a substantial adverse effect on riparian habitat or other nmunity identified in local or ional plans, policies, and regulations by the California Department of Fish I Game or U.S. Fish and Wildlife vice?						
or near the riparian hab	site is urban developed within a site. Refer also to Response to l' oitat and the site currently only s to implementation of the proje	V (a), above. T supports non-	he project site do	es not contair	any		
fed by s (inc ver rem	re a substantial adverse effect on erally protected wetlands as defined section 404 of the Clean Water Act luding but not limited to marsh, nal pool, coastal, etc.) through direct noval, filling, hydrological erruption, or other means?						
The project site is fully developed, in an urban setting. Additionally, as shown in the PBCP and Local Coastal Program Land Use Plan (LCLUP), there are no federally protected wetlands on site. Therefore, construction activities would not cause an impact to wetlands as defined by Section 404 of the Clean Water Act. There would be no impacts to federally protected wetlands. No impact would result due to implementation of the project.							
mo mig esta mig	erfere substantially with the vement of any native resident or gratory fish or wildlife species or with ablished native resident or gratory wildlife corridors, or impede use of native wildlife nursery sites?						

The project site is fully developed, in a highly urbanized setting. The project site is not located within a wildlife corridor, or within a migratory passageway for any native resident or migratory fish or wildlife species. No impact would result due to implementation of the project.

Issu	ue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	
	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?					
The proposed project would be consistent with all relevant goals and policies of the City's General Plan and of the PBCP and LCLUP regarding the preservation and protection of biological resources. Although the proposed project is not within the City's Multi-Habitat Planning Area (MHPA), the project would be consistent with all relevant goals and policies regarding the preservation and protection of biological resources, as outlined in the City's Multiple Species Conservation Program (MSCP). Additionally, project implementation would be consistent with all biological resources policies in the PBCP and LCLUP. No impact would result due to implementation of the project.						
	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?					
Although the proposed project is not within the City's MHPA, the project would be consistent with all relevant goals and policies regarding the preservation and protection of biological resources, as outlined in the MSCP. In addition, implementation of the project would be consistent with all biological resources policies outlined in the PBCP and LCLUP. No impact would result due to implementation of the project.						
V. CULTU	RAL RESOURCES – Would the project:					
	Cause a substantial adverse change in the significance of an historical		$\boxtimes$			

The purpose and intent of the Historical Resources Regulations of the Land Development Code (Chapter 14, Division 3, and Article 2) is to protect, preserve and, where damaged, restore the historical resources of San Diego. The regulations apply to all proposed development within the City of San Diego when historical resources are present on the premises. Before approving discretionary projects, CEQA requires the Lead Agency to identify and examine the significant adverse environmental effects which may result from that project. A project that may cause a substantial adverse change in the significance of a historical resource may have a significant effect on the environment (sections 15064.5(b) and 21084.1). A substantial adverse change is defined as demolition, destruction, relocation, or alteration activities, which would impair historical significance (sections 15064.5(b)(1)). Any historical resource listed in, or eligible to be listed in the California Register of Historical Resources, including archaeological resources, is considered to be historically or culturally significant.

### <u>Archaeological Resources</u>

resource as defined in §15064.5?

A record search of the California Historic Resources Information System (CHRIS) digital database was reviewed by qualified archaeological City staff to determine presence or absence of potential resources within the project site. Although no recorded archaeological sites were located within or

Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
	Significant with	Significant with Significant Mitigation Impact

adjacent to the project site, there is a potential for the project to impact archaeological resources due to the project's location proximity to a known Native American village and archaeological site. Therefore, mitigation measures related to cultural resources (archaeology) is required. Compliance with Mitigation Monitoring and Reporting Program (MMRP) found in Section V of the MND would ensure that impacts to Archaeological Resources would be less than significant.

### **Built Environment**

The City of San Diego reviews projects requiring the demolition of structures 45 years or older for historic significance in compliance with the California Environmental Quality Act (CEQA). CEQA Section 21084.1 states that "A project that may cause a substantial adverse change in the significance of an historical resource is a project that may cause a significant effect on the environment." Historic property (built environment) surveys are required for properties which are 45 years of age or older and which have integrity of setting, location, design, materials, workmanship, feeling, and association.

The existing structures the project would demolish are not 45 years or older. Therefore, the project does not rise to the level of CEQA significance and no impacts to cultural resources built environment will occur.

b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?					
Please r	efer to response V.a.					
c)	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?					
potentia rating is Accordir cubic ya	The project site is underlain by the Baypoint Formation. The Baypoint Formation is assigned a high potential for fossil resources. The City's Significance Determination Threshold for a high sensitivity rating is grading greater than 1,000 cubic yards exported and cut of 10 feet or more in depth. According to the project's development plans (Sheet C-3) the proposed project would export 870 cubic yards and cut to a maximum depth of 4 feet. Therefore there would be a less than significant impact to paleontological resources. No mitigation is necessary.					
d)	Disturb and human remains, including those interred outside of dedicated cemeteries?					

