The word "persons" shall mean and include individuals, firms, co-partnerships and corporations.

Section 2. From and after the date when this ordinance takes effect and becomes operative, it shall be unlawful for any person to operate any automobile for hire upon any of the streets within the corporate limits of the City of San Diego, without first obtaining a license therefor in the manner hereinafter provided.

The Council may for inexperience or for any unlawful act or for any improper conduct on the part of the holder of any license or of any person operating and driving any automobile for hire in the place of the holder of such license, or for any other reason which in the judgment of the Common Council renders the further operation of any automobile or automobiles for hire under such license dangerous to the public peace and safety, suspend, or revoke any license granted under the provisions of this Ordinance.

Section 11. The Common Council shall have power in determining routes to be used by persons operating and driving automobiles for hire upon the streets of the City of San Diego to fix and determine such routes and the termini thereof and may provide for a transfer system to be used by any such person or persons, if such transfer system is requested in the application for a license.

Section 15. It shall be unlawful for any person operating or driving any automobile for hire licensed under this ordinance to carry at any one time more than three persons or passengers above the seating capacity of such automobile as specified and set out in the application for such license, (provided, however, that children in arms shall not be considered for the purposes of this section as person or passengers), or to permit any person or persons to sit or stand upon the running boards or the fenders thereof.

If a request is made by any person along said route at any regular stopping place to be carried by such person operating such automobile, and there is unoccupied a permanent seat or seats, provided therein which may be occupied, it shall be the duty of such person operating such automobile to carry such passenger upon tender of the fare therefor; provided, however, that the person driving or operating such automobile shall refuse transportation to any person at the time demand is made to be carried who is in an intoxicated condition, or to any person who at such time may be conducting himself in a boisterous manner or who may at the time be using profane or obscene language.

Section 20. It shall be unlawful for any person engaged in the business of operating an automobile and carrying passengers from place to place for hire, and along a regular route and between specified termini within the corporate limits of the City of San Diego, to charge a greater fare than five cents (5¢) provided, however, that when the application

Such

Section 27. If any section, sentence, clause or phrase of this ordinance is for any reason held to be unconstitutional, unreasonable or void, such decision shall not effect the validity of the remaining provisions of this ordinance, and the Common Council hereby declares that it would have passed this Ordinance and each section, sentence, clause and phrase thereof irrespective of the fact that any one or more of said sections, sentences, clauses or phrases were declared unconstitutional, unreasonable or void.

AN ORDINANCE REGULATING THE USE OF THE STREETS OF THE CITY OF SAN DIEGO,
CALIFORNIA, BY SELF*PROPELLED MOTOR VEHICLES CARRYING PASSENGERS FOR
HIRE, AND PROVIDING FOR THE LICENSING OF SUCH VEHICLES AND FOR A PENALTY
FOR THE VIOLATION OF THIS ORDINANCE.

BE IT ORDAINED By the Common Council of the City of San Diego, as follows:

Section 1. An "auto bus" is hereby defined to be a self-propelled motor vehicle, other than a street car, traversing the public streets between certain definite points or termini and conveying passengers for a fixed charge of not more than ten cents between such and intermediate points, and so held out, advertised, or announced. An auto bus is hereby declared to be a common carrier and is subject to the regulations herein prescribed.

Section 2. Before operating any auto bus as such, upon any public street, the owner or lessee thereof shall apply for and obtain a permit therefor from the Common Council of the City of San Diego, as herein provided, and the operator or chauffeur thereof shall also obtain an operator's permit as herein provided.

Section 3. Application for an auto bus permit shall be made in writing, and filed with the City Clerk of said City annually on or before the 15th day of December, and shall state:

- (a) The route or routes proposed to be followed in transporting passengers, and the termini of said route or routes.
- (b) The fare to be charged for transporting passengers between the termini or intermediate points on said route or routes.
- (c) The schedule to be observed, showing the times of departure from the termini according to which it is proposed to operate such auto bus.
- (d) Transfer points, if transfers are proposed to be used.
- (e) The type of motor vehicle and the name of the manufacturer or popular name thereof;
- (f) The horsepower thereof;
- (g) The factory number and state license number thereof;
- (h) The seating capacity thereof according to its trade rating;
- (i) The name of the owner or lessee and of the person to be in immediate charge thereof as operator or chauffeur and the number of his state license, if any;
- (j) Whether the driver has had ten days' experience in operating automobiles over the streets of the City of San Diego as hereinafter provided;
- (k) That the driver is physically qualified to drive a motor car safely.

The driver shall pass an oral examination as to knowledge of traffic laws and rules of the City of San Diego.

(l) The signature of each applicant shall be acknowledged before a notary public, or some other officer or magistrate duly authorized to administer oaths.

At the same time and in the same manner as herein provided application shall be made to renew the chauffeur's permit by each and every operator or chauffeur of an auto bus.

Section 4. In order to insure the safety of the public, it shall be unlawful for any

person to drive or operate such auto bus, or to obtain a permit therefor unless he shall have given and there is in full force and effect at all times while such person is driving and operating such auto bus and on file with the Common Council, either (a) a bond of the owner or lessee of said auto bus with a responsible surety company or association authorized to do business under the laws of the State of California, in the sum of ten thousand dollars (\$10,000.00), conditioned that the owner or lessee of said auto bus, for which a permit has been applied for (giving its manufacturer's name and number and state license number) will pay all loss or damage that may result to any person or property from the negligent operation of or defective construction of said auto bus, or which may arise or result from any violation of any of the provisions of this ordinance or the laws of the State of California. The recovery upon said bond shall be limited to five thousand dollars (\$5000.00) for the injury or death of one person and to the extent of ten thousand dollars (\$10,000.00) for the death or injury of two or more persons in the same accident, and to the extent of one thousand dollars (\$1000.00) for the injury or destruction of property. Such bond shall be given to the City of San Diego, and shall inure to the benefit of any and all persons suffering loss or damage, either to person or property as herein provided, and suit may be brought in any court of competent jurisdiction upon said bond by any person or persons or corporation suffering any loss or damage as herein provided. Such bond shall be approved by the Common Council of said City, and the permission granted by said Common Council, as herein provided, shall recite that the permit is issued upon condition and in consideration of the filing of said bond. Said bond shall be a continuing liability, notwithstanding any recovery thereon, and if at any time, in the judgment of the Common Council said bond is not sufficient for any cause, the Common Council may require the party to whom permit is issued as herein provided to replace said bond with another bond satisfactory to the Common Council, and in default thereof said permit may be revoked; or (b) a policy of insurance in a company authorized to do business in the State of California, insuring said owner or lessee of said auto bus against loss by reason of damage that may result to any person or persons or property from the operation of said auto bus, said policy of insurance to be in limits of five thousand dollars (\$5,000.00) for any one person injured or killed; and, subject to such limit for each person, a total liability of ten thousand dollars (\$10,000.00) in case of any one accident resulting in bodily injury or death to more than one person. Said policy of insurance must also provide insurance to the extent of one thousand dollars (\$1,000.00) for the injury to or destruction of any property of third parties.

