

City's Development Services Department Launches OpenDSD 2.0

The Development Services Department (DSD) is in the process of changing its automation project tracking system. DSD is pleased to provide more access to DSD services online, 24 hours a day, 7 days a week. The City is committed to fulfilling its promise to deliver powerful e-government services and valuable information about private development projects while making customer interactions more efficient, convenient and interactive. **Please note: Enhancements were made to improve the OpenDSD website on January 16, 2018.**

As permit types are transitioned to the DSD's new automated system, additional on-line services will be available in the future.

The new on-line features are:

- View Code Enforcement cases;
- Apply for a Transportation or News Rack permit;
- Submit a No Fee Street Tree Permit request;
- Apply for a Residential Rooftop Mounted Solar Photovoltaic (PV) permit.

To access these new features, [click here](#) or visit the [OpenDSD homepage](#).
