

Welcome to the City of San Diego's Capital Improvements Program Project Map Viewer. The CIP Project Map Viewer is an on-line GIS web map application which provides locations and information about CIP Project.

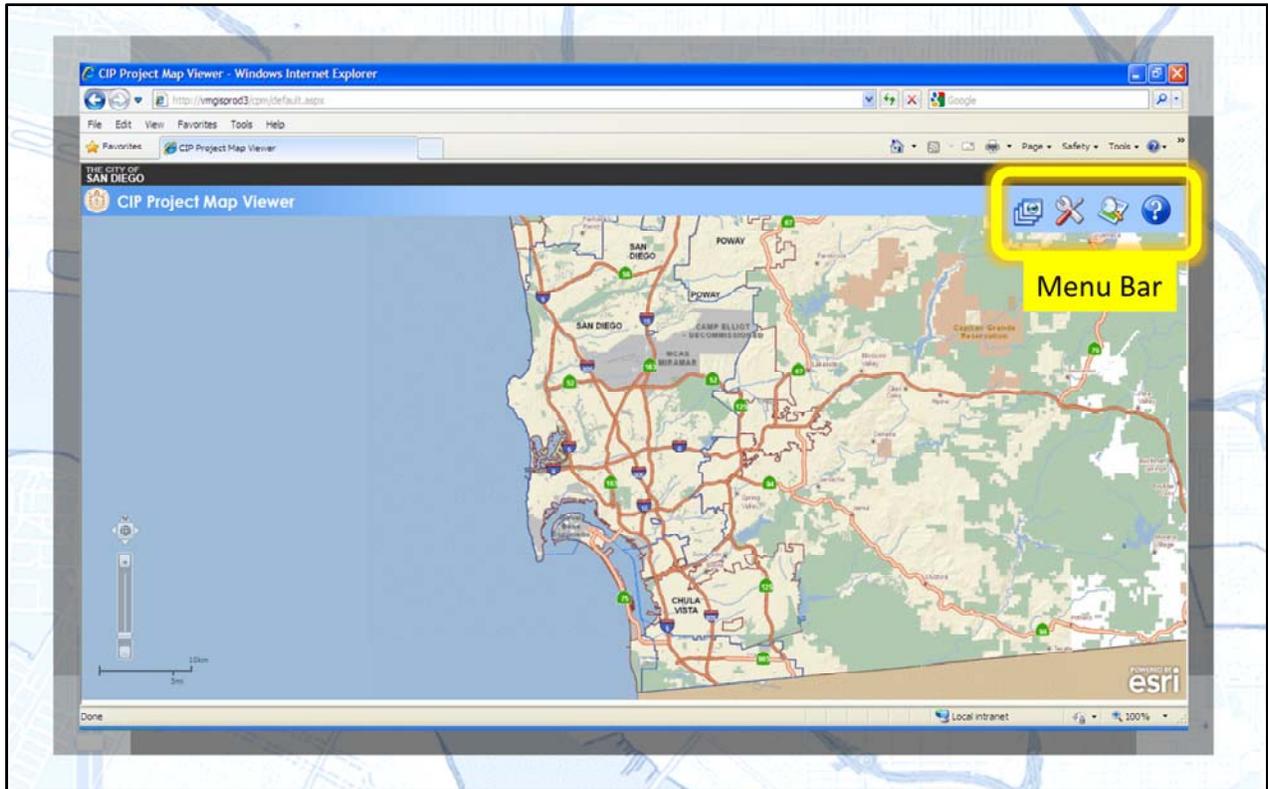

The application requires Microsoft's Silverlight plug-in and was tested using Internet Explorer Version 8.

