

North Park Self Guided Tour – January 2010

INSTRUCTIONS

The community planning update team would like your help in taking a closer look at North Park and providing us your opinions. The team has identified four different routes that showcase the unique aspects and challenges of North Park.

You are not required to take all four tours, but we would like to get at least 3 committee members to volunteer for each route.

The routes all solicit input on parking, land use, bike facilities, pedestrian facilities and other design issues. The questions are easy to answer and are specific to projects or segments along the route.

You should assume 2 hours for each tour. We would recommend that they are done by walking, however if you should choose to take the tour by another mode of transportation please indicate so in the boxes provided.

Please note that the stops are too frequent and close together for driving safely and the environment should be experienced as a pedestrian. The one route exception would be the Western Area / Park Boulevard Route, which would best be experienced on a bike. Route 4, South Area / Burlingame, can also be experienced well on a bike.

ROUTE DISTANCES:

Route 1: West Area / Park Blvd.: 3.63 miles

Route 2: North Area / Adams Avenue: 1.92 miles

Route 3: Central Area 30th and University: 2.15 miles

Route 4: Southern Area 30th / Burlingame: 2.75 miles

Don't forget to include your name on the forms and bring your completed tour forms to the next North Park CPUAC meeting scheduled for **Wednesday, February 17th** (time and location TBD) where we will debrief your thoughts and experiences on the tour and collect the forms.

If you cannot attend the next CPUAC meeting, please feel free to email your input to: mpangilinan@sandiego.gov

Or mail them to:
