

How-To Care for a Bearded Dragon by Bernard Cayetano

Instructions [title/header]

1. Give them a big enough enclosure, the more leg room the better. 4ft X 4ft square wide and at least 2ft for the height.
2. Lighting and heat are a must. Lighting should have UVB and a heating lamp with 95F - 115F temperature.
3. Decorate tank, you can use sand, newspaper and reptile friendly substrate.
4. Feed them a balance of insects and veggies. Sometimes fruits.
5. Bath them twice or 3 times a week.
6. Take them out to the sun, meet new friends and go on a field trip.
7. Dress them up and have fun photos.
8. Make sure to let them sleep.