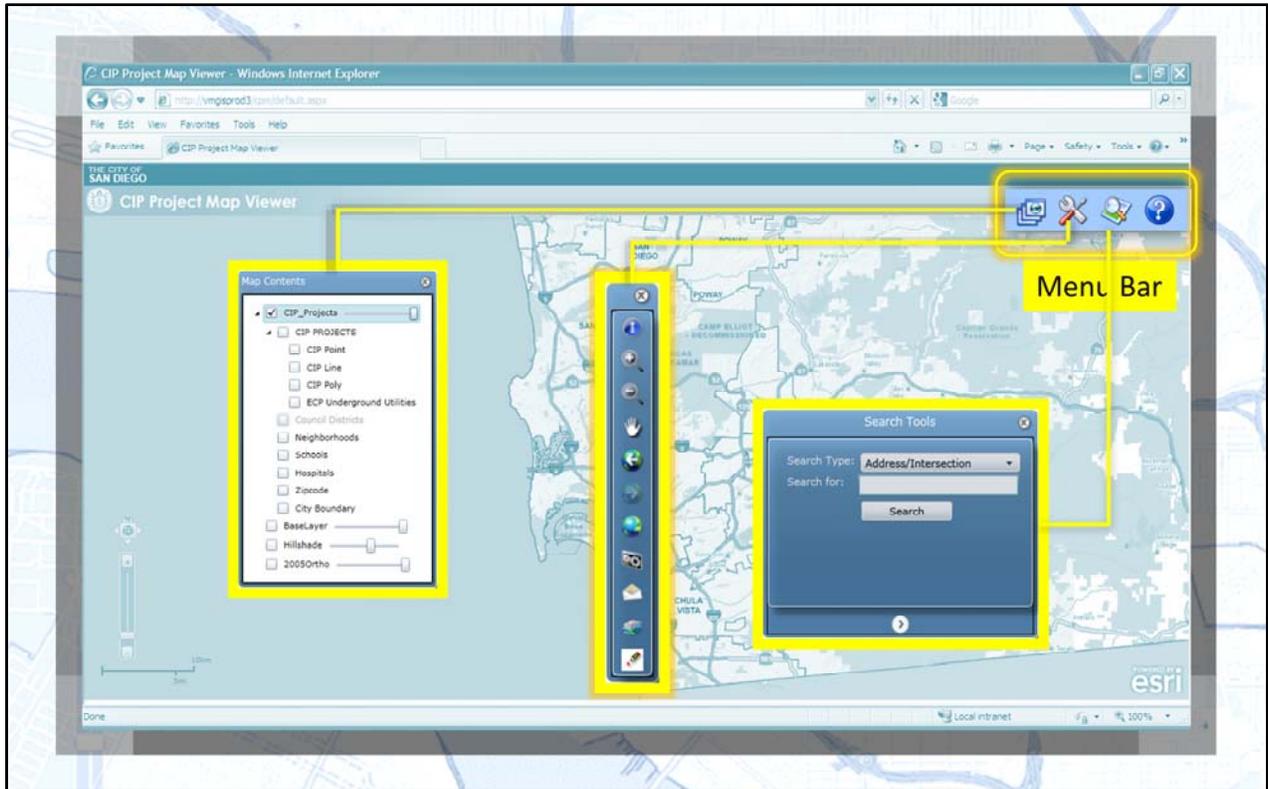

The CIP Project Map Viewer has 3 main areas. First is the Navigation slider,

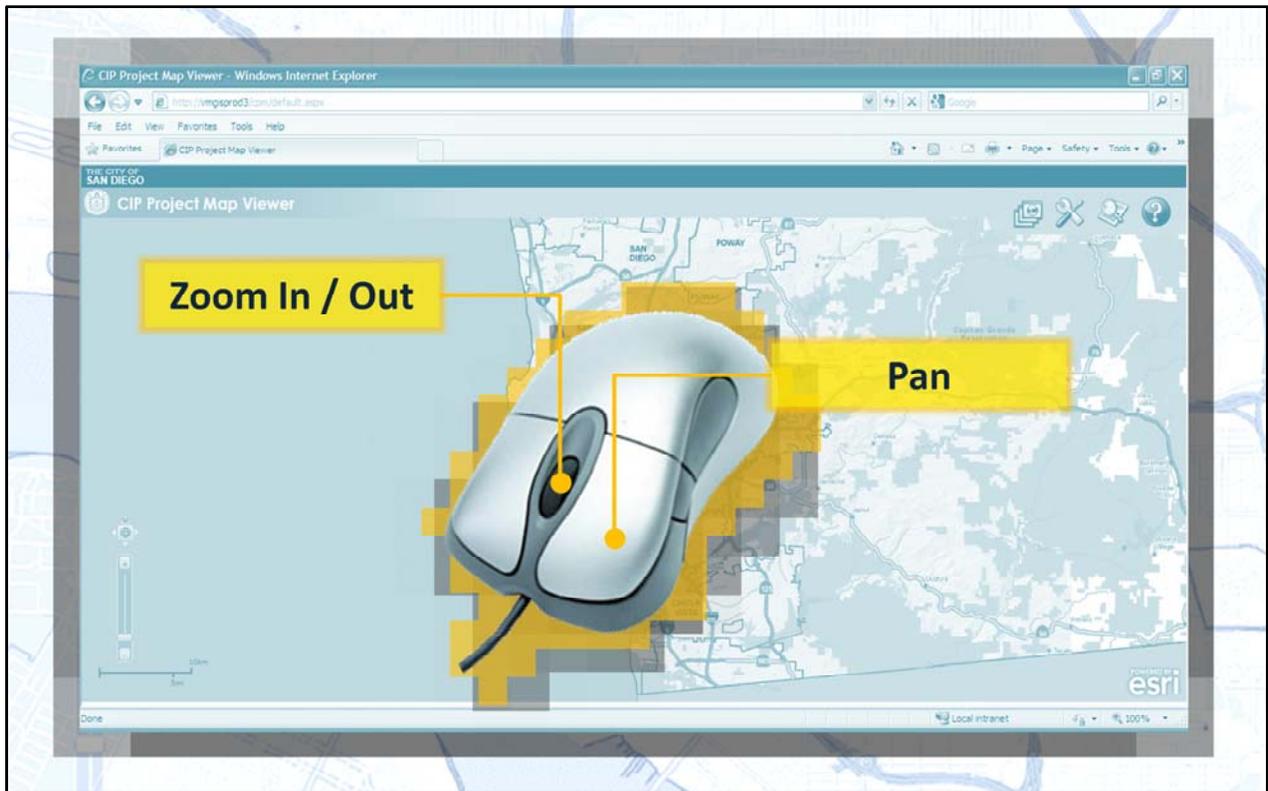

