## ORDINANCE NO. 8438.

AN ORDINANCE AUTHORIZING A MAJORITY OF THE MEMBERS OF THE HARBOR COMMISSION OF THE CITY OF SAN DIEGO TO ENTER INTO A LEASE WITH UNION OIL COMPANY OF CALIFORNIA, A CORPORATION, FOR CERTAIN TIDE LANDS.

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. A Majority of the members of the Harbor Commission of The City of San Diego are hereby authorized and empowered to enter into a lease with Union Oil Company of California, a corporation, for the leasing to said Union Oil Company of California, of the following described tidelands belonging to the City of San Diego.

Beginning at a point on the U.S. Bulkhead line, as established in 1912, distant North 50° 50' West, 2676.11 feet from Bulkhead Station 110; thence West 1583.33 feet to a point on the U. S. Pierhead line; thence North 50° 50' west along the said Pierhead Line, 300.0 feet to a point; thence North 39° 10' East, 50.0 feet to a point; thence South 50° 50' East, 203.05 feet to a point; thence East 1504.17 feet to a point on the said Bulkhead line; thence South 50° 50' East along the said Bulkhead line 158.33 feet to the point or place of beginning.

Together with the right or franchise to maintain and operate wharves or trestles or both thereon.

Section 2. Said lease shall extend over a term of twenty-five years beginning September 1st, 1921, and said lease shall reserve to the Harbor Commission of The City of San Diego, to the Common Council of said City and to the people of said City, the right and privilege, by ordinance duly adopted, to terminate, change or modify said lease on such terms, reservations and conditions as may be stipulated in said lease.

Section 3. That said lease shall provide for a rental of forty-nine dollars (\$49.00) per month. Said lease shall provide, however, that said rental shall be subject to change or modification by the Harbor Commission of The City of San Diego.

Section 4. That the premises shall be used for a right of way for a pipe line or pipe lines, which said pipe line or pipelines shall be laid under the supervisions, and shall meet with the approval, of the Manager of Operation of said City. Such wharf and any other building or structures erected on said premises shall be in accordance with the ordinances of the City of San Diego, and shall meet with the approval of the said Manager of Operation, and of the Harbor Commission of said City.

Section 5. The amount to be invested in said wharf shall be not less than twenty thousand dollars (\$20,000.00), and work shall be begun on the same within one year after the execution of the lease authorized by this ordinance, and said work of construction shall be completed within one year thereafter.

Section 6. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 1st day of August 1921, by the following vote, to-wit:

MONEYS IN THE TREASURY, FOR THE PURCHASE OF OTAY PIPE LINE AND  
DISTRIBUTING SYSTEM BONDS OF THE CITY OF SAN DIEGO IN THE AMOUNT  
OF \$10,000.00.

FOR THAT WHEREAS, it appears to the Common Council of the City of San Diego that there is now in the City Treasury of said City surplus moneys not required for the immediate necessities of said City in an amount to exceed ten thousand dollars (\$10,000.00); and

WHEREAS, it further appears to said Common Council that said City has now in its possession certain unsold Otay Pipe Line and Distributing System Bonds of The City of San Diego, drawing interest at the rate of five per cent. in the amount of one hundred five thousand dollars (\$105,000.00); and

WHEREAS, it is deemed wise and expedient by this Common Council to invest a portion of the surplus moneys in the City Treasury of said City in some of said bonds, in order that the City may obtain the interest on said bonds; and

WHEREAS, it further appears to said Common Council that said bonds have been advertised for sale, and no bids of more than par and accrued interest have been received; and

WHEREAS, under the laws of the State of California said bonds must be sold for at least par and accrued interest; and

WHEREAS, there is a present need for the moneys for which said bonds were voted,  
NOW, THEREFORE,

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That J. T. Millan, City Treasurer, be, and he is hereby authorized and directed, to purchase, on behalf of The City of San Diego, out of the surplus moneys in the City Treasury not required for the immediate necessities of said City, Otay Pipe Line and Distributing System Bonds in the amount of ten thousand dollars (\$10,000.00), face value thereof; and upon delivery to him of said bonds by the officer in whose custody they are, he is hereby authorized to pay therefor the sum of ten thousand dollars (\$10,000.00), with accrued interest to the date of delivery.

Section 2. By reason of the immediate necessity for the moneys to accomplish the purpose for which said improvement bonds were voted, and in order that the City may obtain the interest on said money for the greatest possible period of time, this ordinance is declared to be one of urgency, and one for the immediate preservation of the public peace, health and safety, and shall become operative and take effect from and after its passage and approval.

AUDITOR'S CERTIFICATE. I Hereby Certify that the appropriation made, or indebtedness incurred, by reason of the provisions of the annexed ordinance, can be made or incurred without the violation of any of the provisions of the Charter of the City of San Diego, California. Dated 8-10-1921.

AN ORDINANCE AMENDING ORDINANCE NO. 7983 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, CALIFORNIA, ENTITLED, "AN ORDINANCE PROVIDING FOR LICENSING AND REGULATING THE CARRYING ON OF CERTAIN PROFESSIONS, BUSINESSES, TRADES, CALLINGS AND OCCUPATIONS, IN THE CITY OF SAN DIEGO, CALIFORNIA", ADOPTED BY THE COMMON COUNCIL OF SAID CITY ON THE 21ST DAY OF APRIL, 1920, BY AMENDING SECTIONS 49 AND 94 THEREOF, BY ADDING NEW SECTIONS THERETO TO BE NUMBERED 91a AND 125a, AND BY REPEALING SECTION 89 THEREOF.

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That Section 49 of Ordinance No. 7983 of the ordinances of the City of San Diego, California, entitled, "An ordinance providing for licensing and regulating the carrying on of certain professions, businesses, trades, callings and occupations, in the City of San Diego, California", adopted by the Common Council of said City on the 21st day of April, 1920, be and the same is hereby amended to read as follows:

Section 49. For every person, firm or corporation conducting, managing or carrying on the business of a club for the purpose of the sale of goods, wares or merchandise of any kind or character, on the installment plan, where any goods, wares or merchandise of any kind are given away for the purpose of advertising said club, or for any other purpose whatsoever, the sum of six hundred dollars (\$600.00) per year.

Section 2. That Section 89 of said Ordinance No. 7983 be and the same is hereby repealed.

Section 3. That said Ordinance No. 7983 be and the same is hereby amended by adding thereto a new section to be numbered 91a and to read as follows:

Section 91a. For every person, firm or corporation conducting, managing or carrying on the business of dealing in second-hand bicycles in connection with the business of dealing in new bicycles, where the principal business of said person, firm or corporation is dealing in new bicycles, the sum of twenty dollars (\$20.00) per year, payable semi-annually.

Section 4. That Section 94 of said Ordinance No. 7983, be and the same is hereby amended to read as follows:

Section 94. For every person, firm or corporation other than those conducting regular places of business in The City of San Diego, peddling, selling or offering for sale articles of apparel, dry goods, fancy goods, notions, jewelry, cutlery, cigars, groceries, leather goods, musical instruments, machinery, hardware, candy, ice cream, or merchandise of every class or character not mentioned in any other section of this ordinance, which has been manufactured, made, raised or produced by the labor of the person peddling, selling or offering for sale the same, the sum of forty dollars (\$40.00) per year or fifty cents (50¢) per day.

Where the aforementioned articles, goods, wares and merchandise have not been manufactured, made, raised or produced by the labor of such person so selling, peddling or offering for sale the same, the sum of fifty dollars (\$50.00) per day.

Provided the provisions of this section shall not apply to businesses licensed under other sections of this ordinance.

Section 5. That said Ordinance No. 7983 be and the same is hereby amended by adding thereto a new section to be numbered 125a and to read as follows:

Section 125a. For every person, firm or corporation conducting, managing or carrying on the business of dispensing soft drinks except by persons, firms or corporations licensed under other provisions of this ordinance, the sum of twelve dollars (\$12.00) per year.

Section 6. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

ORDINANCE NO. 8483.

AN ORDINANCE AUTHORIZING THE CITY TREASURER OF THE CITY OF SAN DIEGO TO INVEST, ON BEHALF OF THE CITY OF SAN DIEGO, SURPLUS MONEYS IN THE TREASURY, FOR THE PURCHASE OF BARRETT DAM FUND NO. 2 BONDS OF THE CITY OF SAN DIEGO IN THE AMOUNT OF \$400,000.00.

FOR THAT WHEREAS, it appears to the Common Council of The City of San Diego that there is now in the City Treasury of said City surplus moneys not required for the immediate necessities of said City in an amount to exceed four hundred thousand dollars (\$400,000.00); and

WHEREAS, it further appears to said Common Council that said City has now in its possession certain unsold Barrett Dam Fund No. 2 Bonds of The City of San Diego, drawing interest at the rate of five per cent. in the amount of four hundred thousand dollars (\$400,000.00); and

WHEREAS, it is deemed wise and expedient by this Common Council to invest a portion of the surplus moneys in the City Treasury of said City in some of said bonds, in order that the City may obtain the interest on said bonds; and

WHEREAS, it further appears to said Common Council that said bonds have been advertised for sale, and no bids of more than par and accrued interest have been received; and

WHEREAS, under the laws of the State of California said bonds must be sold for at least par and accrued interest; and

WHEREAS, there is a present need for the moneys for which said bonds were voted, NOW, THEREFORE,

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That J. T. Millan, City Treasurer, be, and he is hereby authorized and directed to purchase, on behalf of The City of San Diego, out of the surplus moneys in the City Treasury not required for the immediate necessities of said City, Barrett Dam Fund No. 2 Bonds in the amount of four hundred thousand dollars (\$400,000.00), face value thereof; and upon the delivery to him of said bonds by the officer in whose custody they are, he is hereby authorized to pay therefor the sum of four hundred thousand dollars (\$400,000.00), with accrued interest to the date of delivery.

Section 2. By reason of the immediate necessity for the moneys to accomplish the purpose for which said improvement bonds were voted, and in order that the City may obtain the interest on said money for the greatest possible period of time, this ordinance is

declared to be one of urgency, and one for the immediate preservation of the public peace, health and safety, and shall become operative and take effect from and after its passage and approval.

AN ORDINANCE AMENDING ORDINANCE NO. 6248 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, ENTITLED, "AN ORDINANCE REGULATING THE USE OF THE STREETS OF THE CITY OF SAN DIEGO, CALIFORNIA, BY SELF-PROPELLED MOTOR VEHICLES CARRYING PASSENGERS FOR HIRE, AND PROVIDING FOR THE LICENSING OF SUCH VEHICLES AND FOR A PENALTY FOR THE VIOLATION OF THIS ORDINANCE" APPROVED JULY 10TH, 1915, BY ADDING THERETO A NEW

SECTION TO BE KNOWN AS AND NUMBERED 4a.

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That Ordinance No. 6248 of the ordinances of The City of San Diego, entitled, "An ordinance regulating the use of the streets of the City of San Diego, California, by self-propelled motor vehicles carrying passengers for hire, and providing for the licensing of such vehicles and for a penalty for the violation of this ordinance", approved July 10th, 1915, be and the same is hereby amended by adding thereto a new section to be known as Section 4a, and to read as follows:

Section 4a. That in lieu of the bond or policy of insurance provided for by Section 4 of this ordinance, it shall be lawful and it shall be permitted, for any person driving or operating not more than 35 such auto busses, to deposit with The City of San Diego, municipal bonds of the said The City of San Diego, in an amount not less than five thousand dollars (\$5,000.00), together with instructions to the said The City of San Diego, to use the said bonds to satisfy any judgment of any court of this state after said judgment shall have become final; provided, that said judgment shall be rendered against such person so driving or operating such auto bus or auto busses by reason of any accident, to person or property, negligently or otherwise, caused by the operation of said auto bus or auto busses; and provided, further, however, that for every person owning or operating more than 35 auto busses there may be deposited with The City of San Diego, in lieu of giving such bond or receiving such policy of insurance, bonds in the amount of ten thousand dollars (\$10,000.00) instead of the amount of five thousand dollars (\$5,000.00) as hereinbefore set forth. In the event that judgment shall be entered against any person depositing bonds as above required and permitted, such person shall, immediately thereafter and before again operating any auto bus in The City of San Diego, deposit with the said The City of San Diego, additional bonds equal to the amount of the judgment rendered, or shall give the bond or secure the insurance required by Section 4 of this ordinance.

Section 2. That this ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

AN ORDINANCE AUTHORIZING A MAJORITY OF THE MEMBERS OF THE HARBOR COMMISSION OF THE CITY OF SAN DIEGO TO ENTER INTO A LEASE WITH HADLAND-OLSEN COMPANY FOR CERTAIN TIDELANDS.

BE IT ORDAINED, By the Common Council of The City of San Diego, as follows:

Section 1. A majority of the members of the Harbor Commission of The City of San Diego are hereby authorized and empowered to enter into a lease with Hadland-Olsen Company for the leasing to said Hadland-Olsen Company of the following described portions of the tide lands belonging to The City of San Diego:

Beginning at a point on the U.S. Bulkhead line, as established in 1912, distant North 20° 11' 20" West 250.0 feet from the intersection of said bulkhead line with the north-westerly line of Juniper Street, produced southwesterly; thence south 69° 47' 40" west, 250 feet to a point; thence north 20° 11' 20" West, 50 feet to a point; thence north 69° 47' 40" East, 250 feet to a point on said bulkhead line; thence south 20° 11' 20" East, along said Bulkhead line a distance of 50. feet to the point or place of beginning.

Together with the right or franchise to construct, maintain and operate wharves thereon.

Section 2. The said lease shall extend over a term of years beginning Oct. 27, 1921 and ending 4th April, 1943, and said lease shall reserve to the Harbor Commission of the City of San Diego, to the Common Council of said City and to the people of said City, the right and privilege, by ordinance duly adopted, to terminate, change or modify said lease on such terms, reservations and conditions as may be stipulated in said lease.

Section 3. That said lease shall provide for a rental of five dollars (\$5.00) per month. Said lease shall provide, however, that said rental shall be subject to change or modification by the Harbor Commission of The City of San Diego.

Section 4. The premises above described shall be used for the purpose of the construction of ways for the accomodation of the business of boat-building and for the erection of such other structures as may be necessary or incidental to such purpose, such structures erected on said premises to be in accordance with the ordinances of The City of San Diego, and to meet with the approval of the Manager of Operation of said City and of the Harbor Commission of said City.

O R D I N A N C E N O. 8 5 1 2.  
AN ORDINANCE AMENDING SECTION 25 OF ORDINANCE NO. 7825  
OF THE ORDINANCES OF THE CITY OF SAN DIEGO, APPROVED  
AUGUST 11, 1919.

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That Section 25 of Ordinance No. 7825 of the ordinances of The City of San Diego, entitled, "An Ordinance regulating travel and traffic upon the public streets in The City of San Diego, and repealing Ordinance No. 5570, and amendments thereto," approved by the Mayor on the 11th day of August, 1919, be, and the same is hereby amended to read as follows:

"Section 25. (a) Any person operating or driving a motor or other vehicle on the public highways of The City of San Diego shall operate or drive the same in a careful and prudent manner, and at a rate of speed not greater than is reasonable and proper, having regard to the traffic and use of the highway, and no person shall operate or drive a motor vehicle or other vehicle on a public highway within said City at such a rate of speed as to endanger the life or limb of any person or the safety of any property; provided, that it shall be unlawful to operate or drive at a rate of speed in excess of thirty (30) miles an hour, except in the day time and except when the operator or driver has a clear uninterrupted view of the highway on which he is traveling in the direction toward which he is traveling and of all highways which intersect such highway within four hundred (400) feet ahead of such operator or driver, to a distance of at least four hundred (400) feet from the highway on which he is traveling and there is no person, vehicle or other object visible ahead on such highway on which such operator or driver is traveling within four hundred (400) feet of such operator or driver or on any such intersecting highway within four hundred (400) feet of the point of the intersection of the center lines of such highways; provided, also, that in no case shall any vehicle be operated at a rate of speed in excess of thirty-five (35) miles an hour; and provided, further, that in any event no person shall operate or drive a motor vehicle or other vehicle on any public highway where the territory contiguous thereto is closely built up at a greater rate of speed than twenty (20) miles an hour, or in the congested or business district of said City at a greater rate of speed than fifteen (15) miles an hour; provided, further, that no person shall operate or drive a motor vehicle or other vehicle on any public highway within said City at a greater rate of speed than fifteen (15) miles an hour in approaching any steam, electric or other railway crossing at grade, or in approaching or traveling an intersecting highway, or crossing an intersection of highways, or in approaching or going around corners or curves in the highway, when in any of the foregoing cases the operator's or driver's view of the road or railway traffic is obstructed, but anything to the contrary herein notwithstanding, no person shall operate or drive a motor vehicle on any public highway within said City at a greater rate of speed than ten (10) miles an hour in traversing any steam, electric or other railway crossing at grade when the operator's or driver's view of the crossing or of any traffic on such railway within four hundred (400) feet of such crossing is obstructed.

The Manager of Operation of said City shall install and thereafter maintain warning signs on every public street or highway approaching the crossing at grade of such street or highway and the tracks of any railway, at a reasonable distance, not less than three hundred (300) feet, from such crossing, and on either side thereof. Such sign shall consist of the sign described and provided for in the Motor Vehicle Act of the State of California, in Section 22 thereof.

(b) No motor or other vehicle carrying a weight in excess of nine thousand (9000) pounds, including the vehicle, shall be operated, driven, drawn or otherwise moved on any public highway or bridge within The City of San Diego at a rate of speed greater than twenty-five (25) miles an hour; no motor or other vehicle carrying a weight in excess of twelve thousand (12,000) pounds, including the vehicle, shall be operated, driven, drawn or otherwise moved on any public highway or bridge within said City at a rate of speed greater than fifteen (15) miles an hour; no motor or other vehicle carrying a weight in excess of twenty-four thousand (24,000) pounds, including the vehicle, shall be operated, driven, drawn or otherwise moved on any public highway or bridge within said City at a rate of speed greater than ten (10) miles an hour; provided, however, that no motor vehicle or trailer equipped with tires made wholly or partly of metal shall be operated, driven, drawn or otherwise moved on any public highway or bridge within said City at a rate of speed greater than six (6) miles an hour; provided, further, that any such motor vehicle or trailer with tires made wholly or partly of metal may be operated, driven, drawn or otherwise moved, subject to the other provisions of this ordinance, up to ten (10) miles an hour, if it be equipped with springs and if the rear wheels be not less than forty-six inches in diameter, with a bearing surface of not less than eighteen inches; and provided, further, however, anything to the contrary herein notwithstanding, that no motor or other vehicle constructed or otherwise adapted for carrying loads weighing four (4) tons or more, exclusive of such vehicle, shall be operated, driven, drawn or otherwise moved upon the public highway within said City, whether laden or unladen, at a rate of speed exceeding fifteen (15) miles an hour; and provided, further, that nothing contained in this section shall apply to motor vehicles equipped with pneumatic tires.

(c) In case of any person arrested for violation of the provisions of this section, unless such person shall demand that he be taken forthwith before the City Justice of the Peace, the arresting officer shall take the name and address of such person and the number of his motor vehicle and notify him in writing to appear before such City Justice of the Peace at a time and place to be specified in such writing at least twelve (12) hours subsequent to the date of such notice, upon the promise in writing of such person to appear at such time and place, such officer shall forthwith release him from custody. In the event that any person arrested for any violation of the provisions of this section demands to be or is taken forthwith after his arrest before said City Justice of the Peace he shall be entitled to at least twenty-four hours' continuance of his case within which time to prepare to plead or prepare for trial, and he shall not be required to plead or be tried within twenty-four hours unless he waives such time in writing or in open court; provided, that he promises in writing after notice in writing of the time and place for his further appearance in court to appear at such time and place. Upon the giving of such written promise, or, if he refuse to give such promise, on bail fixed by the City Justice of the Peace, he shall thereupon be forthwith released from custody. Any person wilfully violating such promise shall be guilty of a misdemeanor regardless of the disposition of the charge upon which he was originally arrested.

(d) Any person found guilty of a violation of the terms and provisions of this section shall be guilty of a misdemeanor, and upon conviction thereof shall be fined for the first offense not less than ten dollars (\$10.00), nor more than one hundred dollars (\$100.00), or imprisonment in the City Jail for a period not to exceed thirty (30) days, or shall suffer both such fine and imprisonment; for the second offense within a period of one year from the date of such first offense the fine shall be not less than fifty dollars (\$50.00), nor more than two hundred dollars (\$200.00), or imprisonment in the City Jail for a period not less than thirty (30) days nor more than one hundred (100) days, or by both such fine and imprisonment; for the third or any subsequent offense within said period of one year, the fine shall be not less than one hundred dollars (\$100.00), nor more than five

hundred dollars (\$500.00), or imprisonment in the City Jail for a period not ~~to exceed thirty~~  
~~(30) days nor shall such fine and imprisonment for the second offense within~~  
~~a period of one year from the date of such first offense the fine shall be not less than~~  
~~five hundred dollars (\$500.00) nor more than two hundred dollars (\$200.00) nor imprisonment in the~~  
~~City Jail for a period not to exceed thirty (30) days nor more than one hundred (100) days~~  
~~nor both such fine and imprisonment for the third or any subsequent offense with in such~~  
~~period of one year the fine shall be not less than one hundred dollars (\$100.00) nor more~~  
~~than five hundred dollars (\$500.00) nor imprisonment in the City Jail for a period not less~~  
 than fifty (50) days, nor more than six (6) months, or by both such fine and imprisonment.

(e) Nothing in this Section contained shall be construed to affect members of the City Fire Department or employees or officials of the City Water Department or Police Department when assigned to answer fire alarms or emergency calls, or any policeman or peace officer in the discharge of his duty.

(f) The Manager of Operation is hereby directed to post such notices as are required by law at the intersection of each street within the line of the congested or business district hereinbefore in this ordinance described."

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 2nd day of November 1921, by the following vote, to-wit:

ALLEN H. WRIGHT  
City Clerk of the City of San Diego, California.  
BY Y. A. JACQUES, DEPUTY.

ORDINANCE NO. 8555.  
AN ORDINANCE AMENDING ORDINANCE NO. 5856 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, CALIFORNIA, ENTITLED, "AN ORDINANCE ESTABLISHING RULES AND REGULATIONS FOR GOVERNING OF ALL PIERS, WHARVES, BULKHEADS AND LANDINGS, OWNED AND OPERATED BY THE CITY OF SAN DIEGO, CALIFORNIA," APPROVED OCTOBER 14, 1914, BY AMENDING SECTIONS 12, 16, 18, 20, 42, 46, 49, 57, 58, 59, 62, 65, 71, 74, 80, 84, 85, 90 AND 104 THEREOF.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That Section 12 of Ordinance No. 5856 of the ordinances of The City of San Diego, California, entitled, "An Ordinance establishing rules and regulations for governing of all piers, wharves, bulkheads and landings, owned and operated by The City of San Diego, California," approved October 14, 1914, be, and the same is hereby amended to read as follows:

"Section 12. No substance that will sink or form an obstruction to navigation shall be deposited in the water or on the shore of the harbor without first obtaining permission, in writing, from the Common Council or the Harbor Commission of The City of San Diego."

Section 2. That Section 16 of said Ordinance No. 5856, be, and the same is hereby amended to read as follows:

"Section 16. If any vessel leaves a wharf, slip, dock, channel or basin, unless forced to do so by stress of weather or fire, without first paying the dockage or tolls due, such vessel will be placed upon the Delinquent List, and must not be permitted to use any wharf, slip, channel, or basin without first paying double the bill incurred, and \$10.00 in addition thereto, unless exempted by the Harbor Commission of The City of San Diego."

Section 3. That Section 18 of said Ordinance No. 5856, be, and the same is hereby amended to read as follows:

"Section 18. In case any damage is done to a wharf, shed or other structure on the water front by a vessel or otherwise, the said damage, together with the name of the vessel or person causing it, must be reported in writing forthwith by the Wharfinger giving the date and hour, if possible, and the names and addresses of the person or persons that witnessed the accident, and the expense of the repair of said damage shall be charged against said vessel or individual. The Chief Wharfinger shall forthwith report said damage to the Harbor Commission of The City of San Diego."

Section 4. That Section 20 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 20. The same charge for dockage shall be made for Sundays or legal holidays."

Section 5. That Section 42 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 42. The Harbor Commission of The City of San Diego may, upon application release parties from the obligation of delivering statements and paying tolls upon cargo in

the manner required by these rules, provided, such parties make written application to be placed upon the Credit List, and if such application be granted, the said Harbor Commission may require a deposit to cover the probable amount of such person's tolls in any one month; and thereafter such person must, on or before the third day of each month, deliver at the office of the Chief Wharfinger a statement on blanks furnished by the Chief Wharfinger for that purpose, specifying, as per schedule adopted by the Council, the character and quantity of each kind of merchandise discharged from or received at each wharf upon each trip of each vessel of which such person is the owner, master, agent, manager, or consignee during the preceding month, and must, upon presentation of bill therefor, pay the tolls thereon.

And in case of a failure to furnish such statement or pay such tolls, the permission shall be at once revoked, and the vessel or vessels from which the merchandise or cargo has been discharged, or upon which received, shall be placed on the Delinquent List; and the Chief Wharfinger must immediately notify the Collectors of that fact, and apply the said deposit toward the payment of such tolls, and the balance of said deposit, if any, shall be returned to the person who made it."

Section 6. That Section 46 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 46. The Harbor Commission of The City of San Diego, in its discretion, may upon application release parties from the obligation of paying dockage, on vessels in the manner required by these rules, provided such parties make written application to be placed on the Credit Dockage List. Said application must give the names and class of vessels of which they are the owners, managers, agents or consignees and must agree to pay on presentation, until written notice to the contrary, the dockage bills on all such vessels. If such application be granted, such person must on presentation of bill therefor pay such dockage. In case of failure to pay such bill on presentation, the permission shall be revoked."

Section 7. That Section 49 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 49. Vessels with no cargo on board while lying idle at a wharf.

(2) Vessels while receiving or discharging ballast or receiving stiffening.

(3) Vessels discharging, loading or lying idle, while occupying outside berths.

(4) Vessels while moored in docks, slips, basins, or canals.

(5) Vessels engaged in towing and vessels not engaged in carrying freight and passengers not entitled to half rates.

(6) Vessels with no cargo on board, while undergoing repairs.

(7) Vessels taking on fresh water."

Section 8. That Section 57 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 57. A charge of twenty-five cents (25¢) for each thousand gallons of water or fraction thereof furnished shall be made; provided, however, that no water whatsoever shall be furnished for a less charge than fifty cents (50¢)."

Section 9. That Section 58 of said Ordinance No. 5856 be and the same is hereby amended to read as follows:

"Section 58. Boats of ten (10) tons and under will be charged \$5.00 per month for landing privileges.

Boats over ten (10) tons and under fifteen (15) tons will be charged \$10.00 per month for landing privileges.

Boats of ten (10) tons and under landing at the Municipal Float and not paying a monthly rental, will be charged fifty cents (50¢) per landing, and will not be allowed to remain in berth at float.

Boats over ten (10) tons and under fifteen (15) tons landing at the Municipal Float and not paying a monthly rental will be charged fifty cents (50¢) per landing, and will not be allowed to remain in berth at float.

No vessel over fifteen (15) tons will be permitted to land at any Municipal Float.

No fishing boats will be allowed to land fish, except dried fish in bundles ready for shipment.

Bundles of dried fish to be removed immediately after being discharged from boat.

A charge of ten cents (10¢) per hundred pounds shall be imposed on all dried fish being transported over a Municipal Float.

The Chief Wharfinger reserves the right to move any boat at a Municipal Float.

Applications for landing privileges shall be made to the Chief Wharfinger."

Section 10. That Section 59 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 59. (a) Inclusive of Sundays and legal holidays, the free time allowed for assembling cargo upon space assigned shall be as follows:

(1) Coastwise and Intercoastal -----10 days

(2) Foreign and Offshore-----15 days.

(b) Time shall date from the receipt of the first package of a lot, or the date from which space is reserved; provided, that if the vessel for which cargo is assembled shall for any reason fail to take same, and sails or finishes loading before the expiration of the free time to which the said cargo otherwise would be entitled, then free time shall end, and demurrage begin at seven o'clock A.M. following such sailing or time vessel finishes loading.

(c) Inclusive of Sundays and legal holidays, the free time allowed on incoming cargo, upon space assigned, shall be as follows:

(1) Coastwise and Intercoastal ----- 5 days

(2) Foreign and Offshore -----15 days.

(d) Time shall date from seven o'clock A.M., after the vessel delivering same finishes unloading or leaves wharf.

(e) Only when necessary is free period provided herein to be fully utilized or taken advantage of, and the Traffic Manager is empowered at any time to shorten such free period and to cause the removal of any cargo, or portion thereof, at the expense of the owner or consignee irrespective of the free period.

The Wharfinger is hereby authorized, when the owners or consignees of merchandise desire it, and it can be done without interfering with the business of the wharf, to allow merchandise to remain on the wharf after the prescribed time, at a wharfage charge equal to an additional toll for every forty-eight hours, or part thereof, Sundays and legal holidays not excepted."

Section 11. That Section 62 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 62. And for the purpose of keeping the wharves, piers, basins, channel and thoroughfares free of obstructions, the Chief Wharfinger shall cause a written notice to be served on the owner, agent, consignee or person in possession of any such obstructing material or structure, or may post a notice thereon, at his discretion, requiring its removal within twenty-four hours thereafter, and on failure to comply therewith the Chief Wharfinger may remove, store, or sell the same by public auction, at his discretion. From the Proceeds of any such sale shall be retained all the wharfage and tolls due with ten per cent. (10%) thereon, and in case of obstruction, twenty-five dollars (\$25.00) for

each and every day during which the wharf, pier or thoroughfare has been obstructed, and also all the expenses attending such sale, and the surplus, if any, shall be paid to the proper party. Such sale shall be made subject to immediate removal."

Section 12. That Section 65 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 65. Wharf rental rates for spaces assigned shall be as follows:  
Per month of part thereof.

- (1) Wharf with Transit Shed per sq. ft. \$.006
- (2) Wharf with Umbrella " " " \$.004
- (3) Wharf, Open or Bulkhead " " " \$.003

(a) Wharves used exclusively, or nearly so, for passenger business, will be charged double the above rates.

(b) In computing rental charges for wharf space, the rates above shall apply per square foot of wharf decking or floor space."

Section 13. That Section 71 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 71. No motor vehicle operated by gasoline, or any product of petroleum, except it be in immediate transit to or from a ferry-boat, shall be admitted on any wharf or dock under the jurisdiction of the Common Council of The City of San Diego, unless the owner or owners thereof shall have first been granted a permit by the Chief Wharfinger for said vehicle to enter upon said wharves and docks; said vehicle to be identified by its registered number, and also by a wharf number designated by the Chief Wharfinger."

Section 14. That Section 74 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 74. Upon notification by the Chief Wharfinger that any permit has been cancelled or revoked, the Wharfinger or Collector on duty at the pier or bulkhead at which the vehicle for which said permit was granted applies for entrance must deny such entrance, and take from the vehicle the wharf number attached thereto and shall also take up the permit granted by the Chief Wharfinger to such vehicle."

Section 15. That Section 80 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 80. The owner, owners or operator of any motor vehicle operated by gasoline, or any product of petroleum, who shall wilfully disregard these rules, shall be reported at once to the Chief Wharfinger, who may thereafter deny the offender or offenders further admission to and transit across the City wharves and docks."

Section 16. That Section 84 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 84. He shall require the docks, slips, wharves, piers and other premises under the jurisdiction of the Common Council to be kept free from all obstructions; and when parties fail to obey his order to remove the same he must forthwith report the fact to the Harbor Commission of The City of San Diego, and execute orders in relation thereto."

Section 17. That Section 85 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 85. He must supervise the Wharfingers and Collectors, and report to the Harbor Commission of The City of San Diego all cases of failure to perform their duties. He must, before ten o'clock A.M. each day, except legal holidays, collect the reports and moneys of the Wharfinger and Collectors, respectively, for the preceding day. He must, in person, or by the Wharfinger, examine the reports of the Wharfinger, and if he finds them correct certify to their correctness; but if he finds any of them incorrect, he must cause them to be corrected, and then certify to their correctness."

Section 18. That Section 90 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 90. Whenever any vessel shall be ready to leave any wharf, outside berth, slip, or dock, or sooner, if the Chief Wharfinger shall so direct, the Wharfinger in charge of the wharf, slip, or dock must make out the bill due from such vessel for dockage, and hand same to the Collector, who must collect said bill or procure a Credit Dockage slip, as mentioned in Rule 47, before the vessel shall be allowed to depart. If, however, such vessel is on the Credit Dockage List, then such bill must be forwarded at once to the Chief Wharfinger for collection."

Section 19. That Section 104 of said Ordinance No. 5856 be, and the same is hereby amended to read as follows:

"Section 104. If any Wharfinger or Collector desires to be absent from his place of duty, he must apply to the Chief Wharfinger for leave of absence, who is authorized to grant such leave for a period of not less than a half a day, nor more than three days. If he desires to be absent for a longer time the Chief Wharfinger must apply to the Civil Service Commission; and if any other officer or employee desires to be absent from his place of duty he must before leaving, obtain permission from the Chief Wharfinger. All leaves of absence shall be applied to and be deducted from applicant's annual vacation. Any violation of this Rule shall be deemed a just cause for dismissal."

Section 20. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

AN ORDINANCE TRANSFERRING THE SUM OF \$5000.00 FROM THE  
GENERAL FUND TO THE OPERATING DEPARTMENT FUND OF THE CITY  
OF SAN DIEGO.

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. That the sum of three thousand dollars (\$3000.00) be, and the same is hereby transferred from the General Fund of The City of San Diego to Item 34, Series P, Operating Department Fund, as provided by Section 9 of Ordinance No. 8220 of the ordinances of said City, for the purpose of providing funds with which to install water connections in said City.

Section 2. That the sum of two thousand dollars (\$2000.00) be, and the same is hereby transferred from the General Fund of The City of San Diego to Item 62, Series P, Operating Department Fund, as provided by Section 9 of Ordinance No. 8220 of the Ordinances of said City, for the purpose of providing funds with which to install sewer connections in said City.

Section 3. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of emergency, and shall take effect and be in force from and after its passage and approval. The urgency in this case consists of the fact that new buildings being constructed in the City of San Diego must be connected with water mains and sewer mains in order to render them safe for human habitation, and the transfer of funds is immediately necessary to provide for such safeguards.

Total Allowances ...		\$2,627,255.65
Estimated Revenue ..		825,255.65
Amount for Tax Levy.		\$1,802,000.00

Section 26. Each department of The City of San Diego shall limit its expenditures to the amounts and for the purposes herein set forth under the respective departmental titles and designated by serial number.

Section 27. No transfer from one fund to another shall be made unless by special direction of the Common Council manifested by ordinance. Every requisition issued in conformity with Ordinance No. 5051, in addition to all other matters, shall contain the maximum amount of the charge to be made against the item drawn upon, and no expenditure shall be made which exceeds the maximum figure contained in the requisition therefor, and any claim based upon an amount exceeding the maximum amount contained in said requisition shall be invalid as against The City of San Diego. Each requisition shall be presented to the City Auditor for his approval as to funds before any indebtedness thereon shall be incurred and before any claim based upon said requisition shall become a legal charge against any item contained in this ordinance. It shall be unlawful for any department to expend during any one month of the ensuing fiscal year more than one twelfth of the amount allotted to said department for said fiscal year, except as may be by ordinance of the Common Council otherwise provided.

Section 28. There is hereby appropriated out of the General Fund of The City of San Diego to the departments named in the foregoing sections of this ordinance the various sums of money specified therein, for the purpose of conducting the business of said departments of the city government during the fiscal year beginning January 1st, 1922.

Section 29. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the urgency in this case are that by reason of the provisions of the charter requiring the Common Council and Auditor to estimate the probable expenditures of the various departments of the City for the ensuing fiscal year, and the additional fact that the tax rate for said fiscal year shall be based upon said estimated expenditures, it is necessary that an ordinance limiting the amounts to be expended by the various departments should be in effect as of January 1st, 1922.

DATED December 27, 1921.

H. L. MOODY, CITY AUDITOR

AUDITOR'S CERTIFICATE. I HEREBY CERTIFY that the appropriation made, or indebtedness incurred, by reason of the provisions of the annexed ordinance, can be made or incurred without the violation of any of the provisions of the Charter of the City of San Diego, California. Dated 12-21-1921.

AN ORDINANCE RELATING TO AND REGULATING SANITARY PLUMBING AND DRAINAGE,  
AND PRESCRIBING THE CONDITIONS UNDER WHICH PLUMBING MAY BE CARRIED ON  
IN THE CITY OF SAN DIEGO, CALIFORNIA.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

EXAMINATIONS, LICENSES, BONDS AND REGISTRATION.

Section 1. A Board of Plumbing Examiners composed of a member of the Common Council, the Health Officer, the Plumbing Inspector, one Master Plumber and one Journeyman Plumber, is hereby established in The City of San Diego, California. The Common Council shall appoint one of its members to the Board of Plumbing Examiners. The Health Officer shall be the Ex-officio Chairman of said body, and the Plumbing Inspector Ex-officio Secretary. The other members shall be appointed by the Board of Health. All appointments shall terminate on December 31st of the year in which they are made.

Section 2. The compensation of said Master Plumber and said Journeyman Plumber, while serving on the Board of Plumbing Examiners, is hereby fixed at eight dollars (\$8.00) per day each, payable out of the Public Health Fund.

Section 3. Any person desiring to carry on, engage in, or work at the business of plumbing in The City of San Diego, California, shall first pass an examination before the Board of Plumbing Examiners, showing his practical experience, sufficient knowledge, and ability to properly carry on, engage in, or work at the plumbing business.

Section 4. The fee for each and every Journeyman Plumber's examination shall be two dollars and fifty cents (\$2.50), and for each and every Master Plumber's Examination, five dollars (\$5.00). Said fees shall be paid in advance to the Clerk or employee of the Board of Health designated by the Health Officer to receive such fees, which shall be paid into the City Treasury, and placed in the General Fund. Provided, however, that after a journeyman plumber has made application and paid the fee for a journeyman plumber's examination, the Plumbing Inspector may, in his discretion, issue to him a temporary permit to engage in the work of plumbing until the next examination is held by the Board of Plumbing Examiners. The Plumbing Inspector may, at any time, revoke such temporary permit.

Section 5. All Master and Journeyman Plumbers shall be held responsible for the quality of their workmanship, and shall be subject to reexamination, if the Plumbing Inspector, after inspecting their work, is of the opinion that they lack the necessary ability to do the same in conformance with the letter and spirit of this ordinance. When the Plumbing Inspector orders such a re-examination, the Master or Journeyman Plumber's License shall thereupon become suspended, and during suspension for re-examination, it shall be unlawful for him to do plumbing in The City of San Diego. He shall be entitled to such re-examination within ten (10) days from the date the same is ordered, and no fee shall be charged therefor.

Section 6. It is hereby declared to be unlawful for any person to practice the trade of Plumbing, or to install any plumbing fixtures, or to do any plumbing work of any kind or character, in The City of San Diego without first having obtained a license so to do pursuant to the terms and provisions of this ordinance, and before obtaining such license it shall be necessary for every such person to pass an examination in accordance with the terms and provisions of this ordinance.

Section 7. After a journeyman plumber has passed an examination to the satisfaction of the Board of Plumbing Examiners, and is registered in accordance with Section 15 of this ordinance, a license shall be issued to him by the City Auditor.

Section 8. Upon passing a Master Plumber's examination to the satisfaction of the Board of Plumbing Examiners, and upon the filing and approval of a bond in accordance with Section 13 of this ordinance, and registration in accordance with Section 16 of this Ordinance, an applicant for a Master Plumber's License shall be entitled to a license, and the City Auditor is hereby authorized and directed to issue said applicant such license, providing that he complies with the full meaning of Section 3 of this ordinance.

Section 9. All licenses shall expire on the last day of December of the year in which they are issued, unless sooner revoked.

Section 10. On or before the first day of January of each year, every Master and Journeyman Plumber carrying on the business of Plumbing in said The City of San Diego shall make application for a new license for the ensuing calendar year. Said license shall be issued free of charge to Journeyman Plumbers. The fee for the renewal of a Master Plumber's license shall be five dollars (\$5.00), payable when application is made, to the Clerk or employee of the Board of Health of said City designated by the Health Officer to receive such fees, which shall be paid into the City Treasury, and placed in the General Fund.

Section 11. An applicant for a Master Plumber's License shall be at least twenty-one (21) years of age.

Section 12. In case of a conviction in a Court of competent jurisdiction of any person licensed under the terms and provisions of this ordinance of a violation of any of the terms and provisions of this ordinance, it shall be the duty of the Clerk of said Court to furnish a transcript of said judgment of conviction to the Board of Health, who shall thereupon have power to suspend or revoke the license of such person so convicted for a period of time not exceeding six months.

Section 13. Before registering under the terms and provisions of this ordinance, every Master Plumber shall give a surety bond to The City of San Diego, in the sum of One thousand dollars (\$1000.00), or a personal bond in said penal sum, with two good and sufficient sureties, for the faithful discharge of his duties as a Master Plumber, which said bond shall be filed with the City Clerk, to whom a filing fee of One Dollar (\$1.00) shall be paid. All such bonds shall be approved by the City Attorney and the Common Council in open session, and filed by the City Clerk.

Section 14. On or before the first day of January of each year, every Master Plumber carrying on the business of Plumbing in The City of San Diego, shall file a new bond with the City Clerk, complying with all the conditions referred to in this ordinance.

Section 15. Every person desiring to engage in the business of Plumbing in The City of San Diego, as a Journeyman Plumber, after having passed an examination to the satisfaction of the Board of Plumbing Examiners, shall sign the Journeyman Plumber's Register in the office of the Board of Health, giving his residence, age and nativity.

Section 16. Every person desiring to engage in the business of Plumbing in The City of San Diego as a Master Plumber, after having passed an examination to the satisfaction of the Board of Plumbing Examiners, in accordance with Section 3 of this ordinance, and after having filed a bond that has been duly approved in accordance with Section 13 of this Ordinance, shall sign the Master Plumber's Register in the office of the Board of Health, giving his place of business, age and nativity.

Section 17. Any firm or corporation desiring to engage in the Plumbing business must have one active member or employee who holds a Master Plumber's license, and who is duly

registered in the office of the Board of Health. He must also register the name of the firm or corporation which he represents and for whose actions, in so far as compliance with this ordinance is concerned, he shall be held personally responsible.

Section 18. Each and every year after filing a new bond and applying for a new license, master plumbers shall again sign the Master Plumber's Register in the office of the Board of Health. This must be done on or before January 31st.

Section 19. Each and every year after obtaining a new license, journeyman plumbers shall again sign the journeyman plumber's Register in the office of the Board of Health. This must be done on or before January 31st.

Section 20. It shall be the duty of every licensed Master Plumber to display a sign at his place of business with his full registered name, the same as in his bond, and showing thereon his number, and no person other than a registered licensed plumber shall be allowed to display any such sign, carry on, or engage in the business of plumbing, or make any connections with any sewer, drains, soil, vent or waste pipe, until all requirements of this ordinance are complied with.

Section 21. Any person desiring to engage in the business of plumbing as an apprentice shall obtain a permit from the Board of Plumbing Examiners, which will be issued free of charge. An apprentice shall only be allowed to do plumbing work under the direct supervision of and with a licensed Master or Journeyman Plumber, who shall be held responsible for the work of such apprentice.

Section 22. At the time of obtaining a permit, an apprentice shall sign the Apprentice's Register in the office of the Board of Health, giving his age, residence address, and the name and address of his employer.

#### DUTIES OF THE PLUMBING INSPECTOR.

Section 23. The Plumbing Inspector shall inspect in a thorough manner all plumbing installed in old and new buildings in The City of San Diego. It shall be his duty to see that the terms and provisions of this ordinance or any amendment thereto are complied with; he shall examine all plans and specifications of contemplated buildings and improvements, alterations and repairs that are filed with the Building Department, so far as said plans and specifications shall relate to plumbing or sanitary conditions thereof.

Section 24. If the plans relating to plumbing are found to be incorrect or faulty, they shall be disapproved, and the applicant notified of the corrections necessary to comply with the rules and regulations of the Board of Health and the City Plumbing Ordinance.

Section 25. Before a Master Plumber shall install any plumbing work he shall file with the Board of Health an application in writing for a plumbing permit, together with a diagram or plan showing clearly the character and kind of plumbing work to be done under said application. Said plan or diagram shall also show the manner in which the plumbing installation is to be made, or the character of any repairs to any existing plumbing. Said application shall be made out on a blank which shall be furnished by the Board of Health. In addition, the foregoing or following information shall appear thereon: Street and house number of premises where the plumbing work is to be done; date; names of the owner and plumbing contractor; class of building; number of stories; and a list of the plumbing fixtures.

Section 26. If the Plumbing Inspector has found the plumbing permit application to be correct, he will issue to the applicant a plumbing permit, on receipt of which the Master Plumber may commence the plumbing installation described in his application.

Section 27. When the rough plumbing work is completed on any premises the Master Plumber shall notify the Plumbing Inspector that the job is ready for inspection. As soon thereafter as he may find it practicable the Plumbing Inspector shall cause an inspection to be made of the Plumbing. If said plumbing work has been installed in accordance with the terms and provisions of this ordinance and amendments thereto, and the rules and regulations of the Board of Health, the Plumbing Inspector shall post an inspection card in a conspicuous place upon the said property, noting thereon the date and approval of work, together with his signature.

Section 28. If the plumbing work is found to be incorrectly, faultily, or defectively installed, the Plumbing Inspector shall immediately notify the Master Plumber who installed said work, advising him of the changes necessary to be made in order that the same shall conform to the City Plumbing Ordinance and the rules and regulations of the Board of Health. As soon as practicable upon receipt of such notification, the Master Plumber shall make the changes ordered, and upon the completion thereof he shall notify the Plumbing Inspector to that effect. The latter shall then cause a reinspection to be made, and if said plumbing work is found to conform to the City plumbing ordinance and the rules and regulations of the Board of Health, he shall place upon the building or premises, in a conspicuous place, an Inspection Certificate, endorsing thereon his approval.

Section 29. Immediately upon the completion of all finished plumbing installed in any building or in any premises, the Master Plumber shall notify the Plumbing Inspector that such work is ready for a final plumbing inspection. The Plumbing Inspector shall then cause an inspection to be made, and if any faulty or defective plumbing is found, the Master Plumber shall be notified of the changes necessary to be made in order that such work shall conform to the City Plumbing Ordinance and the rules and regulations of the Board of Health. If such Plumbing work is found to be correctly installed, the Plumbing Inspector shall endorse his approval on the Inspection Certificate issued when the rough plumbing work was approved.

Section 30. The Plumbing Inspector or the contractor Master Plumber may recommend to the Common Council that Special Plumbing Permits for the installation of plumbing work in a manner differing from the provisions of this ordinance be granted, when in the judgment of either party it is necessary so to do. Said special permits may be granted by the Common Council. Upon the completion of this work in conformity with such special permits, the Plumbing Inspector shall issue a final certificate of approval of said work. A book shall be kept by the Plumbing Inspector in which a record of all such special permits shall be made.

Section 31. The journeyman plumber, or plumbers installing the plumbing work in any building shall have his name written by the plumbing Inspector on the plumbing diagram.

Section 32. Before a permit shall be issued, fees in accordance with the table below shall be paid:

For each permit,	50¢
(Add) for each connection ready to receive a future fixture	25¢
(Add) for each connection to any soil or waste line other than plumbing fixtures,	25¢
Soil Line Extensions only, (permit charge)	50¢

Plumbing permits are not transferable.

No fixture charge is made for indirect plumbing connections.

Minimum charge for a permit shall be

50¢

Section 32. If plumbing work under a permit is not commenced within six months after the issuance of such permit, or the work discontinued for a period of one year from the date of the issuance thereof, the permit shall thereupon become void, and no work shall be done on the premises until a new permit is issued, and all fixture fees paid.

Section 33. When one Master Plumber completes the rough work, in whole or in part, on any plumbing job in The City of San Diego, and the second party is called upon to com-

plete the said plumbing work in whole or in part, then a separate permit without charge is required. Each person holding a permit for the construction of such work shall be held responsible only for the work he installed. Before the second party is issued a permit for the completion of the plumbing job, the Plumbing Inspector shall first notify the Master Plumber holding the original or first permit that a second permit is to be issued. The issuance of the second permit shall cancel the first permit. A second permit shall be invalid until such notice is given.

Section 34. The Plumbing Inspector shall, on the first of each month, issue a report to the Board of Health, which report shall contain the number of applications for plumbing permits received, the number of plumbing diagrams approved, the number of rough and final inspections made, the number of violations of the City Plumbing Ordinance and the rules and regulations of the Board of Health, if any; and all other matters which may from time to time be required by the Board of Health, with reference to and appertaining to plumbing conditions in The City of San Diego.

Section 35. The Assistant Plumbing Inspectors shall act under the direct orders of the Plumbing Inspector, and assist him in the discharge of his duties.

Section 36. The plumbing Inspector and the Assistant Plumbing Inspectors shall wear appropriate badges, upon exhibition of which they shall have the right to inspect any and all buildings and premises in The City of San Diego, in the performance of their duties.

#### DEFINITIONS.

Section 37. Whenever the term "Board of Health" appears in this ordinance, the Board of Health of The City of San Diego, California, is meant.

Section 38. Whenever the term "Department of Health" is mentioned in this ordinance, the "Department of Health," or the "Health Department" of The City of San Diego is meant.

Section 39. Whenever the term "Plumbing Inspector" appears in this ordinance, the Plumbing Inspector in the employ of the Board of Health of The City of San Diego is meant.

Section 40. "Assistant Plumbing Inspector," is the person or persons who shall assist the Plumbing Inspector in the discharge of his duties.

Section 41. "Plumbing" includes all drainage and vent piping in a building, or within the boundaries of any property line through which sewage or waste waters, or any substance or liquids are conveyed.

Section 42. "The Durham" or "Screw Pipe" system of plumbing shall include all soil waste and vent pipes which are of galvanized iron.

Section 43. "House" or "Building" shall include all architectural structures.

Section 44. A "story" is the distance from the top of one floor to the top of the next above, except in the case of a top story, the height of which shall be measured from the top of the floor to the underside of the ceiling joist.

Section 45. The "first story" is the first floor above a cellar. If there is no cellar, then the actual ground level is the first story.

Section 46. "A Cellar" is that portion of a building below the first story, the ceiling of which is not less than four (4) feet in the clear, the measurements to be taken from the bottom side of the ceiling joist to the finished floor.

Section 47. A "Basement" is a portion of a building partly below the level of the curb, or the actual adjoining ground level, the ceiling of which in no part is less than seven (7) feet above the curb level or actual adjoining ground level. A basement is a story.

Section 48. A "Court" or "Deck" is an open, unoccupied space on the same lot with a building, partially or entirely enclosed by the walls of said building.

Section 49. A "common court" is an open unoccupied space, open from the ground to the sky, surrounded on two or more sides by a group of four (4) or more residence buildings of not more than one story in height, and for the common use of all persons occupying the buildings that constitute a Bungalow Court.

Section 50. A "Bungalow Court" is a group of four (4) or more separate buildings not more than one story in height, each building erected or located on a parcel of ground under a separate roof as a family domicile or residence. The front entrances constituting a Bungalow Court may occupy any number of lots, and may connect to one common soil line.

Section 51. A "Corner Lot" shall be known as a parcel of ground that has a frontage on two or more streets, or one street and a public or private thoroughfare, park, or alleyway, or a combination of either. The width of a corner lot shall never be more than fifty (50) feet, and the length shall never be more than one hundred and fifty (150) feet. All lots not corner lots shall be considered inside lots.

Section 52. A "Yard" is the unoccupied portion of a lot on which there is one or more buildings.

Section 53. An "Inside Lot" shall be known as a parcel of ground with a frontage of not more than fifty (50) feet, abutting on a street, alley, public or private thoroughfare, the width of which shall be not greater than its frontage, nor more than fifty (50) feet. No inside lot shall have a frontage of more than one street, alley, park or public or private thoroughfare.

Section 54. The "curb level" is the level opposite the center of the front of the lot.

Section 55. "Sewer Pipe" is the term applied to any salt-glazed, vitreous tile cement, or earthenware pipe, used to convey the common sewage of any community.

Section 56. "Soil Pipe" is the term applied to any pipe receiving the effluent from one or more water closets, or clinic sinks, with or without connecting with any other plumbing fixture.

Section 57. "Waste Pipe" is the term applied to any pipe receiving the discharge of all plumbing fixtures, except water closets and clinic sinks.

Section 58. "Vent Pipe" is the term applied to any pipe which serves to supply air to any soil or waste pipe, and through which air passes from the soil or waste pipe to the outer air.

Section 59. A "Local Vent" is a pipe by which foul air from water closets, bowls or other plumbing fixtures is removed. The connection of same is made on the house side of all fixtures, and runs independently to the outer air.

Section 60. A "Trap" is a fitting having a water seal, so constructed as to retain a column of water therein of sufficient volume to prevent the passage of air through same.

Section 61. A "Kitchen Sink" is a single receptacle having one compartment, without any partition or division. A two-compartment kitchen sink, if made in one piece, may be connected to one waste outlet. Every compartment in a sink shall be considered a separate sink, and a separate waste connection shall be provided for every two compartments.

Section 62. A "Wash Tray" is a single tray having but one compartment, without a partition or division. A two-compartment wash tray with one single waste outlet shall be considered one fixture. A separate waste connection shall be provided for every three compartments. The waste connection may be taken from either the center or end tray.

Section 63. A "Clinic" or "Pedestal slop sink" is a receptacle which receives human excretions and fecal matter, and is classified as a water-closet in computing the number of fixtures. Clinic or Pedestal slop sinks shall be connected to a soil pipe.

Section 64. "Sump" is a term applied to a receptacle situated below the level of the sewer, wherein mechanical means are installed to force the effluent, or waste waters discharged therein to higher levels for proper disposal.

Section 65. "Conductors" or "Roof Leaders" are conveyors, which carry the storm or rain waters from roofs or buildings, yards or courts. The term "downspout" is usually

applied to the vertical portion.

Section 66. A "Small Fixture" is the term applied to any plumbing fixture that is required to have a waste outlet of not less than one and one-half inch inside diameter, and not more than two inches inside diameter; provided that a bath tub with a basin or lavatory attached to or supported by said bath tub, the waste from said lavatory passing vertically into and through the bath tub waste, shall be deemed a single fixture, and require but one trap and vent. The trap must be placed as near the fixture as possible and in no case farther than two (2) feet therefrom. It is the intent and meaning of this section to have the term "small fixture" include "The Boudoir" bath fixture.

Section 67. The "Property Line" of any lot shall extend to all portions of the lot whereon a building is erected. All excavated portions of any lot, including cellar, basement or pipe channels that extend beyond the lot line limits under any sidewalk, street, alley, public or private thoroughfare, shall be considered, under this ordinance, as being inside of the property line, and all plumbing installed therein must conform to this ordinance.

Section 68. A "Place of Business" is meant to include a building with the incorporated limits of the City of San Diego, with desk, telephone, tools, pipe, fittings and a suitable sign, displaying the name of the Master Plumber, and License Number.

Section 69. The term "Circuit Vent System" is meant to include all plumbing fixtures arranged in battery formation or in one continuous horizontal line with a vent pipe installed at the beginning, and at the termination of the waste or soil line.

Section 70. The term "Horizontal Battery Formation" is meant to include all vented plumbing fixtures installed on one continuous horizontal line, located on the same floor.

Section 71. Any line rising from and including a one-sixth bend to the true vertical shall be considered a vertical line.

Section 72. Any line rising from the true horizontal to a pitch less than one-sixth bend shall be considered a horizontal line.

Section 73. "Dead Ends" of a plumbing system shall mean all horizontal vent lines that the vent is to serve, will float, wash or obstruct the vent line.

#### MATERIAL AND WORKMANSHIP.

Section 74. All plumbing material shall be of the quality specified herein, and free from defects. All lines of soil, waste and vent pipes and fittings installed in any buildings, or inside of any property line, or to a cess pool or septic tank, or to any public or private sewer in The City of San Diego, shall be of the quality known to the Plumbing Trade as "Standard" and "Extra Heavy" cast iron pipe and fittings, and Standard Galvanized Pipe and cast fittings.

Section 75. In all buildings hereafter erected of four (4) stories or more in height the entire soil and waste lines shall be extra heavy cast iron pipe, except where Durham or Screw Pipe is permitted in this ordinance.

Section 76. All plumbing fixtures shall be separately and independently trapped and vented. The traps shall be placed as close to the fixture as possible, and the vent in not case shall be more than twenty-four inches from the seal of the fixture trap. The trap of one fixture shall not connect with the trap of another, except as provided elsewhere in this ordinance.

Section 77. For all plumbing fixtures required to be roughed in below the finished floor the length of waste pipe shall be not more than twenty-four inches between the fixture trap and the vent pipe ( See Section 96).

Section 78. When a circuit vent system is to be installed in any building or part thereof, the number of water-closets allowed on a four-inch horizontal soil line shall not exceed sixteen (16); the vent pipe shall be not less than four inches inside diameter and shall be placed at the beginning and end of the circuit vent system.

If there are more than sixteen (16) water closet outlets on a horizontal run of a circuit vent system, then commencing at the sewer side of the sixteenth closet outlet, the line shall be increased to five inches; provided that if there are to be more than sixteen (16) water closets placed in a battery or circuit vent formation, then there shall be placed a relief vent of two-inch inside diameter about the center of every sixteen (16) closets.

When the soil pipe leading from the end fixture to the main horizontal run of the circuit vent system is more than thirty (30) inches long, the said fixture shall be back vented, and shall not be considered a part of the circuit system. One fourth inch fall to the foot must be provided for all horizontal circuit vent lines. Other plumbing fixtures may be connected to the soil line of a circuit vent system. Small fixtures connected to a circuit vent system shall not be considered a part of the same. All such small fixtures shall be independently vented.

Section 79. When a battery of plumbing fixtures is to be installed on one floor above the other, on a circuit vent system, a circuit vent system installed below the top floor shall be provided with a relief vent, one-half the diameter of the soil or waste stack. The said relief vent is to be taken off in front of the first fixture connection and rise immediately to the vertical, to a point six inches above the highest fixture before intersecting into the main vertical vent of the circuit vent system, providing, however, it is desired to continue the said relief vent vertically through the roof.

Section 80. No vertical drainage head or siphon leg on any circuit or back vent system for water closets will be permitted to be shorter than six (6) inches, measuring from the top of the horizontal line run to the finished floor line.

Section 81. No circuit vent system will be permitted to be installed a greater horizontal length than fifty (50) feet measuring from the center of the first fixture to the center of the end fixture. The end vent pipe of a circuit vent system shall be taken off in front of the last fixture and shall rise not less than forty-five degrees (45°) to the vertical.

Section 82. When it is desired to install water closets or other plumbing fixtures back to back, and connect same to the same soil and waste line, each two plumbing fixtures discharging into the same fitting shall be provided with a separate vent. Approved double vent fittings may be used. Plumbing fixtures installed in the above manner will not be considered a circuit vent installation within the meaning of this ordinance. This method of installation will be classified as a battery formation of water closets. The vertical drainage head between the bottom of the water closet bowl and the top of the horizontal line shall in no case be less than twelve (12) inches.

Section 83. To receive a water-closet bowl, heavy brass water-closet flanges of approved type shall be soldered to all lead bends, stubs, or lead ferrules, and securely screwed or bolted to the floor. When either iron bends or pipe are used to receive a water closet bowl or other similar fixtures, a heavy iron floor flange of approved type shall be securely caulked to the outlet.

Section 84. No stone, brick or cement sewer pipe, or any earthenware pipe shall be permitted to be installed inside of any property line, or on any premises, or under any building, except as provided for acid sinks or tanks as provided for in this ordinance. In case of a stone, brick, cement or earthenware sewer having been installed within the property line or under any building prior to the adoption of this ordinance, if the same is in good working order, it shall remain and continue to be used as a soil drain, and connections may be made therewith.

Section 85. When soil, waste or vent pipes are to be supported in any manner, the

supports shall be of none-rustible iron, or iron of no lesser weight than perforated iron, one-sixth inch thick; provided, however, that on all buildings of three storeis or over, the stack shall be supported at the base and at each floor with a suitable clamp to carry the weight.

Section 86. When it becomes necessary to support soil and waste pipes from the ground, stone, brick or cement may be used to keep the same from settling.

Section 87. In all buildings where a sump is required by the Board of Health, the same shall be so located as to receive the effluent from all sub-house drains by gravity flow. The said sump shall be water-tight and constructed of metal. The sewage shall be ejected to the main sewer line by means of an automatic ejector. All plumbing fixtures connected to the said sump shall be properly vented. The main vent from said sump shall be not less than two inches inside diameter.

Section 88. When catch-basins are to be installed to receive the discharge of waste waters from plumbing fixtures (with the exception of water-closets), which are to be located below the flow line of the main sewer, they shall be constructed of cement or cast iron; the cover of the same shall be of heavy cast iron and made gas tight. The capacity of the tank shall meet with the approval of the Plumbing Inspector. The ejector shall be automatic provided with a ball float, and shall be attached to the main water supply. All catch-basins to be vented through the fixture waste and vent pipe.

Section 89. All used soil waste and fittings of cast iron shall be thoroughly coated with asphaltum applied hot, both inside and outside.

Section 90. All horizontal soil and waste pipes and fittings shall be laid in practical alignment and to a uniform grade of not less than one-fourth inch to one foot. All horizontal ventilating pipes, when permitted, shall be run to a uniform grade of not less than one-eighth inch fall to one foot.

Section 91. It shall be unlawful for any Master or Journeyman Plumber, or any person, to conceal wilfully, with an intent to deceive, any crack, sand holes or other imperfections in any pipes or fittings, by using thereon in any way, cement, sealing wax, paint or other agents which may prevent the detection by the Plumbing Inspector of any defect in material or workmanship.

Section 92. Where stall urinals are placed in any building or structure, the side walls, floors and partitions shall be covered with either glass, marble, enamel, cast iron, vitreous tile, or vitreous china slabs. In no case will hydraulic cement or woodstone be permitted to be used in lieu of the above. When slate slabs are used for the floors, side walls, or partitions, they shall be frequently oiled with pure linseed oil. All joints shall be imbedded with approved cement. Oiled cements may be used, excepting for marble.

Section 93. When any water-closet, urinal or any water tank which connects directly or indirectly to any plumbing system, and which is to be suspended or hung from wall or ceiling, the fastenings or supports of the same, including screws and bolts, shall be of brass or other non-rustible material. Common iron screws or bolts are prohibited.

Section 94. Double division fittings may be used to receive the discharge of waste waters from two (2) fixtures of the same relation; but in no case shall a kitchen sink or basin waste into the same fitting with a wash tray, nor shall any fixture which requires a different roughing-in measurement than another plumbing fixture, waste into the same fitting.

Section 95. All waste outlets which are to receive the discharge from a trap shall be kept as close to the fixture as the trap will permit, except as provided in circuit venting of water-closets and siphon urinals.

Section 96. All waste outlets for plumbing fixtures that require roughing-in above the floor line shall be immediately in the rear of the fixture trap. (See Section 77)

Section 97. To prevent the settling or sinking of all vertical bearing vent pipes into any soil waste fitting or waste line a coupling shall be securely screwed on the end of the screw vent pipe, which is to be caulked into the receiving hub, provided that the hub of the fitting will permit. This section applies only to vertical bearing vents.

Section 98. Where slip joint connections are permitted on plumbing installations by this ordinance, the packing or gaskets used shall be of approved material.

Section 99. Overflow pipes from fixtures shall in each case be connected on the inlet side of the trap.

Section 100. All plumbing fixtures shall be connected directly to the soil and waste lines in the shortest possible manner. All soil, waste and vent pipes shall be run in the shortest possible way. Unnecessary fittings are prohibited.

Section 101. In all buildings constructed of masonry or cement, recesses shall be provided in the walls to receive the soil, waste and vent lines that are to be concealed. Where waste, soil or vent pipes are to be concreted in the wall, they shall be wrapped in an approved manner.

Section 102. All joints for cast iron pipe shall be made of pure lead, well caulked, and of not less than one inch in depth. Oakum shall be used in sufficient quantities to prevent the lead from passing through the joints.

Section 103. When plumbing fixtures or pipes are to be fastened to any masonry or stone wall, they shall be secured with expansion bolts of approved type. Plugging walls with wood will not be permitted. In case of hollow tile walls, all plumbing fixtures and pipes shall be fastened with bolts and washers extending through the wall, or with bolts of an approved type.

Section 104. All changes of directions of any soil, waste or vent pipe shall be made with "Y"'s, one-sixteenth bends, one-eighth bends, one-sixth bends, or with fittings with relation to twenty-two and one-half degrees, forty-five degrees, or sixty degrees, or by combination fittings that have the same relative sanitary curves. No short turn, quarter bends or ninety degree ells will be permitted to serve as fittings for any soil, waste or vent pipe, except as provided in this ordinance.

Section 105. When any "Y" fitting is to be used to receive the discharge of any waste water of any part of the plumbing system, it shall be placed so that the "Y" branch is in a vertical position.

Section 106. No plumbing fixture shall be connected to any pipe of smaller diameter than the diameter of the fixture outlet.

Section 107. Double hub tapped tees will be permitted on vertical lines only. Double hubs will be permitted on the vent lines only.

Section 108. Sleeve fittings may be used, where necessary to install a soil or waste fitting.

Section 109. Single sanitary tees will not be allowed on angles less than sixty degrees.

Section 110. Double sanitary tees are not permitted on any part of a soil or waste line.

Section 111. Double soil and waste fittings known as the division pattern, and which have partition sanitary curves that prevent the discharge of one fixture from entering into the waste opening of the opposite fixture, will be allowed, if the said fitting has a direct vent outlet and full sized drainage openings.

Section 112. Saddles, hubs and bands are in all cases prohibited.

Section 113. Soil or waste fittings, commonly known as "Half "Y"'s" will be permitted on vertical lines only.

Section 114. Any fitting or connection which has or forms an enlargement chamber of

recess with a ledge, shoulder or reduction of a pipe area in the direction of the flow, on the outlet or drain side of any trap, is prohibited except on vertical lines.

Section 115. Four by two (4 x 2) heel outlets one quarter bends, or other heel outlet fittings will not be permitted on any part of the plumbing system, unless the two-inch outlet is to be in a vertical position. (See Definitions for "Vertical Position.")

Section 116. Four by two (4 x 2) side outlet bends will only be permitted where the vent from same starts off on a vertical.

Section 117. Whenever a lead bend, stub, or lead pipe is to be caulked into a soil or waste pipe or fitting, there shall be placed at one end a brass ferrule of dimensions and grade as specified, elsewhere in this ordinance, the same to be securely fastened to the lead bend or pipe by a wiped solder joint.

#### PLUMBING FIXTURES.

Section 118. Kitchen sinks constructed of galvanized iron shall be permitted to be installed only in restaurants, hotels and other public eating places, and where it is impracticable to install standard porcelain sinks.

Section 119. Wooden sinks shall not be permitted to be installed in any building or upon any premises except where enamel, iron or porcelain sinks are found to be impracticable. In no case shall wooden sinks, lined with metal, be permitted to be installed in any building, or upon any premises.

Section 120. All water-closets shall be made of vitreous china.

Section 121. Water-closet tanks shall be set at least six (6) feet or more above the finished floor except a water-closet that is to receive the discharge from a low-down tank.

Section 122. No plumbing fixtures shall be permitted to be enclosed, in whole or in part, with wood, metal, or other material.

Section 123. No galvanized iron or other sheet metal will be permitted to be used for urinals, troughs, stalls or partitions, or any part thereof.

Section 124. No plunger, pan, common hopper, flush rim hopper or "S" trap water-closet bowls will be permitted in any building or upon any premises, or any part thereof; provided that wash-out closets and bowls may be installed on back porches or in outhouses.

Section 125. Bath-tubs of zinc or copper-lining will not be permitted to be installed in any building or upon any premises.

Section 126. When four (4) Factory wash basins are so constructed that they are to represent a single unit, they may be connected to one trap. Five (5) or more basins of a similar type shall be provided with separate connections.

Section 127. Factory wash sinks of five (5) feet, or less, in length, may connect to a waste outlet of not less than one-and one-half inches in diameter. If over five (5) feet in length, and not more than eight (8) feet in length, a two-inch waste connection shall be provided with an inch and one-half vent.

Section 128. When there is a sand-trap to be constructed in the floor of any garage or other building, or part thereof, it shall be not less than twelve (12) inches measuring from the bottom side of the outlet pipe to the finished bottom of trap, and not less than eighteen (18) inches square, and shall be constructed of cement or other approved material. The waste pipe leading from public garages shall be not less than four-inches inside diameter, and not less than two inches inside diameter in private garages, and shall be of cast iron soil pipe. The vent for the same shall not be more than ten (10) feet from the seal of the trap.

