TABLE LU-4 General Plan and Community Plan Land Use Categories (continued)

General Plan Land Use	Recommended Community Plan Designation	Use Considerations	Description	General Plan Density Range (du/ac) ¹
Industrial Employment ^{1,2}	Scientific Research	Office Use Limited	Provides for activities limited to scientific research, product development and testing, engineering, and any other basic research functions leading to new product development with limited light manufacturing. Office uses, except corporate headquarters, are not permitted, except as accessory to the primary use or as direct support for scientific research uses. This designation would not permit storage and distribution uses.	N/A
	Technology Park	Office Use Limited	Allows high technology related to applied sciences, including: light manufacturing, research and development, corporate headquarters, and storage and distribution uses. It is appropriate to apply in light industrial areas with some office development.	N/A
	Business Park	Office Use Permitted	Allows office, research and development, and light manufacturing uses. This designation would not permit storage and distribution uses except as accessory to the primary use. It is appropriate to apply in portions of communities primarily characterized by single- and multi-tenant office development with some light industrial uses.	N/A
	Business Park-Residential	Office Use Permitted	Applies in areas where employment and residential uses are located on the same premises or in close proximity. Permitted employment uses include those listed in the Business Park designation. Multifamily residential uses are optional with the density to be specified in the community plan. General Plan Land Use	Recommended Community Plan Designation	Use Considerations	Description	General Plan Density Range (du/ac) ¹
Industrial Employment ^{1,2} Continued	Heavy Industrial	Office Use Limited	Provides for industrial uses emphasizing base sector manufacturing, wholesale and distribution, extractive, and primary processing uses with nuisance or hazardous characteristics. For reasons of health, safety, environmental effects, or welfare these uses should be segregated from other uses. Non-industrial uses, except corporate headquarters, should be prohibited.	N/A

¹ Residential density ranges will be further refined and specified in each community plan. Residential densities may also be narrowed within the density ranges established for the Commercial Employment, Retail, and Services General Plan land use category in this table. Community plans may also establish density minimums where none are specified in the Commercial Employment, Retail, and Services General Plan Land Use category. Calculation of residential density is to be rounded to the nearest whole number if the calculation exceeds a whole number by 0.50 or more in most cases. In all other remaining instances, such as in the coastal areas, calculation of density is to be based on established policies and procedures. Whenever a plus (+) sign is identified next to a density number, the upper limit may be further specified in a community plan without causing the need for amending the General Plan, upon evaluation of impacts. For uses located within an airport influence area, the density ranges should be consistent with the Airport Land Use Compatibility Plan and Air Installation Compatible Use Zone study or steps should be taken to overrule the Airport Land Use Commission.

² Consult the Economic Prosperity Element for policies related to the commercial and industrial land use designations.

³ Commercial land use designations may be combined to meet community objectives.

⁴ Community plans will further define the specific institutional use allowed on a particular site.

⁵ The Downtown Community Plan provides building intensity standards.
