The report of the Joint-Water committee in the matter of the proposed contract between the Southern California Mountain Water Company and the City was read and adopted and is as follows, to wit:

To The Honorable Common Council of the City of San Diego.

Gentlemen:

Your Joint-Water committee, to whom you referred the proposed contract between the Southern California Mountain Water Company and the City, begs leave to report as follows:

The contract was taken up by your committee with the President of said Company, and after consideration, has been agreed upon by your committee and by said Company.

The portions of the contract which were objected to by said Company in its communication to the Council, were overcome by proper modifications thereof, which modifications in no way jeopardize the interests of the City.

The contract as now submitted to you will accomplish what the people of the City desire, a new water distributing system and an abundant supply of wholesome water, and that at all times during the construction of the work the City will hold back more than enough money to complete the improvements; and also to protect the City during the construction of the work we have inserted a provision that in case the said Company should fail to go on with the construction of the work after entering into the contract its property should be forfeited to the City.

The payments have been arranged as follows: There is no payment to be made for any of the work performed until fifty per cent of the distributing system inside of the City has been constructed. At that time there is to be a payment to the Company of $200,000.00 and on Seventy-five per cent of the distributing system within the City being completed the Company is to receive $150,000.00 more, and when the whole of the distributing system within the City limits is completed, an additional $150,000.00; and when fifty per cent of the pipe line leading from the City limits to the meter house is completed, providing fifty per cent of the system within the City has been completed, and twenty per cent of the work beyond the meter house has been completed, $100,000.00 to be paid to the Company; and when the whole

of said pipe line is completed and forty per cent of the work beyond the meter house has been completed, the Company is to receive $100,000.00; and when all the system is completed, tested, and 1,000 inches of water delivered to the City and accepted, the balance of the money, to wit: $800000.00, shall be paid to the Company. This $800.000,00 and the title to the Company's property consisting of the Morena Reservoir, dam and water right to the extent of 5,500 inches, and the conduit and right of way from the Morena dam to the meter house, is held to insure the completion of the Contract. This is about the only material change in the contract, Section 24 remaining practically as it was.

Your Committee recommends that the Ordinance calling election be passed tonight, and that the contract be approved, and that the proposed ordinance authorizing the execution of the same be passed

Capps C.E. City Engineer of said City, who is a competent engineer and who has had successful experience in such work, of the cost of the construction of said water works and estimates of the cost of the acquisition by said City of said water right, reservoir sites, meter house site, and rights-of-way, which said plans and estimates have heretofore been returned and reported to said legislative branch of said City; and have been examined, considered, and adopted by said legislative branch of said City, and at the request of and under the direction of said legislative branch of said City have been filed in the office of the Board of Public Works of said City and are now on file therein, which plans and estimates are endorsed "Plans and estimates of the cost of construction of water works which the City of San Diego, California, contemplates constructing, and estimates of the cost of the acquisition of reservoir sites, meter house site, water rights, and rights-of-way which said City contemplates acquiring." and which said plans and estimates contain specifications and plans for and estimates of the cost of the construction of said water works and estimates of the cost of the acquisition of said water right, reservoir sites, meter house site, and rights-of-way, to which said plans and estimates containing said specifications special reference is hereby made: and

Your Joint Ways and Means Committee to whom was referred the report and recommendations of the Joint Finance Committee in the matter of reducing salaries &c herewith recommend

That the Board of Public Works and City Attorney be instructed to arrange with the Board of Supervisors for the confinement of City Prisoners in the County Jail.

That the Board of Public Works be instructed to investigate and report upon the advisebility of sprinkling and sweeping the Bituminen paved streets by contract

That the Board of Public Works be instructed to not sell gravel from the City Park, and that the services of a watchman of the gravel pit be dispensed with.

That the Board of Public Works be instructed to advertise for bids for furnishing water (either fresh or salt) and sprinkling the graded and macadam streets and report the bids to the Council for further instructions.

To the Common Council San Diego, Calif.

