ORDINANCE NO. 5366.

AN ORDINANCE REGULATING THE MANNER OF INSTALLING AND ERECTING SIGNS AND PROVIDING FOR THEIR INSPECTION.

BE IT ORDAINED By the Common Council of the City of San Diego, California, as follows:

Section 1. Sign as used in this Ordinance shall be deemed to mean any sign, sign board, or any sign device of any character, attached in any manner or placed in front of, or upon, any building, or placed or maintained on or above any sidewalk, street, or public property.

Section 2. It shall be unlawful to erect, place, suspend, attach, or maintain or cause to be erected, placed, suspended, attached, or maintained, any sign in violation of any of the provisions of this Ordinance.

Section 3. The Building Inspector is hereby named as the proper official to enforce the provisions of this Ordinance and is hereby given authority to make such inspections and take such steps as in his judgement may be necessary to enforce this Ordinance, except that the provisions relating to electric wiring and installation shall be enforced by the City Electrician.

Section 4. It shall be unlawful to erect any sign as defined in Section 1, or

mentioned in any part of this Ordinance without first obtaining a permit from the Building Inspector, unless it be particularly stated in this Ordinance that the sign in question requires no permit. The fee for such permit shall be the same as charged for other permits for work of equal value, as stated in Section 7, Ordinance No. 4670, known as the "Building Ordinance."

Before any permit is issued for any sign, a sketch showing the sign and its proposed location and construction shall be filed with the Building Inspector and in case of an electric sign a similar sketch shall also be filed with the City Electrician, and before any permit shall be issued the approval of the inspector or inspectors must be obtained.

Other than the permits from the Building Inspector and Electrical Inspector, no other permits shall be necessary unless specifically required by this ordinance.

Section 5. It shall be lawful to erect signs within the fire limits projecting beyond the face of the building not more than six inches without obtaining a permit from the Building Inspector. It shall be lawful to erect signs outside the Fire Limits projecting not over three feet beyond the property line over any street, sidewalk, or public property, without obtaining a permit from the Building Inspector.

Section 6. Any sign projecting beyond the property line over three feet must be an electric sign.

Section 7. Electric signs, in order to be construed as such, must be provided with not less than one lamp of eight candle power for each square foot of sign surface. Smaller or larger lamps may be used provided that the equivalent of eight candle power per square foot of sign surface be maintained.

When electric signs are installed, an additional permit must first be obtained from the City Electrician, as hereinafter provided.

Section 8. No sign, whether already in position or hereafter erected shall be placed, maintained, suspended on or attached in any manner to any fire escape or stand pipe in the city of San Diego.

Section 9. No sign shall be placed on any building above the level of the first floor windows in such a manner as to project in front of any window opening.

Section 10. No sign shall project over or beyond the property line to a greater extent than six inches unless so specified in this section. Projecting signs extending six inches or more over the property line must be hung approximately at right angles with the face of the building, that is, the smallest dimension of the sign must be approximately parallel with the property line, except at corners, when signs may be hung in such a way as to make approximately the same angle with both streets.

When the bottom of sign is more than seven feet and less than ten feet above sidewalk grade, projection must not exceed twelve inches.

When bottom of sign is ten feet or more and less than twelve feet above sidewalk grade, projection must not exceed three feet.

When bottom of sign is twelve feet or more above sidewalk grade the sign may project to curb, provided that

Any sign, projecting over four feet six inches from the building, shall not have a height, measured from the highest to lowest point of sign, to exceed four feet six inches, except

When any electric sign is so hung that its lowest portion is at least twenty feet above the sidewalk, it may have a height not to exceed eight feet.

Section 11. It shall be unlawful to suspend any additional sign below any existing sign or any sign hereafter erected unless the total height measured from the bottom of the suspended sign to the top of the sign from which it is suspended shall come within the provisions of this Ordinance as required for single signs, and other conditions for single

signs are complied with, considering the combined sign as a single sign.

All overhanging signs which project more than five feet from the face of any building shall be hung by a hinge connection in such a manner that the sign may be swung back flat against the building.

