Southland Geotechnical Consultants

August 15, 2015

Ms. Veronica Tavizon County of San Diego Department of Environmental Health Land and Water Quality Division Monitoring Well Program PO Box 129261 San Diego, California 92112-9261

Subject: Application for Additional Groundwater Observation Well South End of De Anza Road San Diego, California 92109 APN 424-460-06

Dear Veronica,

Southland Geotechnical Consultants has performed subsurface investigation services at Mission Bay for the City of San Diego. As stated in my email query dated August 3, 2015, during our field activities, the hydrogeologist requested an additional groundwater observation well be installed adjacent to one of our three permitted observation wells (under existing County of San Diego DEH Well Permit #LMWP-001773). Attached are this email correspondence, the requested application for a new groundwater observation well and a check for the additional fee.

If you have any questions, please contact me. Thank you.

Sincerely,

SOUTHLAND GEOTECHNICAL CONSULTANTS

Supan & Janges

Subject: Groundwater Observation Well (One) Construction Report Mission Bay Golf Course San Diego, California 92109 APN 424-460-06 County of San Diego DEH Well Permit #LMWP-001862

Southland Geotechnical Consultants has performed a geotechnical investigation for the City of San Diego Sewer Group 827 project in the north Mission Bay area of the City of San Diego. As part of our geotechnical studies, one groundwater observation well was constructed (under this permit). Our groundwater observation well was constructed in general accordance with the conditions of the County of San Diego DEH Well Permit issued for this groundwater observation well. Attached are a site location map, a map with the location of the groundwater observation well (associated with this permit), the geotechnical boring log, and a well completion diagram. The geotechnical laboratory test results (in situ moisture) are shown on the boring log.

If you have any questions regarding this report, please call.

Sincerely,

SOUTHLAND GEOTECHNICAL CONSULTANTS

Susan & Janges

COUNTY OF SAN DIEGO DEPARTMENT OF ENVIRONMENTAL HEALTH LAND AND WATER QUALITY DIVISION MONITORING WELL PROGRAM

GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: MISSION BAY GOLF COURSE SITE ADDRESS: 2702 NORTH MISSION BAY DRIVE, SAN DIEGO 92109 PERMIT FOR: GEOTECHNICAL BORINGS (8) PERMIT APPROVAL DATE: 9/16/2015 PERMIT EXPIRES ON: 1/13/2016 RESPONSIBLE PARTY: ESTRADA LAND PLANNING (David Preciado)

PERMIT CONDITIONS:

- 1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90. Part III, Section 19.D. Drill cuttings are not an acceptable fill material.
- All borings must be properly destroyed within 24 hours of drilling. 2.
- 3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.
- This work is not connected to any known unauthorized release of hazardous 4. substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, D-4. (http://www.sdcounty.ca.gov/deh/lwg/sam/manual_guidelines.html) In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.
- 5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.
- 6. This office must be given 24-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at (858) 505-6688.

G. QUESTIONNAIRE: Please answer all applicable questions completely and submit any required supportive documentation.

- 1. What is the purpose of the well/boring investigation?
 - a. Part of an ongoing site assessment case in which a government regulator is the lead agency.
 If yes, indicate which government regulator is the lead agency and the case number.

DEH	RWQCB	DTSC

- b. Part of a Phase I investigation for property ownership transfer.
- c. Geotechnical investigation for proposed construction or land stabilization.
- ☐ d. Other: _____
- 2. If wells are to be destroyed, provide a description of method of destruction <u>Overdrill w/HAS</u>. <u>Remove well</u> <u>casing and annular materials</u>. <u>Backfill borings from the bottom up with bentonite grout and return to finish</u> grade with a concrete plug. Well construction details provided in attached table (Table 2).
- 3. Are you proposing a variation from current SAM Manual Requirements for the construction or destruction of borings, Vadose and/or Groundwater Monitoring Wells? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (www.sdcdeh.org). Yes □ No ⊠

ACTIVITY	FEE SCHEDULE	AMOUNT			
Permit for Well Installations Only (Groundwater Monitoring Wells, Vadose, Vapor Extraction Wells)	\$200.00 for the first monitoring well		\$200.00		
Each Additional New Well	\$161.00 for each additional well installation	x \$161.00

Proposed locations for subsurface work:

Property Address:

Assessor's Parcel Number (APN):

42445006

N. Mission Bay Drive (Near De Anza Rd)

San Diego, CA 92109

I, <u>City of San Diego Public Works</u>, owner of the property/properties listed above, give my permission to <u>Wiedlin & Associates</u>, <u>Inc.</u> (consulting company, contractor) to conduct the following work at the locations stated above.

Install _____ monitoring wells

Destroy 4 monitoring wells

Drill _____ soil borings

I understand that <u>Matthew P. Wiedlin</u> (registered professional) of <u>Wiedlin & Associates, Inc.</u> (consulting company) and an authorized signer for <u>Pacific Drilling</u> (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring wells/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring wells/borings.

JACK MILLER DIRECTOR March 29, 2016

County of San Diego Department of Environmental Health Monitoring Well Permit Desk PO Box 129261 San Diego, CA 92112-9261

Subject: 60 Day Report, Monitoring Well Destruction Permit No. LMWP-002193

Four groundwater monitoring wells were destroyed following the terms of the above referenced permit at Mission Bay Golf Course and Mission Bay park.