Section 129. When two (2) sand-traps or floor drains are to be installed in the same building or structure, they may discharge into one (1) four-inch fitting of division pattern, the sanitary curves of which shall be not less than those of a double "Y" and one-eighth bends. One vent pipe of not less than two inches, inside diameter, shall answer the purpose for the ventilating of two (2) sand traps or floor drains, provided that each sand-trap or floor drain is not of greater distance from vent pipe than ten (10) feet.

Section 130. When sand traps or floor drains are to be installed on any floor above the ground floor of any building, the vent pipe for the same shall connect within two (2) feet of the seal of the trap, and if necessary run horizontally to partition, then in a vertical line through the roof, or intersected into the nearest vent line; all horizontal vent lines shall be not less than four inches, inside diameter, and the vertical vent line shall be not less than two inches, inside diameter.

Section 131. Pedestal slop sinks, clinic sinks, and all other similar plumbing fixtures which are constructed to receive faecal matter, shall be connected to a soil pipe of not less than four inches, inside diameter.

Section 132. All dental or fountain cuspidors shall be properly trapped and vented, and connected to the house plumbing system. If it is found impracticable to vent the said dental fixtures, a pot trap or other approved trap shall be used, provided, however, that the waste line connects directly into the waste or soil line of some other fixture which is properly trapped and vented. In no case will a non-vented fixture be permitted to discharge its waste waters into a non-vented waste line.

Section 133. Drinking fountains which are provided with a waste outlet shall be properly trapped, and the waste carried into an open plumbing fixture, or may be carried to and connected to the house side of any fixture trap that is properly vented.

Section 134. If there is no plumbing fixture conveniently located to receive the waste waters from a drinking fountain, then the said fountain shall be connected to the waste line the same as a basin or other fixture.

Section 135. When a drinking fountain consists only of a mouth piece, or supply connection, the same may be placed over any sink or basin.

Section 136. Drinking fountains will not be permitted to connect directly or indirectly with any urinal, water-closet, slop sink or clinic sink.

Section 137. Floor sinks that are required to receive the waste waters from soda fountains, saloon bar fixtures, or other indirect connected plumbing fixtures shall be provided with a waste outlet of not less than two inches, inside diameter, taken from the bottom of the said fixture. Converting a receptacle of such type into a fixture trap by taking the waste line from the side of such receptacle, thereby retaining a large body of water, will not be permitted.

Section 138. All soda fountains and saloon bars shall be provided with an open drain, lined throughout with vitreous tile or glass, and to connect directly with a floor sink conveniently located; each and every fixture located in said fountain or bar counter shall drain independently to the said open drain. The open drain shall be not less than six inches in width in its entire length, and not less than two inches deep at the extreme end from the point of discharge. This drain shall have a pitch of not less than one-eighth inch to the foot. The said open drain shall be exposed from under the fountain or bar at least two inches of its entire length; provided, however, that if the owner desires to install independent waste lines from each counter fixture of not less than one and one-half inch, inside diameter, to the said floor sink in lieu of installing an open tile drain, the same may be done.

Section 139. All plumbing fixtures that require an indirect waste connection that are to be installed one above the other, shall connect to one common waste and vent line. The vent line shall extend independently through the roof.

Section 140. Refrigerator, safe and ice box waste may connect indirectly into a plumbing system by discharging the waste waters therefrom over a properly trapped and vented

plumbing fixture that is not located in any living room or toilet room. Safe waste, refrigerator or icebox waste will in no case be permitted to connect directly to any plumbing system.

Section 141. All floor drains for bath and toilet rooms which are to be installed on the first floor above the lowest fixture shall be properly trapped and connected to one common waste and vent line, extending independently through the roof. The waste pipe therefrom shall connect indirectly with a floor drain or sink, which shall be known as a main floor drain. The said main floor drain shall be properly trapped and vented and connected to the public sewer. All other floor drains connecting thereto shall be connected indirectly. The floor drain known as the main floor drain shall always be supplied with running water by an approved method which will insure a proper seal of the trap.

Section 142. In every building hereafter erected or altered, the basement or cellar of which is to be drained, a main floor drain of sufficient size shall be installed in an area way that is open to the sky. The main floor drain is to be properly trapped and vented and connected to the public sewer below the level of the floor it is to serve; tributary floor drains may then be installed in the cellar or basement only, without vent, although properly trapped, and to be connected to the house side of the main floor drain located in an area way. The sizes of the tributary drains shall be not less than two inches, inside diameter; the main floor drain shall be supplied with running water by an approved method.

Section 143. When rainwater is to be received and conveyed to a point of safety from any deck drain, light or air shaft drain or court, the water shall be conveyed to the curb or street gutter. If it is found impracticable to convey such water to the curb line then such deck drains, light shafts and court drains shall connect to a properly constructed main floor drain of sufficient size; the main floor drain to be properly trapped and vented and connected to the public sewer, and the said floor drain shall be supplied with running water by an approved method.

Section 144. In lieu of the method outlined in this ordinance, a publicly used basin properly trapped may be installed, not more than five (5) feet from the main floor drain, and shall discharge its water therein without a vent, in order that the seal of the trap may be assured.

Section 145. One shower drain shall be provided for every two shower compartments or lesser number of compartments, each two shower heads to be considered the equivalent of one small fixture in computing the size of waste line for a given number of fixtures. No shower drain shall be less than one and one-half inches, inside diameter. If two (2) shower drains of not more than two inches, inside diameter, are connected to a double division fitting, the vent from the same need not be more than one and one-half inches, inside diameter.

#### DURHAM OR SCREW PIPE SYSTEM.

Section 146. The Durham or Screw Pipe system of plumbing may be used in all buildings of three (3) or more stories in height.

Section 147. All threads cut for screw pipe or Durham system shall be of sufficient length in order that the end of the pipe entering any Durham fitting may seat firmly against the shoulder of fitting. The end of all pipes for Durham or screw pipe system, or part thereof, shall be reamed and made smooth, and full bore.

Section 148. All vent fittings for Durham or screw pipe system of venting shall have long sanitary curves, of open pattern. No short, ninety degree (90°) ells or tees will be permitted.

Section 149. All Durham or screw pipe fittings used in connection with soil or waste lines of a Durham or screw pipe system shall be of the drainage type, and with sanitary curves, and with full recess.

Section 150. All ground work of Durham or screw pipe system of plumbing shall be of approved, extra heavy, cast iron pipe, coated.

Section 151. All Durham or screw pipe used or installed in any building or structure shall not be galvanized pipe. Black or dipped pipe shall not be permitted.

#### VENT PIPES.

Section 152. Every fixture trap shall be protected from siphonage, and air circulation assured by means of a vent pipe, of caliber, weight and material as specified in this ordinance.

Section 153. Vent pipes shall not be installed more than one inch below the water seal of any trap, except in the case of water-closet, clinic sinks or urinals of siphon action.

Section 154. The vent pipe for all plumbing fixtures that require a siphon leg in order to complete the fixture trap shall be taken off at a point below the fixture so as not to interfere with the principles of the operation of the trap.

Section 155. No vent pipe shall be used as waste or soil pipes, except refrigerators or other indirect connections. (See Section 139.)

Section 156. The main vent stack of all plumbing systems shall be placed where practicable.

Section 157. When the main soil line is larger than four inches, inside diameter, in lieu of extending the same size vent as the waste line through the roof, the main vent shall be one or more four-inch vents that will equal the square area of the main soil line, plus the required vent capacity required for fixtures and the developed length of vents.

Section 158. The size of vent pipes for a circuit vent water-closet system shall be not less than four inches, inside diameter, the same to be increased in proportion to the number of fixtures installed, as stated elsewhere in this ordinance.

Section 159. At the base of all perpendicular screw vent pipes of a greater height than eight (8) feet where it is not immediately over any soil or waste line, there shall be installed a drip or sediment chamber of not less than six inches, or in lieu thereof the same shall be connected with forty-five or sixty degree ells and nipples.

Section 160. In all buildings where plumbing fixtures are so arranged that the back pressure does occur, the plumbing Inspector shall order the owner to have additional vent pipes installed to relieve that part of the plumbing system.

Section 161. The vent pipes of all plumbing systems shall not terminate closer than twenty (20) feet of any window or door of any adjacent building; provided, however, that the adjacent building is at least one story higher than the building in which the plumbing is being installed, in which case the vent pipe shall terminate three (3) feet above the nearest opening in the adjacent building.

Section 162. If the vent pipes of any building are located within twenty (20) feet of any window or fresh air inlet, of any adjacent building, the said vent pipe shall be carried in the least conspicuous manner to a distance of not less than herein specified. This section also applies where vent pipes are required to be moved on buildings erected prior to the passage of this ordinance.

Section 163. No vent pipe shall be located closer than ten (10) feet from any water tank.

Section 164. The vent pipe of any building or structure with a flat roof shall not extend higher than the fire wall of same, except where the roof of any building or structure is to be used as living quarters, roof garden, or for any other purpose. In such case vent pipes from the plumbing system shall extend not less than nine (9) feet above the floor of the roof.

Section 165. The roof terminal of all vent pipes shall be at least three (3) feet above any door, window, scuttle, hole or air shaft. No vent pipe shall protrude through or extend above any roof or extend above any fire wall more than ten inches. In case the vent pipes are located on the outside of a building nor more than one story in height, or over nine (9) feet, the height of the stack shall be not less than ten (10) feet, measuring from the finished floor line.

Section 166. Two or more vent pipes, if within three (3) feet of each other in any one partition, must be connected and made into one single vent before passing through the roof.

Section 167. No flat venting for battery work will be permitted unless authority is granted by the Board of Health. Flat venting of a single fixture will not be permitted unless other angles cannot be made.

Section 168. A vent pipe of not less than four inches, inside diameter, shall be provided for all buildings wherein a water-closet is installed, regardless of the building's use; provided, however, if the owner, or his agent, desires to install a water-closet in a private garage not used as a residence, or a small toilet room in the rear of the yard, and which water-closet is to be used in connection with a building containing a four-inch vent stack, located on the same lot, under the same ownership, connected to the same soil line, inside of the same property line, the vent pipe may be of the size not less than two inches, inside diameter.

Section 169. Where bath-tubs, water-closets, basins, or other plumbing fixtures, of the same relation, are located on the opposite walls or partitions, or are directly adjacent to each other, such plumbing fixtures may have a common soil or waste pipe, and single vent, by using a double division fitting of approved pattern.

#### T R A P S.

Section 170. Each and every plumbing fixture shall be separately trapped, and the water seal placed as close to the fixture as possible, of the size prescribed by this ordinance.

Section 171. Every trap shall be self-cleansing; no form of trap which depends upon the action of moveable or mechanical parts for its seal shall be used. No trap which depends upon concealed interior partitions for its seal, or which has interior partitions, that, in case of defect would allow the passage of sewer air, will be permitted. All traps shall be full bore, and have a smooth interior water way. Traps which are made of drawn tube will be permitted; provided, that brass of no lighter weight than 17 gauge is used, and that the maker's name, and gauge of tubing is stamped thereon.

Section 172. Iron drums or pot traps shall be made of cast iron and shall not exceed four inches, inside diameter, nor have a water seal greater than seven inches, nor less than two inches.

Section 173. Every trap shall be so installed that the water seal will protect the trap screw from sewer air.

Section 174. Each trap shall have a water seal of not less than two inches.

Section 175. Traps for bath tubs, basins, sinks, or other similar fixtures, shall be made of lead, brass or cast iron.

Section 176. One trap will not be permitted for more than one two-compartment galvanized iron, or wooden kitchen sink; providing that the said sink is made of one piece of metal or wood, and is considered a one piece sink.

Section 177. One trap will be permitted for three (3) wash trays. Four (4) or more trays or sections shall be connected to a separate trap, or, at the ratio of three (3) wash trays, or three (3) compartments of a wash tray to one trap.

Section 178. If pot traps are to be used for bath tubs, the clean-out covers shall be above the finished floor. Iron, brass or lead P-traps may be used for bath tub work.

Section 179. All traps shall be rigidly supported and set true with respect to their water level, and shall be so located as to protect their seal.

Section 180. No traps shall be permitted to be installed in connection with any soil or waste line, except the traps that serve a plumbing fixture, or as provided elsewhere in this ordinance.

Section 181. All traps shall be located so as to be easily accessible for cleaning.

#### CLEANOUTS.

Section 182. All clean-outs shall be the same size as the pipe they serve. The cleanout cap or cover shall be made of extra heavy brass of not less than one-quarter inch in thickness. The screw cap, or head of same, shall be not less than one-third the area of the cover, and not less than one-inch high, and of hexagon shape. The body or cleanout ferrule shall be not less than four inches long, and may be made of heavy iron or brass. The engaging parts shall have not less than six threads of iron pipe size. The flange between the engaging parts shall be of sufficient width to permit a washer to be used in order that the engaging parts may be made water tight.

Section 183. Cleanouts shall be provided at the foot or base of all vertical lines of all soil or waste pipes, and at the end of each horizontal line, and at the end of all horizontal changes of direction of over four feet. A cleanout is not necessary where the change of direction is not more than twenty-two and one-half degrees. All cleanouts shall be accessible either extended through the wall or set back twelve inches from the wall.

Section 184. In buildings where a cellar is not provided cleanouts shall extend through the outside walls of the building, or shall be kept back from the wall. In cases of a cement floor, where the cement is laid upon the ground, then the cleanout shall extend one inch or more above the finished floor.

Section 185. When the clearance space is eighteen inches or less between the ground level and the under side of the floor joist of any building of not more than two stories in height, along the line from the entrance that is provided to obtain access under the building to the main four-inch cleanout, then a cleanout of the Barrett type shall be used on the main soil line, not more than six (6) feet, nor less than four (4) feet from the outside of the foundation walls of the building. When a cleanout of the Barrett type is provided for on the main soil line of a building of not more than two stories in height, outside of the foundation wall, then the cleanout that is provided for in this ordinance to be installed at the base of the four-inch stack, may be omitted and in lieu thereof there shall be installed two (2) one-eighth bends or fittings having the same relative curves. All other cleanouts shall be made accessible as provided for in Section 183 and 184.

Section 186. All packing or gaskets for cleanout covers shall be of candle wicking and tallow, leather or rubber, coated well with graphite and oil. No compounds or cements will be permitted to be used on any part of a drainage cleanout other than what is specified herein.

#### MISCELLANEOUS SUBJECT.

Section 187. Water heated over one hundred and forty degrees (140°) Fahrenheit will not be allowed to enter any soil or waste line, or any public sewer. When blow-offs from boilers or from tanks discharge water at a higher temperature, they shall be provided with a cooling device.

Section 188. Exhaust steam, or blow-off shall not connect directly with any soil or waste, or sewer line. Such pipe shall discharge into a suitable closed tank, or condenser, made of wrought iron, cast iron, or hydraulic cement, and provided with a relief

pipe. The waste water from the said tank or condenser shall be taken through a pipe at least one size larger than the inlet. It is necessary to reduce temperature of condensed steam, or hot water, and there shall be provided a cooling device, to be installed in connection with the receiving tank or condenser.

Section 189. When the discharge from a hydraulic elevator is not larger than two-inch inside diameter, it may connect directly into any soil line of the building in which it is installed. If the discharge is larger than two inches, inside diameter, the waste waters from the elevator must discharge into the main sewer line, or in lieu thereof into an open tank of sufficient capacity to receive the full discharge, from one single operation of the elevator. The waste pipe from the said tank shall be not less than two inches, inside diameter.

Section 190. It shall be unlawful for any Master or Journeyman Plumber, or any person or persons, to connect any soil or waste line to any public sewer. All such connections shall be made by the City Sewer Department.

Section 191. No person shall maintain a privy vault or out-house in The City of San Diego.

Section 192. No person shall maintain any cess pool or septic tank within The City of San Diego upon any premises adjoining a lateral sewer.

Section 193. All soil and waste lines shall be laid not less than twenty-four inches below the established grade at the property line, measurements to be taken from the bottom of the soil or waste line to the established grade line.

Section 194. No opening shall be provided in any soil or waste pipe in any building, or upon any premises for the purpose of receiving the surface drainage from any yard, unless special permission is granted by the City Sewer Department.

Section 195. Rain water leaders which are installed to convey the waters from the roof of any building shall not be connected to a public sewer unless permission is granted by the City Sewer Department.

Section 196. Rubber couplings or bells are not permitted between the water-closet bowl and the flush pipe.

Section 197. All plumbing fixtures outlets when not in use shall be securely sealed with the proper plug, caps, etc. Cementing openings will not be permitted.

Section 198. In no case will any plumbing fixture which requires an indirect waste connection be allowed to discharge its waste waters into any plumbing fixture located in a bed room.

Section 199. It shall be unlawful for any plumber to install any plumbing fixture in any room or closet or part thereof in any building which does not contain a window of not less than one-fifth of the superficial floor area. Not less than three square feet of window surface shall be provided.

Section 200. Mechanical systems of ventilation may be installed in lieu of windows of sufficient capacity to change the atmosphere therein at least once every five minutes. Ventilation from toilet rooms shall be separate and apart from other ventilating ducts or windows in the building.

Section 201. All buildings hereafter erected for dental quarters or offices shall have installed for each room a waste outlet of not less than one and one-half inches, inside diameter.

Section 202. In all buildings where acids are used, the waste waters from which shall be discharged into the main sewer lines at a point acceptable to the Plumbing Inspector, the pipe used to convey such waste waters shall be first approved by the Plumbing Inspector. (See specifications relative thereto, for Sulphuric acid.)

Section 203. In all cases where a building is used as a hotel or restaurant, the owner or lessee shall provide a properly constructed water-cooled grease trap, through which all water containing grease shall be separated before entering the main sewer.

Section 204. Sand-traps or similar receptacles will not be permitted in any building, or on any premises, or any part thereof, except in public garages, where they shall be of a size as stated elsewhere in this ordinance.

Section 205. Air pumps, gas machines, vegetable and window fountains shall drain over an open fixture or into a floor drain. In no case will direct sewer connection be allowed.

Section 206. Vent pipes which extend into the air a greater distance than allowed by the present plumbing ordinance, which are found to have been installed in buildings which were erected prior to the passage of this ordinance, may be made to conform to the present regulations.

#### TESTING OF PLUMBING.

Section 207. Testing of all plumbing systems installed in The City of San Diego shall be made in the presence of the Plumbing Inspector, and if the tests prove satisfactory to him and the work installed is in accordance with the City Plumbing Ordinance, he shall issue a certificate to that effect.

Section 208. In all new and old buildings where plumbing is to be installed, the building contractor or person or persons in charge of the building construction or alterations, shall leave all floorings, floors and partitions open and uncovered along the lines and angles where the plumbing pipes are to be installed, until the Plumbing Inspector has had ample time to approve the installation.

Section 209. It shall be unlawful for any carpenter, contractor, builder, or other persons to cover or cause to be covered any part of the plumbing system with flooring, lath, earth, or other material until the Plumbing Inspector has had ample time to approve the said plumbing installation.

Section 210. All soil lines, waste and vent pipes must have their openings plugged and filled with water to the highest point of the highest vent. The Plumbing Inspector shall have the right to demand such water or other test as he may deem necessary. When a system of plumbing has been tested in sections, and when the connections or intersections of same are made, an additional water test will be necessary on said connection or intersection.

Section 211. When new plumbing is installed in old buildings and is connected to the soil or waste line previously installed, and it is found not practicable to test the new installation with the water test, the Plumbing Inspector may at his discretion, request a smoke, air or peppermint test on the new work installed.

Section 212. All plumbing, whether old or new installations, in all buildings, or parts thereof that are moved from one foundation to another, regardless of their location on any property or properties, shall be tested to the floor level of highest fixture with water.

Section 213. When a building is altered, converted or moved from one foundation to another, all plumbing, including fixtures, shall be made sanitary. Washout closet bowls will not be permitted inside any part of any main building.

Section 214. Rubber test plugs shall be used when necessary to seal the openings of plumbing outlets of four inches or less, when a water test is applied.

Section 215. It shall be the duty of the Plumbing Inspector to inspect all work, whether new or old installations, upon due notice that the said work is ready for inspection.

Section 216. The size of inside diameter waste branch for single fixtures shall never be less than the following:

(Waste or soil pipe)

		Trap
Water-closet	4 inches	Standard
Sand-Traps (private),	2 "	"
Sand-Traps (public),	4 "	"

Section 217. Size of waste and soil pipe and the number of fixtures that may drain into same are shown in the following table, below:

- Eight feet or less Urinal troughs or wash sinks count as one (1) fixture.
- All fixtures that require 1-1/2 inch waste outlets count as one (1) fixture.
- All plumbing fixtures that require three-inch waste outlets count as two (2) fixtures.
- Two shower heads count as one (1) small fixture.
- One water-closet counts as four (4) small fixtures.
- One clinic sink with a four-inch waste shall count as four (4) small fixtures.
- The installation of slop hoppers is not permitted.

MAXIMUM NUMBER OF FIXTURES CONNECTED THERETO.

Size of Pipe	Waste and Soil	Soil Pipe
1-1/2 inch	4 fixtures not sinks	
1-1/2 inch	2 sinks	
2 inch	16 fixtures not sinks	
2 inch	8 sinks.	
2-1/2 inch	24 fixtures	
3 inch	60 fixtures	
3-1/2 inch	90 fixtures	
4 inch	In horizontal circuit or battery formation,	
	16 water-closets.	
4 inch	200 fixtures or 50 water-closets.	
5 inch	In horizontal circuit or battery formation,	
	32 water-closets.	
5 inch	400 fixtures or 100 water-closets.	
6 inch	800 fixtures or 200 water-closets.	
8 inch	2400 fixtures or 600 water-closets.	

In computing the number of fixtures to be connected to any soil pipe, a water-closet or clinic sink is the equivalent of four (4) small fixtures.

Section 218. SIZE OF VENT PIPES AND STACKS.

The following table gives the size of vent pipes and the maximum number of fixtures that they should serve:

Size of Pipes.	Maximum	Number of	Number of	Number of
	Developed	1-1/2 inch	2 inch	Toilets.
	Length in	Traps	Traps.	
	Feet.			
1-1/2 inch pipe	50	4	2	
2 inch pipe	100	16	8	4 or less
2-1/2 inch pipe	150	32	16	8
3 inch pipe	220	100	60	25
3-1/2 inch pipe	300	150	75	45
4 inch pipe	360	200	100	50
5 inch pipe	450	410	250	200
6 inch pipe	520	800	350	400

The sizes of vent stacks in the above table do not apply when plumbing fixtures are installed in circuit or battery formation.

Section 219. All galvanized pipe must be of Standard welded pipe. All galvanized pipe used for soil or waste pipe or vent pipe shall be of galvanized iron.

LEAD PIPE: WEIGHT AND DIAMETER.

Section 220. Weight of lead pipe, used for branches, soil, waste, vent or flush pipe, bends and traps shall be of the best quality of drawn pipe of not less weight per lineal foot than shown in the following table:

INTERNAL DIAMETER.	WEIGHTS PER FOOT.
1 inch,	1 lb. 8 oz.
1-1/2 inch,	3 lb. 8 oz.
2 inch,	4 lb. 0 oz.
3 inch,	6 lb. 6 oz.
4 inch,	8 lb. 0 oz.

BRASS FERRULES:

Brass ferrules shall be of the best quality, extra heavy, cast brass, not less than 4-1/2 inches long, and 2-3/4 inch, 3-1/2 inch and 4-1/2 inch in diameter, and not less than the following weights:

DIAMETERS	WEIGHTS.
2-1/2 inches,	1 lb. 0 oz.
3-1/2 inches,	1 lb. 12 oz.
4-1/2 inches,	2 lb. 8 oz.

SOLDERING NIPPLES:

Soldering nipples shall be of heavy cast brass or of brass pipe, iron pipe size. When cast they shall be full bore, and not less than the following weights:

DIAMETERS.	WEIGHTS.
1-1/2 inches,	0 lb. 8 oz.
2 inches,	0 lb. 14 oz.
2-1/2 inches,	1 lb. 6 oz.
3 inches,	2 lb. 0 oz.
4 inches,	3 lb. 8 oz.

SPECIFICATIONS FOR ACID DRAINAGE.

Section 221. All horizontal acid waste lines shall be of salt-glazed vitrified tile pipe of not less than four inches, inside diameter. All vertical waste and vent lines shall be of a size not less than three inches, inside diameter, and shall extend from the point of the waste discharge to three feet beyond the foundation wall and property line of all buildings, and shall connect to the City sewer lateral. All vents required for fixtures located above the main horizontal run shall be of two-inch lead pipe or three-inch vitrified tile pipe, encased with concrete, as shown in detail. If lead pipe is used as provided, the cement casing may be eliminated.

No acid line shall connect directly or indirectly to any cast or wrought iron soil, waste or vent pipe. All acid pipes shall be encased in concrete of a mixture not leaner than one part hydraulic cement, three parts sharp, clean sand, and four parts crushed rock. The casing shall cover the entire circumference of the largest part of the pipe with not less than three inches of concrete.

Section 222. The joints for acid lines shall be made with approved acid-resisting material.

Section 223. In connection with acid drains, there shall be installed a wooden sink, or tank, of the size described in the following drawing. The tank shall be made from two-inch Redwood plank, surfaced and well jointed and secured with screws or rods, the interior of the tank to be given at least two coats of acid-proof paint, and to be applied as often as is necessary. All acid waters are to be emptied in the ten-gallon chamber of the tank which is to be supplied with running water. The waste outlet shall be on the opposite end of the tank from where the acids are discharged. Care should be exercised to prevent battery mud, or other acid solids from reaching the waste line.

Section 224. A vent pipe is not required when acid tanks discharge directly into a horizontal line located on the first floor. When an acid tank is located on any floor above the first floor, the waste line shall be provided with a vent pipe.

Section 225. Cleanouts shall be provided at the base of all vertical lines and at the termination of all horizontal lines, and shall be made tight with acid-proof material.

Section 226. Vitreous tile traps shall be placed in all acid lines, as shown in the following details, and shall be considered the fixture trap.  
(Here follows drawing.)

Section 227. The waste leading from the settling tank to the fixture trap shall be of lead pipe of not less than one and one-half inches, inside diameter, and shall enter the trap and discharge above the water seal. The pipe shall be securely sealed in the trap with acid-proof material. The developed length of the waste pipe leading from the tank to the trap shall not exceed four (4) feet.

PLUMBING FIXTURES: WHERE REQUIRED.

Section 228. In all existing dwelling houses, hotels, tenement houses, restaurants, or any structure owned, rented leased, let or hired out to be occupied, or which is occupied as a place of business, home or residence, where the preparation, cooking or distributing of any food products is carried on, at least one sink must be provided, or as many as may be deemed necessary by the Health Department.

Section 229. In all existing dwelling houses, hotels, tenement houses, tents, tent houses, stores, factories, or any structure that is owned, rented, leased, let, or hired out to be occupied, or which is occupied as a home, residence, office, or place of business, not less than one water-closet shall be provided, which shall be installed in the manner prescribed by this ordinance.

Section 230. In all places where men and women are employed there shall be provided separate water closets for each sex, located in a separate compartment, the entrance to which shall be not less than ten (10) feet apart. There shall be one water-closet provided for every twenty (20) males, or less, and one water-closet provided for every twenty (20) females, or less. The sexes shall be plainly marked at the entrances. Provided, however, that where there are not more than five persons, consisting of male and female, one water-closet and toilet room shall be considered sufficient accommodations for that number of persons.

Section 231. When any building or premises has been inspected by the Health Department, and the plumbing is found to be defective or unsanitary, notice to that effect shall be served upon the owner, or his agent, and the said notice shall specify the character of repairs and alterations or improvements to be made. If such repairs and alterations, as specified in said notice, are not commenced in good faith within five (5) days from the date of the service of such notice, and completed within the time specified therein, the Department of Health may condemn the said property as being unsanitary and unfit for human habitation, and its occupancy thereafter is prohibited.

Section 232. When a building has been condemned by the Health Department of said City, the occupant or lessee, if there be any, shall immediately vacate the premises until such time as all repairs and alterations required by the Health Department have been made. When a building has been condemned for any cause by the Department of Health, there shall be placed thereon a placard, which shall read as follows:

"W A R N I N G.  
THIS BUILDING HAS BEEN CONDEMNED AS BEING UNSANITARY AND UNFIT FOR HUMAN  
HABITATION, AND IT IS UNLAWFUL FOR ANY PERSON TO RESIDE IN OR OCCUPY THE SAME.  
BY ORDER OF THE BOARD OF HEALTH.

\_\_\_\_\_  
Health Officer.

\_\_\_\_\_  
Inspector."

Section 233. All buildings or structures shall be separately and independently connected with the public sewer. If there is no public sewer, then they shall connect to an approved cess pool or septic tank; provided, however, that the buildings or structures located on one lot, as defined in Section 53 and Section 55 of this ordinance, may connect to one common soil line, provided that the lot on which the buildings are to be constructed is of one ownership. The size of the main soil and branch lines shall be determined by the number of plumbing fixtures to be connected thereto, as stated in Section 218 of this ordinance.

If the foundation of one building extends beyond the lot line limits of a lot, as

defined in Section 54 and Section 55, and over onto the adjacent lot or lots, then all buildings erected in the rear or over-lapping the said building on the same lot, of the same ownership, may connect to the soil line of the building in front, if the soil line is of a size and grade required by this ordinance. Provided, however, that all buildings that constitute a Bungalow Court may connect to one common soil line of the size required by this ordinance.

Section 234. When it is impracticable to extend a public sewer to a lot not abutting a public sewer, and a connection to the public sewer is desired, the owner of said property desiring a connection to the said public sewer shall first receive permission from the owner of the property over which he wishes to construct a private sewer line. Said permission shall be obtained in writing, and shall be recorded in the County Recorder's office, and a copy thereof filed with the Health Department. Upon the filing of such record with the Health Department, the Plumbing Inspector shall then issue a Plumbing Permit allowing such sewer extension. Each and every lot must be provided with a separate and independent soil line and sewer connection, except as elsewhere provided for Bungalow Courts.

Section 235. When summer or beach cottages, tents, or tent houses under the same ownership are to be erected in groups at beach resorts for temporary quarters, there shall be provided one water-closet for every twenty (20) male persons, or less, and one water-closet for every twenty (20) female persons, or less, and the said water-closets shall be conveniently located. There shall also be provided one kitchen sink for every ten (10) cottages, tents or ten houses, or fraction thereof, conveniently located and supplied with running water.

Section 236. When any summer or beach cottage tent or tent house is occupied during the entire year, the plumbing therein shall be subject to the terms and provisions of this ordinance.

Section 237. All public or private camping grounds shall be provided with at least two (2) water-closets. One water-closet shall be provided for men, and one water-closet shall be provided for women, located in separate compartments, and plainly marked for each sex. Water-closets shall be provided at the ratio of one for every twenty persons of both sexes. There shall also be provided one sink with running water, located in a convenient place, in order that all campers may have free access to same.

Section 238. All plumbing installed on any public or private piers, or on the tide lands of The City of San Diego, shall conform to the provisions of this ordinance. The disposal of the effluent must meet with the approval of the Board of Health.

Section 239. All plumbing installed inside The City of San Diego shall be properly trapped and vented in accordance with this ordinance, whether connected with a sewer or not. If there is no sewer abutting the property in which there is installed a plumbing fixture or fixtures, then the drainage from the same shall be carried to a properly constructed cess pool or septic tank. If there is installed a septic tank, the effluent shall drain through a series of drainage tile, the construction of which must first receive the approval of the Plumbing Inspector.

Section 240. All cess pools constructed in The City of San Diego shall be not less than six (6) feet in depth, and not less than four (4) feet in width. The side supporting walls shall be two-inch Redwood plank, and securely braced with four by four (4 x 4) inch Redwood timber; the top or cover shall be made of concrete, reinforced with steel rods; the slab shall be not less than four inches thick and shall extend not less than eighteen inches beyond the sides of the side walls of the cess pool.

Section 241. All septic tanks or settling tanks constructed in The City of San Diego shall be of reinforced concrete or brick. If a settling or septic tank is constructed of concrete, the side walls and cover shall be reinforced with steel rods. If the septic or settling tank is to be constructed of brick, the walls and side walls shall be plastered with at least one-half inch of good rich hydraulic cement. The cover for both the concrete and brick septic tanks shall be made of reinforced concrete of not less than four inches thick. All settling or septic tanks shall meet with the approval of the Plumbing Inspector. All septic tanks, when installed, shall be provided with a system of sub-surface drainage tiling of not less than three inches, inside diameter, and shall be laid in such a manner as to drain the effluent discharging from the tank in a sanitary way at all times. All connections to a septic tank from the house plumbing must be made with four inch cast iron pipe.

Section 242. Any person who violates, disobeys, omits, neglects or refuses to comply with, or resists, or opposes the execution of any of the provisions of this ordinance, or who maintains in service any plumbing or drainage system installed, constructed, altered or repaired in violation of this ordinance, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding five hundred dollars (\$500.00), or by imprisonment in the City Jail of The City of San Diego for a period not longer than six (6) months, or by both such fine and imprisonment.

For each day that such violation, disobedience, neglect or refusal shall continue, every such person shall be deemed guilty of a separate offense, and every part of such plumbing or drainage system as may exist in violation of this ordinance shall be considered as condemned and shall be torn out at the expense of the person guilty of the violation.

Section 243. If any section, sub-section, sentence, clause or phrase of this ordinance is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this ordinance. The Common Council of The City of San Diego hereby declares that it would have passed this ordinance, and each section, sub-section, sentence, clause and phrase thereof irrespective of the fact that any one or more sections, sub-sections, sentences, clauses or phrases be declared unconstitutional.

Section 244. That all ordinances and parts of ordinances in conflict with the provisions of this ordinance, be, and the same are hereby repealed.

Section 245. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 13th day of March 1922, by the following vote, to-wit:

BY FRED W. SICK, DEPUTY.

I HEREBY CERTIFY that the above and foregoing is a full, true and correct copy of Ordinance No. 8628 of the ordinances of the City of San Diego, California, as adopted by the Common Council of the City of San Diego on the 13th day of March, 1922, and approved by the Mayor of said City on the 23rd day of March 1922.

ALLEN H. WRIGHT,  
City Clerk of the City of San Diego, California.

BY Fred W. Sick DEPUTY.

ORDINANCE NO. 8629.

AN ORDINANCE AUTHORIZING THE CITY CLERK TO ADVERTISE FOR SALE AT PUBLIC AUCTION THE LEASE OF CERTAIN LANDS BELONGING TO THE CITY OF SAN DIEGO.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. The City Clerk of the City of San Diego is hereby authorized and directed to advertise for sale and sell at public auction a lease of the following described lands, belonging to the City of San Diego, and located in the County of San Diego, State of California, to-wit:

The Southeast quarter of the Northwest quarter, the North half of the Southwest quarter and the Southeast quarter of the Southwest quarter of Section 26, Township 18 South, Range 2 East.

The Northwest quarter of the Southeast quarter of Section 27, Township 18 South, Range 2 East.

The Southwest quarter of Section 27, Township 18, Range 2 East.

The Northeast quarter of the Southeast quarter and the south half of the Southeast quarter of Section 28, Township 18 south, Range 2 East.

Lots 2, 3 and 4, in Section 32, Township 18 South, Range 2 East.

Lots 1 and 2 and the northeast quarter of Section 33, Township 18 South, Range 2 East.

Lots 1 and 2, Section 34, Township 18 South, Range 2 East.

Said sale shall be made to the highest bidder for cash in gold coin of the United States and shall be subject to the power of the Common Council, to reject any and all bids and shall take place only upon ten day's notice by said City Clerk. Said Notice shall state the property to be leased, the time and place of the sale of said lease and shall require a cash deposit of at least 5% of the lease rental at the time said sale is concluded, the balance to be paid upon the execution of said lease by said City. Said notice shall further provide that said lease shall run for a period ending on March 19th, 1927, and that said lease shall be made subject to the existing rights of the present lessees of said land.

Section 2. The City Clerk of said City is hereby authorized to receive any money paid by the successful bidder at said sale, and retain the same until the lease has been executed by the Common Council, when it shall be paid into the City treasury, provided, however, that, in case the said lease is not entered into by the said parties, the money shall be refunded to the person paying the same.

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 27th day of March 1922, by the following vote, to-wit:

Ayes--Councilmen Bruschi, Heilbron, Held, Stewart and Weitzel.

Noes--None.

#### ORDINANCE NO. 8657.

AN ORDINANCE AUTHORIZING A MAJORITY OF THE MEMBERS OF THE HARBOR COMMISSION OF THE CITY OF SAN DIEGO TO ENTER INTO A LEASE WITH LAWRENCE OLIVER FOR CERTAIN TIDELANDS.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. A majority of the members of the Harbor Commission of The City of San Diego are hereby authorized and empowered to enter into a lease with Lawrence Oliver for the lease to said Lawrence Oliver of the following described portions of the tide lands belonging to The City of San Diego:

Beginning at a point on the mean high tide line of the Bay of San Diego where said high tide line is intersected by the southeasterly line of Beardsley Street extended southwesterly; thence south 52° 10' 40" east along said mean high tide line, a distance of 75 feet to a point; thence south 38° 34' 40" west a distance of 234.19 feet to a point on the United States Government Bulkhead line as established in the year 1912; thence north 50° 50' west along said bulkhead line a distance of 75 feet to a point; thence north 38° 35' east, a distance of 232.47 feet to the point or place of beginning.

Section 2. The said lease shall extend over a period of twenty-five (25) years, beginning April 1, 1922 and ending March 31, 1947, and said lease shall reserve to the Harbor Commission of the City of San Diego, to the Common Council of said City and to the people of said City, the right and privilege, by ordinance duly adopted, to terminate, change or modify said lease on such terms, reservations and conditions as may be stipulated in said lease.

Section 3. That said lease shall provide for a rental of twenty-five (\$25.00) per month. Said lease shall provide, however, that said rental shall be subject to change or modification by the Harbor Commission of The City of San Diego.

Section 4. The premises above described shall be used for the purpose of conducting the business of reduction of oil from fish and fish offal and refuse, and for the erection of such structures as may be necessary or incidental to such purpose, such structures erected on said premises to be in accordance with the ordinances of The City of San Diego, and to meet with the approval of the Manager of Operation of said City, and of the Harbor Commission of said City.

Section 5. That said lease shall reserve to said lessee the right to remove any and all buildings, machinery or structures of whatsoever nature now upon or to be placed upon said property, upon lessee's complying with the terms and provisions of the lease at the expiration thereof.

Section 6. That this ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

ORDINANCE NO. 8658.

AN ORDINANCE RETIRING C. H. MARTIN, POLICE OFFICER, FROM THE POLICE DEPARTMENT OF THE CITY OF SAN DIEGO, CALIFORNIA, AND DIRECTING THE PAYMENT TO SAID C. H. MARTIN OF A YEARLY PENSION.

WHEREAS, there was filed with the Common Council of the City of San Diego, on the 10th day of April, 1922, a certain Document Numbered 141882, being the written request of C. H. Martin, a Police Officer of the City of San Diego, that he be retired from the Police Department of said City of San Diego, upon a yearly pension equal to one-half of the amount of salary attached to the rank held by said C. H. Martin in said Police Department of said City of San Diego at the present time; and

WHEREAS, there has been filed with said Common Council of said City, the sworn certificates of 4 regularly licensed, practicing physicians of said City of San Diego, which certificates stated that said C. H. Martin has been physically disabled by reason of bodily injury; and

WHEREAS, it satisfactorily appears that said physical disability was caused by bodily injury received by said C. H. Martin in the immediate and direct performance and discharge of his duty as a police officer of said City of San Diego; and

WHEREAS, it appears that at this time said C. H. Martin holds the rank of machinist on said police force of said City of San Diego, NOW, THEREFORE,

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That C. H. Martin, Police Officer of the City of San Diego, be and he is hereby subject to the provisions and conditions of Ordinance No. 4309 of the ordinances of The City of San Diego, retired from further service in the Police Department of said City; that he be paid a yearly pension equal to one-half of the yearly salary attached to the rank held by said C. H. Martin at the time of his retirement, payable in equal monthly installments. Said yearly pension to date from the thirty-first day from and after the passage and approval of this ordinance, being the date on which payment to said C. H. Martin of his regular salary as Police Officer of said City shall cease.

Section 2. AN ORDINANCE AUTHORIZING THE ASSIGNMENT TO RALPH GRANGER OF LEASES OF CERTAIN TIDE LANDS MADE BY THE CITY OF SAN DIEGO TO A. J. STEELE, P. H. STEELE AND H. H. STEELE, AND APPROVING, CONFIRMING AND RATIFYING ANY ASSIGNMENT THEREOF HERETOFORE MADE.

BE IT ORDAINED by the Common Council of the City of San Diego as follows:

Section 1. That Bessie M. Steele, H. H. Steele and P. H. Steele, the sole owners of those certain leases of tide lands hereinafter described, made by the City of San Diego, California, Lessor, to A. J. Steele, P. H. Steele and H. H. Steele, Lessees, are hereby authorized and permitted to assign and transfer said leases to Ralph Granger as security for the faithful performance of each and all of the covenants, conditions and agreements contained in a certain chattel mortgage made by the said Bessie M. Steele, H. H. Steele and P. H. Steele on the 17th day of December, 1920, as security for the payment of the promissory note of the said Bessie M. Steele, H. H. Steele and P. H. Steele for the sum of \$60,000.00, dated December 17th, 1920, payable to said Ralph Granger; and that certain assignment of said leases which was heretofore on the 17th day of December, 1920, made, executed and delivered by the said Bessie M. Steele, H. H. Steele and P. H. Steele to the said Ralph Granger to secure the faithful performance of each and all of the covenants, conditions and agreements contained in said chattel mortgage, and to secure to the said Ralph Granger the payment of said note for the sum of \$60,000.00, is hereby in all respects approved, confirmed and ratified.

Said leases are more particularly described as follows, to-wit:

First. Lease executed May 4, 1918, by the City of San Diego as Lessor and by the said A. J. Steele, H. H. Steele and P. H. Steele, Lessees, whereby the said Lessor leased to the said Lessees certain tide lands particularly described as follows, to-wit: Lots Ten (10), Eleven (11), Twelve (12), Thirteen (13) and Fourteen (14), in Block One (1), of the Municipal Tide Lands Subdivision, Tract No. One (1), as shown on map on file in the City Engineer's office of the City of San Diego. For a term ending on the 4th day of April, 1943; said lease being filed in the office of the City Clerk of the City of San Diego, it bearing document No. 115597 of the records of the City of San Diego.

Second. Lease executed May 21st, 1918, by the City of San Diego as Lessor and by the said A. J. Steele, H. H. Steele and P. H. Steele, Lessees, whereby the said Lessor leased to the said Lessees certain tide lands particularly described as follows, to-wit: Beginning at a point on the United States Bulkhead Line as established in 1912, which point is 70 feet northwesterly from the intersection of the northwesterly line of Juniper Street produced southwesterly with said United States Bulkhead Line; thence southwesterly on a line parallel to and distant 70 feet northwesterly from said northwesterly line of Juniper Street produced southwesterly, a distance of 250 feet; thence northwesterly on a line parallel to and distant 250 feet from said United States Bulkhead Line a distance of 50 feet; thence northeasterly on a line parallel to and distant 120 feet northwesterly from the northwesterly line of Juniper Street to said United States Bulkhead Line; thence southeasterly along said United States Bulkhead Line 50 feet to the point or place of beginning. For a term ending the 4th day of April, 1943; said lease being filed in the office of the City Clerk of the City of San Diego, it bearing document No. 115977 of the records of the City of San Diego.

The said A. J. Steele mentioned in said leases as one of the Lessees has heretofore died, and by the final decree of distribution in his estate made by the Superior Court of the County of San Diego and State of California before the execution and delivery of said assignment hereinbefore mentioned dated December 17th, 1920, all his interest in and to said leases was distributed to his widow and two sons, to-wit: the said Bessie M. Steele, H. H. Steele and P. H. Steele, and they thereby became the sole owners of said leases.

Passed and adopted by the Common Council of the City of San Diego, California, this 1st day of May 1922, by the following vote, to-wit:

Ayes--Councilmen Bruschi, Heilbron, Held, Stewart and Weitzel.

ORDINANCE NO. 8677.

AN ORDINANCE AUTHORIZING THE CITY CLERK TO ADVERTISE FOR SALE AT PUBLIC AUCTION THE LEASE OF CERTAIN LANDS BELONGING TO THE CITY OF SAN DIEGO.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That the City Clerk of The City of San Diego is hereby authorized and directed to advertise for sale and sell at public auction a lease of the following described lands, belonging to the City of San Diego, and located in the County of San Diego, State of California, to-wit:

Right-of-Way Lot 134 of Middletown, according to the map of Middletown made by John E. Jackson, C.E., in January 1874, and filed in the office of the County Clerk of San Diego County, State of California, on the 19th day of October, 1874, in the case of Baldwin et al. vs. Coutts, et al., District Court of the 18th Judicial District of the State of California.

Said sale shall be made to the highest bidder for cash in gold coin of the United States and shall be subject to the power of the Common Council to reject any and all bids and shall take place only upon ten days' notice by said City Clerk. Said Notice shall state the property to be leased, the time and place of the sale of said lease and shall require a cash deposit of at least 10 per cent of the lease rental at the time said sale is concluded, the balance to be paid upon the execution of said lease by said City. Said Notice shall further provide that said lease shall run for a period ending on May 1st, 1927. Said Notice shall be published for three weeks in The Evening Tribune, a daily newspaper published in the City of San Diego.

Section 2. The City Clerk of said City is hereby authorized to receive any money paid by the successful bidder at said sale, and retain the same until the lease has been executed by the Common Council, when it shall be paid into the City Treasury, provided, however, that in case the said lease is not entered into by the said parties the money shall be refunded to the person paying the same.

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 1st day of May 1922, by the following vote, to-wit:

Ayes--Councilmen Bruschi, Heilbron, Held, Stewart and Weitzel.

Noes--None.

Absent--None.

and signed in open session thereof by the President of said Common Council, this 1st day of May 1922.

AN ORDINANCE APPROPRIATING THE SUM OF \$35,000.00 FROM THE RESERVE FUND FOR THE INSTALLATION OF CERTAIN WATER MAINS IN THE CITY OF SAN DIEGO.

WHEREAS, it appearing to this Common Council that the public interest, convenience and necessity of The City of San Diego demands the construction and installation of 12,600 feet of sixteen-inch water main between La Jolla and Pacific Beach, in The City of San Diego, California, in order that the people of Pacific Beach may be supplied with water for domestic purposes, and for fire and health protection, and that the necessity for such service is at the present time an emergency which must be cared for immediately, NOW, THEREFORE,

BE IT ORDAINED, by the Common Council of the City of San Diego, as follows:

Section 1. That the sum of Thirty-five thousand dollars (\$35,000.00), or so much thereof as may be necessary, be, and the same is hereby appropriated and set aside out of the Reserve Fund of The City of San Diego, for the purpose only and exclusively of paying for the installation of 12,600 feet of sixteen-inch water main between La Jolla and Pacific Beach, in The City of San Diego, California.

Section 2. That the Manager of Operation of The City of San Diego be, and he is hereby

authorized and directed to install said main forthwith, and to issue the necessary requisitions against the Reserve Fund of The City of San Diego in payment therefor.

Section 3. This ordinance is one of urgency, and one for the immediate preservation of the public health and safety, and shall become effective upon its passage and approval.

AUDITOR'S CERTIFICATE. I hereby certify that the appropriation made, or indebtedness incurred, by reason of the provisions of the annexed ordinance, can be made or incurred without the violation of any of the provisions of the Charter of the City of San Diego, California. Dated 5-15-1922.

#### ORDINANCE NO. 8690.

AN ORDINANCE PROVIDING FOR THE SALE OF FRANCHISES FOR THE USE OF THE STREETS OF THE CITY OF SAN DIEGO BY SELF-PROPELLED MOTOR VEHICLES CARRYING PASSENGERS FOR HIRE, AND PROVIDING FOR THE GRANTING OF AND ISSUANCE OF SUCH FRANCHISES, AND FOR A PENALTY FOR THE VIOLATION OF THIS ORDINANCE.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. It shall be unlawful for any person, firm or corporation to operate upon any of the streets of The City of San Diego an auto bus or stage for the carrying of passengers for hire within said City unless said person, firm or corporation shall first have secured from The City of San Diego a franchise to so operate said auto bus or stage in accordance with the terms and provisions of this ordinance.

Section 2. An "auto bus" or "stage" is hereby defined to be a self-propelled motor vehicle traversing the public streets upon a route wholly within the limits of The City of San Diego, between certain definite points or termini within said city, and not operated upon tracks or rails, and conveying passengers for hire between such termini or intermediate points for fixed charges or fares, and so held out, advertised or announced. An auto bus or stage is hereby declared to be a common carrier, and is subject to the regulations herein prescribed.

Section 3. Every franchise or privilege to operate auto busses or stages upon any public streets or highways within The City of San Diego hereafter proposed to be granted by the Common Council of The City of San Diego shall be granted for a period of not greater than Twenty-five (25) years, upon the terms and conditions as follows, and not otherwise.

Section 4. The grantor may, however, in such franchise impose such other and additional terms and conditions not in conflict herewith, whether governmental or contractual in character, as in the judgment of the Common Council thereof are to public interest.

Section 5. An applicant for a franchise under the terms and provisions of this ordinance shall file with the Common Council of The City of San Diego an application. Thereupon said Common Council shall, unless said Common Council shall decide to grant said franchise without competitive bidding, as hereinafter in section 9 provided, in its discretion advertise the fact of said application, together with a statement that it is proposed to grant the same, in one or more newspapers of The City of San Diego. Said advertisement must state that bids will be received for such franchise, and that it will be awarded to the highest bidder, and the same must be published in such newspaper once a day for ten successive days, or as often during said period as said paper is published, if it be a daily newspaper, and the full publication must be completed not less than ten nor more than twenty days before any further action can be taken thereon.

Section 6. The publication must state the character of the franchise proposed to be granted, the term for which it is granted, and the route to be traversed; that sealed bids therefor will be received up to a certain hour and day named therein, and that the successful bidder and his assigns must during the life of said franchise pay to The City of San Diego, as a rental for the use of said streets, two per cent (2%) of the gross annual receipts of the person, firm or corporation to whom the franchise is awarded arising from its use, operation or possession.

Section 7. Said advertisement shall also contain a statement that the said franchise will be struck off, sold and awarded to the person, firm or corporation who shall make the highest cash bid therefor; provided, only, that at the time of the opening of said bids any responsible person, firm or corporation present or represented may bid for said franchise or privilege a sum not less than ten per cent. above the highest sealed bid therefor, and said bid so made may be raised not less than ten per cent. by any other responsible bidder, and said bidding may so continue until finally said franchise shall be struck off, sold and awarded by said Common Council to the highest bidder therefor in gold coin of the United

States. Each sealed bid shall be accompanied with cash or a certified check, payable to the City Clerk of The City of San Diego, for the full amount of said bid, and no sealed bid shall be considered unless said cash or check is enclosed therewith, and the successful bidder shall deposit at least ten per cent. of the amount of his bid with the Clerk of The City of San Diego before the franchise shall be struck off to him, and if he shall fail to make such deposit immediately, then and in that case his bid shall not be received, and shall be considered as void, and said franchise shall then and there be again offered for sale to the bidder who shall make the highest cash bid therefor, subject to the same conditions as to deposit as above mentioned. Said procedure shall be had until said franchise is struck off, sold and awarded to a bidder who shall make the necessary deposit of at least ten per cent. of the amount of his bid therefor, as herein provided. Said successful bidder shall deposit with the City Clerk, within twenty-four hours after the acceptance of his bid the remaining ninety per cent. of the amount thereof, and in case he or it shall fail to do so, then the said deposit theretofore made shall be forfeited, and the said award of said franchise shall be void, and the said franchise shall then and there by said Common Council be again offered for sale to the highest bidder therefor, in the same manner and under the same restrictions as hereinbefore provided, and in case said bidder shall fail to deposit with the City Clerk the remaining ninety per cent. of his bid within twenty-four hours after its acceptance, the award to him of said franchise shall be set aside, and the deposit theretofore made by him shall be forfeited, and no further proceedings for a sale of said franchise shall be had unless the same shall be readvertised and again offered for sale in the manner hereinbefore provided.

Section 8. The successful bidder for any franchise or privilege struck off, sold and awarded under this ordinance shall file a bond running to said City, with at least two good and sufficient sureties to be approved by the Common Council of The City of San Diego, in a penal sum by it to be prescribed and set forth in the advertisement for bids, conditioned that such bidder shall well and truly observe, fulfill and perform each and every term and condition of such franchise, and that in case of any breach of condition of such bond the whole amount of the penal sum therein named shall be taken and deemed to be liquidated damages and shall be recoverable from the principal and sureties upon said bond. Said bond shall be filed with the Common Council within five days after such franchise is awarded, and upon the filing and approval of such bond the said franchise shall by said Common Council be granted by ordinance to the person, firm or corporation to whom it has been struck off, sold or awarded, and in case that said bond shall be not so filed the award of such franchise shall be set aside, and any money paid therefor shall be forfeited, and said franchise shall in the discretion of said Common Council be readvertised and again offered for sale in the same manner and under the same restrictions as hereinbefore provided.

Section 9. Whenever in the opinion of the Common Council the public interest and convenience will be subserved, the Common Council may in its discretion, anything in this ordinance to the contrary notwithstanding, grant a franchise to an applicant without advertising the sale of said franchise, as in this ordinance provided, and without competitive bids, upon the terms and conditions as provided in this ordinance, and not otherwise; provided, however, that no such franchise shall be granted under this section until the Common Council shall have advertised the fact that it proposes to grant the same without competitive bids as applied for, or as changed by said Common Council, in the official newspaper of said City. Said advertisement must state that the Common Council proposes to accept the bid of the applicant for such franchise, and that any person desiring to protest the granting of said franchise shall file written objections thereto with the City Clerk on or before a date to be fixed in said notice, which shall be not less than ten (10) days from the date of the first publication of said notice. Said notice shall be published in the official newspaper of said City once a day for five (5) successive days, or as often during said period as said newspaper is published. Upon the day fixed by said notice the Common Council shall hear said objections and pass upon the same, and its decision upon such objections shall be final.

Upon receipt of an application for such franchise, if the Common Council decides to grant the same without competitive bidding, then and in that event said Common Council shall fix a sum of money to be paid by said applicant as consideration for the sale of said franchise, ten per cent. (10%) of which shall be deposited by said applicant with the City Clerk of said City within twenty-four hours after the Common Council has decided to accept said application without competitive bidding. The remaining ninety per cent. (90%) of the amount so fixed by said Common Council shall be paid by said applicant within ten (10) days after the ordinance granting such franchise becomes effective, and said ordinance so granting said franchise shall provide that if the remaining ninety per cent. (90%) of the amount so fixed be not deposited, in accordance with the terms of this section, then and in that event the award of said franchise shall be void, and the said franchise shall then and there be forfeited, and the ten per cent. (10%) theretofore paid by said applicant shall be retained by said City as liquidated damages for the refusal on the part of said applicant to accept said franchise.

Section 10. The Common Council shall have power in the ordinance granting such franchise to specify:

(a) That the route or routes to be followed in transporting passengers, and the termini of said route or routes shall be fixed from time to time by the Common Council by resolution.

(b) That no fare to be charged for transporting passengers between the termini or intermediate points on said route or routes shall be charged or collected except such fare as shall first have been authorized by a resolution of the Common Council.

(c) That the schedule to be observed, showing the times of departure of auto busses or stages from the termini according to which it is proposed to operate such auto bus or stage shall be fixed from time to time by the Common Council by resolution.

(d) Transfer points, if transfers are used.

(e) The seating capacity of the motor vehicles used under said franchise.

The grantee of said franchise shall keep on file at all times, in the office of the City Clerk, a list of operators of said auto busses or stages, and each such operator shall be compelled before being permitted to operate an auto bus or stage to pass an oral examination as to his knowledge of traffic laws and rules of The City of San Diego and of the State of California.

In addition to the foregoing, the Common Council may specify in said ordinance granting said franchise that the successful bidder, or person, firm or corporation to whom said franchise shall be awarded, shall give and keep in full force and effect at all times during the life of said franchise, either:

(a) A bond of the owner or lessee of said auto bus or stage, with a responsible surety company or association authorized to do business under the laws of the State of California, in the sum of ten thousand dollars (\$10,000.00), conditioned that the owner or lessee of said auto bus or stage for which a franchise has been awarded will pay all loss or damage that may result to any person or property from the negligent operation of or defective construction of said auto bus or stage, or which may arise or result from any

violation of any of the provisions of this ordinance, or of the laws of The City of San Diego. (The Common Council may also provide that) said bond so given shall inure to the benefit of any and all persons suffering loss or damage, either to person or property, as herein provided, and that suit may be brought in any court of competent jurisdiction upon said bond by any person or persons or corporation suffering any loss or damage as herein provided, and that said bond shall be approved by the Common Council of said City; and said Common Council may further provide that said franchise is granted upon condition and consideration of the filing of said bond, and that said bond shall be of continuing liability, notwithstanding any recovery thereon, and if at any time in the judgment of the Common Council said bond is not sufficient for any cause, the Common Council may require the grantee of such franchise to replace said bond with another bond satisfactory to the Common Council, and in default thereof said franchise shall be forfeited.

(b) A policy of insurance in a company authorized to do business in the State of California insuring said owner or lessee of said auto bus or stage against loss by reason of damage that may result to any person or persons or property from the operation of said auto bus or stage; said policy of insurance to be in limits of five thousand dollars (\$5,000.00) for any one person injured or killed, and, subject to such limit for each person, a total liability of ten thousand dollars (\$10,000.00) in case of any one accident resulting in bodily injury or death to more than one person. Said policy of insurance must also provide insurance to the extent of one thousand dollars (\$1,000.00) for the injury to or destruction of any property of third parties. Said policy shall guarantee payment of any final judgment rendered against the owner or lessee of said auto bus or stage within the limits herein provided, irrespective of the financial responsibility of any act or omission of said auto bus owner or lessee. If at any time during the life of the franchise hereinabove provided for, said policy of insurance be cancelled by the issuing company, or the authority of said issuing company to do business in the State of California be revoked, the Common Council shall require the party to whom the franchise is granted, as herein provided, to replace said policy with another policy satisfactory to the Common Council, and in default thereof said franchise shall be forfeited.

Section 11. The ordinance granting said franchise shall require:

(a) That the bond or insurance policy herein required is sufficient to properly safeguard the public interest and safety.

(b) That the vehicle or vehicles for which the franchise is granted are adequate and safe for the purpose intended, and sufficiently equipped with skid chains and other safety devices.

(c) That the operator or operators employed by the grantee of said franchise are competent and have had sufficient experience in driving automobiles in The City of San Diego.

(d) That the driver or drivers are physically qualified to drive motor vehicles safely.

Section 12. Such ordinance granting such franchise shall further specify that it shall be unlawful for any person to operate an auto bus or stage under the terms of said franchise unless he shall have been regularly licensed as a chauffeur under the Motor Vehicle Act of the State of California.

Section 13. Said ordinance granting said franchise shall further provide that it shall be unlawful for the grantee of such franchise:

(a) To drive or operate, or cause to be driven or operated, any auto bus or stage while there is attached thereto any trailer or other passenger carrying vehicle.

(b) To permit passengers to ride on the running board or fenders of any auto bus or stage; and it shall further provide that it shall also be unlawful for any person to ride on the running board of any auto bus or stage.

(c) To refuse to carry any person offering himself or herself at any regular stopping point to be carried and tendering the fare for the same to any regular stopping place in said route, or between the termini thereof, unless at the time such offer is made the seats of said auto bus or stage are fully occupied.

That the grantee of such franchise may refuse transportation to any person who at the time demand is made to be carried is in an intoxicated condition, or who at such time may be conducting himself in a boistrous manner, or who may at such time be using profane language.

Section 14. The ordinance granting such franchise shall further provide that the grantee of such franchise shall permit and allow firemen and policemen in the employ of The City of San Diego, while engaged in the actual discharge of their duties, to ride in any vacant seat on the auto bus or stage so owned or operated by such grantee without paying any sum or sums of money for fare or otherwise for riding on said auto bus or stage.

Section 15. A failure on the part of the grantee to operate auto bus or stage service in accordance with the terms and provisions of the ordinance granting such franchise for a period of thirty days shall cause a forfeiture of said franchise, and the Common Council of The City of San Diego is hereby empowered to declare such forfeiture upon receipt of satisfactory evidence that said grantee has failed to operate under the terms of said franchise for said period of time.

Section 16. The granting of a franchise under the terms and provisions of this ordinance shall be subject at all times to the right of a majority of the electors of said City voting at any election at any time hereafter to repeal, change or modify the said grant, and every ordinance making such grant shall contain a reservation of such right to repeal, amend or modify said ordinance.

Section 17. Whenever it shall appear to the satisfaction of the Common Council that the public interest, convenience and safety of The City of San Diego demand the repeal, change or modification of said grant of franchise under the terms and provisions of this ordinance, said Common Council is hereby authorized to repeal, amend or modify the ordinance granting such franchise.

Section 18. The ordinance granting such franchise shall further provide that each and every auto bus or stage operated under the terms and provisions of said franchise shall be so run and operated as to maintain regular daily schedules which to the Common Council may seem reasonable and proper, and all such schedules before becoming operative shall be approved by the Common Council by resolution.

Section 19. The ordinance granting such franchise shall further provide that the grantee of such franchise must during the life of said franchise pay to the City two per cent. (2%) of the gross annual receipts of the person, partnership or corporation to whom the franchise is awarded arising from its use, operation or possession, as a rental for the use of said streets. On or before the last Monday in November of each year, the grantee of such franchise shall cause to be filed with the City Auditor a sworn statement of the gross receipts of said Company for the preceding year, and the said grantee shall pay the said two per cent. (2%) into the City Treasury during the month of January of each year.

The ordinance granting said franchise shall further provide that the Common Council shall have power to investigate the books of the grantee of said franchise, and to examine under oath the officers, agents or employees of the grantee of said franchise concerning the annual statement hereinabove provided.

Section 20. The Police Department is hereby empowered in case of fire, accidents, parades, obstruction on, breaks in, or repairs of streets, or any emergency, or to prevent

accidents, or congestion of traffic, or in case of public necessity, to temporarily divert and route auto busses upon such streets as in its judgment is necessary.

Section 21. If any section, sub-section, sentence, clause, or phrase of this ordinance is for any reason held to be unconstitutional or invalid, such decision shall not affect the remaining portions of this ordinance. The Common Council hereby declares that it would have passed this ordinance and each section, sub-section, sentence, clause and phrase thereof irrespective of the fact that any one or more other sections, sub-sections, sentences, clauses or phrases be declared unconstitutional or invalid.

Section 22. Any person violating any of the provisions of this ordinance shall be guilty of a misdemeanor, and upon conviction thereof shall be subject to a fine of not more than one hundred dollars (\$100.00), or by imprisonment in the City Jail for a period of not more than three months, or by both such fine and imprisonment.

Section 23. That Ordinance No. 6248 of the ordinances of The City of San Diego, entitled, "An Ordinance regulating the use of the streets of The City of San Diego, California, by self-propelled motor vehicles carrying passengers for hire, and providing for the licensing of such vehicles and for a penalty for the violation of this ordinance," approved July 10, 1915, and all ordinances amendatory thereof and supplemental thereto, be, and the same are hereby repealed.

Section 24. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

We therefore respectfully request the City of San Diego to issue to us in lieu of these defaced and mutilated bonds, new bonds under the provisions of the Act approved February 23, 1907, (Status. 1907, P. 53).  
We enclose herewith our cashier's check payable to the order of the City Treasurer of the City of San Diego, for the amount of \$100.00, to cover the cost of printing, lithographing or otherwise preparing said duplicate bonds, and all other expenses in connection with the issuance thereof.

Very truly yours,  
SOUTHERN TRUST & COMMERCE BANK,  
BY T. A. JOHNSON  
MANAGER BOND DEPARTMENT

and,  
WHEREAS, in the opinion of the Common Council of the City of San Diego, the notation placed on said bonds by the County Treasurer of San Diego County, Calif., is a mutilation or defacement of said bonds which has been made by said County Treasurer, without bad faith on the part of the owner of said bonds, and which impairs the value of said bonds to the owner, and  
WHEREAS, the owner of said bonds has deposited with its written application for the issuance of duplicate bonds, a cashier's check which will be sufficient to cover the cost of printing, lithographing or otherwise preparing such duplicate bonds and all other expenses in connection with the issuance thereof,  
NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF SAN DIEGO:-  
Section 1. That there shall be issued duplicate bonds in lieu of said mutilated or defaced bonds, said duplicate bonds to be dated the first day of January, 1911, to be the

denomination of \$1,000. each, to bear interest at the rate of four and one-half per centum per annum, payable semi-annually January 1 and July 1, and to be numbered and payable as follows:-

- Nos. 352, 353, 354, 355, 356 and 362 due January 1, 1926,
- " 357 to 382 inclusive, due January 1, 1927,
- " 401 to 406 inclusive, due January 1, 1928,
- " 426 to 431 inclusive, due January 1, 1929,
- " 451 to 456 inclusive, due January 1, 1930,
- " 476 to 480 inclusive, due January 1, 1931,
- " 579, 581, 583 and 584 due January 1, 1935,
- " 601 to 606 inclusive, due January 1, 1936,
- No. 626 due January 1, 1937;

Said bonds shall be signed by the Mayor and Treasurer of the City of San Diego, and shall be counter-signed by the City Clerk who shall affix thereto the corporate seal of said city, and the coupons attached to said bonds shall be executed with the fac-simile signature of the City Treasurer, and said bonds and coupons shall be insubstantially the following form, to-wit:-

UNITED STATES OF AMERICA  
STATE OF CALIFORNIA  
CITY OF SAN DIEGO  
MUNICIPAL IMPROVEMENT BOND  
PARK IMPROVEMENT FUND  
SPECIAL ELECTION AUGUST 9, 1910.

No.            \$             
KNOW ALL MEN BY THESE PRESENTS that the City of San Diego, a municipal corporation of the State of California, acknowledges itself indebted for value received and hereby promises to pay to bearer            DOLLARS on the first day of January, 19    , with interest thereon from the date hereof until said principal sum is paid, at the rate of four and one-half per cent per annum, payable semi-annually on the first days of January and July of each year on the presentation and surrender of the respective coupons hereto annexed as they severally become due, both principal and interest of this bond being payable in gold coin of the United States of America, at the office of the Treasurer of said city, or at the National Park Bank, New York, N.Y., at the option of the holder hereof.

This bond is issued for the purpose of improving the fourteen hundred acre public park of said city of San Diego, as particularly specified in sub-section 19 of section 1 of Ordinance No. 4152 of the Ordinances of the City of San Diego, approved by the Mayor thereof on the 16th day of June, 1910; and is issued under and pursuant to and in full compliance with the Act of the Legislature of the State of California which became a law February 25, 1901, and amendments thereof, authorizing the incurring of indebtedness by cities for municipal improvements, and the charter of said City and the constitution and other laws of said State, and in full compliance with certain ordinances and proceedings of the Common Council of said city.

It is further certified, recited and declared that all the acts, conditions and things required to exist, happen and be performed precedent to and in the issuance of this bond have existed, happened and been performed in due time, form and manner as required by law; that this issue of bonds has been authorized by the Vote of two-thirds of the duly qualified electors of said City voting at a special election duly and regularly called and held in said City on the 9th day of August, 1910; and that the amount of this bond, together with all other indebtedness of said City does not exceed any limit prescribed by the Constitution of said State or by any statute or law thereof; and that before the issuance of this bond provision has been duly made as required by the Constitution and laws in that behalf for the collection of an annual tax sufficient to pay the interest on such indebtedness as it falls due, and also to constitute a sinking fund for the payment of the principal thereof on or before maturity and within forty years from the date of this bond.

The full faith and credit of the said City of San Diego are hereby irrevocably pledged for the punctual payment of the principal and interest of this bond.

This bond is a duplicate bond issued in substitution for another bond conforming in all respects herewith, and is issued in full conformity with the requirements of Act No. 440, General Laws of Calif., 1915.

IN WITNESS WHEREOF the said City of San Diego has caused this bond to be signed by the Mayor and Treasurer of said City and countersigned by the Clerk thereof and attested by the corporate seal of said City hereto attached, and this bond to be dated the first day of January, 1911.

Mayor of the City of San Diego, California.

Treasurer of the City of San Diego, California.

COUNTERSIGNED:

City Clerk of the City of San Diego, California.

INTEREST COUPON.  
PARK IMPROVEMENT FUND.

BOND NO.            SPECIAL ELECTION AUGUST 9, 1910. INTEREST COUPON NO.           

On the 1st day of           , 19    , the City of San Diego, California, on presentation of this coupon at the office of the Treasurer thereof, will pay to bearer            DOLLARS in United States gold coin for semi-annual interest on above bond.