Section 12. Nothing in this Ordinance shall be construed as prohibiting the use of decorations or temporary banners used during times of general celebrations; or as prohibiting the use of canvas banners stretched across the street for a period not to exceed fifteen days when a permit for the use of such banners is granted by the Common Council and a permit obtained from the Building Inspector after such grant by the Common Council.

Section 13. No sign shall be placed on any pent-house within the City limits unless such sign shall measure less than fifteen feet from the highest point of the sign to the pent-house, and such sign shall not extend beyond the walls of the pent-house.

Section 14. No sign shall be placed on the roof or any part of any building extending to a greater height than thirty-six feet above the part of the building on which it is supported unless such building be of class "A" construction, in which case sixty feet shall be the maximum height, the measurements in such case to be taken from the highest point of the sign. A sign placed on the roof of any building shall not come nearer than three feet (measured horizontally) from the fire-wall, and the lower edge of the sign in any case must be maintained at least six feet above the roof of that part of the building above which the sign is placed.

Section 15. When any sign exceeds the height of sixteen feet, measured from the portion of the building on which it rests, such sign must be of open work construction.

Section 16. The location of any sign shall be subject to the approval of the Building Inspector.

Section 17. Any sign placed on or above the roof, pent-house or any part of the roof of any building must be satisfactory to the Building Inspector and constructed of fire proof material.

Section 18. Supports for all signs of every description shall be figured with a factor of safety of six. When guy wires are used on swinging signs, such guy wires must be provided with turnbuckles in order that these guy wires may be properly tightened at all times.

Section 19. All metal guys, brackets, and other metal parts used in connection with signs must be of galvanized or non-corrosive materials or must be treated with at least three coats of non-corrosive paint.

Section 20. Every sign shall be maintained in good repair subject to the inspection and approval of the Building Inspector and the Electrical Inspector. Where any sign is not kept in good repair it may be ordered removed by either of the above mentioned Inspectors, this shall apply to any sign whether already in position or hereafter erected and it shall be a misdemeanor not to remove such sign within thirty days after receipt of written notice from either the Building Inspector or the Electrical Inspector.

Section 21. It shall be lawful to maintain clocks on the extreme outer edge of the sidewalk next to the curb line provided the size of the bases of such clocks do not exceed two feet in any outside dimension. The bottom of the portion of the clock carrying the dials must be at least eight feet above the sidewalk, and its supports must be of fire proof and substantial construction.

Section 22. Nothing in this Ordinance shall be so construed as to prohibit the painting of any sign on the wall of any building.

Section 23. No sign shall be maintained on any sidewalk except as provided by this Ordinance.

Section 24. The Building Inspector shall have authority to order the removal of

any sign maintained in violation of any provision of this Ordinance. It shall be a violation of this Ordinance to refuse to remove such sign within thirty days after the service of such notice of removal.

Section 25. Electric signs, in addition to conforming to the before mentioned requirements must also comply with the provisions in the following sections:

Section 26. Wires carried on the outside of sign structures must be run in approved metal conduit or approved lead sheathed armored cable. Wires within structure of sign must be double braided, rubber covered, and may be carried within one-half inch of each other and of surrounding metal. Where such spacing is impractical, such wires may be cabled.

Section 27. Signs must be constructed entirely of metal or other non-combustible material. In case of ornamental scroll work or similar design, where impracticable to support wires as above provided, they may be separated from metal by section of porcelain or glass not less than one-eighth inch in thickness.

Section 28. Sheet metal must not be less than No. 26 B & S gauge.

Section 29. Signs must be braced by angle iron of such thickness and so placed as to secure sufficient strength and rigidity.

Section 30. If the terminals of receptacles are not the enclosed type, the receptacles must be so constructed that the terminals will be at least one inch from surface wired over. Wires must be soldered to such terminals and exposed parts treated to prevent corrosion.

Section 31. Bottom of sign must have at least one-quarter inch drainage hole for each square foot of its surface.

Section 32. Where wires cross each other, pass out of letters or into cut-out boxes, they must be protected by approved tubes or bushings.