Site Address: 2702 N. Mission Bay Dr., San Diego, CA 92109 APN: 424-460-05-00 Well Construction Permit #: LMWP-001773, LMWP-001862 Well Destruction Permit #: LMWP-002193

Documentation

- 1. Enclosed are the original 60 day reports and a well construction table for Monitoring Wells B-3S, B-3D, B-6, and B-10 that were completed under the original well construction permit cite above.
- 2. The two inch PVC casing was completely removed from all four wells. Well B-3S was drilled out to total depth of 20 feet using a 6-inch nominal diameter auger, the same as that used for well construction. Well B-3D was drilled out to total depth of 36 feet using an 8-inch nominal diameter auger, the same as that used for well construction. Well B-6 was drilled out to total depth of 45 feet using an 8-inch nominal diameter auger, the same as that used for well construction. Well B-10 was drilled out to total depth of 50 feet using 6-inch nominal diameter augers with an 8-inch diameter bit. The hole was reamed a second time to 40 feet with a nominal 8-inch diameter auger set.
- 3. At each wellbore, while the augers were still at total depth, bentonite grout was placed in the well via a 1-1/2 inch diameter tremie pipe that was placed inside the hollow stem augers within two feet of the bottom of the boring. Grout was pumped under pressure through the tremie pipe to the bottom of the boring until the grout reached ground surface within the hollow stem augers. As augers were removed from each boring, bentonite grout was added through the top of the auger. Bentonite grout was approximately 6 to 7 feet below ground surface at each well after the augers were removed. Approximately two feet of bentonite chips were placed on top of the grout and redi-mix concrete was placed on top of the chips to within 6 to 8-inches of ground surface. Because the wells were completed in grassy areas, top soil was placed in the upper 6 to 8 inches to ground surface.

4. Wells were sealed in general accordance with the California Bulletins 74-81, 74-90 and the County Department of Environmental Health's standards stated in the Site Assessment and Mitigation Manual.

Work began on March 24, 2016 and was completed on March 25, 2016.

Subject: Groundwater Observation Wells (Three) Construction Report Mission Bay Golf Course San Diego, California 92109 APN 424-460-06 County of San Diego DEH Well Permit #LMWP-001773

Southland Geotechnical Consultants has performed a geotechnical investigation for the City of San Diego Sewer Group 827 project in the north Mission Bay area of the City of San Diego. As part of our geotechnical studies, three groundwater observation wells were constructed. Our groundwater observation wells were constructed in general accordance with the conditions of the County of San Diego DEH Well Permit issued for the groundwater observation wells. Attached are a site location map, a map with the locations of the groundwater observation wells (associated with this permit), the geotechnical boring logs, well completion diagrams, and geotechnical laboratory test results.

If you have any questions regarding this report, please call.

Sincerely,

SOUTHLAND GEOTECHNICAL CONSULTANTS

COUNTY OF SAN DIEGO DEPARTMENT OF ENVIRONMENTAL HEALTH LAND AND WATER QUALITY DIVISION MONITORING WELL PROGRAM

MONITORING WELL DESTRUCTION PERMIT

SITE NAME: MISSION BAY GOLF CLUB SITE ADDRESS: 2702 N MISSION BAY DR., SAN DIEGO, CA 92109 PERMIT TO: DESTROY 4 GROUNDWATER MONITORING WELLS PERMIT APPROVAL DATE: 03/14/2016 PERMIT EXPIRES ON: 07/12/2016 RESPONSIBLE PARTY: CITY OF SAN DIEGO – SHEILA GAMUEDA

PERMIT CONDITIONS:

- 1. All material within the original borehole, which includes the casing, filterpack and annular seal, must be removed. The borehole must be completely filled with an approved sealing material as specified in Department of Water Resources Bulletin 74-90.
- 2. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.
- 3. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, D-4. (http://www.sdcounty.ca.gov/deh/lwg/sam/manual_guidelines.html). In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.
- 4. Within 60 days of completing work, submit a well destruction report, including description of the method of destruction, type and volume of materials used (in cubic feet) to the Monitoring Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 5-7.
- 5. This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at (858) 505-6688.

NOTE: This permit does not constitute approval of a work plan as defined in Section 2722 of Article 11 of C.C.R., Title 23. Work plans are required for all unauthorized release investigations in San Diego County.

G. QUESTIONNAIRE: Please answer all applicable questions completely and submit any required supportive documentation.

- 1. What is the purpose of the well/boring investigation?
 - a. Part of an ongoing site assessment case in which a government regulator is the lead agency.
 If yes, indicate which government regulator is the lead agency and the case number.

DEH	RWQCB	DTSC

- b. Part of a Phase I investigation for property ownership transfer.
- c. Geotechnical investigation for proposed construction or land stabilization.
- ☐ d. Other: _____
- 2. If wells are to be destroyed, provide a description of method of destruction <u>Overdrill w/HAS</u>. <u>Remove well</u> <u>casing and annular materials</u>. <u>Backfill borings from the bottom up with bentonite grout and return to finish</u> grade with a concrete plug. Well construction details provided in attached table (Table 2).
- 3. Are you proposing a variation from current SAM Manual Requirements for the construction or destruction of borings, Vadose and/or Groundwater Monitoring Wells? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (www.sdcdeh.org). Yes □ No ⊠

ACTIVITY	FEE SCHEDULE	AMOUNT		
Permit for Well Installations Only (Groundwater Monitoring Wells, Vadose, Vapor Extraction Wells)	\$200.00 for the first monitoring well		\$200.00

Proposed locations for subsurface work:

Property Address:

Assessor's Parcel Number (APN):

42445006

N. Mission Bay Drive (Near De Anza Rd)

San Diego, CA 92109

I, <u>City of San Diego Public Works</u>, owner of the property/properties listed above, give my permission to <u>Wiedlin & Associates</u>, <u>Inc.</u> (consulting company, contractor) to conduct the following work at the locations stated above.