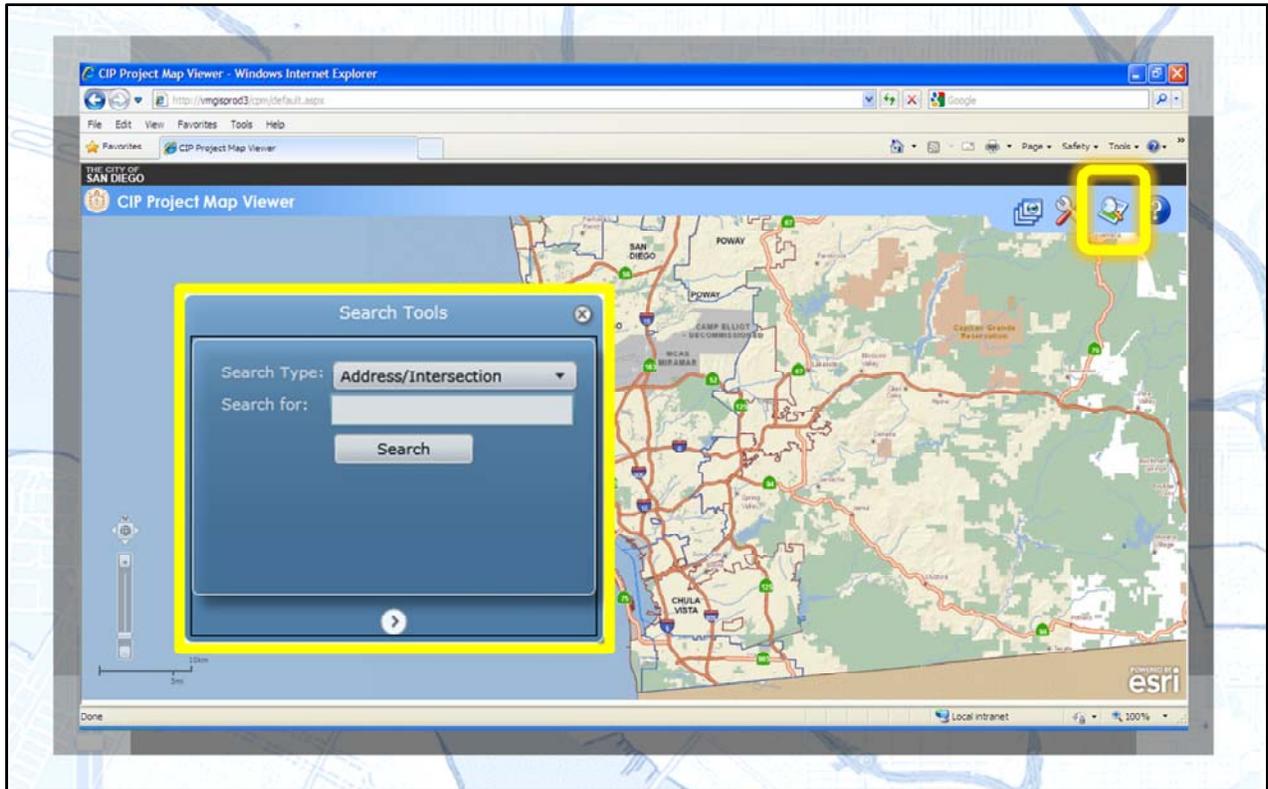

the Menu Bar

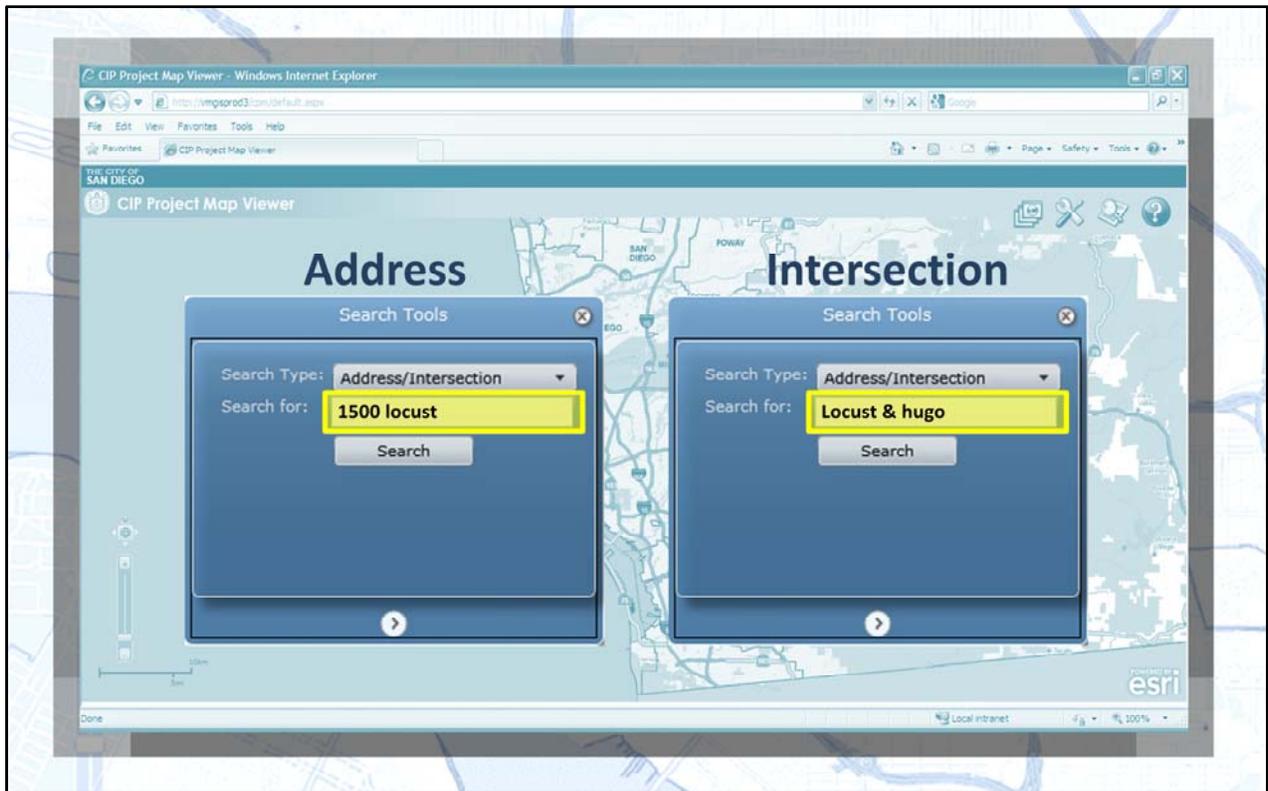

which also contains the tools and dialogue boxes.