Section 33. Where wire not inferior in size and insulation to approved No. 14 B & S ^{gauge} is used, connecting direct to standard sockets or receptacles, not over 1320 Watts at 110 Volts or equivalent shall be dependent upon final cutout.

Section 34. Signs must have the maker's name or trade mark permanently attached to the exterior.

Section 35. All electric signs, except theatre signs shall be burned at least two hours each night except Sunday; all signs not so burned shall be removed upon order of the City Electrician.

Section 36. The fee for electric inspection and permit shall be:

Signs containing 25 lamps or less \$1.00

Signs containing 26 lamps or more \$2.00

Section 37. All Ordinances or parts of Ordinances in conflict with the provisions of this Ordinance are hereby repealed.

Section 38. Any person, firm, or corporation, violating or causing to be violated any of the provisions of this Ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punishable by a fine of not less than twenty-five (25) dollars or more than two hundred (200) dollars or by imprisonment in the City jail not more than one hundred (100) days or by both such fine and imprisonment.

Section 39. This Ordinance shall take effect and be in force thirty (30) days from and after its passage and approval.

ORDINANCE NO. 5436.

AN ORDINANCE REGULATING THE USE AND PROVIDING FOR THE INSPECTION OF
STEAM BOILERS IN THE CITY OF SAN DIEGO, AND REPEALING ORDINANCE NO. 3862,
KNOWN AS "AN ORDINANCE REGULATING THE USE OF STEAM BOILERS IN THE CITY
OF SAN DIEGO, CREATING THE OFFICE OF INSPECTOR OF STEAM BOILERS PRES-
CRIBING THE DUTIES OF SUCH INSPECTOR, AND PROVIDING FOR HIS COMPENSATION."

BE IT ORDAINED by the Common Council of the City of San Diego, California, as follows:

Section 1. There shall be a Boiler Inspector appointed by and holding office at the pleasure of the Common Council. Such Boiler Inspector to be under the supervision and juris-

diction of the Building Inspector.

Section 2. The person appointed to such office shall be a practical boiler maker, and shall have had at least three years experience as such, or shall have had at least three (3) years experience installing and operating boilers and must in any case be capable of making thoroughly such tests and inspections as required by this Ordinance.

Section 3. The said boiler inspector shall give a bond to the City of San Diego in the penal sum of one thousand (1,000) dollars with sureties to be approved by the Auditing Committee of said City, conditioned for the faithful and impartial performance of such duties of his office as are now, or may hereafter be prescribed.

Section 4. Said boiler inspector shall carefully inspect and test every boiler or steam generating apparatus or any other apparatus under pressure requiring inspection under this Ordinance, as well as all attachments and connections belonging thereto, located within the City of San Diego, at least two times in each year unless otherwise hereinafter provided.

The Boiler Inspector may require that either or both of the inspections be a hydrostatic test, if in his judgment such test be necessary.

Section 5. The term "Steam Boiler" as used in this Ordinance shall mean any closed vessel in which steam is generated and shall include all power boilers of every description, all non-power boilers such as are used for steam heating, pressers, vulcanizers, small boilers on peanut and popcorn apparatus, and boilers of every description.

The term "Attachments" as used in this Ordinance shall be taken to mean all tanks, pipes, or apparatus of any description which is subjected to steam pressure.

The Term "Power Boiler" or "Boiler used for power" as used in this Ordinance shall mean any boiler carrying or intended to carry a steam pressure equal to or exceeding ten (10) pounds per square inch.

Section 6. All tanks in which compressed air or gas is stored or used under pressure shall be subject to the same inspection as required by this Ordinance for steam boilers used for heating purposes. But this shall not be construed as requiring inspection of "Presto-lite" and similar tanks, gas tanks such as used by doctors and dentists, or carbonic acid gas tanks in which gas is stored and regularly shipped by the manufacturer.

Yearly inspection of tanks subject to pressure will be required, but when several tanks are connected to one system or one compressor, a single fee shall be charged for the inspection of the system.