Said policy shall guarantee payment of any final judgment rendered against the owner or lessee of said auto bus within the limits herein provided, irrespective of the financial responsibility or any act or omission of said auto bus owner or lessee.

If, at any time, said policy of insurance be cancelled by the issuing company, or the authority of said issuing company to do business in the State of California be revoked, the Common Council shall require the party to whom permit is issued, as herein provided, to replace said policy with another policy satisfactory to the Common Council, and in default thereof said permit may be revoked.

Section 5. The Common Council shall, without unnecessary delay, cause an investiga-

tion to be made of such application, and shall grant the same unless it shall appear:

- (a) That the bond or insurance policy herein required is insufficient to properly safeguard the public interest and safety.
- (b) That the vehicle for which the permit is applied for is inadequate or unsafe for the purpose intended or insufficiently equipped with skid chains or other safety devices.
- (c) That the operator is incompetent or has not had sufficient experience in driving an automobile in the City of San Diego.
- (d) That the driver is not physically qualified to drive a motor car safely.
- (e) All metal permit tags shall be obtained from the office of the City Tax Collector of said City.

Section 6. Upon the granting of the permit, as herein provided, the holder thereof shall present the same to the City Tax Collector, who shall furnish the applicant with the necessary metallic bus permit and chauffeur's badge, to enable applicant to lawfully operate his auto bus; provided, however, that before these permits are issued by the City Tax Collector, the operator of each and every auto bus herein described shall pay to said City Tax Collector a license fee as follows:

- (a) For each auto bus capable of seating five or less passengers, the sum of ten dollars (\$10.00) per year, payable in advance.
- (b) For each auto bus capable of seating more than five and less than eight passengers, the sum of Fifteen dollars (\$15.00) per year, payable in advance.
- (c) For each auto bus capable of seating more than seven and less than sixteen passengers, the sum of twenty-five dollars (\$25.00) per year, payable in advance.
- (d) For each auto bus seating more than fifteen passengers, the sum of forty dollars (\$40.00) per year, payable in advance.

The foregoing license fees are fixed as being necessary for the purpose of regulation, and to provide for the necessary inspection under an enforcement of the provisions of this ordinance.

The license fee herein provided for shall be pro rated so as to entitle an applicant to a license upon payment of that portion of the yearly license fee which shall bear the same relation to the yearly license fee as that portion of the year for which the license shall run shall bear to the entire year.

Section 7. Any person desiring to operate an auto bus within the City of San Diego must hold a certificate issued by the authority of the State of California to drive motor vehicles, or must have demonstrated to the satisfaction of the Chief of Police of said City his ability to operate an auto bus on the streets of the City of San Diego. Upon such demonstration the Chief of Police shall issue a permit to such person to operate an auto bus on the streets of the City of San Diego, and upon presentation to the City Tax Collector of such permit such applicant shall obtain, upon deposit of one dollar (\$1.00), a metal numbered badge, which badge shall be worn conspicuously by the operator or chauffeur at all times while operating an auto bus. In addition such applicant shall be supplied by the City Tax Collector with an identification card, giving his name and address, which will be the record of his permit granted by the Chief of Police. All license permits under this ordin-

ance shall expire on December 31st, of each year.

Section 8. No license to drive or operate any auto bus shall be granted to any person under the age of eighteen years, nor to any person where the auto bus is to be driven by one other than the applicant, where the person to drive such auto bus is under the age of eighteen years.

Section 9. It shall be unlawful:

(a) To drive or operate, or cause to be driven or operated, any auto bus upon or along any street unless there is outstanding a valid license for each such auto bus obtained as in this ordinance provided.

(b) To drive or operate, or cause to be driven or operated, any auto bus while there is attached thereto any trailer, or any other passenger carrying vehicle.

(c) To permit passengers to ride on the running board or fenders of any auto bus; and it shall also be unlawful for any person to ride on the running board of any auto bus.

(d) To refuse to carry any person offering himself or herself at any regular stopping point to be carried, and tendering the fare for the same to any regular stopping place in said route, or between the termini thereof, unless at the time such offer is made the seats of said auto bus are fully occupied. If a request is made by any person along said route at any regular stopping place to be carried by such person operating such auto bus, and there is unoccupied a seat or seats provided therein which may be occupied, it shall be the duty of such person operating such auto bus to carry such passenger, upon tender of the fare therefor; provided, however, that the person driving such auto bus may refuse transportation to any person who, at the time demand is made to be carried, is in an intoxicated condition, or to any person who at such time may be conducting himself in a boisterous manner, or who may at such time be using profane language.

(e) To demand and charge a greater fare than that mentioned in the application for license, and than that printed upon the sign carried upon the auto bus.

Section 10. Any permit shall be revoked by the Common Council for any violation of the provisions of this Ordinance, or for the failure to pay any judgment for damages arising from the unlawful or negligent operation of the auto bus for which the permit was issued, or for a violation of the traffic ordinances of the City of San Diego or laws of the State of California now in force or hereafter adopted. The Common Council, in the exercise of a sound and reasonable discretion, and when the public interest and safety may require, may revoke any permit issued under the provisions of this ordinance.

Section 11. Any operator or chauffeur who operates any auto bus while under the influence of liquor, or who operates his vehicle in a reckless and dangerous manner, or who violates this ordinance or the traffic ordinances in any manner, shall forfeit his right to the badge provided in section 7, and any owner of any auto bus thereafter permitting such chauffeur or operator to operate or remain in charge of any auto bus shall forfeit the permit issued for the vehicle so operated.

Section 12. It shall be unlawful for any person owning or having in charge or operating, or causing to be operated, any auto bus over or upon any public street without having attached thereto a bell or horn of size and weight sufficient to insure its being distinctly

heard when rung or sounded at a distance of at least one hundred feet. The bell or horn must be rung or sounded when such auto bus is about to cross an intersecting street.

Section 13. Every person owning or operating, or causing to be operated, any auto bus in the City of San Diego, shall, whenever required in writing by the Board of Health of the City of San Diego, fully disinfect each auto bus so operated by spraying said auto bus with an efficient disinfectant.

Section 14. No person shall operate or cause to be operated any auto bus in the City of San Diego except at the rates of speed fixed by the laws of the State of California.

Nothing in this section contained, however, shall be so construed as to permit any person to drive any such auto bus at a greater speed than is prudent and reasonable, having regard for the existing traffic conditions or so as to endanger either person or property.

Section 15. It shall be unlawful for any person owning or operating, or causing to be operated, any auto bus within the City of San Diego, to allow or permit any incompetent or inexperienced person to act as the driver of such auto bus.

It shall be unlawful for any person not having had previous experience to operate any auto bus in the streets of the City of San Diego, unless said person shall have had at least ten days' experience in the operation of an automobile in the City of San Diego.