Treasurer of the City of San Diego, Calif.

SECTION 2. Immediately upon the execution of said bonds, they shall be delivered to the City Treasurer of the City of San Diego, who is hereby authorized and directed to deliver the same to the Southern Trust & Commerce Bank or its duly authorized agents or assigns, upon the surrender of the bonds in substitution for which these bonds are issued. The City Treasurer shall immediately cancel the bonds in exchange for which these bonds are issued, and shall report the fact of such cancellation to the Common Council.

SECTION 3. The Common Council of the City of San Diego hereby finds that all conditions prescribed by Act No. 440 of the General Laws of California of 1915 precedent to the issuance of said duplicate bonds, have been duly complied with, and that such duplicate bonds, when duly issued in exchange for the defaced or mutilated bonds hereinabove described, will constitute valid and legally binding obligations of the City of San Diego, and shall have all the force, effect and validity of said original bonds.

Approved as to form, this 27th day of July, 1922.

S. J. HIGGINS.

#### S P U R " C "

Beginning at a point in the center line of the Atchison, Topeka and Santa Fe Railway Company's main lead spur track at Engineer's Station 14, plus 57.96 feet, said point being 68.66 feet southerly from the southern line of Juniper Street and 25 feet easterly at right angles from the western line of Belt Street; thence northwesterly 91.93 feet on a curve having a radius of 603.81 feet and concave to the west; thence northwesterly on a curve having a radius of 603.81 feet and concave to the east 91.93 feet to a point 34.7 feet northerly from the north line of Juniper Street and 11.0 feet easterly from the western line of Belt Street; thence northwesterly on a tangent 11.0 feet from and parallel to said western line of Belt Street, 449.74 feet to proposed end of track.

The point of switch of said track to be located 14.6 feet northerly from said point of beginning.

#### S P U R " D "

Beginning at a point in the center line of the Atchison, Topeka and Santa Fe Railway Company's proposed main lead spur track at Engineer's Station 14 plus 86.34 feet, said point being 97.04 feet southerly from the southern line of Juniper Street and 25.0 feet easterly at right angles from the western line of Belt Street; thence southeasterly, on a curve having a radius of 603.81 feet and concave to the west 91.93 feet; thence southeasterly, on a curve having a radius of 603.81 feet and concave to the east, 91.93 feet; thence southeasterly on a tangent 11.0 feet from, and parallel to, the said western line of Belt Street, 99.5 feet to proposed end of track.

The point of switch of said proposed track is to be located 14.6 feet southeasterly from said point of beginning.

This permission is granted and accepted upon the following express conditions:

(1) That said spur tracks shall be kept and maintained at the official grade of the streets over which the same shall pass, as such official grade is now or may hereafter be established or changed; and the City hereby reserves the right to grade, curb, sewer, macadamize, pave, gutter, culvert or otherwise improve or repair or reimprove any part of said streets over which said spurs may be laid, and to lay down or relay pipes for water, gas, electrical conduits, sewers, or other appurtenances.

(2) That said Company shall pave or repave and keep in repair said streets, between the rails of each track, and between the tracks, and for at least two feet on each side thereof, and that said company shall allow any other person doing business along the line of said spurs, or either of them, to use the same upon payment of such compensation as the Common Council shall determine to be reasonable for such privilege, and further that cars shall not be permitted to stand on the tracks in the intersections of said streets with other streets, in said City, nor upon the crossings of said spurs over said streets.

(3) That all cars shall be operated upon such spur tracks in such manner as to cause the least possible obstruction to ordinary public travel along or across the same, and no cars shall be allowed to remain on said spur tracks, or any of them, for a longer period of time than is necessary to expeditiously load or unload the same.

(4) The rights and privileges granted by this ordinance are made upon the further condition that said spurs shall be at all times subject to regulation by the Common Council, and the City may at all times insist and have the right, at the election of said Common Council, to take over the said spur tracks from said Company, its successors or assigns, on the payment of the appraised value thereof, one of the appraisers to be named by the said Common Council, one by said Company, and in case they cannot agree those two to name a third; provided that nothing herein contained shall be so construed as to prevent the Common Council from altering, amending or repealing this permit, or amending or repealing this ordinance in any and all respects.

(5) That said City of San Diego shall have the right to use said spur tracks at any time, without cost to said City of San Diego.

(6) That the permission granted by this ordinance shall be revocable at the will of the Common Council of The City of San Diego.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

#### ORDINANCE NO. 8769.

AN ORDINANCE PROCLAIMING A SPECIAL ELECTION, AND SUBMITTING A CERTAIN ORDINANCE TO THE ELECTORS OF THE CITY OF SAN DIEGO, CALIFORNIA.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. In pursuance of the authority vested in the Common Council of The City of San Diego, California, by Section 2, Chapter IV, Article I of the City Charter:

PROCLAMATION IS HEREBY MADE that on Tuesday, the 10th day of October, 1922, a special election will be held in The City of San Diego, California, for the purpose of submitting to the vote of the electors of The City of San Diego a certain proposed ordinance initiated by petition of the registered electors of said City, and filed in the office of the City Clerk of said City on July 31st, 1922, Document No. 144175-1/2, and entitled, "Ordinance No. \_\_\_\_\_, Granting to the successful bidder therefor a franchise to construct, maintain and operate for a period ending the 1st day of September, 1952, a street railway upon 16th Street between Market street and Broadway, in the City of San Diego, California," which said proposed ordinance so submitted by initiative petition is in the words and figures following:

#### "ORDINANCE NO. \_\_\_\_\_

Granting to the successful bidder therefor a franchise to construct, maintain and operate for a period ending the 1st day of September, 1952, a street railway upon 16th street between Market street and Broadway, in the City of San Diego, California.

Be it ordained as follows:

Section 1. That the City of San Diego hereby grants to the successful bidder therefor and to his or its assigns or successors, the franchise and authority to construct, maintain and operate for a period ending on the first day of September, 1952, a street railway, including side-tracks, crossovers, spur-tracks, turnouts, switches and curves, and to erect and maintain either a single or double pole line for the support of overhead trolley support arms or span wires, and to suspend therefrom electric wires to be used in the operation of said railway, upon and along 16th Street from the center of the intersection of said 16th street with Market street, thence northerly along said 16th street to the center of the intersection of said 16th street with Broadway, in said city.

Section 2. That the Common Council of the City of San Diego by and through the City Clerk of said City for and as the act of said Common Council, be and is hereby directed and authorized to advertise proposals for the sale of, and invite bids for the purchase of the grant of a franchise and privilege to construct, maintain and operate a street railway upon 16th street between Market street and Broadway in the City of San Diego, by publication in the official newspaper of said city.

Said advertisements shall state such offer of sale and that bids will be received for said franchise, and that said franchise will be struck off, sold and awarded to the highest cash bidder therefor; said advertisement shall be published in such manner, and for such period of time, and shall be in such form, and contain such matters, and conditions of bidding, as the charter of said City now in effect prescribes in Section 9 of Chapter II of Article II thereof; and said Common Council is hereby directed and authorized to receive bids for said franchise as so advertised and to select and declare the highest bidder for said franchise, as prescribed in said section, chapter and article of said Charter, to whom this franchise shall be struck off, sold and awarded.

The successful bidder for this franchise or privilege struck off, sold and awarded shall file a bond running to name of said City, with at least two good and sufficient sureties to be approved by said Common Council in the penal sum of \$500.00, in manner and conditions as prescribed in said Section 9, Chapter II of Article II of said charter of the City of San Diego; upon the filing and approval of such bonds, the said franchise shall be deemed granted by the people of said City by this ordinance to the person, firm or corporation to whom it has been struck off, sold, or awarded, and in case that said bond shall not be so filed, the award of such franchise shall be set aside, and any money paid therefor shall be forfeited, and said franchise shall be readvertised and again offered for sale in the same manner, and under the same restrictions, as hereinbefore provided.

Section 3. That this franchise or privilege shall be, and is granted, sold and awarded to the successful bidder therefor upon the following conditions and agreements:

(1) The grantee of said franchise shall file with the City Clerk of said City during the first 15 days of February of each year after the taking effect of this ordinance, a statement verified by the oath of said grantee showing the total gross receipts arising from

the use, operation or possession of said franchise for the preceding calendar year, and shall thereupon pay to said City Clerk for said City, the aggregate sum of 2% of said receipts as shown in said statement. Any refusal of said grantee, successors or assigns, to file such verified statement and to pay said percentage within the time above provided shall constitute ground for forfeiture of this franchise. The Mayor and Common Council of said City may after said statement is made inspect and examine the books of the grantee of this franchise and may cause the same to be examined by an expert accountant and may examine under oath any and all officers or agents in respect thereto.

(2) Motive Power: That the cars upon said railway shall be propelled by electricity used through the overhead system, or in case of accidents or unavoidable delay in procuring equipment, by any other lawful power.

(3) Condition of Streets: The grantee of the franchise, successors or assigns, shall pave or macadamize the entire length of the street used by tracks, between the rails and for two feet on each side thereof and between the tracks if there be more than one, whenever such street is ordered to be paved or macadamized by said Common Council, and shall keep the same constantly in repair, flush with the street, and with good crossings.

(4) Track Specifications: That the track shall be constructed at the standard gauge of four feet, eight and one-half inches within the rails, and shall have a space between it and side-tracks, turn-outs and switches of not less than five feet, three inches.

(5) Single or Double Track: That the grantee shall have the right to lay and maintain either single or double tracks as the conditions of business may warrant, but the laying of a single track shall be deemed a compliance with the conditions of this franchise and shall in no wise impair the right of the grantee, successors or assigns, to subsequently lay a second track paralleling the first tracks.

(6) Rail Specifications: That good substantial steel rails shall be used in the construction of said track.

(7) City's Right to Access to Streets: That the right to grade, sewer, pave, macadamize, or otherwise improve or alter or repair the said streets or change the grade thereof, shall be reserved to the said City, such work to be done so as to obstruct the said railway as little as possible; the grantee or assigns shall shift and reshift the rails so as to avoid the obstruction created thereby; the grantee and its assigns shall waive any and all claims for damages against said City caused by reason of such grading, paving, or macadamizing, or otherwise improving, altering or repairing said streets.

(8) Tracks on Graded Streets: That the laying of said track and all side tracks, crossovers, spur-tracks, turn-outs, switches or curves shall conform in all cases with the grade of said streets when the same have been graded, and in all other cases to be as near to the natural grade as practicable, and when, at any time, any part of this route shall be graded, or the grade thereof altered or changed by said Common Council, the bed of the road and the tracks thereon shall be made to conform therewith by said grantee or assigns. That the overhead system may be of single or double pole construction.

(9) Location of Tracks on Streets: That the tracks shall be so constructed and laid that each of them shall be when practicable of equal distance from curb line to said streets or as nearly so as the condition or width of the street will permit.

(10) Location of Switches: That no switches shall be constructed or maintained within fifty feet of any cross street; and the location of such switches and all turnouts shall be changed at the expense of the grantee or assigns whenever so ordered by said Common Council.

(11) City Engineer's Services: That the City Engineer shall, under the direction of the said Common Council, give the established grade of the streets along the line of construction of said street railway, and set stakes indicating the said grade. He shall see that the said railway is constructed in conformity with the terms and requirements of the franchise, and for his services as herein required he shall receive such fees as are provided therefor, and the same shall be paid by the grantee, or assigns.

(12) Time Limit for Construction and Completion: Work to construct the railway shall be commenced in good faith, within not more than four months from the granting of this franchise, and if not so commenced within said time, said franchise shall be declared forfeited; and the said railway shall be completed within not more than 3 years thereafter, and if not so completed within said time, said franchise so granted shall be forfeited, provided, that, for good cause shown, the Common Council may by resolution extend the time for completion thereof not exceeding 3 months.

(13) Cessation of Operation: In case the grantee of the franchise, successors or assigns, shall cease to operate said railway for a period of 90 days consecutively after said railway shall have been fully completed and constructed, except in cases of unavoidable accidents or other matters not within the control of the grantee, successors or assigns, this franchise shall be and is hereby declared to be forfeited, and the grantee, successors or assigns, shall thereafter remove the tracks of said railway and put the streets in good condition.

(14) Right to Repeal: The grant of this franchise shall be subject to the right of the majority of the electors of said City, voting at any election, at any time thereafter to repeal, change or modify the said grant, and such right is hereby reserved.

Section 4. This ordinance shall be in force and effect from and after 30 days after its passage by the Common Council and approval of the Mayor of said City; or, this ordinance shall be in force and effect forthwith upon its approval and adoption by vote of the electors of said City at the special election required by law to be called by the Common Council, at which election said ordinance shall have been submitted to a vote of the people.

Section 5. That the City Clerk of the City of San Diego be, and he is hereby authorized and directed immediately after the passage and approval, or adoption, of this ordinance, to cause the same to be published at least once in the City official newspaper of said City."

This ordinance is designated on the ballot and submitted to the voters, in the manner and form as set out in Section two of this ordinance.

Section 2. The manner of holding such special election, and the voting for or against the ordinance set out in Section One of this Ordinance, shall be as follows:

The ballot provided in said Special Election shall be printed so as to state the ordinance set out in Section One of this ordinance, in the manner and form following:

:	:	:
:	FOR THE ORDINANCE granting to the successful bidder therefor a fran-	:
:	chise to construct, maintain and operate for a period ending the 1st day:	:
:	of September, 1952, a street railway upon 16th street between Market	:
:	street and Broadway, in the City of San Diego, California.	:
:	:	:
:	AGAINST THE ORDINANCE granting to the successful bidder therefor a	:

:	day of September, 1952, a street railway upon 16th street between Market:	:
:	street and Broadway, in the City of San Diego, California.	:
:	:	:

In addition to the directions to voters, which the General Law of the State requires to be printed on the ballot, it shall also contain the following directions to the voter:

"If you desire to ratify the ordinance contained herein, stamp a cross (X) in the voting square at the right of and opposite the words 'For the ordinance,' etc. If you desire not to ratify the ordinance contained herein, stamp a cross (X) in the voting square at the right of and opposite the words 'Against the ordinance' etc."

Electors voting at said election shall indicate their choice on the proposition by stamping a cross (X) in the voting square at the right of the words "For the ordinance," etc., or in the voting square at the right of the words "Against the ordinance," etc. If an elector shall have stamped a cross (X) in the voting square after the words "For the ordinance," etc., his vote shall be counted in favor of said ordinance, and if an elector shall have stamped a cross (X) in the voting square after the words "Against the ordinance," etc., his vote shall be counted as a vote against said ordinance.

In all respects not provided for in this ordinance, the ballot to be used at said election, as to its form, shall conform to the provisions of the General Law of the State touching municipal elections in such municipalities as is The City of San Diego.

Section 3. For the purpose of said election the election precincts in said City are hereby designated and are bounded and defined as in that certain ordinance of The City of San Diego, numbered 8594 entitled "An ordinance subdividing The City of San Diego, California, into one hundred thirty-three election precincts, and defining the boundaries thereof," approved January 30, 1922, as amended by Ordinance No. 8694 of the ordinances of said City, entitled, "An Ordinance amending Sections 105 and 106 of Ordinance No. 8594 of the ordinances of The City of San Diego, entitled, 'An Ordinance subdividing The City of San Diego, California, into one hundred thirty-three election precincts, and defining the boundaries thereof,' approved January 30, 1922," and approved May 23rd, 1922, said ordinances numbered 8594 and 8694 being by reference thereto incorporated herein as though in this paragraph full set forth.

#### ORDINANCE NO. 8770.

AN ORDINANCE APPROPRIATING THE SUM OF \$1,000.00 FROM THE RESERVE FUND, TO COMPLETE THE PURCHASE AND INSTALLATION OF A FILTRATION PLANT AT THE TORREY PINES RESERVOIR.

WHEREAS, the public interest and necessity of The City of San Diego demand that the water furnished the City through the La Jolla-Del Mar pipe line be filtered, in order that pure water be delivered to the consumers thereof, and that a filtration plant should be immediately established in connection with said line; and

WHEREAS, in order to protect the public health and safety, it is immediately necessary to install said plant; and

WHEREAS, there has been appropriated and set aside out of the Reserve Fund of The City of San Diego, the sum of \$10,000.00 to be used for the purpose of purchasing and installing said filtration plant; and

WHEREAS, in order to complete the purchase and installation of said plant, it is necessary that an additional \$1,000.00 be appropriated, NOW, THEREFORE,

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That the sum of One thousand dollars (\$1000.00), or so much thereof as may be necessary, be, and the same is hereby set aside and appropriated out of the Reserve Fund of said City, for the purpose only and exclusively of completing the purchase and installation of filtration plant at the Torrey Pines Reservoir.

AN ORDINANCE OF THE CITY OF SAN DIEGO GRANTING A FRANCHISE AND PRIVILEGE TO THE LA JOLLA STAGE LINE TO MAINTAIN AND OPERATE OVER AND UPON THE PUBLIC STREETS OF THE CITY OF SAN DIEGO AUTO BUSES OR STAGES OR SELF-PROPELLED VEHICLES CARRYING PASSENGERS FOR HIRE, FOR THE TERM OF TEN (10) YEARS.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. The Common Council of the City of San Diego, County of San Diego, State of California, does hereby declare that the La Jolla Stage Line made application by petition in writing, filed on the 29th day of July, 1922, to the said Common Council for a franchise and privilege, hereinafter described, under the provisions of Ordinance No. 8690 of the Ordinances of said City of San Diego; that said application came on regularly on the 31st day of July, 1922, to be heard and considered by said Common Council, and thereupon, upon motion duly made, seconded, passed, carried and adopted, it was resolved by the said Common Council that the public interest and convenience would be subserved by the granting of the said franchise to the said applicant without advertising the sale of said franchise, as in said Ordinance No. 8690 provided, and without competitive bids, upon the terms and conditions as provided in said Ordinance No. 8690; and it was then and thereupon further resolved that the said Common Council fix the sum of One Thousand Dollars (\$1,000.00) to be paid by said applicant as consideration for the sale of said franchise, and that ten per cent. (10%) of said amount was to be deposited by said applicant with the City Clerk of the City of San Diego within twenty-four (24) hours after the adoption of said resolution, the remaining ninety per cent. (90%) to be paid by said applicant within ten (10) days after the ordinance granting such franchise becomes effective. And it was further resolved that there should be published in the official newspaper of the City of San Diego a notice that the said Common Council proposed to grant the application of said La Jolla Stage Line, without competitive bids, as applied for; or as changed by said Common Council, and that said notice should state that said Common Council proposes to accept the bid of the said applicant for said franchise, and that any person desiring to protest the granting of said franchise should file written objections thereto with the City Clerk on or before a date to be fixed in said notice, which should be not less than ten (10) days from the date of the first publication of said notice, and it was further resolved that said notice should be published in said newspaper at least once a day for five (5) consecutive days, or as often during said period as said newspaper was published.

Sec. 2. The said Common Council does further declare that pursuant to said resolution there was advertised in The Evening Tribune, a daily newspaper published in the said City, which said newspaper is the official newspaper of the said city, that the said Common Council proposed to grant the application of said La Jolla Stage Line for a franchise without competitive bids, as applied for, or as changed by said Common Council; and further that the said Common Council proposed to accept the bid of the said applicant for such franchise and that any person desiring to protest the granting of said franchise should file written objections thereto with the City Clerk on or before the 14th day of August, 1922, which said date was fixed in said notice and was not less than ten (10) days from the date of the first publication of said notice, and the said notice was so published in the said official newspaper of the said city once a day for five (5) consecutive days.

Sec. 3. That the Common Council does further declare that upon the day fixed by said notice the Common Council heard the objections made pursuant to said notice, and then and there, by resolution, overruled and denied said objections.

Sec. 4. Said Common Council does further declare that ten per cent. (10%) of the sum fixed by said resolution of said Common Council, to-wit: the sum of One Thousand Dollars (\$1,000.00) to be paid by said applicant as consideration for the sale of said franchise, was by said applicant deposited with the City Clerk of the said city within twenty-four (24) hours after the said Common Council had decided to accept the application of the said applicant without competitive bidding.

Sec. 5. That there is hereby granted to the La Jolla Stage Line, a co-partnership consisting of Myrtle R. Patterson, nee Giddings, and Wilson L. R. Patterson, its or their successors or assigns, a franchise and privilege to maintain and operate over and upon the public streets of the City of San Diego auto busses or stages, or self-propelled vehicles, carrying passengers for hire.

Sec. 6. That said franchise and privilege shall continue for a period of ten (10) years from and after the date this ordinance becomes effective.

Sec. 7. That said franchise and privilege is granted upon the following terms, and subject to the following conditions, to-wit:

(1) That the said Common Council may by resolution from time to time fix the route, or routes, to be followed in transporting passengers, and the termini of said route or routes.

(2) That no fare to be charged for the transporting of passengers between termini or intermediate points on said route or routes shall be charged or collected except such fare as shall first have been authorized by a resolution of the Common Council.

(3) That the schedule to be observed showing the time of departure of auto busses or stages from the termini according to which it is proposed to operate such auto bus or stage shall be fixed from time to time by the Common Council by resolution.

(4) That the transfer points, if transfers are used, and the seating capacity of the motor vehicles used under this franchise may be fixed from time to time by resolution by the Common Council.

(5) That the said La Jolla Stage Line shall give and keep in full force and effect at all times during the life of said franchise a policy of insurance in a company authorized to do business in the State of California, insuring the owner or lessee of said auto bus or stage against loss by reason of damage that may result to any person or persons or property from the operation of said auto bus or stage, said policy of insurance to be in limits of Five Thousand Dollars (\$5000.00) for any one person injured or killed, and subject to such limit for each person; a total liability of Ten Thousand Dollars (\$10,000.00) in case of any one accident resulting in bodily injury or death to more than one person. Said policy of insurance must also provide insurance to the extent of One Thousand Dollars (\$1,000.00) for the injury to or destruction of any property of third parties. Said policy shall guarantee payment of any final judgment rendered against the owner or lessee of said auto bus or stage within the limits herein provided, irrespective of the financial responsibility of any act or omission of said auto bus owner or lessee. If, during the life of the franchise hereinabove granted, said policy of insurance shall be cancelled by the issuing company, or the authority of said issuing company to do business in the State of California be revoked, the parties to whom this franchise is granted shall replace said policy with another policy satisfactory to the Common Council, and in default thereof said franchise shall be forfeited.

(6) That the vehicles used under the terms of this franchise shall be at all times adequate and safe for the purpose intended, and sufficiently equipped with skid chains and

other safety devices; that the operator or operators employed by the grantees of this franchise shall be at all times competent and have had sufficient experience in driving automobiles in the City of San Diego, and that the driver or drivers shall be at all times physically qualified to drive motor vehicles safely.

(7) That the grantees of this franchise shall permit and allow firemen and policemen in the employ of the City of San Diego, while engaged in the actual discharge of their duties, to ride in any vacant seat on the auto bus or stage owned or operated by such grantees under the terms of this franchise, without paying any sum or sums of money for fare, or otherwise, for riding on said auto bus or stage.

(8) Each and every bus operated under the terms and provisions of this franchise shall be so run and operated as to maintain regular daily schedules, which to the Common Council may seem reasonable and proper, and all such schedules, before becoming operative, shall be approved by the Common Council by resolution.

(9) That the grantees of this franchise shall, during the life of this franchise, pay to the City of San Diego two per cent. (2%) of the gross annual receipts of the person, partnership or corporation arising from the use, operation or possession of this franchise, as a rental for the use of said streets. On or before the last Monday in November of each year the grantees of this franchise shall cause to be filed with the City Auditor a sworn statement of the gross receipts of said company for the preceding year, or the portion of said year during which this franchise is in operation, and the said grantees shall pay the said two per cent. (2%) into the City Treasury during the month of January of each year.

(10) The Common Council, during the life of this franchise, shall have the power to investigate the books of the grantees of this franchise, and to examine under oath the officers, agents or employees of the said grantees concerning the annual statement, as hereinbefore provided.

(11) The Police Department of the said City of San Diego is hereby empowered, in case of fire, accident, parades, obstructions on, breaks in, or repairs of streets, or any emergency, or to prevent accidents or congestion, or in case of public necessity, to temporarily divert and reroute the auto busses operated under the terms of this Ordinance, upon such Streets, as, in the judgment of said department, is necessary.

Sec. 8. It shall be unlawful for any person to operate an auto bus or stage under the terms of this franchise, unless he shall have been regularly licensed as a chauffeur under the Motor Vehicle Act of the State of California.

Sec. 9. It shall be unlawful for the grantees of this franchise to

(a) Drive or operate, or cause to be driven or operated, any auto bus or stage while there is attached thereto any trailer or any other passenger carrying vehicle;

(b) Permit passengers to ride on the running board or fenders of any auto bus or stage;

(c) Refuse to carry any person offering himself or herself at any regular stopping point to be carried, and tendering the fare for the same to any regular stopping place in said route, or between the termini thereof, unless at the time such offer is made the seats of said auto bus or stage are fully occupied; provided that the grantees of this franchise may refuse transportation to any person who, at the time the demand is made to be carried, is in an intoxicated condition, or who at such time may be conducting himself in a boisterous manner, or who may at such time be using profane language.

Sec. 10. The failure on the part of the grantees of this franchise to operate auto bus or stage service in accordance with the terms and conditions of this Ordinance for a period of thirty (30) days shall cause a forfeiture of this franchise, and the said Common Council is hereby empowered to declare such forfeiture upon receipt of satisfactory evidence that said grantees have failed to operate under the terms of said franchise for said period of time.

Sec. 11. The franchise herein granted shall be subject at all times to the right of a majority of the electors of said City of San Diego, voting at any election at any time hereafter, to repeal, change or modify the said grant.

Sec. 12. Whenever it shall appear to the satisfaction of the Common Council that the public interest, convenience and safety of the City of San Diego demand the repeal, change or modification of this franchise, said Common Council is hereby authorized to repeal, amend or modify this Ordinance and the franchise granted herein and hereby.

Sec. 13. The franchise and privilege herein granted shall be exclusive in the operation and maintenance of auto busses or stages or self-propelled motor vehicles from the business district of San Diego to the business district of La Jolla between the fixed termini and over the route or routes fixed by resolution of the Common Council in accordance with the terms of this Ordinance.

Sec. 14. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

AN ORDINANCE AMENDING ORDINANCE NO. 7983 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, ENTITLED, "AN ORDINANCE PROVIDING FOR LICENSING AND REGULATING THE CARRYING ON OF CERTAIN PROFESSIONS, BUSINESSES, TRADES, CALLINGS AND OCCUPATIONS IN THE CITY OF SAN DIEGO, CALIFORNIA," APPROVED APRIL 22, 1920, BY ADDING THERETO A NEW SECTION TO BE KNOWN AS SECTION 125-1/2.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That Ordinance No. 7983 of the ordinances of The City of San Diego, entitled, "An Ordinance providing for licensing and regulating the carrying on of certain professions, businesses, trades, callings and occupations, in The City of San Diego, California," approved April 22, 1920, be, and the same is hereby amended by adding a new section thereto, to be known as Section 125-1/2, which said section shall read as follows:

"Section 125-1/2. For every person, firm or corporation conducting, managing or carrying on the business of selling oil leases or any interest therein, or any option to purchase such leases or interests, oil royalties or fractional interests in any oil royalties or options to purchase such royalties or such fractional interests, and, or, any lot or real estate or fractional interests in any such lot or real estate, or options to purchase such lot or real estate or fractional interests therein, which said lot or real estate is represented or alleged to be oil bearing real estate, who solicits business upon any of the public streets of The City of San Diego, or who solicits business from house to house within The City of San Diego, and, or, who provides, in conducting such business free excursions for the transportation of persons to any place within or without The City of San Diego to exhibit such lot or real estate, and who, in the conduct of such business solicits persons to be transported or carried by means of any vehicle or free transportation to view or inspect any lot, real estate or premises, which lot, real estate or premises, or any interest therein, is offered for sale or lease by any such person, firm or corporation, fifty dollars (\$50.00) per day."

Section 2. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the emergency in this case are as follows: The crowded condition of the streets of The City of San Diego caused by oil stock salesmen, and the use of said streets for the assembly of prospective customers for free trips to proposed oil wells, has caused great congestion in the congested district of San Diego, and is dangerous to the public peace, safety and welfare.

AN ORDINANCE AUTHORIZING THE CITY TREASURER OF THE CITY OF SAN DIEGO TO INVEST, ON BEHALF OF THE CITY OF SAN DIEGO, SURPLUS MONEYS IN THE TREASURY, FOR THE PURCHASE OF SAN DIEGO PIER BONDS OF THE CITY OF SAN DIEGO, IN THE AMOUNT OF \$20,000.00.

FOR THAT WHEREAS, it appears to the Common Council of The City of San Diego that there is now in the City Treasury of said City surplus moneys not required for the immediate necessities of said City in an amount to exceed twenty thousand dollars (\$20,000.00); and

WHEREAS, it further appears to said Common Council that said City has now in its possession certain unsold San Diego Pier Bonds of The City of San Diego, drawing interest at the rate of five per cent. in the amount of two hundred thirty-one thousand five hundred dollars (\$231,500.00); and

WHEREAS, it is deemed wise and expedient by this Common Council to invest a portion of the surplus moneys in the City Treasury in some of said bonds, in order that the City may obtain the interest on said bonds; and

WHEREAS, it further appears to said Common Council that said bonds have been advertised for sale, and no bids of more than par and accrued interest have been received; and

WHEREAS, under the laws of the State of California said bonds must be sold for at least par and accrued interest; and

WHEREAS, there is a present need for the moneys for which said bonds were voted, NOW, THEREFORE

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That J. T. Millan, City Treasurer, be, and he is hereby authorized and directed to purchase, on behalf of The City of San Diego, out of the surplus moneys in the City Treasury not required for the immediate necessities of said City, San Diego Pier Bonds of The City of San Diego, in the amount of twenty thousand dollars (\$20,000.00), face value thereof; and upon the delivery to him of said bonds by the officer in whose custody they

are, he is hereby authorized to pay therefor the sum of twenty thousand dollars (\$20,000.00), with accrued interest to the date of delivery.

Section 2. By reason of the immediate necessity for the moneys to accomplish the purpose for which said improvement bonds were voted, and in order that the City may obtain the interest on said money for the greatest possible period of time, this ordinance is declared to be one of urgency, and one for the immediate preservation of the public peace, health and safety, and shall become operative and take effect from and after its passage and approval.

GRANTING TO THE SUCCESSFUL BIDDER THEREFOR A FRANCHISE TO CONSTRUCT, MAINTAIN AND OPERATE FOR A PERIOD ENDING THE 1ST DAY OF SEPTEMBER, 1952, A STREET RAILWAY UPON 16th STREET BETWEEN MARKET STREET AND BROADWAY, IN THE CITY OF SAN DIEGO, CALIFORNIA.

BE IT ORDAINED as follows:

Section 1. That the City of San Diego hereby grants to the successful bidder therefor and to his or its assigns or successors the franchise and authority to construct, maintain and operate for a period ending on the first day of September, 1952, a street railway, including side-tracks, crossovers, spur-tracks, turnouts, switches and curves, and to erect and maintain either a single or double pole line for the support of overhead trolley support arms or span wires, and to suspend therefrom electric wires to be used in the operation of said railway, upon and along 16th Street from the center of the intersection of said 16th Street with Market Street, thence northerly along said 16th Street to the center of the intersection of said 16th street with Broadway, in said city.

Section 2. That the Common Council of the City of San Diego by and through the City Clerk of said City for and as the act of said Common Council, be and is hereby directed and authorized to advertise proposals for the sale of, and invite bids for the purchase of the grant of a franchise and privilege to construct, maintain and operate a street railway upon 16th Street between Market Street and Broadway in the City of San Diego, by publication in the official newspaper of said City.

Said advertisements shall state such offer of sale and that bids will be received for said franchise, and that said franchise will be struck off, sold and awarded to the highest cash bidder therefor; said advertisement shall be published in such manner, and for such period of time, and shall be in such form, and contain such matters, and conditions of bidding, as the charter of said City now in effect prescribes in Section 9 of Chapter II of Article II thereof; and said Common Council is hereby directed and authorized to receive bids for said franchise as so advertised and to select and declare the highest bidder for said franchise, as prescribed in said section, chapter and article of said Charter, to whom this franchise shall be struck off, sold and awarded.

The successful bidder for this franchise or privilege struck off, sold and awarded shall file a bond running to name of said City, with at least two good and sufficient sureties to be approved by said Common Council in the penal sum of \$500, in manner and conditions as prescribed in said Section 9, Chapter II of Article II of said charter of the City of San Diego; upon the filing and approval of such bonds, the said franchise shall be deemed granted by the people of said City by this ordinance to the person, firm or corporation to whom it has been struck off, sold, or awarded, and in case that said bond shall not be so filed, the award of such franchise shall be set aside, and any money paid therefor shall be forfeited, and said franchise shall be readvertised and again offered for sale in the same manner, and under the same restrictions, as hereinbefore provided.

Section 3. That this franchise or privilege shall be, and is granted, sold and awarded to the successful bidder therefor upon the following conditions and agreements:

(1) The grantee of said franchise shall file with the City Clerk of said City during the first 15 days of February of each year after the taking effect of this ordinance, a statement verified by the oath of said grantee showing the total gross receipts arising from the use, operation or possession of said franchise for the preceding calendar year, and shall thereupon pay to said City Clerk, for said City the aggregate sum of 2 per cent. of said receipts as shown in said statement. Any refusal of said grantee, successors or assigns, to file such verified statement and to pay said percentage within the time above provided shall constitute ground for forfeiture of this franchise. The Mayor and Common Council of said City may after said statement is made inspect and examine the books of the grantee of this franchise and may cause the same to be examined by an expert accountant and may examine under oath any and all officers or agents in respect thereto.

(2) Motive Power: That the cars upon said railway shall be propelled by electricity used through the overhead system, or in case of accidents or unavoidable delay in procuring equipment, by any other lawful power.

(3) Condition of Streets: The grantee of the franchise, successors or assigns, shall pave or macadamize the entire length of the street used by tracks, between the rails and for two feet on each side thereof and between the tracks if there be more than one whenever such street is ordered to be paved or macadamized by said Common Council, and shall keep the same constantly in repair, flush with the street, and with good crossings.

(4) Track Specifications: That the track shall be constructed at the standard gauge of four feet, eight and one-half inches within the rails, and shall have a space between it and side-tracks, turn-outs and switches of not less than five feet, three inches.

(5) Single or Double Track: That the grantee shall have the right to lay and maintain either single or double tracks as the conditions of business may warrant, but the laying of a single track shall be deemed a compliance with the conditions of this franchise and shall in no wise impair the right of the grantee, successors or assigns, to subsequently lay a second track paralleling the first track.

(6) Rail Specifications: That good substantial steel rails shall be used in the construction of said track.

(7) City's Right to Access to Streets: That the right to grade, sewer, pave, macadamize, or otherwise improve or alter or repair the said streets or change the grade thereof, shall be reserved to the said City, such work to be done so as to obstruct the said railway as little as possible; the grantee or assigns shall shift and reshift the rails so as to avoid the obstruction created thereby; the grantee and its assigns shall waive any and all claims for damages against said City caused by reason of such grading, paving, or macadamizing, or otherwise improving, altering or repairing said streets.

(8) Tracks on Graded Streets: That the laying of said track and all side tracks, crossovers, spur-tracks, turn-outs, switches or curves shall conform in all cases with the grade of said streets when the same have been graded, and in all other cases to be as near to the natural grade as practicable, and when, at any time, any part of this route shall be graded, or the grade thereof altered or changed by said Common Council, the bed of the road and the tracks thereon shall be made to conform therewith by said grantee or assigns. That the overhead system may be of single or double pole construction.

(9) Location of Tracks on Streets: That the tracks shall be so constructed and laid that each of them shall be when practicable of equal distance from curb line to said streets or as nearly so as the condition or width of the street will permit.

(10) Location of Switches: That no switches shall be constructed or maintained within fifty feet of any cross street, and the location of such switches and all turnouts shall be changed at the expense of the grantee or assigns whenever so ordered by said Common Council.

(11) City Engineer's Services: That the City Engineer shall, under the direction of

the said Common Council, give the established grade of the streets along the line of construction of said street railway and set stakes indicating the said grade. He shall see that the said railway is constructed in conformity with the terms and requirements of the franchise, and for his services as herein required he shall receive such fees as are provided therefor, and the same shall be paid by the grantee, or assigns.

(12) Time Limit for Construction and completion: Work to construct the railway shall be commenced in good faith, within not more than four months from the granting of this franchise, and if not so commenced within said time, said franchise shall be declared forfeited; and the said Railway shall be completed within not more than 3 years thereafter, and if not so completed within said time, said franchise so granted shall be forfeited, provided, that, for good cause shown, the Common Council may by resolution extend the time for completion thereof not exceeding 3 months.

(13) Cessation of Operation: In case the grantee of the franchise, successors or assigns, shall cease to operate said railway for a period of 90 days consecutively after said railway shall have been fully completed and constructed, except in cases of unavoidable accidents or other matters not within the control of the grantee, successors or assigns, this franchise shall be and is hereby declared to be forfeited, and the grantee, successors or assigns, shall thereafter remove the tracks of said railway and put the streets in good condition.

(14) Right to Repeal: The grant of this franchise shall be subject to the right of the majority of the electors of said City, voting at any election, at any time thereafter to repeal, change or modify the said grant, and such right is hereby reserved.

Section 4. This ordinance shall be in force and effect from and after 30 days after its passage by the Common Council and approval of the Mayor of said City; or, this ordinance shall be in force and effect forthwith upon its approval and adoption by vote of the electors of said City at the special election required by law to be called by the Common Council, at which election said ordinance shall have been submitted to a vote of the people.

Section 5. That the City Clerk of the City of San Diego be, and he is hereby authorized and directed immediately after the passage and approval, or adoption, of this ordinance, to cause the same to be published at least once in the City official newspaper of said City.

I HEREBY CERTIFY, that the above and foregoing is a full, true and correct copy of Ordinance No. 8827 of the ordinances of the City of San Diego, California, as adopted and ratified by the people of said City of San Diego, at the Special Municipal Election held in said City on the 10th day of October, 1922; and,

I Further Certify, that the returns of said election were duly canvassed and declared by the Common Council of said City, by Resolution No. 28314, of the resolutions of the City of San Diego, California, adopted on the 16th day of October, 1922.

ORDINANCE NO. 8848.

AN ORDINANCE AMENDING ORDINANCE NO. 8628 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, ENTITLED: "AN ORDINANCE RELATING TO AND REGULATING SANITARY PLUMBING AND DRAINAGE, AND PRESCRIBING THE CONDITIONS UNDER WHICH PLUMBING MAY BE CARRIED ON IN THE CITY OF SAN DIEGO, CALIFORNIA, "APPROVED MARCH 13, 1922, BY AMENDING SECTIONS 32, 53, 66, 92, 128, 137 152, 170 and 233 THEREOF, AND BY REPEALING SECTION 105 THEREOF.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That Section 32 of Ordinance No. 8628 of the ordinances of The City of San Diego, entitled: "An ordinance relating to and regulating sanitary plumbing and drainage, and prescribing the conditions under which plumbing may be carried on in the City of San Diego, California," approved March 13, 1922, be and the same is hereby amended to read as follows:

Section 32. Before a permit shall be issued, fees in accordance with the table below shall be paid:  
For each permit,

(add) for each connection ready to receive a future fixture, 25¢

(add) for each connection to any soil or waste line other than plumbing fixtures, 25¢  
Soil line Extensions only, (permit charge) 50¢

Plumbing permits are not transferable.

No fixture charge is made for indirect plumbing connections.

Minimum charge for a permit shall be 50¢

If plumbing work under a permit is not commenced within six months after the issuance of such permit, or the work discontinued for a period of one year from the date of the issuance thereof, the permit shall thereupon become void, and no work shall be done on the premises until a new permit is issued, and all fixture fees paid.

Section 2. That Section 53 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 53. An "Inside Lot" shall be known as a parcel of ground with a frontage of not more than fifty (50) feet, abutting on a street, alley, public or private thoroughfare, the width of which shall be not greater than its frontage, nor more than fifty (50) feet.

Section 3. That Section 66 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 66. A small fixture is the term applied to any plumbing fixture that is required to have a waste outlet of not less than one and one-half inch inside diameter, provided that a bath tub with a basin or lavatory attached to and supported by said bath tub and the waste from said lavatory shall pass in a direct vertical line into and through the top part of the bath tub overflow waste, when so constructed this will be deemed a single fixture and requires but one trap so placed as to serve the bath tub in the usual manner and that the seal of said trap shall not be more than two feet distant from the wasteroutlet of the lavatory bowl. It is the intent and meaning of this section to have the term "small fixture" apply only to the combination bath and lavatory known as "The Boudoir" Fixture.

Section 4. That Section 92 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 92. Where stall urinals are placed in any building or structure, the side walls, floors and partitions shall be covered with either glass, marble, enameled cast iron, vitreous tile, or vitreous china slabs. In no case will hydraulic cement or wood-stone be permitted to be used in lieu of the above. When slate slabs are used for the floors, sidewalls, or partitions, they shall be frequently oiled with pure linseed oil. All joints shall be imbedded with approved cement. Oiled cements may be used excepting for marble.

Section 5. That Section 128 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 128. When there is a sand-trap to be constructed in the floor of any garage or other building, or part thereof, it shall be not less than twelve (12) inches measuring from the bottom side of the outlet pipe to the finished bottom of trap, and not less than eighteen (18) inches square, and shall be constructed of cement or other approved material. The waste pipe leading from public garages shall be not less than four inches inside diameter, and not less than two inches inside diameter in private garages, and shall be of cast iron soil pipe. The vent for the same shall not be more than ten (10) feet from the seal of the trap.

Where sand traps are permitted to be used the seal shall be made with a short quarter bend corked immediately into a Y fitting, the saide outlet of the Y fitting shall serve as a cleanout; the edge of the Y hub shall show above the floor line sufficiently to indicate its location.

Section 6. That Section 137 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 137. Floor sinks that are required to receive the waste waters from soda fountains, saloon bar fixtures, or other indirect connected plumbing fixtures shall be provided with a waste outlet of not less than two inches, inside diameter, taken from the bottom of the said fixture. The said waste outlet shall be provided with a stand pipe and overflow of the same inside diameter, extending to within one (1) inch from the top of the floor sink, and sufficient holes drilled in same to allow free passage of waste waters to pass through. In lieu of the stand pipe a brass or galvanized iron basket of one-fourth (1/4) inch mesh may be used to prevent any foreign matter entering the sewer. Converting a receptacle of such type into a fixture trap by taking the waste line from the side of such receptacle, thereby retaining a large body of water, will not be permitted. Where, on account of architectural conditions, it is advisable to vent a floor sink trap at a point more distant than two (2) feet from the seal of the trap (as prescribed elsewhere), it may be done upon approval of the plumbing inspector. Each indirect fixture must be provided with a trap of the same size as prescribed for waste pipe, except where the developed waste pipe length is less than three (3) feet, and in that case no trap need be used.

Section 7. That Section 152 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 152. Every fixture trap shall be protected from siphonage, and air circulation assured by means of a vent pipe, of caliber, weight and material as specified in this ordinance, except as provided for indirect fixtures.

Section 8. That Section 170 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 170. Each and every plumbing fixture shall be separately trapped, and the water seal placed as close to the fixture as possible, of the size prescribed by this ordinance, except as provided elsewhere in this ordinance for indirect fixtures.

Section 9. That Section 233 of said Ordinance No. 8628, be and the same is hereby amended to read as follows:

Section 233. All buildings or structures shall be separately and independently connected with the public sewer. If there is no public sewer, then they shall connect to an approved cess pool or septic tank; provided, however, that the buildings or structures located on one lot, as defined in Sections 50, 51 and 53 of this ordinance, may connect to one common soil line, provided that the lot on which the buildings are to be constructed is of one ownership. The size of the main soil and branch lines shall be determined by the number of plumbing fixtures to be connected thereto, as stated in Section 217 of this ordinance.

If the foundation of one building extends beyond the lot line limits of a lot, as defined in Sections 50, 51 and 53, and over onto the adjacent lot or lots, then all buildings erected in the rear or over-lapping the said building on the same lot, of the same ownership, may connect to the soil line of the building in front, if the soil line is of a size and grade required by this ordinance. Provided, however, that all buildings that constitute a Bungalow Court may connect to one common soil line of the size required by this ordinance.

Section 10. That Section 105 of said Ordinance No. 8628, be and the same is hereby repealed.

Section 11. That this ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this

# ORDINANCE No. 8852

AN ORDINANCE REGULATING THE CONSTRUCTION, ERECTION, ALTERATION, REPAIR, DEMOLITION, MOVING AND THE USE OF BUILDINGS, STRUCTURES AND PARTS THEREOF; PROVIDING FOR FIRE PROTECTION; ESTABLISHING FIRE LIMITS; REGULATING AREAWAYS, SIGNS, BILLBOARDS, MATERIALS, AND THE USE OF STREETS IN CONNECTION WITH CONSTRUCTION, IN THE CITY OF SAN DIEGO, CALIFORNIA.

Be it Ordained by the Common Council of the City of San Diego, as follows:

## PART ONE

### ADMINISTRATIVE FIRE LIMITS, PERMITS, DEFINITIONS, HOUSE MOVING, ETC.

#### SECTION 1. BUILDING ORDINANCE

The following provisions constitute The Building Ordinance of the City of San Diego, California, and the same shall be known and cited as the "Building Ordinance."

#### SECTION 2. BUILDING INSPECTOR AND ASSISTANTS

There shall be a Building Inspector and such Assistant Inspectors as the Manager of Operation may deem necessary. The Building Inspector and his assistants shall be appointed by the Manager of Operations, subject to Civil Service Examination and regulations.

#### SECTION 3. ELIGIBILITY OF BUILDING INSPECTOR

Building Inspector shall be an experienced architect or structural engineer and shall have been engaged as such for a period of not less than ten years prior to appointment, and during his term of office as Building Inspector he shall not be engaged in any other business or profession.

The Building Inspector shall be versed in the strength and mechanics of materials; shall have a practical knowledge of all classes of building construction, and a general knowledge of the State Housing Laws and the Local Building Ordinance.

#### SECTION 4. DUTIES OF BUILDING INSPECTOR

It shall be the duty of the Building Inspector to make such inspections as may be necessary to see that the provisions of the Building Ordinance are complied with. The Building Inspector is hereby given authority to enter, at any time, any building, structure, or premises in the performance of his duties, excepting that no occupied private residence shall be entered be-

tween the hours of 6 P. M. and 7 A. M. without the consent of the occupants of such residence.

The Building Inspector is hereby charged with the enforcement of the provisions of the Building Ordinance, and he is given authority to order and compel the suspension of any or all work upon any building or structure on which any work is being done in violation of any of the provisions of the Building Ordinance. Further, the Building Inspector is given the authority to delegate any of his powers to his assistants.

The Building Inspector is hereby named as the proper official to enforce the State Laws regulating the construction, alteration and fire protection of Tenement houses, Lodging houses, Hotels, and Dwellings as said State Laws now exist or may hereafter be amended, excepting those provisions in the said State Laws which come under the jurisdiction of the Department of Health. The Building Inspector may rule as to the meaning of the various provisions of the "Building Ordinance."

## SECTION 5.

### DANGEROUS STRUCTURES

Whenever the Building Inspector shall find that any structure or part thereof is in a condition dangerous to persons or property by reason of any defective construction or unsafe condition rendering the structure or building unsafe for the purpose for which it is used, or that does not comply with the regulations enacted for the protection of life or property in case of fire, he shall notify the owner, agent or person in charge of such structure, or post a notice on the structure, calling attention to the defects, violations or dangerous condition of the structure, or parts thereof, and within 48 hours after such notice has been served or posted, work must be begun and diligently prosecuted, until the structure or parts thereof have been made safe, and in compliance with the Building Ordinance requirements. Should such owner, agent or person in charge neglect or refuse to place such structure or part thereof in a safe condition or to adopt such emergency measures as shall have been required by the Building Inspector, he shall be deemed guilty of a misdemeanor, and will be summarily dealt with as provided by law; further, it shall be unlawful for any person, firm or corporation to use or occupy such structure, building or part thereof, after the time limit set forth in such notice, unless the defects and violations have been remedied.

When the danger is so great that the public safety requires immediate action, the Building Inspector is hereby given authority to enter upon the premises with such assistants as may be necessary, and cause the structure or building to be made secure, or taken down; when razing appears to be the only safe solution. In extreme cases, when necessary, it shall be the duty of the Police and Fire Department to assist and protect the public when called upon by the Building Inspector. The cost of razing or securing the structure as mentioned in this paragraph, shall be paid by the owner of said premises.

It shall be unlawful for any person to remove or deface any notice or condemnation notice posted by the Building Inspector without the latter's approval.

## SECTION 6.

### VIOLATION TO CONTINUE CONSTRUCTION OR USE

It shall be unlawful and a violation of this ordinance for any person to continue the construction, alteration or use of any building, structure or part thereof, after the Building Inspector has given specific verbal notice, or has directed in writing, that such construction, alteration or use be suspended. The posting of a written or printed notice on the building, structure or premises, shall be sufficient notification.

## SECTION 7.

### VIOLATIONS AND PENALTIES

When work has been started on any building, structure or part thereof, or when any such structure is being altered, wrecked or moved before a permit has been obtained, and for which a permit is required, double the prescribed permit fee shall be charged for the first offense. A repetition will be sufficient cause for arrest. Work nearing completion or completed without a permit, for which a permit was required, shall be deemed a direct violation of this ordinance.

Any architect, engineer, owner, contractor, builder, mechanic, or any other person, firm or corporation who shall violate any of the provisions of this ordinance, or fail to comply with any order or regulation made thereunder, or who shall build in violation of any detailed statement, specification or plans submitted and approved thereunder, or on any certificate or permit issued thereunder, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punishable by a fine of not less than ten dollars and not more than five hundred dollars, or by imprisonment in jail for not less than ten days and not more than six months, or by both such fine and imprisonment.

Every such person, firm or corporation shall be deemed guilty of a separate offense for each and every day the provisions of this ordinance are violated, and for every day during which any other violation of this ordinance or its provisions continues, such person, firm or corporation shall be punishable therefor as herein provided.

## SECTION 8.

### DISTRICTS AND FIRE LIMITS

For the purpose of this ordinance the City of San Diego shall be divided into three Districts, known as:

- No. 1. THE INNER FIRE LIMITS.
- No. 2. LA JOLLA INNER FIRE LIMITS.
- No. 3. THE OUTER FIRE LIMITS.

## SECTION 9.

### THE INNER FIRE LIMITS

There is hereby established in the City of San Diego, California, "The Inner Fire Limits," a district comprising all that part of said city included within the following boundaries, to-wit:

## SECTION 10.

### LA JOLLA INNER FIRE LIMITS

The La Jolla Inner Fire Limits shall comprise all that territory included within the following boundaries:

Beginning at the southeasterly corner of Lot 21, Block 59, La Jolla Park, thence northwesterly along the northeasterly line of said Lot 21, to the northeasterly corner thereof; thence southwesterly along the northwesterly line of Lots 21, 20, 19, 18, 17, 16, 15, 14 and 13, of Block 59, La Jolla Park, to the easterly line of Girard Avenue; thence southwesterly to the intersection of the westerly line of Girard Avenue with a line drawn parallel to and 100 feet southeasterly from the southeasterly line of Coast Boulevard South; thence southwesterly on a line parallel to and distant 100 feet southeasterly from the southeasterly line of Coast Boulevard South to the northeasterly line of Ocean Street; thence southwesterly to the northeasterly corner of Lot 1, The Terrace Subdivision; thence southwesterly along the northwesterly line of Lots 1, 2, 3, 4, 5, 6, 7 and 7A, the Terrace Subdivision, to the northeasterly line of Jenner Street; thence southwesterly to the most northerly corner of Lot 31, Block 55, La Jolla Park; thence southwesterly along the northwesterly line of Lots 31, 30, 29, 28 and 27, of Block 55, La Jolla Park, to the northwesterly corner of Lot 27, Block 55, La Jolla Park; thence southeasterly along the southwesterly line of said Lot 27 to the northwesterly line of Prospect Street; thence easterly to the southwesterly corner of Lot 2, Block 38, La Jolla Park; thence northeasterly to the southeasterly corner of said Lot 2, Block 38, La Jolla Park; thence southeasterly to the southeasterly corner of Lot 7, Block 30, La Jolla Park; thence northeasterly to the southeasterly corner of Lot 7, Block 29, La Jolla Park; thence northwesterly to the southeasterly corner of Lot 3, Block 39, La Jolla Park; thence northeasterly to the southwesterly

corner of Lot 37, Block 39, La Jolla Park; thence northeasterly to the southeasterly corner of said Lot 37, Block 39, La Jolla Park; thence northwesterly to the northeasterly corner of lot 38, Block 39, La Jolla Park; thence northwesterly to the southwesterly corner of Lot 17, Block 53, La Jolla Park; thence northwesterly to the southwesterly corner of Lot 5, Block 53, La Jolla Park; thence northeasterly to the southwesterly corner of Lot 30, Block 53, La Jolla Park; thence northwesterly to the southwesterly corner of Lot 36, Block 53, La Jolla Park; thence northeasterly to the southeasterly corner of said Lot 36, Block 53, La Jolla Park; thence northwesterly to the northeasterly corner of said Lot 36, Block 53, La Jolla Park; thence northerly to the point or place of beginning.

## SECTION 11.

### THE OUTER FIRE LIMITS

The "Outer Fire Limits" comprises all territory including streets and alleys in Greater San Diego, outside the Inner Fire Limits.

Throughout this ordinance, the term "Inner Fire Limits," refers to both Inner Fire Limits No. 1 and No. 2. (See Section No. 8.)

## SECTION 12.

### USE OF STREETS, INNER FIRE LIMITS

Within the Inner Fire Limits, no dumping of material of any description will be allowed on the streets or sidewalks except as hereinafter provided.

During the construction, repair or remodeling of a structure, material may be dumped or piled in the street not to exceed six feet from the curb, provided it is not allowed to remain there a longer period than three hours. A clear passageway, at least six feet wide, shall be maintained on the walk at all times during the day between the hours of 7 A. M. and 6 P. M.

When it is necessary to use the streets continuously a permit for such use of street adjacent to curb shall be obtained from the Building Inspector upon the payment of a fee of \$2.00. Under no condition, however, shall any street be used for a longer period than absolutely necessary. When said permit has been obtained, the street shall not be used for more than one-third of its width. On streets where there are car tracks, not more than one-half of the distance between the nearest rail and the curb shall be used.

## SECTION 13.

### USE OF STREETS, OUTER FIRE LIMITS

In the Outer Fire Limits, no dumping of materials of any description will be allowed on the streets except as hereinafter provided:

During the construction, repairing or remodeling of a structure, the street may be used for a distance of 1-3 the width of such street, except that where there is a car track, only  $\frac{1}{2}$  of the distance between the nearest track and the curb shall be used or blocked.

A clear passageway at least 4 feet wide shall be maintained on the walk at all times, except that when the work is of such magnitude that it is absolutely necessary

to block or use the walk, a temporary walk at least 4 feet wide must be kept clear around through the street not over 4 feet from the curb, such walk to be kept free of debris and material and afford a dry, safe passage at all times.

#### SECTION 14.

##### ALTERATIONS, REMODELING, INNER FIRE LIMITS

All enlargements, additions and remodelling of buildings and structures within the Inner Fire Limits, shall meet the same requirements as provided for new buildings built within the Inner Fire Limits. This paragraph shall not be construed to prohibit ordinary repairs, the replacing of any defective structural member, the remodeling of store fronts which improve the conditions or lessen the fire hazard, or similar approved improvements.

The placing of boards on, against or between buildings, fences and other structures, thereby forming a room or shelter, is prohibited. No billboard, sign or fence shall be used as an enclosure or part of an enclosure for any room or building. The gradual rebuilding of any class D building or structure bit by bit at varying intervals, under the guise of alterations or repairs, is hereby prohibited.

No new stud or frame partition between two stores or other public rooms, will be permitted unless same are made fire resisting, with metal lath and plaster on both sides. This applies to both new and existing structures.

All balconies and mezzanine floors erected or placed in any structure within the Inner Fire Limits, shall be class A or class B construction, excepting that when such balcony or mezzanine floor is less in area than 40% of the floor area of the room in which it is located, the construction may be class B or the following heavy floor and timber construction:—no joist, beam or girder shall be less than 4 inches in its least dimension; no supporting post shall be less than 4 inches by 4 inches; the flooring shall be not less than 2 inch tongue and groove flooring or a double floor may be used when a layer of waterproof building paper is placed between; 2 inch dimension material is prohibited, except for flooring, in which case it must be tongue and groove or splined.

#### SECTION 15.

##### BUILDING MATERIAL AND DEBRIS

It shall be unlawful to place or allow to be placed, building material, excavated material and debris upon any alley, street or other public place, except in the space allotted for such materials. Excavated material and debris shall be carted away as fast as possible. Not less than 8 feet of the width of any alley must be left clear and free to traffic at all times. Materials placed or piled on the street or walk, shall have a suitable railing or barricade placed around same, or approved equivalent, to safeguard the public.

No material or debris will be allowed on the streets or public property when possible to place same elsewhere. The use of the street or walk as a continuous storage or material yard is prohibited. Immediately after the

material or debris is moved from public property the said public property and pavements must be thoroughly and effectively cleaned.

#### SECTION 16.

##### PROTECTION BY LIGHTS

When any material is stored on any street, sidewalk, alley or other public place, a RED light must be maintained at each end of such material and kept burning from sunset to sunrise, and there shall be a similar RED light every 50 feet in length of such piles or stacks of material.

#### SECTION 17.

##### CURB GUTTERS AND CORNERS KEPT CLEAR

(A) Curb gutters shall be kept free from debris and other obstructions. When necessary to pile material over gutter a wooden box or other protective contrivance shall be placed over the gutter, allowing a clear space of at least 6 inches by 16 inches for gutter.

(B) When building operations are being carried on near a corner, the debris and materials must be kept back from the corner a clear distance, extending back beyond the extension of the building lines; this applies to corners at the intersection of streets and other public thoroughfares.

#### SECTION 18.

##### OBSTRUCTIONS NEAR FIRE HYDRANTS

No material or debris of any description shall be placed within 8 feet of any fire hydrant. A clear unobstructed passageway not less than 12 feet wide must lead to fire hydrant from the street.

#### SECTION 19

##### REMOVAL OF DEBRIS AND LAYING OF DUST

(A) The Building Inspector is hereby given authority to order and compel the removing of any materials, excavated material and debris deposited in violation of the provisions covering such materials, in this ordinance.

(B) All dusty and fine debris, or similar materials, shall be wet down to prevent the blowing of such dust or fine debris.

#### SECTION 20.

##### USE OF SPACE UNDER SIDEWALKS

(A) Basements may extend under the sidewalk recently in front of structures fronting on such sidewalks. Approved retaining walls shall be placed along front and ends of such occupied area. The retaining walls shall be not less than 12 inches thick, using solid masonry or concrete and shall be reinforced with buttresses or equivalent when necessary.

(B) Retaining walls beneath sidewalk curbs, shall be offset around fire hydrants, keeping the hydrants entirely outside the basement area. In existing basements, should such hydrants be subsequently installed, the owner of the premises shall wall around the fire hydrant, thereby separating same from such occupied area or basement. No person shall excavate or build a wall within 20 inches of any fire hydrant.

(C) The City, by granting a permit for the use of space under the sidewalk, does not in any way grant a right for any term of occupancy. If at any time the city desires to use any portion of the space under the sidewalk, the owner and the occupant of such premises shall, upon demand, surrender to the city any portion of the space or area under the sidewalk as desired.

## **SECTION 21. PROTECTION AND STANDARD DEPTH OF EXCAVATIONS**

(A) All excavations shall be guarded and protected against caving or becoming dangerous to persons or property. Proper barricades or railing shall be placed at alley, street or any other public thoroughfare in order to safeguard the public when such excavations are near said public thoroughfares or passages.

(B) Any person causing any excavation to be made on his own property to a depth of 12 feet, or less, below grade, shall protect the excavation so that the adjoining soil will not cave or settle, but he shall not be liable for the expense of underpinning or extending the foundation of adjoining properties. Before commencing the excavation the owner shall notify in writing, the owners of adjoining property, that the excavation is to be made and that the adjoining property shall be taken care of. The owners of adjoining properties shall be given access to the excavation for the purpose of protecting their adjoining building.

Any person causing an excavation to be made exceeding 12 feet in depth below grade, shall protect his excavation so that the adjoining soil will not cave or settle and shall extend the foundations of adjoining buildings below a depth of 12 feet below the grade at his own expense. The owner of the adjoining buildings shall extend the foundations to a depth of 12 feet below grade at his own expense.

For the purpose of this section only, the term "grade" shall be deemed to mean the established grade at the intersection of the division line of the property and the public walk.

## **SECTION 22. OVERHEAD PROTECTION AND TEMPORARY WALK**

(A) When building operations are carried on in such a way as to make the sidewalk unsafe, on account of undermining, excavation beneath, or removing of walk, it shall be compulsory that there be a substantial 5-foot temporary walk maintained at all times between curb and building line, to afford free and unobstructed passage for pedestrians. The walk shall be maintained at a height not to exceed 4 feet above the street.

(B) When buildings are being constructed or wrecked, or when extensive remodeling is being done, and such structures are more than one story high and built near or adjacent to the line, the walks shall be protected by a suitable temporary canopy, as hereinafter provided; canopy and walk shall have sufficient strength to safely support a live load of 250 pounds per square foot. The top boarding and roof shall consist of boards at least 2 inches thick. The beams supporting the canopy shall

be at least 8 feet in the clear above walk. Should such canopy or overhead protection shade the walk and cause same to be dark or unilluminated, a sufficient number of electric lights shall be installed to properly illuminate the walk. When the walk is above the approaching grade, suitable steps or ramps shall be provided; when necessary for public protection suitable substantial hand railing will be required. Solid boarded-up fencing on street side of walk is prohibited.

## **SECTION 23. WINDOW CLEANERS SAFETY BELTS**

Office buildings, department stores, commercial buildings, all public buildings, hotels and tenement houses, shall be provided with "Window Cleaners' Safety Belts." All windows exceeding a height of 12 feet above the ground or adjacent grade, shall be provided with approved safety belt bolts securely fastened in jambs. This section need not apply when the above mentioned buildings have windows so designed that they can be washed from the inside of building, nor shall it apply when there is an adjacent roof not exceeding 12 feet below window sill.

## **SECTION 24. PERMITS**

It shall be unlawful for any person, firm or corporation to commence or proceed with the construction, erection, alteration or repair of any building or structure, unless a permit to do the work has first been obtained from the Building Inspector, except as otherwise specified in detail below. Any person desiring such permit shall file with the Building Inspector, on a blank to be furnished by the Building Inspector, an application therefor, together with the necessary plans and specifications. All construction work on buildings done directly by the United States Government, State of California, County of San Diego and the City of San Diego, will require a permit but will be exempt from the usual permit FEE charges.

Outside the Inner Fire Limits, buildings and alterations not exceeding \$20.00 in cost, labor and material included, do not require a permit, excepting that all garages, regardless of cost, will require a permit.

Within the Inner Fire Limits, alterations, repairs, buildings and structures, regardless of cost, will require a permit. The Building Inspector is hereby given authority to revoke, for cause, any permit.

Any person operating under a permit issued him by the Building Inspector's office, and refusing or neglecting to comply with the instructions of the Building Inspector, in enforcing this ordinance, shall be denied any future permit until said instructions have been complied with.

## **SECTION 25. STATEMENT OF COST REQUIRED**

A true and correct statement of the cost of any building, structure or alteration, shall be given in each case when making application for a permit. The fact that the owner expects to do much of the labor himself and use material which he already has on the premises, does not

detract from the value of the material and labor. The value of the material and labor is present regardless by whom furnished, and this value must be included in the estimated cost when applying for a permit.

## **SECTION 26.**

### **EXPIRATION AND LIFE OF PERMIT**

If work authorized by a permit is not begun within ninety days from date of permit, said permit shall become null and void and the fee forfeited, excepting that in the case of a building costing more than ten thousand dollars the above-mentioned 90-day limit may be extended for a period not to exceed 365 days. If work is started after this extension of time has expired, a new permit will be required.

Should work on a building in course of construction be entirely suspended for a period of six months the original permit shall become null and void, and the fee forfeited. A new permit must be taken out before the work can be resumed.

## **SECTION 27.**

### **DRAWINGS, SPECIFICATIONS AND DETAILS**

No permit shall be issued until drawings and specifications have been approved by the Building Inspector, and in cases requiring special calculations or knowledge of strength of materials the Building Inspector shall require such strain sheets or copies of calculations as may be necessary. If the plans or specifications are indefinite or incomplete, the Building Inspector shall refuse to issue a permit until sufficient plans and specifications shall have been submitted.

Except as otherwise noted, two sets of plans and specifications shall be submitted, and when they are sufficient to comply with the spirit and intent of this ordinance, they shall be accepted and a permit issued, and the Building Inspector shall stamp plans and specifications as follows: **PLANS ACCEPTED FOR CONSTRUCTION, SUBJECT TO THE REQUIREMENTS OF THE BUILDING ORDINANCE OF THE CITY OF SAN DIEGO.**

One complete set of plans and specifications, stamped as above provided, shall be delivered to the party, obtaining the permit, who must keep such plans and specifications on the premises where such construction is being conducted, same to be open for inspection at all times during the term of such construction. The other set of plans and specifications shall be kept on file in the office of the Building Inspector. It shall not be obligatory for the Building Inspector of the City of San Diego to preserve or retain such plans and specifications a longer period than 12 months.

When a permit is desired for a residence or dwelling not exceeding in cost \$7000, or a garage, barn, outbuilding, shed or store building not exceeding in cost \$3000, but one set of plans and specifications need be submitted to the Building Inspector, and after being stamped and approved, they shall be kept on the premises where the construction is being carried on, as provided in the preceding paragraph. When sufficient information is plainly lettered on the plans mentioned in this paragraph, such

information will be accepted in lieu of the specifications. All drawings to be blue printed, or permanently made on durable paper.

## **SECTION 28.**

### **CORRECTION SHEET AND ERRORS**

If upon examination the Building Inspector shall find the plans and specifications are not in accordance with the Building Ordinance requirements, he shall indicate such deficiency in writing on a correction sheet, and no permit shall be issued until such corrections have been made.

The fact that a permit is issued is no guarantee that the plans and specifications are correct in every respect. Errors subsequently discovered must be rectified before the building or construction can be approved or accepted.

## **SECTION 29.**

### **RESPONSIBLE AUTHORITY**

Before a permit is granted for any important reinforced concrete construction, large steel or wooden trusses, plate or box girders, structural steel or iron frame, heavy duty construction, or important foundations, including retaining walls exceeding 10 feet in height, the drawings and specifications shall exhibit the approval and signature of a Certified Architect, or competent Structural or Civil Engineer.

## **SECTION 30.**

### **CHANGES AFTER PERMIT IS ISSUED**

After the permit has been issued, the plans or construction shall not be changed except in minor details not affecting the structural parts, stairways, elevator shafts, fire escapes, means of communication, egress or ingress, unless the Building Inspector has been given notice to that effect and his approval obtained. When the changes are extensive, plans and specifications shall first be submitted to the Building Inspector. When such changes increase the cost, an additional fee shall be paid, the amount of such fee to be in accordance with the schedule of fees hereinafter provided.

## **SECTION 31.**

### **PERMIT CARD**

When a permit is given, a PERMIT CARD shall accompany the permit. The card shall show the number of the permit and the street number. The PERMIT CARD must be posted in a conspicuous spot on the premises at all times during the construction; otherwise the work may be stopped.

## **SECTION 32.**

### **RECORD OF FEES**

The Building Inspector shall keep in proper books an accurate account of fees received under this ordinance, giving the name of the party paying same, the date and amount, and such books shall be kept open for inspection.

## **SECTION 33.**

### **PERMIT FEE SCHEDULE**

The FEE to be paid to the Building Inspector for the issuance of any permit required by this ordinance, shall be as follows:

For the purpose of this ordinance, the following terms shall be construed to have the meaning herein given them.

Words used in the present tense include the future as well as the present; the singular includes the plural and the plural includes the singular; the word "person" includes a corporation, co-partnership or firm as well as

an individual. "Writing" includes printing, typewritten matter and writing.

Words used in the masculine gender include the feminine, and words used in the feminine gender include the masculine.

**ALTERATIONS.** Any change, alteration or addition.

**APARTMENT:** A room or suite of rooms which is occupied or is intended or designed to be occupied by one family for living and sleeping purposes.

**APARTMENT HOUSE:** Same as tenement house.

**APPROVED:** Whatever material, appliance, appurtenance, construction or other matter which meets the requirements of this ordinance, the approval of the Building Inspector and other authorities having jurisdiction.