Refer to response V(a) above. No cemeteries, formal or informal, have been identified on the project site. However, due to the project's adjacency to an archaeological site there is the potential that human remains could be encountered during construction of the project.

However, the MMRP described above contains provisions for the discovery of human remains. If human remains are discovered, work shall halt in that area and no soil shall be exported off-site until a determination can be made regarding the provenance of the human remains; and the following procedures as set forth in CEQA Section 15064.5(e), the California Public Resources Code (Sec.

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
5097.98) and State Health and Safety Code (	Sec. 7050.5)	shall be undertakeı	n. Based upon	the required

e)	Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				
	ject does not propose the use of se ater systems would not be used. No	•	•		
VII. GRE	ENHOUSE GAS EMISSIONS – Would the proje	ect:			
a)	Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				

On July 12, 2016, the City of San Diego adopted the Climate Action Plan (CAP) Consistency Checklist, which requires all projects subject to discretionary review to demonstrate consistency with the Climate Action Plan. For project-level environmental documents, significance of greenhouse gas emissions is determined through the CAP Consistency Checklist.

The City's Climate Action Plan (CAP) outlines the actions that the City will undertake to achieve its proportional share of State greenhouse gas (GHG) emission reductions. A CAP Consistency Checklist

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	
(Checklist) is part of the CAP and contain	s measures that	are required to b	e implemente	d on a	
project-by-project basis to ensure that the specified emission targets identified in the CAP are					
achieved. Projects that are consistent with the CAP as determined through the use of this Checklist					

The project is consistent with the existing General Plan and Community Plan land use and zoning designations. Further based upon review and evaluation of the completed CAP Consistency Check for the project, the project is consistent with the applicable strategies and actions of the CAP.

may rely on the CAP for the cumulative impacts of GHG emissions.

Therefore, the project is consistent with the assumptions for relevant CAP strategies toward achieving the identified GHG reduction targets, and impacts from greenhouse gas emissions are considered less than significant.

b)	Conflict with an applicable plan, policy,			
	or regulation adopted for the purpose of reducing the emissions of		$\boxtimes$	
	greenhouse gases?			

The project would not conflict with an applicable plan, policy, or regulation adopted for the purposes of reducing the emissions of greenhouse gases. The project is consistent with the existing General Plan and Community Plan land use and zoning designations. Further based upon review and evaluation of the completed CAP Consistency Checklist for the project, the project is consistent with the applicable strategies and actions of the CAP. Therefore, the project is consistent with the assumptions for relevant CAP strategies toward achieving the identified GHG reduction targets. Impacts are considered less than significant.

VIII. HAZARDS AND HAZARDOUS MATERIALS – Would the project:

a)	Create a significant hazard to the public or the environment through routine transport, use, or disposal of hazardous		$\boxtimes$
	materials?		

The project, while mixed use in nature, does not propose the use or transport of any hazardous materials beyond those used for everyday household purposes. No impact would result due to implementation of the project.

Construction of the project may require the use of hazardous materials (fuels, lubricants, solvents, etc.), which would require proper storage, handling, use and disposal; however, the project would not routinely transport, use or dispose of hazardous materials. Therefore, the project would not create a significant hazard to the public or environment. No impact would result due to implementation of the project.

b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of		$\boxtimes$
	hazardous materials into the		
	environment?		

			Less Than		
Iss	sue	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Please s	ee VIIIa. No impact would result d	lue to implem	entation of the p	roject.	
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				$\boxtimes$
Please s	ee VIIIa. No impact would result d	lue to implem	entation of the p	roject.	
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				$\boxtimes$
Staff ass	sessed Geotracker and Envirostor c	databases, and	reviewed the Cor	tese list.	
environi Departn Envirost sites tha	ker is a database and geographic in mental data. It tracks regulatory da nent of Defense (DoD), Spills-Leaks for is an online database search an at have known contamination or sit dentifies facilities that are authorize	ita about leakii -Investigations d Geographic l es for which w	ng underground for some section of the section of t	uel tanks (LUF and Landfill s m (GIS) tool fo ons to investi	T), ites. or identifying gate further.
The Cortese List is a Hazardous Waste and Substance Sites (Cortese) List, which is a planning resource use by the State, local agencies, and developers to comply with the California Environmental Quality Act (CEQA) requirements in providing information about the location of hazardous materials release sites. Government Code sections 65962.5 requires the California Environmental Protection Agency to develop, at least annually, an updated Cortese List. The Department of Toxics and Substance Control (DTSC) is responsible for a portion of the information contained in the Cortese List. Other State and local government agencies are required to provide additional hazardous material release information for the Cortese List.					
Based on the searches conducted, no contaminated sites are on or adjacent to the project site. Furthermore, the project site was not identified on the DTSC Cortese List. Therefore, the project would not create a significant hazard to the public or the environment. No impact would result due to implementation of the project.					
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two mile of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				$\boxtimes$