Section 16. It shall be unlawful for any driver of an auto bus in the City of San Diego to smoke any cigar, pipe or cigarette, or to burn tobacco while passengers are occupying any of the seats in such vehicle.

Section 17. Every person operating or causing to be operated any auto bus in the City of San Diego is hereby required to permit and allow firemen and policemen in the employ of the City of San Diego, while engaged in the actual discharge of their duties, to ride in any vacant seat on the auto bus so owned or operated by such persons without paying any sum or sums of money for fare or otherwise for riding on said auto bus, and no person owning or operating any auto bus in said City of San Diego shall demand or collect a fare from any fireman or policeman as in this section provided.

Section 18. It shall unlawful for any person operating any such auto bus to permit, cause or allow such auto bus to cross any railroad track at any intersecting street, over which trains or cars are operated, without bringing such auto bus to a full stop before crossing said railroad track, and determining that no train or car is about to pass said crossing; provided that at all points where traffic officers are stationed, such person shall comply with the direction of such traffic officer, and provided further, that at all track crossings where flagmen are provided, such person operating such auto bus shall be governed by the direction of such flagmen.

Section 19. It shall be unlawful for any person driving any such auto bus, and holding himself out to carry passengers for hire from point to point, to drive or operate such auto bus for hire over a route, or between the termini, or according to a schedule other than the route, termini or schedule described in the license, or to deviate from such route, or fail to maintain such schedule, or to fail, refuse or neglect after commencing any trip to operate such auto bus between the termini and over the entire route or routes specified in the license and mentioned in the sign herein provided to be carried by each such auto

bus, unless the failure to complete such trip shall be the result of accident, or the breaking down of the auto bus or the engine thereof; provided, however, that such persons may transfer passengers to any other auto bus used to complete such route as herein provided, only a single fare being charged, however, for the entire trip between such specified termini, and provided, always, however, that nothing herein contained shall be construed as prohibiting the owner of auto buses from operating the same at times and over routes other than the times and routes mentioned in their schedule, and charge such fare for hire as may be agreed upon between the owners of such auto buses and the passengers therein.

Section 20. It shall be unlawful for any person to operate or cause to be operated any auto bus unless the same be equipped with adequate brakes and non-skidding devices when operated upon a slippery pavement.

Section 21. It shall be unlawful for any person owning or operating or driving, or causing to be operated or driven, any auto bus, to permit the same to remain standing upon the street for the purpose of loading or unloading passengers, unless the side of said auto bus nearest to the right hand curb of said street shall be at least within two feet distant therefrom.

Section 22. All persons who at the time this ordinance becomes effective shall have paid to the City of San Diego a license fee for an auto stand, shall be exempt from the license fee fixed in section six hereof until the expiration of the time covered by such license fee so paid.

Section 23. Ten days after this ordinance becomes effective it shall be unlawful for any person to engage in the business of operating an auto bus under the license provided for in this ordinance, unless he shall carry on the front of said auto bus a sign, plainly lettered, with letters and numbers, where numbers are used, not less than three inches in height, giving the route to be traversed and the termini of said route, the price of fare charged, and the license number of such auto bus. Such sign shall be subject to the approval of the Chief of Police.

Section 24. The Police Department is hereby empowered in cases of fire, accidents, parades, obstruction on, breakes in, or repairs of streets, or any emergency, or to prevent accidents, or congestion of traffic, or in case of public necessity, to temporarily divert and route auto buses upon such streets as in its judgment is necessary.

Section 25. If any section, sub-section, sentence, clause or phrase of this ordinance is for any reason held to be unconstitutional or invalid, such decision shall not affect the remaining portions of this ordinance. The Common Council hereby declare that it would have passed this ordinance and each section, sub-section, sentence, clause and phrase thereof irrespective of the fact that any one or more other sections, sub-sections, sentences, clauses or phrases be declared unconstitutional or invalid.

Section 26. Any person violating any of the provisions of this ordinance shall be guilty of a misdemeanor, and upon conviction thereof, shall be subject to a fine of not more than one hundred dollars, or by imprisonment in the City Jail for a period of not more than three months, or by both such fine and imprisonment.

Section 27. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the emergency in this case are that at the present time a large number of auto buses are being operated upon the public streets of the City of San Diego, subject to no regulation other than the provisions of General Laws and general municipal traffic ordinances which are entirely inadequate to protect public safety and promote public convenience. That by reason of this absence of adequate regulation public safety is being endangered and public convenience lessened, and this Common Council finds from an investigation and observation of the operation of the auto bus upon the streets of the City of San Diego, and hereby declares that the operation of the auto bus upon the streets of the City of San Diego, as the auto bus is now being operated without adequate regulation, seriously endangers public safety and seriously endangers the life, limb and property of the inhabitants of said City. In order to afford immediate protection to public safety, and in order to afford immediate protection to the life, limb and property of the inhabitants of said City, this measure is declared to be one of urgency. Other facts constituting the urgency in this case are the immediate and proper protection of the life and limb of the persons traveling upon public thoroughfares along and upon which auto buses are now being operated; the immediate and proper protection of the life and limb of persons riding in such auto buses, the guarantee of protection to the public in the matter of compensation for injuries sustained by the careless or negligent operation of such auto buses; the prevention of accidents at intersections along the routes followed by such auto buses with railroad and street car crossings, the prevention of the congestion of traffic and the guarantee of adequate and proper facilities for the accommodation of the traveling public upon the streets of the City of San Diego.

ORDINANCE NO. 6299.

AN ORDINANCE PRESCRIBING SPECIFICATIONS FOR THE SIDEWALKING, CURBING,
AND CONCRETE GUTTERING BY PRIVATE CONTRACT, IN THE CITY OF SAN DIEGO,
CALIFORNIA.

BE IT ORDAINED By the Common Council of the City of San Diego, California, as follows:

Section 1. That all sidewalking, curbing and cement concrete guttering in the City of San Diego, California, shall be hereafter done in accordance with the following specifications, viz:

The sidewalks, curbs and cement concrete gutters provided for herein are to be constructed according to the plans, drawings and cross sections approved by the City Engineer of said City and shall conform to the lines, levels and official grade of the street upon which said work is to be constructed; said lines and levels shall be shown on the ground by stakes to be set by the City Engineer of said city.

WORK: The work to be done shall be as follows: (a). Preparing the foundation for the sidewalk and gutter and digging the trench for the curb. (b). Constructing and laying the curb, sidewalk and gutter. (c). Furnishing all material and labor necessary to perform said work and to complete the same. (d). Removing from the street and sidewalk adjacent to the work all surplus material and debris.

