

Public Information Meeting

For the City of San Diego's

Master Storm Water System Maintenance Program

What is Proposed

A Master Storm Water System Maintenance Program (MSWSMP) to guide long-term maintenance of storm water facilities throughout the metropolitan area of the City of San Diego. Maintenance activities involve the removal of sediment and vegetation from natural and concrete drainage channels, detention basins and outfalls to protect adjacent property from flooding.

Purpose of Meeting

Provide information and accept comments on the City's proposed MSWSMP. Although a Draft Environmental Impact Report (EIR) is currently undergoing public review, this meeting is not related to the environmental review process.

Learn About

- Types of storm water facilities and maintenance techniques
- Typical types of equipment used for maintenance
- Environmental effects and proposed mitigation
- Local, State and Federal permit processes