Gentlemen:

Your Ways and Means Committee to whom was refered the communication of the Board of Police Commissioners, in the matter of unpaid salaries for December, 1895. of officers Dow. Broadnax. and Northern report that in accordance with the opinion of the City Attorney herewith submitted the funds of the present fiscal year cannot be applied to the payment of these salaries. Your Committee think that a way out of the matter can be had by apportioning all back Taxes of 1895 and former years to the Delinquent Tax Fund and applying the money thus received to the payment of the warrants of Officers Dow. Broadnax and Northern and other outstanding warrants of 1895, in the order in which they are payable, and we therefore recommend that all monies received on account of Taxes for the year 1895 and years prior thereto be apportioned to the Delinquent Tax Fund and applied as above suggested.

Respectfully submitted.

All gutters shall be five feet wide and shall be constructed of bituminous rock two inches thick, laid upon the natural earth.

The earth bed upon which the bituminous gutter is to rest shall be graded to the required depth below the official grade of the street and in accordance with the stakes set by the City Engineer for that purpose. The surface of the sub-grade, or bed, shall be parallel to and conform in every respect to the cross section of the gutter when finished.

The sub-grade or bed shall be thoroughly rammed with rams or tamps of not less than twenty pounds in weight.— This ramming or tamping shall continue until the said sub-grade presents a firm and unyielding bed; all sand pockets or other soft or inferior spots shall be dug out and the holes filled up with good earth, such filling shall be thoroughly rammed and wetted; any part or all of the sub-grade shall be thoroughly wetted and rammed, if required in order to insure a solid bed; along a line parallel to and five feet from the curb line, there shall be neatly cut or excavated a trench one foot in depth and not less than one foot in width.

San Diego, California, Dec 7th, 1896.

To the Hon. Common Council
City of San Diego, Calif.

Gentlemen:

The undersigned, minority of your Joint Strut Committee, in the matter of Sidewalking and Curbing H Street, from 4th to Atlantic, herewith recommends that the final resolution ordering work on said Strut, be laid over for a period of 90 days. The reason for this recommendation is, the Strut is newly graded and a considerable portion of it is a fill of from 2 to 4 feet in depth, and the Strut should have the benefit of the winter rains before being sidewalked.

The request of the Railway Company, Spreckles Bros. Commercial Company and Geo. N. Hazzard and others that this work be postponed, we consider reasonable. These Parties are not objecting to the Sidewalks, they only ask that the Strut be left during the rainy season, and we therefore recommend that the matter be laid over.

Respectfully

Adjourned Meeting.

Council Chamber of the Board of Delegates of the City of San Diego, California, December 21st 1896.

Persuant to adjournment, a meeting of the Board of Delegates was held at 7:30 o'clock P.M. this day, with President Jones presiding:

Present-Delegates Baker, Altamirano, Chapman, Cady, Warner, Hakes, Baker, Paulsen, Campbell, Perrin, Nilisch, Dunkin, James, Jones, and Clerk Goldman.

Absent-Delegates Olmsted and Burgert.

The minutes of regular session held December 7th 1896 were read and approved.

Upon motion of Delegate Baker it is ordered that the communication from the City Engineer in re the construction of the Morena Dam, presented to the Board at its last session and filed, be taken from the files and spread upon the minutes.

Said communication is as follows, to-wit:

San Diego, Cal., Dec. 3d, 1896.

To the Honorable Common Council

Gentlemen:

I wish to make a statement to your Honorable Body regarding some of the construction of the toe wall of the Morena Dam.

The upper thirty-five (35) feet of this wall is, in my opinion, very defective.