**AREAWAY:** An open sub-surface space adjacent to a building for lighting or ventilating cellars or basements.

**BALCONY:** A platform projecting from the wall of a building. Also a seating platform or gallery above main auditorium of a theatre, or other assembly room.

**BASEMENT:** Any story or portion thereof partly below the level of the curb or the actual adjoining ground level, the ceiling of which in no part is less than 7 feet above the curb level or actual adjoining ground levels. A basement shall be considered a story.

If the adjoining ground is excavated to or below the curb level, or to or below the adjoining natural ground level, such excavated space shall be not less than the minimum width and length required for outer courts.

**BEARING WALL:** A wall which supports any load other than its own weight.

**BUILDING OR STRUCTURE:** Any construction the material or arrangement of which may affect the health, peace, safety, pleasure, or general welfare of man or animal.

**BUILDING DEPARTMENT:** Means the Building Inspector, or any officer or department charged with the enforcement of ordinances and laws regulating the material construction and alteration of structures.

**BUSINESS BUILDING:** Any building or part of a building which is not a tenement, apartment, residence or public building.

**CELLAR:** Any story or portion thereof, the ceiling of which in any part is less than 7 feet above the curb level or actual adjoining ground level.

**COURT:** An open unoccupied space other than a yard on the lot on which is situated a building.

**CURB LEVEL:** The curb level opposite the center of the "front of lot." Where no curb has been established, it means the average ground level at the "front of lot."

**CURTAIN WALL:** Any exterior non-bearing wall between columns or piers, which is not supported by beams or girders at each floor. Also the short wall immediately above fire doors and similar openings.

**DEAD LOAD:** The weight of the walls, framing, floors, roofs, tanks with their contents, and all permanent construction.

**DIVISION WALL:** Any interior wall in a building dividing same into separate parts and extending from foundation to and through the roof.

**DORMITORY:** Any room in which more than 2 persons are "guests" and are not living together, and shall, for the purpose of computing the number of rooms, be deemed a separate guest room for each one hundred square feet of superficial floor area therein.

A dormitory containing 600 square feet of superficial floor area (6 guest rooms) or more, is in itself a "hotel."

**DWELLING:** (a) Any residence occupied by not more than 2 families.

(b) Any one story residence, occupied by one or more families.

(c) Any house or building, or portion thereof, which is not a "Tenement House" or a "Hotel" and which contains one or more "Apartments" or "Guest Rooms" used or intended or designed to be used, built, rented, leased, let or hired out to be occupied for living purposes.

**EXTERIOR WALL:** Any outside wall, or vertical enclosure of a building, other than a "party wall."

**FACTORY:** A building or portion thereof used to manufacture or assemble goods, wares or merchandise, the work being done principally or partially by machinery.

**FAMILY:** Any one person living alone or a group of two or more persons living together in an apartment or dwelling.

**FIRE DOOR:** A door, frame and sill, which will successfully resist a fire for one hour in accordance with test specifications equal to those as recommended by the National Board of Fire Underwriters.

**FIRE SHUTTER:** A shutter and its fittings which will successfully resist a fire for one hour in accordance with test specifications equal to those as recommended by the National Board of Fire Underwriters.

**FIRE WALL:** A wall built for the purpose of restricting the area subject to the spread of fire.

**FIRE WINDOW:** A window frame, sash and glazing, which will successfully resist a fire for one hour, in accordance with test specifications equal to those as recommended by the National Board of Fire Underwriters.

**FLATS:** Any building not more than two stories in height which is designed, built, rented, leased, let or hired out to be occupied, or is occupied, as the home or residence of not more than two families, and the said building to be so arranged that each of the families live independent of each other in separate and distinct apartments.

**FOOTING:** The spreading course at the base or bottom of a foundation wall, column or pier. Footings are used to distribute the load and reduce the stress per square foot on the soil.

**FOUNDATION:** That part of a building or a wall which rests upon the footing. The wall between first tier of joists and the footing or soil. A basement wall below first floor level.

**FRONT OF LOT:** The boundary line of lot bordering on the street. In case of corner lot, either of such boundary lines may be the "front of lot."

**GARAGE:** (Public). A building or portion thereof in which are housed, for rent, care, repair, demonstration, storage or sale, self-propelled vehicles or other wheeled machinery using or containing in the tanks thereof, volatile inflammable fluids or electricity, for fuel or power, also all adjoining buildings not cut off by an unpierced fire wall.

**GARAGE:** (Private). A building built on the same property as the owner's dwelling, where one or not more than 5 automobiles, tractors, or trucks are stored for private use only.

**GIRDER:** All beams in floor or roof construction which are used for the support of other beams.

**GYPSUM BLOCK:** Tile or blocks made from gypsum, and not over 5% by weight of combustible fibre binding. Also cinder plaster blocks made from crushed cinders and gypsum.

**GUEST:** Any person hiring or occupying a room for sleeping purposes, and shall include both boarders and lodgers.

**GUEST ROOM:** A room which is occupied, or is intended, arranged, or designed, to be occupied, for sleeping purposes, by one or more guests.

**HEIGHTH OF BUILDING:** The vertical distance from the curb level to the lowest point of the finished ceiling of the top story, or to the average height of the gable in case of pitched roofs. When a building faces two or more streets having different grades, the measurement must be taken at the middle of a facade on the street having the greater grade.

When a building does not adjoin the street, the measurement shall be taken from the average level of the ground adjoining such building.

**HOLLOW TILE:** A cellular hard burned or vitreous clay tile, with dense webs and shell.

**HOSPITAL AND SANITARIUM:** A building used for the keeping and care of the sick, invalid, and infirm people, and having accommodations for more than five people.

**HOTEL:** Any house, rooming house, lodging house or building or portion thereof, containing 6 or more guest rooms which are let or hired out to be occupied, or which are occupied by 6 or more guests, whether the compensation be paid directly or indirectly in money, goods, wares, merchandise, labor or otherwise, and shall include Turkish baths, bachelor hotels, studio hotels, public and private clubs and any building of any nature whatsoever so designed or occupied, except hospitals where persons temporarily reside and where each such persons receives regular bona fide medical attention on the premises, and

jails, detention buildings and similar buildings where human beings are housed and detained under restraint.

**INCOMBUSTIBLE OR NONCOMBUSTIBLE:** Materials or construction which will not ignite and burn when subjected to fire.

**INNER COURT:** A court entirely surrounded by the building, on all sides.

**KITCHEN:** Any room used or intended or designed to be used for cooking purposes and for the preparation of food.

**LENGTH OF BUILDING:** Its greatest horizontal dimension.

**LIVE LOAD:** All loads other than dead loads. All partitions which are subject to removal or rearrangement shall be considered as live load.

**LOT:** A parcel or area of land on which is or may be situated a building, together with the land, yards, courts and unoccupied spaces for such building; all of which land shall be owned or be under the absolute lawful control and in the lawful possession of the owner or lessee of the said building.

Any "lot" or that part of a "corner lot" which is more than 75 feet from the junction of two or more intersecting streets, shall be deemed an "INTERIOR LOT."

**MASONRY:** Any brick, stone, terra cotta, hollow tile, concrete or reinforced concrete construction.

**MEZZANINE:** A partial low story introduced in the height of a principal story.

**MOVING PICTURE THEATRE:** Any room or building erected, altered, or which is to be used, for the regular exhibition of motion pictures, or slides adapted and used to project upon the screen or other surface pictorial representations of any character. Such room or building shall have no stage upon which vaudeville, burlesque, dramatic, operatic or other theatrical performances are given. A moving picture theatre when seating more than 800 people shall be classed as a theatre.

**NON-BEARING WALL:** A wall which supports no other load than its own weight.

**NUISANCE:** Embraces public nuisance as known at common law or in equity jurisprudence, and whatever is dangerous to human life or detrimental to health, and shall also embrace the overcrowding with occupants of any room, insufficient ventilation, or illumination, or inadequate or unsanitary sewerage or plumbing facilities, or uncleanness, and whatever renders air, food or drink unwholesome or detrimental to the health of human beings.

**OCCUPIED SPACE:** Is all space covered by a building including outside stairways, platforms, fire escapes, balconies, fire towers, chimneys, vent shafts under 32 square feet in area, including cornice or any part thereof which projects into an inner court more than one inch for each foot in width of such court, or which projects into an outer court or yard more than two inches for each foot in width of such outer court or yard. Except

that outside stairways, platforms, balconies and fire escapes shall not be classed as occupied space when constructed of open metal work.

For the purpose of determining occupied space for tenement, hotels, and lodging houses, the area of the building shall be taken at the lowest story or portion thereof used for living or sleeping purposes.

**OFFICE BUILDING:** A building used for professional, clerical or office purposes. No part of such building shall be used for living purposes except by the janitor's family.

**OUTER COURT:** A court, one entire side or end of which is bounded by a front yard, a rear yard or a side yard, or by the "front of lot," or by a street or public alley.

**OWNER:** Any person, firm or corporation owning or controlling property, and includes a duly authorized agent or attorney, guardians, conservators, or trustees.

**PANEL WALL:** An exterior non-bearing wall in a skeleton structure, built between columns or piers and supported at each story.

**PARAPET WALL:** That portion of any wall which extends above the roof line and bears no load except as it may serve to support a tank.

**PARTY WALL:** A wall used or adapted for joint service between two buildings.

**PERSON:** A natural person, his heirs, executors, administrators or assigns; and also includes a firm, partnership or corporation, its or their successors or assigns.

**PUBLIC BUILDING:** A building or part of a building in which persons congregate for civic, political, educational, religious, recreational, amusement or transportation purposes; or in which they may be voluntarily or forcibly detained or housed for safety, punishment, observation, or care.

**PUBLIC HALLWAY:** A hall, corridor, stairs, landing, vestibule or passageway, used in common by the occupants of a building. A hall, corridor, stairs, landing, vestibule or passageway serving as a means of communication for the public between an entrance to a store or building and the various rooms, apartments or spaces in a building.

**REAR LOT:** A lot, or area of land having no boundary line bordering on a street, or less than one-half of its width as a boundary line bordering on a street.

**REAR YARD:** A yard located between extreme rear line of building and the rear of the lot.

**REPAIRS:** The reconstruction or renewal of any existing building or part of building or structure, or its appurtenances.

**RETAINING WALL:** A wall constructed to support a body of earth or to resist lateral thrust.

**REINFORCED CONCRETE:** An approved concrete mixture in which steel is embedded in such manner as

to resist the tensile stresses, assist in the resistance to shear, and add rigidity and strength to the concrete.

**SCHOOL BUILDING:** A building used as a place of learning, a school or convent, a college or other structure, where 100 or more are receiving instruction at any one time.

**SHED:** A roofed structure, open on one or more sides, which does not exceed 15 feet in height nor more than 500 square feet in area.

**SHAFT:** An open space other than a court extending through the building one or more stories, whether for light, ventilation, elevator or other purposes.

**SIDE YARD:** A yard which extends from the rear yard to the front yard, or "front of lot."

**SKELETON CONSTRUCTION:** A form of building construction wherein all external and internal loads and stresses are transmitted to the foundations by rigidly connected frame work of metal or reinforced concrete. The enclosing walls being supported by girders at each story.

**STAIR HALL:** Includes the stairs, stair landings, hallways, or passages through which it is customary to pass in going from the entrance to the different floors and roof.

**STORE BUILDING:** A building or room used wholly or in part for purposes of exhibiting for sale goods, wares or merchandise.

**STORY:** That part of any building comprised between any floor and the floor or roof next above.

**STORY AND A HALF BUILDING:** A building that is more than one story in height, and less than two stories in height, wherein any portion of the space above first story ceiling is used or intended to be used or occupied for storage, living or sleeping purposes.

**STREET:** Any public street, alley, thoroughfare or public park having a minimum width of 16 feet.

**STRUCTURE:** Any building, shed, tower, fire escape, flag pole, framework, retaining wall, booth, partition, fence, railing, balcony, porch, column, enclosure, canopy, arch, supports, sign or billboard.

**TENEMENT HOUSE:** Any house or building, or portion thereof, more than one story in height, which is designed, built, rented, leased, let or hired out to be occupied, or which is occupied as the home or residence of three or more families living independently of each other and doing their cooking in the said building; provided, however, that a building or structure as described herein under "Dwelling" or "Flats" shall not be classed as a "Tenement House."

**TERRA COTTA ARCHITECTURAL:** A special high grade hard burned clay product used for ornament, face veneering, cornices and decoration.

**TERRA COTTA:** A hollow building block made from hard burned or vitreous clay, used for floors, floor

arches, fireproofing, partitions, walls, building blocks, etc. A hollow tile.

**TERRA COTTA PORUS:** A hard burned clay block or tile used as a fireproofing material, said clay to be mixed with not over 50 percent of sawdust by volume before being burned.

**THEATRE:** Any building or part of a building designed or used for theatrical or operatic purposes with accommodation for an audience of more than 200 people, and having a permanent stage upon which movable scenery and theatrical appliances are employed. The term "Theatre" shall mean and include any moving picture theatre seating more than 800 people or having accommodations for more than 800 people.

**THICKNESS OF WALL:** The minimum thickness of a wall measured between any two floors, or between floor and ceiling or between floor and roof.

**TURKISH BATH:** A dormitory or a combination of guest rooms, accommodating 6 or more guests, in connection with which any form of bath or massage is given by the attendants to the guests. For the purpose of this ordinance a Turkish Bath shall be classed as a "hotel."

**WAREHOUSE:** A building, or portion thereof, designed or used for the storage of merchandise.

**WIDTH OF BUILDING:** The horizontal dimension next in value to the length.

**WIRED GLASS OR WIRE GLASS:** Glass not less than one-fourth of an inch thick, enclosing a layer of wire fabric reinforcement having a mesh not larger than seven-eighths of an inch, and the size of wire not smaller than No. 24 B. and S. Gauge.

**WORK SHOP:** A building or room in which articles of merchandise are manufactured or repaired wholly or principally by hand.

**YARD:** A portion of a lot not occupied by the building situated on lot, and extends from the ground up, open and unobstructed to the sky.

## SECTION 35.

### AWNINGS

All canvas, duck or other fabric awnings shall be movable, supported on hinged or sliding brackets or combination bracket and roller. Awning to be of such construction that it may be folded or rolled up at any time. All awnings must be rolled up out of way during the entire night time. All awnings shall be kept in good repair.

Rigid frame or permanent awning or canopy covered with cloth will not be permitted anywhere within the Inner Fire Limits. Ragged, or dilapidated awnings are prohibited.

All awnings permitted under this section shall clear the sidewalk at least 7 feet, 5 inches, at the lowest point, excepting that hanging borders at the bottom may come as low as 6 feet, 8 inches, in the clear from the walk. No awning shall project more than two-thirds the width

of the sidewalk. The erection or hanging of a new awning, or the erection or hanging of an old awning in a new location, requires a permit. The fee for such permit will be \$1.00. No awning shall be maintained in violation of this section.

Awnings are hereby prohibited within the Inner Fire Limits, unless attached to buildings immediately over store fronts or windows.

### **SECTION 36. MARQUISES OR FIXED CANOPY**

An approved ornamental incombustible canopy may be used over the main entrance to any building, provided it covers no part of any store window, show, or display window. The frame, and other material in general, to be metal or reinforced concrete, excepting that the roof or ceiling thereof may be wired glass not less than  $\frac{1}{4}$  inch thick. Plate glass drop ornaments or decoration may be used. Canopy must be supported entirely free of the sidewalk and curb. No part of such canopy shall come within 8 feet of the sidewalk, measuring in the clear. Proper provisions must be made to carry the water from the top of the canopy down through a conductor pipe on the face of the building, and out under walk to gutter. A uniform live roof load of 20 pounds per square foot shall be figured, in addition to dead load. Before such work is started a permit shall be obtained.

### **SECTION 37. ARCADE SUPPORTED AT CURB**

Overhead construction or arcades supported at curb shall be limited to such property or streets lying within 600 feet of the mean high tide line of the ocean or bay fronts in those parts of the City known as Ocean Beach, Mission Beach and Pacific Beach. No second floor or story will be allowed above such arcades or overhead construction. This need not be construed to prohibit the top or deck of such arcades from being used as an observation deck or porch.

Arcades shall extend to the curb line and be supported at the curb line by columns or pillars. Columns or pillars shall be at least 15 feet apart, center to center. Such columns or pillars must not extend into the street beyond the curb line, but must be built entirely upon the sidewalk space, adjacent to the curb line. No dimensions, other than height of such columns or pillars, shall be more than 24 inches.

There must be a clear space of at least 14 feet under all parts of overhead construction, except that openings toward the street may have arched effect. Columns must be run to a height of at least 8 feet without widening or arching out. The roof or deck shall be properly drained, using sufficient down spouts and cast iron drainage pipes under walk to gutter, where necessary.

### **SECTION 38. PROJECTION OVER PUBLIC PROPERTY**

No bay window or permanent awning shall be allowed to project beyond the property line of any public street, walk or alley. Balconies, other than fire escape plat-

forms, when constructed of iron or steel or masonry, may project not over 38 inches from the lot line if constructed to sustain a live load of 100 per pounds per square foot, such balconies and supports must be at least 10 feet in the clear above the sidewalk. Main entrance columns, pilasters, piers or steps may project not to exceed 1 foot beyond the property line. Columns, pilasters, piers, steps and similar projections shall project not to exceed 9 inches when not forming a part of the main entrance.

### **SECTION 39. CORNICES AND BELT COURSES**

Cornices and belt courses may project over public property one-half inch beyond the property line for each foot in height, for the first 7 feet. Above this height, cornices and belt courses may project one inch beyond the property line for each foot in height; provided, however, that no projection over public property shall exceed 100 inches.

All supports, lookouts, brackets or framework for cornices, string or belt courses, shall be of incombustible material when erected in the Inner Fire Limits. Sheet metal cornices and belt courses shall have riveted joints. The top or deck part of such projections may have a wood sheathing beneath the metal; provided such sheathing is unexposed and securely fastened to a metal or incombustible framework. Cornices and belt courses shall have the masonry wall carried up solidly behind them. Cornices and belt courses shall have sufficient strength to safely support a live load of 50 pounds per square foot, regardless of location.

### **SECTION 40. SIDEWALKS, SIDEWALK AND FLOOR LIGHTS**

Sidewalks constructed over basements, vaults and areas shall be of reinforced concrete or other approved incombustible material, the top finish surface shall be as per standard City specifications for finishing of sidewalks. Sidewalks, sidewalk lights, covers and other sidewalk inserts, framing, etc., shall have sufficient strength to safely support a uniform live load of 300 pounds per square foot. Steel and iron supports beneath walks shall be protected against rust and fireproofed.

Walk lights are to be supported with metal, reinforced concrete frames or equivalent incombustible supports with waterproof or nonleak joints, the construction to be such that the individual lights may be removed or replaced without destroying the adjacent construction. The lights to be annealed glass at least  $\frac{3}{4}$  inches in thickness. When the glass measures more than 16 square inches in area approved wire netting shall be provided, either cast in the glass or suspended immediately below. Floor lights are to be equivalent in strength to the floors in which they are placed.

### **SECTION 41. SIDEWALK OPENINGS AND SIDEWALK ELEVATORS**

Openings and gratings in public sidewalks for the purpose of obtaining light, ventilation, stair entrance or

any other purpose, except as noted below in this section, are prohibited.

Box ventilators will be permitted in sidewalks provided a heavy metal grill and frame forms the top. From this frame a collar or sleeve with suspended pan below shall be provided. The pan must have a curb all around, somewhat larger than the sleeve, and extending up past the lower edge of the sleeve. The pan, curb and sleeve to be not less than No. 24 galvanized iron. Provide a small drain hole in bottom of pan. Box ventilators exceeding an area of 144 square inches are prohibited. Such ventilators are to be placed near outer edge of walk with top surface kept  $\frac{1}{4}$  inch above the general walk grade within 3 inches of ventilator. Slope walk up to level of grill surface, beginning slope 3 inches from grill.

A limited number of manholes will be allowed as follows:

One manhole with metal frame and cover will be allowed for each 14 feet of street frontage. The cover and frame to be kept flush with walk surface and located within 4 feet of the curb. The top face of frame and cover shall have non-slip surface. Manholes exceeding 1000 square inches in area are prohibited.

Openings in sidewalks other than manholes and box ventilators will be permitted up to 40 square feet in area when provided with hinged trap doors of metal; doors to be attached to metal frames securely built in the walk. Doors and frame to have non-slip top surfaces with no projection exceeding 3-16 of an inch above the walk surface.

The inner edge of sidewalk openings having trap doors shall not be nearer to the property line than  $\frac{1}{2}$  of the established width of the walk. No such opening shall exceed 5 feet measured at right angles to the curb and 8 feet measured parallel to the curb. All manhole covers, sidewalk doors and supporting construction shall have sufficient strength to safely support a uniform live load of 300 pounds per square foot and shall be kept well painted and in good repair.

When any sidewalk doors or sidewalk elevator doors are opened, the opening shall be protected on the exposed sides by a substantial latticed, heavy mesh or screened gate or barricade at least 30 inches in height, securely held in place when doors are up. Such gate or barricade may be removed upon the curb side during the period of loading and unloading. Any person, firm or corporation operating a sidewalk elevator or opening must not open the sidewalk doors thereof without first posting a responsible person on the sidewalk at the said doors.

## SECTION 42.

### SIDEWALK OBSTRUCTIONS, ETC.

Pedestals, signs, posts, barber poles, railings, barricades and all other obstructions on sidewalks or curbs, are hereby prohibited. Show cases, wall cases, photograph display cases and similar devices shall not project more than 5 inches beyond the property line. Shelves, counters, platforms, etc., shall not project on or over the

public sidewalk. Nothing in this section shall be deemed to apply to telegraph, telephone and trolley poles, or public street lights.

## SECTION 43.

### CONDUCTORS UNDER SIDEWALKS

Downspouts or leaders shall not discharge upon the sidewalk; the water must be carried beneath the walk and discharged into the gutter, the conductor or leader beneath the walk shall be cast iron, copper or sewer piping, not less in size than the down spout or vertical leader; the minimum inside diameter or dimension to be at least 2 inches; all joints and connections to be water tight. Conductors under walk shall not interfere with public pipes, mains, conduits, lamp posts, manholes, hydrants or gutter at curb.

## SECTION 44.

### HOUSE MOVING

No person except a licensed house mover shall move any building within the limits of the City of San Diego, except as hereinafter provided. No licensed house mover will be required where a building is to be moved from one part of the same lot, or from one lot to another lot owned by the same person, and where such building is to be moved without crossing any street, alley, public property, or the property of another person. Small one-story class D buildings under 12 feet in height, weighing less than 4000 pounds, and having an area not exceeding 120 square feet, may be moved without the services of a licensed house mover, provided that such structure is entirely supported upon an ordinary wagon or auto truck without the assistance of any additional wheels or rollers. The greatest horizontal dimension of said building or structure shall not exceed a distance of 14 feet.

All house movers must comply with all conditions governing such work or applicable thereto, as laid down in the ordinances of the City of San Diego, and must make good all damages or injuries caused by the moving of any house or structure. The wheels and rollers shall have sufficient tire or bearing width to prevent any grooving, marring or damaging of the pavements.

Before placing any dwelling, tenement house or hotel upon a lot, the distance as required by law, between such building and the lot lines, and the distance between such building and adjacent structure on the same lot, shall be verified and the structure placed accordingly.

Before moving any building or structure a permit to do so shall first be obtained from the Building Inspector. The fee for such permit shall correspond to the fees charged for new buildings; the value to be appraised value of the building at the time of moving. Before obtaining the permit, the mover shall state specifically the route to be taken. The permit shall limit the time for removal, and any delay of time longer than specified in such permit shall be deemed a violation of this ordinance.

The "permit card" shall be tacked up near the front entrance of the house being moved, otherwise if no "card" be tacked up, the Building Inspector may stop the work. A permit to move a building does not cover a

permit for underpinning or repairs. No frame or Class D building shall be moved from without to within the Inner Fire Limits, nor from one part of the Inner Fire Limits to another.

## SECTION 45.

### WRECKING OF STRUCTURES

No person except a licensed house mover or wrecker shall wreck or demolish any building except as hereinafter provided: Any owner may wreck or demolish his own building. No permit will be required when the building to be wrecked is a one story building not exceeding 14 feet in height.

Except as noted above; before any building or part thereof can be wrecked or demolished, an application shall first be filed with the Building Inspector stating the work to be done, and a permit obtained. The person or persons doing the wrecking shall do so in a safe manner. The same regulations shall apply to the use of streets and public property as required in the case of new buildings. Dry or dusty materials and debris must be wet down to lay the dust. The fee for any wrecking or demolishing permit shall correspond to the fees charged for new buildings, the value to be appraised value of the buildings.

Any person wrecking a building must make good all damages or injuries caused by the wrecking of any such building or structure. When a permit is issued the accompanying "permit card" must be posted in a conspicuous place on the premises, otherwise the Building Inspector may stop the work.

## SECTION 46.

### REPAIRS TO DAMAGED BUILDINGS

When any class D structure in the Inner Fire Limits is damaged by fire, decay or other causes, to the extent of 40% of its value, as appraised by the Building Inspector, it shall be unlawful to repair or reconstruct such structure, and the same shall be demolished within 30 days after the owner, agent or parties in charge have received written notice to do so, from the Building Inspector.

Except as otherwise noted in the preceding paragraph, when any building or structure in the City of San Diego is damaged by fire, decay or other causes, same shall not be allowed to remain in its damaged condition, but shall be removed, demolished, or properly repaired forthwith. This paragraph shall not be deemed to prohibit such action as provided for under "Dangerous Structures."

## SECTION 47.

### ALTERING OF STRUCTURAL MEMBERS

Whenever any alteration or repairing involves the changing or the safety of any structural member, such as a footing, column, pier, beam, girder, lintel, truss, wall or arch, in any existing building other than a private garage, shed, outbuilding, or dwelling, the Building Inspector shall first be notified, and it shall be unlawful to start such alterations or changes without first obtaining the Building Inspector's approval. Sufficient plans and specifications for such work shall be furnished.

## PART TWO

### BUILDING CLASSIFICATION, TESTS AND QUALITY OF MATERIALS

## SECTION 48.

### CLASS A, B, AND C STRUCTURES IN GENERAL

(A) Class A, B, and C Buildings may be built anywhere in the City of San Diego. Such buildings, when more than two stories in height, shall have a stairway not less than 34 inches in width, extending from the top story to the roof, stairs to be located near top of main stairs, roof stairs to terminate in a penthouse. Buildings two stories in height may have a 30" x 30" scuttle hole to roof in lieu of the stairway, provided an iron ladder is permanently secured in place and extends from second floor to within 1 foot of upper scuttle hole cover at roof. One-story buildings may have the same scuttle hole conveniently located, in lieu of the ladder and stairway. Scuttle covers and lining between ceiling and roof shall be protected with incombustible material. Where there is an attic or space between ceilings, and roof, proper provision for entering such spaces shall be provided.

All pent houses shall have incombustible walls when placed on class A buildings, and walls of class B construction when placed on class B and C buildings. Openings in pent house walls shall be protected with fire windows, or fire doors; doors may have wire glass panels.

(B) The roofing for class A, B and C buildings, exceeding two stories in height, when located within the Inner Fire Limits, shall be incombustible material, asbestos prepared roofing, or a fire-resisting roofing reinforced or protected with a layer of "10 pound" sheet asbestos. When two stories and under in height such buildings may have not less than a 3-ply prepared or approved pitch and gravel roof in lieu of the above.

(C) All vertical supports in cellars and basements to be masonry, reinforced concrete, fireproofed steel or fireproofed cast iron, excepting that class B and C buildings not exceeding four stories in height may have wood posts or columns in basement or cellar when such support rest on cast iron bearing plates. If such wood posts or columns support floor beams, girders or columns above they shall not be less than 13 inches in their least dimension.

The basement or cellar partitions in buildings located within the Inner Fire Limits shall be masonry, reinforced concrete, or steel studs metal lathed and plastered both sides with Portland cement plaster tempered with lime.

(D) Note:—The following classifications and this section apply to such buildings and structures in general. Special structures, hazardous buildings and rooms, special uses of buildings, unusual conditions, etc., may require additional protection and added requirements, and will be taken care of in detail under other sections in this ordinance.

The height limitations, as given under Class A, Class B, Class C and Class D buildings, shall not be construed as conflicting with the height limitations for hotels, tenements and lodging houses, as laid down by the State Housing Act.

## SECTION 49.

### CLASS "A" BUILDINGS

(A) Any structure, in order to be classed as a Class A building or of Class A construction, shall meet the following minimum requirements: All exterior and interior loads shall be transmitted to the foundation or footings by means of concrete, reinforced concrete, brick, stone, steel or iron. All exterior walls, inner and outer court walls, to be brick, stone, reinforced concrete or other approved masonry. The floor construction, floor slabs, roof slabs, arches, stair slabs, landings and supports, to be reinforced concrete or other approved masonry or incombustible material. The interior partitions to be hollow tile, gypsum block, brick, concrete or metal studs, metal lathed and plastered both sides. All structural steel and iron to be fireproofed. All other material throughout to be incombustible material except as follows:

From the first to and including the 16th floor, the partition doors, sash and the usual trim may be wood. The doors, trim, sash and frames above the 16th floor, or story, shall be of approved incombustible material; all glass in partitions and doors above the 16th floor to be wire glass. Openings in every shaft, shaft wall, division fire wall, and court walls, shall be protected with fire doors, fire shutters, or fire windows.

(B) Finish floors of rooms and private halls may be hard wood when laid over incombustible material. The finish floors of corridors, public halls, stair halls, bath rooms, toilet rooms and janitors' closets, shall be of incombustible material, excepting the finish hand rail, which may be of wood.

All openings in exterior walls and court walls shall be protected with fire doors, fire shutters or fire windows, excepting openings facing directly on a public street, 40 feet or more in width, when not exposed to any undue fire hazard. All elevators, dumb elevators and freight elevators shall be enclosed in shafts composed of incombustible walls; all walls and partitions forming stair enclosures or recesses to be constructed from incombustible material. No stairway shall be enclosed in the same shaft with an elevator. The height limit of Class A buildings shall be limited to 250 feet.

## SECTION 50.

### REINFORCED CONCRETE CLASSIFICATION

Reinforced concrete buildings will be classed as Class A buildings and of Class A construction, when all reinforcement is properly protected against fire, and all other construction and materials are made to conform to the requirements stipulated in the preceding section.

## SECTION 51.

### CLASS "B" BUILDINGS

(A) Semi-fireproof buildings and other structures, in order to be classed as Class "B" buildings or of Class B construction, shall meet the following minimum requirements: All exterior walls and outer court walls shall

be constructed of brick, reinforced concrete, or other approved masonry. All passenger, freight and dumb elevators shall be enclosed in shafts of such construction as stipulated below in this section. No stairway shall be enclosed in the same shaft with an elevator.

(B) When the building exceeds four stories in height, all shafts, elevator shafts, and inside inner courts, shall be enclosed with walls constructed from the following materials: Approved masonry, steel studs metal lathed and plastered both sides, solid 2 inch plastered using metal lath and steel studs thoroughly embedded in the plaster solid wood planking at least 2½ inches thick with metal lath and plaster both sides, the planking may be laminated 3-ply with joints staggered or solid thickness tongue and groove. When the building does not exceed four stories in height, such shaft and inner court walls may be constructed from wood studs metal lathed and plastered both sides, or solid wood planking at least 1½ inches thick with metal lath and plaster both sides, the planking may be laminated 2-ply with joints staggered or solid thickness tongue and groove. When such partitions or walls are subject to the elements such as an inner court open to the sky, the plastering shall be cement plaster stucco, water proofed over water-proof paper, or in the case of studs, back plastering with cement plaster water-proofed or similar approved precautions shall be taken to avoid injury from dampness. All walls and partitions forming stair enclosures or stair recesses shall be of same construction as required for elevator and other shafts. Stairs with open wells are prohibited.

(C) All interior partitions other than fire walls, inside interior court walls, shaft walls, and walls or partitions forming stair enclosures, shall be stud walls metal lathed and plastered both sides, or same may be solid wood partitions not less than 2½ inches thick tongue and groove or splined.

(D) Class B buildings shall have no bearing partitions other than brick, concrete, reinforced concrete or other approved masonry. The loads and floors shall be supported by beams, girders, columns, posts or masonry in every story, all such supports other than masonry, whether of wood, steel or iron, shall be protected with metal lath and plaster; all ceilings, both sides of dwarf partitions and all stair soffits shall be similarly protected. If the supports are of heavy timber of such sizes as required for approved mill construction, the fire-proofing of metal lath and plaster may be omitted.

(E) All finish floors and roof sheathing shall be at least 1½ inches thick, tongue and groove or splined, or a double floor consisting of a ¾ inch sub-floor and a ¾ inch tongue and groove floor may be used, provided a layer of heavy building paper or asbestos well lapped at joints is placed between. All openings in shaft walls, inner and outer court walls and all exterior walls shall be protected with fire windows, fire doors, or fire shutters, such protection need not apply to openings in walls facing directly on public streets 40 or more feet in width. Solid 2-inch wood fire stops shall be provided in between

all wood studs, and metal lath basket fire stops filled with concrete shall be placed between steel studs. Fire stops shall be placed at floor and ceiling line and once between floor and ceiling line where studs exceed 9 feet 9 inches in height. Solid fire stops shall be placed between joists over beams or girders. Joists exceeding 10 feet in span shall have row of double bridging every 8 feet. All Class B buildings shall be limited to 80 feet in height. All fire-proofing used shall be placed directly against structural members.

## SECTION 52.

### MILL CONSTRUCTION CLASSIFICATION

(A) Any building of Mill or Slow burning construction in order to be classed as a Class B building or of Class B construction shall meet the following minimum requirements: All exterior walls and outer court walls shall be constructed from brick, reinforced concrete, or other approved masonry. All passenger, freight, or dumb elevators shall be enclosed in shafts of such construction as stipulated below in this section. No stairway shall be enclosed in the same shaft with an elevator. Paragraphs "B" and "C" of preceding section apply with equal force to this section also.

(B) All interior loads shall be carried on masonry walls or on heavy timber posts, girders, and beams except as otherwise noted. The least dimension of any post or girder, excepting roof supports, shall be not less than 9½ inches in any direction. The least dimension of any roof girder or post shall be not less than 7½ inches in any direction, and no floor or roof beams shall be less than 5½ inches in width or less than 7½ inches in depth.

Beams shall be spaced at least 3 feet apart in the clear. Beams and girders shall have steel or iron bearing plates when resting on masonry. All posts and columns shall have cast iron bearing plates when resting on a foundation or footing. Beams or girders when resting on masonry shall have at least 1 inch of air space all around. Provided at least 8 inches of solid masonry between ends of one tier of beams and ends of adjacent tier, if any. Proper means of anchoring shall be provided at walls. A system of anchoring shall be adopted which will tie the building across at intervals not exceeding 8 feet apart. All posts, beams and girders shall be held securely together at all connections and still be self releasing. Should any beam or girder burn through or fall, such failure shall not jeopardize the stability of adjacent structural members.

All posts shall have approved incumbustible caps which shall receive the posts above and adjacent girders. Each post shall rest immediately on cap of column below, except in two story buildings, in which case the second story columns may rest on girder beneath concentric with column below, provided metal bearing plates are used to distribute the load on girder. No wood bolsters are permitted except on tops of posts supporting roof girders or beams.

When steel beams and metal columns are used, same shall be properly fireproofed. It shall be permissible to

use reinforced concrete beams, girders and columns when dry or wet rot of adjacent timbers is guarded against.

(C) The sub-floors and roof sheathing shall be not less than 2½ inches thick, tongue and groove or splined. Sub-floors to be covered with a finish floor not less than ¾ inch thick. In lieu of said floors, laminated floors and roof slabs may be used when not less than 3½ inches thick. Wood stairs to have not less than 1½ inch risers and treads; stringers to be at least 2½ inches thick, spaced not farther apart than 3 feet. Landings proper to be same construction.

All openings in shaft walls, inner and outer court walls, and all exterior walls shall be protected with fire windows, fire doors, or fire shutters; such protection need not apply to openings in walls facing directly on public streets 40 or more feet in width. Solid 2-inch wood fire stops shall be provided in between all wood studs, and metal lath basket fire stops filled with concrete shall be placed between steel studs. Fire stops shall be placed at top and bottom of all studs and one between top and bottom of studs when studs exceed 9 feet 9 inches in height.

Proper provisions for swelling shall be made to prevent floors exerting a thrust against walls. Finish floors must be laid over a continuous layer of heavy waterproof building paper, joints of such paper to be lapped at least 3 inches. Mill or slow burning buildings are limited to 80 feet in height. Whenever the term "Mill Construction" or "Slow Burning Construction" is mentioned in this ordinance same shall meet the requirements in this section.

## SECTION 53.

### CLASS "C" BUILDINGS

Any building or structure in order to be classed as a Class C building or of Class C construction shall meet the following minimum requirements: All exterior walls and outer court walls to be constructed of brick, reinforced concrete, or other approved masonry, except as otherwise specified in this ordinance. All inner court walls, elevator and other shaft walls, including stair enclosure walls, shall be constructed from wood studs, metal lathed and plastered both sides, or solid wood planking at least 1½ inches thick plastered both sides, using metal lath and plaster, the planking to be tongue and groove or laminated 2-ply with joints staggered. When such inner court or shaft walls are exposed to the elements, such as a shaft open to the sky, the plastering shall be cement plaster, stucco, waterproofed and placed over waterproof paper, or in the case of studs metal lathed and back plastered with cement plaster, the plaster shall be waterproofed and other approved methods used to avoid injury from dampness. Stair halls, stair hall ceilings and stair soffits are to be protected with metal lath and plaster, stairs with open wells are prohibited in Class C buildings exceeding 2 stories in height.

The upper three stories only may have the floors and floor loads supported by bearing partitions. When building is 4 stories in height, bearing partitions are prohibited in the first story and basement. Posts and

beams and girders must be used. This paragraph shall not be deemed to prohibit masonry bearing walls or partitions. Class C buildings are limited to 60 feet in height and shall not exceed 4 stories in height exclusive of basement.

Within the Inner Fire Limits, all openings in shaft, elevator shaft, court walls and all exterior walls shall be protected with fire doors or fire windows; such protection need not apply to exterior walls facing directly on a street or yard 30 or more feet in width, measuring at right angles to the opening; the above also applies to the Outer Fire Limits excepting that outside walls will not need such protection when facing on courts, yards or streets exceeding 8 feet in width.

## SECTION 54.

### CLASS "D" BUILDINGS AND WHERE PROHIBITED

Class D buildings shall include all wooden structures, veneered structures, buildings whose outer walls and outer court walls are constructed from wood; whether plastered over metal lath or not; all sheet metal and corrugated iron buildings when supported by a wood frame, wood studs or boards, tents and canvas or fabric canopies.

All Class D buildings and structures are prohibited in the Inner Fire Limits. No Class D wagon, van, lunch room, or similar structure, whether on wheels, rollers, skids or not, shall be "permanently located" on any lot or private property in the Inner Fire Limits. For the purpose of this paragraph the term "Permanently Located" shall be deemed to mean any such structure connected with the sewer or connected with the electric light or gas service, or any such wagon, van or structure used for business, storage, office booth, shelter, cooking, dining, sleeping or living purposes, whether connected with the sewer, electricity, or gas service or not.

Class D buildings and structures are limited to 40 feet in height and shall not exceed three stories in height, exclusive of the basement.

The following shall come under Class D. construction and are prohibited in the Inner Fire Limits: Wood or combustible foundations or footings, when not below permanent water level; cloth or canvas tents or canopies, whether or not in combination with fire proof supports, frame work or other construction; wall or ceiling paper applied over cloth; wood or combustible sheds, out-houses, barns and enclosures, wood or similar combustible partitions exceeding 7 feet in height. Nothing in this paragraph shall be deemed to prohibit glass or incombustible material above such wood partitions, nor shall this paragraph be deemed to prohibit office and bank fixtures having the usual wood paneling and frame work in combination with glass, grill or open paneling.

Shaft, elevator shaft and inner court walls, when the latter are less than 10 feet in width, shall be of Class B construction, and the openings shall be fire windows or fire doors. This need not apply to dwellings or buildings under 15 feet in height.

## SECTION 55.

### CLASS "E" STRUCTURES

All Class E Structures must meet the following requirements: All foundations, footings and floors shall be of concrete or other masonry; the walls and roof shall consist of steel sheets, not less than No. 20 galvanized iron and weighing at least 1.55 pounds per square foot. The wall plates shall be made into panels not exceeding 4 feet wide and supported at regular intervals, both vertically and horizontally; the roof plates shall be similarly supported, making the panels small enough to safely support a uniform live load of 25 pounds per square foot in addition to the dead load; all plates to be lapped and jointed so as to make a watertight and neat appearing type of construction.

The wall and ceiling plates must be supported on a structural steel frame, using steel or iron columns, steel beams, girders, rafters, purlins and trusses as required; provide for all necessary wind bracing and keep all unit stresses within the limits as stipulated in this ordinance. No wood rafters, studs, sheathing or other wood supports will be permitted; provide proper means of anchoring the frame work to the masonry foundation. When a second floor is used, the floor construction shall be of steel plates on a steel frame work, or reinforced concrete.

All metal buildings known as Class E construction as herein stipulated, shall be limited to two stories in height and may be built anywhere in the City of San Diego, excepting on property bordering or facing on Broadway between Twelfth street and the Bay, or property bordering or facing on Fifth street, between Cedar and J streets.

Class E structures are limited to such uses as garages, shops, foundries, train sheds and similar industries, including the storage of incombustible material. The street fronts may have wood sash and glass windows, the surrounding panel or frame of same to be metal; all other windows, skylights, saw tooth and monitor roof sash to be metal sash glazed with wire glass. Ventilating openings to have metal louvers.

## SECTION 56.

### CLASS "F" CONSTRUCTION

The following described construction shall be known as Class F construction and the stipulations herein represent the minimum requirements: The floor shall be masonry or a slow burning wood floor may be used, consisting of a heavy plank floor at least 1 7-8 inches thick, laid on 6 inch by 6 inch redwood sleepers spaced not more than 5 feet apart, sleepers to be placed directly on the ground. The redwood sleepers may be leveled by placing redwood blocks of sufficient bearing area beneath at intervals of 5 feet or less; flooring to be tongue and groove or splined.

The side walls and roof sheathing to be 7-8 inch solid boarded and covered on the exterior with No. 26 galvanized iron or 1C tin plate, with joints well lapped or lock seamed. A neat appearing water tight piece of work is required. The rafters and ceiling joists shall be at least 4 inches by 4 inches solid timber spaced not

farther apart than 30 inches. All walls, ceilings, rafters, posts and other exposed structural wood on the interior shall be entirely concealed and protected with plaster board at least  $\frac{1}{4}$  inch thick. Sheet metal may be used in lieu of the plaster board.

Ceiling heights shall be limited to a height of 10 feet; Class F structures shall not exceed one story in height, and may be built within the Inner Fire Limits on the Municipal tide lands only. No gable roof shall have a greater pitch than 1-6 pitch. Construction under display windows shall be the same as the side walls.

## **SECTION 57.**

### **QUALITY OF MATERIALS**

All material used in the construction of buildings and structures shall in general be of good quality and suitable for the use to which they are put. The standards set forth in this ordinance shall be regarded as the minimum requirements.

## **SECTION 58.**

### **TESTS DEMANDED**

The Building Inspector may require structural and fire resisting materials to be subjected to tests to determine their quality whenever there is reason to believe the materials used do not come up to the requirements of this ordinance. The methods used for testing materials shall follow methods equivalent to those used and recommended by the American Society for Testing Materials or the Unwerwriters' Laboratories, unless otherwise noted. Tests shall be made under the direction of the Building Inspector. New methods of construction shall be subject to tests to determine their efficiency and stability. New materials may be used when found to be of quality equal to the materials permitted under this ordinance for like uses.

Gas burning and similar devices may be subjected to such tests as required to determine their safety, efficiency and their ability to avoid discharging poisonous or injurious gases. Such tests to be made in a testing laboratory of recognized standing. Properly certified reported of tests made in other cities of new structural or fire resisting materials, appliances and devices, may be accepted, provided such tests indicate proper quality and were made in a satisfactory manner.

The Building Inspector may require any tests to be repeated if there is any reason to believe that the material or appliance is no longer up to the specifications on which the approval was based.

## **SECTION 59.**

### **PORTLAND CEMENT**

Throughout this ordinance the term "cement" shall be deemed to mean Portland Cement and same shall meet specifications equal to the requirements of the current Standard Test Specifications of the American Society for Testing Materials. All cement used shall be fresh, dry cement, free from lumps. Keep same well protected against all dampness before using.

## **SECTION 60.**

### **LIME**

Throughout this ordinance the term "lime" shall be deemed to mean a well-burned quick lime, unless otherwise noted. All quicklime shall meet specifications equal to the current Standard Specifications for quicklime as recommended by the American Society for Testing Materials. Lime putty shall be free from lumps and un-slacked particles, and shall not be used within 12 hours after slaking.

## **SECTION 61.**

### **HYDRATED LIME**

Hydrated lime shall be deemed to mean a dry, flocculent powder resulting from hydration of quicklime. Hydrated lime may be used in lieu of lime putty, when practical to do so. Hydrated lime shall meet specifications equal to the current Standard Specifications for Hydrated Lime as recommended by the American Society for Testing Materials.

## **SECTION 62.**

### **SAND**

All sand used for mortar, concrete masonry work shall be river sand, bank sand, approved tested beach sand, crushed stone or gravel screenings, unless otherwise noted in detail. Sand, when dry, shall pass through a screen having a  $\frac{1}{4}$ -inch mesh, and not more than 6% shall pass through a screen having 100 meshes per lineal inch. All sand shall be free from dirt, vegetable loam, shale or other deleterious materials.

Sand shall be of such quality that when mixed in the proportions of one part of cement to three parts of sand, same shall have a tensile strength of 180 pounds per square inch at the age of ten days.

## **SECTION 63.**

### **GRAVEL: PIT RUN**

All pit or bank run gravel shall be clean bank or river gravel, graded from fine to coarse. The percentage of sand present shall not exceed 50%. Such gravel to be free from any coating of clay, oil, shale, soapstone or other deleterious materials.

Pit or bank run gravel shall be of such quality that when mixed in the proportions of one part of cement to four parts of gravel, same shall have a compressive strength of 1800 pounds per square inch at the age of 28 days. Bank or pit run gravel is hereby prohibited in all reinforced concrete work.

## **SECTION 64.**

### **CRUSHED ROCK**

All crushed rock or stone shall be clean, hard limestone, trap rock, washed gravel, hard granite, or other approved hard stone. Crushed rock to be free from slate, shale, soft sandstone, brick dirt or other deleterious materials.

Crushed rock shall be of such quality that when mixed in the proportions of one part of cement, two parts of sand and four parts of crushed rock, said mixture shall

have a compressive strength of 2000 pounds per square inch at the age of 28 days.

## **SECTION 65.**

### **CONCRETE: ORDINARY**

Ordinary or mass concrete shall be a medium wet plastic mixture, and must be placed immediately after mixing, and well tamped. No concrete to be used after initial set.

Ordinary mass concrete work such as foundations, walls, piers, footings, etc., shall be mixed in proportions of one part of cement, three parts of sand and six parts of crushed rock or screened washed gravel, when coarse aggregates having less than 50% voids are used, the proportions may be varied in proportion to the reduction of voids.

When pit or bank run gravel is used, the proportions shall be one part of cement to six parts of gravel. Concrete for ordinary concrete construction shall develop a crushing strength of at least 1500 pounds per square inch after hardening for 28 days.

Cinder concrete and mixtures of similar nature may be used for filling purposes only; same are prohibited for structural uses. Whenever the amount of concrete in any one building exceeds 100 cubic yards the concrete shall be mixed in a batch mixer. When forms are used, same shall have sufficient strength and stiffness to hold the concrete against displacement, and shall be reasonably tight to prevent leakage. Hydrated lime may be added to the above mixtures not to exceed 12% of the volume of the cement used.

For Cyclopean concrete, large stones may be embedded in the concrete, provided that no stone exceeds 2-3 the thickness of the concrete work in which the large stones are embedded; said large stones must be spaced at least as far apart as their least dimension.

## **SECTION 66.**

### **CONCRETE FOR REINFORCED CONCRETE WORK**

Concrete when used for reinforced concrete work shall be a wet plastic mixture of such consistency that tamping will readily bring water to the surface, but not wet enough to cause the coarse aggregate to have a tendency to separate and settle. The concrete shall be tamped and puddled as the work progresses. No concrete shall be placed or used after initial set.

The proportions shall be one part of cement, two parts of sand and not more than four parts of crushed rock or screened washed gravel, excepting that when rock or gravel having less than 50% of voids are used the proportions may be varied in proportion to the reduction of voids. The proportions shall be such as to produce the maximum density. The coarse aggregate shall be small enough to pass freely between the reinforcing used.

Hydrated Lime may be added to the above mixtures using not more than 4 pounds to each bag of cement used. The above mentioned concrete shall develop a crushing strength of at least 2200 pounds per square inch at the end of 28 days. Pit or bank run gravel shall not be used for reinforced concrete work. "Cement

Gun" or "Ganite" methods may be used when the stresses do not exceed those allowed in this ordinance, and provided approved engineering designing methods are used.

## **SECTION 67.**

### **CEMENT MORTAR**

"Cement Mortar" shall be made from one part of cement and not more than three parts of sand by volume. After the cement and sand have been thoroughly mixed, lime may be added in the proportion of 15% of the amount of cement used.

For the purpose of this ordinance the above mortar shall be classed and known as "Cement Mortar," and when cement mortar is required in this ordinance, it shall be unlawful to alter the above specifications for cement mortar. Cement mortar must be used before initial set.

## **SECTION 68.**

### **CEMENT LIME MORTAR**

One unit measure of lime and one unit measure of cement to six unit measures of sand shall constitute the proportions for "Cement Lime Mortar" as required in this ordinance. It shall be unlawful to alter these proportions when Cement Lime Mortar is specified. Such mortar shall be used within one hour after being made.

## **SECTION 69.**

### **LIME MORTAR**

For the purpose of this ordinance the following shall constitute the proportions for "Lime Mortar": One part of lime and not more than four parts of sand, to which shall be added cement in the proportion of 15% of the amount of lime used. When lime mortar is specified, the above proportions with cement tempering is meant. Straight lime and sand without cement tempering is hereby prohibited.

## **SECTION 70.**

### **SPECIAL MORTARS**

(A) "Gypsum Mortar" shall be composed of one part of retarded gypsum and not more than three parts of sand, with binding material when necessary. The use of this mortar is restricted to interior gypsum block partitions and gypsum block fireproofing.

(B) "Patented Bricklayers' Cement" mortar shall be made in accordance with standard approved specifications as recommended by the manufacturer of said product; when of equal strength, same may be used in lieu of Cement Lime Mortar.

(C) "Natural Cement Mortar" shall be mixed in the proportions of one part of Natural Cement and three parts of sand, and when of equal strength may be used in lieu of Cement Lime Mortar; 10% of the volume of cement may be added in the form of lime.

**NOTE:** The term "Lime" as mentioned in all mortar specifications may be in the form of lime putty or hydrated lime. Nothing in the mortar specifications shall be deemed to prohibit non-staining cement being used when reliable tests show that said mortars are not weakened by the use of such non-staining cements.

## SECTION 71.

### EXTERIOR PLASTERS, STUCCO—INSIDE LIME PLASTER

(A) "Exterior Plaster or Exterior Stucco" shall be deemed to mean any approved plaster which will not deteriorate or set up chemical action which will injure the lath or metal reinforcement when exposed to the elements. Common gypsum or gypsum hard wall plaster are prohibited for exterior plaster work, nor shall same be mixed with any cement or lime used for outdoor plastering.

The net protective thickness of the exterior plaster not including the lath beneath, shall be  $\frac{3}{4}$  inch for metal lath,  $\frac{5}{8}$  inch for wood lath and  $\frac{1}{2}$  inch for approved exterior plaster boards; said plaster boards shall average a thickness of at least  $\frac{3}{8}$  of an inch and covered on the exterior surface with a waterproof paper; all plastering applied over such plaster boards shall be reinforced with a uniform layer of galvanized chicken wire mesh, meshes to be  $1\frac{1}{2}$  inch or less.

Approved patent exterior plasters, when put on as per the manufacturer's specific directions, will be permitted by this ordinance.

(B) Exterior cement plaster or stucco shall be proportioned as follows: First coat shall be one part of cement to three parts of sand or small gravel. Lime may be used in the proportion of not more than 20% of the amount of cement used. A small amount of hair or fiber may be added.

Second coat to be one part of cement, three parts of sand, small gravel or similar coarse aggregate; lime may be used in the proportion of not more than 15% of the amount of cement used.

Third coat to be the same proportions as the second, the coarse or fine aggregate, as the case may be, may be varied in color, size and application to produce the effect desired. Coloring matter may be added throughout as desired, same to be of such nature as not to effect the strength and impervious qualities of the plaster.

(C) Some system or method of waterproofing shall be used. Hydrated lime in lieu of lime putty will meet these requirements. Except as otherwise noted exterior plaster may be applied over the following backing: Wood lath not more than 1 inch apart when reinforced with  $1\frac{1}{2}$ -inch mesh galvanized chicken wire mesh, double layer of diagonal wood lath crossing one another and spaced the width of a lath apart, solid wood sheathing, when reinforced with 1-inch mesh chicken wire netting, No. 24-gauge coated metal lath, heavy saturated felt with dovetail slats permanently fastened to the felt and nailed on in sheets, approved exterior plaster board reinforced with  $1\frac{1}{2}$ -inch mesh galvanized chicken wire netting and masonry walls. The latter shall be well-soaked before applying the plaster. Waterproof paper must be placed under all wood lath.

The backing mentioned in the preceding paragraph refers to one story buildings, excepting solid wood sheathing and masonry walls. Two story frame buildings shall have skeleton sheathing consisting of not less

than 1x4 sheathing strips spaced not farther than 6 inches apart, before the backing and stucco is applied; three story frame buildings to have the upper two stories the same, the first story solid sheathed beneath the backing and exterior plaster.

Two story frame buildings may have sheathing omitted when metal lathed, stuccoed and back plastered; the back plaster to be the same plaster as used on the exterior or may be approved cement mortar; the total thickness of stucco metal lath and back plaster to be not less than  $1\frac{1}{2}$  inches. All metal lath used to be not less than No. 24 gauge coated, painted or galvanized, and shall weigh not less than 54 ounces per square yard. All stucco shall be carefully done in a workmanlike manner, precautions being taken to prevent leaks from penetrating behind the stucco at all places where there may be a possibility for such leaks.

(D) When lime mortar or stucco is used for inside plastering, the lath must be placed not less than 3-8 inches apart.

## SECTION 72.

### MIXING MORTARS, PLASTERS AND CONCRETES

All mortars, plasters and concretes to be thoroughly and properly mixed to produce a uniform mass, adding the correct amount of clean water at the proper time. Mixing to be done in proper receptacles and not on the ground. It shall be unlawful to mix such materials directly on the public walk or pavement.

## SECTION 73.

### BRICK

Bricks which are to be used in buildings, walls, pilasters, piers, chimneys, retaining walls, etc., shall be sound, hard, burned brick of regular shape, except as otherwise noted. Said brick shall have an ultimate compressive strength of at least 2000 pounds per square inch. Second hand brick may be used when meeting the above requirements; second hand brick to be thoroughly cleaned free from mortar and dust. Brick shall not be thrown on the pavement or walks, nor dumped in such a way as to injure public property. All brick to be thoroughly wetted before using. A percentage of not more than 15% of bats will be permitted. Sound salmons not exceeding 15% will be allowed, such salmons to be placed in unimportant parts of the work.

## SECTION 74.

### STONE

Stone used in masonry work shall be sound and free from flaws which might affect its strength and durability as a building material. Ashler and other cut stone shall be laid on its natural bed. Stone having an absorption exceeding 12% shall be prohibited on important structural work; soft stone shall not be used structurally.

## SECTION 75.

### ARTIFICIAL STONE

Artificial stone, solid concrete blocks, concrete brick, and solid concrete architectural stone shall be sound,

dense material and shall have an ultimate crushing strength of not less than 1500 pounds per square inch, 28 days after being made. Special finish and plastic veneered surfaces on such stone and blocks shall be cast with the base and not plastered on after the base has fully set up. Such stone blocks, etc., shall not be dried out, but shall be allowed to set and cure under continuous dampness in a shaded place.

#### SECTION 76.

##### HOLLOW CONCRETE BLOCKS

In the case of hollow building blocks, the gross area shall be considered as the product of the length by the width of the block, no allowance being made for the air space or cells of the block. In the case of a two-piece building block, when only one piece is tested, the gross area shall be regarded as the product of the length of the block by one-half of the width of the wall for which the block is intended. If the two pieces are tested together, then the gross area shall be regarded as the product of the length of the block by the full width of the wall for which the block is intended. The effective vertical webs of all hollow concrete blocks shall be not less than 60% of the over all dimensions of the block as laid in the wall.

Hollow and two-piece hollow blocks shall have an ultimate crushing strength of not less than 700 pounds per square inch of gross area of the block when tested in the same position as when laid in the wall. Tests to be made of not less than six specimens taken from the ordinary commercial stock. The absorption at 28 days must not exceed 12%. Concrete blocks are not to be dried out. Same must be allowed to set and cure under continuous dampness in a shaded place.

Concrete blocks are to be uniform and true to size and of such design that all effective bearing webs will come one above another when laid in the wall. Broken or damaged blocks delivered on the job will be prohibited in bearing walls and other supporting members. A brand or mark of identification shall be impressed in or otherwise permanently attached to each block by the maker thereof.

#### SECTION 77.

##### HOLLOW TILE: COMMON

Common Hollow Tile shall meet the requirements mentioned in this section. The term "Gross Area" shall be deemed to mean the product of the length by the width of the block, no allowance being made for the air space or cells of the tile. All hollow tile are to have shells and webs so arranged that the effective bearing shells and webs come one above another when laid in the wall. The total volume of cellular spaces within the tile must not exceed 55% of the gross volume of the tile.

Common Hollow Tile shall have an ultimate crushing strength of not less than 700 pounds per square inch of gross area when tested in the same position as when laid in the wall. The absorption must not exceed 15%. Tests to be made on not less than 6 specimens taken from the ordinary commercial stock.

Common Hollow Tile are to be uniform, true to size and free from cracks and other imperfections of a dele-

terious nature when used in walls and other bearing members. A brand or mark of identification shall be impressed in or otherwise permanently attached to each tile by the maker thereof.

#### SECTION 78.

##### HOLLOW TILE: HEAVY DUTY

Heavy Duty Tile shall meet the requirements in this section. The term "Gross Area" shall be deemed to mean the product of the length by the width of the block, no allowance being made for the air space or cells of the tile. Heavy Duty Tile are to be of such design that all effective bearing webs and shells will come one above another when laid in the wall.

The total volume of cellular spaces within heavy duty tile must not exceed 45% of the gross volume of the tile. The maximum NET horizontal section of the tile shall be at least 37 1/2 % of the gross horizontal section; section to be taken horizontally through the thinnest part of the vertical webs and shell. Heavy duty tile shall have an ultimate crushing strength of not less than 1000 pounds per square inch of gross area when tested in the same position as when laid in the wall; the absorption shall not exceed 15%. Test to be made on not less than 6 specimens taken from the ordinary commercial stock.

Heavy duty tile having an absorption of less than 10% will be permitted in foundations for residences, dwellings and frame buildings not exceeding two stories in height exclusive of the basement, the minimum thickness of such foundations to be 8 inches for one story buildings and 12 inches for two story buildings. A concrete footing of at least 6 inches thick shall be provided under all such foundations.

Heavy duty tile are to be uniform, true to size and free from cracks and other imperfections of a deleterious nature when used in walls or other bearing members. A brand or mark of identification shall be impressed in or otherwise permanently attached to each tile by the maker thereof.

#### SECTION 79.

##### TIMBER

All structural timbers, wooden girders, beams, joists and posts used in structures shall be of sound material, free from rot, large and loose knots, shakes, or any imperfection whereby the strength may be seriously impaired.

#### SECTION 80.

##### CAST IRON

Cast Iron shall be of good foundry mixture, producing a clean, tough, gray iron. Casting shall be free from blow-holes, cinder spots and cold shuts. Cast iron shall conform to specifications equal to the current Standard Specifications of the American Society for Testing Materials for medium gray iron castings.

#### SECTION 81.

##### STEEL CASTINGS

Steel castings shall be made from open hearth steel of soft or medium grade, and shall be practically free from

blow-holes. Steel castings shall conform to specifications equal to current Standard Specifications of the American Society for Testing Materials for soft or medium steel castings.

## SECTION 82.

### STRUCTURAL STEEL AND WROUGHT IRON

All structural steel, rivet steel and wrought iron shall meet specifications equal to the current Standard Specifications of the American Society for Testing Materials. All such steel and iron shall be delivered on the job, free from scale, and loose or injurious rust.

## SECTION 83.

### STEEL FOR CONCRETE REINFORCEMENT

All steel used in reinforced concrete shall meet specifications equal to the requirements of the current Standard Specifications for Billet-Steel and Rail Steel concrete reinforcing bars, as adopted by the American Society for Testing Materials. Reinforcing steel to be free from scale and loose or injurious rust.

## PART THREE

### HEIGHT OF STORIES, WALLS, VENEERING AND MASONRY IN GENERAL

## SECTION 84.

### HEIGHT OF STORIES, HEAVY DUTY BUILDINGS

In estimating the thickness of wall required for Heavy Duty Buildings, the stories must not exceed the following clear heights unless walls are increased in thickness as noted under special section elsewhere herein.

Basement .....	14 feet
First Story .....	18 feet
All upper stories, excepting top story .....	12 feet
Top story when ceiling joists are used .....	13 feet
Top story when no ceiling joists are used .....	16 feet

## SECTION 85.

### HEIGHT OF STORIES, LIGHT DUTY BUILDINGS

In estimating the thickness of wall required for tenement houses, hotels, hospitals, asylums, private garages, flats and dwellings, the stories must not exceed the following clear heights unless walls are increased in thickness as noted under special section elsewhere herein.

Basement .....	11 feet
First Story .....	14 feet
Second Story .....	12 feet
Third Story .....	11 feet
All upper stories, excepting top story .....	11 feet
Top story when ceiling joists are used .....	12 feet
Top story when no ceiling joists are used .....	14 feet

## SECTION 86.

### THICKNESS OF BRICK WALLS, PARTY WALLS

Party walls for all buildings including Heavy and Light Duty Buildings shall not be less than shown in the following table:

## Party Walls

Stories, H'ght.	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
One .....	16-in	12							
Two .....	16-in	16	12						
Three .....	20-in	16	16	12					
Four .....	20-in	20	16	16	12				
Five .....	24-in	20	20	16	16	12			
Six .....	24-in	24	20	20	16	16	12		
Seven .....	28-in	24	24	20	20	16	16	12	
Eight .....	28-in	24	24	24	20	20	16	16	12

Joists and wood timbers in party walls and division fire walls shall have at least 8 inches of solid masonry between them and any other joist or timber. All party walls must be solid masonry walls.

## SECTION 87.

### THICKNESS OF BRICK WALLS FOR HEAVY DUTY BUILDINGS

The thickness of all external and bearing walls of all buildings, excepting party walls and as otherwise noted in this ordinance, shall be not less than shown in the following table:

## Walls for Heavy Duty Building

Stories, H'ght	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
One .....	16-in	12							
Two .....	16-in	12	12						
Three .....	20-in	16	12	12					
Four .....	20-in	16	16	12	12				
Five .....	24-in	20	20	16	16	12			
Six .....	24-in	20	20	20	16	16	12		
Seven .....	24-in	24	20	20	20	16	16	12	
Eight .....	28-in	24	24	20	20	20	16	16	12

Eight inch walls, properly stiffened with pilasters, may be used for one story buildings.

## SECTION 88.

### THICKNESS OF BRICK WALLS FOR LIGHT DUTY BUILDINGS

Unless otherwise noted the thickness of all external and bearing walls for all tenement houses, hotels, hospitals, asylums, flats, dwellings and private garages and similar light duty buildings, shall be as shown in the following table:

### Walls for Light Duty Buildings

Stories, H'ght.	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
One	12-in	8							
Two	16-in	12	8						
Three	16-in	12	12	8					
Four	16-in	16	12	12	8				
Five	20-in	16	16	16	12	12			
Six	20-in	20	16	16	16	12	12		
Seven	24-in	20	20	20	16	16	12	12	
Eight	24-in	24	20	20	20	16	16	12	12

Private residences and dwellings may have the upper two stories constructed from 8 inch brick walls when walls are properly stiffened with pilasters, or equivalent, and the height of building does not exceed three stories.

### SECTION 89.

#### THICKNESS OF BRICK WALLS FOR NON-BEARING WALLS

All non-bearing walls when properly anchored at each floor level, shall be not less than shown in the following table, unless otherwise specified in detail. Non-bearing walls are to be used as elevator enclosures, chimneys, partitions, etc., but shall not support any load or floor load.

#### Non-Bearing Walls

Stories, H'ght.	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
One	12-in	8							
Two	12-in	8	8						
Three	12-in	12	8	8					
Four	12-in	12	12	8	8				
Five	16-in	12	12	12	8	8			
Six	16-in	16	12	12	12	8	8		
Seven	16-in	16	16	12	12	12	8	8	
Eight	20-in	16	16	16	12	12	12	8	8

### SECTION 90.

#### THICKNESS OF WALLS INCREASED; WHEN

(A) When any story exceeds the heights as mentioned under headings, "Height of Stories Light and Heavy Duty Buildings, Etc." walls of such stories shall be increased 4 inches for every additional 16 feet in height or fraction thereof, and wall below said story shall be increased proportionately.

(B) Whenever the clear span between enclosing bearing walls of masonry exceeds 30 feet, the thickness of

such walls shall be increased 4 inches over the minimum allowable thickness herein given, unless adequate piers, pilasters, buttresses or cross-walls are provided.

(C) All walls exceeding 140 feet in length between masonry cross-walls, adequate piers or buttresses shall be increased at least 4 inches in thickness over the minimum allowable thickness as herein given.

(D) Whenever the horizontal section through a masonry bearing wall shows more than 30% of openings, such part of the wall where excessive openings exist shall be increased 4 inches over the minimum requirements; this clause applies to walls laid up in lime mortar. When side walls are laid up in cement-lime mortar 40% of openings, and when laid up in cement mortar, 50% of openings will be permitted through any horizontal section of the wall, before an increase in thickness is required.

(E) Under no condition shall any 8 inch solid bearing wall have a greater length than 50 feet, unless solid masonry piers be added, said piers to be not less than 12x20 inches and spaced not farther apart than 50 feet. A substantial crosswall tied or thoroughly bolted to such 8 inch walls will be accepted in lieu of a pier. Nothing in this paragraph shall be deemed to eliminate the necessary piers under trusses or girders.

(F) All walls must be of sufficient thickness to insure stability and support their loads without exceeding the unit stresses specified in this ordinance. Under no condition shall any wall have a greater thickness than the walls supporting same below. In case a wall is increased in thickness in accordance with any one of the requirements mentioned in this section, it shall not be necessary to further increase the thickness to meet other requirements mentioned in this section unless the safety of the wall so demands.

### SECTION 91.

#### EXISTING PARTY WALLS

Existing party walls originally built as party walls, may be used if in good condition, provided the thickness is not less than 12 inches of solid masonry, and that it can be shown to the satisfaction of the Building Inspector that such walls will carry the loads to be placed thereon without exceeding the unit stresses allowable in this ordinance.

The use of an adjacent building wall as an enclosure wall is prohibited unless there be a party wall agreement, and the adjacent wall is approved as a party wall. No existing party wall shall be less in thickness relative to story-heights than required for heavy duty buildings in this ordinance.

### SECTION 92.

#### INCREASING HEIGHT AND THICKNESS OF EXISTING WALLS

(A) When existing walls are increased in height and such walls are less in thickness than required according to the ordinance, the increase shall be made by lining the wall to form a combined thickness with the old wall of not less than 4 inches more than is required for a new

wall. Such lining shall rest on a proper foundation of sufficient size to take care of the added load and not exceed the safe bearing capacity of the soil. Said added lining to be laid up in cement-lime mortar or better, and bonded to the original wall with not less than 5-8 inch expansion or through bolts spaced not farther apart than 5 feet in any direction.

(B) In lieu of the above, the weight of the added walls and construction above may be carried on a rigid connected frame of steel girders, beams, and columns securely anchored to the existing walls and extending to an independent foundation, or a reinforced concrete frame may be used instead of the steel frame, when properly tied to the existing structure and resting on an independent foundation.

### SECTION 93.

#### PILASTER MASONRY WALLS

When in place of uniform walls, pilasters or piers are used, the required thickness of each story may be reduced by one-half the thickness added to the pilasters or piers, provided that no wall between pilasters or piers is made less than 8 inches thick. Said piers or pilasters shall be at least one-tenth as wide as the spaces between them.