Install _____ monitoring wells

Destroy 4 monitoring wells

Drill _____ soil borings

I understand that <u>Matthew P. Wiedlin</u> (registered professional) of <u>Wiedlin & Associates, Inc.</u> (consulting company) and an authorized signer for <u>Pacific Drilling</u> (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring wells/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring wells/borings.

JACK MILLER DIRECTOR March 29, 2016

County of San Diego Department of Environmental Health Monitoring Well Permit Desk PO Box 129261 San Diego, CA 92112-9261

Subject: 60 Day Report, Monitoring Well Destruction Permit No. LMWP-002193

Four groundwater monitoring wells were destroyed following the terms of the above referenced permit at Mission Bay Golf Course and Mission Bay park.

Site Address: 2702 N. Mission Bay Dr., San Diego, CA 92109 APN: 424-460-05-00 Well Construction Permit #: LMWP-001773, LMWP-001862 Well Destruction Permit #: LMWP-002193

Documentation

- 1. Enclosed are the original 60 day reports and a well construction table for Monitoring Wells B-3S, B-3D, B-6, and B-10 that were completed under the original well construction permit cite above.
- 2. The two inch PVC casing was completely removed from all four wells. Well B-3S was drilled out to total depth of 20 feet using a 6-inch nominal diameter auger, the same as that used for well construction. Well B-3D was drilled out to total depth of 36 feet using an 8-inch nominal diameter auger, the same as that used for well construction. Well B-6 was drilled out to total depth of 45 feet using an 8-inch nominal diameter auger, the same as that used for well construction. Well B-10 was drilled out to total depth of 50 feet using 6-inch nominal diameter augers with an 8-inch diameter bit. The hole was reamed a second time to 40 feet with a nominal 8-inch diameter auger set.
- 3. At each wellbore, while the augers were still at total depth, bentonite grout was placed in the well via a 1-1/2 inch diameter tremie pipe that was placed inside the hollow stem augers within two feet of the bottom of the boring. Grout was pumped under pressure through the tremie pipe to the bottom of the boring until the grout reached ground surface within the hollow stem augers. As augers were removed from each boring, bentonite grout was added through the top of the auger. Bentonite grout was approximately 6 to 7 feet below ground surface at each well after the augers were removed. Approximately two feet of bentonite chips were placed on top of the grout and redi-mix concrete was placed on top of the chips to within 6 to 8-inches of ground surface. Because the wells were completed in grassy areas, top soil was placed in the upper 6 to 8 inches to ground surface.

4. Wells were sealed in general accordance with the California Bulletins 74-81, 74-90 and the County Department of Environmental Health's standards stated in the Site Assessment and Mitigation Manual.

Work began on March 24, 2016 and was completed on March 25, 2016.

Subject: Groundwater Observation Wells (Three) Construction Report Mission Bay Golf Course San Diego, California 92109 APN 424-460-06 County of San Diego DEH Well Permit #LMWP-001773

Southland Geotechnical Consultants has performed a geotechnical investigation for the City of San Diego Sewer Group 827 project in the north Mission Bay area of the City of San Diego. As part of our geotechnical studies, three groundwater observation wells were constructed. Our groundwater observation wells were constructed in general accordance with the conditions of the County of San Diego DEH Well Permit issued for the groundwater observation wells. Attached are a site location map, a map with the locations of the groundwater observation wells (associated with this permit), the geotechnical boring logs, well completion diagrams, and geotechnical laboratory test results.

If you have any questions regarding this report, please call.

Sincerely,

SOUTHLAND GEOTECHNICAL CONSULTANTS

>>> <CARSVCS@aol.com> 10/8/2004 9:05:45 AM >>> Hello, It was suggested I contact you by Mike Porter with San Diego Regional Ouality Control Board. I had contacted Mr. Porter about the De Anza mobilehome park in Pacific Beach. He has conducted a site evaluation and filed a Notice of Violation with the City of San Diego regarding my concerns which fall within his jurisdiction. The De Anza mobilehome park is currently under the control of the City of San Diego since Nov. 24, 2003. Since taking possession, the City has ordered the removal of approximately 80 of the 509 mobilehomes. Most have been destroyed and thrown in dumpsters. Over the next several years it appears more will be demolished.