This portion of the wall was constructed without the supervision of a Civil Engineer or other competent person; which fact had I been aware of I would have strenuously objected to. It was represented to me, however, by Mr. Babcock that Mr. H. E. Green, a Civil Engineer, in whose ability and integrity I have great confidence, would be continuously engaged in superintending the work of construction on this most important part of the dam,

during my absence. It was not until November 17th and after the completion of this portion of the dam that I had an intimation that Mr. Green had not been upon the work; my suspicions were at once aroused as to the quality of the work. Upon arriving at the dam on November 20th I found my suspicions verified. I ascertained that Mr. Green had, with the exception of two half days, been absent from the work since November 1st, having been ordered to make surveys of wagon roads and to do other unimportant work, sometimes being eight miles from the dam, thus leaving the dam with incompetent supervision.

I at once proceeded to inspect the work and found filteration through the wall and numerous serious leaks under and along the sides and along and through the wall rock, with comparatively no pressure.

Upon examination of the upper side of the wall and on the north side of the stream I found a rotten seam of decomposed granite and earth with tree or brush roots still in it, and running behind the dam, indicating the carelessness or ignorance of the persons in charge of the work. After extracting two large pieces of gunny sack that had been rammed into it for the evident purpose of either arresting the flow of water or to conceal the seam (I am of the latter opinion) I was enabled to insert a drill spoon at least two (2) feet and draw out vegetable matter. It at once became very evident that proper work had not been done, and relying upon the unfailing property of water for finding holes I ordered the gate in the temporary flume opened to allow the water to rise behind the dam, to test the work. This test developed a copious filteration and leakage through the masonry wall (supposed to be solid masonry from 16 to 30 feet thick) with but four (4) feet pressure in places, and several serious leaks along and through the seams in the wall rock as well as along the contact seam appeared, varying in the quantity of water discharged from a mere

percolation to a gushing stream, the pressure heads ranging from three to thirty feet, the largest leaks having but twelve or fifteen feet heads. A number of these leaks were coming through rotten seams in the wall rock and carrying decomposed vegitable matter, depositing it in black streaks on the bed rock and upon the face of the wall, thus indicating that the wall rock had not been thoroughly explored and all vents and seams completely cleaned out and filled with cement.

The leakage and filtration through the masonry under this very low pressure head indicates that a sufficient amount of mortar had not been used to completely embed the stones and thoroughly fill all of the interstices or a sufficient amount of mortar may have been put into the wall, but not properly distributed, being an excess in some places and a deficiency in others.

I consider these defects of a very serious nature when it is borne in mind that the head or pressure of water acting on this portion of the wall will be from 150 to 185 feet instead of from 1 to 30 feet as above stated, this greatly increased pressure would augment the volume and force of the water passing through these faulty points, at the same time increasing the area of the apertures by carrying out all soluble matter, thereby making it possible to discharge the reservoir, or at least occasion a very serious loss of impounded water.

I think it possible in time that the very small leaks may become stopped by the deposition of sand and silt carried into them by the flowing water, but this is problematical and not positive, besides it is not in accordance with the substantial construction called for in the specifications.

I attribute this faulty work, not to a desire of Mr. Babcock to do poor work or to curtail in

cement, but solely to a zealous desire to complete the work before the winter rains, and from an over confidence in his own ability and that of his foreman.

I have officially refused to accept this work and have not as yet received any intimation from Mr. Babcock or the Company that they will remedy it. Mr. Babcock is proceeding with the work and remarked to me, when I saw him last, that if the City did not want it when it was completed they did not need to take it. (Meaning the dam.)

This defective work can be easily remedied and if the Southern California Mountain Water Company really intends to do the substantial work called for in the specifications, they can not refuse to comply with them.

Yours respectfully,
Edwin M. Capps.
City Engineer.

A Message, from the Mayor vetoing the Ordinance establishing Water Rates for the year begining July 1st 1897, was read, and on motion of Delegate Barker, was ordered filed.

The said veto Message reads as follows:-

San Diego, Calif., March 12th 1897.