### SECTION 94.

#### PARAPET AND FIRE WALLS

All parapet and fire walls above roof or upper ceiling line, shall be at least 8 inches thick. When parapet and fire walls have a height, above the roof, exceeding 5 times their least thickness, same shall be tied back to roof with  $\frac{3}{4}$  inch tie rods spaced not more than 8 feet apart, or suitable pilaster stiffeners may be used; steel tie rods when used shall be painted at regular intervals to prevent rusting.

Interior division and bearing walls which extend to the upper ceiling must extend through the roof and be topped out by a fire wall. All enclosure walls are to have parapet walls allowing sufficient openings for escape of the roof drainage to appropriate down spouts; provided, however, where there is a public alley or 15-foot rear yard, the parapet may be omitted over alley or rear yard wall. Parapet and fire walls above roof shall be laid up in cement-lime mortar or better. A coping must be provided in every case. Coping to be cast iron, stone, terra cotta, how-lock brick, or a two-inch cement mortar coping troweled smooth on top, copings to have slope to shed water back to roof.

Except as otherwise noted, parapet and fire walls are to have a minimum height of not less than two feet above the roof surface. Parapets along street fronts may be not less than 16 inches above the roof. Parapets for residences, private garages and other domestic buildings need not exceed 14 inches above the roof. Nothing in this section shall be deemed to apply to buildings with fire proof or Class A constructed gables, hip roofs, or incombustible mansard roofs. Dwellings outside of the

Inner Fire Limits may be built without fire walls or parapets, when gable, hip or mansard roofs are used.

### SECTION 95.

#### BRICK MASONRY

Two story solid brick walls may be laid up in cement tempered lime-mortar when stress on masonry does not exceed 100 pounds per square inch. All buildings exceeding two stories in height shall have all walls laid up in cement-lime mortar or better, excepting that where the walls are subjected to stresses exceeding 150 pounds per square inch cement mortar shall be used. All isolated piers, pilasters or jambs supporting lintels over a large span shall be laid up in a cement-lime or cement mortar as required to keep the stresses within the safe limits allowed in this ordinance. Lime mortar is prohibited in all isolated piers regardless of height.

All brick are to be well-wetted before being laid; every seventh course to be a header course; all joints to be slushed full of mortar. When Flemish bond is used the headers in every third course shall be full header bond brick. When face brick or Ashler are tied to backing with metal ties, at least one heavy galvanized approved metal wall tie shall be used to each square foot of wall surface. No wall shall be carried up more than story high in advance of any other wall, unless proper provision for suitable anchors and ties are made as approved. The walls and piers of all buildings shall be stoutly braced and tied until building is enclosed.

All masonry work shall be built plumb and true. The pilasters, buttresses, walls, corners and cross walls shall be properly bonded together. No masonry walls, or piers shall be supported on any wood lintel, beam or wood post. A row of headers shall be placed under all joists and beams. Wood bearing plates for joists or any other purpose built into or made a part of any masonry wall are prohibited and will be sufficient cause for condemning the work. Carefully build in all anchors enclosing the ends of same in solid masonry; proper and sufficient anchors shall be provided for the joists, beams and girders.

### SECTION 96.

#### STONE WALLS

Rubble or rustic boulder stone walls are prohibited in buildings exceeding three stories in height. Bearing stone walls of rubble or boulder masonry shall be at least 4 inches more in thickness than required for brick walls under similar conditions, excepting that under no conditions shall such stone walls be less than 16 inches thick. Non-bearing walls to be not less than 12 inches thick and shall not have a greater height than 16 times the minimum thickness.

Use the general precautions in workmanship as required for brick work under similar conditions. All stone and spalls to be well bedded in mortar and all joints slushed full. Through bond stones or approved equivalent shall be provided, said bonding to be not more than three feet apart, measured in any direction. Mortar for rubble and boulder masonry to be cement-lime or

better, the pointing up to be done with cement mortar.

Cut stone and other ashler with dressed joints and dressed beds will be permitted to be the same thickness as solid brick walls under the same conditions, provided that all beds are level and joints plumb, the beds and joints to be completely filled with mortar. At least every second face stone shall be a through header or through bond stone. The length of the stone on the bed shall be not less than one and one-half times nor more than three and one-half times the height. Mortar to meet the same requirements as required for brick work.

## SECTION 97.

### CONCRETE WALLS

Plain concrete bearing and enclosing walls may be 2 inches less in thickness than solid brick walls under similar conditions; provided, however, that no plain concrete bearing or enclosure wall shall be less than 8 inches thick.

Concrete walls when reinforced both horizontally and vertically with  $\frac{3}{8}$ -inch square or equivalent deformed steel, spaced not more than two feet on center, may be 4 inches less in thickness than required for solid brick walls under similar conditions; provided, however, that no such reinforced walls shall be less than 6 inches thick. At least two rods shall be placed in all jambs, concrete mullions and lintels.

All lintels over openings, in such walls as mentioned in this section, shall be designed as regular reinforced concrete lintels. All concrete walls whether reinforced or not, when less than 12 inches thick, shall be stiffened with 12x18 solid concrete piers spaced not more than 50 feet apart for walls 8 inches thick and over, and not more than 25 feet apart for walls under 8 inches thick. All walls mentioned in this section shall not be used for buildings exceeding three stories in height.

## SECTION 98.

### HOLLOW TILE WALLS

(A) Buildings with hollow tile bearing walls are limited to one story in height when located within the Inner Fire Limits, and shall not exceed three stories when located outside the Inner Fire Limits. The clear story heights shall not exceed 14 feet for the first story, 12 feet for the second, and 11 feet for the third; provided, however, that in one-story buildings with trusses overhead the story height may be measured in the clear below main bottom chords of the trusses when the said trusses rest on solid masonry piers built in the outside walls.

No 8-inch hollow tile wall shall have a greater length than 24 feet unless reinforced with a 12x20-inch solid masonry pier, such piers shall be not more than 24 feet apart. Cross walls or substantial rigid partitions may be used in lieu of the piers; when such partitions are used they shall be securely bolted to the hollow tile walls, using at least three  $\frac{1}{2}$ -inch bolts in each story height; end studs adjacent to the tile wall to be doubled. Cross walls and angles shall have full masonry bond with abutting or intersecting walls. When hollow tile walls are

faced with brick or stone and such facing is continuously bonded every 18 inches in height with the hollow tile, using solid masonry bonding which laps onto hollow tile wall at least 4 inches, the facing may be figured as a part of the wall.

(B) All lintels are to be reinforced concrete or steel. Reinforced concrete filled tile may be used for spans not exceeding 5 feet when the reinforced rods are not less than  $\frac{1}{2}$ -inch square deformed steel bars. Solid brick arches may be used when they start on solid masonry skewbacks. Heavy concentrated loads, ends of girders, and trusses shall be supported on appropriate solid masonry piers or approved equivalent.

All mortar used in hollow tile masonry shall be cement-lime mortar or better. Hollow tile walls and other masonry in conjunction therewith shall be carefully executed, using the same general precautions and workmanship as required for brick masonry except as may be otherwise stipulated in this section. All joists and rafters shall rest on solid masonry plates consisting of at least two courses of brick, one header and one stretcher course, 4 inches of concrete, or solid tile plates at least 2 inches thick; said joist and rafter plates to be at least 8" wide spaces between joists to be solidly filled with brick or concrete masonry for full depths of joists where they rest on the walls. Beams, girders and trusses must have steel or iron bearing plates in addition to the solid masonry wall plates. Buildings exceeding two stories in height shall have a reinforced concrete belt all around on outside walls and placed under second floor joists, belt to be at least 8x8 inches and to be reinforced with two  $\frac{1}{2}$ -inch square continuous rods, lapped 18 inches at splices.

(C) Hollow tile walls laid up with the cells vertical shall have solid masonry belt or bond course every fourth tile in height, said bond course shall be the same thickness and material as required for solid masonry bearing plates in the preceding paragraph; or a mesh bond may be used in lieu of the masonry bond, provided that the mesh be galvanized No. 20 gauge  $\frac{1}{4}$ -inch mesh hardware cloth full width of wall and well bedded in mortar. Carefully build in all anchors, placing solid masonry around same. All hollow tile walls to be used for light loading only. (See heading "Allowable Stresses for Masonry.")

## SECTION 99.

### THICKNESS OF HOLLOW TILE WALLS

(A) Unless otherwise noted, the thickness of Common Hollow Tile walls, exclusive of the piers, shall be not less than 12 inches for the first story, 12 inches for the second story and 8 inches for the third story in the case of three-story buildings. Twelve inches for the first story and 8 inches for the second story, in the case of two-story buildings, and 8 inches for one-story buildings.

(B) Unless otherwise noted, the thickness of Heavy Duty Tile walls, exclusive of the piers, shall be not less than 12 inches for the first story, 8 inches for the second story and 8 inches for the third story in the case of three-story buildings, 8 inches for the first story and

8 inches for the second story in the case of two-story buildings; and 8 inches for one-story buildings.

When story heights exceed the limits as specified in the preceding section under heading "Hollow Tile Walls," the thickness of walls must be increased 4 inches for each 12 feet or fraction thereof added to the height limit as scheduled in said section. When necessary to increase the thickness of hollow tile walls, the walls in stories below shall be proportionately increased.

When gable, hip and mansard roofs rest on hollow tile walls, the walls shall have a top bearing plate at least 2x8 inches, securely bolted to wall, using ½-inch bolts spaced not farther than three feet apart, said bolts to be buried in at least 6 inches of solid masonry below the plate. Hollow tile piers, buttresses and pilasters, supporting heavy loads, are prohibited. All hollow tile walls shall be used for light loading only. (See under heading "Allowable Stresses for Masonry.")

## SECTION 100.

### HOLLOW CONCRETE BLOCK WALLS

Hollow concrete blocks when up to the requirements of this ordinance, will be classed the same as Common Hollow Tile and all requirements of the latter, when laid in the wall, will also apply to Hollow Concrete blocks. Hollow concrete block masonry must meet the same specifications as laid down for Common Hollow Tile Masonry.

## SECTION 101

### HOLLOW BRICK WALLS

(A) Ten-inch hollow brick walls with 2-inch hollow space and 8-inch solid brick walls, will be accepted as equal to Heavy Duty Tile walls and may be laid up under the same conditions.

(B) "Shiner Rowlock" hollow walls, also called "Ideal" Hollow walls, will be accepted as equal to Common Hollow Tile walls and may be laid up the same thickness under the same condition. Said walls when 8 inches thick shall be constructed with an internal hollow space not exceeding 4 inches; the brick to be set on long edge forming a total thickness of 8 inches. Every other brick in every course shall be a through rowlock header, staggered between the rowlock headers in course immediately below. Twelve-inch walls shall be constructed similar to the 8-inch walls, excepting that there shall be three longitudinal webs, two outer and one center web, such webs to be brick laid on long edge; the rowlock headers to lap side by side on the center web. Such 12-inch walls to have two hollow spaces not more than three inches wide.

(C) All mortar to be "cement lime" mortar, three rows of solid brick work or solid concrete 6 inches high or approved equivalent shall be used under all floor, ceiling and roof joists. Solid masonry shall be used between all joists for the full depths of joists.

## SECTION 102.

### SIX-INCH WALLS

(A) Six-inch hollow tile or six-inch brick walls are prohibited in all structures excepting in the following

described structures only: One-story private residences, private garages, sheds, chicken houses and outhouses, and then only under the following described conditions: No such structure shall have a greater area than 500 square feet; the exterior of six-inch walls must be uniformly plastered with ½-inch of cement plaster when used for residences and private garages. No dwelling or residence having walls less than 8 inches in net thickness will be permitted in the Inner Fire Limits.

Six-inch walls must be laid up with "cement lime" mortar; no floor joists shall rest on a 6-inch hollow tile or brick wall. The total height of 6-inch walls shall not exceed 13 feet, the height to be measured from the top of main foundation to the highest point on the parapet or fire wall. When hollow tile or cement block walls are laid with cells vertical, every THIRD course shall have a continuous metal bond consisting of No. 20-gauge galvanized ¼-inch mesh hardware cloth at least 5 ¾ inches wide, well bedded in mortar.

In the case of flat or low pitch lean-to roofs, the roof joists shall rest on a solid masonry or solid tile plate at least 2 inches thick and 6 inches wide. Each joist shall be anchored to the wall by a heavy spike driven in the side of the joist; spike to be built in the wall, using solid masonry around same. When gable, hip and mansard roofs rest on 6-inch walls, a 2x6 bearing plate shall be provided, plate to be securely bolted to the wall, using ½-inch bolts not more than 3 feet apart, bolts to be buried in 4 inches of solid masonry below the plate.

(B) Wood partitions and jambs shall be anchored to the masonry walls using bolts not more than three feet apart or approved equivalent methods of anchoring may be used. Jambs for garage door openings over 4 feet wide shall be not less than 3x5 inches in their least dimensions. No return angle or end masonry jambs shall be less than 12 inches wide. Six-inch brick walls to be laid up, using two shiners high on one side to three stretchers high on the other side, and then the same process reversed above and so on full height of wall. Except as otherwise noted in this section, the general precautions and workmanship of brick and tile walls shall be followed. Nothing in this section shall be deemed to prohibit the building of two or three buildings of 500 square feet area each, side by side, and joining them together by door openings. The division walls between shall be masonry not less than 8 inches thick.

## SECTION 103.

### PANEL WALLS

Except as otherwise noted, all panel walls shall be 8 inches thick when of hollow tile or brick. Panel or enclosure walls of skeleton constructed buildings shall be supported by girders or beams. When the vertical distance between supports exceeds 20 feet the thickness of walls shall be increased 4 inches. Walls must be anchored at columns, using metal anchors every foot in height or equivalent. Veneering at columns, beams and girders to be at least 4 inches and anchored to structural members not more than 14 inches apart measured in any direction. The same system of bonding to be used as required for regular hollow tile or brick walls. Wood

and other combustible lintels are prohibited. Masonry mullions under two feet in width must be solid masonry when less than 12 inches thick. Cement-lime mortar or better to be used in every case. Panel walls for skeleton constructed private residences, like duty one-story residences, light duty one-story store buildings, private garages and private out-building may be not less than 6 inches thick when located outside the "Inner Fire Limits."

## SECTION 104.

### MASONRY PARTITIONS

Interior non-bearing masonry partitions to be straight and true to line and tied or otherwise fixed at walls and ceilings to prevent displacement. Masonry partitions are not to have a bearing on wood or other combustible material. Door and other opening bucks are to be properly tied to partitions every two feet or less, using metal ties, anchors or equivalent. Metal lath strips must be placed over all cracks at bucks and adjacent construction.

No gypsum, hollow tile or concrete partition shall have a greater height than 40 times their least thickness, and no reinforced concrete partition shall have a greater height than 50 times its least thickness, excepting, however, that no masonry partition shall be less than three inches in thickness. All gypsum block, hollow tile and cement block partitions shall be increased 1 inch in thickness over the above minimum requirements when not plastered both sides. Two-inch solid plastered partitions reinforced with metal lath and  $\frac{3}{4}$ -inch steel studs will be permitted up to a height of 14 feet. When more than 14 feet in height the steel studs shall be increased in size.

Four-inch tile or brick interior partitions when provided with masonry footings and when not exceeding 10 feet in height may be used to support very light roof and ceiling loads in one-story dwelling and private garages only; openings in same, however, must be stiffened with full size rough buck jambs rigidly secured at walls, floor and ceiling, buck jambs to be at least 2x4 fir, pine, hemlock or oak.

## SECTION 105.

### FACING OF WALLS AND BONDING

Except as otherwise noted, all brick walls shall be bonded ever seventh course or less with full header courses, or Flemish bond may be used every third course. Brick facing not so bonded with the backing of common brick shall not be counted as forming a part of the wall thickness. Walls faced with cut stone, terra cotta or similar materials may be classed as part of the wall thickness when facing is at least 4 inches thick; provided such facings have full masonry bond with the backing equivalent to the above. This paragraph also applies to facing on hollow tile and cement block walls.

All brick, cut stone, terra cotta and similar facings, when not bonded to backing with full masonry bond, shall be anchored to the backing, using galvanized iron anchors at least  $\frac{1}{2}$ -inch thick or approved equivalent; anchors to be spaced not more than 14 inches apart measuring both horizontally and vertically. Facing thus an-

chored must not be figured as forming a part of the thickness of the wall to which it is anchored.

## SECTION 106.

### VENEERING

Veneered walls exceeding two stories in height are prohibited unless the first story veneering is at least 8 inches thick, in which case the veneered wall shall not exceed three stories in height. No veneering shall be supported on wood posts, wood beams or wood lintels. Veneered buildings are classed as Class D buildings and are prohibited in the Inner Fire Limits. Rubble, boulder or rustic stone veneering shall be not less than 8 inches thick, excepting in the case of a three-story building; the first story veneering must be at least 10 inches. The net thickness of stone wall, not including the projection beyond mortar joints, shall constitute the proper measurement for thickness.

All brick and hollow tile veneering shall be at least 4 inches thick, except as otherwise noted. Three-inch hollow tile veneering may be used on one-story buildings only where the height of wall does not exceed 14 feet. All mortar to be cement-lime mortar or better, all joints and beds to be slushed full; pointing up for stone work to be done with cement mortar.

Veneered buildings exceeding one story in height shall be sheathed solid, using boards at least  $\frac{3}{4}$ -inch thick, securely nailed to studs. One-story buildings to be sheathed with skeleton wood sheathing consisting of 4-inch boards spaced not more than 4 inches apart or 3-inch boards spaced not more than 3 inches apart. All veneering to be securely anchored to the frame work and sheathing, using  $\frac{1}{8}$ -inch galvanized bond wires well bedded in the mortar and secured to the frame (20d) spikes may be used. All anchors to be spaced not more than 12 inches apart, measuring both horizontally and vertically.

## SECTION 107.

### RECESSES AND CHASES

Recesses in walls to provide for stairways or elevator shafts will be permitted, provided the remaining thickness of wall is at least 8 inches for the upper 30 feet, 12 inches for the next lower 50 feet, and 17 inches for the walls and foundation below. No pipe chase shall extend into the wall more than one-half of the required thickness of the wall. No horizontal chase shall exceed 6 feet. Chases shall not reduce the required area of any pier or pilaster; chases or recesses in hollow walls shall not be made by cutting or injuring the strength of the wall; said hollow wall chases shall be located beforehand and built in the wall as the masonry work progresses. Metal sleeves shall be provided around pipes at each floor level, and the chases around same shall be filled with solid masonry or concrete to form a fire stop.

## SECTION 108.

### MASONRY OFFSETS AND PROJECTIONS

When an offset or corbel is used in any masonry work, including chimneys and walls, the offset shall not exceed one inch for each course of brick, in the case of

brick masonry, or its structural equivalent in other forms of masonry. No flue or chimney shall be corbeled over for more than 1-3 of its width.

Stone, terra cotta or other masonry belt courses and cornices shall not project beyond face of wall a greater distance than  $\frac{1}{2}$  of its bearing on the wall, unless the tendency to overturn is fully and safely counteracted by weight of wall above, or taken care of by tie rods or other approved forms of anchoring.

## SECTION 109.

### FURRING AND NAILING BLOCKS

Porous terra cotta, patented nailing plugs and wood nailing blocks will be permitted in masonry work for the purpose of fastening of grounds, finish and frames; said plugs, etc., shall be well bedded in mortar. Wood nailing blocks shall not exceed 2x4x8 inches in size and must be slightly wedge or dovetail shape to prevent displacement when shrinking. Blocks with nails driven partly home will be accepted in lieu of wedge-shaped blocks. All blocks and plugs to be placed in such a way as not to injure the structural strength of the walls. One-half by one inch strips may be built in joints for nailing strips. Wood bearing plates built in masonry walls are prohibited.

## SECTION 110.

### RETAINING WALLS

Walls built to retain or support adjoining earth, rock or sand, including foundation walls, subjected to pressure from adjoining earth, rock or sand, shall be masonry or reinforced concrete and so designed that in resisting the pressures to which they are subjected, including any water pressure that may exist, the working stresses of the materials shall not be exceeded, the soil shall not be overloaded and the stability of the wall shall be insured. All retaining walls and breast walls which exceed 3 feet in height at any point shall have the design and specifications approved by the Building Inspector before any construction shall commence, and if required by the Building Inspector the method of computation and calculations governing the design shall be submitted with the drawings. A retaining or breast wall exceeding 24 inches in height will require a permit before work is started; permit to be charged for in the same manner as a building permit.

Retaining and breast walls shall be provided with a drainage system. Weep holes shall be not less than 3 inches inside diameter and spaced not more than 8 feet apart near bottom of wall. Hollow block or other hollow walls, or walls with air cells, are prohibited, unless all such hollow spaces are filled with concrete making a solid; masonry wall. Retaining and breast walls must extend at least one foot below the surface of the ground or same may rest on concrete footings which extend below the ground not less than one foot, provided the retaining wall is properly anchored to the footing.

Concrete retaining or breast walls exceeding 25 feet in length shall be provided with expansion joints or properly reinforced with solid steel rods sufficient in number

and area to take care of the temperature stresses. When the rods extending back to dead men are used, the tie rods must be protected with at least 6 inches of dense concrete. All dead men to be masonry or cast iron; no tie rod to be less than  $\frac{3}{4}$ -inch in diameter. Pipes and conduits are prohibited as reinforcement in reinforced concrete. Gravity retaining walls shall be not less than 6 inches at the top; the bottom shall be at least 35% of the height. Other shapes of gravity retaining walls may be used when equivalent in stability. Breast walls may be less in size and weight when the nature of the embankment and soil permits.

## SECTION 111.

### MASONRY PIERS: ISOLATED

Isolated masonry and plain concrete piers and piers tied or anchored in part on one side only, shall not be stressed higher than values given by the following formula, when the height exceeds 8 times their least lateral dimensions.

$$S \text{ equals } C \left\{ 1.25 - \frac{H}{20.D} \right\}$$

"S" equals the allowable stress.

"C" equals the allowable stress on short piers.

"H" equals the height of pier in feet.

"D" equals the least lateral dimension in feet.

Hollow tile or other hollow piers or pilasters supporting concentrated loads or acting as stiffeners to walls are prohibited.

## SECTION 112.

### ALLOWABLE STRESSES FOR MASONRY

The maximum allowable working stress in pounds per square inch for masonry walls, piers and pilasters, shall be as follows:

	Kind of Mortar Used			
	Mortar Lime	Cement-lime Mortar	Cement Mortar	
Common kiln run brick	100	150	200	
Common select extra hard brick	125	175	225	
Stone rubble, irregular	75	100	125	
Cobble or boulder stone masonry	—	50	80	
Sand stone ashler with full beds	—	250	300	
Granite ashler with full beds	—	300	500	
Lime stone with full beds	—	300	400	
Common hollow tile, gross area	—	50	60	
Heavy duty hollow tile, gross area	—	80	90	
Hollow concrete blocks, gross area	—	50	60	
Plain concrete, 1:3:6 mix, measured proportions	—	—	300	
Plain concrete, 1:2:4 mix, measured proportions	—	—	400	
Plain concrete, 1:6 mix, pit or bank run gravel	—	—	200	

## PART FOUR

### FLUES, THIMBLES, FIRE PLACES, CHIMNEYS, FURNACES, GAS VENTS, RANGES, GAS BURN- ING DEVICES, BOILER ROOMS, ETC.

#### SECTION 113.

##### FLUES AND SMALL CHIMNEYS

(A) All chimneys shall be of brick masonry, reinforced concrete or equivalent approved masonry. Flue walls shall be at least 4 inches in thickness, when of brick, solid concrete block or other masonry units; flue walls and chimneys must be laid up in cement-lime mortar or better. Except as otherwise noted every flue must be lined with fire clay or terra cotta flue lining. A 2-inch brick lining may be used in lieu of flue lining. Flues which carry off the fumes or smoke from coal, wood, crude oil or equivalent, shall be not less than 7½ inches minimum inside diameter. When the total height of any flue, measuring from footing to top, does not exceed 26 feet, and when such flue is not used for any heat producing device larger than an ordinary domestic cooking range or hot air furnace, the flue lining may be omitted, provided that such flue is plastered on the inside from bottom to top with a uniform smooth coat of cement-lime mortar ¾ inch thick.

Monolithic concrete chimneys may be used when the walls are at least 4 inches thick and lined with regular flue lining; when flue lining is omitted, the concrete flue must be reinforced with ¾ inch rods spaced 3 inches apart, both vertically and horizontally, or the equivalent area of reinforcing may be used in the form of wire fencing or mesh. Hollow tile and hollow concrete block flues may be used when lined with regular flue lining. All flue lining must begin at least 6 inches below lowest thimble and extend full height of flue.

(B) Where unlined flues and chimneys pass through floors and ceilings, same shall be plastered on the outside with mortar ¾ inch thick; properly flash at roofs. Chimneys and flues in all buildings exceeding one story in height shall start on concrete or masonry footings; footings to be at least 12 inches deep and must project 6 inches beyond the chimney on all sides.

Chimneys for one story dwellings must start at least 26 inches below ceiling line when resting on four 2x4 posts, or same may center over row of doubled studding consisting of at least five regular studs immediately under the chimney. All such studding shall extend to floor underpinning and footing beneath floor. Terra cotta pipe chimneys will be permitted on the exterior of one story board and batten "California Type" houses only, and then only as per the following specifications: All terra cotta pipe to have bells and shall be rigidly supported on a 4x4 post centering under the chimney with a 12x12x8 concrete footing at bottom or a 12x12x6 solid or built up redwood footing may be used. No part

of such pipe chimney proper shall come within 3 inches of any wood; the thimble shall be terra cotta and insulated from the wood using ¾ inch of asbestos or equivalent. Not more than three lengths of pipe shall be used, the joints to be tightly cemented. Securely stay the chimney using metal ties as required. All chimneys of masonry construction shall have a 2-inch cement coping or equivalent. Chimneys supported on wood brackets alone are prohibited.

#### SECTION 114.

##### THIMBLES, ETC.

Unless otherwise noted, thimbles must be terra cotta, reinforced concrete, rowlock brick, or cast iron. Thimbles placed in flues located in dwellings shall be so placed that no part of any smoke pipe or breeching shall come nearer than one foot to any ceiling, nor nearer than 6 inches to any wall, partition, supporting platform or woodwork. At least 6 inches of solid masonry or concrete shall be placed at bottom of all flues.

Flues having an area exceeding 600 square inches, shall be provided with fire-clay or fire clay brick thimbles.

#### SECTION 115.

##### LARGE FLUES

Flues exceeding 200 square inches in area shall have walls at least 8 inches in thickness; flues exceeding 600 square inches in area shall have walls at least 12 inches thick for the first 15 feet and at least 8 inches for the remaining height, excepting that the above-mentioned 12-inch walls may be reduced to 8 inches, when the inner 4 inches of such 8-inch walls consist of fire brick; or such walls may be 8 inches in thickness when lined with regular fire-clay lining for a height of 15 feet above the breeching inlet, said fire brick or flue lining to begin at least 3 feet below breeching.

In every building hereafter erected exceeding 40 feet in height, where one or more smoke flues start from the cellar or basement, one such flue shall have an internal area of at least 96 square inches and shall start at least 3 feet below the cellar or basement ceiling. All flues for low pressure boilers, large hot air furnaces, large cooking ranges, bakers' ovens and similar devices, shall have walls not less than 8 inches thick.

#### SECTION 116.

##### HIGH TEMPERATURE FLUES

The smoke flue of every smelting furnace, brass furnace, porcelain baking kilns and other uses which heat the flue to an extreme high temperature, shall be built with double walls. An air space shall be provided between the inner and outer wall; the outer wall shall not be less than 8 inches thick, unless of reinforced concrete, in which case the minimum thickness shall be not less than 6 inches. The inner wall shall be of fire brick at least 4 inches thick, stayed at regular intervals with fire brick spacers not bonded to the outside wall.

## SECTION 117.

### CHIMNEYS ABOVE ROOFS; CHIMNEY BRACING

All chimneys and flues shall extend at least two feet above the highest point of a flat roof when used for ordinary heating devices and similar purposes, and at least 18 inches above the ridge of a peaked or gable roof, excepting that when such chimney or flue is 10 or more feet from the peak, it may be stopped level with such peak. If the chimney rises above the roof for more than 6 times its least dimension, it shall be anchored to the roof or other adjacent support, using one inch iron rods or pipe running through or banded to the flue and properly secured. Chimneys built adjacent to but not a part of the wall, shall be stayed at 8-foot intervals using strap iron band anchors, tie rods or equivalent.

## SECTION 118.

### CHIMNEYS NEAR TALL BUILDINGS

Where a building is situated adjacent to a taller building, and it is necessary to carry chimney of the shorter building to height of taller building, the owner of the taller building must allow attachment of chimney or flue to his building. The Building Inspector shall order a higher chimney when necessary to abate a nuisance or for protection against fire.

## SECTION 119.

### CHIMNEYS AND SMOKE STACKS IN GENERAL

(A) Chimneys and smoke stacks shall be designed to safely withstand all stresses, caused by the weight of the chimney, wind, expansion and other causes, which may affect their strength and stability. Isolated chimneys and smoke stacks exceeding 20 feet in height, shall have design and specifications submitted in detail before the work is started.

(B) High temperature flues and chimneys, including chimneys from power and heating plants, shall extend at least 10 feet above the highest point of any roof within a radius of 50 feet. Any flue which has a tendency to throw sparks shall be provided with a spark arrester.

(C) It shall be unlawful and a violation of this ordinance for soot to be allowed to accumulate in such quantities that same will burn out when subjected to heat or flame, or fly over adjacent property thereby creating a nuisance. All such flues shall be properly cleaned out at least once a year.

(D) Chimneys shall be laid up in cement-lime mortar or better; joints and beds shall be slushed or worked full. It shall be unlawful and a violation of this ordinance to use straight lime mortar for any flue, chimney or fire-place. Cleanout doors shall be provided at bottom of all flues used for carrying off smoke from heating devices burning coal, wood, coke, cobs, and other fuels which leave a settlement at bottom of flues.

(E) Projecting or extending thimbles to be tile with hub joints cemented tight, then wrapped with two layers

of galvanized one inch mesh chicken wire netting and plastered with one inch cement-lime mortar. Metal lath may be used in lieu of the double layer of netting. Such thimbles shall be rigidly and permanently supported in place, air insulated, and shall not have a greater length than 4 feet. Such thimbles are prohibited for high temperature devices. Where a common smoke pipe or breeching, such as used in dwellings, passes through a partition of wood studs, a terra cotta thimble surrounded with at least 2 inches of concrete shall be provided.

## SECTION 120.

### FIRE PLACES

(A) All fire places and chimney breasts shall have masonry trimmer arches or similar fireproof construction supporting hearths. Supports and hearth shall extend in front of the finish face of fire place, a distance of not less than 18 inches. Such supporting fireproof construction or trimmer arch, including the hearth, shall extend the full width of the chimney breast. The hearth shall be of brick, stone, tile or other approved fireproof material. The combined thickness of the hearth and the supporting fireproof construction or trimmer arch beneath shall be not less than 6 inches near fireplace and at least 5 inches at outer edge of hearth.

The backs and jambs of all fireplaces shall be not less than 8 inches of solid masonry unless lined with at least two inches of fire brick, fire clay tile, asbestos composition, or soapstone, in which case the total thickness may be reduced to not less than 6 inches. Six inches of solid masonry must be back of all metal linings when used. No part of any stud, mantel, shelf, wood, furring or nailing blocks, shall come within 8 inches of any flame and such 8-inch distance shall be protected with solid masonry. Hollow spaces back of arches, offsets and corbeling are prohibited. No woodwork on the face of any fireplace shall come within 7 inches of the fireplace opening. Steel or iron lintels over fireplace openings shall consist of angle irons with not less than 3-inch horizontal legs, 3-inch bar iron not less than  $\frac{3}{4}$ -inch thick, approved cast iron lintel or metal dome with supporting flange. Gas and water pipe lintels are prohibited. The minimum area of all fireplace and mantel flues shall be not less than 8x8 inches.

(B) False mantels or fireplaces, in which are installed gas, oil or electric heaters, and when such heaters are air insulated and have a metal casing at back and ends, and such casing is a part of the heating device itself, will be permitted, provided the mantel recess is fireproofed at back, sides, top and bottom with metal lath and plaster applied over  $\frac{1}{2}$  inch of sheet asbestos. The heater must be kept at least 4 inches in the clear away from such fireproofed walls and 12 inches from the top or ceiling of the recess. When gas or oil heaters above mentioned are placed in such false mantels, the recess must be provided with a vent to open air above roof of building. Such vent shall have an area of not less than 6 $\frac{1}{2}$  square inches or more than 7 $\frac{1}{2}$  square inches. Vents to be con-

structed from galvanized water pipe, cast iron, tile or concrete. Galvanized sheet metal vents are prohibited. Regular gas grates, gas logs and similar gas burning devices are prohibited in all false fireplaces. Vents for false mantels shall be wrapped for a height of not less than 6 feet, using 10-pound sheet asbestos. Provide a fireproof hearth at least 3 inches thick. Hearths for false fireplaces shall extend 12 inches in front of finished mantel face.

## SECTION 121.

### METAL SMOKE STACKS AND FLUES

(A) All metal smoke stacks to be securely supported and the materials entering into their construction serving as supports shall not be stressed beyond the working stresses permitted by this ordinance. All metal work to be riveted and of adequate thickness but not less than No. 16 U. S. gauge when the cross sectional area does not exceed 154 square inches No. 14 gauge when the cross sectional area is greater than 154 square inches; No. 12 gauge when the cross sectional area is greater than 201 square inches, and not less than No. 10 gauge when exceeding 254 square inches in cross sectional area. All metal shall be painted but not galvanized. Provide a cleanout opening at the base of every stack.

Exterior metal stacks when entirely separated from any building, shall rest on an independent masonry foundation so designed that the maximum pressure on the soil shall not exceed 2-3 of the allowable pressure as permitted by this ordinance.

Metal stacks erected on the immediate exterior of a building shall be braced to the building every 14 feet; the stack shall have a clearance of at least 4 inches from all masonry walls and not less than 24 inches from all openings, fire escapes, windows, balconies, frame and veneered walls, and cornices.

(B) Interior metal stacks shall be enclosed in a masonry walled shaft, or such interior smoke stack may be enclosed in an outer stack of the same gauge as required for the inner stack. Stacks to be held apart with appropriate metal spacers placed at regular intervals. No part of such interior metal stack shall come within 12 inches of any wood or other combustible material. Chimneys of cupola furnaces, blast furnaces, and similar high temperature devices, shall be kept at least 3 feet from any combustible material. All metal stacks shall be painted at regular intervals.

(C) In buildings constructed prior to 1916, when approved, a double flue with metal walls may be substituted in lieu of a brick flue provided such double flue is used only for such heating devices as used in ordinary dwellings. Said double flue to be constructed from two shells consisting of one outer and one inner flue separated at least 3 inches by permanent metal spacers placed at regular intervals, the air space between shells to be continuous from bottom to top and open at ends. The outer shell shall be insulated from all combustible material using  $\frac{1}{2}$  inch of asbestos. Each shell to be made from No. 22 U. S. gauge iron.

## SECTION 122.

### GAS VENTS AND FLUES

Galvanized iron or other sheet metal vents used as flues, or vents for gas heating and gas burning devices, are prohibited in any wall, partition, attic or other concealed or inaccessible places. All concealed vents and all vents through attic space shall be approved tile or concrete pipe with tight joints, cast iron, galvanized steel or wrought iron pipe. When said vents are placed within  $\frac{1}{4}$ -inch of any wood, wood lath, sheathing or rafter, such pipes shall be wrapped with three-ply sheet asbestos weighing not less than 20 pounds per 100 square feet.

Except as otherwise noted under heading of "Fire Places" no gas vent shall have a cross sectional area of less than seven square inches. No gas vent or flue shall be less in area than the outlet collar on the heater, nor shall any vent or flue be less in area than the combined area of all vents entering therein. Approved brick flues must be used for exposed flame uninsulated gas logs and other high temperature devices equally as hazardous.

No direct connected gas vent shall enter any flue or chimney to which there is connected any device which burns fuel other than gas.

Except as noted in the following sections, all permanently connected gas heating appliances shall be vented directly to the outside of the building above roof. Such vents shall terminate in such position that no combustible material is directly within 12 inches of the external end. All woodwork, balconies or cornices over or in front of external orifices must be protected with sheet metal, if nearer than two feet. Sheet metal roof jacks are required for flashing when vents cut through the roof. Ends of vents shall be protected with anti-down-draft caps or equivalent. No lathing shall be done, and no walls or ceiling shall be covered, until all gas vents, including the length through attic space, are permanently and securely fastened in place and approved.

## SECTION 123.

### GAS AND MISCELLANEOUS HEATERS, BURNERS, ETC.

(A) All gas, oil, electric and other heating and warming devices shall be installed in such a way that there will be no danger of fire by radiation, conduction, or accidental contact. A safe distance from all unprotected combustible material must be maintained. Small portable heating devices without vents will be allowed for temporary use only, provided they are of such design that the products of combustion will not jeopardize the health of the occupants.

No gas light or burner shall be nearer than one foot to any combustible material, nor shall such flame or burner come within two feet of any ceiling unless properly shielded with a mica or other non-combustible deflector. No gas, oil, or other flame shall come within two feet of any window or outside door.

(B) Unvented gas radiators, including unvented floor and wall heaters, will be permitted only upon the writ-

ten approval of the Building Inspector. No such written approval can be given until satisfactory tests have been made as directed by the Building Department. The tests shall show that the said gas burning devices are substantial, safe, and suitable for the purpose, and that when installed and operated to full capacity there will be no danger of fire by radiation or conduction. Floor and wall heaters must be provided with suitable fresh air inlet ducts leading directly to the outside air. Asbestos, or asbestos board insulation, will not be deemed sufficient to safeguard against any fire hazard. Additional and sufficient air insulation must be provided.

The tests above mentioned must be carried on in a tightly closed room not exceeding 900 cubic feet in size. The chemical analysis of samples of air taken at final stages of the test shall show the percentage of nitrogen, oxygen, carbon dioxide and carbon monoxide, if any. The presence of one-twentieth of one per cent. carbon monoxide after eight hours of continuous burning at full capacity will be sufficient cause for rejecting the heater or gas-burning device.

## **SECTION 124.**

### **GAS WATER HEATERS**

Gas water heaters are prohibited in all rooms used or designed to be used for sleeping purposes. Water heaters which are provided with a pilot light shall have an independent vent leading to outside air.

When impractical to locate a gas water heater elsewhere than in a small compartment or bath room, fresh air vents must be provided; one near, but not in the floor, and one near ceiling. Each of such vents must have at least 64 square inches of unobstructed ventilating area leading as directly to outside air as possible. Said air vents to be in addition to the heater vent and window. The closing of such air vents at any time is hereby prohibited. Air vents may be screened over with fly screening.

It shall be unlawful and a violation of this ordinance for any plumber, mechanic, or any person to install any hot water heater unless all requirements of this ordinance with regard to vents and fresh air vents are fully complied with. No water heater shall be placed in any recess or closet unless the front of such recess or closet is open at all times or is properly vented at top and bottom as approved. Such recess or closet shall be completely lined with metal lath and plaster, or 10-pound asbestos covered with No. 26 galvanized iron. There shall be not less than six inches clearance on all sides of heater.

## **SECTION 125.**

### **HOT AIR FURNACES**

Hot air furnaces to be provided with fresh air inlets. When fresh air is taken from the exterior of building the fresh air intake and duct shall have an area equal to 2-3 of the combined area of all hot air pipes connected with the furnace, and when fresh air is taken from the inside of the building the area of the fresh air intake shall be at least 4-5 of the combined area of all hot air pipes connected with the furnace. Protect the outer

end of fresh air intake with galvanized screen or hardware cloth when opening to the out-of-doors or basement.

All hot air furnaces shall be substantial and gas tight. Portable furnaces to have an outer casing of not less than No. 27 U. S. gauge galvanized iron, lined with 10-pound asbestos or else double walled. Top of all furnaces shall be at least 3 feet below all combustible material unless such combustible material is fireproofed with metal lath and plaster or equivalent, in which case the clearance must be not less than 1 foot.

Brick set furnaces shall have a 4-inch reinforced concrete top or equivalent. The side walls to be 6 inches thick when of concrete and 8 inches thick when of brick. Hot air furnaces shall be set in a 6-inch pit, such pit to be at least twice the area of the furnace base. No furnace room shall have a combustible floor.

## **SECTION 126.**

### **HOT AIR PIPES AND REGISTERS**

Hot air pipes from furnaces shall be built from I. C. Bright tin or No. 28 galvanized sheet metal. All joints to be riveted; pipes and elbows to be covered with 12-pound asbestos or double walled, using permanent metal spacer between walls. Hot air pipes shall be securely supported at intervals of 5 feet or less. The register boxes, boots and ducts, shall be protected similarly.

No horizontal duct shall come within 3 inches of any joist or other wood. Smoke pipe or breeching must be kept at least 18 inches away from combustible ceilings and partitions. When ceilings and partitions are fireproofed with metal lath and plaster, the clearance may be reduced to 12 inches. Joists and other structural timbers which may be cut in the installation of furnaces and ducts shall be reinforced and built up to original strength. All hot air registers and register faces shall be metal.

## **SECTION 127.**

### **FURNACES OTHER THAN HOT AIR**

Smelting furnaces, coke ovens, cupolas, and similar extreme high temperature furnaces and ovens, shall have incombustible hearths, totaling 3 feet more in width and length than the furnace or oven; such hearth to be at least 6 inches below the high temperature device. Before such high temperature device is installed in an existing structure a permit shall first be taken out, permit to be charged for at the same rate as building permits. The hearths shall be at least 6 inches below the surrounding floor; all floors shall be of incombustible material.

## **SECTION 128.**

### **STEAM PIPE PROTECTION**

Steam and hot water pipes shall be kept at least 2 inches from all wood unless protected with incombustible material, in which case the clearance may be reduced to 1 inch. Pipes used for conveying steam, gases, or liquids exceeding a temperature of 220 degrees F. shall be kept at least 8 inches from all combustible material unless insulated with fireproofed, non-conducting pipe covering

at least 1 inch thick, in which case the clearance may be reduced to 2 inches.

Where ordinary low temperature steam and hot water pipes pass through floors, ceilings and partitions of combustible material, the pipes shall be surrounded by a metal tube large enough to insure a clear space of at least  $\frac{1}{2}$  inch between tube and pipe. Concealed pipes shall be similarly protected.

Shafts when used for housing such pipes shall have walls constructed same as required for elevator shafts; all doors and door frames leading to such shafts shall be non-combustible material or tin clad fire doors.

## SECTION 129.

### BOILER, FURNACE AND SIMILAR ROOMS

(A) Except as otherwise provided, all boiler and furnace rooms shall be enclosed in solid masonry walls at least 8 inches thick. When ceiling is of wood construction same shall be fireproofed with metal lath and plaster applied over solid boarding or sheathing at least  $\frac{3}{4}$  inch thick. Openings in boiler room walls shall be protected with fire doors or fire windows.

Boilers, furnaces and similar apparatus shall be set in pit not less than 6 inches deep and 3 feet more in width and length than the respective dimension of such heating apparatus. Floors of boiler and furnace rooms shall be masonry or similar incombustible material. Doors leading to such rooms shall be set up 6 inches from the floor with a masonry curb filling space beneath; doors to open outward from boiler room.

(B) Every boiler room must be provided with a blow-off chamber. No water from boiler shall discharge directly in the sewer. Boiler breechings are to be kept 3 feet or more from all unprotected combustible material. Except as may be otherwise stated, every boiler and furnace room shall be provided with a stand pipe  $1\frac{1}{2}$  inches in diameter, and attached thereto shall be 25 feet of  $1\frac{1}{2}$  inch fire hose and a nozzle.

A relief valve with an outlet piped to nearest place of drainage shall be placed at top of boiler. Provide a check valve on water supply as near to boiler as possible. Before any boiler or heating plant is installed or re-modeled in any existing building, a written permit shall first be obtained.

(C) Boiler and furnace rooms in dwellings shall have ceilings metal lathed and plastered. Stud or combustible walls within 5 feet of any boiler or furnace in all dwellings must be protected with metal lath and plaster. Combustible floors are prohibited. No wall other than a masonry wall shall come within  $2\frac{1}{2}$  feet of such boiler or furnace. A  $\frac{3}{4}$ -inch hose bib and 15 lineal feet of  $\frac{1}{2}$ -inch hose shall be provided, all connected and ready for use.

## SECTION 130.

### RANGES, BAKE OVENS, ETC.

Large ranges, such as hotel and restaurant ranges, bake ovens, candy kettles, coffee roasters and similar apparatus, with solid or enclosed bases or bottom, shall rest on a masonry and sheet metal hearth when placed

over wooden or other combustible floors. Such hearths shall extend at least 6 inches beyond the apparatus at the sides and back, and at least 2 feet in front of same. Hearths are to be No. 16 U. S. gauge galvanized sheet metal applied over a uniform layer of 12-pound sheet asbestos well lapped at joints. Upon the sheet metal shall be a layer of concrete at least 3 inches thick reinforced with galvanized chicken wire netting, top of concrete to be troweled smooth. In lieu of the concrete, brick may be used when laid in cement-lime mortar, providing a 1-inch topping is applied over same. Topping to be cement mortar troweled smooth; brick may be laid flatwise.

When the above heating and cooking devices are made with substantial metal legs which keep the bottom of the apparatus at least 5 inches above the floor, the masonry part of the hearth may be omitted. Such heating and cooking devices mentioned in this section must be kept at least 20 inches from all combustible material including plaster on wood lath, unless such combustible material is protected with No. 28 U. S. gauge galvanized iron applied over 12-pound sheet asbestos. The walls at back and sides shall be thus protected to a height reaching 3 feet above and 1 foot beyond the ends of such heating and cooking devices. Under no condition shall the clearance between such devices and the protected combustible material be less than 3 inches.

Before any hotel, bakery or restaurant range, bake oven or other large cooking or heating device is installed, the construction arrangement and location must be approved and a permanent permit obtained and the fee for permit shall be at the same rate as required for buildings.

## SECTION 131.

### RANGE HOODS, HOOD AND CANOPY VENTS, ETC.

All hotel, restaurant and similar large range and cooking devices must be provided with a metal hood or canopy above. Such canopy or hood shall be provided with a deep apron or drop all around, of sufficient depth to curb and direct all flames and gases to the vent flue. Hood to be properly connected to a regular brick or other approved flue or chimney. When top of hood reaches within 6 inches of the ceiling, the ceiling when of combustible material or wood lath and plaster must be provided with 12-pound asbestos or a layer of plasterboard. Similar protection must be used when hood comes within 1 inch of the wall or partition.

No vent or duct from hood shall be used to carry off smoke or products of combustion from the cooking or heating device proper, nor shall any smoke flue be run inside of same. All vents and ducts from hood must be kept free from combustible accumulations such as grease, lint, dust, etc. Vents, breechings and smoke pipes from said heating and cooking devices must be kept exposed until entering the flue.

Ordinary ranges and cooking devices as used in dwellings shall have a ventilating arrangement above to remove the gases, fumes, etc., in addition to any smoke pipe from the apparatus proper. Such ventilating arrangement may be in the form of a vented hood or recess

or an open ventilating register having at least 144 square inches of effective ventilating area.

### SECTION 132.

#### ASH BOXES AND PITS

All receptacles for ashes or rubbish shall be constructed of galvanized iron, brick or other non-combustible material. When an ash pit is located in the basement, cellar or beneath any floor, it shall be of brick, concrete or similar non-combustible material including the top or covering.

### PART FIVE

#### Engineering Section

### FOUNDATIONS, LOADS, PILES, STRESSES, STRUCTURAL STEEL, IRON, WOOD, REINFORCED CONCRETE AND ENGINEERING IN GENERAL.

#### SECTION 133. FOUNDATIONS

Wood, raft, grillage and pile foundations may be used when all wood is immersed below permanent low water level; provided such wood is properly treated to allay the attacks of marine life. Raft foundations are limited to buildings three stories in height and under. Special forms of foundations, such as cantilever, inverted arches, caissons, etc., may be used when designed according to standard engineering practice, provided none of the unit stresses allowed by this ordinance are exceeded. Steel shapes shall be protected by at least 6 inches of concrete. Reinforcing bars, tie rods and hoops shall be protected with not less than 3 inches of concrete.

All mortar used for foundations and footings shall be cement-lime mortar. No exterior column, pier or buttress footing shall be less than 2 feet below grade unless resting on hardpan in which case the depth below finish grade shall be not less than 18 inches. No exterior bearing wall footing shall be less than 18 inches below grade and no exterior non-bearing wall footing shall be less than 12 inches below grade, provided, however, that for the purpose of this paragraph all non-bearing exterior walls exceeding 10 feet in height shall have footings placed at the same depth as required for exterior bearing walls.

Nothing in this section shall be deemed to prohibit dwelling house footings from extending less than the above; provided permanent hard soil is reached. Under no conditions, however, shall any dwelling house footing extend less than 8 inches below grade when one story high, and not less than 12 inches below grade when two stories high, and at least 16 inches below grade when three stories high. All of the above depths shall be increased on sloping ground when necessary to insure stability and prevent water from reaching the bottoms of footings.

No foundation or footing shall rest on silt, alluvial, made soil or fill. When footings are omitted the bottom of foundation shall be spread but to take the place of a footing and the bottom of foundation shall extend to the same depth as required for the footings.

### SECTION 134.

#### BEARING VALUE OF SOIL

When a test is made of the sustaining power of the soil, the Building Inspector shall be notified when such test is to take place. The report of the test shall be filed in the office of the Building Inspector upon request. When tests have proven satisfactory the Building Inspector may modify the requirements shown in the table below.

When doubt arises as to the safe sustaining power of the soil upon which a structure is to be erected, the Building Inspector may order borings or other satisfactory tests made to determine the safe load.

In the absence of such tests as mentioned above the soil shall not be loaded more than the following number of tons per square foot:

	Tons.
Soft clay .....	1
Wet sand .....	2
Firm clay .....	2
Sand and clay, mixed or in layers .....	2
Fine dry sand .....	3
Hard dry clay .....	4
Coarse compact dry sand .....	4
Coarse gravel firm and compact .....	6
Disintegrating granite .....	6
Hard pan and soft rock .....	8
Medium rock and shale rock .....	10
Hard rock .....	20

### SECTION 135.

#### LOADS ON FOOTINGS

Footings shall be so designated that the loads they sustain per unit area shall be as nearly uniform as possible and within the bearing capacity of the soil. The loads coming on the footings shall be the full dead loads and the figured live loads on the lowest tier of columns, piers or walls. The center of gravity under isolated columns and pilasters must lie within the middle third of the foundation or footing section in which case the intensity of pressure on the soil at any point must not exceed the allowable limit as provided by this ordinance.

### SECTION 136.

#### PILES

All piles used for foundations under structures shall be timber, concrete or reinforced concrete. Piles cast in place shall have permanent metal forms. Plain concrete piles shall not be loaded more than 300 pounds per square inch. When concrete piles, plain or reinforced, are not driven to rock they shall be treated as friction piles and their carrying capacities shall be determined by tests. The length of plain concrete piles shall not exceed 20 times the average diameter.

Reinforced concrete piles may be cast in place, driven by water jet, or by hammer if head is protected from injuries. Said piles shall be built in accordance with the provisions for reinforced concrete, as far as such provision can consistently be made to apply. The length of

reinforced concrete piles shall not exceed 30 times the average diameter, and shall not be loaded to exceed 500 pounds per square inch, taking the average cross sectional area of the pile as the supporting area.

Wooden piles shall be sound straight timber. The diameter at the butt must be not less than 10 inches and the diameter at the point shall be not less than 6 inches. Piles exceeding 25 feet in length shall be not less than 12 inches in diameter at the butt. The minimum distance between piles shall be 1 foot 6 inches, whether the piles be of concrete or wood. Timber piles shall be permanently immersed, the top being cut off below standing water line.

Wooden piles may be capped with concrete at least 12 inches thick or with timber at least 12 inches in depth, said timbers to be drift bolted to each pile; timber capping to be below permanent water level.

Timber piles driven to rock or refusal may be loaded not to exceed 500 pounds per square inch of middle sectional area, provided, however, that no pile shall be loaded more than 25 tons. The safe sustaining power of wooden piles not driven to refusal shall be determined by calculation based upon the following formulas.

$$P = \frac{2WH}{S \text{ plus } 1}$$

$$P' = \frac{2WH}{S \text{ plus } 1.1}$$

In which "P" equals Safe sustaining power in case drop hammer is used. P' equals Safe sustaining power in case steam hammer is used.

H equals Height of drop in feet.

W equals Weight of the hammer in tons.

S equals the average penetration of the pile in inches under the last five blows.

The maximum allowable for P or P' shall not exceed twenty-five tons.

### SECTION 137.

#### FOOTINGS AND FOUNDATION WALLS

All footings shall be designed and proportioned to safely sustain the loads and stresses imposed thereon, without overstressing the sub-foundation or soil. Concrete footings must be at least 8 inches thick (measuring vertically) and shall not project more than  $\frac{1}{4}$  of such thickness. Stone and brick footings must be at least 12 inches in height. On all important work it will be necessary for the Building Inspector to examine the soil after excavation has been completed and before the foundation or footings have been started, when there is the least suspicion that the soil may be overstressed or have a tendency to shift or settle. Under no condition shall any foundation or footing rest on silt, alluvial or fill.

Excepting as otherwise noted in this section, all footings and foundations for dwellings shall be concrete, stone, brick or other approved masonry. Concrete foundations for one-story dwellings are to be at least 6 inches thick with bottom spread out to not less than 10 inches.

One story veneered dwellings shall have foundations at least 8 inches thick with bottom spread out to not less than 12 inches. These dimensions shall be increased 4 inches for two story buildings and at least 8 inches for three story buildings. Brick and stone foundations shall be proportionately increased in size, provided that no brick or ashler foundation for a one story building shall be less than 8 inches in thickness. Concrete footings under masonry walls shall project at least 3 inches beyond the walls on all sides or equivalent spread bearing provided. This also applies to all piers and pilasters.

All posts and wood underpinning supporting dwellings shall rest on solid concrete blocks at least 1 foot square and 8 inches thick, top of block to be coated with pitch, or a sheet of prepared roofing shall be placed between concrete block and wood post. Foundations for one story board and batten dwellings without studs may be continuous redwood mud sill at least 3 inches by 6 inches. Redwood plates shall be provided on all masonry walls when supporting wood or frame walls above.

### SECTION 138.

#### WEIGHT OF MATERIALS

The following weights per cubic foot shall be used in calculating all dead loads:

	Pounds.
Asphalt	93
Brick work; common	120
Brick work; pressed or faced brick	135
Concrete; stone or gravel	144
Concrete; blast furnace slag	132
Concrete; cinder	108
Granite or marble	168
Lime stone	156
Sand stone	144
Sand; dry	100
Sand; moist	112
Gravel; dry	120
Gravel; moist	130
Slate	175
Glass	160
Plaster; dry	100
Plaster or mortar; wet	130
Cast iron	450
Steel	490
Wrought iron	480
Redwood, spruce, red cedar, cypress; dry	26
Fir, short leaf yellow pine; dry	36
Oak, maple, long leaf yellow pine; dry	48
Hollow tile masonry (common)	72

The weight of other materials shall be determined from standard authorities or directly from test samples.

### SECTION 139.

#### FLOOR AND ROOF LOADS

The dead loads shall consist of the weight of all the materials employed in the construction. The live loads shall consist of all the super-imposed loads other than the weight of the materials entering into the construction. Roofs, floors and supports shall be designed to carry all dead loads and the full live loads which will come upon

them. In no case, however, shall the live loads be less than the following, unless otherwise noted in detail:

	Lbs. per sq. ft.
Live roof loads for dwellings, outhouses, sheds and temporary roofs	20
All other roofs	25
Dwellings; live floor loads	40
Apartment houses, tenement houses; live floor loads	40
Hotels, lodging houses	40
Hospitals, orphanages, asylums	40
School rooms, theatres, moving picture houses, and all places of assemblage (with fixed desks or seats)	75
All places of assemblage (without fixed desks or seats) including the halls and corridors of all public buildings	120
Drill halls	150
Garages, stables and carriage houses	100
Ordinary stores and light manufacturing	120
Hotel lobbies and rooms used for dancing	120
Office buildings above first floor	50

Buildings not classified in above table must be designed to safely carry the loads to which they may be subjected. Wherever live loads are concentrated and produce an effect greater than that of the uniform live loads, the true effect of such concentrated loads shall be taken into account when designing the supporting members. Running machinery or other moving loads shall be considered as increasing the live loads in proportion to the degree of vibratory impulse transmitted to the supporting members.

## SECTION 140.

### REDUCTION OF LIVE LOADS

Except as otherwise noted below, the live loads in buildings exceeding three stories in height may be reduced as follows:

**GIRDERS:** All floor girders excepting roof and first floor girders shall be designed to carry not less than 80% of the uniform live load. The full dead load must be figured in every case.

**COLUMNS:** All columns, posts and other vertical supports supporting roof and first floor, may have live loads reduced as follows: The live load from the top story may be assumed to be not less than 80% of the uniform live load; the allowable live load from the next floor below may be assumed to be not less than 75% of the uniform live load, and the allowable live load from each succeeding floor below may be reduced correspondingly at the rate of 5% of the uniform live load per floor, provided that in no case shall the total reduction per floor exceed 50% of the uniform live load on the floor in question.

No reduction shall be allowed in the live loads in making calculations for stresses in floor slabs, floor arches, stringers, joists, or beams. The full allowable live loads on all roofs and on all first floors, including all floors below first floor, must be assumed in every case.

No reduction of live loads will be permitted in the following buildings: Theatres, drill halls, places of public

assemblage, buildings under 4 stories in height, and all buildings which are liable to be fully loaded.

## SECTION 141.

### DISTRIBUTION OF LOADS AND FLOOR CAPACITIES

The weight placed on any floor of any building shall be safely distributed thereon and the Building Inspector may require the lightening or re-distribution of any such load when necessary for safety.

When required by the Building Inspector, the owner, agent or occupant of any building shall file with the Building Inspector a written statement prepared by a competent architect, engineer, or builder, setting forth the maximum loads that the various floors will safely sustain. All such maximum safe loads shall be computed in accordance with the stress requirement of this ordinance. The above written statement shall bear the signature of the person making the computations, the method of computation and assumptions must be shown in detail.

When the maximum safe load or loads have been approved by the Building Inspector, the owner, agent or occupant shall be so notified in writing and thereupon the said owner, agent or occupant shall post the amount of such safe loads in a permanent manner in a conspicuous place on each floor or that part thereof to which it relates. This section shall be deemed to apply also to trusses and other individual structural or supporting members. Standard accepted engineering practice shall be used in making the computations. It shall be unlawful and a violation of this ordinance to overload any floor, truss or other supporting member.

## SECTION 142.

### WIND BRACING

All buildings and structures over 150 feet in height, and all buildings and structures and parts thereof in which the height is more than 4 times the minimum horizontal dimension shall be designed to resist a horizontal wind pressure of 15 pounds for every square foot of exposed surface, allowing for wind in any direction. This paragraph also applies to steep exposed roofs, spires and all light buildings and structures regardless of height when wind bracing is necessary for stability.

The overturning moment due to wind pressure shall not exceed 75% of the moment of stability of the structure due to the dead load only, unless the structure is securely anchored to the foundation and the foundations are designed to carry all excess moments. Said anchors shall be of sufficient strength to safely carry the excess overturning moment.

When the stresses in any member due to wind pressure do not exceed 50% of that due to the sum of live and dead loads, the same may be disregarded. When the stress exceeds 50% of that due to the sum of live and dead loads, the allowable working stresses may be increased 50% in designing such member to resist all the combined stresses.

## SECTION 143.

### IRON, STEEL AND STRUCTURAL STANDARDS

All structural wrought or cast iron, or steel, in-quality, requirements of tests, workmanship, and in assemblage and interconnections of shapes, shall be equivalent to the current Standard Specifications of the Association of American Steel Manufacturers as given in the latest hand books of the respective Standard Manufacturers; provided that the Building Inspector may demand certified copies of the mill tests of such material, and no work shall be built upon or concealed until the Building Inspector has been furnished satisfactory proof that the materials and construction are up to the accepted standards, when the Building Inspector deems that such information is necessary. The current Standard Specifications and Recommendations of the American Society for Testing Materials as far as they apply will be classed as equivalent to the above specifications.

All structural members and connections shall be so designed that the unit stresses permitted in this ordinance shall not be exceeded in any case. When any system, form or method of construction or calculation is not fully set forth or specifically referred to in this ordinance, and a decision on same satisfactory to the parties concerned cannot be settled, such hand books as the latest editions of Kidder-Nolan Architects and Builders' Pocket Book; Trautwine's Civil Engineer's Pocket Book, or Merriman and Jacoby's Engineers' Hand Book, will be recognized as authority on the subject in question.

## SECTION 144.

### CAST IRON CONSTRUCTION

The outside diameter or least side of cast iron columns shall not be less than 5 inches, nor shall the unsupported length exceed 60 times the least radius of gyration. The allowable thickness of metal in the shaft shall be not less than  $\frac{3}{4}$  of an inch and the thickness of metal in flanges, seats, and brackets shall be at least 1 inch. Whenever the core has shifted more than  $\frac{1}{4}$  the thickness of the shell, the strength shall be computed assuming the thickness of metal all around equal to the thinnest part. Provide drilled test holes as may be required for the purpose of measuring the thickness of metal in hollow cast iron columns.

Ends of cast iron columns shall be planed and milled to a smooth even bearing surface perpendicular to the axis of the column. Successive column lengths shall be bolted together through end flanges with at least four  $\frac{3}{4}$ -inch bolts. Shims are prohibited between flanges. When the column below is larger than the column above, proper plates shall be placed between flanges. Cast iron columns shall not be used when the load is sufficiently eccentric to reduce the unit compression to zero in the extreme fibre on opposite side of column, nor shall cast iron columns be used in the structural frame of buildings, the height of which is greater than three times their width.

The metal of cast iron lintels shall be not less than  $\frac{3}{4}$  of an inch and no cast iron lintel shall be used for spans exceeding 6 feet. Cast iron bases or shoes shall

be planed on top. When such bases rest on steel beams, girders or other metal work, said bases shall be planed on both top and bottom bearing surfaces. The inclination of the outer edge of the ribs shall be not less than 40 degrees, relative to the horizontal.

## SECTION 145.

### STEEL COLUMNS

No rolled steel column shall contain material whether in the body of the column or used as lattice-bar or stay-plate of less thickness than  $\frac{1}{4}$  inch. In built-up columns the thickness of any outstanding member shall be not less than 1-12 the width of the outstanding portion. Stay plates are to have not less than 4 rivets and are to be spaced so that the ratio of length to the least radius of gyration of the parts connected does not exceed 40, the distance between nearest rivets of two stay plates in this case being considered as length.

The unsupported length of rolled steel columns shall not exceed 120 times their least radius gyration, nor 40 times their least lateral dimension, excepting that when such columns are subjected to impact the limiting figures (120 and 40) shall be reduced 20%, and when such columns support light roof loads the limiting figures (120 and 40) may be increased 20%.

The ends of all steel columns including pipe columns shall be faced to a plane surface at right angles to the axis of the columns. Pipe columns shall not depend on the bearing of the threads for support. Wherever practicable the connections between rolled steel columns shall be made with splice plates; otherwise the connections shall be formed with plates and angles properly designed to distribute the stresses. Where any part of column projects beyond column above, filler plates properly riveted in place shall be used. The pitch of rivets at the ends of built-up columns shall not exceed four diameters of the rivet for a length equal to twice the greatest lateral dimension of the column.

## SECTION 146.

### STEEL GIRDERS AND BEAMS

The thickness of the web in built-up girders shall be not less than 1-120 of the distance between the flange angles or stiffeners, nor less than  $\frac{1}{4}$  inch. In no case shall the unsupported length of the compression flange exceed 40 times its width. If the unsupported depth of the web exceeds 60 times its thickness stiffeners shall be used. Stiffeners of sufficient strength shall be provided over supports and under concentrated loads.

When rolled steel beams are used, placed side by side, to form girders or lintels they shall be connected together by bolts and iron or steel separators at intervals of not more than 5 feet apart. All beams 12 inches and over in depth shall have at least two bolts to each separator. Beams supported by girders or columns shall be securely riveted or bolted to same. This also applies to all steel lintels supported on columns. Where steel lintels meet at an angle, such as at corners over store fronts and similar arrangements, they shall be securely connected together. Single steel lintels supporting walls

above shall have full width plate riveted to bottom flange; the wall shall start on said plate.

The compression flanges of rolled steel beams and girders shall be secured against buckling, when the length exceeds 20 times the width of the flange, unless the working stress in such flange is proportioned to the ratio of length to width as provided for steel columns. Steel lintels must be painted at least two coats of approved paint before being erected. Every steel beam, lintel or girder supported by a wall, pier or pilaster, shall be properly anchored thereto and shall rest on steel or iron bearing plates of proper size.

#### SECTION 147. STEEL TRUSSES

Trusses shall be of such design that the stresses in each member can be calculated. Stress diagrams or computation sheets showing method of design and the assumptions shall be furnished the Building Inspector upon request, when the latter deems necessary, before the plans are approved. All trusses shall be held rigidly in position by efficient systems of lateral or sway bracing.

For tension members the actual net area only, after deducting rivet holes  $\frac{1}{8}$  inch larger than the rivets, shall be considered as resisting stress. Compression members in the pin-connected trusses shall be so designed that the stresses shall not exceed 75% of the permissible working stress for columns. The heads of all eye-bars shall be made by upsetting or forging. No weld shall be allowed in the body of the bar. Steel eye-bars shall be annealed. Bars shall be straight before boring. Eyes and screw ends shall be so proportioned that upon test to destruction, fracture will take place in the body of the member.

All pins shall be accurately turned. Pin holes shall be bored true and at right angles to the axis of the members. Pins to fit snugly in holes allowing a clearance not exceeding 1-32 of an inch. Chord members carrying loads between panel points shall be designed as strut beams or tie beams, as the case may be. Gusset plates shall be thick enough and large enough to properly transfer the stresses.

#### SECTION 148.

##### STRUCTURAL STEEL AND IRON FRAMING IN GENERAL

In the construction of exterior stairs, landings, platforms, and balconies, no rivet shall be less than  $\frac{3}{8}$  inch in diameter and no bolt less than  $\frac{1}{2}$  inch in diameter. All cast iron or other metal fronts shall be constructed so as to allow for expansion and contraction, made water tight and protected from corrosion. Brackets supporting overhanging cornices, belt courses and other projections shall be securely attached to the structural frame work. The iron and steel frame of any building shall be securely bolted and braced during erection and shall be trued up and plumbed before connections are finally bolted and riveted together. After erection all structural steel and iron shall be painted with a protective coat of paint using a different shade of color than the shop coat. All cast iron shall be delivered on the job

unpainted and uncoated. Painting may be omitted on structural steel when thoroughly encased in solid concrete.

Where riveting is impracticable, turned bolts may be used, provided the holes for same are tight fitting and laid out to a template. All column connections, however, in buildings exceeding three stories in height, must be riveted. Rivets shall fill the holes completely. Bolts when permitted shall be wrought iron or mild steel with U. S. standard threads; threads to be full clean and truly concentric with the bolt. Sufficient length shall be provided to allow the nut to be screwed up tightly. Tie rods shall connect all beams where the floor construction gives rise to a thrust; the distance between tie rods shall not exceed 8 feet in any case. Nuts or turn-buckles shall be furnished for adjustment.

Masonry walls and concrete walls may be carried on steel or iron supports, walls to be of the thickness required at the story at which they commence. No wood post, beam, lintel or joist shall be used to support any masonry or concrete wall, pier, pilaster or buttress. SEE TABLES AND FORMULAS FOR ALLOWABLE STRESSES, FOR IRON AND STEEL.

#### SECTION 149. REINFORCED CONCRETE

The term "Reinforced Concrete" refers to an approved concrete mixture in which steel is embedded in such a manner as to resist the tensile stresses, assist in the resistance to shear, and add rigidity and strength to the concrete.

(A) No reinforced concrete construction shall be used unless capable of mathematical analysis in accordance with the established principles of mechanics. Where special systems of reinforced concrete are to be used the designing formulae in detail shall be filed with the Building Inspector in order that they may be thoroughly investigated.

Reinforced concrete construction shall be so designated that the resultant stresses in the concrete and steel shall not exceed the unit stresses allowed in this ordinance, when computed on the basis of the following assumptions:— (1) The ratio of modulus of elasticity of concrete to that of steel shall be taken as 1 to 15. (2) That the adhesion of the concrete to the steel makes the two materials act together. (3) That the tensile stresses are taken by the steel. (4) That shearing stresses are taken by the concrete or by the concrete and steel combined. (5) That the tensile stress in the concrete is not to be considered. (6) That the moduli of elasticity of concrete and steel remain constant within the limit of their respective unit working stresses. (7) That there is no initial stress in either the steel or the concrete. (8) That the steel in compression and the concrete immediately surrounding it are stressed in proportion to their moduli of elasticity.

