

# How-To Make a Toy Vehicle with Recycled Materials

by Darrow Palma with Hero City Arts & Crafts

Learn how to make a Star Wars vehicle called the Sandcrawler to scale-size of a 4" inch Star Wars character called the Jawa.

The actual toy is extremely rare and expensive to buy, so what better way to make a life size toy for the original 2.5" character and then place it in a setting out in desert scenery for a diorama picture.

The Sandcrawler first appeared in the 1977 film Star Wars Episode IV: A New Hope, where R2-D2 and C-3PO were transported on the planet Tatooine. The Sandcrawler was used by the Jawas to collect ore and valuable metals and it also housed a whole colony of the 3 foot tall Jawa people.

## Recycled Materials include:

30" X 20" cardboard box

Cardboard cut outs from other empty boxes

2 military tank toys found at a garage sale

Paint and tape