To the Honorable Board of Delegates
of the City of San Diego,
Gentlemen:-

I herewith respectfully return to your Honorable Body without my approval thereof, the accompanying proposed "Ordinance No. ——," entitled, "An Ordinance establishing the Water Rates in the City of San Diego, State of California, for the year beginning July 1st 1897, and ending June 30th 1898, for the following reasons:-

1st. That the said proposed Ordinance is unjust as stated plainly in my veto of one year ago, wherein I then informed your Honorable Body, but you have apparently paid no attention to same, that:-

"The said proposed ordinance would cause the smallest of babies to be charged the same water-rate as a full grown person. A more unjust and hard-hearted proposition could not be evolved by the mind of man as part of a Water Rate Ordinance. All children under the age of 6 years should be exempt and all between the ages of 6 to 12 years should be charged half-rates. With my message before you, gentlemen, asking that

babies be not charged the same water rates as grown people. I can not understand how you nevertheless allowed the same to remain in said proposed ordinance, for a more palpable outrage could not be perpetrated in fixing water-rates. I sincerely trust that you will reconsider your action and adopt a more equitable schedule of rates, that you will not charge the poor man for each of his babies while at the same time you reduce the rich man's rates by lowering the rates on his lawns, that you will not cause the poor mother with a nursing babe at her breast to worry at your otrageous full water-rate tax against her little darling while at the same time you reduce the water-rate of the liquor saloon.

It is not right, gentlemen, and I ask you calmly stop and consider my recommendations with that respect and courtesy which they deserve, for I am the Mayor of the City of San Diego, and I propose to protect the interests of the people, and I do not intend to allow my messages to be pigeon-holed and filed without calling the peoples' attention thereto".

2nd. That the said proposed ordinance provides that it shall take effect after its passage and approval, therefore it seems that the Council desired it to be approved by the Mayor before it could take effect. The ordinance proposes to fix rates and compensation for all companies and persons furnishing water to the City or its inhabitants and therefore does not apply strictly to any one Company. An ordinance should be general in its effect and there should be no undue discrimination therein. It should apply to all alike.

The proposed Ordinance attempts to make a contract with the present Water Company for fire hydrants by fixing an unreasonable rate for that service when the same is not made in the manner provided in the City Charter. It is well known that the San Diego Water Company collects monthly from the City for fire hydrants under no other contract than that in the ordinance, and that this is in direct conflict with the provisions of the City Charter.

The water rates should be at least 25% lower than the rates established by the ordinance, which would be more than interest upon the investment by the water Company and also pay its running expenses. It is well known that the plant of the present Company furnishing water could be duplicated for less than $500,000. and interest on that sum should not exceed $50.000. per annum, and after adding

expenses and deterioration to that sum we find that rates allowing the Company $75,000. a year would be ample. I do not believe that people should be compelled to pay exhorbitant prices for water when their representatives have the fixing of such rates.

It is too often the case that the people's rights are not properly protected while they are at all times assaulted by those who expect to gain a direct benefit therefrom.

The prices you have named for water compels the average family in this City to have to pay more for water than for bread. Such a condition should not exist, but it does, although it is in your hands to change it.

It seems that each year you do not pass the Water Ordinance until the last night in February. Why such delay occurs, I do not understand, but when my veto was made of last year's Ordinance, it was stated that it should have been sent in during the month of February, but when the ordinance is not passed until the last night of February and is not signed by the Presidents of the two Boards until March 1st and does not reach me until March 2nd, I do not see how I can veto it during the month of February, but I do so now after careful consideration of its provisions during the ten days allowed me by law in which to do so.

The way my veto message was considered one year ago, it seems that you do not care what the opinions of the Mayor of this City are, that because the Supreme Court decided that the Board of Supervisors of San Francisco can fix water rates without the approval of the Mayor of that City, you apparently concluded that the Common Council of this City could do likewise, but in this, my opinion as a lawyer leads me to believe you are mistaken because the decision of the Supreme Court relative to the Board of Supervisors of San Francisco can not be made to legally apply to the Common Council of the City of San Diego, because said decision is not exactly in point, especially when your own ordinance expressly provides that it is not to take effect until after its approval by the Mayor, and, it seems that when the Mayor fails to approve of it, you then say his approval is not necessary to make the Ordinance legal. I say that it is necessary, and until the Supreme Court has decided a case exactly in point, it is not the proper thing for the Common Council of the City of San Diego to raise that question, Let the Water Company do that, it may be their business, but it is not ours.