(B) Every reinforced concrete building of consequence shall be erected under the constant supervision of a reputable and competent inspector furnished by the owner or architect. A competent foreman must be constantly on the job during the construction of any rein-

forced concrete work. The Building Inspector is empowered to stop any improper construction until its faults are corrected. He shall also cause the removal of any defective or dangerous work or material.

(C) All materials shall comply with the requirements as laid down and specified in this ordinance. Methods shall be used which will secure uniform measurements of cement, fine aggregate, coarse aggregate and water. The materials must be mixed as wet as will procure a concrete of such consistency that it will flow sluggishly into the forms about the steel reinforcement. The machine mixing shall be done in a batch mixer of such a type that will insure a uniform distribution of the materials throughout. The mixing shall continue for at least one minute after all the materials are placed in the mixer. In conveying concrete suitable precautions must be taken to prevent segregation of the coarse and fine materials. The mixing or re-mixing of concrete that has partly set will not be permitted.

Whenever concrete is to be placed the contractor shall so notify the Building Inspector, unless the architect has a competent inspector continuously on the work.

(D) All reinforcing steel shall be properly held in position and supported the proper distance from the forms at all times while concrete is being poured. No wood blocks, strips or other nonapproved supports or spacers will be permitted. Wood blocks, wood spacers, shavings and sawdust, cast in the concrete, will be due cause for condemning the work. The lateral spacing center to center of reinforcing bars in beams and girders shall be not less than 3 times the diameter of the bars, and the clear vertical spacing between two layers of bars shall be not less than 1 inch in the clear. Steel shall be embedded and protected in concrete so that the thickness of concrete covering outside of steel in the clear shall be at least as follows:

- |  |              |
|--|--------------|
| (1) Flat slabs and floor slabs.....                    | 1/2 inch     |
| (2) Beams under 18 inches in depth.....                | 1 1/4 inches |
| (3) Beams and girders 18 and under 48 inches.....      | 1 1/2 inches |
| (4) Beams and Girders 48 inches and over in depth..... | 2 inches     |
| (5) Reinforced concrete piles.....                     | 1 1/2 inches |
| (6) Foundations and Footings below grade.....          | 3 inches     |
| (7) Reinforced concrete columns.....                   | 1 1/2 inches |

Reinforcing steel not protected as specified above shall not be considered as adding to the strength of the construction.

When necessary to splice bars they shall lap at least 50 diameters for mild steel and 60 diameters for high carbon. No splices shall be made where maximum tension occurs. At the end spans of beams and girders where bars cannot have sufficient length to develop full strength, hooks of sufficient strength to develop 1 1/4 times the elastic limit of the steel shall be used. All temperature stresses in reinforced concrete shall be fully taken care of by steel bars or mesh properly placed.

Members of web reinforcement shall be designed to adequately take up throughout their length all stresses not taken up by the concrete. Stirrups shall be spaced not to exceed 1/4 of the depth of the beam in that portion

of the beam where they are necessary, and unless rigidly attached, the stirrups shall be placed at right angles to the axis of the beam and carried around the tension members.

(E) Where adequate bond is provided at junction between slab and beam, and the two are cast at the same time as a unit, the slab may be considered as an integral part of the beam; provided its effective projecting width on either side of the stem does not exceed 1-6 of the span length of the beam, nor shall such projection be greater than four times the thickness of the slab.

In beams with T sections the width of the stem only shall be used in calculating longitudinal shear and diagonal tension. An effective bond shall be provided at the junction of the beam and slab, when the principal slab reinforcement is parallel to the beam, by the use of transverse reinforcement extending over the beam and well into the slab.

In the design of T beams acting as continuous beams, sufficient compressive area shall be provided on the under side at the support, either by the use of concrete brackets or by additional compression steel in the concrete extending to the point of inflection.

The minimum thickness of floor slabs shall be 3 1/2 inches unless supported on terra cotta fillers or arched. The cement topping or floor finish shall be figured as dead load on the slab unless laid at the same time the slab is cast. Composite floors consisting of rows of hollow tile, concrete blocks and sheet steel, and similar construction separated by ribs or beams of reinforced concrete, will be permitted when conforming to the general reinforced concrete requirements of this ordinance.

(F) In case the moment of resistance of a beam or girder is not equivalent to the bending moment on the member, additional steel may be introduced, either in tension or compression, or both, to meet the deficiency; provided, however, that in no case shall the area of steel in compression exceed the area of steel in tension, and in all cases the steel in compression shall be securely tied to the steel in tension, using hoops or stirrups of equivalent size and spacing as used in vertically reinforced columns.

Bending stresses due to eccentric loads shall be provided for by increasing the section of concrete or steel or both until the maximum stress shall not exceed the allowable working stress. This paragraph applies to any member whether horizontal or vertical.

(G) Columns with longitudinal reinforcement only shall be reinforced with not less than 1/2 % nor more than 4% of vertical reinforcement secured by 1/4-inch steel ties or hoops placed horizontally; said ties or hoops shall not be spaced farther apart than the least dimension of the effective section and never more than 12 inches. For the purpose of this section the effective area or section of the column shall be considered the area within the hoops, spirals, or steel wrapping around the vertical steel; the least dimension of effective section or area of any reinforced column shall be not less than 6 inches.

Spirally reinforced concrete columns shall be rein-

forced with not less than one nor more than 5% of the effective area and the amount of spiral steel reinforcement shall not be less than 1% of the volume of concrete represented by the effective area times the length of the column. The percentage of vertical reinforcement in all reinforced concrete columns shall be calculated upon the effective area of the column.

The clear spacing between spirals shall be not less than 1½ inches and not more than 3 inches. The hoops or spirals shall be rigidly secured to at least 4 verticals to insure uniform spacing. All spiral and vertical reinforcement to be kept plumb and true. Use mechanical metal spacers when necessary.

Suitable iron base plates shall be provided at the bottom of reinforced concrete columns to distribute the loads over the footings, and the vertical reinforcement bars shall bear squarely on these plates. Or the plates may be omitted and the reinforcing bars carried down into the footings a sufficient distance to properly distribute the bar loads through bond stress. Equivalent dowels of proper length may be used.

(H) **FLAT SLABS** Construction in the form of two-way, four-way and other approved systems of Flat Slab construction, may be used when it can be shown by rational analysis that the unit stresses permitted by this ordinance are not exceeded.

Except as otherwise noted herein, all reinforced concrete construction, including flat slab construction, shall be in accordance with or equal to the recommendations and general designing methods as recommended by the Joint Committee on Concrete and Reinforced Concrete.

(I) Forms shall be thoroughly cleaned out, removing all debris, dirt, paper tags, and old concrete. Forms shall be well wet to prevent robbing concrete of its moisture.

In filling or pouring concrete around reinforcing steel the concrete must be continuously worked with suitable tools while being placed. Concrete shall be kept wet at least 6 days after being poured, when weather is warm and dry.

When work is suspended the joints or stopping-off places shall be located as follows:

(1) For columns: The underside of girders or capitals.

(2) For girders: At a point midway between supports, unless a beam should occur at this point, in which case the joint shall be offset a distance equal to twice the width of the beam.

(3) For beams and slabs: At the center of the span.

(4) Joints in columns, girders and beams shall be perpendicular to the axis, and in floor slabs perpendicular to the planes of their surface.

(5) Under no condition shall any joint be made where the shearing stresses or diagonal tension are of appreciable magnitude.

Before the work is resumed the concrete previously placed shall be roughened, cleaned of all foreign material, adjacent forms cleaned, the butting surface of the concrete wetted and slushed with a cement mortar one to two, and the new concrete then placed against the old.

Beams, girders and slabs shall not be constructed over the columns until the columns have settled and set up for a period of not less than 6 hours.

When depth of beam is figured full height including depth of slab, and when beams are designed as T beams, the slab must be poured at the same time as the web or beam, thereby making a monolithic mass.

(J) Forms shall be built in a substantial manner, sufficiently tight to prevent an appreciable amount of mortar from leaking out. Forms shall be rigidly braced and held in position, and built strong enough to prevent displacement or bulging of the concrete. Provide clean-out pockets at bottom of column forms. The proper time for removing forms, shores and centering shall vary with the design of the structure, the strength of the concrete, and the condition of the weather. Under no condition shall such forms and supports be removed, sooner than allowed in the following schedule:

Beam and column sides: not less than ..... 48 hours  
Slab forms, not less than ..... 14 days

When slab forms can be removed without removing or shifting shores, said forms may be removed in not less than ..... 4 days

Beam and girder bottoms including shores may be removed in not less than ..... 14 days

Under no condition, however, shall any of the shores, beam or girder bottoms be removed or shifted until the concrete is capable of sustaining its own load, and the added load above. Cool weather will be sufficient cause for extending the time before forms and shores can be removed. Reshoring is hereby prohibited under all conditions. Forms shall be assembled and nailed in such a way that the concrete will not be injured or corners knocked off when forms are removed. Injuring the concrete by pinch bars or otherwise is prohibited.

No conduits or pipes shall be placed or cast in the concrete in such a way as to injure the concrete or impair its strength; nor shall such conduits or pipes be placed in the effective area of any column. Pipes conveying liquids and steam shall not be embedded in any part of the structural concrete except as may be necessary to pass through floors and walls. Proper sleeves or forms for pipes, chases and other ducts must be placed and correctly located before concrete is poured.

No drilling or cutting of the concrete or steel reinforcing for the purpose of attaching fixtures, hangings or other purposes which will in any way injure or impair the strength of the concrete or steel will be permitted.

(K) Any reinforced concrete work such as a slab, beam, girder or joist, which appears to be defective and is rejected by the Building Inspector, will be permitted to stand provided it shall meet the following described test requirements:

Test loads shall be equal to twice the total live load which the particular member, slab or panel is designed to carry. The test loads shall remain in place for at least 24 hours and a final deflection reading then taken at the center of the span or panel the case may be. The load shall then be removed. If the member, slab or

panel recovers at least 90% of the total deflection within 4 hours after removing the load and no cracks or initial failure has appeared during or after the test, the test shall be declared satisfactory and the member, slab or panel will be accepted.

Should the member, slab or panel fail to recover from the deflection as above required, or should such member reach or show initial failure, same shall be shored up, additionally reinforced, or be entirely rebuilt as approved.

Defective columns or columns which have been improperly constructed, shall be entirely removed and rebuilt, or a reinforced hooped or banded concrete shell shall be cast around same, as directed.

(L) Expansion joints may be used when located as not to jeopardize the stability and strength of the structure, the design being governed accordingly.

## SECTION 150.

### STRUCTURAL TIMBERS AND POSTS

All wood used structurally shall be sound, dense timber. Decay, large or loose knots, shakes, splits and serious cracks, including diagonal grain, will be cause for rejection by the Building Inspector.

Columns subjected to cross bending or eccentric loading, shall have additional area provided to properly take care of the added stresses. All wood columns shall be cut square and even at both ends, cuts to be at right angles to the axis. Such vertical members, except as otherwise noted, shall have approved metal caps and appropriate metal bases designed to anchor column, base and supporting construction together.

Each column shall rest on column immediately below, except in two-story buildings, in which case the second story columns may rest on girder beneath when placed concentric with column below; provided that suitable metal bearing plates are provided between columns and girder and the three are anchored together. Wood bolts will be permitted on top story posts only.

No wood posts other than redwood, western red cedar, cypress or white pine, shall rest directly on masonry or concrete wall or footings unless an iron or steel bearing plate is provided bearing plate to be large enough to distribute the load over the footing or wall without overstressing the masonry. The top of masonry or concrete masonry under posts shall have an area at least three times the cross sectional area of the post, unless the post is sufficiently under-stressed to warrant a proportional reduction in the supporting area of the pier or footing. Posts when stressed not more than 150 pounds per square inch may have redwood bearing blocks between post and footing or pier. Wood posts in basements, cellars and beneath structures, shall be kept at least 2 inches above the floor or earth. Under no condition shall the earth be placed against wood posts.

## SECTION 151.

### WOOD BEAMS AND GIRDERS

The ends of beams and girders resting on masonry walls shall rest on the wall or masonry corbel at least 4 inches for beams and at least 6 inches for girders. When extending into the wall they shall be provided with an air space at ends, sides and top. Metal bearing plates must be provided. No beam or girder other than joists, shall have a greater depth than three times the breadth. Metal bearing plates may be omitted under joists.

A system of anchoring shall be adopted which will tie the building across at each girder and beam and hold all posts, beams and girders rigidly together at the connections and still allow any beam or girder to be self-releasing in case of failure from any cause, while the remaining columns and girders remain intact.

## SECTION 152.

### BEVEL OF FIRE CUTS

The ends of joists, beams and girders entering walls shall be cut to a bevel of such slope that the upper edge shall not enter the wall a greater distance than 1 inch nor less than  $\frac{1}{2}$  inch. This also applies to all roof and ceiling joists exceeding 4 inches in depth. No bevel to be made in such a way that the structural strength of the member, or its required bearing area, is decreased.

## SECTION 153.

### BRIDGING AND FIRE STOPS

(A) Joists over 14 inches in depth to have bridging every 6 feet; joists 12 and 14 inches in depth shall have bridging spaced not more than 8 feet apart; all joists under 12 inches in depth shall have bridging spaced not more than 10 feet apart, unless otherwise noted in detail. All roof and ceiling joists or rafters over 6 inches in depth shall be similarly bridged. Solid bridging shall be used over bearing partitions, supporting beams, girders or supporting truss chords. All bridging except as otherwise noted above, shall be regular cross bridging either 1x4 or 1 $\frac{1}{2}$ x3. Solid bridging shall be at least 2 inches thick and extend the full height of joist. Solid bridging may be used in lieu of cross bridging.

(B) All studs and furred walls are to have solid 2-inch fire stops spaced not farther apart than 10 feet. Fire stops shall be placed at top and bottom of all floor joists where same rest on stud walls. Provide fire stops at bottom of all ceiling joists when same rest on ribbon. Where ribbon occurs the fire stops shall be placed at bottom of ribbon. Ceilings with cove effect shall have fire stops placed at bottom edge of cove furring. Buildings with flared skirting effect at foundation shall have fire stop placed on top of first floor level when such furring for skirting leaves an air space between sheathing or outer covering of studs above first floor joists.

Wood furring on masonry or concrete walls shall be fire stopped similarly to stud walls. Fire stops shall fully fill the space so as to prevent a passage of fire. When plumbing pipes and other ducts or conduits pass through walls or partitions fire stopping shall be used.

## **SECTION 154.**

### **CUTTING OF JOISTS**

Joists shall not be cut in such a way as to weaken the joists, unless fully reinforced to develop the original strength. Notching in for conduits, gas or water pipes shall not be made a greater distance than thirty inches away from the supports when joists are more than 6 inches in depth. When 6 inches or less in depth the notching must be within 20 inches of the supports. No such notch shall exceed  $1\frac{1}{4}$  inches in depth. Notching the underside of joists is prohibited.

## **SECTION 155.**

### **JOIST AND BEAM FRAMING**

Joists resting on girders shall be lapped and spiked together, toe nailed to the beam or girder, or otherwise fastened or tied, forming a continuous tie. Beams, girders and trusses, resting on columns, posts, or piers, shall be properly anchored thereto, and also anchored or tied to the next abutting beam, girder or truss as the case may be. All wood beams, girders or joists in party walls or separating fire walls shall be separated from the adjacent wood members on opposite side of wall by a distance of at least 8 inches filled with solid masonry or concrete.

## **SECTION 156.**

### **HEADERS, TRIMMERS AND STIRRUPS OR HANGERS**

Headers and trimmers shall be proportionately increased to take care of the added loads and increased bending moments caused by the concentrated loads. Headers, trimmers and tail beams of long span or carrying heavy loads, including live loads exceeding 40 pounds per square foot, shall be properly supported and framed into one another, using iron stirrups, hangers or equivalent framing. Depending upon nails alone will be prohibited.

## **SECTION 157.**

### **BUILT-UP TIMBERS, CHORDS, LAMINATED FLOORS**

Built-up timbers, girders and truss chords, commonly known as laminated members, may be used when thoroughly spiked together and bolted at regular intervals.  $\frac{1}{2}$ -inch bolts shall be used when 1-inch boards are used, and  $\frac{3}{4}$ -inch bolts shall be used when 2-inch boards are used. No bolts shall be spaced more than 2 feet apart. Bolts to be staggered. Bolts shall be screwed up tight from time to time as the wood seasons and shrinks. Bolts may be omitted on beams supporting light loads, in dwellings and similar light duty structures.

Laminated, solid floors, built up by spiking together timbers or joists on edge—provided that the span does not exceed 50 times the net depth—will be permitted. Joints shall not occur in any manner which will weaken the floor. Allow sufficient space around outside walls for expansion and swelling.

## **SECTION 158.**

### **WOOD TRUSSES**

No permit will be issued until a detailed drawing and stress diagram or calculation sheet of truss or trussed beam is presented and approved. All roof trusses must be designed for a live load of 25 pounds per square foot, to which must be added the dead load including plastered or other ceilings, if any, and all other loads which may come upon them.

Where trusses are exposed the wood members must be heavy frame construction as follows: No strut, brace or diagonal shall be less than 3 inches in its least dimension, and no top or bottom chord shall be less than 5 inches in its least dimension. This paragraph need not apply to trusses under 30-foot span.

Laminated truss chords to be spiked and bolted together. The bolts may be omitted in trusses supporting light loads when the span is less than 30 feet. No joint in any built-up member shall come nearer than 4 feet to any other joint, unless sufficient splice plates of proper length are used. The said distance of 4 feet may be reduced to 2 feet when 1-inch boards are used.

All tie rods, tension rods and bolts shall have the threads carefully made and designed to fit snug and uniform in standard threaded nuts; all nuts shall be of sufficient size and fitted and threaded in such a manner as to develop the full strength of the rod measured at the root of the thread. This also applies to all turn buckles, sleeve nuts and other connections. All rods shall be screwed up tight at least once every six months for the first two years. Provide plate washers of sufficient size to properly distribute the stresses over the wood.

The net section after deducting all cut out shoulders, bolt holes, joints, seats and other gained-in places, or daps occurring at any given section, shall be figured as the effective area. Where chord members act as a beam between supports, the additional area required as a beam shall be added to the member. All truss designs shall bear the signature of the designer or the party responsible for the design.

## **SECTION 159.**

### **ANCHORS AND TIES**

Provide joist anchors all around building at all floors and roof. Anchors shall be spaced not more than 6 feet apart when walls are 8 inches or less in thickness and not more than 8 feet apart when walls are 12 inches or more in thickness. Anchors shall be of such size and design as to develop a safe tensile strength of 4000 pounds. Anchors entering hollow walls shall have end embedded in solid masonry or concrete. All anchors must extend at least 8 inches into the wall where possible. Anchors placed at ends of beams, girders and joists shall be fastened near the bottom of such members. Anchors placed at right angles to the joists or rafters shall extend over at least two joists or rafters and be securely fastened. Provide anchors at all ends of truss chords. Tie rods or equivalent shall be used in all

locations where arches and similar members exert a thrust in such a manner as to jeopardize the stability.

## SECTION 160.

### WOOD STUD FRAMING

Except as otherwise noted, no stud in any bearing wall or partition shall be less than 2x4 inches in size. When studs support more than one story above, same shall be not less than 2x6 or 3x4 inches in size. Balloon or ribbon construction will be permitted in three-story buildings, provided full size 1x4 ribbons or ledgers are gained tightly into the studs and all joists are well spiked to the studs. Studs shall be framed solid at corners and at intersections between one partition or wall and another in such a manner that no lath can extend from one room to another; 16 inches on center is hereby established as the standard spacing of studs. This spacing shall be reduced when heavy loads are to be supported and when necessary to insure stability.

All openings 4 feet and less in width shall have a double header, or a 4x4 across top. When opening exceeds 4 feet in width, same shall be properly trussed above or heavy lintels may be used. Lintels and headers over openings exceeding 3 feet in width shall not depend on nails alone at ends; extra studs must be cut in beneath with firm bearings at bottom. Openings exceeding 30 inches in width to have double studs at sides.

Studs in bearing partitions and walls, except when balloon construction is used, shall have double 2-inch top plates and not less than a single 2-inch bottom plate. Inside non-bearing partitions may have 2x3 studs and single plates, when 12 feet or less in height, and when exceeding 12 feet in height, 2x4 studs must be used. Inside non-bearing partition studs may be placed flatwise when used in the construction of dwellings, private garages and sheds.

Except as otherwise noted, all vertical studs must be placed with the greatest horizontal dimension at right angles to the course of the wall; 2x3 studs may be used in the inside bearing walls of one story dwellings only; provided they are not placed flatwise or used in walls where the story height exceeds 8 feet 8 inches in the clear. Under no condition will 2x3 stud bearing walls be permitted in any dwelling exceeding one story in height, nor shall 2x3 studs be used in bearing walls above the first floor. One-story private garages not exceeding 600 square feet in area, one-story private sheds, chicken houses and outhouses may be built using 2x3 studs in all bearing walls. 2x3 studs or less are prohibited in the outside or enclosure walls of dwellings, store buildings, large barns and work shops.

## SECTION 161.

### UNDERPINNING

Posts supporting floor joists in one-story buildings shall be at least 4x4 inches in size and spaced not more than 6 feet on center. The stringer or beam resting on top of these posts upon which the joists rest shall be

not less than 4x4 inches. The said vertical posts shall rest on solid masonry or concrete footings at least 12x12x8 inches in size. The bottom of posts to be protected from dampness and decay, using pitch or prepared 2-ply roofing between same and the masonry or concrete below. The above posts and footings shall be increased in number, or all underpinning and beams and footings increased in size when supporting both the first floor and floors above in frame buildings exceeding one story in height.

When one-story buildings of frame construction have stud walls and such stud walls are left exposed on the inside or are covered with any covering other than lath and plaster, or plaster board and plaster, they may have the above mentioned underpinning and concrete footings around the outside walls in lieu of a foundation, provided the posts and footings are placed not more than 5 feet on center.

All frame buildings exceeding one story in height and all one-story frame buildings which are plastered on the inside, must have solid masonry foundations, or approved equivalent in the form of large spread masonry piers and footings, when solid continuous walls are impracticable on account of the nature of the ground.

## SECTION 162.

### MUD SILLS AND WOOD BEARING PLATES

Board and batten houses without studs may have 3x6 mud sills in lieu of regular foundations. All foundation plates, sills or mud sills, whether resting on masonry, concrete or the ground, shall be redwood, western red cedar or cypress. When it is impossible to obtain such wood, other wood may be used, provided same is thoroughly coated with creosote or hot pitch on all sides, edges and ends. (Private garages and outbuildings shall have 2x6 redwood mud sills. When a masonry foundation is used the bottom bearing plate shall be not less than 2x4 redwood, or approved equivalent, as above noted). 2x6 redwood foundation plates shall be used under one-story frame buildings and 2x8 redwood foundation bearing plates must be used for frame buildings exceeding one story in height.

## SECTION 163.

### FRAMING AROUND CHIMNEYS, FLUES AND FIRE PLACES

All wood joists and rafters shall be kept at least 1½ inches away from the outside of all flues and chimneys. Trimmers and headers must be kept at least 2 inches away.

The header beam carrying the trimmer arch in front of a fire place shall be 24 inches in front of the rough chimney or fire place breast, or at least far enough away to insure a finish fireproof hearth at least 18 inches in the clear in front of the final finished front of the fire place. No fire place shall depend upon wood construction for support.

Trimmer beams shall be doubled or may have posts or

equivalent supports placed at ends of header in front of trimmer arch or hearth. Said supports shall extend to solid footings. No lath, shingles or combustible roofing shall come within  $\frac{1}{2}$ -inch of the outside of any chimney, flue or heater vent.

## SECTION 164.

### SHEATHING AND WOOD FRAMING IN GENERAL

(A) Except as otherwise noted, one-story frame buildings with stud walls may have regular inch board solid sheathing omitted beneath the siding or other outside finish, provided they are braced as follows: two-inch bracing pieces the width of the studs shall be cut in between the verticle studs at an angle approximating 45 degrees, the bracing to begin about 6 feet high at the outside corners and extend down both ways; when the outside wall exceeds 24 feet in length, an intermediate diagonal system of bracing shall extend from top to bottom plate. When openings interfere, the above system of bracing may be rearranged in such a way as to accomplish the same results.

(B) Two-story frame buildings without regular inch board solid sheathing beneath the outside siding or outside finish shall have a similar system of diagonal bracing in both stories as mentioned in paragraph (A), excepting that no part or section of the first story wall shall have a greater length than 8 feet without diagonal bracing.

(C) Three-story buildings of frame construction may have the upper two stories braced the same as the first and second stories as mentioned in paragraph (B), and the regular 1-inch solid sheathing omitted on the second and third stories; the first story, however, must be sheathed solid beneath the siding, or other outside finished surface.

(D) All frame buildings with shingled exterior may have skeleton sheathing in the form of 1x3 boards spaced 3 inches apart, or 1x4 boards spaced 4 inches apart, or 1x6 boards spaced 6 inches apart. For sheathing and bracing under plastered exteriors and veneered buildings, see specifications under those headings.

(E) No ridge board shall be less than 1x6 inches in size. Gable and hip roofs shall be tied and braced to prevent spreading of walls. Brace up the ridge sufficiently to prevent sagging. No rafter to be less than 2x4 and shall not be spaced farther apart than two feet. Ceiling joists shall be not less than 2x4 with spans not exceeding 13 feet, excepting that where the spans exceed 13 feet, the ceiling joists must be tied and trussed up to keep the clear span between spans or ties down to 13 feet. When ceiling joists are tied to the roof rafters, provide additional struts or braces to roof rafters.

(F) Wood stairs and steps shall have strong substantial stringers at least 2 inches thick and spaced not farther apart than 30 inches. The net distance between inner angle of supporting stringers and bottom edge of said stringers shall be not less than 4 inches for very light duty short flight stairs, and this distance must be

increased or suitably reinforced proportionately for long flights and heavy duty stairs.

(G) Joists shall not exceed 16 inches on center. Joists supporting bearing partitions or added loads shall be doubled or the spans shortened. Partitions parallel but not over joists shall have short pieces cut in between joists at regular intervals to support the partitions. No joists shall come within 8 inches of the ground in dry locations and must not be nearer than 12 inches of the ground in locations subject to dampness.

(H) If upon investigation, the type of construction used, overstresses or has a tendency to weaken any member, or jeopardize the general stability or rigidity of the structure, additional bracing, tying, trussing, bolting or anchoring shall be installed as may be necessary. Use proper size and sufficient number of nails and spikes throughout as required.

(I) Flashing or other approved expedients shall be used to prevent penetration of moisture in back of stuccoed and veneered surfaces.

## SECTION 165.

### UNIT STRESSES FOR STEEL AND IRON—FORMULAS

The allowable unit stresses in pounds per square inch for steel and iron shall not exceed the following:

#### DIRECT COMPRESSION

Rolled steel	16,000
Cast steel	16,000
Wrought iron	12,000
Steel pins and shop driven rivets (bearing)	20,000
Cast iron, extreme fibre stress compressive side	15,000

#### DIRECT TENSION

Rolled steel, net section	16,000
Cast steel, net section	16,000
Wrought iron, net section	12,000
Cast iron, net section	3,000

#### DIRECT SHEAR, NET SECTION

Rivets and pins (steel) Power driven	10,000
Field rivets (steel) Hand driven	8,000
Field rivets (iron)	6,000
Steel web plates	10,000
Cast steel	9,000
Cast iron	3,000

#### EXTREME FIBRE STRESS IN BENDING

Rolled and riveted steel beams	16,000
Rolled steel pins	20,000
Cast iron compression side	16,000
Cast iron tension side	3,000

Rolled Steel Columns: The allowable compressive stress in pounds per square inch for rolled steel columns shall not exceed the following:

$$S=16,000-70(L/R)$$

S=Allowable compressive stress per square inch.  
L=The unsupported length of column in inches.  
R=The least radius of gyration in inches.

Steel Pipe Columns: When filled with cement mortar or concrete, use the following formula to obtain the allowable compressive stress in pounds per square inch net steel section:

$$S=17,000-70(L/R)$$

When steel columns are not filled with cement mortar or concrete, use the following formula to obtain the allowable compressive strength in pounds per square inch of net section:

$$S=15,000-70(L/R)$$

When rolled steel columns are cast in concrete, or approved concrete fireproofing completely encloses the column and said concrete is not less than 2 inches in thickness at the thinnest part and firmly secured to the column by appropriate steel wire wrapping, the following formula may be used to obtain the maximum allowable compression stress in pounds per square inch of steel section:

$$S=17,000-70(L/R)$$

S=Allowable compressive stress per square inch.

L=The unsupported length of the steel column.

R=The least radius of gyration, of the steel column in inches.

In the above formula S must never exceed 16,000.

Cast Iron Columns: The allowable compressive stress in pounds per square inch for cast iron columns shall not exceed the following:

$$S=10,000-60(L/R)$$

Stresses due to eccentric loading shall be properly provided for in all column and strut design. S in the above formulas= the allowable stresses on the net section. The length of cast iron columns shall not exceed 70 times the least radius of gyration.

## SECTION 166.

### REINFORCED CONCRETE ALLOWABLE STRESSES

All reinforced concrete construction shall be so designed that the following unit working stresses per square inch shall not be exceeded:

(A) Extreme fibre stress under flexure	Lbs.
Extreme fibre stress in compression at support of continuous beams	750
Shearing stress in beams with horizontal reinforcement only	750
Shearing stress in beams thoroughly reinforced with horizontal and web reinforcement	50
Punching shear in concrete thoroughly reinforced for all other stresses	120
Actual shear on concrete in any case shall not exceed	120
Bond stress for plain mild steel bars	40
Bond stress for plain high carbon bars	80

Bond stress for steel wire 80  
Bond stress for twisted or deformed bars 120

(B) Diagonal tension steel 10,000

Tensile stress; new billet structural steel grade, plain or deformed, must not exceed 50% of elastic limit and never over 16,000

Tensile stress; new billet high carbon or cold twisted, must not exceed 45% of elastic limit, and never over 18,000

Tensile stress; rail or re-rolled steel, plain, hot or cold twisted or deformed, must not exceed 40% of elastic limit and never over 16,000

Tensile stress; wrought iron must not exceed 45% of elastic limit and never more than 12,000

Tensile stress for cold drawn wire 18,000

Compression in steel shall not exceed 15 times the compressive stress in the surrounding concrete.

Stirrups shall not be placed farther apart than 2-3 of the effective depth of the beam if they are used to add to the shearing resistance of the beam. Flanges of T beams shall not be considered as offering any shear resistance.

(C) REINFORCED CONCRETE COLUMNS: Except as otherwise noted, vertical reinforced concrete columns with sufficient horizontal ties and loops, shall be figured by the following formula:

$$P=F_c(A_c \text{ plus } nA_s)$$

P =Total allowable safe load on the column.

F<sub>c</sub> =28% of the ultimate strength of the concrete, per square inch, at 28 days.

A<sub>c</sub> =The effective area of the column.

A<sub>s</sub> =The total cross section of the verticle steel.

n =Modulus of elasticity ratio; E<sub>s</sub> divided by E<sub>c</sub>.

(D) Spirally reinforced concrete columns, when reinforced with sufficient vertical and spiral reinforcement as required by this ordinance, shall be figured by the following formula:

$$P_s=A_c \text{ times } F_c' (1 \text{ plus } 15p \text{ plus } 32p')$$

P<sub>s</sub> =Total allowable safe load on the column.

A<sub>c</sub> =The effective area of the column.

F<sub>c</sub>' =30% of the ultimate strength of the concrete, per square inch, at 28 days.

p =Ratio of vertical steel (not the area).

p' =Ratio of spiral reinforcement (not the area).

Under no condition shall F<sub>c</sub>' (1 plus 15p plus 32p') exceed 50% of the ultimate strength of the concrete at 28 days.

This section shall not be deemed to prohibit methods of calculation and use of stresses as adopted or recommended by the "Joint Committee on Reinforced Concrete."

(E) All reinforced concrete columns whose unsupported length exceeds 15 times the minimum dimension

of the effective area, shall have  $F_c$  reduced by the following reduction formula:

$$F_c'' = F_c (1.6 - L/25D)$$

$F_c''$  = Permissible working stress for  $F_c$  after being reduced.

$L$  = The unsupported length of the column.

$D$  = The minimum dimension of the effective area.

Under no condition shall any reinforced concrete column be used whose unsupported length exceeds 30 times the least dimension of the effective area.

(F) Under no condition shall steel in compression exceed "n" times the allowable compressive stress of the surrounding concrete.

## SECTION 167.

### TIMBER STRESSES, FORMULAS, TABLES

(A) The allowable unit stresses in pounds per square inch for the different kinds of wood, shall not exceed the following:

Kinds of timber:	Extreme fibre stress.	Compression and tension.	Shearing across grain.	Horizontal shear.	Compression perpendicular to grain.
Douglas fir—					
dense grade	1600	1200	1100	160	350
sound grade	1400	1000	1000	150	300
Pine, Sou. Yel.					
dense grade	1600	1200	1100	160	350
sound grade	1300	1000	1000	150	300
Oak	1400	1200	1100	160	500
Hemlock western	1300	900	800	100	200
Pine, Norway and western	1100	800	800	100	200
Pine, Eastern white	900	750	750	90	200
Redwood	800	750	750	60	150
Spruce	1000	900	800	100	200

(B) **WOODEN COLUMNS:** The allowable compressive stress in pounds per square inch for wooden columns shall not exceed the following:

$$S = C (1 - L/70 D)$$

$S$  = Allowable compressive stress per square inch for columns.

$C$  = Allowable unit stress for end bearing taken from second column of figures in above table.

$L$  = The unsupported length of column.

$D$  = The least horizontal dimension of the column taken at right angles to the length.

(C) **FLOOR JOISTS:** The following table applies to floor joists in all buildings where the uniform live load does not exceed 40 pounds per square foot; when joists support partitions, they shall be doubled or the spans shortened proportionately to the added load.

Minimum size of floor joists in inches	Greatest allowable span between supports	Greatest distance apart on centers in inches
2 x 6	9 ft. 8 inches	16
2 x 8	13 ft. 6 inches	16
2 x 10	17 ft. 0 inches	16
2 x 12	20 ft. 0 inches	16
2 x 14	23 ft. 6 inches	16
2 x 16	27 ft. 0 inches	16

(D) **CEILING JOISTS.** The following table applies to ceiling joists in all buildings where ceiling joists support plastered ceilings, wall board ceilings, plaster board ceilings, and light board ceilings only, but not attic floor or roof loads:

Minimum size of ceiling joists in inches.	Greatest allowable span between supports	Greatest distance apart on centers in inches
2 x 4	13 feet	16
2 x 6	17 feet	16
2 x 8	21 feet	16

(E) **ROOF RAFTERS:** The following table applies to all roof rafters which support no other load than wood shingles, prepared roofing, ordinary pitch and gravel roofing and similar light weight roofing material, but not floor or observation deck loads; the following sizes are based on the assumed live roof load as required by law:

Minimum size of roof rafter or joists in inches.	Greatest allowable span between supports.	Greatest distance apart on centers in inches
2 x 4	10 feet	24
2 x 6	14 feet	24
2 x 8	17 feet	24
2 x 10	20 feet	24
2 x 12	24 feet	24
2 x 14	28 feet	24

(F) All of the above floor, ceiling and roof joists or rafters are based on the strength of "sound grade" Fir or Southern Yellow Pine full 2 inches in thickness. When the thickness is less than 2 inches, the spans or distance between supports must be reduced proportionately. When such woods as Western Pine, Spruce, Redwood and other timbers of less strength are used, the spans must be reduced sufficiently to keep the unit working stresses within the allowable limits as permitted in this ordinance.

**PART SIX**  
**CONSTRUCTION AND REQUIREMENTS IN**  
**GENERAL**

**SECTION 168.**

**EXCAVATIONS, ETC., IN GENERAL**

Banks of excavations to be braced when necessary to prevent caving. No excavation shall extend below any wall, pier or column in such a way as to endanger same in the least. Drainage and seepage under or near any wall or footing shall be properly taken care of. Bottoms of excavations shall have uniform level surface, excepting that where the grade has an inclination of 15 degrees, or more, same must be stepped in horizontal courses. In all cases where bottom of excavation is softened by dampness, the soft earth must be removed before the foundation or footing is placed.

**SECTION 169.**

**CELLARS, BASEMENTS AND FLOORS OF SAME**

Provide at least 6 feet 6 inches between all cellar floors and girders supporting floor joists above. The clear ceiling height for basement rooms used for sleeping or living purposes shall be at least 9 feet for hotels, 8 feet 6 inches for tenement houses and 8 feet for dwellings.

All Class B and C buildings within the Inner Fire Limits shall have the ceilings over every basement or cellar, metal lathed and plastered at least  $\frac{3}{4}$ -inch thick, using cement-lime plaster or approved equivalent; hard wall gypsum plaster is prohibited wherever there is any tendency for dampness. "Slow burning" construction may have the metal lath and plaster omitted.

Cellar and basement floors under business buildings used for storage or occupancy, shall be concrete at least 3  $\frac{1}{2}$  inches thick. Basement floors used for living quarters to be concrete or may be of wood construction where there is no danger of rot or dampness.

**SECTION 170.**

**FILL UNDER FLOORS AND WALLS, CONCRETE FLOORS**

When concrete or other masonry floors are laid over filled ground, the fill shall be alternately soaked and tamped repeatedly before concrete or other masonry floors are laid thereon.

When excavations are made to a greater depth than required for walls or footings, the extra depth shall not be filled with earth. Concrete must be used in every case.

**SECTION 171.**

**VENTILATION UNDER JOISTS**

There shall be openings left in the foundations as nearly opposite as possible for ventilation under floors or joists. Provide at least 100 square inches of ventilation openings for each 100 square feet of area or frac-

tion thereof. When conditions are such that openings in foundations are impossible, openings as above mentioned shall be placed in the floors or equivalent ventilation obtained. This section does not apply to concrete or approved fireproof floors resting on the ground.

**SECTION 172.**

**FILL BENEATH PORCHES, STEPS, ETC.**

When necessary to fill under any concrete, cement or masonry porch floor, landing or steps, the fill shall be tamped, or flooded firm and solid. Brace walls while tamping is being done. There shall be a masonry retaining wall all around fill. No landing or porch fill retaining wall to be less than the following:

If of concrete	6 inches thick
If of brick	8 inches thick
If of rubble stone	10 inches thick

Walls over 30 inches in height to be increased in thickness, 1  $\frac{1}{2}$  inches for every additional foot or fraction thereof. No masonry or concrete wall shall start on top of the ground.

In extra dry locations, wood retaining walls may be used under the house side between porch and open space beneath house, if made of at least 2 inch redwood boards, supported with 4" x 4" redwood posts 3 feet 0 inches or less on center.

**SECTION 173.**

**PORCH SUPPORTS, SLOPES, ETC.**

When wood construction instead of fill is used beneath the masonry or concrete porch or landing floors, same shall be of same construction as main first floor construction required for house, excepting no 2x6 joists shall span over 8 feet. Joists shall be covered with one layer of heavy waterproof building paper or equal; laps to be at least 4 inches.

If concrete is used over wood, same shall be at least 2 inches thick, reinforced for temperature stresses with galvanized chicken netting placed  $\frac{1}{4}$  inch above wood flooring, and at least 3 inches when not reinforced; the concrete and topping to be cut through and tool jointed every 10 feet or less; joists to be waterproofed with pitch or other equivalent elastic waterproofing. All porch floors, when of wood, including landings and outside steps, shall have a slight slope down away from building.

**SECTION 174.**

**ARCHES AND LINTELS**

Masonry arches shall have sufficient strength to safely sustain the weight and pressure which they are designed to carry. Tie rods are to be used when necessary to secure stability, when end abutments are too light to resist the thrust.

Openings in masonry walls shall have masonry arches, reinforced concrete, steel or iron lintels. The bearing for lintels over small openings shall be not less than 4 inches at each end; said bearing shall be proportionately increased when span is increased or when heavy loads are applied. Steel lintels supporting heavy loads whose

span exceeds 6 feet in the clear shall have bearing plates and anchors at each end or equivalent.

Stone lintels are limited to a span of 6 feet and under. Plain concrete lintels shall not exceed 4 feet in span. Cast iron lintels exceeding 6 feet in span are prohibited. Wood lintels shall not be used to support masonry walls under any condition, excepting when supporting hollow tile walls, and hollow tile veneer walls not exceeding 18 inches in height, in which case wood lintels shall be metal lathed and cement plastered on all exposed faces and edges.

## SECTION 175.

### STAIRWAYS IN GENERAL

(A) All stairs shall be framed and built of such material as will meet the requirements of the class of buildings in which they are built and shall have sufficient strength to support a uniform live load of 100 pounds per square foot. Outside steps shall have sufficient strength to support a uniform live load of 150 pounds per square foot. Excepting in Class A buildings, no main stairway shall open directly into any room, hall, corridor or floor space having an area greater than 1000 square feet, unless stairway is surrounded by a masonry or approved fire resisting wall similar to elevator shafts. All openings in such stair shaft or enclosure shall be protected with fire doors or fire windows.

(B) No door shall open immediately upon a flight of steps. A landing projecting at least the width of the door plus 2 inches shall be provided. No arrangement of treads known as winders will be permitted in any building unless the full size tread is maintained up to a distance not exceeding 16 inches from center line of inside hand rail. Unimportant stairs in private residences may have as many as two winder risers on a landing. Stairs having wood carriages shall be fire stopped at least once in the middle portion of each flight.

(C) No stairway shall surround or run along side of any elevator, flight or vent shaft unless separated from the same by masonry or approved fire resisting walls. Obstructions of any kind are prohibited on any stair, nor will explosives, inflammable compounds, or combustible material be allowed to be under or adjacent to any stairway. No closet or enclosed storage place shall be placed under any wooden stairway when the building exceeds two stories in height. In two story buildings with frame stairs, closets may be placed under the same, provided all walls and ceiling or soffit under stairs are fireproofed with metal lath and plaster.

(D) Except as otherwise noted in this ordinance, every stairway hereafter constructed shall be constructed as follows: No rise shall be more than 8 inches, and the tread shall be not less than 9 inches under any condition. There shall be no change in the run or rise between floors, and the clear head room between the nearest nosing of the stairway and the nearest soffit or construction over head shall be not less than 6 feet and 6 inches. The depth of every landing in a stairway shall be not less than the width of the stairway and all treads shall be of equal width for every run of stairs, and shall not vary in width

in the width of stairs, except as especially specified herein for winders.

Stairways shall be continuous from the ground floor level to the top story and the flights of such stairways shall be constructed one directly above the other, or shall be constructed so that each flight shall be in plain view of each succeeding flight; provided, however, that half of the stairways from upper floors may terminate at the second floor, in the event that the aggregate width of the stairways, from the first to the second floor, are increased not less than 50%. Every stairway shall have at least one hand-rail, and if the stairway be 4 feet or more in width, shall have hand-rail on each side thereof. The width of all stairways shall be measured in the clear of all projections, except the baseboards, and except the hand-rails and newel posts, which may project not more than 4 inches.

(E) All hallways, passageways, platforms and enclosures leading to or forming a part of the stairs, shall be not less in width than the minimum width required for stairs. All stairs and landings (except in private dwellings), when permitted to be built of wood, shall have soffits thoroughly protected with metal lath and plaster. The main stairs at first floor shall be separated from basement stairs in such a way that there will be no tendency to miss exit and rush into basement, should people from upper floors rush down during a panic.

Every basement used for manufacturing purposes, exhibition, or sale of goods or mercantile purposes, shall have a separate stairway at least 4 feet wide for every 6000 square feet of basement floor area, or fraction thereof. Said stair enclosure, and halls connecting therewith shall be of masonry or other approved non-combustible material.

(F) No stairway above second floor shall be located more than 100 feet from any part of the building unless there are other stairways to take care of that part of the building more than 100 feet away from the stairway in question. When two or more stairways are required, said stairways must be kept as far away from each other as possible. There shall be at least one stairway 3 feet 6 inches wide for every 6,000 square feet of floor space, or fraction thereof, above the first floor; further, when more than 200 persons are stationed or employed above first floor, each stairway is required to be increased 6 inches in width for each 100 persons or fraction thereof above 200 persons. All Class A office buildings shall have at least one stairway 3 feet 6 inches wide for every 9000 square feet of floor area, or fraction thereof.

(G) The blocking or placing of encumbrances or storing of material in any exit, aisle, main passageway, or stair in any public building, business building, commercial building, factory or place of amusement, is hereby prohibited.

## SECTION 176.

### STAIRS IN PUBLIC HALLS, AUDITORIUMS, ETC.

All public halls, dance halls, assembly halls, lodge halls and churches, shall have a main stairway at least 4 feet wide for the first 100 people, or fraction thereof,

and stairs shall be increased 6 inches in width for each additional 50 people or fraction thereof above the first floor. When more than 600 people can be accommodated above the first floor, there shall be at least two main stairways 4 feet or more in width. This also applies to stairways leading to basement when basements are used as audience rooms, class rooms, or other public assembly rooms.

No portion of any balcony or gallery shall be more than 60 feet distant from a stairway. Any balcony or gallery seating 50 people or less, shall have stairway not less than 3 feet wide. When seating between 50 and 75 people, stairway shall be not less than 3 feet 6 inches wide, and when seating between 75 and 100 people, the stairway shall be not less than 4 feet wide. When gallery or balcony seats more than 200 persons, the stipulations and requirements as mentioned in first paragraph shall govern. Stairs in any building when used by the public shall be at least 3 feet wide in the clear, except as otherwise required and mentioned above.

When any of the above buildings are capable of seating or accommodating more than 800 people, the same shall meet the requirements as to means of exit and stairs laid down for theatres proper.

When straight stairs turn directly on themselves, a landing of the full width of both flights shall be provided without any steps or winders on the same. Stairs turning at an angle shall have full width and depth landing without winders or steps. Clear head room above stairs to be at least 7 feet 6 inches. Nothing herein shall conflict with special requirements for moving picture shows, schools, hospitals, or theatres. No chairs, seats, or other obstructions will be permitted on stairs, public passageways, or aisles.

## SECTION 177.

### PENT HOUSES

The walls of pent houses on Class D buildings shall be wood studs metal lathed and plastered over solid sheathing on the exterior, or tin covered.

Should any pent house or other similar structure on any building come within 3 feet of a party wall or division fire wall, such walls shall be a foot higher and 2 feet greater in width than the said pent house or similar structure. Also see under heading "Class A, B and C Structures in General."

Pent houses are structures used for enclosures of tanks, roof and elevator machinery, stair and scuttle bulk heads. Pent houses exceeding in area 10% of the area of the building, also sleeping rooms, sample and storage rooms, work shops and tool rooms above roofs, shall be considered an added story. No hollow tile or cement block pent house wall shall be less than 6 inches in thickness, and such walls shall be plastered on both sides.

## SECTION 178.

### MEZZANINE AND BALCONY

To distinguish between a mezzanine and a balcony—when a balcony exceeds 40% of the floor area below it, it will be classed as a mezzanine, and when a mezzanine

exceeds 70% of the floor area below, it will be classed as a story.

## SECTION 179.

### RAT-PROOFING OF BUILDINGS

All buildings shall be constructed so as to be as impervious as possible to the ingress of rats and other vermin. Extra precautions shall be used in all buildings in the Inner Fire Limits, and within 1000 feet of the ocean and bay. The joists on first floor to be protected at bearings including the partitions coming over same. Use masonry, concrete, or strips of heavy metal wire screen or sheet metal. Openings, ducts, chases, etc., through which rats might have entrance shall be protected with  $\frac{1}{4}$  inch mesh galvanized hardware cloth, or approved equivalent, where possible.

## SECTION 180.

### ALLOWABLE FLOOR AREAS

In ever building of the character named in this section, the minimum are in square feet of any floor between fire walls or exterior walls shall not exceed the following limitations:

Fronting	Class A	Class B	Class C	Class D
on				
One street	20,000	10,000	7,500	5,000
Two streets	25,000	15,000	10,000	7,500
Three streets	30,000	20,000	10,000	10,000
Four streets	30,000	20,000	10,000	10,000

When approved automatic sprinklers are installed on each floor, the above areas may be increased 100% for Class A buildings; 75% for Class B buildings, and 50% for Class C and D buildings.

For purposes of this section only, permanent open spaces ten feet or more in width, when running full height and full length or width of a building may be considered as streets in connection with Class A or Class B buildings. Similar spaces twenty feet or more in width may be considered as streets in connection with Class C buildings.

No wall or part of wall in any building shall be removed to produce a larger floor area than allowed in this section. Openings in division fire walls and in party walls shall be protected with two automatic fire doors, one on each side of the wall.

## SECTION 181.

### HATCHWAYS, SCUTTLES, ETC.

Every building shall be provided with a hatchway to attic space or a space between ceiling joists and roof rafters. Except as otherwise noted, every building other than private residences and outbuildings shall have hatchway or scuttle to the roof, with lid or cover at roof so arranged that such cover or lid can be securely fastened or unfastened at will from the inside. When lid is of other than non-combustible material, the same shall be covered with sheet metal or approved fireproof equivalent. The scuttle curb above roof shall be at least 6 inches above the roof surface.

The hatchway to roof must be located in the public hall or stair hall in close proximity to head of stairs,

when building is more than one story in height. The space between ceiling and roof forming shaft to scuttle or roof hatch shall be lined with metal lath and plaster, or approved equivalent fire resisting lining. See under heading "Class A, B and C Structures in General."

All residences must have at least a 24 inch by 24 inch hatchway to attic space; this hatchway must be conveniently located in a closet, hall or room.

## **SECTION 182.**

### **SPACES UNDER ROOFS**

The space between the ceiling and roof in all Class C or Class D buildings shall be divided by solid redwood board partitions or equivalent, dividing such space into areas not exceeding 3000 square feet each. Doors shall be provided so that access may be had to such compartments. All of such areas shall be properly ventilated, allowing at least 100 square inches of vent opening per 500 cubic feet of space.

## **SECTION 183.**

### **ROOFING AND ROOF CONSTRUCTION**

Tar and gravel roofs, patented and prepared roofing shall be of such material and workmanship as to insure against leaks which will damage or jeopardize the strength or stability of the structure.

When renewing any roofing within the Inner Fire Limits, a permit shall first be obtained from the Building Inspector. Shingles and other combustible roofing shall not be used within the Inner Fire Limits. Shingle and similar wood roofs are prohibited on all public garages, auto repair shops, Class A and B buildings, and Class A, B, and C buildings used for public assemblage. It shall be unlawful and a violation of this ordinance for any person to build or maintain a fire on any roof, or directly on any pavement, or sidewalk.

## **SECTION 184.**

### **TOWERS AND SPIRES, STEEP ROOFS**

The height of buildings shall not exceed the heights given under the different classes, except that pent houses, towers and spires above the roof may be used when the size, construction and locations are approved by the Building Inspector.

When the pitch of any roof exceeds 80 degrees from the horizontal, it shall be classed the same as the main external walls of the structure, and shall be equivalent in its fire resisting qualities. Any roof construction within the Inner Fire Limits whose pitch exceeds 50 degrees from the horizontal shall be constructed of non-combustible material throughout.

## **SECTION 185.**

### **ROOF AND YARD DRAINAGE**

Every building within the Inner Fire Limits, and all commercial buildings, public buildings, hotels, tenement houses, public garages, and store buildings, when located any where in the City of San Diego, shall be provided with at least No. 26 gauge galvanized iron or steel pipe

water conductors of sufficient number and capacity to convey all surface drainage from the roof to curb line, and discharge into the gutter. Every conductor pipe shall be constructed with an overflow not more than 10 inches above the roof level at its lowest point. All drains under walks to curb to be cast iron, copper, galvanized water pipe or cement pipe, with tight joints.

The above drainage applies to all other buildings not enumerated above, including dwellings, when there is danger of damaging or making untenable the adjacent property, or jeopardizing the foundations or footings of any building or structure. All area-ways, court floors, sumps and spaces between buildings shall be kept free from water and properly drained where possible.

## **SECTION 186.**

### **SKY-LIGHTS**

All sky-lights except in Class D buildings shall have metal or other approved non-combustible frames and sash, and the frames and parts thereof shall be riveted or otherwise securely fastened in addition to any soldering. All sky-lights, except as otherwise noted, shall be glazed with approved wired glass at least  $\frac{1}{4}$  inch thick. This section applies to either vertical, horizontal or inclined sky-lights. No glass of any sky-light or window shall come within 8 inches of the roof.

No wired glass shall be used in the sky-light at the top of elevator, stair, dumb waiter or vent shafts, nor shall wired glass be used over theatre stage. Such sky-lights as mentioned in this paragraph only shall be non-combustible frames and sash glazed with ribbon or prism glass; glass to be protected above and below with heavy galvanized wire screens, mesh not to be less than  $\frac{1}{2}$  inch, nor more than one inch. Sky-lights at top of elevator and stair shafts shall be at least  $\frac{1}{2}$  the area of the shaft. Wood frame sky-lights will be permitted on all dwellings outside the Inner Fire Limits.

## **SECTION 187.**

### **TANKS**

Tanks of more than 500 gallon capacity placed within, on or above the roof of any building shall have main supports of steel, masonry or reinforced concrete. Beams shall rest on steel girders, iron or steel columns, masonry or reinforced concrete. The supporting beams and girders shall be securely framed together and properly built and tied into the adjacent walls, columns and other supporting members. When possible, tanks shall be placed near the corner of the building. Tanks supporting more than 1000 gallons shall have steel or iron supporting members fireproofed. Tanks of 500 gallons capacity or less shall be supported on heavy timbers. All platforms to be floored with at least 2 inch thick flooring; no joist to be less than 4 inches in its least dimension.

Isolated tanks on towers or supports exceeding 60 feet in height shall be supported on a non-combustible frame work. When the height to the platform does not exceed 60 feet in height, slow burning construction is to be used for the supporting frame work. No frame work or skeleton tower shall be enclosed with wood or other

combustible material. Isolated tank supports shall rest on concrete or masonry foundations.

Wood roofs on tanks shall be covered with tin; hoops of wooden tanks to be round wrought iron or steel. All tanks shall have a drain at bottom. Tanks exceeding 200 gallons capacity shall have at least a 4 inch outlet with gate valve, so tank may be drained in case of emergency.

## SECTION 188.

### FENCES AND BARB WIRE

(A) Fences built of wood boards, lattice, or other combustible material are prohibited within the Inner Fire Limits. Wood posts when not less than 6 feet apart may be used in combination with wood cross rails, provided wire or sheet metal fencing is used.

(B) No solid fence shall be erected or maintained in the Outer Fire Limits exceeding 6 feet in height above the ground, unless built as an enclosure for a baseball ground, amusement park, athletic park, car barn or railroad repair yard, or approved similar purposes, provided in such case the fence shall not exceed 10 feet in height.

The foregoing restrictions on the height of fences shall not be construed to prevent the use of properly constructed wire fencing or strands above the heights specified, nor shall they prohibit the use of lattice fences having not less than 50% of openings. Such lattice fences shall not exceed 8 feet in height. No barb wire shall be used less than 7 feet above the ground or grade along any public thoroughfare unless there be no walks and streets are not graded.

No barb wire or other similar fencing or obstructions shall be installed in or near any building or structure in such way as to hinder the operation or work of firemen or police.

## SECTION 189.

### METAL LATH AND PLASTER FIRE PROTECTION

In frame construction where surface fire protection is required (except as otherwise specified), metal lath and Portland cement plaster will be deemed to fill the requirements; provided that the metal lath does not weigh less than 50 ounces per square yard, and is not less than No. 24 gauge. All metal lath to be galvanized steel or approved equal, rust resisting metal lath. The total net thickness of lath and plaster combined to be at least  $\frac{3}{4}$  inch. Hard wall plaster may be used in lieu of cement plaster on interior walls where there is no danger of dampness. Supports for metal lath shall be not more than 16 inches on center.

## SECTION 190.

### PLASTER BOARD; FIREPROOFING

When approved, for interior work, plaster board may be used in lieu of metal lath for walls, ceilings, etc., provided it is put on and meets the following specifications:

Plaster board shall be composed of pure gypsum, manila fibre, or other similar approved material; provided, however, that not less than 75% of such material shall be non-combustible. Under no condition shall such

plaster board be less than  $\frac{3}{8}$  inch thick. Plaster board shall be of such texture and construction as to form a firm key or bond between the plaster board and the finish plaster. No studs, supports, rafters, furring strips or joists upon which plaster board is applied shall be more than 16 inches on center.

When wood supports are used the plaster board shall be securely fastened by means of nails. Such nails shall be not more than 6 inches apart in one direction, and 16 inches apart in the other direction; heads of nails to be not less than  $\frac{3}{8}$  inch diameter.

When the supports are of metal, plaster board shall be fastened with No. 14 galvanized wire, or with metal clips spaced the same as required for nails. All plaster board shall have applied thereon at least one coat of hard wall plaster not less than  $\frac{3}{8}$  inch thick.

**NOTE:** When plaster board is less than  $\frac{3}{8}$  inch thick, but not less than  $\frac{1}{4}$  inch and is put on as above and plastered with  $\frac{1}{4}$  inch hard wall plaster, it will be recognized as a substitute for wood lath and plaster only.

## SECTION 191.

### FIREPROOFING IN GENERAL

In Class A buildings, and in basements of Class B buildings, all parts of the steel iron and cast iron supports and frame shall be protected with fireproofing. Fireproofing shall be continuous with no pipes, conduits or chases in same. In Class A buildings, suspended ceilings will not be considered as fireproofing for the steel and iron construction above, unless at least 2 $\frac{1}{2}$  inches thick, and constructed entirely of non-combustible materials. Such space between suspended ceiling and construction above shall not be used for storage purposes.

## SECTION 192.

### FIREPROOFING AND FRAME SUPPORTS

All fireproofing to be brick, terra cotta, concrete, gypsum blocks, or double layer of metal lath and plaster, as follows:

All exposed metal on columns shall be protected with at least 4 inches of brick, terra cotta, or gypsum blocks, excepting the extreme outer edges of flanges, lugs and brackets, in which case said fireproofing when properly secured may be not less than 2 inches in thickness. Two-inch fireproofing will be sufficient for the exposed edges and surfaces of girders, lintels, tie rods and structural frame work, other than columns; column fireproofing to be tied around columns every foot in height, using at least No. 9 galvanized wire or equivalent reinforcing. All other fireproofing to be properly tied and anchored in place, using No. 9 galvanized wire, metal bands, straps or approved equivalent, spaced not farther apart than 8 inches.

In lieu of the above, 3 inches of solid concrete may be used for fireproofing of columns and not less than 2 inch solid concrete may be used for beams, girders, tie rods, brackets and other structural frame work. The extreme outer edges of flanges, lugs, brackets and other structural frame work shall be protected with at least 1 $\frac{1}{2}$  inches of concrete. All steel and iron fireproofed

with concrete shall be wrapped with No. 9 galvanized wire in bands or spirals. Strands of such wire shall be spaced not farther apart than 8 inches. Heavy wire fencing or 1 inch mesh chicken wire may be used in lieu of the plain wire.

If metal lath and plaster be used in lieu of the above fireproofing, the thickness of the metal lath and plaster combined shall be the same as required for concrete fireproofing mentioned in the preceding paragraph. The fireproofing shall be put on in such a way that the first layer of metal lath shall be  $\frac{1}{4}$  inch away from the steel or iron members, and the second layer of metal lath shall be at least  $\frac{5}{8}$  inch from the outer exposed surface of the fireproofing. The two layers of metal lath shall not come in contact with each other in any location.

In Class A buildings the air and other space back of fireproofing shall be filled with plaster or mortar. All mortar used for masonry fireproofing to be cement-lime mortar or better. All steel iron and structural members shall be painted or otherwise properly protected against rust before fireproofing is applied. All fireproofing shall be built around the members to be protected in such a way that there will be no possible danger of fireproofing coming away or separating from the steel or iron. Cement mortar plaster or approved equivalent shall be used when plaster and metal lath are used. Steel members thoroughly embedded in approved concrete need not be painted.

### SECTION 193.

#### UNLAWFUL TO CONCEAL

It shall be unlawful for any lather or other person to lath any wall, partition or ceiling in any Class B, C or D building or structure or to cover the same with plaster board, beaver board, wood boards, or other covering until the Building Inspector's RED card of approval and acceptance is posted in the building. No such RED card of acceptance can be posted in any building until the general construction of frame, rafters, joists, flues, vents, fireplace, hearth and foundations are inspected and approved. No walls, partitions, or ceilings can be covered until all electric wiring, plumbing and gas fitting has been finished and accepted by authorities having jurisdiction.

No floors shall be laid in bathroom, water closet or any similar compartment until the plumbing, piping and construction adjacent to same has been installed and approved by authorities having jurisdiction.

### SECTION 194.

#### WALL BEDS, BED VENTILATION

All wall beds and disappearing beds which roll, slide or disappear into a pocket or recess or closely fit into a closet with no more than one foot of free space all around the bed, shall have such closed spaces or pockets lathed and plastered, or lined with sheet metal, or plaster board at least  $\frac{3}{8}$  inch thick. A fresh air vent at least 4"x10" in area shall be provided for ventilating such space to outside air, using continuous galvanized iron vents between the studs or joists.

## PART SEVEN

### SPECIAL REQUIREMENTS AND RESTRICTIONS ON SPECIAL STRUCTURES

#### SECTION 195.

##### SPECIAL REQUIREMENTS FOR BUILDINGS

Except as otherwise noted, nothing under the following sections shall nullify any of the regular provisions and stipulations of this ordinance. The following being the special requirements and restrictions for special kinds of buildings and structures.

#### SECTION 196.

##### CHANGE OF OCCUPANCY

It shall be unlawful to change the use or occupancy of any building unless the building shall be made to meet the requirements of the new purpose to which it is intended to be put. An inspection to determine this shall be made by the Building Inspector.

#### SECTION 197.

##### ONE-STORY CHICKEN HOUSES AND SMALL SHEDS ONLY

All such structures shall be built of sound substantial material of such kind as not to create a nuisance, become a conflagration breeder, or endanger the health, welfare, life or limb of any person or firemen entering in or upon such structures. No woodwork of such structures shall come in contact with the ground unless same is redwood or coated with asphaltum, pitch or similar wood preservatives.

Mud sills, or bottom plates, resting on the ground .....	2 x 6 Redwood
Bottom plates, uniform bearing on masonry or concrete .....	2 x 4 Redwood
Plates and stringers, resting on piers not more than 6 feet apart .....	4 x 4 Redwood
Floor joists, not exceeding a span of 6 feet .....	2 x 4 Fir 24" O. C.
Floor joists, not exceeding a span of 12 feet .....	2 x 6 Fir 24" O. C.
Flat or lean-to roof joists, not exceeding a span of 10 feet .....	2 x 4 Fir 30" O. C.
Flat or lean-to roof joists, not exceeding a span of 12 feet .....	2 x 4 Fir 24" O. C.
Studs not exceeding a height of 10 feet .....	2 x 3 Fir 30" O. C.

Stud walls to have at least a 2x3 top and bottom plate. If double top plate is used, the studs may be not more than 3 feet apart. Board and batten walls may be used if provided with 2x3 top plate or ribbon. Rigid substantial construction will be enforced. Keep floor joists in the clear above ground. Gable roofs to have tie or collar beams. The above construction cannot be used for garages, large sheds, or barns, work shops, living quarters, stores, storage, etc.

## SECTION 198.

### PORTABLE HOUSES, TEMPORARY SHEDS, BEACH HOUSES, TENTS

Nothing in this ordinance shall be construed to prohibit the erection of portable houses, provided the construction shall conform to the general requirements for permanent cottages, bungalows, etc., except as otherwise noted. The erection or moving of a portable house will require a permit. Plans and specifications shall first be submitted. All portable houses shall have at least 3-inch by 6-inch redwood sills or approved equivalent. Portable Class D houses or tents will not be allowed within the Inner Fire Limits. Permanent tent houses are prohibited within the City of San Diego, California.

Temporary beach houses may be built with 2 x 3 ceiling joists, studs and rafters; 2 x 4 floor joists may be used. The total width of such buildings must not exceed 14 feet; 2 x 3 rafters are prohibited for flat or lean-to roofs when the span exceeds 8 feet. No 2 x 4 floor joist shall have a clear span exceeding 6 feet.

Sheds not exceeding 20 feet in height may be erected within the Inner Fire Limits to facilitate the erection of buildings, but must be removed when the buildings are completed. Sleeping tents, canvas structures, etc., are prohibited within the Inner Fire Limits. Tents are prohibited on all roofs.

## SECTION 199.

### ONE-STORY PRIVATE GARAGES, LARGE SHEDS, BARNs

Mud sills or bottom plates resting on the ground	2 x 6 Redwood
Bottom plates, uniform bearing on masonry	2 x 4 Redwood
Plates or stringers resting on piers not more than 5 feet O. C.	4 x 4 Fir
*Floor joists, not exceeding a span of 10 feet	2 x 6 Fir 16" O. C.
*Floor joists, not exceeding a span of 14 feet	2 x 8 Fir 16" O. C.
Flat or lean-to roof joists, not exceeding 10 feet span	2 x 4 Fir 24" O. C.
Flat or lean-to roof joists, not exceeding 12 feet span	2 x 4x Fir 16" O. C.
Studs not exceeding a height of 12 feet	2 x 3 Fir 24" O. C.

Stud walls to have top plate and single bottom plate. Board and batten walls may be used if provided with 2 x 3 top plate or ribbon. Rigid substantial construction will be enforced, diagonal bracing to be used when necessary. Keep floor joists at least 6 inches above ground in the clear.

\*Floor joists for private garages shall not exceed a span of 8 feet when 2 x 6 joists are used, and shall not exceed a span of 12 feet when 2 x 8 joists are used. All wood floors in private garages must be protected with 3 inches of concrete, or be entirely covered with No. 22 gauge galvanized iron. No fir or pine shall rest on masonry unless protected with pitch or equivalent between

the wood and masonry. Gable roofs to have tie beams; no ridge board to be less than 1 x 4.

If a private garage has a living room above, the entire ceiling over garage and inside walls proper shall be metal lather and plastered, or be of fireproof construction. When such private garages are built in or form a part of any residence, dwelling or sleeping quarters, the walls and ceiling shall be fireproofed with metal lath and plaster. When a private garage is located within 3 feet of any dwelling or other inhabited building, but does not form a part of such building, the entire wall of garage nearest such inhabited building and garage ceiling and end walls for a distance of 2 feet away from such wall shall be metal lathed and plastered. Private garages must be ventilated with at least 200 square inches of air inlet for each car, 100 square inches near the floor, and 100 square inches near the ceiling or roof. Doors of garages must not swing out over any public walk. Private garages containing room for more than 5 cars must be built with masonry enclosure walls as approved, or each unit of 3 cars must be separated with an unpierced masonry wall and parapet at least 6 inches in net thickness.

A permit will be required for the erection of all private garages, regardless of cost. Before such permit is issued, a sketch or fully written description shall first be submitted, showing location in relation to other buildings, size, floor construction, dimension and kind of material used. No private garage can be used for a dwelling, public garage, living or sleeping quarters, public building, factory, store or assembly room.

The building of individual units or multiple sections of so-called private garages and then renting or leasing same to the public for the storage or housing of automobile, trucks, gasoline, steam or electric propelled vehicles is hereby prohibited, unless constructed with masonry walls, partitions and floors. Inside partitions may be of studs metal lathed and plastered on both sides.

## SECTION 200.

### BOARD OR CALIFORNIA HOUSES

All board or California types of houses shall have the exterior walls constructed from redwood boards not exceeding 12 inches in width or fir boards not exceeding 10 inches in width; boards to be kept 1/2 inch apart with the dividing crack protected and covered with 3 inch battens. Tongue and groove Fir flooring may be used for side walls, provided a 2 x 3 continuous horizontal band or intermediate ribbon, nailed to all boards between top and bottom is used. A 2 x 4 top plate shall run all around to support all rafters and ceiling joists. All roof and floor construction shall meet the same requirements as are specified for regular plastered dwellings. Board or California types of houses shall not exceed one story in height, nor shall such construction be placed above the first story of any structure. The clear ceiling height must not exceed 9 feet 6 inches, nor be less than 8 feet. The maximum length of an exterior wall shall not exceed 18 feet, unless reinforced by a cross wall or otherwise stiffened as approved.

