

Refillable 1 lb. Propane Cylinders Are Finally Here!

Save money and the environment by switching to refillable propane cylinders.

If you're a camper, BBQ cook or tailgate party chef, choose the new refillable propane cylinder option to save money, hassle, and do something good for the environment. An estimated four million disposable 1 lb. propane cylinders are sold every year in California. Consumers spend about \$4 per cylinder for a single-use cylinder with 80 percent of the price going toward packaging costs.

Disposable propane cylinders are dangerous. When “empty,” disposable cylinders often still contain a small amount of gas. This poses a potential danger to refuse disposal workers due to the risk of explosions and resulting fires. Because of the danger involved, they cost about \$4 each to dispose of properly at the City’s [Household Hazardous Waste Transfer Facility](#).

A better option is here, the [ReFuel Your Fun Program!](#) Simply purchase the refillable propane cylinder at one of these participating locations:

- ✓ 126 California U-Haul locations that dispense propane
- ✓ 200 West Marine retail locations
- ✓ Select REI and other sporting goods stores
- ✓ Online through [REI](#), [West Marine](#), [Home Depot](#), [Walmart](#)

A simple refill costs about \$2.25 because you only pay for the gas and filling service, not the container! After four refills, you will be saving on each use. Refillables can **last up to 10 years** and can be **refilled hundreds of times**.

To find the nearest participating location, go to: <http://refuelyourfun.org>.