Will Griffith, director of Real Estate Assets for the City has publicly stated that he and the City are aware that asbestos is present in these homes. This is due to the age of the homes (1953 - 1963) and the type of materials used in that period. Mr. Griffith has stated that many of these homes will have to be treated as hazardous waste. To our knowledge no such precautions have been taken. We are also concerned about the presence of lead paint and airborne mold. It appears the City has taken no precautions whatsoever towards minimizing the risk or danger present from these materials. The demolition has prompted numerous complaints by residents of impaired breathing and other health related issues. I have many photos taken over the last 10 months that illustrate the total disregard for any sort of mitigation or concern for existing residents. I have resided at this property for the past years. I have an father living near me that has an abandoned demolition adjacent to his home. Debris is everywhere. I fear for his health and the health of my neighbors and surrounding community. This sort of disregard for public safety is going on daily. On behalf of my neighbors, I am asking for your help. I am asking that you inspect this property and determine if: a) The City is operating within the standards of County, State and Federal regulations. b) The City is operating within the limits of their permit. c) If the City even has a permit. d) If the City has done any analysis of the effects of the ordered demolition and subsequent transport. Thank you and please let me know if I can be of assistance.

I will be out of town the week of 10-11, but can be reached by return e-mail

or at the number above on my return.

Vent, Nick

From: Sent: To: Cc: Subject: Vent, Nick Monday, October 11, 2004 4:50 PM Dorsey, Michael Cammall, David Health Concerns - draft

HI Mike,

If you wish to reply to the complaintant yourself these are the issues that were raised in his request to DEH to investigate.

I am asking that you inspect this property and determine if:

a) The City is operating within the standards of County, State and Federal regulations.

b) The City is operating within the limits of their permit.

c) If the City even has a permit.

d) If the City has done any analysis of the effects of the ordered demolition and subsequent transport.

The message below would be my reply to him	His Email address is:
	Phone:

Dear

In response to your complaint, the Hazardous Materials Dvision (HMD) has taken the following actions.

On October 8, 2004, Mr. David Cammall, Environmental Health Specialist III with the HMD, made a site visit to determine if any hazardous waste had been improperly disposed. On that date, he observed no evidence that indicated any hazardous wastes, including asbestos and lead based paint, had been improperly and illegally disposed.

In regards to your concern about the potential exposure to citizens in the area to airborne hazardous waste. This office was provided with laboratory testing reports from JMR Environmental Services, Inc. that indicate there is no Lead or Asbestos being found in perimeter air samples taken from the job site. Further, Bulk samples of building material - from structures being demolished - have been tested for Asbestos by AmeriSci Los Angeles, and have found no Asbestos present.

To additionally follow up on your concerns regarding the air quality, Mr. Cammall referred this issue to the Air Pollution Control District (APCD) who has jurisdiction over hazardous substances that are emitted to the air. Mr. Cammall was informed that the APCD will and has also investigate this issue. And they found no violations during their investigation.

In regards to the issue of a permit being obtained by the city to demolish the units and structures. This is an issue that needs to be addressed by the APCD. However, in conversations with the APCD Enforcement staff

on this issue they have responded to the Mobile Home Park on numerous occations and have found no permit violation issues but will be following up on need for the City to have obtained a permit.

If you have any additional concerns regarding this issue, please feel free to call me at **a second second second** or you may contact the APCD at (858) 650-4550.

Sincerely,

Nick Vent, Supervising Environmental Health Specialist

Hazardous Materials Division

County of San Diego Department of Environmental Health

Subject: FW: Health concerns

Carla,

Please log as a complaint.

Nick,

Please call **Example to** back today and let him know we are looking into his complaint. I will reply to his e-mail letting as well. This is a non-business related complaint so I want ER to take the lead. Some of these issues will not be ours, so make whatever referrals are necessary to the appropriate agencies. Please also make referral to APCD. Thanks.

From:

To: Dorsey, Michael Subject: Health concerns

Hello,

It was suggested I contact you by Mike Porter with San Diego Regional Quality Control Board. I had contacted Mr. Porter about the De Anza mobilehome park in Pacific Beach. He has conducted a site evaluation and filed a Notice of Violation with the City of San Diego regarding my concerns which fall within his jurisdiction. The De Anza mobilehome park is currently under the control of the City of San Diego since Nov. 24, 2003. Since taking possession, the City has ordered the removal of approximately 80 of the 509 mobilehomes. Most have been destroyed and thrown in dumpsters. Over the next several years it appears more will be demolished. Will Griffith, director of Real Estate Assets for the City has publicly stated that he and the City are aware that asbestos is present in these homes. This is due to the age of the homes (1953 - 1963) and the type of materials used in that period.

Mr. Griffith has stated that many of these homes will have to be treated as hazardous waste. To our knowledge no such precautions have been taken.

We are also concerned about the presence of lead paint and airborne mold.

It appears the City has taken no precautions whatsoever towards minimizing the risk or danger present from these materials.

The demolition has prompted numerous complaints by residents of impaired breathing and other health related issues.

I have many photos taken over the last 10 months that illustrate the total disregard for any sort of mitigation or concern for existing residents.

I have resided at this property for the past a years. I have an a father living near me that has an abandoned demolition adjacent to his home. Debris is everywhere. I fear for his health and the health of my neighbors and surrounding community.

This sort of disregard for public safety is going on daily. On behalf of my neighbors, I am asking for your help.

I am asking that you inspect this property and determine if:

a) The City is operating within the standards of County, State and Federal regulations.

b) The City is operating within the limits of their permit.

c) If the City even has a permit.

d) If the City has done any analysis of the effects of the ordered demolition and subsequent transport.

Thank you and please let me know if I can be of assistance.

.