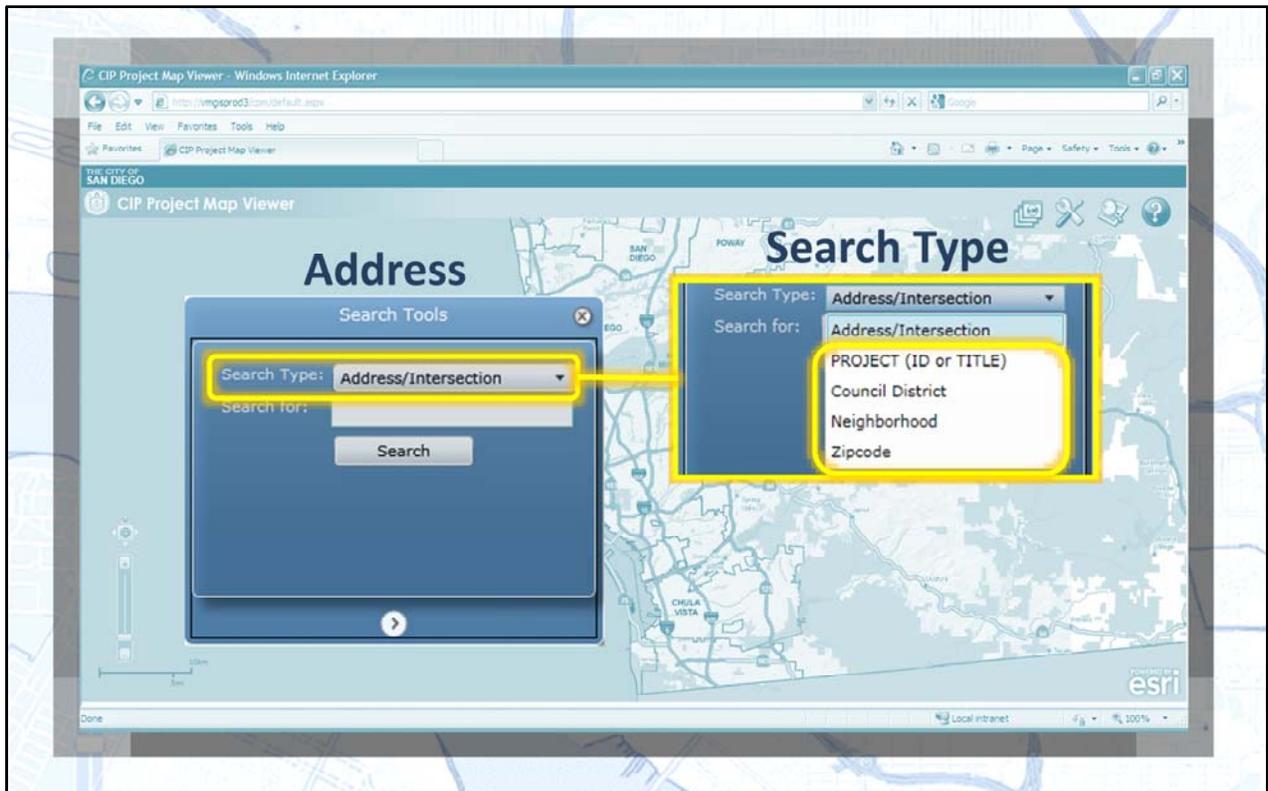

Zooming and panning can also be controlled by using the mouse scroll button or by holding down the left button and dragging.

