Subject: Letter re: Local Buildout/Economic Devt Analysis for CCE

Dear Mayor and Council,

Please see the attached letter from Climate Action Campaign, IBEW Local 569, IBEW Local 465 and SanDiego350 regarding an analysis of the local clean energy buildout/economic development potential of a Community Choice Energy program. We look forward to working with you as this process moves forward.

Sincerely,
Nicole

San Diego, CA 92105

RE: Local Clean Energy Buildout and Economic Development Analysis for Community Choice Energy

Dear Mayor and Council,

The undersigned organizations fully support the successful implementation of the city of San Diego's Climate Action Plan and its landmark 100% clean energy goal. We are also committed to maximizing the development of local clean energy resources with local hire that create good, middle-class jobs and increase local economic development.

We thank you for the independent and peer-reviewed Community Choice Energy Technical Feasibility Study to give us information about the viability of pursuing Community Choice Energy for our members. We were pleased to see that there were no unbundled Renewable Energy Credits considered as part of this study. We respectfully request that an additional analysis on local clean energy buildout scenarios and attendant jobs/economic development be pursued as soon as possible, with an emphasis on development of new renewable resources from proven developers in San Diego and adjacent counties as well as the potential from energy efficiency and demand-side measures.

We ask that this analysis include how this local buildout scenario could prioritize investments, programs and policies that benefit communities of concern identified in the top 25 percent of CalEnviroScreen's ranking for San Diego region communities. Finally, we know this study will take time, and it is not our intent to slow down the process of review and adoption of a plan to achieve 100% clean energy in the city.

Thank you again for performing your due diligence on our future energy options and your consideration of our proposed analysis to ensure San Diego families and businesses will benefit from a clean energy future with good local jobs and real clean energy. We look forward to working with you as this process moves forward.

Sincerely,

Nicole Capretz