I will be out of town the week of 10-11, but can be reached by return e-mail or at the number above on my return.

10/12/04 - NOTES 858 650 4554 · Per Jimmie Cooksey, APCD AFSH 2004-07795 separate business owned 15 of the units.
 Rest of the units are privately owned.
 The private units are EXEMPT FROM APCD Regs
 (Need Four or more units) · CITY OWNS THE LAND I WILL PAY \$ 8,000 if they leave before the end of the year. · After lease is over and don't demo the units City is then Responsible. And then City needs a permit. • they separate bosiness was issued a Nov A for the demolition. They have been all demolished and they are finished. · Alan Johans did sampling for City of SD Env. Services for on the storage sheds that City Owned. City was in compliance with APCD regarding this.

Environmental Services, Inc.

August 9, 2004 JMR Job #1-647

Mr. Marston Whittecar Hawkeye Asset Management 2727 De Anza Road San Diego, CA 92109

PROJECT: Mission Bay Mobile Home Park

SUBJECT: Air Sampling

Mr. Whittecar:

Air sampling was performed by JMR Environmental Services, Inc. (JMR) at 2727 De Anza Road in San Diego, CA on August 5 and August 6, 2004. During this period, demolition was performed on the Southeast Storage Building #1 and on the Southwest Storage Building #2.

Perimeter lead air samples were collected and analyzed via Atomic Absorption Spectrometry (AAS) using National Institute of Occupational Safety and Health (NIOSH) method 7082. Analysis of the air samples yielded results ranging from <2.02 to <1.10 micrograms per cubic meter of air (μ g/m³). These results were far below the California Division of Occupational Safety and Health (Cal/OSHA) mandated action level of 30 μ g/m³ in an 8-hour time weighted average (TWA), the permissible exposure limit (PEL) of 50 μ g/m³ in an 8-hour TWA.

Lead air samples were analyzed by EMC Labs Inc. of Phoenix, AZ, an AIHA-certified laboratory. Attached are copies of air sample field data sheets and laboratory results.

JMR appreciates the opportunity to provide these services. If you have any questions or require additional assistance please feel free to contact us at 619/858-7260.

Sincerely, JMR Environmental Services, Inc.

Subject:	Health Concerns

Dear I

This is in follow-up to your e-mail of Thursday, October 7, 2004 regarding demolition of mobile homes at the . On October 8, 2004, Environmental Health Specialist Dave Cammall with the Hazardous Materials Division made a site visit to the De Anza Mobile Home Park to determine if any hazardous waste was being improperly disposed. On that date, he observed no evidence that indicated any hazardous waste, including asbestos and lead based paint, had been improperly or illegally disposed.

In regards to your concern about the potential exposure to citizens in the area to airborne hazardous waste, the HMD was provided with laboratory reports from JMR Environmental Services, Inc. that indicate there is no presence of lead or asbestos from air samples taken along the perimeter of the job site. Additional testing by AmeriSci Los Angeles of bulk samples of building materials from structures being demolished indicate no presence of asbestos.

Mr. Cammall also contacted Mr. Jimmie Cooksey with the San Diego County Air Pollution Control District (APCD) and was told that investigations by APCD to date have uncovered no APCD violations or permit violations by the City of San Diego.

Both HMD and APCD will continue to monitor this site. If you have any questions please contact EHS Specialist Dave Cammall at (619) 338-2489.

County of San Diego Department of Environmental Health Hazardous Materials Division Permit Section P.O. Box 129261 San Diego, CA 92112-9261

Re: Permit Type: HK18 Permit Number: 138839 Business Name: De Anza Harbor Resort

Dear Sir or Madam:

Please cancel the above permit for De Anza Harbor Resort. Our lease agreement with the City of San Diego has been cancelled effective November 23, 2003. After November 23 the City of San Diego or their representative, Hawkeye Asset Management, will be managing the property. Hawkeye's phone is 949-497-9967

Also enclosed is the invoice for \$237.50 due 11/30/2003 for 2004. De Anza Harbor Resort will not be paying this amount since we will no longer be managing this property after November 23.

If you have any questions, please give me a call.

Sincerely,

isena Marshall Wiseman

General Manager

Phone: 858-581-4239

Enclosures Invoice \$237.50 Copy of 2003 permit

APPENDIX E *Site Photographs*

APPENDIX E Site Photographs

Photograph 13 – Backside of main golf course building looking southeast. Equipment rental hub is located on the far end of building in this photo. Photograph 14 – Backside of main building looking southwest. Small kitchen in main building serves food to patrons through hut seen on the right. Restrooms and event rooms used for storage in remaining part of main building.

Photograph 15 – AST for diesel and gasoline southwest of the main golf course building and near the golf course maintenance building. Photograph 16 – Garage entrance to the golf course maintenance building with a hydraulic lift and drain in front.

Photograph 29 – A few of the sheds at the trailer park had some small containers of chemicals left behind by former residents.	Photograph 30 – Example of one of a few stains in the trailer park.
Photograph 31 – Stormwater drainage features are located along the main roads through the	Photograph 32 – Main transformer on the southeast corner of the northern trailer park.
trailer park.	Bottom of box was stained.

Photograph 32 – One of the streets at the southern trailer park.	Photograph 33 – One of the cleared lots at the southern trailer park.
Photograph 34 – Example of some of the small storm drain outlets to the bay from the trailer park.	Photograph 35 – Inside one of the trailers in the southern trailer park.