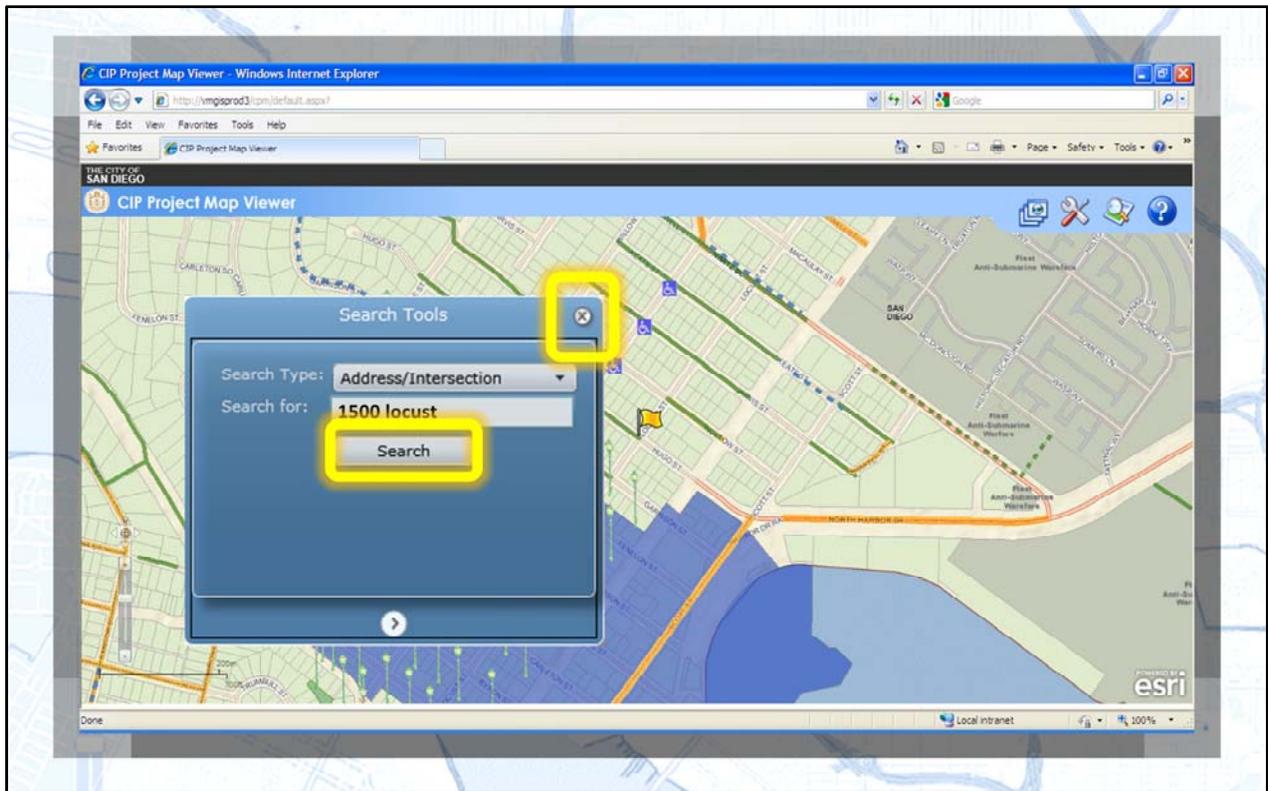

To locate CIP Projects within your area, click on the Search tools

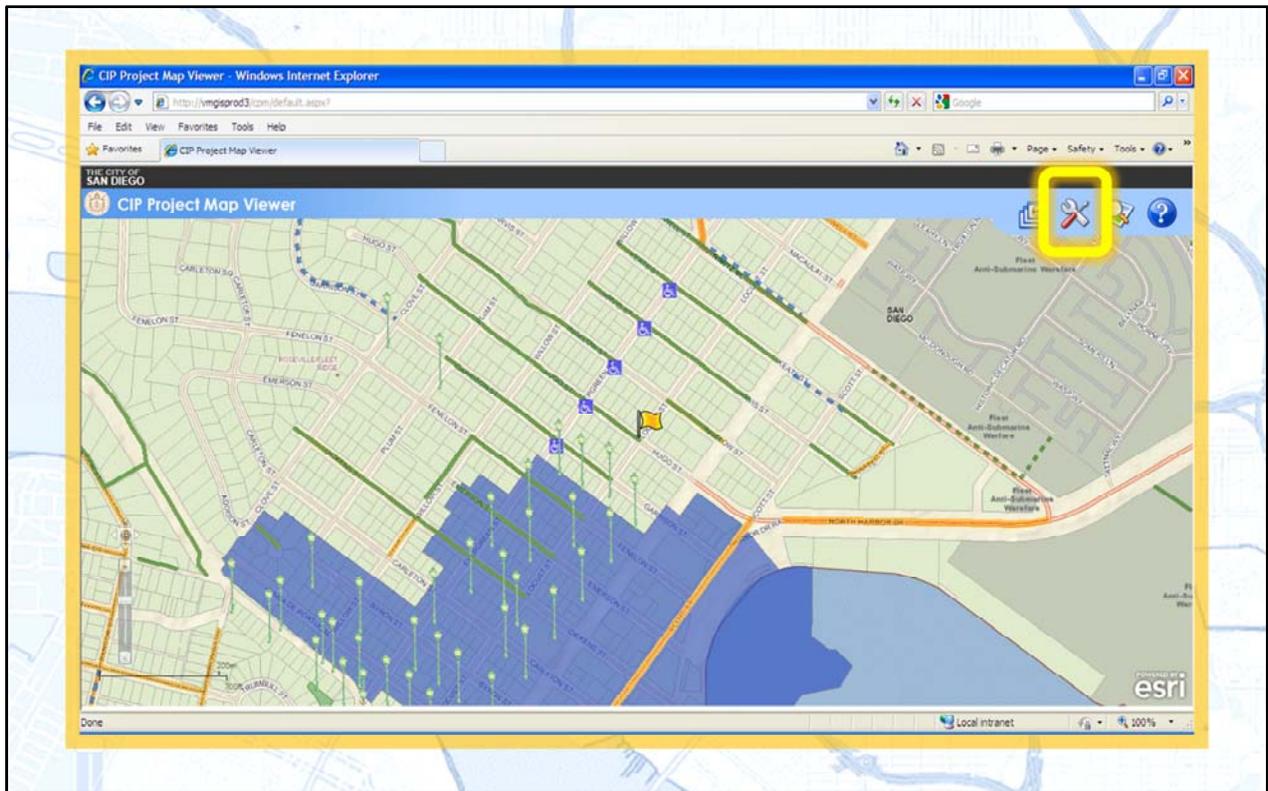

key-in the street address, or, for intersections, enter the first street name, tthe “&” symbol then enter the intersecting street name.

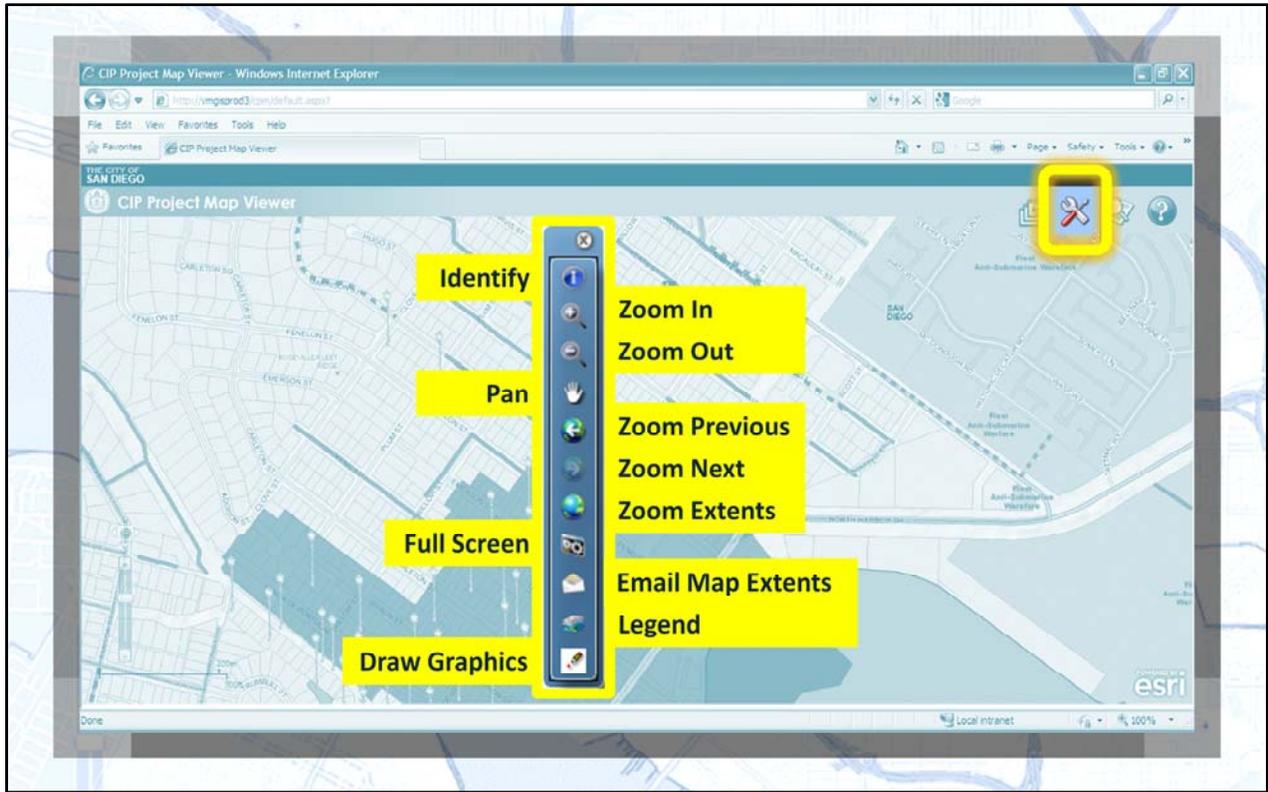

By clicking on the Search types, this provides you with other methods of finding your location.

