DATE: August 17, 2020

TO: James Nagelvoort, Director & City Engineer, Engineering & Capital Projects

FROM: Claudia C. Abarca, Deputy Director, Engineering & Capital Projects *C. Abarca*

SUBJECT: Sole Source Agreement for Emergency Repairs of Citywide Sewer Siphons, Inspection and Cleaning

---

Estimated Amount: \$2,000,000 (Not-to-Exceed)

Contractor: Cass-Arrieta Construction

Estimated Completion: June 30, 2022

Recommended Action: Approve Sole Source Request

Pursuant to SDMC §22.3108 (a), "Exceptions to Advertisement and Competitive Award of Public Works Contracts", this is to certify that a sole source agreement with the contractor named above is necessary and that strict compliance with a competitive process would be unavailing or would not produce an advantage, and soliciting bids or proposals would be undesirable, impractical or impossible for the following reasons:

JUSTIFICATION:

On April 10, 2020, after a heavy rainstorm event a sewer siphon on the south Metro Interceptor spilled approximately 11.23 million gallons into the Sweetwater River which flows into San Diego Bay. An analysis was conducted where it became evident that the partially obstructed condition of the siphon was a contributing factor of the spill event.

PUD currently only has the necessary resources and equipment to clean siphons that are 30 inches or smaller in diameter. This leaves five siphon locations, which includes the sewer siphon involved in the April 10<sup>th</sup> overflow event, at risk for another potential spill event, unless the sediment and debris buildup is cleaned in a timely manner before the start of the rainy season which begins on October 1, 2020.

The scope of work for this project includes the inspection and cleaning of five large sewer siphons located at different locations. Performing this scope will help to provide full operational capacity and prevent any further sewer spills which can cause a significant environmental impact, threaten wildlife habitat, and endanger public health and safety.

The necessary repair is beyond the capabilities of Public Utilities Department staff; therefore, it is requested this project be designated an emergency and a sole source contract be approved.

Additional information related to this request can be found in Enclosure 1.

AGREEMENT VALUE & DURATION:

Unless a modification to the agreement and this sole-source request is issued, the total fee for these services shall not exceed the amount noted above. The term of the agreement will be in effect from date of the agreement execution and shall not exceed the contract completion date noted above.

**Project Location-Specific:** There are five project locations: 1) Southwest of the intersection of Interstate-5 and Main St in the Otay Mesa-Nestor Community Plan Area (Council District 8), Multi-Habitat Planning Area (MHPA), and coastal zone; 2) East of the intersection of Interstate-5 and State Route-54 in National City and National City's coastal zone; 3) On Harbor Drive at Chollas Creek in Military Facilities Community Plan Area (Council District 8), Port District, and coastal zone; 4) Southeast of the intersection of Interstate-5 and Tecolote Rd, in the Linda Vista Community Plan Area (Council District 2) and coastal zone; and 5) Northeast of the intersection of Interstate-5 and Tecolote Rd in the Clairemont Mesa Community Plan Area (Council District 2).

**Project Location-City/County:** San Diego and National City/San Diego County

**Description of nature and purpose of the Project:** A sewer spill at a sewer siphon facility located at Sweetwater River occurred in April. This resulted in the release of untreated sewerage into the river and adjacent bay. It was determined the spill was the result of debris clogging the sewer siphon. To prevent further spills of this type and ensure the sewer siphons are properly functioning immediate action is necessary to inspect and clean all sewer siphons. The five sewer siphons described above have been determined to need immediate inspection, and if necessary, immediate cleaning, to prevent additional sewer spills.

Project work will include accessing existing manholes, inspecting the sewer siphon pipes and ancillary structures, and if necessary, cleaning the sewer siphon pipes. In order to inspect and clean the sewer siphons, vehicles with specialized equipment will be used to access manholes located on each side of the sewer siphon. Four of the sites are located within or directly adjacent to existing development and roadways. The sewer siphon located southwest of the intersection of Interstate-5 and Main St (Location 1) is located in an undeveloped area near the Otay River. There is existing access to the manhole on the southside of the sewer siphon, this manhole will be used to perform the necessary inspection. If the inspection determines cleaning is needed, additional access to the northern manhole will be established.

For the project, access to the sewer infrastructure will use existing developed paths to the greatest extent feasible. In the event that additional access is needed at Location 1, access would be implemented in accordance with the City's Environmentally Sensitive Lands regulations and MHPA Land Use Adjacency Guidelines.