Photograph 40 – Large debris piled on the side of the Boneyard. Soil appears to have small pieces of debris. An area appeared to have burn ash.	Photograph 41 – Stained soil in the Boneyard, approximately 2 feet in diameter.
Photograph 42 – Hazardous waste from the trailer park temporarily stored in the Boneyard on a concrete pad. A large stain is located near the 55- gallon drum.	Photograph 43 – Inside of storage shed on the concrete pad. Contents in the bins included paint, paint thinner, and household chemicals.

Photograph 48 – Boat storage inside the Boat and Ski Club. No fuel stored onsite. Limited maintenance is allowed onsite.	Photograph 49 – Concrete outline from possible previous structure.
Photograph 50 – Boat ramp to Rose Creek in Boat and Ski Club; currently used as a wash station for the boats.	Photograph 51 –Athletic fields north of the Boat and Ski Club. Two small buildings and storage containers on site.

Photograph 56 – Main building at the entrance to Campland on the Bay. Houses offices, a convenience store, and laundry facilities.	Photograph 57 – Inside the laundry facility.
Photograph 58 – Roadway inside Campland. Camping areas are to the left and right. A storm drain is marked by yellow paint.	Photograph 59 – One of the restroom facilities at Campland. Apartments for employees are on the second floor.

DUDEK

<image/>	
Photograph 76 – The main transformer serving Campland.	Photograph 77 – One of the smaller transformers. Facilities manager stated that none of the transformers are more than 10 years old.
Photograph 78 – Propane AST near the maintenance yard at Campland.	Photograph 79 – Entrance to maintenance yard for Campland. Vehicle and equipment stored in open yard. Storage containers house supplies. Large building on the left for maintenance work and offices.

Photograph 80 – A storage shed at Campland contains new and retired batteries. Batteries pictured are no longer in use. Battery acid residue was present beneath secondary containment (on shed floor).

Photograph 81 – Waste oil and diesel drums behind the battery storage shed at Campland.

Photograph 83 – Parts washer inside the maintenance building at Campland.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.
This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Site History:	The Former Texaco Site is located at the northeast corner of the
	intersection of Mission Bay Drive and Glendora Street in San Diego.
	The Texaco station operated from 1951 until it was demolished in
	1970. An Unauthorized Release case H16027-002, was opened by the
	Department of Environmental Health (DEH) in September 1993, based on
	contamination found during a Phase II investigation at the Site. The
	investigation was conducted for Pacific Nissan, an automobile
	dealership located at the subject Site, and significant petroleum
	contamination was found in soil borings 1 and 7. The previous release
	case H16027-001 was opened in September 1990 from a waste oil
	underground storage tank (UST) removal inspection. Contaminated soil
	was excavated and properly disposed, and the case was closed by DEH
	on March 5, 1991. As part of a Phase II investigation which included
	nine soil borings in 1993, a geophysical survey was conducted and
	three suspected UST locations were identified. In 1998, a second
	geophysical survey was conducted by another consultant, and the three
	anomalies were marked for removal. Six temporary wells were installed
	to obtain groundwater samples and sample results indicated
	groundwater was impacted by gasoline. A DEH permit, AT4517, was
	obtained in August 1999 for the removal of USTs, however no tanks
	were uncovered, only piping. A remedial excavation was conducted in
	the area of the suspected waste oil UST to a depth of 13.5 feet below
	ground surface (bgs). On September 7, 1999, an estimated 85 cubic
	yards of impacted soil was removed from this area. Another remedial

excavation was conducted in the vicinity of the suspected gasoline USTs on September 13, 14, & 15, 1999. The maximum depth was 15 feet bgs, and approximately 175 cubic yards of impacted soil was removed. After obtaining confirmation samples, both excavations were backfilled with pea gravel and restored to pre-excavation conditions. Five groundwater monitoring wells were initially installed in June 2000. At that time depth to groundwater was observed at 13 feet bgs. Groundwater flow is generally to the west or northwest, and Mission bay is located 1,700 feet to the southwest of the Site. No free product had been observed since monitoring began in 2000 until the August 2010 monitoring event. A Corrective Action Plan (CAP) was prepared in December 2005 and recommended quarterly over purging of wells for a year to limit off-site migration of dissolved contaminants and to enhance biodegradation. Seven enhanced fluid recovery or over purging events were performed between September and November 2008 to reduce elevated dissolved hydrocarbon concentrations in groundwater from wells MW-1 and MW-2. The Site was being evaluated for a low risk closure since it is located in a nonbeneficial use groundwater basin and the plume appeared stable. During the August 2010 monitoring event the depth to groundwater decreased approximately 5 feet across the Site. Free product was observed in monitoring wells MW-1 and MW-3 for the first time. The highest amount of free product observed on groundwater was 0.80 feet in MW-3. Monitoring well MW-3 historically had been a clean well. Upon review of all the historical data, it was determined that an artificial drawdown of groundwater began in January 2010. This was evident based on groundwater flow direction shift to the south, and lower groundwater elevations. It is believed that a local de-watering project initiated sometime before January 2010 and ended around October 2010, was responsible based on depth to water measurements. Two biweekly gauging events conducted in October 27, 2010, and November 5, 2010, showed a decrease in free product levels, and an increase in groundwater elevations. Due to the change in groundwater direction and an increase in dissolved benzene concentrations, DEH requested additional delineation in the new downgradient area in 2011. Due to access and liability issues, the new proposed wells were never installed. The groundwater gradient and elevation were observed

