At this time the following Message from the Mayor was taken up:
"May 2nd, 1927.

To The Honorable Common Council,
of The City of San Diego, California.
Gentlemen:

I am returning herewith Document #205305 being an ordinance making an appropriation for a specific kind of traffic signal for the intersection of Fifth and Market Streets, with my veto for the following reasons.

A signal is needed at this intersection but it should be of such a type that it can be synchronized with other signals installed in down town streets. The Waterhouse type, specified in the ordinance cannot be so synchronized.

This type of signal has been objected to for the reasons given above by the Police Department. Other signals of this same type now installed in the congested district have not been as satisfactory in the control of traffic as the Los Angeles type, and for the reasons given.

I do not believe any signal should be purchased without the approval of the departments that are responsible for handling traffic. The only object in placing signals is to handle traffic and the purchase of any signal failing to do this in a satisfactory manner is a waste of public funds. The synchronizing feature, in a City with blocks as short as these in San Diego's congested district is vital.

From informal reports on the signals of the Waterhouse type now installed down town I believe it will be only a short time before it will be necessary to remove them to outlying isolated corners and replace them with others that can be synchronized. Therefore I think it unwise to purchase the set provided for in the ordinance. The ordinance should be made to read to permit the installation of a type satisfactory to the Police Department.

John L. Bacon,
Mayor."

The roll call on the adoption of the ordinance notwithstanding the Mayor's Veto showed the following, to-wit: Ayes--None. Noes--Councilmen Bruschi, Dowell, Maire, McMullen and Seifert. Absent--None.