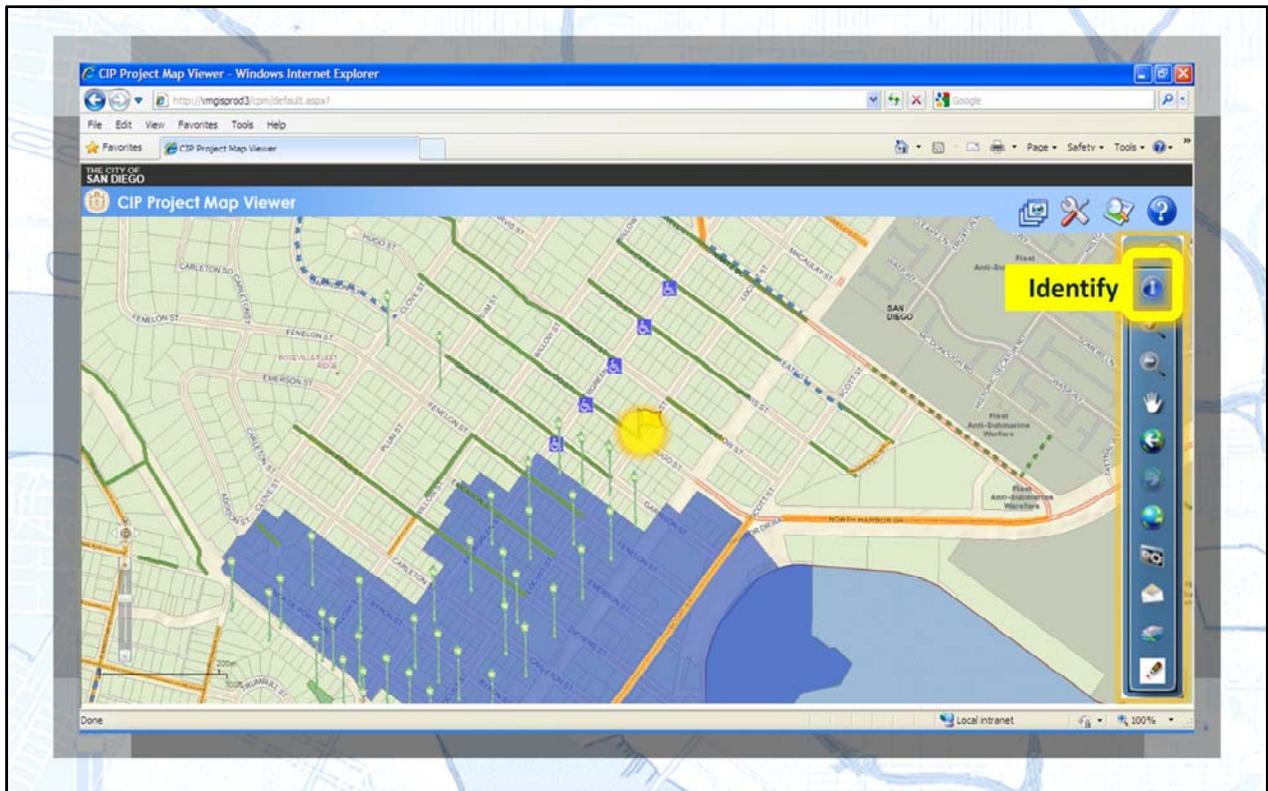

Click on Search to execute and on the upper right hand corner to close the search dialogue box.