## SECTION 201.

### DWELLINGS IN GENERAL

All dwelling lots shall have unoccupied areas of not less than 20% of the lot. Such unoccupied area shall be entirely free from any buildings, sheds, garages or similar structures. Every room, including kitchens, shall have at least one window which shall open directly upon a street, public property, public alley, or upon an unoccupied area not less than 4 feet in its least dimension, and containing an area of not less than 36 square feet. Such area must be located on the same lot upon which the dwelling is situated. Such windows shall have an area equal to  $\frac{1}{8}$  of the floor area of the room, and must be double hung or hinged. The above mentioned unoccupied area may be reduced to not less than the minimum dimensions of 2' x 5' for bath rooms only.

Every room in every dwelling shall have a ceiling height of at least 8 feet in the clear, excepting that bath rooms and water closet compartments may have a clear ceiling height of not less than 7 feet. Dressing rooms not exceeding 30 square feet in area may have the clear ceiling height reduced to 6 feet 6 inches. Such dressing rooms must not be used for living or sleeping purposes.

The general construction shall be sufficiently strong and substantial and of proper materials. All construction and covering shall be constructed in such a way as not to jeopardize the health or safety of the occupants; proper shelter shall be provided and the occupants shall be protected against the elements and undue dampness. Any system of building or construction which will not fulfill the above conditions shall be rejected. 2 x 3 roof rafters are prohibited. Apex of rafters shall have ridge board securely braced or supported from a bearing partition. Pitched roofs shall have not less than 2 x 4 rafters, spaced 24 inches on centers and shall not exceed 14 feet between end supports unless trussed or braced. 1 x 3 roof sheathing spaced not farther apart than 3 inches shall be the minimum requirements. Roofs covered with terra cotta, cement, tile or slate units shall have rafters not less than 2 inches by 6 inches, spaced 16 inches on centers, and must be thoroughly braced or supported on partition below, or trussed as approved.

## SECTION 202.

### FRAME OR WOODEN BUILDINGS

Frame or wooden buildings may be constructed to a height not exceeding 40 feet and may be built anywhere in the City except within the Inner Fire Limits, and shall contain not more than three stories. Wooden shingles are prohibited on buildings within the Inner Fire Limits.

In the case of a frame or wooden building on a lot with the ground sloping downward from the facade at which the measurement is taken, the height of the building shall not at any point exceed 40 feet above the grade, measuring on the facade facing the street, nor shall the height of the building at any point of the grade exceed 55 feet above the level of the ground when building is located on sloping lot; provided that there shall not be at any point more than 50 feet of frame construction above the foundation.

Where frame residences on an inside lot sloping downward from the facade at which the measurement is taken exceeds at any point 40 feet above the natural level of the lot, there shall be provided a passageway at least 3 feet wide from the rear of the lot to the street. Said passageway to be at least 6 feet 6 inches high, and must have its interior lined throughout, using metal lath and plaster, if within the exterior walls of the building.

In the rear of any frame dwelling where the height at any point exceeds 50 feet above the level of the ground, there shall be a metal fire escape leading from the roof to within 8 feet of the ground, unless there are two or more separate stairways from the upper floor to the ground.

## SECTION 203.

### PUBLIC GARAGES

All new buildings and all buildings or structures hereafter altered or changed for use as a public garage or automobile repair shop shall be of Class A, B or C construction. The flooring of the first floor of any such building shall be constructed of concrete or other approved non-combustible material. Automobile repair shops only, when not exceeding 350 square feet of floor area, may be of Class D construction when not located within 40 feet of any other Class D building.

When any floor other than the first floor is used for garage purposes, automobile workshop, public auto storage, auto repair room or equivalent, such floor shall be of non-combustible materials, using reinforced concrete or steel or if supporting floor and joists be of wood, same shall be uniformly covered with No. 22 galvanized iron, 1½ inches of approved asphalt over water proof paper, or 2½ inches of concrete reinforced with chicken wire netting. Where wood posts are used, same shall be heavy timber construction, same size as required for mill construction. No such post shall rest directly on or in concrete floors. A metal bearing plate shall be used, keeping post at least  $\frac{1}{4}$  inch above floor.

In all buildings used for garage purposes, the main dividing partitions shall be covered with metal lath and plaster on both sides. Dividing partition between garage and offices or display room shall extend clear to roof sheathing in the case of one-story buildings.

There shall be maintained at all times in every garage building having a floor space of 1000 square feet or less, at least two 3-gallon chemical fire extinguishers, and one additional chemical fire extinguisher for every additional 1000 square feet of floor space, or fraction thereof. There shall be maintained at all times in every garage having a floor space of 1000 square feet or less, at least one 8-gallon metal barrel filled with clean dry sand, and one additional barrel of sand or equivalent for every additional 1000 square feet of floor space or fraction thereof; each barrel to have a suitable scoop.

No permit shall be granted for the maintenance or use of any public or private garage in any part of any building that is used or occupied as a hotel, tenement house, apartment house, rooming house, lodging house, public amusement or assemblage; provided,

however, that where such building is of Class A or Class B construction, such permit may be granted, but only upon a strict compliance with the following condition:

There shall be no communicating openings or apertures between any part of the buildings used as a garage and any other part of the building, unless such openings are each protected with an approved automatic fire door. All openings and apertures in the exterior walls of that part of the building used as a garage shall be protected by approved fire windows or fire doors. This need not apply to openings onto a public street or alley. No garage will be permitted in any theatre building, moving picture house or public auditorium, school, orphanage, or building used for the aged or infirm, unless the entire building and garage is of approved Class A construction, and there are no openings whatsoever, directly or indirectly, between such garage and building proper.

Every garage room, or room which is used for garage repairing, garage workshop, public auto storage room, or similar rooms, shall have at least one fresh air inlet near the floor for each 1500 square feet of floor area or fraction thereof; such vent to extend directly through the wall to outside air, and to be protected by suitable galvanized iron screen. Double this ventilation shall be placed near the ceiling in the walls, or in sky-light louvers, or roof vents may be used. Every auto pit shall be similarly vented to the outside air, each of such vents shall have a clear ventilating area of at least 140 square inches.

Public garages in basements or cellars will be permitted when all portions of the garage and auto repair room are of Class A construction and when proper provision for fresh air and ventilation is made. Public garages three stories in height must be of Class A or B construction; more than three stories in height, Class A construction. Ventilation above first floor to be equivalent to ventilation requirements for one-story public garages. Such vents may open into suitable masonry flues; flues to be used for ventilation only.

Inside toilets, water closet compartments and similar rooms shall have outside ventilation through fireproofed shafts, except where open truss and roof construction is left exposed and there is not suspended or furred down ceiling; in which case a ventilating sky-light above will suffice. All public garages in the Inner Fire Limits shall have outside window and door openings, protected with fire doors or fire windows, unless such openings open on public streets at least 40 feet wide.

## SECTION 204.

### AUTO SHEDS, WASH RACKS AND FILLING STATIONS

All auto sheds and wash racks shall meet the same requirements as regular public garages, enclosure walls sheds and wash racks is located at least 12 feet from the public walk, or faced toward the inside of the lot, above such open front shall be Class A or B construction; the remaining three sides, however, shall be ma-

sonry walls. No wood or other combustible enclosure will be permitted across such open fronts. Provide parapet walls as required in this ordinance. All floors to be masonry, concrete or other non-combustible material.

Filling stations, where lubricating oils, greases, etc., are kept for sale, shall not be built within 10 feet of any residence or Class D building. All frame walls and ceilings are to be protected with metal lath and plaster or approved equivalent. All floors of such buildings or rooms must be masonry, concrete or covered with not less than No. 24 galvanized iron turned up at walls at least 2 inches. Provide proper ventilation equivalent to the requirements for public garages. Gasoline tanks to be buried and installed as per the requirements of the San Diego Fire Department.

## SECTION 205.

### STABLES, ETC.

No building shall be erected or used for the purpose of stabling animals above the first or ground floor, unless the building be of Class A or B construction.

It shall be unlawful for any person, firm or corporation to construct or use any building or premises not in such use at the time this ordinance takes effect, as a stable, barn or yard for horses, mules or other animals of any kind, without first obtaining a written permit from the Board of Health, specifying the name of the permittee and the location of the building or premises to be so used, and the number of animals to be kept therein.

The floor of such structures or premises must be reasonably impervious to moisture and kept free from excrete and maintained in a sanitary condition. Such structures shall be whitewashed or painted with cold water paint, once every twelve months. Stables to be ventilated equivalent to public garages.

## SECTION 206.

### GRANDSTANDS

All grandstands, temporary or permanent, including all similar arrangements for seating or supporting people, shall have sufficient strength to safely support 150 pounds per square foot. Supporting posts when of frame construction, shall be at least 4" x 4" resting on spread blocks to distribute the loads at the bottom. Posts to be carefully braced to insure security against swaying, displacement or failure due to an orderly or otherwise moving mass of people.

The supporting stringers shall be not less than 2 x 8 and spaced not more than 5 feet on center. The span shall be not more than 4 feet 6 inches, the horizontal boards or seats to be not less than 2 x 10. It shall be unlawful to erect or start erecting any grandstand or similar supporting platform or device for supporting people without first obtaining a permit, and no such permit can be issued until a detailed drawing and specification of same is first submitted and approved.

## SECTION 207.

### AMUSEMENT DEVICES

No mechanical amusement device, whether operated by gravity, mechanical or other power, shall be erected and operated without a permit from the Building Inspector. Every amusement device must be immediately shut down and cease to operate when the result of an official inspection shows that a condition prevails which would endanger life or property.

## SECTION 208.

### EXHIBITION BUILDINGS

One story buildings for fair and exhibition purposes, towers for observation purposes, and structures for similar uses, whether temporary or permanent, may be constructed with Class D walls, excepting that buildings for general purposes for exhibition or public assemblage in which the roof span does not exceed 160 feet and the roof construction is exposed, the roof surface shall be solid tongue and groove planking not less than 1½ inches thick. The roof sheathing shall be semi-fireproofed on the exterior by a covering of metal, tile, slate, built up roof with solid 10 pound asbestos sheet, or other fire resisting material.

In no case shall the roof surface come nearer than 24 feet to the first floor level. When such structures exceed 160 feet in length or breadth, the walls must be of masonry. Two story structures of this kind must be Class A or B construction. Structures herein mentioned are prohibited in the Inner Fire Limits, unless of Class A or B construction throughout.

## SECTION 209.

### GRAIN ELEVATORS, FACTORIES, LAUNDRIES, ETC.

(A) All grain elevators, factories, laundries, wood-working establishments, planing mills, etc., when more than two stories in height, shall be Class A, B, or C construction. Two stories may be Class D construction, provided 2 x 6 studs, 16 inches on center, are used, and all floors are at least 1½ inches thick. Double floors may be used, provided both the finish and sub-floors are both tongue and groove, and a layer of heavy building paper is placed between such floors. One story buildings of Class D construction may have 2 x 4 studs not farther apart than 16 inches on center. Shingle and Grain elevators of Class D construction shall not exceed a total height of 30 feet and shall not exceed 5000 square feet in area, and shall not be located within 50 feet of any other Class C or D buildings.

(B) No outside or inside doors of any building or factory in which operatives or employees are employed shall be so locked or otherwise fastened during the hours of labor, as to prevent free egress to the exterior of the building. No obstructions shall be placed in any of the exits or exit passageways.

## SECTION 210.

### SMOKE HOUSES

Before any room or building shall be used for the purpose of a smoke house, or for smoking meats or other food stuffs, a detailed drawing must be filed with the Building Inspector, showing the location of such room or building, and all openings opening into the same. Such smoke house or room shall be built of non-combustible material, equivalent to Class A construction, including fireproof trim, floors and openings. Vents from such smoke house must be so arranged that the smoke will not blow in any window within 50 feet.

## SECTION 211.

### DRY CLEANING ESTABLISHMENTS

Dry cleaning establishments, clothes cleaning establishments, and similar structures or rooms where gasoline, naphtha, benzine, benzole and other volatile liquids are used or stored in greater quantities than one gallon, are prohibited within the Inner Fire Limits.

Every room in any building or structure in which such establishments or conditions herein mentioned are conducted or maintained, shall have all enclosure walls built of solid brick or concrete at least 8 inches thick. The floors shall be of concrete, approved masonry or asphalt, and ceilings, if of frame construction, shall have a double protective coating consisting of metal lath and plaster board or solid wood sheathing. All enclosure walls shall extend above the roof, and finish with an 8-inch solid masonry fire wall at least 2 feet high. Twelve-inch hollow tile or cement block walls will be accepted in lieu of 8-inch solid masonry walls.

No such room shall be built within 10 feet of any Class D building. All openings to such room used or intended to be used for the purpose herein mentioned shall be protected with approved self-closing fire doors or fire windows.

A system of ventilation shall be provided, such vents each to have at least 200 square inches area, one near the floor and one near the ceiling, both leading to the outside air in approved non-hazardous locations; said vents to be protected with No. 20 gauge ¼ inch mesh galvanized wire screening. A top and bottom vent, as mentioned, shall be provided for each 100 square feet of floor area or fraction thereof, but in no case shall there be less than two top and two bottom vents. Vents must be kept as far apart as possible.

All rooms used for dry cleaning and such purposes herein mentioned shall be protected with the following fire fighting apparatus. An 8-gallon metal barrel container filled with dry sand, such barrel to contain suitable metal scoop and be covered with metal cover. Provide one such barrel of sand for every 1000 square feet of floor area or fraction thereof. Rooms not exceeding 160 square feet in area shall have two one-quart Carbon Tetra Chloride fire extinguishers and two three-gallon chemical fire extinguishers. Rooms exceeding 160 square feet in area shall have in addition to the above an ap-

proved "Foamide" system, or equivalent, or an automatic sprinkler system for fighting fire. All floors shall have a masonry curb at least 6 inches high at all doors and other exterior openings, extending to the floor.

## SECTION 212. SCHOOLS

(A) All schools, boarding schools, colleges, universities, and places of learning shall be Class A construction when more than two stories high above basement; Class A or B when not more than two stories in height, and Class A, B or C when one story in height, excepting that when such one story buildings, do not exceed 2000 square feet in area, the same may be of Class D construction. One story Class D buildings of larger area may be used when each 2000 square feet area is separated by an approved masonry fire wall.

Hollow tile or hollow cement block bearing walls are prohibited in all schools when more than one-story in height. The basement, ceiling and soffits of all stairs in all Class B, C and D buildings shall be metal lath and plaster. Auditoriums and assembly halls shall meet the same requirements as specified under Moving Picture Theatres. Auditoriums and assembly halls with regular stage and movable scenery, when seating more than 350 people, shall meet the requirements of the regular theatres so far as said requirements can consistently be made to apply. Provide ventilation in auditoriums and assembly halls, same as required for moving picture theatres.

(B) The width of corridors, hallways and passageways shall be not less than 5 feet, and the width of doorways not less than 3 feet. The total width of doors and exit doors shall be not less than 18 inches for each 100 that will normally use the same for exit purposes. All doors shall swing in the direction of outgoing passage. All entrance and exit doors shall be unlocked when the building is occupied for school purposes or open to the public and shall be equipped with an approved type of push bar device or equivalent, which will unlatch by pressure.

Stairways shall be provided so that the distance from any class room door to the nearest stairway shall not exceed 75 feet for grammar schools and 100 feet for junior high schools, high schools, colleges and universities. Width of stairways shall be 18 inches for each 100 pupils using the same, and no stair shall be less than 3 feet 6 inches in width in the clear. Each stairway shall lead to a street or to an open space or hallway leading to a street. Doors at the bottom of stairs shall be at least as wide as the stairs leading to them.

(C) No school building shall be considered as having a sufficient number of exits or stairs, if the time required by all its occupants to leave it exceeds three minutes. All schools more than one story in height shall have not less than two stairways from ground to top story when more than 80 students are accommodated above the first floor. Further, provide not less than two separate exits as far apart as possible. All class rooms must have at

least two exits. In the calculation for the effectiveness of stairs and exits in schools, theatres and places of public assembly, it shall be considered that 30 persons per minute may pass down each 22 inches of width of stairs, and that 50 persons per minute may pass through each 22 inches of width of horizontal exits. People moving in a horizontal direction are assumed to move at the rate of 200 feet per minute, and when moving down stairs or inclines, come down vertically at the rate of 100 feet per minute. For the calculation of the number and width of stairs required for any floor, add the number of people on the floor in question to the number occupying the floors above.

No regular class rooms except domestic science or manual training rooms shall be allowed in any story or basement when the floor of the class room is more than 3 feet below the level of the outside ground. Walls and floor below grade shall be damp proofed.

(D) The principal or other person in charge of every school building shall establish and maintain a fire drill which shall be practiced at least once a month during the time the building is in use. It shall be the duty of the person in charge to make written report to the Fire Marshal at least twice a year, giving the record of each fire drill and the time required for making the exit. The Fire Marshal or Fire Chief shall have the right to call a fire drill at any time in order to ascertain the efficiency of such drill and orders may be given by him for the purpose of increasing efficiency.

(E) All schools and buildings mentioned in this section shall have approved fire escapes, when more than one story in height; such fire escapes to have metal stairs to the ground level, or approved equivalent. All school buildings, two or more stories in height, shall have inside stand pipes and hose reels in each story and basement for fire protection. School buildings, regardless of height, must be provided with one three-gallon fire extinguisher in furnace and boiler room, and one quart carbon tetra chloride fire extinguisher at each main electric switch board and main distributing panel.

## SECTION 213. JAILS, FIRE STATIONS, DEPOTS

Jails and places of detention shall be Class A construction. Fire stations one story in height to be of Class A, B or C construction; two stories in height, Class A or B construction; more than two stories in height. Class A construction. Depots not exceeding more than one story in height may be of Class A, B or C construction, excepting that when such one story depots do not exceed 800 square feet in area, the same may be Class D construction. When two stories in height, same shall be Class A or B construction; when more than two stories in height, Class A construction.

## SECTION 214. HOSPITALS, ASYLUMS, SANITARIUMS, ETC.

Hospitals, asylums, sanitariums, orphanages, blind institutes and homes for the aged and feeble minded shall

be of the following construction; one story buildings Class A, B or C construction; two and three story buildings, Class A or B construction; and over three stories in height, Class A construction.

Every building used or designed for such purpose, as herein mentioned, shall have approved fire escapes when more than one story in height. The treads of such fire escapes shall be not less than  $7\frac{1}{2}$  inches wide, and the risers shall not exceed  $7\frac{1}{2}$  inches in height. The fire escapes shall have continuous stairs at least 3 feet wide from the ground up to the balconies and approved ladder from top landing to roof. When buildings are built on the pavilion system, consisting of two or more buildings connected by corridors, the corridors shall be the same class construction as the building, and must have approved fire doors at each end.

### SECTION 215.

#### CHURCHES, PUBLIC HALLS, AUDITORIUMS, ETC.

(A) Churches, public halls, lodge halls, places of public assemblage or gathering, auditoriums, etc., shall meet the following requirements: All seats or pews shall be so arranged that there will not be less than 31 inches from the back of one seat to the back of the next seat. A minimum width of 18 inches shall be allowed for each person. Seats to be securely fastened to the floor. No seat shall have more than 7 seats intervening between it and an aisle. Seats in the aisles are prohibited. No person, except a city official on duty, shall stand or seat themselves in the aisle during performances. It shall be unlawful for any person to place a chair or any other obstruction in any aisle, exit, passageway or hall. When portable chairs are used, the same shall be fastened together in groups of 5 or more. Provide means of fastening or staying same to floor, when being used by the public.

Where the seating capacity of the floor is not more than 500 people, the aggregate width of the aisles must be at least 6 feet, and this width shall be increased one foot for every increase of seating capacity of 100 persons, or fraction thereof. Blind aisles are prohibited. Aisles leading into back of seats farther in front will be considered blind aisles, unless they intersect a cross aisle at least 3 feet wide.

(B) Basement ceilings of such buildings, when of Class B, C and D construction shall be metal lath and plaster. This also applies to both sides of all stud or combustible walls in basement. Boiler and furnace rooms to have masonry walls. In Class C and D buildings, the soffit of each stairway, the under side of all galleries and balconies, both sides of all vestibule walls, stair enclosure walls and all vestibule ceilings shall be metal lath and plaster or be of solid masonry. Separate toilets must be provided for ladies and gentlemen. Provide ventilation same as required for moving picture theatres.

All masonry bearing walls to be of solid masonry. All class rooms, meeting rooms and assembly rooms on balcony or gallery floor, which have permanent partitions, shall have such partitions metal lathed and plas-

tered both sides of studs. Permanent board partitions for such purposes are prohibited.

(C) The clear head room above all stairs shall be at least 7 feet 6 inches. All doors in class and assembly rooms shall swing out in the direction of travel when people leave the building. In places where there is doubt as to which way the people may travel in case of panic or general rush the doors shall be double acting. It shall be unlawful to bar, lock or fasten any exit doors while the building or room is open to or occupied by the public. Provide exit lights equivalent to moving picture theatre requirements. Exits must have an aggregate width at least 15 per cent greater than required for the aisles, and every gallery or upper floor must have a separate exit direct to the vestibule, main lobby or street. No exit to be less than 5 feet wide in the clear. When any of the above buildings are capable of accommodating more than 800 people, they shall meet the requirements as to means of entrance, exit and stairs as laid down for theatres proper.

(D) Aisles with seats on both sides must not be less than 3 feet at any point, and must increase in width toward the exits at the ratio of  $1\frac{1}{2}$  inches to 5 running feet; aisles with seats on one side only must begin not less than 2 feet 6 inches wide and shall have the same gradual increase in width toward the exits. The requirements in this section also apply to assembly halls in places or institutions for receiving instructions, dance halls, social halls and skating rinks, so far as the same can consistently apply.

(E) All buildings and places of assemblage described herein shall be limited to the following class requirements and restrictions:

Class D—One-story buildings, capacity unlimited.

Class D—Two-story buildings prohibited, excepting churches not exceeding 300 people capacity.

Class C—One-story buildings, capacity unlimited.

Class C—Two-story buildings must not exceed 800 people capacity.

Class B—Two-story buildings, capacity unlimited.

Class B—Three-story buildings must not exceed 800 people capacity.

Class A—Three or more story buildings, capacity unlimited.

(F) Nothing in this section shall be construed to conflict with additional and special requirements for Moving Picture Theatres and theatres proper. The Building Inspector is hereby given the power to enter such buildings described above to see that all provisions herein mentioned are complied with.

### SECTION 216.

#### MOVING PICTURE THEATRES

(A) All places of amusement, other than theatres proper, erected, remodeled or altered, where moving pictures are to be used or exhibited for public entertainment or instruction, and where an admission fee is charged or a free-will offering for collection is taken up to take the

place of an admission fee, will be classed the same, and must meet the requirements of a regular moving picture theatre. Moving picture theatres seating not more than 400 people shall be of Class A, B or C construction; seating more than 400 people, but not exceeding 800 people, Class B construction throughout and seating over 800 people Class A construction. All masonry bearing walls to be solid masonry.

(B) Moving picture theatres of Class C construction shall have all basement ceilings, vestibule ceilings, soffits of all stairs, galleries or balconies protected with metal lath and plaster. All combustible basement partitions, vestibule partitions, and hall partitions used by the public shall be protected with metal lath and plastered on both sides. Class D construction shall be prohibited for all moving picture theatres. Moving picture theatres seating more than 1000 people shall be classed as regular theatres, in which case the regular theatre requirements shall be enforced as far as they can consistently be made to apply.

(C) The seating arrangements and aisles shall conform with the requirements for theatres proper. Moving picture houses or theatres having a stage upon which there is movable scenery, drops, etc., will be classed as regular theatres. Exits shall be provided leading from the rear of all moving picture theatres. When such exit cannot open directly on a public street, alley or approved equivalent, a fireproof tunnel or enclosure shaft leading to such street or alley shall be provided on each side of the auditorium, as required for regular theatres, excepting that when the seating capacity is 800 or less the width of such tunnel need not be more than 5 feet, and when the seating capacity is 400 or less, 4 feet will be sufficient.

Front exits and main entrances combined shall be at least 15 per cent greater in width than the combined width of all aisles. All exits shall have electric signs over exit openings or doors, plainly lettered "EXIT" in letters at least 6 inches high, such sign to be properly lighted, using red or green illumination. Approved glass faced electric lantern shall be used. All exit lights in theatres and picture theatres must be on separate circuits and shall be kept lighted during entire performance or display of pictures, and while audience is in the room or building.

The main exit doors shall be directly in front of the main aisles or as nearly so as possible. All doors shall swing out in the direction of travel when crowd leaves the building or auditorium. All doors through which a crowd might go in either direction in case of a panic or rush shall be double-acting. It shall be unlawful to bar, lock or fasten any exit door, or any other hall or passage door through which the audience might have a tendency to pass in leaving the building, auditorium or place of congregation. Approved panic bolts may be used.

(D) All moving picture theatres which are not provided with an approved system of mechanical ventilation shall have ceiling or equivalent wall ventilation, allow-

ing at least 3 square inches of gravity ventilation for each square foot of floor space. If any moving picture theatre has a stage, such stage shall have the same ventilation over the stage as required for regular theatres. Every moving picture theatre shall have public toilets, same as specified herein for theatres proper. It shall be unlawful for any person to place a chair or any other obstruction in any aisle, exit, passageway or hall. No person, except a city official on duty or moving picture theatre employee, shall stand in any aisle.

## SECTION 217.

### THEATRES

(A) All buildings hereafter constructed, remodeled or altered, including new buildings to be used as theatres shall meet the following requirements:

Theatres seating or accommodating not more than 400 people may be Class C construction. However, the basement ceilings, soffits of balconies, landings, vestibule ceilings and stairs shall be protected with metal lath and plaster. All basement, stud partitions, vestibule walls and passage walls, shall be protected on both sides with metal lath and plaster, or be of masonry. Class D buildings used as theatres are prohibited. Theatres seating more than 400 people, but not exceeding 800 people, shall be Class A or B construction and theaters seating more than 800 people to be Class A construction throughout. All masonry bearing walls to be solid masonry walls.

(B) All theatres, auditoriums and places of public assemblage which are not provided with an approved system of mechanical ventilation shall have ceiling or equivalent wall ventilation, allowing at least 3 square inches of gravity ventilation for each square foot of floor space, including all balcony floor areas.

**STAGE VENTILATION.** Above the center of the stage, provide one or more ventilators of non-combustible material extending above the highest point of the roof. Said ventilators shall have a combined area of at least 10 per cent of the stage area. The openings in these ventilators shall be closed by valves, louvers or dampers so arranged as to open automatically when released. A hemp or cotton cord shall control these dampers or closing devices, and this cord shall be carried to each side of the opening in the proscenium wall, and to the fly galleries. Ropes to be arranged so that when the cord is cut, the ventilators will fully open automatically. Provide two fusible links in each cord, place one at the top and one midway between top and bottom of each cord. The ventilators may have plain glass sky-lights protected with wire mesh. Wire glass is prohibited.

(C) **SIDE EXITS AND CORRIDORS.** There shall be at least two exits on each side of the main floor, and two exits on each side of each balcony and gallery. Each exit shall be at least 5 feet in width, with doors swinging out into side corridors. Except as otherwise noted, the corridors shall be at least 7 feet wide when the seating capacity of the theatre does not exceed 1000 people, and

shall be increased 6 inches in width for each 500 people or fraction thereof, over and above the first 1000 people. Said side exit corridors shall begin on a line with the proscenium wall and extend the full length of the theatre and open out upon a public street or alley. Corridors to be enclosed in masonry walls full length. Upper floors of side corridors to be connected to lower main floor of side corridors with fireproof stairways at least 3 feet 6 inches wide and must be placed so as not to form an obstruction. During the performance and while any of the audience is in the theatre, all exits leading to side corridors and elsewhere must be unlocked and unfastened. Approved panic bolts only may be used. There shall be no connection with main entrance or lobby and the side corridors. A side street or public alley will be accepted in lieu of a side corridor. Side corridors may be reduced to 5 feet in width when the seating capacity is 500 people or less.

The level of side corridors where same open on a street, walk or alley shall be not greater than one step above grade. To overcome any difference in levels the side corridors may have sloping ramp floors, such incline in floor not to exceed one foot rise to 8 feet run. Steps are prohibited. Side corridors shall be placed in each story, or in lieu of side corridors, the side exits of theatre may be opened into an adjacent building when such adjacent building is entirely separated from theatre with a fire wall, and all stairs, exits and halls of adjacent buildings come up to the requirements for theatre stairs, halls.

In lieu of side corridors, side exits may lead out onto regular fire escape balconies, not less than 4 feet by 6 feet. These fire escapes balconies shall be connected to the ground with fireproof stairs at least 3 feet in width for the first 300 people accommodated, and shall be increased 6 inches in width for each 100 people or fraction thereof, above the first 300 people.

In calculating the number of people a fire escape will be required to accommodate: Two-thirds of the full seating capacity of galleries or balconies which have exits leading thereto shall be taken. Such fire escape stairs shall be regular metal or reinforced concrete fire escape stairs, and shall have risers not exceeding 8½ inches high, and the treads shall be not less than 9 inches in width. Fire escape balconies and stairs shall have sufficient strength to safely support a uniform live load of 200 pounds per square foot.

**(D) EXITS PROPER.** In addition to the audience exits, there shall be at least one stage entrance one or more feet wide in the clear easily accessible for the actors. Besides the regular side exits, there shall be the main entrances to the lobby, auditorium, balconies and galleries. There shall be at least two such main entrances, at least 5 feet wide each for the first 500 people accommodated, increasing one foot in width for every 100 people, or fraction thereof, accommodated above the first 500. Such main exit doors may open into one large outer lobby, when such lobby has openings leading to street. Lobby exits shall equal the aggregate openings entering lobby from the theatre, auditorium and bal-

conies. When a foyer is placed between large outer lobby and main auditorium, the main first balcony stairs may lead to same, but stairs to foyer from balconies above first balcony are prohibited. Theatres with more than two separate balconies, one above another, are prohibited. No passage leading to the foot of any stairway communicating with any entrance or exit shall be less than 4 feet in width at any point, and never less than the stair width. No hall or passage shall be less in width than the exits or aisles leading to same.

**(E) PROSCENIUM ARCHES AND FIRE CURTAINS.** Above the proscenium opening there shall be a steel or reinforced concrete girder of sufficient strength to safely support the load above. If of steel, the girder must be properly fireproofed. The frame around the proscenium opening must be of non-combustible materials, and if metal is used it must be backed solidly with masonry. A fire wall built of solid masonry at least 12 inches thick shall separate the auditorium from the stage, and such fire wall shall extend at least 3 feet above the stage and fly gallery roof.

The proscenium opening shall be provided with an approved fireproof or metal curtain. This curtain shall overlap the proscenium wall at top and both sides and run in iron grooves or channels not less than 6 inches deep. The runway to be securely fastened to the fire wall in such a way as not to allow the passage of fire, and must extend above the top of the curtain when raised to highest point.

Curtain to be suspended by iron or steel cables. The excess weight of the curtain is to be overcome by a check rope of cotton or hemp extending to the floor on both sides of the stage and to the fly gallery, so arranged that the cutting of the rope at any of these points will release the curtain and allow it to fall at its normal rate of speed. There shall be two approved fusible links in each rope. This curtain shall be raised before and lowered after each performance. If curtain is of asbestos it must be reinforced with wire. At the bottom of the curtain shall be placed a rigid metallic rod or bar of the proper weight to carry the curtain down. The curtain must have sufficient weight to drop of its own accord when released.

Any doorway through the proscenium wall must be provided with fire doors on each side so hung as to be easily opened from either side of the wall at all times. Such fire doors to have sloping track spring hinges or counter weights which keep the doors closed.

**(F) STAGE.** All that part of stage that is not used for the presentation of a scene shall be built of non-combustible materials. The construction of the stage shall have sufficient strength to safely take care of all requirements. All partitions and enclosures of dressing rooms, property rooms and passageways and all other partitions on or about the sides of the stage shall be constructed of non-combustible materials. There shall be a window or door opening directly from the fly gallery through the outside wall of the stage, upon a fire escape, or an equivalent approved exit must be provided. There

shall be placed upon the stage of every theatre a fire alarm box to be connected directly with the city alarm system, the same to be approved by the Chief of the Fire Department.

In other than Class A buildings, the space or area between floors, and lowered or suspended ceiling below shall be partitioned off in sections so that no section contains more than 1000 cubic feet of space. Such partitions shall be solid Redwood boarding, and shall have small doors in same to permit inspection. Each balcony or gallery shall have a solid railing in front, at least 18 inches high, upon which shall be a strong, substantial railing with rigid metal posts; such railing to be of sufficient height to insure no possibility of persons falling over the same. The auditorium proper shall be separated from the entrance, vestibule or main entrance lobby by masonry walls, openings to be specified elsewhere. Wood sounding boards may be constructed over and at stage side of orchestra pit, but such sounding boards shall be backed up with masonry walls. Fire stops shall be placed wherever it is deemed necessary to prevent spreading of fire or circulation of smoke.

(G) **CONSTRUCTION ABOVE THEATRE.** Nothing shall be built above stage roof, but same must be left free and clear of all structures. When entire theatre ceiling and supporting construction of same is of Class A construction, office, store, roof gardens and structures for similar purposes may be built above same (but not above stage ceiling or roof). No part of any theatre building shall be used for the manufacture, sale or storage of any article or material dangerous to life or which would create an undue fire hazard. No part of a theatre building can be used for a hotel or tenement house, when communicating in any way with the auditorium or stage directly. No workshop, dressing room or general property room shall be above the auditorium or stage, or in any part of the fly galleries. All such rooms shall be located in the rear or at the side of the stage, but not directly under the stage; such rooms must be separated from the stage by a fire wall and each opening shall be protected with fire doors.

(H) **AISLES.** Aisles with seats on both sides shall be not less than 3 feet wide; aisles with seats on one side only shall be not less than 2 feet 6 inches wide. All aisles shall increase in width toward the main exits, at least 3 inches to every 9 running feet. No cross aisles running along in front of the seats shall be less than 3 feet 6 inches wide in the clear. Blind aisles are prohibited. Any aisle leading into back or seats farther forward will be considered a blind aisle, unless it intersects a cross aisle at least 3 feet wide. All cross aisles shall open into regular aisles or exits at both ends. Wherever possible, differences of floor level, gradients or inclined planes shall be used in place of steps; such inclines shall not exceed a 2-inch rise to one foot run. Steps are prohibited in all first floor or main auditorium aisles. No seats shall be allowed in any aisle, nor shall any person be allowed to stand or seat themselves in the aisles during a

performance, excepting employes of the theatre and city officials on duty.

When the seating capacity of any floor, balcony or gallery does not exceed 500 people, the aggregate width of all parallel or nearly parallel aisles at their narrowest part shall be not less than 6 feet, and such aggregate width shall be increased one foot for every increase of seating capacity of 100 persons or fraction thereof over and above the first 500. All aisles shall lead as directly to exits as possible.

(I) **Spacing of seats** shall not be less than 31 inches, back to back nor shall seats be less than 18 inches wide for each person. No seat shall have more than 6 seats intervening between it and an aisle. All seats shall be securely fastened to the floor in uniform rows. Platforms formed to receive seats in galleries and balconies shall be not more than 24 inches high at the riser, nor less than 31 inches in width of platform.

(J) **STAIRS.** Stairs from balconies or galleries shall not communicate with basement or cellar. All stairs shall have treads of uniform width and risers of uniform height. Where a gallery has a seating capacity of over 100 people, there must be at least two flights of stairs 4 feet wide leading from opposite sides of the gallery and 6 inches shall be added to the width of these stairs for every additional 50 people or fraction thereof to be seated in such gallery. No theatre stairway when used or designed to be used by the public shall be less than 4 feet wide.

Stairs leading to the first balcony above the main floor may be left open on one side only. When stairs return directly on themselves, a landing the full width of both flights shall be provided, and the outer corners of such a landing shall be curved to a radius of two feet.

The clear ceiling height above all stair treads on line with riser, shall be not less than 7 feet 6 inches. No winders shall be used in any stairs intended for the public. Where stairs turn at an angle they shall be a proper landing introduced without winders at each turn. Where two flights connect into one main flight this main flight must have a width equal to the aggregate width of the said two flights.

All stairways shall have strong hand-rails on both sides firmly supported. Hand rails need not be run on level platforms and landings where the same are of greater length than the width of the stairs. Stairways 8 feet or over in width shall have a center hand rail not less than 2 inches in diameter, placed at the same height as the side hand rails and supported on metal standards of sufficient strength and stiffness. Such standards shall be not more than 6 feet apart. The center rail shall terminate in standard at least 3 feet 6 inches in height at the starting and ending of each flight.

In no case shall the risers of any stairs exceed 7½ inches in height nor shall the net width of tread be less than 10½ inches, not including the nosing. The stairs mentioned under this heading shall be in addition to stairs required in side corridors. All public stairs ex-

ceeding 10 feet in height shall have an intermediate landing at least 4 feet deep.

(K) **DOORS.** All doors and doors leading to exits shall swing in the direction the audience will travel in leaving the building. Doors so located that it might be questionable in which way a crowd or part of the audience might travel in case of a panic or general rush shall be double acting. No exit door or doors leading to exits, exit halls, fire escapes and exit passageways shall be locked, barred or fastened during a performance, or while any part of the audience is in the building. Such doors may be held with panic bolts or similar approved devices, any of which shall yield and allow doors to open on slight pressure outward. No door shall open directly upon a flight of stairs or steps, but must open upon a landing at least the width of the door plus 6 inches.

Theatres seating more than 800 people shall have no wood or other combustible floors, landings or platforms, unless placed over a solid concrete base or slab. This need not apply to the stage proper. No plastering or stucco decorations shall be applied over wood, false work, or other combustible material, nor shall such interior plastering and decoration be of such nature that the fire hazard or risk will be increased. All exterior windows and openings throughout, excepting on street fronts only, shall be protected with approved fire windows, fire doors or fire shutters.

(L) **TOILETS.** Every theatre, moving picture show, church or other public buildings or rooms where the public or an audience gathers for entertainment, recreation, amusement, or religious services shall be provided with at least two separate toilet rooms, one for women and one for men. Each such toilet shall be provided with water closets and lavatories. There shall be one lavatory in each toilet room for every 800 persons or fraction thereof, accommodated by the theatre. In the ladies' toilet there shall be at least one water closet for each 200 people or fraction thereof accommodated by the said building. In the men's toilet there shall be at least one water closet for each 400 people or fraction thereof accommodated by the said building. Further, there shall be at least one urinal for each 400 people or fraction thereof accommodated. At least two separate toilets with water closets and lavatories shall be provided near the stage, for the use of the actors and stage hands, in case of a theatre. Every water closet compartment shall be not less than 3 feet wide, 3 feet 8 inches deep, and the ceiling height shall be not less than 7 feet 6 inches. No public toilet room shall have an area less than 30 square feet and shall be ventilated through outside windows, or approved equivalent in the form of a ventilating skylight or ventilating duct. The floors of such rooms shall be of tile or equivalent, sanitary non-absorbent, non-combustible material. The water closet compartment partitions and doors shall be kept at least 10 inches above the floor. Every toilet room floor shall be provided with a floor drain.

(M) **HEATING ARRANGEMENTS.** No radiator or heating coil shall be placed in any aisle or passageway used as an exit, unless set in a recess or suspended from the walls or ceiling with a clear passage of 7 feet 6 inches below. When a steam boiler is used for heating or other purposes, it shall be enclosed by walls and ceiling of masonry. No such heating plant shall be placed below the auditorium floor, exits, lobby, stairs or stage. Stairways leading to such room must be enclosed with fire doors.

(N) **EXIT LIGHTS.** Over each exit opening and arches or passages leading to exits there shall be an electric light which shall be kept burning at all times when the public is occupying a theatre. This light shall be within an approved red or green illuminated lantern with glass front, on which shall be plainly printed the word "EXIT" in letters not less than 6 inches in height. Fire escape exits shall have the words "FIRE ESCAPE" printed on suitable red or green lanterns of sufficient size, all of which lights shall be on a circuit entirely separate from the general lighting scheme. Every portion of the building devoted to the use or accommodation of the public, including exit courts and side corridors, shall be provided with sufficient lights to afford proper illumination.

(O) **GAS ELECTRICITY AND LIGHTS.** Electric light wires supplying the building shall have three independent connections as follows: One for the stage, one for the auditorium, and one for the corridors, lobbies, halls, exits and such other portions of the building as are used by the audience outside of the auditorium proper. Provision must be made for shutting off of all gas and electricity at some point outside of the building, and in addition to this there must be some means in the lobby of controlling all lights in that part of the theatre used by the audience. No lights of any description shall be recessed in walls, woodwork or ceiling in any part of the building, unless protected by non-combustible materials. Where necessary, wire guards shall be provided over lights. All ducts or shafts used for conducting heated air from the main chandelier, or from any light shall be constructed of metal or other approved fireproof material. No gas lights will be allowed on or about the stage for illuminating purposes, excepting that a small make-up burner may be used in each dressing room.

(P) **FIRE APPARATUS AND STAND PIPES.** Stand pipes of not less than 4 inches in diameter shall be provided and installed as follows: One on each side of the auditorium, with connections at the main floor and at each balcony level. A stand pipe with one connection within 10 feet of the door of the carpenter shop, one within 10 feet of door of any storage room, and one in the fly gallery so placed as to be easily reached from the exit window or door already specified, and one on each side of the stage. All such stand pipes and hose connections shall be kept clear of obstruction at all times. A sufficient quantity of approved linen hose not less than 1½ inches in diameter, in 50-foot lengths,

shall be kept attached to each hose connection; such hose to be provided with washers, couplings and nozzles, and all connections to conform with the standards in use by the Fire Department.

Stand pipe equipment must be installed independent of the automatic sprinkler system. All stand pipes must be connected to a Siamese steamer connection on the outside of the building. Such stand pipes shall receive a supply of water from a gravity tank located over the stage roof, with the bottom of the tank at least 12 feet above the highest point of the roof. This tank is to be of not less than 5000 gallon capacity, and in addition such stand pipes must have at least one of the following supplies:

(1) Approved steel pressure tank of not less than 5000 gallon capacity located on stage roof or not lower than grid floor.

(2) Automatic fire pump of not less than 500 gallon capacity per minute.

(3) City water main where nozzle pressure is not less than 25 pounds per square inch at the highest hose outlet when streams are in operation. Stand pipes must be fitted with approved straightway composition valves with hose outlets. Two spanners shall be located at each hose connection stand pipes to be kept constantly filled with water under pressure, ready for instant use.

(Q) **AUTOMATIC SPRINKLERS.** A system of automatic sprinklers shall be installed throughout the entire stage section of the theatre, including ceiling, grid, fly galleries, stage, dressing rooms, work shops and property rooms. There shall be an independent water supply connected with sprinklers; same may consist of gravity tank with the bottom not less than 25 feet above highest sprinkler and a capacity of not less than 7,500 gallons, and in addition one of the sources of supply as required for stand pipes shall be used, excepting that if the steel pressure tank is used it must be not less than 7500 gallons capacity, and located not lower than the highest line of sprinklers. In addition to the above there must be a Siamese steamer connection outside on the front of the building, and above such steamer connection there shall be a suitable plate fastened to the wall with raised letters reading "STAGE SPRINKLER."

(R) **FIRE BUCKETS, EXTINGUISHERS, ETC.**

There must be kept in readiness for immediate use, a 40 gallon cask filled with water, and 6 fire buckets at each of the following stations: One on each side of the stage, one under the stage, one in each fly gallery, one in each property room, storeroom or work shop. Such casks and barrels shall be labeled "FOR FIRE PURPOSES ONLY." There shall also be provided on the stage, 6 three-gallon approved chemical fire extinguishers, at least 4 axes and two 15 foot hooks.

The gridiron or rigging loft shall have a lattice iron floor and be readily accessible by iron stairways or ladders, and shall also have a means of escape to the roof and thence to other buildings, or to the ground.

(S) None of the windows in the outside walls of any theatre shall have fixed iron grills or bars, but must be of such arrangement that firemen can have easy access,

either by breaking the glass or otherwise. No circular, spiral, winding stairs or winders on landings are permitted for public use.

(T) **EXIT DIAGRAM.** A diagram of each gallery and floor, showing distinctly all exits, shall be printed in a conspicuous manner, on the outside back cover of each program for every performance, and such diagram shall occupy a space of at least 15 square inches.

## SECTION 218.

### INSPECTION OF PUBLIC BUILDINGS

The Building Inspector, Fire Marshal, or their authorized assistants, shall have free access at any time to all public buildings, places of public assemblage, including theatres and moving picture theatres, to make such inspections as they may deem necessary to see that the provisions of this ordinance are carried out.

Should they find that any of the requirements of this ordinance as to the seating or means of entrance and exits of the audience have not been fully complied with, or that the means of fighting fire or other provisions for the necessary protection of life and property are not properly observed or provided for, they shall have the authority to arrest the offenders or stop the performance and close the theatre until it has been made to comply with this ordinance. Verbal notice to any person taking or selling tickets, or any other person in charge, shall be considered legal notification, and failure to act immediately will be deemed a violation of this ordinance.

No building mentioned in this section shall be opened to the public, and no license granted until such building has been approved in writing by the Building Inspector.

## SECTION 219.

### MOVING PICTURE MACHINE BOOTHS

(A) Moving picture machine booths shall be of the following types of construction: The side walls and ceilings shall be constructed as follows: One three-fourths-inch tongue and groove boards, driven up tight and metal lathed and plastered on both sides. Two-ply 7/8-inch boards with joints staggered and then metal lathed and plastered both inside and outside. Ordinary studs, solid tongue and groove sheathed on the inside, and metal lathed and plastered on both sides of studs. No. 24 gauge galvanized iron lock, seamed and nailed with uniform layer of 10 pound asbestos beneath, may be used in lieu of metal lath and plaster, 4-inch hollow tile or gypsum block walls plastered both sides, or solid plastered walls not less than 2 inches in thickness, reinforced with 3/4-inch steel studs and metal lath thoroughly embedded may be used for the side walls. Booths in Class A buildings must be of Class A construction throughout, including ceilings and floors.

Except as otherwise noted, floors of moving picture booths shall be 2 1/2 inches of concrete reinforced with chicken wire, or 3 inches of plain concrete, or one inch of regular paving asphaltum over uniform layer of 10-pound asbestos, or layer of brick with one inch top wear-

ing surface, or two-inch hollow tile with one inch cement topping. A double wood floor may be used when protected with No. 24 galvanized iron lock seamed and placed over a uniform layer of 10-pound asbestos.

Where one moving picture machine is to be used, the floor space shall be not less than 6 feet by 8 feet in area; for one moving picture machine and one stereopticon, 6 feet by 9 feet; two moving picture machines and one stereopticon, 6 feet by 12 feet, and shall be increased in like proportions for additional machines. The height of ceilings shall be not less than 8 feet in the clear. All moving picture machine booths hereafter erected or placed in any theatre or moving picture theatre shall be provided with a water closet and lavatory. Provide speaking tube or equivalent between booth and ticket office.

**(B) BOOTH VENTILATION.** All booths, including portable booths, when one machine is used, shall be provided with a vent not less than 18 inches in diameter, situated in or as near the ceiling as possible. A fresh air inlet of like dimension shall be placed in or near the floor. Both shafts for inlet and outlet vents shall extend to outside air. An electric exhaust or draft fan shall be installed in the upper vent, fan to be not less than 12 inches. When two machines are used, such inlet and outlet vents or exhausts shall be not less than 20 inches in diameter, and shall be increased proportionately for each additional moving picture machine added.

When portable booths are situated in large auditoriums containing not less than 40,000 cubic feet, and such room is properly and sufficiently ventilated, the portable booth vents need not extend to the outside air; in which case approved Edison lamp machines or equivalent non-arc machines must be used.

**(C)** No moving picture shall be shown in any room, hall, theatre, auditorium, or any other building or structure unless the machine (whether portable or not) and the operator are housed in an approved booth as described in this section. Fireproofed fabric or asbestos fabric or cloth are prohibited.

All entrance doors to booths shall be 2 feet by 6 feet, fire doors or double-walled sheet metal and steel frame doors may be used. All door frames to be angle iron, channel iron, heavy pressed steel, or approved equivalent, non-combustible material. Doors to be enclosed by strong spring hinges, metal rope and weight, or equivalent, doors to swing out.

**(D)** No opening in booth (excepting doors and vents mentioned above) shall exceed a total of 120 square inches. There shall not be more than two of such openings for each picture machine. Openings shall be protected by shutters or doors which shall slide or drop vertically, and hung in such position that gravity will close them on being released. These shutters or doors shall be held open by twine; the twine shall be so arranged that it will pass above the film, when film is being operated. The twine from each shutter or door shall be attached to a master twine; the master twine to have a ring or hook or loosely fastened over a smooth

peg or projection near the door. Such master twine shall be controlled near the door and near the moving picture machine. The loosening of this master cord shall immediately allow the shutters or doors to close. Fusible links shall also be cut in and fastened on master cord or approved equivalent automatic control may be used on such shutters and doors. Shutters shall slide in approved rigid steel channel guides made from metal at least 1-10-inch in thickness. All such openings shall have metal frames.

**(E)** Portable booths may be 15% less in superficial floor area than the requirements for regular non-portable booths. Any booth permanently fixed or located, or used for than 3 times a week for a period exceeding 8 weeks, shall meet all the requirements of a non-portable booth. Portable booths are prohibited in moving picture shows and theatres. The fresh air inlet and ventilating outlet shall be protected with a No. 20 gauge galvanized screen with meshes not exceeding  $\frac{1}{4}$ -inch. In addition there shall be a deflector or shield in the form of a long elbow, at the outside of each opening. The clear ceiling height of portable booths may be not less than 6 feet 6 inches.

Portable booths shall have an angle iron frame, well braced and securely riveted or bolted at joints. Provide top, bottom and corner angles and vertical angle studs spaced 2 feet on center, angles to be not less than 1"x1"x $\frac{1}{4}$ " angles. T irons equivalent in area may be used. When the total length of any such frame members exceeds 8 feet, the size shall be not less than 1 $\frac{1}{2}$ "x1 $\frac{1}{2}$ "x $\frac{1}{4}$ " angles. The roof or ceiling shall be of the same type of frame construction, except additional stiffeners shall be installed or the frame members increased in size when necessary to prevent a greater deflection than  $\frac{1}{4}$ -inch when a uniform test live load of 10 pounds per square foot is applied on the ceiling. No part of any such booth, excepting the floor, shall come within 3 inches of any woodwork, nor shall the top be used for storage.

The above frame and ceiling shall be covered with galvanized iron not less than No. 22 U. S. standard gauge, riveted or bolted to frame. The floor may be of frame and wood construction when thoroughly protected with layer of 10-pound asbestos, and a sheet of No. 22 U. S. standard gauge lock seamed, galvanized iron applied over the asbestos. Solder is prohibited.

**(F) BOOTH FIRE PROTECTION.** Each and every moving picture booth, portable and non-portable, shall have the following fire fighting apparatus:

One three-gallon Standard Fire extinguisher inside of booth.

One Pyrene Extinguisher, or approved equivalent inside the booth.

One three-gallon Standard Fire Extinguisher on the outside, near the door of the operating booth.

All booths and apparatus must be in constant charge of a competent licensed operator, who shall have been licensed by the City of San Diego. All films when not in use must be stored in approved metal containers.

## SECTION 220.

### EXISTING THEATRES, HALLS, AUDITORIUMS, ETC.

All existing theatres, assembly halls, auditoriums, moving picture theatres and such buildings of public assembly shall within one year from the date of approval of this ordinance, be put in such shape as to conform to the requirements herein mentioned for new buildings, as far as possible, without tearing their structural parts to pieces. After one year, if such alterations and improvements have not been made, such buildings shall be condemned by the Building Inspector, and permanently closed.

## SECTION 221.

### ROOF GARDENS, PROMENADES, ETC.

Roofs used as roof gardens, promenades and similar gatherings shall be designed structurally to safely support all such loads and usages. The roofing shall be of such material that the uses to which it will be put will not jeopardize its weather and water resisting qualities in the least. Roof gardens and promenades over theatres shall have non-combustible floors.

## SECTION 222.

### SMOKING PROHIBITED

It shall be unlawful for any person to smoke or maintain a lighted cigar, cigarette, pipe or similar smoking device in any moving picture booth. No smoking shall be permitted in the audience or assembly room of any theater or moving picture theatre unless such structure is of Class A construction. No smoking will be permitted on any stage or any portion thereof, except during a scene where smoking is part of the plot of act. Excepting as otherwise noted above, no smoking will be allowed in any audience room or place of public assemblage unless such place or structure is of Class A or B construction.

It shall be unlawful for any person to smoke in any public garage room, dry cleaning rooms and buildings or premises wherein gasoline, distillate, volatile oils, paints, powder or other inflammable material or explosives are kept or stored. All such buildings or premises shall have signs placed in conspicuous places, and plainly lettered "NO SMOKING."

Nothing in this section shall be deemed to prohibit smoking in any room except an audience room, when such room is especially designed and set aside for smoking, and so approved by the First Marshal and Building Inspector. A sign plainly lettered "SMOKING ROOM" or "SMOKING PERMITTED IN THIS ROOM ONLY," shall be placed in a conspicuous place.

And person who violates this section, or any owner, agent, manager, lessee, or responsible person in charge who permits the same to be violated shall be guilty of a misdemeanor, and any person having legal authority to enter and inspect such buildings or premises may cause the arrest of any person violating this section.

## SECTION 223.

### ADOBE CONSTRUCTION

Outside of the Inner Fire Limits, adobe construction will be permitted for dwellings, private residences and private domestic buildings, including private garages, barns and outbuildings, none of which shall exceed one story in height, excepting that an observation or sun room not exceeding a total of 200 square feet, may be used as a second story, when reinforced and strengthened with steel, wood posts, or equivalent as approved. All adobe construction to be as per the following regulations and requirements:

### THICKNESS OF OUTSIDE WALLS AND BEARING PARTITIONS

Maximum height to top of fire wall.	No. of stories in height.	First story.	Second story
12 feet	One	12	
22 feet	Two	18	12

Non-bearing partitions to be not less than 8 inches thick. No adobe brick shall be larger than 18x12x4 inches. The partitions shall be bonded and toothed into the side walls or metal mesh bond may be used. Metal mesh bond shall be galvanized wire mesh No. 20 ¼-inch mesh.

All adobe walls and partitions require a concrete footing, such concrete footing to be not less than 4 inches deep, and at least 2 inches more in width than the thickness of the wall resting thereon. Cover tops, of concrete footings with asphaltum or pitch before laying adobe. Both sides of all adobe walls for a distance of not less than one foot above footing and grade and the top of all adobe walls, exposed ledges and sills, shall have a uniform coating of pitch or asphaltum. Sills and ledges which are to be plastered shall have such coating put on before plastering is applied. This also applies to all places which might be subject to dampness. All exposed exterior surfaces of walls to receive waterproof undercoating or equivalent, and then finished with exterior plaster stucco.

Floor and ceiling joists shall rest on a continuous two-inch Redwood plate, of a width equal to the full thickness of wall and embedded therein. This plate shall have short nails partly driven into same at regular intervals, to assist in tying the adobe above and below, exposed edges of the redwood to be covered with mesh metal lath strips. The ends of joists and ceiling joists shall be toenailed to top of plate. The construction shall be so designed that no roof rafter exerts a thrust on the walls. All lintels to be steel or reinforced concrete, unless under

6 foot span, in which case the lintel may be stone or heavy timbers. If of timber, same shall be thoroughly painted all over with hot pitch, asphaltum or other wood preservative. Wood lintels to be protected in every case with metal lath and plaster. No lintel resting on adobe walls shall have a bearing of less than 10 inches net, where span is 5 feet or less, and such shall be increased  $\frac{3}{4}$ -inch for each foot of span or fraction thereof above 5 feet.

The rough door jambs adjacent to or against adobe walls or partitions shall be anchored to the adobe walls, using metal lath strips or other heavy metal mesh every 3 feet in height, such strips to be full thickness of walls, embedded in wall 10 inches and turned up on rough door jamb 4 inches and nailed thereto. Doors and similar openings in adobe walls or partitions shall have rough door bucks or jambs and heads at least  $1\frac{3}{4}$  inches thick in addition to the regular finish jambs and head. Heavy wood lintels shall be placed above doors, when adobe above is to be supported.

The adobe brick or blocks shall be laid upon full slushed beds of lime mortar, tempered with Portland cement; the mortar joints to be not less than  $\frac{3}{4}$ -inch thick with rough edges, or raked out, to assist the plaster and stucco to stick to walls. The adobe walls and partitions shall be plastered both sides. A two-inch cement plastered coping must be carefully formed and troweled smooth on top, with a sloping surface. All exterior plastering or stucco shall be waterproofed and waterproof-coated.

All matrix used for adobe brick or blocks shall be of a grade of adobe which dries very hard, not easily broken, and shall have an ultimate crushing strength of 500 pounds per square inch after being formed into shape and dried. The Building Inspector may demand tests, if he has reason to believe such adobe blocks are not up to the standard. All adobe brick shall be toughened and reinforced with sufficient amount of clean wheat straw, dry elastic twigs or approved equivalent. Straw used for the bedding of animals, taken from a silo, or which has been allowed to sour or decomposed or otherwise become contaminated, will be rejected. All adobe matrix and mud must be free from loam, alluvial soil, or other detrimental material.

Adobe bricks shall be dry, sound and uniform; all walls to be laid to a line both sides. Once dampness or water is allowed to reach the adobe brick in the wall, the adobe rapidly reduces to soft mud. Great care shall be used to protect the adobe from dampness. All chimney walls must be not less than 12 inches and lined from bottom to top with fire clay or tile flue lining, otherwise brick chimneys shall be used. Also see section 243.

## SECTION 224. ELEVATORS

All elevators and installations of same shall be in accordance with the laws, rules and the Elevator Safety Orders and Regulations of the State of California, and the State Industrial Accident Commission.

Dumb waiters and hand-powered elevators shall have pit of sufficient depth to allow elevator floor and bottom floor to be on same level and still have 12 inches space in the clear below elevator floor.

## SECTION 225.

### LOADING DOCKS, WHEEL GUARDS AND BUMPERS

Loading docks and platforms, when built, shall be of heavy frame construction when of wood. No supporting timber, joists, beam or girder shall be less than 4 inches in its least dimension. Two-inch material is prohibited, excepting that the floor may be  $1\frac{1}{2}$  inches thick. Concrete or masonry footing shall be provided. Such docks and platforms shall have sufficient strength to safely support a live load of 250 pounds per square foot. Provision shall be made to prevent the accumulation of combustible material or trash under such structure. A permit will be required before erecting such structures.

In all locations where there is danger of any auto, truck, wagon, or vehicle bumping or driving too close to any wall, pilaster, post, column or pier and which would endanger the stability or strength of such structural member or wall, same shall be protected with proper wheel guards, curbs, or other protective devices. Loading docks and loading platforms shall have approved bumpers.

All public garages and similar buildings which have hollow tile or cement block walls and large windows which extend within 3 feet of the floor, shall be protected by a permanent curb in the floor, or similar protective construction which shall stop the wheels and prevent any part of the car, truck, wagon or vehicle from injuring such hollow walls or windows.

## SECTION 226.

### SAFES AND HEAVY APPARATUS

No safe, vault, machine or other apparatus weighing more than 100 pounds per square foot shall be placed in any part of the building above the basement, until the strength of the supporting construction has been investigated by the Building Inspector. A permit shall be refused or granted by his decision. If a permit is granted, a fee of \$1.00 will be charged.

## SECTION 227.

### WINDOW AREAS

All buildings shall be so arranged and maintained as to secure proper light and ventilation for the occupants thereof. All rooms, including bath, toilet and water closet compartments, except as otherwise noted, shall be lighted by properly proportioned glazed windows and glazed doors, opening directly on a street, yard or court, or when approved, by properly proportioned ventilating vents and skylights. The windows and doors shall be so arranged that they may be opened for ventilation.

Inner rooms of office buildings may be so constructed and used in conjunction with an outer room, provided the partition separating the two shall be parallel or nearly parallel to the exterior wall of the outer room with at

least 25% of the area of the partition constructed of glass. Rooms may be used without any provision for natural light, provided they are used exclusively for photographic dark room purposes, X-Ray machine rooms, including moving picture booths and storage rooms in which persons remain but a short time. Sufficient ventilation, however, must be provided.

The glazed windows and skylights required shall be not less than the areas given in the following table. These areas are measured as a fraction of the floor space.

Kinds of Building—	Fraction of floor space
All public buildings, office buildings, hotels, tenements, apartments and dwellings	one-eighth
Detention buildings, jails, prisons	one-eighth
Schools and places of instruction	one-sixth
Hospitals, sanitariums, asylums, orphanages	one-sixth
Factories, workshops, laundries, etc.	one-eighth
Department stores, store buildings, commercial buildings and loft buildings	one-tenth
Churches, dance halls and skating rinks	one-eighth

This section need not apply to theatres, moving picture theatres and similar places when otherwise properly ventilated as approved.

## SECTION 228.

### FLOOR AND SEATING AREA PER PERSON, ETC.

All rooms shall be so proportioned that the minimum square feet per occupant shall not be less than the values given in the following table:

Schools	15
Hospital rooms, children	50
Hospital rooms, adults	75
Workshops, factories and offices, day workers	25
Workshops, factories and offices, night workers	40

No room shall be proportioned so that cubical content per person is less than the values given in cubic feet in the following table:

Sleeping rooms	340
Offices, workshops and factories, day workers	300
Schools	200
Hospitals, children	600
Hospitals, adults	800

In computing the seating capacity of any room or building in which seats are not fixed, an allowance of 8 square feet of floor area shall be made for each person, and all space between the walls or partitions, including the aisles in such room or building, shall be measured in when making the computation.

## SECTION 229.

### COURTS

All buildings hereafter erected having rooms which depend on a court for light and ventilation shall have courts of the following minimum dimensions:

	Minimum width in feet	Minimum length in feet
Court extending through one story	4	9
Court extending through two stories	4	9
Court extending through three stories	5	10
Court extending through four stories	6	11
Court extending through five stories	7	12
Court extending through six stories	8	13
Court extending through seven stories	9	14
Court extending through eight stories	10	15
Court extending through nine stories	11	16
Court extending through ten stories	12	17

Nothing in this section shall be construed to conflict with the "State Housing Act" requirements for hotel, dwelling and tenement house courts.

## PART EIGHT

### SECTION 230.

#### FIRE PROTECTION, SPRINKLERS, STAND PIPES, FIRE ESCAPES, HAZARDS, ETC. CELLAR PIPE HOLES

All buildings having a basement or cellar, which are used or designed to be used for the manufacturing, storage or sale of merchandise, inflammable or combustible materials, shall be provided with cellar pipe holes built in the floor of the first story. This paragraph need not apply to Class A office, Class A retail, and Class A public buildings.

Cellar pipe holes must extend from the level of the first floor, through and below the ceiling of the basement so as to enable the Fire Department to put a circulating nozzle or cellar pipe through when fighting basement fires. Cellar pipe holes must be not less than 8, nor more than 9 inches in diameter, and provided with a metal cover flush with the floor. Both the cover and the casing to be constructed of non-combustible material. The location of such holes shall be subject to the approval of the Chief of the Fire Department. There shall be one such cellar pipe hole for each 1000 square feet of basement or cellar floor area.

Obstructions must not be placed over cellar pipe holes. Materials stored in the basement shall be stored so as not to interfere with the efficiency of the circulating nozzle or cellar pipe used by the Fire Department. The Chief of the Fire Department shall notify the owners of all buildings now erected, which will come under the provisions of this section, to place the required cellar pipe holes, allowing thirty days to install the same. In case any building should be erected which would come under the provisions of this section, no permit shall be

granted until the cellar pipe holes are properly located and shown on the plans. Cellar pipe holes will not be required in buildings whose basements or cellars are equipped with approved sprinklers.

## SECTION 231.

### STAND PIPES—INTERIOR

Buildings now existing or hereafter erected exceeding two stories in height shall be provided with interior stand pipes; one stand pipe to be provided for each 8000 square feet of building area or fraction thereof. Stand pipes to be as follows:

Height of building	Diameter of stand pipe
3 stories or less	2 inches
4 stories	3 inches
5 and 6 stories	4 inches
7 and 8 stories	5 inches
9 to 15 stories	6 inches

Interior stand pipes shall extend from the basement to the roof, and shall be connected full size to the city water mains. There shall be provided at each floor, including basement and roof, valves and outlets  $2\frac{1}{2}$  inches in size, excepting for 2-inch stand pipes, which shall have outlets  $1\frac{1}{2}$  inches in size. Interior stand pipes shall be located in convenient accessible places. Before a permit can be issued for a building in which stand pipes are required, the location of the same shall be plainly marked on the plans.

Stand pipes shall be galvanized wrought iron or steel pipe and fittings shall be of such strength as will safely withstand a pressure of 300 pounds per square inch, without leaking at the valves or fittings. A shut-off valve shall be conveniently located where pipes enter building. Hose connections to be provided at each floor, basement and roof, located not over 5 feet nor less than 3 feet above the floor or roof level; the hose to be  $1\frac{1}{2}$  inches in diameter, and of sufficient length to reach all parts of the floor not reached by another interior stand pipe and hose. The hose to be approved linen hose, standard threads and couplings, as used by the local Fire Department of San Diego. Each hose shall be provided with a smooth bore nozzle not less than one foot long; such hose and equipment to be substantially supported on an approved rack. Provide an approved valve near each hose connection.

If available water pressure is not sufficient to throw a reasonable stream, stand pipes shall be connected to a tank allowing not less than 1000 gallons capacity for each stand pipe. Tank to be located upon the roof and kept filled with water.

The interior stand pipes may be omitted in buildings provided with an approved automatic sprinkler system throughout, when the regular required stand pipe hose sections at each floor, basement and roof are connected to the sprinkler risers. All stand pipes to be kept filled and under pressure, ready for instant use at all times. This section need not apply to private residences and dwellings.

## SECTION 232.

### EXTERIOR STAND PIPES

All buildings 4 stories or more in height shall have at least one exterior stand pipe starting four feet above the sidewalk. All such stand pipes shall be provided with approved gate valves, reducers and outlets, with cap and chain at each floor and roof. Also provide a Siamese outlet at the bottom, as per the following schedule:

#### 4-STORY

Size stand pipe	4 inches
Size valves	$2\frac{1}{2}$ inches
Siamese outlet	2 way
Roof outlet	2 way $2\frac{1}{2}$ in.

#### 5-STORY

Size stand pipe	4 inches
Size valves	$2\frac{1}{2}$ inches
Siamese outlet	3 way
Roof outlet	2 way $2\frac{1}{2}$ in.

#### 6 OR 7-STORY

Size stand pipe	5 inches
Size valves	$2\frac{1}{2}$ inches
Siamese outlet	4 way
Roof outlet	3 way $2\frac{1}{2}$ in.

#### 8 to 14 STORY

Size stand pipe	6 inches
Size valves	$2\frac{1}{2}$ inches
Siamese outlet	4 way
Roof outlet	3 way $2\frac{1}{2}$ in.

#### OVER 14 STORY

Size stand pipe	6 inches
Size valves	$2\frac{1}{2}$ inches
Siamese outlet	5 way
Roof outlet	4 way $2\frac{1}{2}$ in.

There shall be at least one exterior stand pipe for every 6000 square feet of building area or fraction thereof, measuring at third floor level. Where possible, stand pipes shall be rigidly fastened and supported in connection with the fire escapes. Exterior stand pipes may be fastened to exterior wall, let into a recess, or embedded in the masonry. The outlets at each floor, however, shall be at windows, in such position that firemen will have quick and easy access to same.

All exterior stand pipes and fittings shall be galvanized iron or steel. Such pipes, fittings and connections must be capable of standing a hydrostatic pressure of 300 pounds per square inch throughout.

## SECTION 233.

### SPRINKLER SYSTEMS—WHEN

(A) All basements and cellars in all new or existing Class B, C or D buildings within the Inner Fire Limits shall be equipped with a complete system of automatic sprinklers, when such basement or cellars are used or intended to be used for the manufacturing, sale or storage of combustible materials or merchandise. All buildings which are occupied for mercantile or manufacturing purposes of such nature that they form dangerous fire

risks, shall be protected throughout the entire building with approved automatic sprinklers.

(B) The main supplies to the risers of any sprinkler system above the fourth story in any building or portion thereof must be connected to pressure or gravity tanks.

All such tanks placed above the roof shall be constructed of steel, iron, reinforced concrete or wood, properly supported. The water capacity of gravity tanks shall be based on 100 gallons for each sprinkler head in the largest fire unit.

The water capacity of pressure tanks shall be based on 50 gallons for each sprinkler in the largest fire unit; provided further, that the minimum water capacity for gravity tanks shall in no case be less than 5000 gallons and the minimum capacity of pressure tanks to be not less than 4000 gallons. Gravity tanks shall be placed not less than 25 feet above the highest line of sprinklers. Pressure tanks shall be placed above top line of sprinklers.