Section 7. Steam Kettles under pressure, mangles, steam generators for heating purposes only, and steam generating apparatus not used for power shall be inspected at least once each year and inspection twice each year will not be required except as provided in this ordinance, provided, however, that any boiler carrying a steam pressure of ten (10) pounds or over per square inch, shall be considered as being a boiler and used for power and shall be inspected accordingly.

Section 8. Before any steam boiler shall be installed within the City of San Diego, a permit for such installation must first be obtained from the Building Inspector, who shall not grant such permit if there is a reasonable doubt that the boiler, method of installation, or location is a dangerous one.

Section 9. No Boiler or other apparatus requiring inspection under this Ordinance shall be used until it shall have been approved in writing by the Boiler Inspector.

Section 10. Whenever the Building Inspector or the Boiler Inspector shall find any steam boiler, or tank, or apparatus attached thereto, which in the opinion of either of the Inspectors is in an unsafe condition, the Inspector discovering such condition shall at once stopped, and such boiler, tank or apparatus order the use of such boiler, tank or apparatus shall not be used again until put in a safe condition and a permit to use such boiler, tank or apparatus shall have been issued by the Boiler Inspector, who shall charge the usual inspection fee for such permit.

Section 11. Whenever in the opinion of the Boiler Inspector it is proper to inspect a boiler, or other apparatus hereinafter mentioned, the Inspector shall notify the owner or person in charge of such boiler, or other apparatus, of the time when an inspection or re-inspection or test will be made, at least five days before the examination proposed, and appoint a date when such inspection or re-inspection will be made. The manner of the inspection shall be substantially as follows:

Said Inspector shall have the option of making the hammer test, or the hydrostatic test, or both. If the hammer test is used, the examination shall be upon every part of the boiler, including all fittings and attachments. If the hydrostatic test be used, each boiler or steam generating apparatus shall be tested by hydrostatic pressure, such hydrostatic pressure to be not more than twenty percent (20%) greater than the safe working pressure. The certificate of inspection shall state the maximum pressure at which any boiler or steam apparatus may be worked. In case a defect shall be discovered in any boiler, or attachment thereof, or any other apparatus referred to in this Ordinance, said Inspector shall report the same to the owner, or person in charge, or to the user, and state in writing what the defects are, stating the particular locality in which the defect may be found and the nature of the repair required, and no permit to operate or to continue the operation of such boiler or other apparatus shall be granted until such defects have been remedied to the satisfaction of the Boiler Inspector.

Section 12. All boilers, or other apparatus, which are to be tested by hydraulic pressure, shall be filled with water by the owner or user thereof, and such owner or user shall furnish the necessary labor required to work and handle the pump in applying the test. If any leak occur in any such boiler or other apparatus, which prevents a successful test, it shall be the duty of the owner or user of the same to forthwith repair any and all such places of leak, and upon such repair being made, to notify the boiler inspector, who shall thereupon make a second test. If upon making the second test, the boiler or other apparatus is still defective, it shall be the duty of the Inspector to collect an additional inspection fee, but in no case shall he give a certificate until fully satisfied of the safety of the boiler, or other apparatus.

Section 13. All boilers must be inspected internally and externally and given a hydrostatic test before being enclosed with any brick or masonry, and it shall be unlawful to so enclose a boiler until after such inspection. All boilers carrying more than five (5) pounds of steam, must be hung either on side lugs, or by buckles and hooks, suspended from steel "I" Beams, or on steel rails, and all such supporting members shall be figured with a factor of safety of at least six. Any stationary boiler carrying more than five pounds of steam shall not be supported by a stand base ~~at the base~~ at the back or bottom of the shell, but must be hung or suspended as provided in this section.

Section 14. Every boiler or tank under pressure must be provided with a pressure guage and the dial of such guage must register at least one and one-half ($1\frac{1}{2}$) times the maximum pressure allowed on the boiler or tank.

Where a guage is used on steam boiler there must be no valve between the guage and the boiler except the shut-off belonging to or near the guage. A proper siphon or similar device must be installed to keep the guage and tube filled with water.

Section 15. Every steam boiler must be provided with a water column so constructed as to properly indicate the true water level in the boiler and such water column must be provided with a shut-off valve at both top and bottom and a blow-off valve at bottom.