to return to normal groundwater conditions based on monitoring events from February 2012 through August 2016. The concentrations in monitoring well MW-3 now show a decreasing trend. Fate and Transport modeling was conducted by the consultant and the results indicated that the benzene plume was stable and benzene would reach maximum contaminant levels (MCLs) in the source area in 2 to 4 years. The consultant recommended closure under the States Low Threat UST Case Closure Policy (LTCP). DEH did not accept the trend analysis provided, and believed it underestimated the time it would take for benzene to reach MCLs. DEH conducted another trend analysis using the historical data and determined it will take 77 years for benzene at the source to reach MCLs. Additionally, the two down gradient wells MW-2 and MW-3, are calculated to have benzene naturally degrade to the MCL by the end of 2020 and 2024, respectively. DEH concurred with the recommendation for closure based on LTCP criteria, and the new trend analysis. A 60-day public notification of the proposed closure was sent out October 27, 2017, and DEH received one comment. DEH responded to the comment on January 5, 2018. Currently there is no building located at the Site which is used as a parking lot, and vapor intrusion is not an issue. Be advised, the Site address in recent reports is listed as 4433 Mission Bay Drive, which is the address of the dealership, instead of 4409. The Site meets the LTCP criteria. However, if there is any redevelopment proposed for this Site, management of contaminated soil and a health risk evaluation must be addressed by entry into the Voluntary Assistance Program. A permit application has been submitted, DEH2017-LMWP-002933, to destroy the monitoring wells.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NDS: Other Ascertainable Records	

Registry ID:

FIN

110002692578

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The FINDS: database contains 0 additional records for this site. Please contact your EDR Account Executive for more information.

Case Type:	Cleanup Program Site
Case Worker:	
Local Agency: RB Case Number:	SAN DIEGO COUNTY LOP Not Reported
File Location:	Not Reported
Potential Media Affected:	Not Reported
Potential Contaminants of Concern:	Not Reported
Site History:	The subject 1.4-acre Site is located at 3315 Ticonderoga Street at the corner of Ticonderoga Street and Morena Boulevard in San Diego.
	The surrounding vicinity includes single-family residences to the
	north and the south, an elementary school to the east, and railroad
	tracks to the west of the Site. Historically, the Site was used as a
	chicken farm prior to 1955, and a nursery storage yard from 1955 to
	2016. In 1978, a single-family residence and attached garage were
	constructed on site. A voluntary assistance program application was
	submitted to the Department of Environmental Health (DEH) for
	oversight in May 2016 and the Site was designated as DEH case
	DEH2016-LSAM-000373. The Site is going to be redeveloped into eight
	residential lots. In July 2015, four soil borings were initially
	advanced at the Site and concentrations of Chlordane in sample
	SB1-0.5 were observed above the residential use action levels. In
	April and September 2016, an additional 14 borings were advanced to
	delineate the extent of pesticide impacted soil. Boring SB1R was
	advanced as close as could be determined to the previous sample
	SB1-05 as depicted on the previous consultants figure. Four step-out
	borings were advanced approximately 10 feet in each direction from
	SB1R. Additional samples contained Chlordane and Heptachlor Epoxide
	concentrations above the new residential action levels in sample
	SB1N-0.5. The consultant estimated there was three areas of
	pesticide-impacted soil with a total of 30 cubic yards that required
	excavation and removal. A revised soil removal work plan and
	community health and safety plan were submitted and approved by DEH
	on November 3, 2016. DEH strongly recommended the excavation be
	conducted when school was not in session, and requested two
	additional samples be obtained beneath the structure and one at the
	edge of the concrete patio after demolition of the house to complete

3315 TICONDEROGA, 3315 TICONDEROGA STREET, SAN DIEGO, CA 92117 (Continued)

the assessment. A sample was obtained at the edge of the patio in March 2017, and after the residential pad removal, two soil samples were obtained on July 18, 2017. The sample results for all three were below the residential cleanup levels. On July 21, 2017, pesticide-impacted soil was excavated from the three areas and directly loaded on the dump trucks for disposal. Dust monitoring and air sampling were conducted during the demolition of the residence and during the remedial excavation. Four sidewalls and one base confirmation sample were obtained for all three excavations. All of the sample results were below the residential cleanup levels. The pesticide-impacted soil was removed and properly disposed. The consultant has requested no further action and DEH concurs with the consultants recommendation.