Issue		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
The project is not located wi land use plan pending adop would not introduce any ne due to implementation of t	tion. The project w features that v	is not locate	d within the flight	path of any ai	irport and
f) For a project within the private airstrip, would t in a safety hazard for per or working in the project	he project result eople residing				
This project is located in a d vicinity. No impact would re				o located in the	e immediate
g) Impair implementation interfere with an adoptoresponse plan or emerge evacuation plan?	ed emergency				$\boxtimes$
The project would not alter developed and the project is implementation of the pro	remodeling an	•	•		-
h) Expose people or struct significant risk of loss, in involving wildland fires, where wildlands are ad urbanized areas or whe are intermixed with wild	njury or death including acent to re residences				$\boxtimes$
This project is located in a d within the adjacent neighbo directly. No impact would r	rhood. Therefor	e, it would n	ot be possible to	-	
IX. HYDROLOGY AND WATER QUA	ALITY - Would the pro	oject:			
a) Violate any water qualit waste discharge require					

**Less Than** 

Based upon the scope of the project, impacts to existing water quality standards would not occur and there would be no long term operation storm water discharge. Conformance to the City's Stormwater Regulations would prevent or effectively minimize short-term water quality impacts. Therefore, the project would not violate any existing water quality standards or discharge requirements. No impact would result due to implementation of the project.

Issue		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b)	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				
•	ject would be connected to the pub		-	-	
•	water in the area and would not sigr implementation of the project.	nificantly dep	lete any resources.	. No impact v	vould result
c)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner, which would result in substantial erosion or siltation on- or off-site?				
Although grading would be required for development, streams or rivers do not occur on or adjacent to the site that would be impacted by the proposed grading activities. As stated previously, the project would implement BMPs as identified in the City of San Diego Storm Water Standards, Section III.B.2. In addition, following construction, landscaping would be installed consistent with City landscaping design requirements to further reduce the potential for runoff from the project site to occur. With implementation of the proposed BMPs and adherence to City storm water requirements, no adverse impacts to the downstream conveyance system are anticipated. No impact would result due to implementation of the project.					
d)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or off-site?				
Please see IX.c., no flooding would occur. No impact would result due to implementation of the project.					
e)	Create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				

Based on City of San Diego review, the proposed activity would be adequately served by existing municipal storm water drainage facilities, therefore no impacts would occur. Potential release of sediment or other pollutants into surface water drainages downstream from the site will be precluded by implementation of Best Management Practices (BMPs) required by City of San Diego

	Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
imple expec	ations, in compliance with San Diego R ment the federal Clean Water Act. The ted to result from the proposed activi f would be controlled and unpolluted. ct.	erefore, no si ty. Proper irr	gnificant surface wigation and landsc	vater quality in aping would e	npacts are nsure that
f	Otherwise substantially degrade water quality?				$\boxtimes$
See IX	a. e) No impact would result due to in	nplementatio	on of the project.		
g	Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				
	roject does not propose construction of would result due to implementation	<del>-</del>		ear flood haza	ard area. No
ŀ	n) Place within a 100-year flood hazard area, structures that would impede or redirect flood flows?				
-	roject does not propose construction of the co		•	ede or redirect	flows. No
X. LAN	ND USE AND PLANNING – Would the project:				
а	Physically divide an established community?				$\boxtimes$
project reside adjace	roject is consistent with the General P ct site is located within a developed ne ential development. The remodel of ex ent properties and is consistent with s cally divide an established community ct.	eighborhood a cisting comme urrounding la	and surrounded by ercial developmen and uses. Therefor	y similar comn t would not aff e, the project	nercial and ect would not
t	conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				$\boxtimes$

Less Than

See response X(a) above. A Coastal Development Permit (CDP), LDC Section 126.0702 is required for Development within the Coastal Non-Appealable Area 2. A Planned Development Permit (PDP) LDC

