Background Info:	Camp Matthews was established in 1918 as a rifle range for the Ma rineCorps. Over time it expanded and by 1956 there were a total o f 6rifle ranges, one pistol range, one mortar/flame thrower/hand grenade/bazooka range, three small bore ranges, one skeet range, and three school ranges. The mortar/flame thrower/ handgrenade/ba zooka range (Range H) was located in the panhandle area of the ca mp. In April 1999, approximately 200 3.5 inch practice rock were discovered during the excavation of a hillside . This location i s approximately 1000 feet west of former Range H. The original IN PR indicates that Range H was decontaminated priorto disposal. A mining company was used in the early 1960s to salvage lead and br ass from the ranges. Most of the camp area hasbeen extensively de veloped. The hillside where the rockets were discovered was profe ssionally swept with mine detection equipment in April 1999. In F ebruary 2003, approximately 40 practice rockets were found at two construction projects onthis formerly used defense site.

Two tank removal soil samples were collected from the bottom of the eastern end of the excavation. Soil sample TE-9.5 (collected from 9.5-feet bgs) reportedly contained 217 mg/kg of TPHg and 1,450 mg/kg of TPHd.