Violation Code:	2030036 (RP) Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity; and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 23 CCR 2635(b)(2), 2665

	Local Case Number:	H12849-003
	Potential Media Affect:	Other Groundwater (uses other than drinking water)
	Potential Contaminants of Concern:	Gasoline
	Site History:	5/83 Four (one 6,000-, two 8,000-, and one 12,000-gallon) single-wall fiberglass gasoline USTs were installed. 12/87 One 550-gallon
		double-wall fiberglass used-oil UST was installed. 3/95 Three
		double-wall fiberglass gasoline USTs (one 6,000-, two 8,000-, and one
		12,000-gallon), associated product piping, and dispensers were
		installed. DEH opened environmental case #H12849-003. 8/95 Five vapor
		wells (VEW-1 through VEW-5) and three groundwatermonitoring wells
		(MW-1 through MW-3) were installed. 11/99 Three groundwater
		monitoring wells (MW-4, MW-5, and MW-6) were installed. 3/01
		Performed 48-hour DPE pilot test. 10/01 One offsite groundwater
		monitoring well (MW-8) was installed. 11/01 All monitoring wells were
		surveyed per state requirement AB2886. 1/03 Three double-wall
		fiberglass gasoline USTs (one 15,000-gallon and two 8,000-gallon),

associated product lines, and dispensers were installed. A total of 774.75 tons of hydrocarbon-impacted soil was removed from the site. 4/04 Two groundwater monitoring wells (MW-7 and MW-9) were installed. 3/05 DEH concurred that no further groundwater assessment were necessary and subsequently requested two additional quarters of groundwater sampling. 11/05 Two soil gas probes (SGP-1 and SGP-2) were installed. 12/06 DEH requested the installation of an additional well downgradient of MW-9 due to increased MTBE concentrations in MW-9. 4/07 Environmental consulting and management activities transferred from TRC to ETIC Engineering Inc. 8/07 Submitted access request for the installation of proposed offsite monitoring well. 6/08 Station closed for business. 12/08 Station demolished site is now vacant and fenced. 2014 CAPA submitted for Natural Attenuation. Approved

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status Date:	01/30/2013
Case Worker:	JS
RB Case Number:	
Local Agency: File Location:	SAN DIEGO COUNTY LOP Local Agency
Local Case Number:	H00054-001
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Comments: In March 1991, soil contamination was observed beneath the
	northern dispenser during pressure testing activities; hence, case
	H00054-001 was opened on May 23, 1991. Overview of soil and
	groundwater impacts Between October 1992 and February 1996,
	twenty-one soil borings were advanced, 17 of them were converted into
	groundwater monitoring wells. In October 1998, the product piping was
	removed and upgraded. Twelve soil samples were collected under the
	direction of DEH. The laboratory results showed minor petroleum
	hydrocarbon impacts to soil. In March 2003, four 10,000 gallon
	underground storage tanks (USTs) and associated fuel dispensers were
	removed and upgraded. Twelve soil samples were collected under the
	direction of DEH. The laboratory results showed elevated petroleum
	hydrocarbon impacts to soil. The analytical results from soil samples
	collected from the UST system removal/upgrade activities in 2003 and
	subsequent site assessment activities indicate that soil impacts are
	limited to the UST and dispenser areas. Based on groundwater
	monitoring and sampling events that occurred between October 1992 and
	March 2009, the groundwater flow direction is generally to the
	south-southwest at a gradient of approximately 0.001 foot per foot.
	Free product (FP) was detected on the groundwater from 1992 through
	2001 and intermittently between 2001 and 2005. Between 1992 and 1998,
	and in 2005, manual FP removal activities occurred at the site. FP
	has not been detected at the site since 2006. The dissolved-phase
	plume is adequately defined, stable, and/or decreasing, with the
	exception of TBA. The plume extends offsite approximately 70 feet to

the north and east, and approximately 120 feet to the south. A soil vapor survey and human health risk evaluation was conducted onsite for station employees (January 2005) and offsite for the residences located east of the site (May 2009). Based on the laboratory results and the vapor risk calculation being less than 1x10-6, the consultant concludes that vapor intrusion to indoor air does not pose a threat to human health onsite or offsite. Overview of remediation In March 1991, during pressure testing activities, approximately 2.5 cubic vards of petroleum hydrocarbon impacted soil was excavated beneath the northern dispenser and disposed offsite (disposal facility was not documented). Approximately 2,620 gallons of FP/water was recovered and disposed (disposal facility was not documented). Between May 1993 and April 1999, a Soil Vapor Extraction (SVE) system, plumbed to 12 wells, operated at the site. Approximately 200,000 pounds of hydrocarbons were recovered. The SVE system was effective in reducing the petroleum hydrocarbon concentrations in soil and groundwater as well as removing FP. In March 2003, during UST and fuel dispenser upgrade activities, approximately 840 cubic yards of petroleum hydrocarbon impacted soil was excavated beneath the USTs and dispensers and disposed off site. Conclusions Petroleum hydrocarbon contamination in soil and groundwater is adequately defined. The groundwater contaminant plume is defined, stable, and/or decreasing, with the exception of TBA. The consultant estimates the volume of TPH-impacted soil greater than 100 mg/kg remaining at the site is approximately 3,000 cubic yards. The consultant also estimates that dissolved-phase concentrations of benzene and MTBE will reach their maximum contaminant levels of 1 ug/l and 13 ug/l, respectively, by 2109. Dissolved-phase concentrations of TBA are currently increasing, which is attributed to the degradation of MTBE. Based on the dissolved-phase concentrations of MTBE decreasing, it is expected that over time TBA concentrations will also decrease. The consultant estimates that TBA will reach the California Action Level (12 ug/l) by 2109. The residual soil and groundwater contamination will not impact human health, the environment, or nearby sensitive receptors. A Corrective Action Plan was submitted on January 13, 2010 that proposed natural attenuation as the most feasible remedial alternative and requested closure of the case. Based on available

data, DEH concurs with the consultants conclusions and approves closure of this case.