Section 16. Every steam boiler must be provided with the proper blow-off not less in size than one inch pipe or more than two and one-half ($2\frac{1}{2}$) inch pipe and must be protected from direct action of the fire in a manner approved by the Boiler Inspector.

When pressure of boiler exceeds one hundred thirty-(130) pounds, two blow-off ^{valves} must

be provided.

Every blow-off ~~valve~~ must be provided with a regular blow-off valve; globe valves or valves of similar type will not be permitted.

No blow-off shall connect direct with the city sewer; but must empty into a sump which may empty into the sewer.

Section 17. Any opening in a boiler must be reinforced to give the following thickness if the plate alone is not of sufficient thickness; or if the sides of opening are not flanged or otherwise supported in a manner satisfactory to the Boiler Inspector.

Size of opening in inches.	1	1½ to 2	2½ to 4	4½ to 6	7 to 8	9 to 10	12.
Thickness in inches	3/8	7/16	7/8	1	1¼	1½	1 5/8

Section 18. In determining the pressure to be allowed on any steam boiler or tank the following conditions shall be assumed:

In estimating the strength of the longitudinal seams in the cylindrical shells of boilers the Inspector shall apply two formulas. A and B:

"A" =
$$\frac{\text{Pitch of Rivets} - (\text{Diameter of holes punched to receive the rivets})}{\text{Pitch of Rivets.}}$$

"B" =
$$\frac{\text{Area of hole filled by rivet X No. or rows of rivets in seam X shearing strength of rivet.}}{\text{Pitch of rivets X thickness of sheet X tensile strength of sheet.}}$$

Take the lowest of the percentages as found by formulas "A" and "B" and apply that percentage as the "Strength of the Seam" in the following formula "C", which determines the strength of the longitudinal seams:

"C" =
$$\frac{(\text{Thickness of sheet in parts of inch}) \times (\text{Strength of seam as obtained by formula "A" or "B"}) \times (\text{Ultimate strength of iron stamped on plates.})}{(\text{Internal radius of boiler in inches}) \times (5 \text{ as a factor of safety}).}$$

Safe working pressure.

When no tensile strength is stamped on the boiler, the ultimate strength of the iron or steel shall be taken as 50,000 pounds per square inch and this value shall be used in the above formula, when the shell is stamped the stamped value may be used provided the Boiler Inspector is satisfied that the stamped figures are properly authorized.

The thickness of the shell in every case is to be taken at the thinnest part of the shell. The Boiler Inspector shall have authority to order an old boiler drilled at any point in order to determine this thickness. Such drilling shall be done by the owner of the boiler and at the owner's expense.

Section 19. Every boiler or tank under pressure shall have attached thereto without the interposition of any other valve, one or more safety valves. Such valve or valves to be of such design that it may be sealed by the Boiler Inspector who shall at each inspection seal the valve at the maximum pressure the boiler is allowed to carry, and it shall be unlawful to break or tamper with such seal.

Section 20. Safety valves on power boilers must be of sizes equal to or greater than those given in the following table:

Size of valve	1"	1¼"	1½"	2"	2½"	3"	3½"	4"	4½"	5"	5½"
Horse power of	8	10	20	35	60	75	100	125	150	175	200
Boiler between	10	15	30	50	75	100	125	150	175	200	275

When a valve larger than four (4) inches as given in the above table is required, two or more valves shall be used having a total area equal to that given in the table.

Horse power to be determined by allowing eleven (11) square feet of heating surface or one-third (1/3) square foot of grate surface for each horse power.

In measuring the heating surface the side next the fire is to be taken and only such surfaces taken as are in contact with fire on one side and water (not steam) on the other.

For very small boilers the size of safety valve shall be determined by the Boiler Inspector.

When boiler is under forced draft, Horse Power must not be determined by measurement of grate surface.

Section 21. For non-power boilers or boilers not carrying over twenty (20) pounds of steam pressure the area of safety valve shall be determined by the following formula:

$$"A" = \frac{22.5 "G"}{P + 8.62}$$

"A" = Area of Safety Valve in Square inches.