GRADING: The foundation upon which the sidewalk, curb and gutter are to rest, shall be brought to the proper sub-grade, as indicated by stakes set by the City Engineer. All soft or spongy material shall be removed to a depth of at least six inches below sub-grade and replaced with good material, and the whole foundation shall be tamped and rolled until it is solid. The material to be supplied in case of a fill shall be good earth, which shall be built up in horizontal layers not to exceed one foot in thickness, each layer to be well packed by rolling or tamping. The fill shall be flooded with water in order to thoroughly settle it and the whole foundation shall be well wet down just before the concrete is laid thereon. In all cases where the soil upon which the cement work is to be laid is adobe, it shall be removed to a depth of four (4) inches below sub-grade. The adobe on the surface of the foundation remaining shall then be broken up into material not much coarser than pea size, which material shall then be slightly moistened and thoroughly tamped. The foundation

shall then be brought to sub-grade by filling with damp sand, which shall then be thoroughly compacted by rolling or tamping and kept moist until the cement base is deposited.

DIMENSIONS: Concrete curbs shall be eight (8) inches in thickness at the top, nine (9) inches in thickness at the bottom and sixteen (16) inches in depth and shall be constructed with a batter of one (1) inch on the face. The face of the curb for a depth of at least fourteen (14) inches shall be plastered with a coat of cement mortar not less than one-quarter ($1/4$) inch in thickness and the top of said curb shall have a finish coat of cement mortar not less than one-half ($1/2$) inch in thickness. The radii of all curbs shall be ten (10) feet at street intersections and two feet at alley intersections.

Sidewalks shall be constructed with a concrete base not less than three (3) inches in thickness with a cement mortar wearing surface of not less than one-half ($1/2$) inch in thickness.

There shall be a rise of three (3) inches in the grade of the sidewalk from the curb to the property line.

All gutters shall be constructed according to cross-section prepared by the City Engineer. The concrete shall be thoroughly tamped until all stones are below the surface and then troweled to a true surface slightly roughened.

All sidewalks within that portion of the City of San Diego, shall extend from curb line to property line within the following described district: Beginning at the intersection of the west line of Second Street with the north line of L Street; thence east along the north line of L Street to an intersection with the east line of Seventh Street; thence north along the east line of Seventh Street to an intersection with the north line of B Street; thence west along the north line of B Street to an intersection with the east line of Sixth Street; thence north along the east line of Sixth Street to an intersection with the north line of A Street; thence west along the north line of A Street to an intersection with the west line of Second Street; thence south along the west line of Second Street to the point or place of beginning.

Outside the limits of the above described district the cement walks shall be five (5) feet wide. In Blocks where cement walks have already been constructed, any new work shall be located to conform to same; and in blocks where there are no cement walks constructed, the center line of the walk shall be located half way between the property line and the curb line of the street.

MATERIALS: (a). Cement: All cement used shall be Portland cement and must conform to the following requirements and be subject to the following tests which will be open to the contractor. Samples for tests may be taken from every package delivered or proposed to be used upon the work, and unless they meet the requirements herein specified, such package or packages of cement will be rejected. No cement will be accepted, tested or permitted to be used, unless delivered in the original unopened packages with the manufacturer's name and the brand of cement thereon. All samples of Portland cement required by the City Engineer or his authorized agent, shall be given him free of charge and he shall have authority at any time to take such samples as he or his agent may desire. All tests made will be made in the cement testing room provided by the City of San Diego for that purpose. Briquettes for testing tensile strength of cement will be made both of neat cement and of cement and

sand in the proportions hereinafter specified.

The specific gravity of cement shall be not less than 3.10. Should the test of the cement as received fall below this requirement, a second test may be made upon a sample ignited at a low red heat. The loss in weight of the ignited cement shall not exceed four per cent.

Fineness: The cement must be evenly ground and when tested with the following standard sieves must pass at least the following percentages by weight:

No. 100 sieve having 100 meshes per lineal inch, 92%.

No. 200 sieve having 200 meshes per lineal inch, 75%.

Tensile Strength: Neat briquettes one inch square in section shall attain a minimum tensile strength as follows:

At 24 hours in moist air, 175 pounds.

At 7 days (1 day in moist air and six days in water) 500 lbs.

At 28 days (1 day in moist air and 27 days in water) 600 lbs.

Briquettes one inch square in section made of one part Portland cement and three parts of standard testing sand, shall attain a minimum tensile strength as follows:

At 7 days, (1 day in moist air and 6 days in water) 175 lbs.

At 28 days (1 day in moist air and 27 days in water) 250 " .

Cement testing neat below 600 pounds at 28 days and showing a retrogression below the seven day test, will be rejected.

The sand test must in all cases show an increase in strength at 28 days over the 7 day tests.

Soundness: Pats of neat cement about three inches in diameter, one-half inch in thickness at the center and tapering to a thin edge, shall be kept in moist air for a period of twenty four hours. A pat shall then be kept in air of normal temperature for at least twenty-eight days. Another pat will be exposed in an atmosphere of steam, above boiling water, in a loosely closed vessel for five hours. These pats to satisfactorily pass the requirements must remain firm and hard and show no signs of distortion, checking, cracking or disintegration.

Neat cement shall develop initial set in not less than thirty minutes but must not develop hard set in less than one hour nor more than ten hours. No cement will be permitted to be used in the work until after the seventh day test as above prescribed.

(b) Sand: All sand shall be fresh water sand, clean and sharp, with grains varying in size but with coarse grains predominating, and shall be free from sticks, excess mica and other deleterious matter.

(c). Coarse Aggregate: The coarse aggregate shall consist of gravel or broken or crushed stone and shall be clean, hard, durable and free from all deleterious material. It shall be graded in size, up to a maximum size which shall be such as to pass through a three (3) inch ring, provided, however, that for sidewalk construction the maximum size shall be such as to pass through a two (2) inch ring. All sand or rock dust shall be removed by a sand screen, to be afterwards, if desired, mixed with and used as part of the sand, except that if the aggregate as delivered on the work is so regular that the amount of sand or rock dust as determined by frequently screening samples, is uniform, the screening may be omitted and the average percentage of sand or rock dust allowed for in measuring

the sand.

(d). Water shall be fresh, clean and free from all oil, acid, strong alkalies or vegetable matter.

PROPORTIONING MATERIALS: Concrete shall be composed of one (1) part Portland cement, three (3) parts sand or stone screenings and five (5) parts screened gravel or broken stone.

Should a deficiency of mortar exist in the concrete mixture, it shall be remedied by varying the proportion of gravel or broken stone and not by adding a greater proportion of sand.

CEMENT MORTAR: The cement, sand and lamp black, in the specified proportions, shall be thoroughly mixed dry on a tight platform or in a box with shovels or hoes, until no streaks of cement are visible. Water shall then be added to the sand and cement, mixed in accordance with the foregoing directions, in sufficient quantity to produce a mortar of the desired consistency and the whole thoroughly mixed with shovels or hoes until a homogeneous mass is produced.

RETEMPERING: Retempering of concrete or mortar will not be permitted and mortar or concrete that has begun to set before ramming is completed, shall be removed from the work.