The people of the City of San Diego have paid to the

water Company over one million of dollars during the past ten years, and yet your ordinance proposes to allow said Water Company to go on collecting over $100,000. a year on a plant which can be duplicated for $500,000. If it was not in your power to reduce same to what would be just and equitable, it would be different, but it is in your power, and it should be done.

For the reasons herein stated and shown that a private Water Company has received over one million dollars during the past ten years and it is proposed to allow it to receive over $100,000 a year more until the City is relieved from its monopoly, hence I have favored and still am in favor of the City owning its own water system, because when it does, (and I am in favor of the early laying of the City's own pipe system over the City), then will come an end to compelling the people of San Diego to pay more for water than for bread, and with municipal ownership will come cheap water and the many good results therefrom to the people.

Respectfully
Wm H. Carlson,
Mayor of the City of San Diego.

The Report of the Special Committee to whom was referred the proposed contract for the lease of a garbage crematory was read and adopted, on motion of Delegate James.

Said Report reads as follows:

San Diego, Cal., March 22nd 1897.

To the Honorable Common Council, San Diego, California.

Gentlemen:-

Your Special Committee, to whom was referred the proposed contract between the City and the Dixon Sanitary Crematory Company of Findlay, O., for the lease of a garbage crematory, with instructions to investigate said contract and make such additions and alterations as would in their judgment be of benefit to the City, herewith report as follows:-

Your Committee met on March 11th 1897, and after due consideration decided to recommend the following change and addition to the proposed contract:

That the amount of land upon which said Crematory is to be located shall consist of 10,000 square feet instead of of 5,000 square feet.

That a paragraph be added to said contract as follows:-

And that if only ten (10) tons of said garbage, nightsoil, dead animals, etc. are cremated in one day, the said Crematory, whether run continuously to its full capacity or not, will cremate the same at a cost of fuel not to exceed seventy-five cents (#.75) per ton with the price of crude oil at not to exceed #1.50 per barrel, or if coal be used for fuel with the price of coal not to exceed nine dollars (#9.00) per ton.

After considering the specifications for said work it was decided to recommend the following additions:

If desired by the City Engineer, the floor of the building shall be constructed from twelve inches (12") to eighteen inches (18") above the top of the furnace, instead of even with the top of the furnace, as shown upon the hereto attached drawings.

A durable and substantial coal bin of not less than ten (10) tons capacity shall be constructed inside of the building and at the point the City Engineer may direct.

The Committee met again March 19th 1897, for the purpose of considering the contract in regard to the price asked by the Company for the Crematory, as set forth in said contract, and it was unanimously voted to make an offer to the Dixon Company of #11,000.00; a sub-committee being appointed to make such offer to the Dixon Company and report to this Committee.

Subsequently at another meeting of the Committee called by its Chairman the Report of the sub-committee was received to the effect that the Dixon Company would not accept the #11,000.00 offered, and would build the proposed Crematory for the price named in the Contract, to wit:-#12,000.00 and for no less amount. Thereupon after careful consideration the

Committee decided that at the price demanded the Dixon nevertheless was the best Crematory under consideration.

After having given the matter careful consideration, your Special Committee believes that the proposed contract with the Dixon Sanitary Crematory Company, together with the changes and additions proposed by the Committee, is the most advantageous one the City could enter into, provided the Common Council deems it advisable to procure a Crematory for the disposal of garbage.

Therefore your Committee makes the following recommendations:

If the Common Council deems it advisable to procure a Crematory for the disposal of garbage we would recommend that a Dixon Sanitary Crematory be procured in accordance with the terms of the Contract herewith presented, together with the changes and additions made by your Committee, which we believe will add to the usefulness of the Crematory