Iss	ue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Section 143.0402 is required for deviations to the development regulations. Deviations to the development regulations of the zone require a Planned Development Permit (PDP), in this case parking deviations. The first phase of the project would provide 45 parking spaces while 55 parking spaces are required. The second phase of the project would provide 50 parking spaces while 59 parking spaces are required. The intent of the PDP is to allow the flexibility of the zoning standards to design a better project that offers a wide variety of structure, dwelling types, and site arrangements. The project is compatible with the area designated for residential development by the General Plan and Community Plan, and is consistent with the existing underlying zone and surrounding land uses. Construction of the project would occur within an urbanized neighborhood with similar development. Furthermore, the project would not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including but not limited to the general plan community plan, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect. No impact would result due to implementation of the project.					
c)	Conflict with any applicable habitat conservation plan or natural community conservation plan?				
As previously discussed in Section IV, although the proposed project is not within the MHPA, the project would be consistent with all relevant goals and policies regarding the preservation and protection of biological resources, as outlined in the City's MSCP. The proposed project does not have the potential to conflict with any habitat conservation plans. In addition, implementation of the project would be consistent with all biological resources policies outlined in the General Plan and PBCP. Implementation of the proposed project would not conflict with any applicable plans. No impact would result due to implementation of the project.					
XI. MINERAL RESOURCES – Would the project:					
a)	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				$\boxtimes$
not iden result in	ject site is located in a developed ne stified in the General Plan as a miner the loss of availability of a known m entation of the project.	al resource l	ocality. Therefore,	the project v	vould not
b)	Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land				$\boxtimes$

Less Than

See XI a. No impact would result due to implementation of the project.

use plan?

Iss	ue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	
XII. NOISE – Would the project result in:						
a)	Generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?					
Construction related noise would result, but would be temporary and is strictly regulated under San Diego Municipal Code Section 59.5.0404, "Noise Abatement and Control" which places limits on the hours of construction operations and standard decibels which cannot be exceeded. Therefore, people would not be exposed to noise levels in excess of those covered by existing noise regulations. Impacts would be less than significant.						
b)	Generation of, excessive ground borne vibration or ground borne noise levels?					
No excessive noise is anticipated as a result of the demolition and new construction. Therefore no ground vibration would result. No impact would result due to implementation of the project.						
c)	A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?					
See XII the project once complete would not result in any permanent noise increase. No impact would result due to implementation of the project.						
d)	A substantial temporary or periodic increase in ambient noise levels in the project vicinity above existing without the project?					
As stated above there would be a temporary increase in noise during demolition of the existing structure and with new construction of the proposed project; however, work would only be allowed between the hours of 7 am and 7 pm in compliance with the City of San Diego's noise ordinance for construction activities. After construction is completed, no substantial increase in noise levels would result from this dwelling unit. Impacts would less than significant.						
e)	For a project located within an airport land use plan, or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the project expose people residing or working in the area to excessive noise levels?					
The project is not located within an airport land use plan or within noise contours. Therefore, residents of the new building would not be exposed to excessive noise levels from a public airport. No impact would result due to implementation of the project.						
f)	For a project within the vicinity of a private airstrip, would the project				$\boxtimes$	

Potentially **Less Than** Significant with Issue Significant Significant No Impact Mitigation Impact Impact Incorporated expose people residing or working in the project area to excessive noise levels? The project is not located within the vicinity of a private airstrip; therefore, people residing or working in the area of the project would not be exposed to excessive airport noise. No impact would result due to implementation of the project. XIII. POPULATION AND HOUSING - Would the project: a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses)  $\boxtimes$ or indirectly (for example, through extension of roads or other infrastructure)? The project would construct a mixed use project of twenty-four new residential town homes/live work lofts. The project would connect to existing infrastructure. The project does not require the extension of existing roads or other infrastructure. No impact would result due to implementation of the project. b) Displace substantial numbers of existing housing, necessitating the  $\Box$  $\boxtimes$ construction of replacement housing elsewhere? No displacement of existing housing would occur as a result of this project. It would replace existing commercial development with a new mixed use development resulting in a net increase of housing. No impact would result due to implementation of the project. Displace substantial numbers of  $\boxtimes$ people, necessitating the construction of replacement housing elsewhere? See XIII. No impact would result due to implementation of the project. XIV. PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with the provisions of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service rations, response times or other performance objectives for any of the public services: i) Fire protection П П П  $\boxtimes$ 

**Less Than** 

The City of San Diego Fire-Rescue Department (SDFD) encompasses all fire, emergency medical, lifeguard and emergency management services. SDFD serves 331 square miles, including the project site, and serves a population of 1,337,000. SDFD has 801 uniformed fire personnel and 48 fire stations available to service the project site. The closest fire station to the project site is Station 21 (approximately 0.5 miles south).

Issue	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