FINISHING: The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free from voids. The finished walk and curb shall be troweled to a true, smooth surface. The edge of the walk and curb shall be finished with an edging tool made for the purpose. The walk shall be marked off into squares of approximately twenty-four (24) inches and top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter (1/4) inch in depth.

Contraction of the concrete in setting shall be provided for by constructing walks and curbs in sections of not more than twenty (20) feet in length.

CONTRACTOR'S NAME: The concrete sidewalk and the concrete curbing shall be legibly stamped with letters not less than two (2) inches in length, with the name of the contractor constructing the same and the month and the year of such construction.

STREET NAMES: All returns of concrete sidewalks shall be plainly and legibly stamped with letters not less than three (3) inches long with the names of the streets and avenues upon which the return fronts and with arrows showing the course of the streets.

All stamping herein provided for shall be done by and at the expense of the contractor and no cement sidewalk or concrete curbing will be accepted by the Superintendent of Streets unless stamped as herein provided for.

PROTECTION FROM WIND AND SUN: All concrete, after setting, shall be thoroughly watered, after which, it shall be protected from wind and sun by a covering of earth not less than two inches in thickness, which shall be kept thoroughly wet for a period of seven⁽⁷⁾ days.

GENERAL REQUIREMENTS.

WORK: The contractor shall, for the price paid, furnish all the materials and perform all the labor necessary to execute the work in every respect in a thorough, workmanlike manner, in accordance with the plans and specifications and to the satisfaction of the Superintendent of Streets.

MATERIALS AND SAMPLES: All materials must be of the specified quality and fully equal

to samples when samples are required; the contractor shall furnish to the City Engineer for test, whenever called for and free of charge, samples of all the materials proposed to be used on the work. Rejected material must be immediately removed from the work by the contractor.

LABOR: Any overseer, superintendent, laborer or other person employed on the work by the contractor, who shall perform his work in a manner contrary to these specifications, shall be discharged immediately and such person shall not again be employed on the work.

EXAMINATION OF GROUND: Bidders must examine and judge for themselves as to the location of the proposed work, the nature of the excavation to be made and the work to be done.

SETTING STAKES: The contractor shall give twenty-four (24) hours notice in writing when he will require the services of the City Engineer for laying out any portion of the work. He shall dig all stake holes necessary to give lines and levels. The contractor shall preserve all stakes set for the lines, levels or measurements of the work in their proper places until authorized to remove them by the City Engineer, and any expense incurred in replacing said stakes which the contractor or his subordinates may have failed to preserve, shall be borne by the contractor.

PLANS AND SPECIFICATIONS: The contractor shall keep upon the work a copy of the plans and specifications and access thereto at all times shall be accorded the engineer.

Cement mortar finishing coat shall be composed of one (1) part Portland cement and one and one-half (1 1/2) parts of coarse, sharp, screened sand.

Lamp black shall be added to the cement mortar in the proportion of one-quarter (1/4) pound to each cubic foot of cement.

All proportions shall be obtained by actual measurements in boxes or wheelbarrows, and no material shall be used that has not been thus measured.

All mixing shall be done upon a tight platform or in mixers.

A sack of cement in the original package weighing not less than 94 pounds shall be considered to have a volume of one cubic foot.

Forms: Forms shall be substantial and unyielding, set true to line and grade and properly braced.

MIXING CONCRETE: Tight platforms shall be provided by the contractor of sufficient size to accommodate men and materials for the progressive and rapid mixing of at least two batches of concrete at the same time. The cement, sand or stone screenings, gravel or broken stone, in the specified proportions shall be spread evenly upon the platform and turned with shovels, twice dry. Water shall then be added in a fine spray and the whole mass shall be turned until every stone is coated with mortar.

A machine mixer may be used at the option of the contractor. The necessary requirements for a machine mixer shall be that a precise and regular proportioning of the product as delivered shall be of the required consistency and be thoroughly mixed.

CONSISTENCY: The consistency of the concrete shall be such that it will "quake" under light tamping.

PLACING OF CONCRETE: All surface on or against which concrete is to be laid shall be thoroughly watered just previous to placing the concrete. Concrete, after the addition of water to the mix, shall be handled rapidly in as small masses as is practicable from

the place of mixing to the place of final deposit, and shall be deposited and manipulated in a manner that will permit the most thorough compacting and to prevent pockets. It shall be leveled off with a template and tamped to not less than one-half (1/2) inch below the finished grade.

OBSERVING CITY ORDINANCES: The contractor shall observe all the ordinances of the City of San Diego in relation to the obstruction of streets, keeping open passageways and protecting the same where they are exposed or dangerous to travel, and such other ordinances as relate to the comfort and convenience of the public.

BARRIERS, LIGHTS, ETC: The contractor shall take all necessary measures to protect the work and prevent accidents during construction. He shall provide and maintain all necessary barriers, guards, temporary bridges, watchmen and lights.

CROSS-STREETS: No more than one cross street shall be closed at any one time.

PUBLIC UTILITIES: In case it should be necessary to move the property of any owner of a public utility or franchise, such owner will, upon proper application of the contractor, be notified by the Superintendent of Streets to move such property within a specified reasonable time, and the contractor shall not interfere with said property until after the expiration of the time specified. The right is reserved to the owners of public utilities and franchises to enter upon the street for the purpose of making repairs or changes of their property that may be made necessary by the work. The city shall also have the privilege of entering upon the street for the purpose of repairing sewers and water pipes, or making house connections therewith, or repairing culverts or storm drains.

LOSS OR DAMAGE: All loss or damage arising from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the work, or from any action of the elements prior to final acceptance of the work, or from any act or omission not authorized by these specifications on the part of the contractor or any agent or person employed by him, shall be sustained by the contractor.

PROTECTION OF WORK AND CLEANING UP: The contractor shall care for all work until completion and final acceptance. He shall remove all surplus materials and rubbish from the work after its completion and before he makes application for the acceptance of the work.

DEFINITIONS: Whenever the word "city" is used in these specifications, it refers to the City of San Diego, California.

When the word "contractor" is used in these specifications, it refers to the party or parties of the second part in the agreement for the construction of the work herein specified.

Whenever the words "Street Superintendent" or "City Engineer" are used in these specifications, they refer, respectively, to the Street Superintendent and the City Engineer of the City of San Diego, California, or their authorized agents or representatives.

Section 2. After the completion, in the manner provided for in this ordinance, of any work or improvement mentioned in section 1 hereof, it shall be the duty of the City Engineer of said city to check up said work or improvement and report to the Department of Public Streets the condition of said work or improvement, particularly in matters of location, grade and dimensions, such report shall be filed by the City Engineer with the Department of Public Streets. Upon receipt by the Department of Public Streets of such report,

and after ascertaining that the work has been done or the improvement made in all respects according to the provisions of this ordinance, the Superintendent of the Department of Streets shall deliver to the person performing said work or making such improvement, a certificate of completion, reciting that the work has been done and completed to the official line and grade of the street.