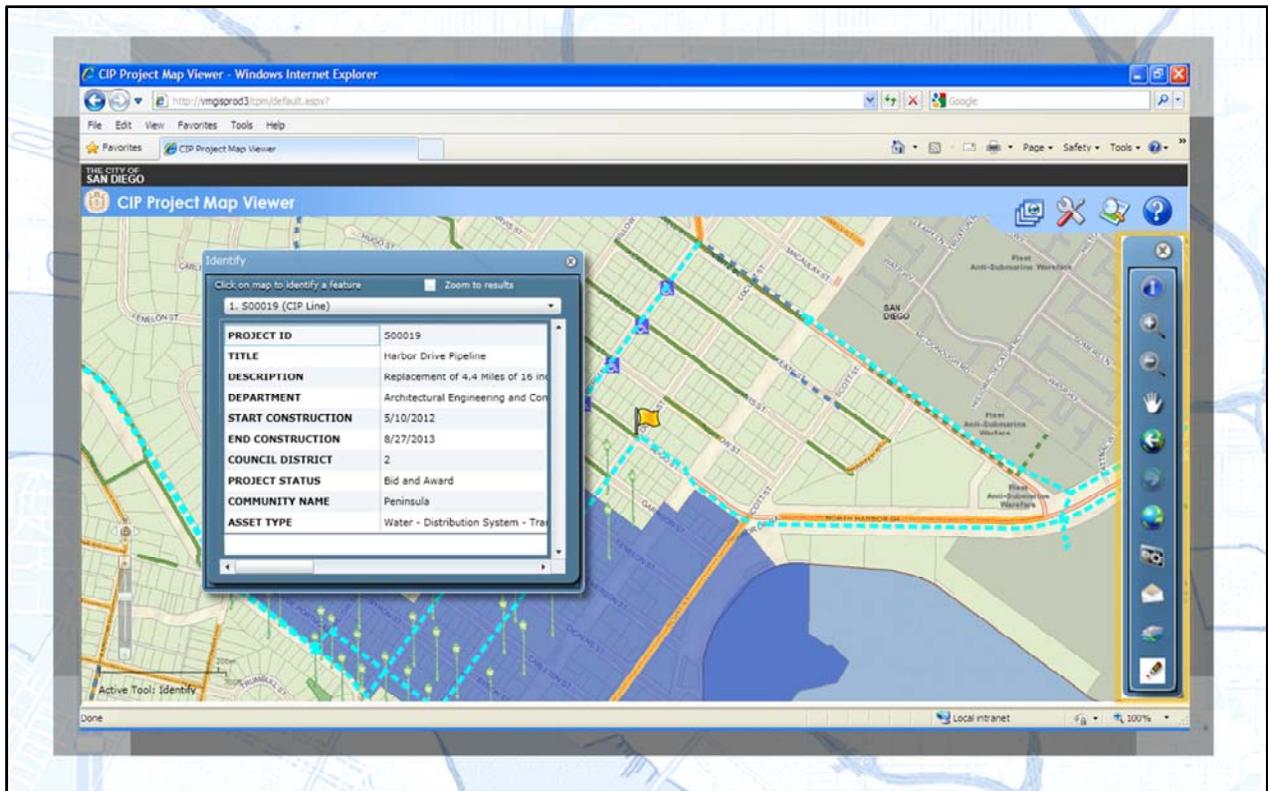

To display project information click on the Tool icon from the menu bar,

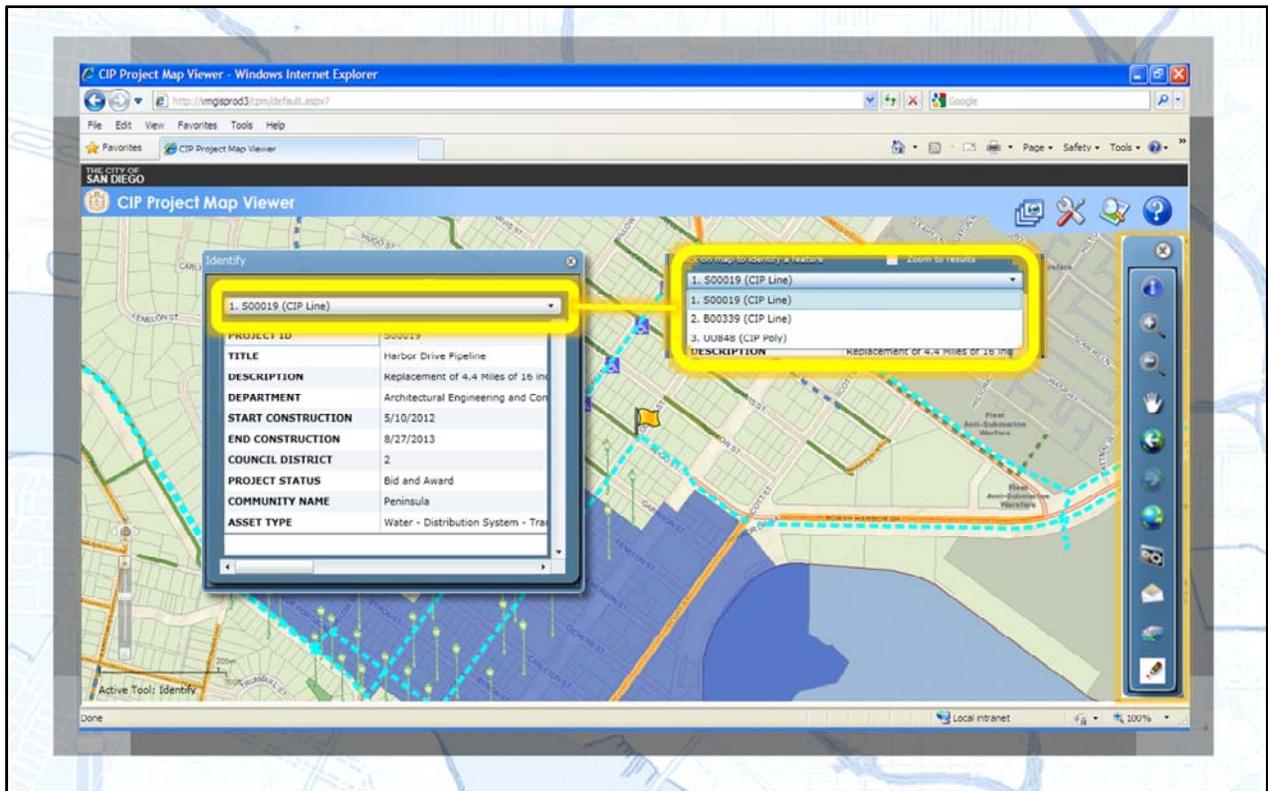

note all the other available tools,

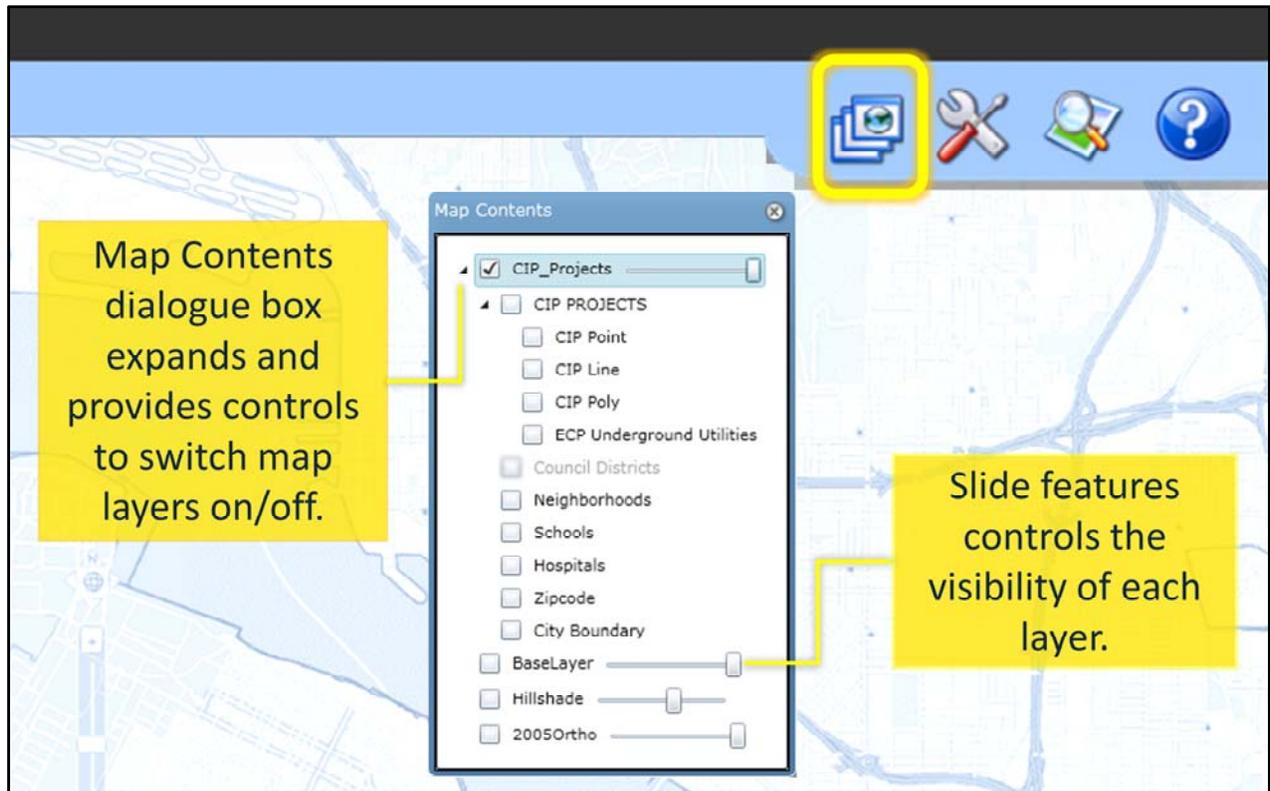

click on identify tool then either drag or click close to the area of interest

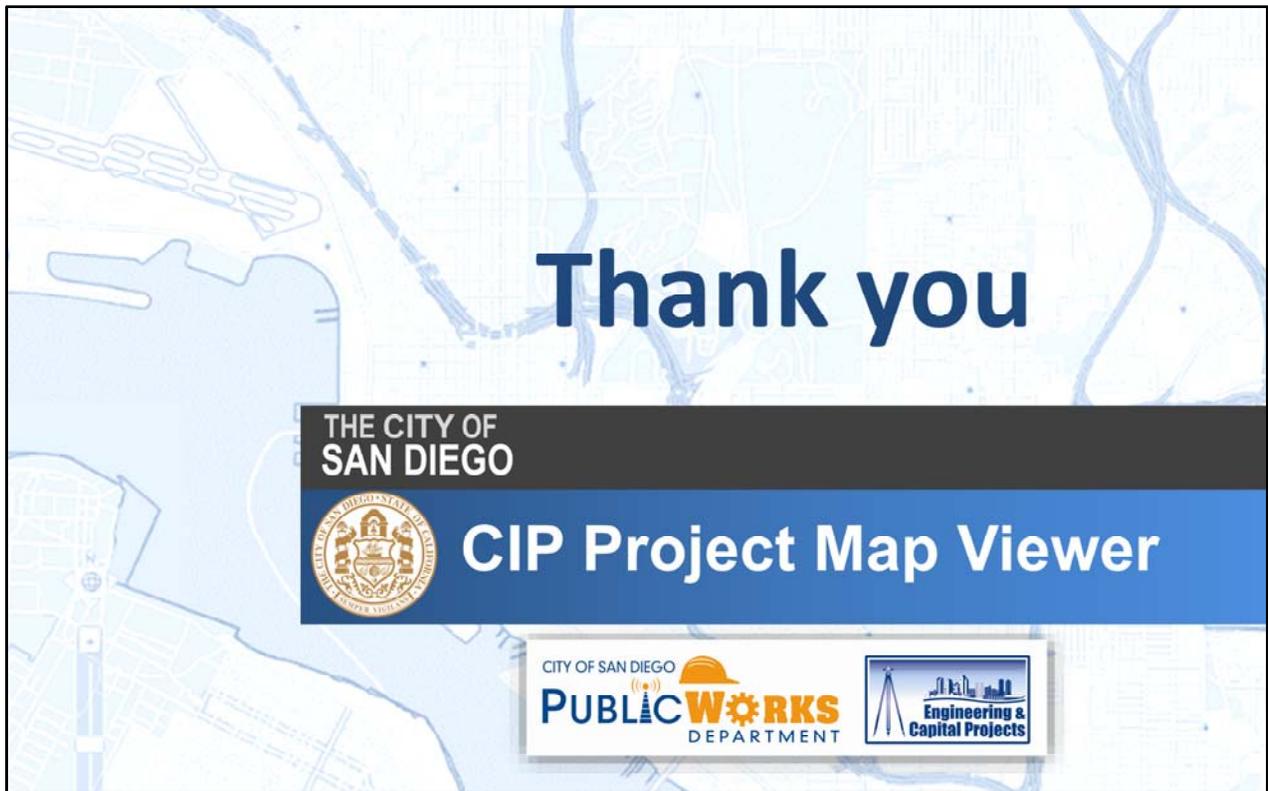

to display project information.

By clicking on the down arrow to select and display other projects in the same or surrounding areas.

The Map Layer icon activates the controls to switch map layers on or off and slide features that can gradually change a layer's visibility.

For more information visit the City of San Diego's Capital Improvements Program Webpage.  
Thank you for using CIP Project Map Viewer.
