Point Loma, Calif.

To the San Diego City Council:

Dear Sirs,

We are the owners of four apartments across the street from the Cabrillo School playground. Recently lights have been installed. The purpose we believed to be a supervised playground for small children.

It has just been learned that organized baseball played by young men is the real reason for the expensive lights and equipment.

We heartily believe in maintaining a play yard for children but if the grounds are to be used for night games you can readily see how it will effect home owners in the neighborhood.

First, we know what it will be like as the Soccer teams play many times a year. The automobiles line up two deep in front of our home and the applauding is done by honking horns. Also the paper used by spectators to sit on blow over the streets and many into our yard.

My tenants have voiced ~~on~~ their disapproval, fearing noise and glaring lights. If there is no way to stop this nuisance will you please place a time limit of not later than nine (9) P.M.

P.M. If the games are for the benefit of children they should be home at that time.
If the games are for adults why must they be played in the midst of a quiet refined residential section.

Sincerely
Mrs Joseph Michelson.