Section 3. That any firm, corporation or person desiring a permit to perform any work mentioned in Section 1 of this ordinance shall, before the permit is issued for the same, pay to the Department of Public Streets a sum sufficient to pay the fees of the City Engineer for the work specified in such permit at the rate of six (6) cents per lineal foot for the first fifty (50) feet or fraction thereof and one (1) cent per lineal foot for each foot thereafter, where curb is to be constructed; provided, however, that no permit shall be issued to cover more than the lots in any one block of a given subdivision. Where curb has been constructed and in gaps between curbs not to exceed fifty (50) feet, where no grade stakes are needed and permit is issued for the construction of sidewalk, curb or gutter, a fee of One Dollar (\$1.00) shall be charged for final inspection on one or more permits in any one block of a given subdivision, provided said inspection is made at one time. When any work or improvement under a permit issued is outside the five cent car fare limit, the applicant for such permit shall pay the necessary transportation. This ordinance has no application to work done under a contract pursuant to the general street laws of the State of California where an assessment is to be levied therefor.

Section 5. That whenever the Common Council shall determine that any street shall be permanently improved, which shall include the construction of sidewalk, curb or gutter, the said Common Council shall fix the time within which the owners of property fronting upon said street may construct said sidewalks, curbs and gutters in front of their property by private contract. That when the said time so fixed within which said property owners may do their own work, as hereinbefore provided, has elapsed, it shall be the duty of the City Engineer to furnish the said Common Council with a detailed report showing the amount of sidewalking, curbing and guttering yet remaining to be done on said street or portion thereof, so determined to be improved.

Section 6. That when the said Common Council has decided upon the improvement of a street or portion thereof, and has fixed the time within which the property owners may do

their own work , as hereinbefore provided, it shall be the duty of the City Clerk of said city to advertise the fact that said improvement has been decided upon and that property owners desiring to construct sidewalks, curbs and gutters by private contract must complete such work on or before the date fixed by the said Common Council; and also that said work must be constructed according to the provisions of the ordinances of said city of San Diego regulating the construction and providing specifications for the work; said advertising shall be published in the city official newspaper of said city not to exceed three times. When the time within which property owners may do their own work, as hereinbefore provided, has elapsed, it shall be the duty of the said City Clerk to inform the said Common Council of that fact.

ORDINANCE N O. 6300.

AN ORDINANCE PRESCRIBING SPECIFICATIONS FOR SIDEWALKING, CURBING AND CONCRETE GUTTERING IN THE CITY OF SAN DIEGO, CALIFORNIA.

BE IT ORDAINED By the Common Council of the City of San Diego, California, as follows:

Section 1. That all sidewalking, curbing and concrete guttering, in the City of San Diego, California, shall be hereafter done in accordance with the following specifications, viz:

The sidewalks, curbs and concrete gutters provided for herein are to be constructed according to the plans, drawings and cross-sections approved by the Common Council of said City on file in the office of the City Engineer of said city, and to conform to the lines, levels and official grade of the street upon which said work is to be constructed; said lines and levels shall be shown on the ground by stakes to be set by the City Engineer of said city.

WORK: The work to be done shall be as follows: (a). Preparing the foundation for the sidewalk and gutter and digging the trench for the curb. (b) Constructing and laying the curb, sidewalk and gutter prescribed in the Resolution of Intention. (c). Furnishing all material and labor necessary to perform said work and to complete the same. (d). Removing from the street and sidewalk adjacent to the work, all surplus material and debris.

GRADING: The foundation upon which the sidewalk, curb and gutter is to rest, shall be brought to the proper sub-grade, as indicated by stakes set by the City Engineer. All soft or spongy material shall be removed to a depth of at least six inches below sub-grade and replaced with good material, and the whole foundation shall be tamped and rolled until it is solid. The material to be supplied in case of a fill shall be good earth, which shall be built up in horizontal layers not to exceed one foot each in thickness, each layer to be well packed by rolling or tamping. The fill shall be flooded with water in order to thoroughly settle it, and the whole foundation shall be well wet down just before the concrete is laid thereon.

In all cases where the soil upon which the cement work is to be laid is adobe, it shall be removed to a depth of four (4) inches below the sub-grade. The adobe on the surface of the foundation remaining shall then be broken up into material not much coarser than pea size, which material shall then be slightly moistened and thoroughly tamped. The foundation

shall then be brought to sub-grade, by filling with damp sand, which shall then be thoroughly compacted by rolling or tamping, and kept moist until the cement base is deposited.

DIMENSIONS: Concrete curb shall be eight (8) inches in thickness at the top, nine (9) inches in thickness at the bottom and sixteen (16) inches in depth and shall be constructed with a batter of one (1) inch on the face. The face of the curb for a depth of at least fourteen (14) inches shall be plastered with a coat of cement mortar not less than one quarter ($1/4$) inch in thickness and the top of said curb shall have a finish coat of cement mortar not less than one-half ($1/2$) inch in thickness. The radii of all curbs shall be ten (10) feet at street intersections and two feet at alley intersections.

Sidewalks shall be constructed with a concrete base not less than three (3) inches in thickness with a cement mortar wearing surface of not less than one-half ($1/2$) inch in thickness.

There shall be a rise of three (3) inches in the grade of the sidewalk from the curb to the property line.

All gutters shall be constructed according to cross-section prepared by the City Engineer. The concrete shall be thoroughly tamped until all stones are below the surface and then troweled to a true surface slightly roughened.

All sidewalks within that portion of the City of San Diego, shall extend from curb line to property line within the following described district: Beginning at the intersection of the west line of Second Street with the north line of L Street; thence east along the north line of L Street to an intersection with the east line of Seventh Street; thence north along the east line of Seventh Street, to an intersection with the north line of B Street; thence west along the north line of B Street to an intersection with the east line of Sixth Street; thence north along the east line of Sixth Street to an intersection with the north line of A Street; thence west along the north line of A Street to an intersection with the west line of Second Street; thence south along the west line of Second Street to the point or place of beginning.

Outside the limits of the above described district the cement walks shall be five (5) feet wide. In blocks where cement walks have already been constructed, any new work shall be located to conform to same; and in blocks where there are no cement walks constructed, the center line of the walk shall be located half way between the property line and the curb line of the street.

MATERIALS: (a). Cement: All cement used shall be Portland cement and must conform to the following requirements and be subject to the following tests which will be open to the contractor. Samples for tests may be taken from every package delivered or proposed to be used upon the work, and unless they meet the requirements herein specified, such package or packages of cement will be rejected. No cement will be accepted, tested or permitted to be used, unless delivered in the original unopened packages with the manufacturer's name and the brand of cement thereon. All samples of Portland cement required by the City Engineer or his authorized agent, shall be given him free of charge and he shall have authority at any time to take such samples as he or his agent may desire. All tests made will be made in the cement testing room provided by the City of San Diego for that purpose. Briquettes

for testing tensile strength of cement will be made both of neat cement and of cement and sand in the proportions hereinafter specified.

