

San Ysidro

COMMUNITY PLAN UPDATE

The City of San Diego is updating the San Ysidro Community Plan (SYCP) - one of over 40 such plans in the City - through an in-depth, community-based planning process. The SYCP is a long-range, physical development guide that includes tailored policies for implementing the City's General Plan in the community.

The updated SYCP will convey community goals, objectives and recommendations with an emphasis on sustainable design principles and policies, all of which will be clearly outlined in an illustrative, graphically based, action-oriented planning document.

Key Principles
