Subject: Stadium Reconstruction Project, Number (437916)
Date: Tuesday, September 08, 2015 2:45:09 PM

Comments: The maximum hourly and daily emissions evaluation for the existing and new stadium is based on an NFL game. -which NFL game and where is the reference made?

SDAPCD has not developed quantitative significance thresholds for CEQA project -so the agency dedicated to air quality for CEQA projects hasn't a quantitative significance threshold but this EIR goes forward despite such?

It is BEYOND OBVIOUS that this effort at an EIR for a new stadium is problematic, open to litigation, and FAILS to address a 'quality of life' aspect of such an undertaking.