The specific gravity of cement shall be not less than 3.10. Should the test of the cement as received fall below this requirement, a second test may be made upon a sample ignited at a low red heat. The loss in weight of the ignited cement shall not exceed four per cent.

Fineness: The cement must be evenly ground and when tested with the following standard sieves must pass at least the following percentages by weight.

No. 100 sieve having 100 meshes per lineal inch, 92%.

No. 200 sieve having 200 meshes per lineal inch, 75%.

Tensile strength: Neat briquettes one inch square in section shall attain a minimum tensile strength as follows:

At 24 hours in moist air, 175 pounds.

At 7 days (1 day in moist air and six days in water) 500 pounds.

At 28 days (1 day in moist air and 27 days in water) 600 pounds.

Briquettes one inch square in section made of one part Portland cement and three parts of standard testing sand, shall attain a minimum tensile strength as follows:

At 7 days, (1 day in moist air and 6 days in water) 175 pounds.

At 28 days (1 day in moist air and 27 days in water) 250 pounds.

Cement testing neat below 600 pounds at 28 days and showing a retrogression below the seven day test, will be rejected.

The sand test must in all cases show an increase in strength at 28 days over the 7 day tests.

Soundness: Pats of neat cement about three inches in diameter, one-half inch in thickness at the center and tapering to a thin edge, shall be kept in moist air for a period of twenty-four hours. A pat will then be kept in air of normal temperature for at least twenty-eight days. Another pat will be exposed in an atmosphere of steam, above boiling water, in a loosely closed vessel for five hours. These pats to satisfactorily pass the requirements must remain firm and hard and show no signs of distortion, checking, cracking, blotching or disintegration.

Neat cement shall develop initial set in not less than thirty minutes, but must not develop hard set in less than one hour nor more than ten hours. No cement will be permitted to be used in the work until after the seventh day test as above prescribed.

(b). Sand: All sand shall be fresh water sand, clean and sharp, with grains varying in size, but with coarse grains predominating, and shall be free from sticks, excess mica and other deleterious matter.

(c) Stone Screenings: Stone screenings shall be such as are obtained in the crushing of clean, hard and durable stone, and shall be that portion which has passed through a one-quarter (1/4) inch screen.

(d). Gravel: Gravel shall be composed of clean pebbles, free from more than five (5) per cent of sand and shall be of hard and durable stone, graduated in size from one-quarter (1/4) inch minimum to two (2) inches maximum. All gravel shall be screened to meet the above mentioned requirements before being brought upon the work.

(e). Broken Stone: Broken stone shall be clean, hard and durable, and shall be graduated in size from one-quarter ($1/4$) inch minimum to two (2) inches maximum.

(f) Water shall be fresh, clean and free from all oil, acid, strong alkalies or vegetable matter.

PROPORTIONING MATERIALS: Concrete shall be composed of one (1) part Portland cement, three (3) parts sand or stone screenings and five (5) parts of screened gravel or broken stone.

Should a deficiency of mortar exist in the concrete mixture, it shall be remedied by varying the proportion of gravel or broken stone and not by adding a greater proportion of sand.

Cement mortar finishing coat shall be composed of one (1) part Portland cement and one and one-half ($1\frac{1}{2}$) parts of coarse, sharp, screened sand.

Lamp black shall be added to the cement mortar in the proportion of one-quarter ($1/4$) pound to each cubic foot of cement.

All proportions shall be obtained by actual measurements in boxes or wheelbarrows, and no material shall be used that has not been thus measured.

All mixing shall be done upon a tight platform or in mixers.

A sack of cement in the original package weighing not less than 94 pounds shall be considered to have a volume of one cubic foot.

FORMS: Forms shall be substantial and unyielding, set true to line and grade and properly braced.

MIXING CONCRETE: Tight platforms shall be provided by the contractor of sufficient size to accommodate men and materials for the progressive and rapid mixing of at least two batches of concrete at the same time. The cement, sand or stone screenings, gravel or broken stone, in the specified proportions shall be spread evenly upon the platform and turned with shovels--twice dry. Water shall then be added in a fine spray and the whole mass shall be turned until every stone is coated with mortar.

A machine mixer may be used at the option of the contractor. The necessary requirements for a machine mixer shall be that a precise and regular proportioning of the product as delivered shall be of the required consistency and be thoroughly mixed.

CONSISTENCY: The consistency of the concrete shall be such that it will "quake" under light tamping.

PLACING OF CONCRETE: All surface on or against which concrete is to be laid shall be thoroughly watered just previous to placing the concrete. Concrete, after the addition of water to the mix, shall be handled rapidly in as small masses as is practicable from the place of mixing to the place of final deposit, and shall be deposited and manipulated in a manner that will permit the most thorough compacting and to prevent pockets. It shall be leveled off with a template and tamped to not less than one-half ($1/2$) inch below the finished grade.

CEMENT MORTAR: The cement, sand and lamp-black, in the specified proportions, shall be thoroughly mixed dry on a tight platform or in a box with shovels or hoes, until no streaks of cement are visible. Water shall then be added to the sand and cement, mixed in accordance with the foregoing directions, in sufficient quantity to produce a mortar of the

desired consistency and the whole thoroughly mixed with shovels or hoes until a homogeneous mass is produced.

RETEMPERING: Retempering of concrete or mortar will not be permitted and mortar or concrete that has begun to set before ramming is completed, shall be removed from the work.

FINISHING: The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free from voids. The finished walk and curb shall be troweled to a true, smooth surface. The edge of the walk and curb shall be finished with an edging tool made for the purpose. The walk shall be marked off into squares of approximately twenty-four (24) inches and top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter ($1/4$) inch in depth.

Contraction of the concrete in setting shall be provided for by constructing walks and curbs in sections of not more than twenty (20) feet in length.

CONTRACTOR'S NAME: The concrete sidewalk and the concrete curbing shall be legibly stamped with letters not less than two (2) inches in length, with the name of the contractor constructing the same and the month and the year of such construction.

STREET NAMES: All returns of concrete sidewalks shall be plainly and legibly stamped with letters not less than three (3) inches long with the names of the streets and avenues upon which the return fronts and with arrows showing the course of the streets.

All stamping herein provided for shall be done by and at the expense of the contractor and no cement sidewalk or concrete curbing will be accepted by the Superintendent of Streets unless stamped as herein provided for.

PROTECTION FROM WIND AND SUN: All concrete, after setting, shall be thoroughly watered, after which, it shall be protected from wind and sun by a covering of earth not less than two (2) inches in thickness, which shall be kept thoroughly wet for a period of seven (7) days.

GENERAL REQUIREMENTS.