"P" = Gauge, pressure of steam.

"G" = Area of Grate in square feet.

Section 22. Before any apparatus of any kind requiring inspection under this Ordinance shall be used or installed a permit for such installation shall be obtained from the Building Inspector and the boiler or other apparatus tested and accepted by the Boiler Inspector, the fee to be paid as provided in this Ordinance, and no boiler, tank or other apparatus, requiring inspection under this Ordinance shall be used or operated unless a certificate permitting such use or operation shall have been issued by the Boiler Inspector.

Section 23. The fees to be paid for permits under this Ordinance shall be as follows:

Permit for installation of power boiler, including first inspection, shall be five (5) dollars, for installation and first inspection of non-power boilers or other apparatus requiring inspection under this ordinance, each one (1) dollar. Inspection of a power boiler, two and 50/100 (2.50) dollars. Inspection of a non-power boiler, one (1) dollar. Inspection of small boilers on peanut roasters, popcorn stands, pressers, tanks, vulcanizers and similar apparatus, requiring inspection under this ordinance, fifty (50) cents. All fees shall be paid in advance.

Section 24. All certificates of inspection for steam boilers used for power shall be for the period of six months, and no longer, and all other certificates of inspection shall be for a period of one year, and it shall be a violation of this Ordinance to use such boiler or apparatus after the expiration of such certificate, unless such certificate shall be renewed by reinspection.

Section 25. The use of the so-called "Locomotive Type" of boiler is hereby prohibited in all Hotels, Apartment Houses and dwellings.

Section 26. All boiler settings shall be subject to the approval of the Boiler Inspector and no exterior brick walls shall be used in such settings less than twelve (12) inches in thickness.

Section 27. A Complete and accurate record of the names of all owners or users of steam boilers, or steam generating apparatus, giving a full description of the boiler or apparatus inspected, the amount of pressure allowed and the date when tested or inspected shall be maintained in the office of the Building Inspector.

Section 28. Should any exception be taken to any ruling of the Boiler Inspector, a board of appeal may be employed to decide the point in question in the same manner as directed in Section 5 of Ordinance 4670, Known as the Building Ordinance.

Section 29. All fees collected under authority of this Ordinance shall be turned over to the City Treasurer by the Building Inspector in the same manner that the other funds collected by the Building Inspector are turned over, and all such money so turned over shall be credited by the City Treasurer to the Building Department Funds.

All fees payable under authority of this Ordinance shall be paid to the Building Inspector who shall issue an official receipt for the same.

Section 30. The compensation of the Boiler Inspector is hereby placed at one hundred (100) dollars per month, which amount is to be paid out of the Building Department fund of the City of San Diego.

The Boiler Inspector shall not be interested directly or indirectly in the sale of

any appliance, attachment, compound, or anything used in connection with any steam boiler or apparatus requiring inspection under this Ordinance.

Section 31. Any person who shall set up any boiler used, or to be used for generating power, without having first obtained a permit above required, or shall fail to procure and connect a safety-valve as above required, or shall in any manner interfere with any such safety-valve, shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not less than fifty (50) dollars, or more than two hundred (200) dollars, or imprisonment in the city jail of the city not exceeding fifty (50) days, or by both such fine and imprisonment.

Any person violating any other provision of this ordinance shall be deemed guilty of a misdemeanor, and on conviction may be fined in any sum not less than twenty-five (25) dollars, or imprisonment in the city jail not exceeding twenty-five (25) days, or he may be both fined and imprisoned.

Section 32. All boilers subject to inspection under the laws of the United States, and all locomotive boilers used and operated upon railroads, are hereby exempted from the provisions of this Ordinance.

Section 33. Ordinance No. 3862, of the Ordinances of the City of San Diego, entitled "An ordinance regulating the Use of steam boilers in the city of San Diego, creating the office of Inspector of Steam Boilers, prescribing the duties of such Inspector, and providing for his compensation," is hereby repealed.

Section 34. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect from and after its passage and approval.