WORK: The contractor shall, for the price paid, furnish all the materials and perform all the labor necessary to execute the work in every respect in a thorough, workman-like manner, in accordance with the plans and specifications and to the satisfaction of the Superintendent of Streets.

MATERIALS AND SAMPLES: All materials must be of the specified quality and fully equal to samples when samples are required. The contractor shall furnish to the City Engineer for test, whenever called for and free of charge, samples of all the materials proposed to be used in the work. The contractor shall furnish the engineers and inspectors reasonable facilities for obtaining such information at all times respecting the progress and manner of the work and the character of the materials.

The right is reserved to the owners of public utilities and franchises to enter upon the street for the purpose of making repairs or changes of their property that may be made necessary by the work. The city shall also have the privilege of entering upon the street for the purpose of repairing sewers and water pipes, or making house connections therewith, or repairing culverts or storm drains.

DETECTIVE WORK: No work which may be defective in its construction or deficient in any of the requirements of these specifications will be considered as accepted in consequence of the failure of any of the officers of the city or inspector connected with the work to point out said defects or deficiencies during construction, and the contractor shall correct

any imperfect work whenever discovered, before the final acceptance of the work.

PROTECTION OF WORK AND CLEANING UP: The contractor shall care for all work until completion and final acceptance. He shall remove all surplus materials and rubbish from the work after its completion and before he makes application for the acceptance of the work.

FINAL INSPECTION: The contractor shall notify the City Engineer when he desires a final inspection of the work, when the latter will, as soon as possible, make the necessary examination, and if the work is found in compliance with these specifications, the City Engineer will then issue his certificate to the Superintendent of Streets, whereupon, the Superintendent of Streets may issue his certificate to the contractor to that effect.

ALLOWABLE VARIATION: When, in the specifications, a maximum or minimum, either in size, percentage or thickness, or relating to quality or character or other matter, is allowed or prescribed, the work shall be accepted as in compliance therewith if within such maximum or minimum so allowed hereby.

That Ordinance No. 6248 of the ordinances of the City of San Diego, entitled "An Ordinance regulating the use of the streets in the City of San Diego, California, by self-propelled motor vehicles carrying passengers for hire and providing for the licensing of such vehicles and for a penalty for the violation of this ordinance," be and the same is hereby amended by adding thereto a new section to be numbered Section 12a, and to read as follows:

Section 12a. It shall be unlawful for any auto bus to stop to take on or let off passengers at any point between the intersecting streets of its route or routes or at any other point except at the right hand curb on the further side of such intersecting streets.

Section 2. This is an ordinance for the immediate preservation to the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the urgency in this case are that at the present time a large number of auto buses are being operated upon the public streets of the City of San Diego under regulations provided in said Ordinance No. 6248 of the ordinances of the City of San Diego, the provisions of which ordinance have proven inadequate to afford proper regulation and inadequate to protect the public safety and promote public convenience. That by reason of the inadequacy of the regulation now provided by said Ordinance No. 6248 public safety is endangered and public convenience lessened and this Common Council finds from an investigation and observation of the operation of the auto bus upon the streets of the City of San Diego, as the auto bus is now being operated without adequate regulation seriously endangers the life, limb and property of the inhabitants of said City. In order to afford immediate protection to the life, limb and property of the inhabitants of said City by providing adequate regulations for the operation of such auto buses this measure is declared to be one of urgency. Other facts constituting the urgency in this case are the immediate and proper protection of the life and limb of persons traveling upon the public thoroughfares along and upon which auto buses are now being operated; the immediate and proper protection of the life and limb of persons riding in such auto buses; the prevention of accidents and the prevention of the congestion of traffic.

ORDINANCE NO. 6350.

AN ORDINANCE AMENDING SECTION 10 OF, AND ADDING SECTION 13 (a) TO ORDINANCE NO. 5570, ENTITLED "AN ORDINANCE REGULATING TRAVEL AND TRAFFIC UPON THE PUBLIC STREETS".

BE IT ORDAINED, By the Common Council of the City of San Diego, as follows:

Section 1. That Section 10 of Ordinance No. 5570 of the ordinances of the City of San Diego, entitled, "An Ordinance regulating travel and traffic upon the public streets", be and the same is hereby amended to read as follows:

"Section 10. Every person riding, driving, propelling or in charge of any vehicle crossing from one side of any street to the other side thereof, shall make such crossing by turning to the left so as to be constantly upon the right hand side of such street with relation to the direction in which such vehicle is headed".

Provided, that in the congested district, no vehicles shall be allowed to so cross from one side of a street to the other unless such crossing is effected by such vehicle going beyond and around the center of a street intersection.

Section 2. That a new section to be designated Section 13 (a) is hereby added to and made a part of said Ordinance No. 5570, such new section to read as follows:

"Section 13 (a). It shall be unlawful to drive, ride, propel, or cause or permit to be ridden, driven or propelled any vehicle in said City unless the same be equipped with an adequate warning device which must be operated when such vehicle is about to cross any railroad, street railway, street intersection, or other place where conditions are hazardous for other vehicles, property, or persons in that vicinity."

Section 3. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval. The facts constituting the said urgency are that numerous accidents have lately been caused by vehicles suddenly changing direction in the middle of blocks in the congested district, without notice to other persons upon the street, and by collisions and accidents caused by the lack of warning apparatus, and that a continuation of these conditions is a constant menace to the safety of life and property.

ORDINANCE NO. 6356.

AN ORDINANCE APPROPRIATING \$15,000.00 OUT OF THE WATER FUND OF THE CITY OF SAN DIEGO FOR THE YEAR 1915 FOR THE PURCHASE OF MATERIAL AND LABOR FOR THE REPAIR OF A THIRTY-SIX INCH WATER MAIN IN THE OTAY TUNNEL.

BE IT ORDAINED, By the Common Council of the City of San Diego, as follows:

Section 1. That the sum of Fifteen Thousand Dollars(\$15,000.00) be and the same is hereby appropriated out of the Water Fund of the City of San Diego for the use and purpose

for the the use and purpose only and exclusively, of purchasing material and labor necessary for the repair of the thirty-six inch water main, being in the Otay tunnel, between the Lower Otay Reservoir and the University Heights Reservoir. Provided always, however, that any indebtedness incurred or money expended under the terms of this ordinance shall be incurred and expended pursuant to the terms and provisions of Ordinance No. 5051 of the Ordinances of the City of San Diego.

Section 2. That this is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval. The facts constituting the urgency in this case are as follows: The thirty-six inch water main the repair of which is provided for by this ordinance, is the principal and only supply line between the Lower Otay Reservoir and the University Heights Reservoir by which the City of San Diego is supplied with water for municipal purposes. The condition of this thirty-six inch main is such as to demand immediate repairs, and in the event that said pipe line should burst while the period of thirty days were elapsing for this ordinance to go into effect very serious damage to the City of San Diego would result by reason of the possible inability to meet the demand for water for municipal purposes, thereby greatly endangering the public health and safety.