All steel gravity and pressure tanks shall be built of fire box or flanged steel, having a tensile strength of not less than 55,000 pounds, nor more than 65,000 pounds, with heads  $\frac{1}{8}$  inch thicker than the shell; where tanks are not over 7 feet the radius of the dish is to be equal to the diameter of the tank. The longitudinal seams to be triple riveted. Girth seams may be single riveted, except where the diameter of tanks is in excess of 7 feet. They shall then be double riveted. Tanks shall be provided with manhole cover and outlet connections, gauge glasses, pressure gauges, filling pipes and drain pipes.

(C) Every automatic sprinkler system required by this ordinance having more than 25 sprinklers shall be provided with a sidewalk steamer connection equipped with a two-way Siamese inlet. Each separate fire unit shall be provided with a gate valve, so located as to be easily visible and readily accessible. A suitable iron plate with raised letters shall be securely attached to the wall near the steamer connection, reading "CELLAR SPRINKLERS," where sprinklers are installed in cellars only, and reading "AUTOMATIC SPRINKLERS," where the entire building is so protected.

Two independent water supplies shall be provided, at least one of which shall be automatic. Proper check valves must be used so that the different systems may be easily controlled by the Fire Department. When deemed necessary by the Fire Marshal, an approved automatic gong shall be installed, so arranged and connected that the opening of a sprinkler head, in case of fire, will cause the gong to ring. All sprinkler systems, tanks, etc., shall meet or be equivalent to the standard specifications and requirements as recommended by the National Board of Fire Underwriters.

## SECTION 234. FIRE PUMP

Buildings exceeding 6 stories in height, when the city water pressure in the inside stand pipes is less than 50 pounds per square inch static pressure, and the environments, construction and hazards are of such nature that

roof tanks are not practical or inadequate, Underwriters approved or approved equal, automatic fire pumps shall be installed. The capacity of such pumps shall be not less than that given in the following table:

Number of stand pipes required	Pump capacity
1 6-inch	750 gallons per minute
2 6-inch	1000 gallons per minute
3 6-inch	1200 gallons per minute

The pump installation shall be capable of delivering water to the highest hose connection at not less than 50 pounds pressure per square inch.

## SECTION 235.

### FIRE ESCAPES REQUIRED—WHEN

Every new or existing building, except as otherwise noted in detail under this section, shall be provided with approved fire escape, when more than two stories high. Excepting that class A buildings not exceeding 3 stories in height will not require a fire escape, when all stairways are favorably located as approved.

(A) Every tenement house, hotel, apartment house, school, hospital, asylum, jail and building used for public assemblage or entertainment, exceeding two stories in height, shall be provided with one approved fire escape for each 4000 square feet of floor area or fractional part thereof.

(B) All factories, stores, workshops, office buildings, commercial buildings and public buildings, exceeding 2 stories in height, shall have one approved fire escape for each 5000 square feet of floor area or fractional part thereof; provided, however, that Class A office buildings shall have one approved fire escape for each 8000 square feet of floor area, or fractional part thereof.

(C) All warehouses, storage houses, ice plants, etc., in which there are not more than 50 people employed per 10,000 square feet of floor area above the second floor, shall have one approved fire escape for each 10,000 square feet of floor area, or fractional part thereof. When more than 50 people are or may be employed above the second floor, such buildings shall have same number of fire escapes as required for factories.

(D) Nothing in this section shall conflict with any special or extra requirements for theaters, places of amusement, auditoriums, hospitals, sanitariums, schools, orphanages and places of public assemblage, nor shall any fire escape eliminate any of the requirements for regular stairs or stairways in any building. The largest floor area above the second floor shall be used as a basis for computing the number of fire escapes required. If the Building Inspector shall find that any building is not properly provided with fire escapes he shall notify the owners or the persons having charge of such building that fire escapes are required, and such owners or persons in charge shall be granted ten days in which to commence the construction of such fire escapes, and if such construction is not started within ten days, all

parts of the building above the second floor shall be vacated immediately. The posting of a notice on or in the building, or the mailing of a notice to the owner, agent, lessee or manager, by the Building Inspector, shall be construed as meeting the requirements of this section as to proper notification. Fire escapes must be completed and accepted within forty days after notice is given.

## SECTION 236.

### FIRE ESCAPE LOCATION, LIGHTS, GONGS, TESTS

(A) Every fire escape shall be located on the building so as to furnish the best means of escape.

(B) Every fire escape shall have egress thereto from the main workshop, factory room or hallway, or passageway, not less than 3 feet 6 inches wide, or such fire escape may be located so that each apartment or hotel guest room has direct egress thereto, without passing through another apartment or hotel guest room, or if a public parlor, lobby or similar room is connected directly with the public hall, corridor or passageway through a clear and unobstructed opening, without doors, then passage through same may be had to fire escape. Excepting that in Class A and B office buildings, access to fire escapes may be made through a glass door with full size glass panel, when glass panel is lettered "TO FIRE ESCAPE" in plain, large letters. Conveniently near shall be hung a small fireman's axe with which to break the glass when necessary. The location, passageway or line of travel to fire escape shall meet the Building Inspector's approval. Signs both pointing toward and marking the location of fire escapes shall be placed on each floor above the ground or grade level story.

(C) Access from the interior of the building to the fire escape, except as otherwise noted below, shall be through doors and windows at least 34 inches wide, and not less than 62 inches high in the clear. The level of the sill of the door or window giving access to a fire escape balcony shall be not more than 26 inches above the adjoining floor in the building.

Access from the interior of building to fire escapes in all hospitals, sanitariums, orphanages, asylums, schools, churches, assembly halls, picture shows, civic public buildings and similar public or semi-public buildings, including lodge and dance halls, shall be made through doors not less than 6 feet 6 inches high, swinging out onto fire escape. Bottom of door shall not be greater than one-inch above floor level of building. Door or obstruction on fire escape.

(D) In all buildings exceeding three stories in height, excepting Class A and B buildings, when fire escape openings, such windows or openings shall be protected over or near each fire escape exit, conspicuously located, there shall be an approved electrically illuminated box sign or lantern indicating the location of every fire escape. On such sign or lantern the words "FIRE ES-

CAPE" must be lettered in plain letters not less than 6 inches in height, excepting that in office and commercial buildings, such letters may be not less than 3 inches high. Where different hallways cross one another or form an angle, an additional FIRE ESCAPE sign with indicator pointing the way to the fire escape must be installed. All fire escape lights must be kept on circuits entirely separate from the general lighting system of the rooms and halls. Said FIRE ESCAPE signs must be kept burning continuously from sunset to sunrise. Further, such lettering on signs must be of a nature or located in such a way that they can be easily read during the day time.

The word "exit" cannot be used as a substitute for the word "Fire Escape." The illumination must be RED or GREEN, using either colored lamps or colored glass fronts or lanterns. If lamps are colored, clear glass fronts with red or black letters may be used. The lantern or box sign shall have metal frame, galvanized iron casing, or approved equivalent. Substantial non-combustible material must be used.

(E) All hotels, factories, workshops, hospitals, schools and similar buildings occupied at night by more than 10 persons, above the second floor, shall have in each story an electrically operated gong or gongs, capable of being heard throughout the story.

It shall be unlawful, and a violation of this ordinance to occupy any portion of any building above the second floor on which a fire escape is required, when no such fire escape has been installed and approved. Plans and drawings for new buildings which require fire escapes cannot be accepted, nor will a permit be issued unless the fire escapes are plainly shown and properly located on the drawings and the construction of same shown and specified in detail. Before a fire escape can be erected on an existing building a permit shall first be obtained for which a fee of \$1.00 will be charged. No such permit can be issued until detailed drawings have been submitted and the proposed construction and location approved by the Building Inspector.

(F) Should the Building Inspector have just cause to doubt the strength, fastening or construction of any new or existing fire escape he shall order test loads applied thereon as he may direct. In the case of existing fire escapes, the total expense for such tests shall be paid by the owner; in the case of new fire escapes, the total expense for such tests shall be paid by the contractor or builder. The required tests shall be made within 10 days after due notice has been given, otherwise the parties notified to make the tests shall be deemed guilty of violations of this ordinance, and the fire escape shall be taken down.

All fire escape balconies or platforms shall be designed to safely support a uniform live load of 100 pounds per square foot. The fire escape stairs or steps shall be designed to support a uniform live load of 140 pounds per square foot or projected area; the projected area being the total horizontal run of the flight times the width of the stairs. The ladder balustrades and railings shall safely support a uniform horizontal pressure or live load of 80 pounds per lineal foot. All test loads shall

be  $2\frac{1}{2}$  times the above mentioned live loads. The tests will be considered successful, and the fire escape allowed to stand provided there is no initial failure in any part of the fire escape, including the fastenings, bolts, anchors, brackets and supports.

(G) So-called fire escapes consisting of iron, wood or other ladders in lieu of stairs shall not be accepted as answering the purpose of a fire escape. Screws, lag screws and wood plug fastenings or anchorage to wall are prohibited on all supporting members. Through bolts must be used.

## SECTION 237.

### FIRE ESCAPE SPECIFICATIONS AND TYPES

(A) "METALLIC" fire escapes shall be securely fastened to the walls and supporting construction. There shall be a balcony at each story above the first. Metal stairways shall connect all balconies and a ladder shall be provided between top balcony and roof. The lowest balcony shall be within 16 feet of the ground or grade immediately below, and must be provided with a drop-off ladder conveniently located; the drop ladder to extend to within 9 feet of the ground, and be securely fastened to balcony or wall. A metal stairway or counter-balanced stairway or ladder reaching to ground or grade may be used in lieu of the drop ladder. Hollow tile or hollow cement block walls are not sufficient support for the average fire escape balcony.

Steel brackets supporting balcony to be not less than  $1\frac{1}{4}$  times  $1\frac{3}{4}$  steel spaced not more than 5 feet apart and the angle of the lower member of the brackets shall incline not less than 30 degrees from the horizontal, and shall extend at least 6 inches into the wall. The upper or horizontal member shall extend through the wall, using not less than 6x6 washers or plates on the inside. Counter sink to allow plastering over the plates. Not less than one square inch net section of metal shall extend through the wall. I beams may be used in lieu of the brackets when properly anchored on the inside face of the wall as approved.

The balcony floors shall consist of grading bars not less than  $1\frac{1}{2} \times \frac{3}{8}$  inch, and the cross bars supporting same shall be at least  $1\frac{1}{2} \times \frac{1}{2}$  spaced not more than 24 inches apart. The grating bars must not exceed  $1\frac{1}{4}$  inches apart. The frame around outer edges of the balconies, stair wells and the stiffener bars, when the stiffeners are not necessary, shall be angle irons not smaller than  $2 \times 2$  times  $\frac{1}{4}$ , all well riveted together; side and ends of balcony when adjacent to wall to be bolted to same. Securely bolt balcony to brackets. When construction permits, reinforced concrete balconies may be used. Balconies shall not be more than 40 inches net in clear width between rails and buildings, nor be less than 33 square feet in gross area. Stairway openings therein shall be not less than 34 inches long and 20 inches wide. Solid sheet steel balustrades are prohibited. Provide suitable means or opening to facilitate reaching drop ladder.

(B) Class C and D buildings not exceeding three stories in height may have the balconies and railing around

the balconies constructed of laminated wood or solid 3-inch tongue and groove material, provided that the minimum thickness at any point shall not be less than 3 inches of solid wood, and provided further, that the floor is covered with No. 26 galvanized iron, lock seamed and nailed in place, using no solder. Both sides of the railing, all exposed woodwork, and the bottom face or soffit of the lands shall be protected with metal lath and plaster.

Fire escape stairs shall not be steeper than 6-inch run to 10-inch rise. The rise between treads must not be more than 10 inches, and no tread shall be less than 5 inches wide. Treads to be stiffened steel plates, not less than  $5 \times \frac{3}{8}$  inches, and provided with checkered or non-slip top surfaces; treads to be well riveted to the stringers. The stair stringers to be not less than 4 inch steel channels or 4 inch steel plates at least 7-16 inch thick. Stairs to be double riveted or double bolted to the landings. When the supporting construction and location permits, reinforced concrete stairs may be used in lieu of the metal stairs. No metal fire escape stairway shall be less than 18 inches net width between the rails.

(C) Except as otherwise noted, all balcony railing shall be  $1\frac{1}{2} \times \frac{1}{2}$  inch bars;  $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{4}$  inch angles or gas pipe at least  $1\frac{1}{4}$  inch inside diameter. The space between railing and platform shall be filled with steel balusters spaced not farther apart than 9 inches on center; balusters to be not less than  $\frac{5}{8}$  inch in diameter. Vertical posts or stiffeners shall be placed at regular intervals when necessary to insure stiffness. Top of all balcony railings to be 2 feet 10 inches above balcony floor. Fire escape stairs shall have railing both sides, consisting of top and intermediate rails with vertical posts not more than 5 feet apart, all made from gas pipe not less than  $1\frac{1}{4}$  inch inside diameter; balcony well holes to be protected with similar railing except at entrance side.

The ladder to roof and the drop ladder shall be 15 inches wide; the rungs are to be  $\frac{3}{4}$  inch in diameter, and spaced 14 inches on center. The side rails shall consist of  $2 \times \frac{1}{2}$  inch steel bars. The top ladder shall start on top balcony, continue straight up and gooseneck at least 30 inches high over fire wall and fasten to roof. Such ladder shall not run in front of any opening, nor curve out around any cornice. When extending through a cornice or roof, a  $24 \times 24$ -inch fireproofed well or scuttle hole shall be provided. Splices in ladder to be made with same material, using at least  $\frac{1}{4}$ -inch bolts or rivets to each splice. All ladders to be securely bolted to balcony and wall.

(D) Nothing herein shall prohibit ornamental metal fire escapes when same are equally as substantial and meet all strength requirements and other safety provisions required for fire escapes. All metal parts of fire escapes, stairs, landings, railings and ladders shall be galvanized steel or steel painted at least two protective coats of durable paint. All new and existing fire escapes shall be well painted and kept in good repair.

Fire escapes for blind institutes, orphanages, schools, buildings designed for housing the feeble and aged, and

similar buildings, shall have all metal stairway from lower balcony to the ground; bottom end of stairs to rest on masonry footing.

Nothing herein shall be deemed to prohibit the following types of fire escapes:

(E) **SPIRAL CHUTE FIRE ESCAPE:** Consisting of an enclosed metallic spiral fire escape with a rigid form of inclined chute, constructed entirely of non-combustible material, and provided with proper means of ingress thereto from the building, and egress therefrom at the bottom; and having means enabling firemen to reach the roof thereby from the ground. Same shall be painted the same as provided for metallic fire escapes. Such fire escapes shall provide at least as safe and sufficient means of escape from the building for the occupants thereof, and furnish all the protection strength and utility of metallic fire escapes described elsewhere in this ordinance.

(F) **FIRE ESCAPE TOWERS:** Consisting of an approved fire escape stairway not less than 20 inches in width, stairway to be non-combustible, and continuous the full height of the building from the first floor exit level to the roof, with handrails on each side thereof; such stairways to be entirely enclosed with walls of brick, terra cotta tile, or concrete not less than 12 inches thick; such walls to be continuous from the basement up to and extending 3 feet above the roof and open to the sky. No openings permitted from such tower into the building. The enclosing walls of tower not to be used to carry or support any floor joists, beams or girders, unless walls are at least 16 inches thick. All stair landings to be steel or reinforced concrete. Provide an exit from the enclosure at the first floor line, opening directly to a street or yard, entrance at each floor to be obtained by means of an outside non-combustible balcony at each floor. Such balconies to meet the requirements for metallic fire escape balconies, excepting that the balconies shall be located and arranged to connect with a door opening from a public room or hallway from the interior of the building. Provide a fire door leading from each balcony to the tower. Direct access from interior of building to tower is hereby prohibited.

(G) **VESTIBULED FIRE ESCAPE TOWERS:** To be same construction as Fire Escape Towers, except that instead of the outside balcony there be built a vestibule walls continuous with and of the same kind of materials and of the same thickness as the enclosing walls of the tower. The vestibule openings shall be direct from a public room or hallway; such openings to be protected with self-closing fire doors. The vestibule floor to be of solid non-combustible material. The enclosure to have an opening at each floor through the exterior wall of the building, such opening to extend from the floor to the ceiling and be not less than  $\frac{1}{4}$  of the width of the tower; said opening to be protected with an open metallic balustrade similar to that specified for metallic fire escape balconies.

## SECTION 238.

### INSPECTION OF FIRE FIGHTING APPARATUS AND FIRE ESCAPES

The Chief of the Fire Department shall see that all stand pipes, hose reels, sprinkler systems, cellar pipe holes, axes, sand pails and fire extinguishers required by this ordinance are furnished and properly installed. Such apparatus which require testing before acceptance shall be tested by him or his assistants before final approval by his department.

It shall be the duty of the Fire Chief to see that all fire fighting apparatus and devices receive such regular periodical inspection as deemed necessary to insure same being kept in good repair and working order and that none of the ordinances covering same are violated. After all fire escapes, fire windows, fire doors and fire shutters have been installed and approved by the Building Inspector, the Fire Chief shall see that they are kept in good repair and working order. Nothing in this section shall be construed to eliminate the general inspection and acceptance by the Building Inspector. The Building Inspector or Fire Chief shall order any fire escape, regardless of kind, removed and replaced with a new approved fire escape, when such fire escape is found to be faulty or unsafe.

## SECTION 239.

### CONFLAGRATION BREEDERS

(A) Any accumulation of combustible or inflammable material, boxes, kindling, trash, etc., back of fences or sign boards, or in or near buildings, cellars, basements, etc., in such a way as to create a fire hazard, is hereby prohibited. The Fire Chief or his assistants shall order such condition to be remedied, allowing a period of ten days to do so.

(B) Old frame shacks, outhouses, barns, sheds, dilapidated fences and similar structures of frame or Class D construction, shall not be maintained in such a condition as to be classed a "Conflagration Breeder," or undue fire hazard. Such construction shall be removed or otherwise properly taken care of as directed by the Fire Chief, and other authorities having jurisdiction.

## SECTION 240.

### DUSTS, FORCED FUEL, ETC.

(A) All buildings or structures used for such manufacturing purposes or put to such uses that there will be an accumulation of dust, sawdust, shavings, lint, or other fine products or wastes in corners, crevices, out of the way places, or in any location which has a tendency or does increase the fire hazard or risk, shall be carefully watched by the occupants or persons in charge, and all such accumulation and hazard or risk, shall be thoroughly and effectively removed from time to time, and such mechanical devices or equipment shall be used as will reduce such accumulations as far as is practical or possible.

(B) All manufacturing plants employing over five persons on any floor of any building on which there are machines producing dust, sawdust, shavings, fine chips, and lint, shall provide metal conveyors with a mechanical exhaust system so that such dust, sawdust, shavings, lint, etc., are conveyed either to a fireproof vault, to a furnace or boiler, or to the outside of the building from which they shall be removed in some approved manner. Hoods of sheet metal shall be connected to the exhaust system in such manner as to collect all dust, sawdust, lint, etc., as above mentioned, as same are produced, and the exhaust capacity and velocity of the exhaust system shall be sufficient to effectually remove the same.

(C) The use of air or similar pressure devices to force fuel oil, coal oil, distillate, gasoline, or any vapor from oil of any kind from a tank or reservoir direct to the burners of any stove, range, oven, furnace or other cooking or heating apparatus, is hereby prohibited, and such systems or devices shall be removed within 90 days from the passage of this ordinance. This section shall come under the jurisdiction of the Fire Chief and other authorities having jurisdiction.

#### **SECTION 241.**

##### **CALCIUM CARBIDE, ACETYLENE GAS AND SIMILAR HAZARDS**

Any building or structure which is used or designed to be used for the manufacture of calcium carbide, and similar dangerous compounds, are prohibited in the Inner Fire Limits. Buildings and structures over two stories in height used for such purposes are prohibited. Two story buildings to be Class A construction and one story buildings shall be Class A or B construction.

It shall be the duty of the Fire Chief to inspect such premises and to ascertain that the ordinances have been fully complied with. The current, or the equivalent of such current, rules and recommendations as adopted by the National Board of Fire Underwriters for the construction, installation, handling and use of such hazardous structures and materials are made a part of this ordinance.

#### **SECTION 242.**

##### **VAULTS**

All vaults when constructed of masonry walls, reinforced concrete walls, or heavy steel or iron walls, shall be supported on independent masonry walls, piers and footings, regardless on which floor the vault may be located. This paragraph need not apply to vaults located in Class A buildings.

When used for the storage of highly inflammable materials, no vault will be considered a fireproof vault unless the sidewalls are at least 12 inches in thickness when built of brick. If walls are of concrete the same shall be at least 10 inches in thickness, and reinforced both horizontally and vertically with  $\frac{1}{4}$  inch square deformed bars, spaced not farther apart than 12 inches on center. Roof slab shall be not less than 8 inch reinforced concrete. The floor shall be of concrete and properly reinforced when self-supporting. All fireproof vaults shall

have openings protected with double set of metal doors, one near inside and one near outside of wall; such doors to have metal frames built into masonry work.

Vaults used for storing moving picture films shall have air vents not less than two near the floor and two near the ceiling. Such vents shall first enter the wall, run along in wall at right angles to face of wall a distance of at least 2 feet, and then turn out to outside face; both inlet and outlet to be protected with a  $\frac{1}{4}$  inch mesh screen No. 20 gauge galvanized wire. The total aggregate cross-sectional area of all vents shall be not less than 20 square inches to each 100 square feet of vault floor area. Vaults used for moving picture films shall have in addition to said vents an 8x12 brick flue or chimney, same as required for coal or wood burning stoves.

Illumination in vaults shall be from stationary vapor-proof incandescent electric lamps, protected with screen. There shall be a pilot light and switch on the outside, pilot light to indicate when vault light is burning.

#### **SECTION 243.**

##### **SPIRIT AND INTENT OF ORDINANCE**

The full spirit and intent of this, the Building Ordinance, shall be carried out to a logical conclusion. Nothing in this ordinance shall be construed to prevent other construction, construction methods, arrangements, use and kind of material from being used when the same can be shown to be equally as good as required and specified in this ordinance; provided same is approved by authorities having jurisdiction.

#### **PART NINE**

##### **MISCELLANEOUS SECTIONS AND REQUIREMENTS FORMING A PART OF THIS ORDINANCE**

#### **SECTION 244.**

##### **HOUSE NUMBERING SYSTEM**

(A) Buildings in the City of San Diego shall be numbered in accordance with the numbering system shown on a set of maps in the office of the Building Inspector of the City of San Diego, said maps being marked, "City East of 32nd street, No. 1"; "Business Section West of 32nd street, No. 2"; "Pacific Beach, No. 1"; "La Jolla, No. 1"; "Point Loma, No. 2"; "Old Town, No. 3."

The congested territory or business section of San Diego has been allotted six numbers to each lot of 50 feet. In all of the remaining territory one number shall be allotted every 12 $\frac{1}{2}$  feet.

(B) Even numbers will be allotted to the north and west sides of all streets; odd numbers will be allotted to the south and east sides of all streets, except a certain portion of Old Town and a portion of that part of San Diego south of N street, known as "East End," where they will be allotted in reverse to the above, because of the diagonal direction of the streets.

(C) Before the Building Inspector shall issue a permit for any building, the person taking out such permit

shall obtain from the office of the Building Inspector a house number for the lot for which the building permit is desired.

(D) Before any application for water shall be filed with the Water Department, the party desiring to make such application shall apply to the office of the Building Inspector for, and shall receive from the office of the Building Inspector a house number for the lot for which the water is desired.

(E) All house numbers allotted by the office of the Building Inspector as aforesaid shall be placed in figures at least two inches perpendicular on the transom over the principal entrance of the building, or at some other place on the front of the building where the number may be easily seen.

(F) It shall be the duty of every owner, lessor, or occupant of any building in the City of San Diego to apply to the Building Inspector of the City of San Diego for the correct house number for the building so owned, rented or occupied, within 30 days after this ordinance becomes effective.

Any person violating any of the provisions of this section or ordinance shall be guilty of a misdemeanor, and upon conviction thereof shall be subject to such penalties or fines as provided in this ordinance.

## SECTION 245.

### FILM EXCHANGES AND STORAGE

(A) Any building, room or structure hereafter erected or altered for the use of, or any such building or room used as a motion picture film, or nitrocellulose film exchange or plant, shall be of Class A or B construction. This section also applies to all buildings or that part of a building used for the repair, storage, manufacture, photographing, printing, developing, selling, or cleaning of films for motion pictures made of nitrocellulose or other combustible material. A reel, within the meaning of this ordinance, shall be a film, either positive or negative, used for motion pictures. Reels in such exchanges, plants, rooms, etc., as above mentioned, shall be kept in closed, tight, metal containers, and shall be placed in a fireproof vault, except when undergoing examination or repair.

Such exchanges and plants, etc., as herein mentioned, shall not be located in any basement, nor shall they be located above the second floor. All such buildings or rooms put to the uses herein mentioned shall have all openings in exterior walls protected with approved fire windows, or fire doors, excepting those openings facing a public street.

(B) Examinations and repair of films shall be permitted only in a room meeting the following requirements:

Such room shall have at least 60 square feet capacity for each person employed therein; all enclosing walls closing partitions to be solid 3 inch wood metal lather and plastered, both sides. All openings in such partitions shall be protected with fire doors or fire windows. Examination and repair rooms shall have at least two

separate and distinct exits. No combustible or inflammable material other than the films shall be stored in the room, and at no time shall there be more than ten exposed reels under examination or repair. No more than ten reels enclosed in metal containers may be stored in the room.

(C) No system of heating, except hot air, hot water or steam, shall be employed for heating the room. Such heat giving devices shall be protected with a metal screen to keep films at least 4 inches away from register or radiator. Smoking is prohibited, and two conspicuous signs, plainly printed "NO SMOKING" shall be posted in each of such rooms. Provide sufficient outside ventilation, allowing at least 3 square inches of ventilation area to each square foot of floor surface.

Proper metal caps for storage of waste or clippings of films shall be provided, and there shall be one such can for each employee engaged in examining or repairing films; cans to be emptied at least once a day and contents taken care of as approved by the Fire Marshal. Each of said rooms for examining and repairing films shall be protected with at least two approved three-gallon chemical fire extinguishers, two pails of water, and two pails of sand.

(D) All illumination in such rooms shall be from stationary, vapor-proof, incandescent electric lamps, protected from contact with the films by wire guards supported at least 3 inches from the surface of the lamp. The supply of any compound of collodion, amyl acetate or other inflammable cement issued to an employee shall not exceed three ounces, and shall be kept by such employee in a tight, glass stoppered bottle. Such surplus inflammable cement shall be stored in a vault. Every motor used as a rewind or for other purposes shall be of the full enclosed type with no exposed live metal parts.

(E) The receipt and shipment of films shall be permitted only in a room meeting the requirements imposed for examination and repair room. Not more than ten exposed reels, 30 reels enclosed in metal containers, and not more than 75 reels in approved shipping boxes awaiting opening or shipment, shall be kept at any one time in the shipping room, and no materials except films and a reasonable amount of printed advertising matter contained in fireproof metal closets shall be kept in such room.

If it is desired in any film exchange or plant to project motion pictures, such display shall be carried on only in a room separate from the examination and repair room. The projection machine and operator shall be enclosed in an approved moving picture booth, permanent or portable.

(F) If films are to be cleaned or washed with ether, alcohol, or other inflammable liquid, the room in which the cleaning is done shall conform to the requirements given for the examination and repair room. The receptacle containing the cleaning liquid shall be tightly closed, except at the points where film enters and leaves the receptacle, and the receptacle for the drying of reel, etc., shall be covered by a ventilating hood connected to a duct leading to the outside air. The vapor arising

from the cleaning process shall be removed through the duct by a mechanically induced draft. The wash room shall not be used for the storage or handling of combustible material other than films, and not more than five exposed reels shall be permitted at any one time in the room.

(G) Every room used for the development, drying, printing or manufacturing of films shall be constructed and maintained as required for the examination and repair room, except the number of exposed reels allowed shall not exceed:

For manufacturing .....	25
Development .....	25
Drying .....	10
Printing .....	10

In addition, the number of reels enclosed in approved containers permitted in such room shall not exceed three times the allowable number above specified.

## SECTION 246.

### BILLBOARDS

(A) The term "billboard," as used throughout in this section shall be deemed to mean any board, fence, sign, advertising sign or structure erected for advertising purposes, or upon which any advertisement is shown or where upon any poster, bill, printing, painting, or advertising matter of any kind whatsoever may be placed, tacked, nailed, posted, pasted, printed, painted, stamped or fastened.

(B) The above definition shall not be held to include any board, sign or surface used to display official notices issued by any court or public office or posted by any public officers in the performance of a public duty, or used to display announcements of meetings on the premises whereon such bulletin boards or signs are displayed, nor shall the term "billboard" be held to apply to any sign, sign device or bulletin board used to advertise any business conducted on the premises whereon such sign, sign device or bulletins are located, nor shall it be held to include a real estate sign, not exceeding 80 square feet in area, advertising for sale, lease or rent the property upon which such real estate sign stands.

(C) The term "Outdoor Advertising," as used in this ordinance, is hereby defined to be advertising on any board, sign, fence or structure, or the placing thereon of any poster, bill, or advertising matter of any kind whatsoever, and the pasting, posting, painting, printing, stamping, nailing, tacking, or otherwise fastening of any handbill, card, banner, sign, poster, advertisement or notice of any kind upon any property or place. The term "outdoor advertising" shall not be held to mean such posting or advertising under the conditions as specifically outlined in paragraph (B) of this section. Throughout this section the term "billboard" shall be deemed to mean any billboard or advertising sign board.

(D) It shall be unlawful and a violation of this ordinance for any person, firm or corporation to place, erect, construct or maintain any billboard or advertising sign board, or carry on the business or occupation of

bill-posting or outdoor advertising in violation of any of the provisions of this section.

(E) The Building Inspector of the City of San Diego is hereby named as the proper official to enforce the provisions of this section, excepting electrical work, conduits, wiring, etc., which shall come under the jurisdiction of the City Electrician, and such other sections as should properly be enforced by the police department.

(F) No person, firm or corporation shall engage in or carry on the business or occupation of outdoor advertising, bill-posting, or erecting or maintaining billboards, without first obtaining a license to do so. Each application for license must be signed in full by the persons seeking the license, or by a duly authorized agent of such person or persons. After the said application has been approved, the City Auditor will issue the licence as provided by law.

(G) No person, firm or corporation shall work under or carry on the business of bill-posting, outdoor advertising, or erecting or maintaining billboards under a license other than the one issued to the said person, firm or corporation. This paragraph does not apply to a bona fide employee of a licensed person, firm or corporation.

(H) For the purpose of regulating the erection, construction and maintenance of billboards within the City of San Diego, the territory of the city shall be divided into districts to be designated and known as (1) Business districts; (2) Semi-business districts; (3) Suburban districts; and (4) Residence districts.

The "Business district" shall consist of and include all that portion of the City of San Diego within the following described boundaries, to-wit: Beginning at the shore line of San Diego Bay where it intersects with the center line of Emory Street; thence on a line directly in the center of Emory Street to its intersection with the center of Winder Street; thence northeasterly along the center line of Winder Street to its intersection with the center line of Columbia Street; thence southerly along the center line of Columbia Street to the intersection of the center line of Fir Street; thence easterly along the center line of Fir Street to the intersection of the center line of Fourth Street; thence northerly on the center line of Fourth Street to the intersection of the center line of Maple Street; thence easterly on the center line of Maple Street to a line parallel to and distant 100 feet east of the east line of Fifth Street; thence southerly on a line parallel to and distant 100 feet east of the east line of Fifth Street to the center line of A Street; thence easterly on the center line of A street to its intersection with the center line of Nineteenth Street; thence southerly along the center line of Nineteenth Street to its intersection with the center line of Sigsbee Street; thence southwesterly along the center line of Sigsbee Street to the shore line of San Diego Bay; thence northerly along the shore line of San Diego Bay to the point of beginning.

The "Semi-business Districts" shall consist of and include all lots and parcels of land not included in the Business District, fronting on both sides of the same

street within any block wherein one or more buildings, establishments, or stores are devoted to or are utilized for business other than billboards or advertising sign boards, occupy frontage on either side of such street, or where the entire frontage on both sides of such street is vacant. For the purpose of this paragraph only, the term "Block," is defined to mean all lots or parcels of land for their full depth, extending along that portion of a street (hereinafter referred to as the "primary" street), lying between two cross streets which intersect the said primary street. The term "street" as used in this section, shall include all public thoroughfares excepting alleys.

"Suburban districts" shall consist of and include all portions of the City of San Diego (not included in the business or semi-business districts) which are not divided or subdivided into lots of 100 feet or less frontage. Every "city block" bounded on all sides by streets, shall be considered a suburban district for all purposes of this section, provided no residential structure, tenement house or hotel is maintained on such block.

"Residence districts" shall consist of and include all portions of the City of San Diego not included in the Business, Semi-business or Suburban districts.

(I) It shall be unlawful for any person, firm or corporation to erect or construct, or to cause or to permit to be erected or constructed, any billboard within any residence district. Billboards may be erected or constructed within the Business district, Semi-business districts, and Suburban districts.

(J) No billboard or billboard sections exceeding 40 square feet in area, shall be erected or started until a written permit to do so has been obtained from the Building Inspector. In making application for said permit, a sketch, diagram, or approved detailed description of such billboard shall first be submitted to the Building Inspector. If approved, the Building Inspector shall issue the desired permit and collect a fee therefor, fee to be based at the same rate relative to original cost as required for buildings and other structures when obtaining permits.

(K) No billboard shall be located, erected or maintained on any building or property without the written consent of the owner, authorized agent, or person in charge of such building or property. Such written consent shall be shown to and approved by the Building Inspector before a permit can be issued.

(L) The fastenings and the safety of the wall, roof, supports or structure supporting any billboard shall be approved. Billboards shall not be erected or maintained on or above any public property, walk, street, alley or fire escape or stand pipe.

Billboards shall not be located near the intersection of main highways or thoroughfares, nor where highways or thoroughfares change direction, in such position as to obstruct the view sufficiently to create a condition dangerous to traffic.

It shall be unlawful to place or maintain any billboard upon any lot or premises in such a manner that any por-

tion of such billboard is nearer to the line of a public walk, street or alley than the front line or face of the building nearest the billboard, except where said nearest building is more than 25 feet from such public street, walk or alley, in which case the billboard shall not be placed nearer than 25 feet from the said public property. This paragraph shall not be construed as applying to the "Business district."

(M) Billboards with an advertising surface exceeding a total of 15 feet in height, whether one or more sections in height or not, are prohibited.

(N) The entire advertising surface of all billboards shall be of strong non-combustible materials when placed on the roof or pent house of any building. Non-combustible ornamental columns or pedestals only may be placed at the ends of such billboards. Each section may have a small skeleton wood frame in back of the non-combustible advertising surface. The surface of all billboards erected or maintained within the city limits of the City of San Diego shall be of non-combustible material, provided, however, that the surface of billboards located outside the fire limits on which the advertising matter is painted may be of wood at least three-quarters of an inch in thickness. It shall be unlawful for any person, firm, or corporation, except a public officer or employee, in the performance of a public duty, or a private person in giving legal notice, to paste, post, print, nail, or tack, or otherwise fasten any cloth, paper or cardboard banner, hand-bill, poster, sign, or notice, of any kind, upon any building, except where a metal surface has been provided, or upon any wooden faced billboard, fence, enclosure, bulkhead, or any other frame structure, in the City of San Diego.

(O) All billboards shall be constructed according to the following specifications; provided, however, that the following specifications shall not interfere with any additional requirements for safety as may be necessary.

Billboard shall have sufficient strength and anchorage to safely withstand a lateral wind pressure of 20 pounds per square foot of exposed surface. Except as otherwise noted in detail, all billboards exceeding a total of 80 square feet in area shall be built as follows: The surface of all billboards shall be securely fastened to a frame-work, the posts or uprights of which shall be of wood not less than 4x6 inches, placed not more than 8 feet apart and extending full height to top of billboard. The bottom ends of posts shall be set at least 3 feet into the ground, with the earth tamped securely around them. The surface material of the billboards shall be securely attached to wooden stringers which run continuously the entire length of the billboard.

There shall be at least one 2x4-inch horizontal stringer for each 4 feet or fraction thereof that the surface of such billboard is in height; provided, however, that when the advertising surface of a billboard does not exceed 11 feet in height, three wooden stringers may be employed, in which case the one at the top edge and the one at the bottom edge shall be 2x6 inches each and the one in the center shall be at least 2x4 inches.

Each horizontal stringer shall be attached to each post with three 30d nails. The vertical posts shall be

braced by wooden braces not less than 2x6 inches, one brace to each post, each brace to be securely attached to post within 2 feet of the top, using at least three 30d nails. The lower end of each brace shall be attached to an anchor post, using three 30d nails. The anchor posts shall be not less than 3x6 inches by 5 feet and shall be securely set at least three feet in the ground. A cross piece 2x6x14 inches shall be securely nailed to the front of each anchor post 6 inches below the surface of the ground, using three 30d nails in each case. Concrete or steel anchors may be used or other systems of anchorage may be used when approved.

Should the vertical posts rest upon a foundation wall, retaining wall or bulkhead, the posts shall be securely anchored to same at bottom, using approved steel dowel pins set securely in wall at least 4 inches and doweled at least 6 inches into the bottom of each post. When the billboard is built in an excavation so that the height of posts required exceed 16 feet, the posts and braces shall be increased in size or number, or otherwise reinforced as approved.

(P) When located near ground, there may be placed between lower edge of billboard and the ground an ornamental lattice or open grill work. An ornamental border may surround the advertising surface, and appropriate ornamental columns or pedestals may finish the ends.

(Q) Billboards when placed on or above the roof of any building or pent house shall not have a greater advertising surface than 20 feet in height. No billboard shall have a greater width than the roof or pent house upon which such billboard stands. Roof and pent house billboards exceeding 20 feet advertising surface in height shall be governed by the "sign" ordinance regulations in every detail.

The lower edge of all roof billboards shall be at least 4 feet above that part of the roof upon which the billboard stands. No part of any billboard shall be placed nearer than 3 feet to any parapet or fire wall, measurements to be taken in any direction. The said clearances must be kept free from all obstructions other than posts and braces. All posts, braces, supporting structural frame work and the advertising surfaces shall be steel or similar approved non-combustible materials securely bolted, riveted or otherwise correctly fastened in place.

Billboards shall not be placed, erected or maintained on or above the roof, pent house, or above any parapet wall of any building, unless the building is of Class A, B or C construction, and then only after the Building Inspector has inspected such locations and found same sufficiently safe for the purpose.

(R) No paper, cloth or advertising matter shall be allowed or permitted to hang loose from any billboard. No person, firm or corporation engaged in outdoor advertising, or who erects, constructs, owns or controls any billboard shall fail, refuse or neglect to remove or cause to be removed at all times, weeds, rubbish or any inflammable waste or material from the base of any billboard.

(S) No billboard shall display or advertise any state-

ment, words, or pictures of any obscene or indecent nature, nor shall any billboard or advertising sign board display or advertise any unlawful act, business or purpose. Illustrations or delineations of any human being in gruesome detail or manner objectionable to the moral senses, is hereby prohibited.

(T) There shall be placed and maintained on the top of each billboard the name plainly painted, of the person, firm or corporation owning, or who is in possession, charge, or control of such billboard.

(U) It shall be unlawful for any person, firm or corporation to scatter, daub, or leave any paint, paste or other substance used for painting, pasting, or affixing advertising matter upon any public street or sidewalk, or scatter or throw or permit to be scattered or thrown, any bills, waste matter, paper, cloth, or materials of whatever kind removed from the billboards, on any public street, or on private property.

For the purpose of this section, the term "Building" shall be deemed to mean any permanent structure having a height of 8 feet or more, and a floor area exceeding 64 square feet, which is provided with a roof and side walls and designed to provide safety and shelter, and protect the occupants and contents against the elements.

## SECTION 247. SIGNS

(A) The word "Sign," as used throughout in this section, shall be deemed to mean any sign, sign board, or sign device of any character (other than a Billboard), attached or hung in any manner, or placed in front of, upon, or adjacent to any building, or placed or maintained on or above any sidewalk, street, or public property.

(B) It shall be unlawful for any person, firm or corporation to erect, place, suspend, attach, or maintain any sign in violation of any of the provisions of this section. The Building Inspector is hereby named as the proper official to enforce all the provisions and requirements of this section, excepting those provisions relating to the electrical work, including wiring, lamps and conduits, which shall be enforced by the City Electrician. The location of any sign, its fastenings, and the safety of the wall, roof or supports supporting same, shall be approved by the Building Inspector before the work or sign is started. No sign or banner shall be fastened or supported on any fire escape or stand pipe.

(C) No sign shall display or advertise any statement, word or picture of any obscene or indecent nature, nor shall any sign display or advertise any unlawful act, business or purpose.

(D) Except as otherwise particularly stated herein, no sign shall be erected, placed or hung without first obtaining a written permit from the Building Inspector. The fee for such permit shall be based at the same rate relative to original cost as required for buildings. Any existing sign taken down and replaced or hung anew will require a permit. All electric signs will require two permits, one to be issued by the Building Inspector and one to be issued by the City Electrician. Before any

permit is issued for a sign, a sketch showing the shape, size and construction shall first be submitted to the Building Inspector for approval, and in the case of an electric sign, a similar sketch shall be submitted to the City Electrician for approval.

(E) Every sign must have the maker's name or recognized trade mark permanently attached or painted on the exterior, same to be legible at least 25 feet from the sign. This clause also applies to all banners and temporary signs.

The following signs do not require permits: (1) Signs, other than roof, pent house and electric signs, within the Inner Fire Limits, which do not project more than 6 inches beyond the face of the building and are less than 40 square feet in area (when they are 40 square feet or more in superficial area, a permit must be had). (2) Signs, other than roof, pent house and electric signs, outside the Inner Fire Limits, which do not project more than 3 feet beyond the property line, and are less than 40 square feet in area.

(F) All sign supports, brackets, guys, turnbuckles, bolts, anchors and fastenings, shall be figures strong enough to safely hold and support all loads and other stresses which may come upon them. The minimum diameter of any supporting wires or cables shall be not less than 3-16 inch galvanized wire or cable for signs projecting less than 5 feet and the minimum diameter of such supporting wires or cables shall be not less than  $\frac{1}{4}$  inch galvanized wire or cable when the sign projects 5 feet or more. All guy wires shall be at least 3-16 inch galvanized wire or cable. All guy and supporting wires or cables shall be provided with approved galvanized turnbuckles. All other supports, brackets, screw eyes, strap irons, etc., shall be galvanized or given two heavy coats of protective non-corrosive paint.

The use of wood plugs, or wood wedges in masonry walls, are hereby prohibited. Approved long expansion bolts, through bolts, nuts and washers or equivalent permanent fastenings must be used in every case. Dislodged or loose brick, stone, or masonry around fastenings must be permanently cemented back in place.

(G) All signs and supports must be kept in good repair and working order by the person, firm or corporation owning, operating or having the care or custody of such signs. The Building Inspector shall, in the event of a violation of or failure to comply with any of the provisions of this section, have the power to order and compel such sign to be taken down and removed within ten days from the date of such order.

(H) No sign, whether permanent or temporary, shall be placed or hung in such a way as to project in front of, or obstruct the view of any window. Signs projecting more than 6 inches away from face of building or over public property, must be hung at right angles to face of building or property line, excepting at corner of two intersecting streets, in which case the sign shall be hung so as to make the same angle with both streets. The projection of the latter signs shall not exceed the normal width of sidewalk measured at right angles to the building or property line. "V" shape signs projecting more

than 6 inches beyond the property line are prohibited.

(I) All signs which project or extend over the walk or other public property more than 3 feet shall be hung by a hinged connection at building in such a manner that the said signs may be easily swung back against the building, or other supports in the absence of a building. The hinged connection or hinge proper must be within 12 inches of the property line. No sign shall be placed or maintained on any parapet wall, unless such sign does not project above the parapet. Signs placed or maintained upon public sidewalks are hereby prohibited.

(J) Except as otherwise noted below, all signs within the Inner Fire Limits, any part of which projects more than 6 inches beyond the face or wall of a building, or projects more than 6 inches over public property, shall be constructed of metal. This also applies to signs projecting 6 inches or less, when the area of such signs are 40 square feet, or more, in superficial area.

Any sign projecting more than 3 feet beyond the property, regardless of location, must be an electric sign. All metal signs other than electric may have small wood molding or frame around the outer edge.

(K) Canvas and similar approved banners stretched across streets or other public property will be permitted for a period of 15 days, provided a special permit is first granted by the Common Council, and a regular permit obtained from the Building Inspector, paying the latter a fee of \$1.00 for permit, before erecting the banner. At least one one-inch sound rope shall be used for main banner support, and two  $\frac{1}{2}$ -inch auxiliary ropes, one for each lower corner of banner. Ends of rope to be well secured. Provide sufficient wind holes when necessary. No part of any cloth awning except the hanging border shall be painted with a sign.

Temporary fabric or cloth signs tightly stretched on a wood frame and placed flat against a building will be permitted, provided that the total area of such temporary signs does not exceed 150 square feet for each 25 feet width of building. No temporary sign shall extend more than 6 inches over public property. Temporary cloth signs require no permit, but same shall come under the jurisdiction of the Building Inspector. All fabric or cloth signs must be permanently removed within 60 days after being erected.

(L) No sign shall be suspended from or below another, or supported on top or above another sign, unless the total height of all signs taken together, measuring from extreme bottom edge to extreme top edge, shall come within all the provisions of this ordinance regulating the height, material, etc., of a single sign.

When the bottom of a sign is more than 7 feet and less than 10 feet above the sidewalk, the projection shall not exceed one foot. When the bottom of a sign is more than 10 feet and less than 12 feet above the sidewalk grade, the projection must not exceed 3 feet. When the bottom of a sign is 12 feet or more above sidewalk grade, the projection may extend a distance equal to the normal width of the walk, measuring at right angles to the building. Under no conditions, however, shall the

total height of the latter exceed 4 feet 4 inches, when projecting more than 3 feet beyond face of building, excepting that electric signs which do not project more than 4 feet from the property line may extend full height of building.

(M) Signs shall not be placed or erected on the roof or pent house of any building unless such building is of Class A, B or C construction. Roof signs exceeding a total height of 20 feet advertising surface, shall be of metal open work skeleton lettered construction with a structural steel frame. Signs on roofs of Class A and B buildings shall not exceed a total height of 50 feet. Signs on roofs of Class C buildings shall not exceed a total height of 30 feet. This paragraph shall not be deemed to prohibit the erection of a sign on the roof of a Class D building located outside the Inner Fire Limits, provided such sign does not exceed 4 feet in height.

No roof sign shall be placed nearer than 3 feet to any parapet wall. The lower edge of all roof signs must be kept at least 4 feet above that part of the roof upon which the sign rests. The above 3 foot and 4 foot clearances must be kept clear of all obstructions excepting the main supports of the sign; excepting that signs not exceeding 2 feet in total height may be placed directly on the ridge and parallel to same. All roof and pent house signs and sign supports, braces and fastenings must be of approved non-combustible materials. Pent house signs shall not exceed a total height of 20 feet, measuring from the roof of the main building above which the pent house projects, unless the pent house signs meets all the requirements of roof signs above mentioned. Roof and pent house signs shall not have a greater width than the roof or pent house upon which the said sign stands.

All signs, regardless of location, shall have sufficient strength to safely withstand a lateral wind pressure of 20 pounds per square foot of exposed surface. The strength of all roofs must be investigated and approved by the Building Inspector before a permit for a roof sign can be issued. This also applies with equal force to pent house signs.

(N) Clocks will be permitted next to curb at outer edge of walk, provided such clocks are approved running clocks which keep the time of day. The bottom or pedestal part shall not exceed 2 feet in any outside dimension. That part of the clock carrying the dials shall be at least 8 feet above the walk. All supports, pedestal, etc., shall be of rigid, substantial, non-combustible material, securely anchored in place.

(O) An electric sign, in order to be construed as such, must be provided with electric lamps exposed on the exterior. Such lamps shall form an integral part of the character or symbols of the sign. The total illumination shall be not less than the equivalent of 8 candle power per square foot of exposed sign surfaces.

Hollow signs, not exceeding 9 inches in total thickness, when provided with non-leak or weather-tight trans- cepted as electric signs, provided that not more than 50 percent of the external illumination stipulated in the preceding paragraph is placed on the inside. The remain-

ing 50 percent of the required illumination, however, must remain exposed on exterior.

Illumination of any sign by reflected light shall not qualify such sign as an electric sign in the intent of this ordinance, nor shall any lights or lamps be held away from the sign, with arms, brackets, conduits or rods.

(P) Wires carried on the outside of signs must be run in approved metal conduit, or approved lead sheathed armoured cable. Wires within the sign structure must be double braided, rubber covered, and may be carried not less than ½ inch in the clear of each other or surrounding metal. Where such spacing must be less than ½ inch, the wires must be in conduit or cabled.

All electric signs shall be constructed entirely of metal or other approved non-combustible material. The sheet metal must not be less than No. 26 U. S. standard gauge. All electric signs shall be braced by angle iron and metal braces of such thickness and size and in such position as to insure sufficient strength and rigidity with the proper factor of safety. Plain glass panels or characters more than 150 square inches in area on any sign are prohibited, unless wire glass is used. The bottom of all hollow or box electric signs shall have at least one drainage hole; the diameter of such drainage hole shall be at least ¼ inch for each square foot of sign surface. No sign other than an electric sign shall be superimposed or suspended on or from another electric sign.

(Q) In the case of ornamental scroll work or similar embellishments on electric signs, when impractical to support wires as above stipulated, the wires may be separated from the metal by sections of porcelain or glass not less than ¼-inch in thickness. When wires cross each other, pass out of letters, or into cut-out boxes, they must be protected by approved tubes or bushings. When wires not inferior in size and insulation to approved No. 14 B & S gauge are used to connect direct to standard sockets or receptacles totaling not over 1320 watts at 110 volts or equivalent, same shall be dependent upon final cut-out.

(R) All electric signs must be burned at least two hours each and every night excepting that Sunday nights may be optional. All signs not so burned shall be removed or swung back against building and properly fastened upon the order of the City Electrician.

(S) The fee for electric inspection and permit shall be as follows:

Electric signs containing 1 to 10 lights	\$1.00
Electric signs containing 11 to 25 lights	2.00
Electric signs containing 26 to 50 lights	2.50
Electric signs containing 51 lights or more	3.00

## SECTION 248.

### RADIO TOWERS, ETC.

(A) Radio towers or masts, placed on buildings, and when not of structural steel and self-supporting, shall have guy wires at least ½ inch in diameter when the mast does not exceed 20 feet in height, and not less than 3-16 inch in diameter when exceeding 20 feet in height; guy wires each to be provided with a galvanized iron turnbuckle. Provide three or more guys at each connection or staying point of the mast. Guy connections

at mast shall not be more than 12 feet apart, measuring vertically.

(B) Masts when of wood must have an average cross sectional area of 9 or more square inches when not more than 20 feet in height, and at least 14 or more square inches when exceeding 20 feet in height. Height of wood masts when placed on buildings must not exceed 36 feet. Radio masts or towers are prohibited on Class D buildings located in the Inner Fire Limits. Wood masts must be sound, straight grained timber, free from knots or other detrimental defects.

(C) Before erecting radio masts or towers a permit must first be obtained in all cases, except that radio masts not exceeding 20 feet in height and when located outside the Inner Fire Limits will require no permit. A drawing showing the general design and details must be submitted when making application for permit.

(D) The structural design and fastenings shall be so designed that none of the allowable stresses permitted in this ordinance are exceeded in the least, excepting that no guy shall be stressed over 8000 pounds per square inch net section. No guys or antenna shall extend or pass over public property.

## SECTION 249.

### SMOKE NUISANCE

(A) There is hereby created a Department of Smoke Inspection. The Boiler Inspector of the City of San Diego is hereby charged with the duty of enforcing this section.

The Common Council may appoint a smoke abatement committee, one of whom shall be the Building Inspector of said City. Said committee shall act as advisors to the Common Council upon matters pertaining to the organization or the conduct of the smoke abatement work or both. The Boiler Inspector shall at all times receive and keep on file all suggestions, recommendations, advice or other communications which may be submitted to him in writing by the said Committee.

(B) It shall be unlawful and a violation of this ordinance for any person to proceed with the construction or alteration of any plant used or designed to be used for the production of power or heat, until plans and specifications for such work shall have been submitted to the Boiler Inspector, approved by him, and a permit for the prosecution of such work issued.

The plans and specifications shall show the nature and extent of the work to be done and the amount of power and heat to be supplied by such plant. Said plans and specifications shall also contain a statement of the kind of fuel to be used and shall show all provisions made for obtaining complete combustion of the fuel to be used and for the purpose of preventing smoke. Said plans and specifications shall show that the room or apartment in which such plant is to be located is of proper material and construction throughout, and is provided with doors, windows or other means of ventilation sufficient to prevent the temperature in said room or apartment from arising to a point higher than 120 degrees Fahrenheit.

Upon the approval of such plans the Boiler Inspector

shall notify the Building Inspector, and the latter, together with the Boiler Inspector, shall see that the construction and work is done in accordance with the plans and specifications. This section need not apply to small necessary changes or repairs which do not increase the capacity of the power or heating plant, nor involve any substantial alterations which do not change the method or efficiency of smoke prevention.

A fee shall be charged for the inspection of plans and specifications and for the erection, reconstruction or alteration of any such plant; this fee to include the issuing of a permit in case such permit is granted. The amount of such fee shall be at the same rate relative to cost as laid down and stipulated for buildings; the minimum fee in all cases being \$1.00.

**SMOKE EMISSION:** The emission of dense smoke anywhere in the City of San Diego from the smokestack of any locomotive, boat, steamboat, or steam tug, for a period of more than seventy-five seconds, except for a period or periods aggregating not to exceed ten minutes in any hour during which period or periods the fire box is being cleaned or a new fire is being built therein, is hereby declared to be a nuisance. Provided that the fire engines or fire boats of the City Fire Department, or both of them, shall be exempt from these restrictions.

The emission of dense smoke in the City of San Diego, from the smokestack of any steam roller, steam derrick, steam pile driver, tar kettle, or other similar machine or contrivance, or from the smokestack or chimney of any building or premises, except for a period or periods aggregating not to exceed ten minutes in any one hour, during which period or periods the fire box is being cleaned or a new fire is being built therein, is hereby declared to be a nuisance.

All chimneys for furnaces, cupolas, annealing ovens, boilers and other power and heating plants (except as otherwise noted), shall extend at least 10 feet above the highest point of any roof within a radius of 50 feet. When such fuel is used which will cause or have a tendency to cause such chimney or flue to throw sparks, approved spark arrestors shall be installed. Further, all chimneys shall not be allowed to accumulate an undue amount of soot. It shall be unlawful and a violation of this ordinance for the soot to accumulate in such quantities that same will burn out of its own accord, when subjected to heat or flame, or fly over the premises or adjacent property, thereby creating a nuisance. Such flues, which accumulate soot, shall be properly cleaned out at least once a year.

Any nuisance such as above specified may be summarily abated by the Boiler Inspector, or his authorized assistants, and such abatement may be in addition to the fines and penalties provided in this ordinance.

Any person or persons, or corporation, owning, operating, or in charge of any of the above locomotives, chimneys, premises, and other devices and as mentioned above and who shall cause or permit the emission of such dense smoke in the City of San Diego, in violation of the provisions of this section, or who shall cause or permit such nuisances herein mentioned, shall be deemed guilty of a

misdemeanor, and upon conviction thereof shall be fined as provided herein.

For the purpose of grading the density of smoke, the Ringelmann smoke chart, as published and used by the Federal Bureau of Mines, shall be the standard of comparison. Smoke shall be considered "dense" when it is of greater density than No. 3 of the chart.

The provisions of this section need not apply to detached private residences and dwellings.

(C) The issuance and delivery by the Boiler Inspector of any permit for the construction, reconstruction, alteration or repair of any plant or chimney connected with a plant shall not be deemed to exempt any person or corporation to whom such permit has been issued or delivered, or who is in possession of any such permit, from prosecution on account of the emission or issuance of dense smoke caused or permitted by such person or corporation.

The City shall provide such instruments, books, papers and equipment as shall be necessary for the proper prosecution of the smoke abatement work. The Boiler Inspector shall have charge of such instruments, books, papers and equipment, and shall deliver the same to his successor in office.

The Boiler Inspector shall cause to be kept in his office a complete record of all plans submitted and of all permits issued. He shall also cause to be kept a record of all stacks observed and the smoke observations from any stack that is found to exceed the allowable time limit for dense smoke.

## SECTION 250.

### RETROACTION

The provisions of this ordinance shall not be considered as being retroactive to the full extent, except in cases where it is specifically so stated. However, this section shall not be deemed to prohibit the Building Inspector from enforcing the requirements of this ordinance to existing buildings and structures in so far as they apply to entrances, exits, fire escapes and ventilation, including those provisions for the proper protection of life and property as far as possible.

## SECTION 251.

### SCOPE AND CONFLICTING ORDINANCES

(A) Sections 1 to 252, inclusive, including all subsections therein, are a part of this ordinance.

All ordinances and parts of ordinances in conflict with any of the provisions of this ordinance are hereby repealed.

(B) The Building Inspector is hereby named as the proper authority to enforce all sections of this ordinance, except as otherwise particularly specified in detail.

(C) In the event that any part, clause or sentence of this ordinance shall be adjudged void and of no effect, such decision shall not affect the validity of the rest, or any remaining portion, of this ordinance.

## SECTION 252.

This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 6th day of November, 1922, by the following vote, to-wit:

AYES—Councilmen Bruschi, Heilbron, Held, Stewart and Weitzel.

OFFICIAL  
**ZONING ORDINANCE**

CREATING  
ZONES AND PRESCRIBING THE  
CLASSES OF BUILDINGS

1923

IN THE  
THE CITY OF SAN DIEGO  
CALIFORNIA

# ORDINANCE No. 8924

## SECTION 1.

AN ORDINANCE PROVIDING FOR THE CREATION IN THE CITY OF SAN DIEGO, CALIFORNIA, OF FIVE ZONES, CONSISTING OF VARIOUS DISTRICTS, AND PRESCRIBING THE CLASSES OF BUILDINGS, STRUCTURES AND IMPROVEMENTS IN SAID SEVERAL ZONES, AND THE USE THEREOF; DEFINING THE TERMS USED HEREIN, AND PRESCRIBING THE PENALTY FOR THE VIOLATION HEREOF.

Be It Ordained by the Common Council of the City of San Diego, as follows:

### DEFINITIONS

For the purpose of this ordinance certain terms used herein are defined as follows:

All words used in the present tense shall include the future; all words in the plural number shall include the singular; all words in the singular number shall include the plural number; the word "lot" includes the word "plot."

**ALLEY:** The word alley, when used in this ordinance means a public way, intersecting a block or portion of a block, and designated on the Zone map hereinafter referred to.

**ACCESSORY:** The word "accessory" means a subordinate building or portion of a main building, the use of which is incidental to that of the main building, and located on the same lot or parcel of land.

**APARTMENT:** The word "apartment" means a room or suite of two or more rooms in a tenement or apartment house, occupied or suitable for occupation as a residence for one family doing its own cooking on the premises.

**BUILDING:** The word "building" means a structure for the support, shelter, or enclosure of persons, animals or chattels; and when separated by division walls of masonry from the ground up and without openings, then each portion of such building shall be deemed a separate building.

**BUSINESS OR COMMERCE:** The word "business," and the word "commerce," mean the purchase, sale or other transaction involving the handling or disposition of any article, substance or commodity for profit or livelihood, or the ownership or management of office buildings, offices, recreation or amusement enterprises.

**DISTRICT:** The word "district" means an entire city block, or any part thereof, or two or more contiguous blocks.

**INDUSTRIAL BUILDING:** The term "industrial building" means a building devoted to the storage, repair, manufacture, preparation or treatment of any ar-

ticle, substance or commodity whatsoever, and includes buildings used as stables and garages.

**INDUSTRY:** The word "industry" when used in this ordinance means the storage, repair, manufacture, preparation or treatment of any article, substance or commodity whatsoever, including the operation of garages and stables.

**LOT:** The word "lot" means a parcel of land abutting on at least one street or alley. Where alley exists the rear line of a lot having a frontage on two parallel or approximately parallel streets shall be considered as equi-distant from those streets, except where the full length or depth of such lot is less than 125 feet, in which case it shall be deemed one lot.

**LOT LINES:** The term "lot lines" means the established division lines between parcels of property, public or private.

**PUBLIC STREETS:** The term "public street" means the land dedicated to or condemned for use as a public highway or established as such by use for public street purposes.

**STORY:** The word "story" means that portion of a building included between the surface of any floor and the surface of the next floor above it, or if there be no floor above it, then the space between the floor and the ceiling next above it.

**STREET LINE:** The term "street line" means the boundary line between street and abutting property.

**USE:** The word "use" means the purpose for which a building is designed, arranged or intended, or for which it is or may be occupied or maintained.

## SECTION 2.

In order to designate, regulate and restrict the location and locations of commerce, business, trades and enterprises, and the location of all buildings designed, arranged or intended for special uses, five (5) classes of districts, which shall be known as "A" Zone, "B" Zone, "C" Zone, "D" Zone and "E" Zone, which said several zones and the districts of each thereof, are hereby established. The boundaries of said districts and each of them are to be determined and defined in the manner and in accordance with the provisions of this ordinance, as hereinafter set forth.

It is the intent and purpose of this Common Council that as soon as the Common Council, with the assistance of the City Planning Commission, is able to make a comprehensive survey and study of all the portions of the City of San Diego in detail, to have various portions of the City brought within and covered by the zones hereinabove outlined, and that as soon as the necessity for zoning particular districts appears urgent to the Common Council, said districts of the City will be defined and bounded and placed in one of the above mentioned zones, and that as rapidly as possible all of the City will be brought within the five zones hereinabove outlined.

## SECTION 3.

Except as hereinafter provided the use or uses of all buildings, improvements and premises existing in any of

the said zones or districts thereof, respectively, at the time of the adoption of this ordinance may be continued.

Except as hereinafter provided no building, structure or improvement now existing shall be altered or enlarged, and no building, structure or improvement shall be erected, constructed or established which is designed, arranged or intended for occupancy or use in any of said zones or districts restricted by this ordinance against such erection, construction or establishment.

#### SECTION 4.

**"A" ZONE.** No building, structure or improvement shall be erected, constructed, established, altered or enlarged in A Zone which is designed, arranged or intended or used for any purpose other than a single family dwelling, together with the usual accessories, located on the same lot or parcel of land, including a private garage containing space for not more than four (4) automobiles; provided that only one such single family dwelling house shall be erected, constructed, established, altered or enlarged upon any one lot or parcel of land, which said lot or parcel of land shall be not less than forty (40) feet in width, other provisions of this ordinance to the contrary notwithstanding; and provided that the above provisions pertaining to the minimum width of lots in said A Zone shall not apply to any lot officially recorded in a map or plat in the office of the County Recorder of San Diego county prior to the date of the adoption of this ordinance; provided, further, however, that no such single family dwelling shall be erected, constructed, established, altered or enlarged upon any portion or portions of such recorded lot or lots as shown upon any official map or plat recorded in the office of the County Recorder of San Diego County unless such portion or portions of such lot or lots shall be not less than forty (40) feet in width.

#### SECTION 5.

**"B" ZONE.** No building, structure or improvement shall be erected, constructed, established, altered or enlarged in B Zone which is designed, arranged or intended to be occupied or used for any purpose other than dwellings, tenements, hotels, lodging or boarding houses, churches, private clubs, public or semi-public institutions of an educational, philanthropic or eleemosynary nature, railroad passenger stations, and the usual accessories located on the same lot or parcel of land with any of said buildings, including the office of a physician, dentist or other person authorized by law to practice medicine and including private garages containing necessary and convenient space for automobiles.

#### SECTION 6.

**"C" ZONE.** No building, structure or improvement shall be erected, constructed, established, altered or enlarged in C Zone which is designed, arranged or intended to be occupied or used for any purpose other than a store or establishment for the conduct of a wholesale or retail business; place of amusement; office or offices; studios; conservatories; dancing academies; carpenter shop, cleaning and dyeing works; painting, paper

hanging and decorating store; dressmaking, laundry, millinery store; photograph gallery; plumbing shop; furniture, storage, roofing or plastering establishment; tailor; tinsmith; undertaker; upholsterer; dog hospitals; cat hospitals; commercial garages; and other similar enterprises or institutions; or for any purpose permitted by this ordinance in the A Zone or B Zone.

#### SECTION 7.

**"D" ZONE.** No building, structure or improvement shall be erected, constructed, established, altered or enlarged in the D Zone which is designed, arranged or intended to be occupied or used for any of the following specified trades, industries or purposes: Ammonia, chlorine or bleaching powder manufacture; asphalt manufacture or refinement; brick and tile, terra cotta manufacture or storage; boiler works; creosote treatment or manufacture; crematory; distillation of coal, wood or bones; fat rendering; fertilizer manufacture; gas (illuminating or heat) manufacture; glue manufacture; gun and powder, fireworks or explosive manufacture and storage; incineration or reduction or garbage; offal, dead animals or refuse; iron foundry; lamp black manufacture; lime, cement and plaster of paris manufacture; paint manufacture; petroleum pumping, refining and storage; pickle, sauer kraut, sausage or vinegar manufacture; railroad yard or round house; raw hides and skins, curing and tanning; rolling mill, scrap iron, junk or rags storage or baling; slaughter of animals or fowls; smelting of iron; coal manufacture; stock yards; stone mill and quarry; sulphurous, sulphuric, nitric or hydrochloric acid manufacture; tallow grease and lard manufacture and refining; tar roofing or tar waterproofing manufacture; tobacco (chewing) manufacture; or similar obnoxious purposes.

Any building or structure designed to be used for any other trade or business, or for purposes of storage business, industry or commerce of any kind may be erected in said D Zone if not prohibited by law or ordinances now in force or which may hereafter be enacted.

#### SECTION 8.

**"E" ZONE.** Any building, structure or improvement may be erected, constructed, established, altered or enlarged in the E Zone without restriction as to its design, arrangement, intended use or purpose, provided such building, structure or improvement, or the use or purpose thereof, is not prohibited by law or ordinance now in force or which may hereafter be enacted.

#### SECTION 9.

Except as hereinafter specifically provided, it is not intended by this ordinance to modify or abrogate or repeal any ordinances, rules, regulations or permits previously adopted or issued pursuant to law, relating to the use, management or conduct of buildings, structures, improvements or premises; provided, however, that where this ordinance imposes a greater restriction upon the erection, establishment, alteration or enlargement of buildings than is imposed or required by such ordinance,

rules, regulations or permits, the provisions of this ordinance shall control.

#### SECTION 10.

Any building may be altered or enlarged to the extent of not more than fifty per cent. (50%) of its assessed value; provided, however, that if any such building is altered or enlarged to more than fifty per cent (50%) of its assessed value, such building shall conform to the restrictions herein set forth for the zone or district in which said building is located, except where a permit is issued as provided in Section 15 hereof.

#### SECTION 11.

The Building Inspector shall not issue any permit for the erection, construction, establishment, alteration or enlargement of any building, structure or improvement in any of the zones contrary to the provisions of this ordinance, and every application for a building permit shall state therein the purpose for which the proposed building, structure or improvement is intended.

#### SECTION 12.

No building, structure or improvement shall be occupied or used for any purpose other than the purpose permitted in the zone or district in which such building, structure or improvement is situated, except as provided in Sections 3 and 15 hereof.

#### SECTION 13.

Any property in The City of San Diego may be brought within any of the five zones hereinabove outlined, and made subject to the restrictions of said zones as in this ordinance set forth, in the following manner:

The Common Council shall either on its own motion or upon the filing with said Common Council of a petition signed by a majority of the property owners residing in the district to be affected, which said petition shall recite a description of the territory and designate the zone in which said territory is sought to be included, cause the City Engineer to prepare a plan or map showing the boundaries of the proposed district, together with a description thereof, within ten days from the date of such reference. Thereupon it shall be the duty of said Common Council to refer said plan or map to the City Planning Commission, which Commission is hereby authorized, directed and empowered to fix and determine a time for hearing on said petition, or upon said action of the Common Council. Notices of such hearing shall be given to the property owners within the proposed district by publication of notice thereof in the official newspaper of The City of San Diego, and by posting such notices along the streets and alleys of the proposed district at not more than three hundred (300) feet in distance apart on each street so posted, but not less than (10) in all. The notices shall be headed "Notice of Zone Hearing," in letters of not less than one inch in length, and shall in legible characters recite the boundaries of the proposed district, the zone into which said district is sought to be placed, a brief outline of the restrictions of said zone, and the date and place of hearing

on said petition, together with a statement that any property owner may appear and be heard on said petition or motion before said Planning Commission. Said notices shall bear the printed signatures of the President and Secretary of the City Planning Commission.

Upon the day and at the time set for said hearing any person interested may appear and be heard before said Planning Commission. The Planning Commission is hereby authorized to take testimony as to the necessity for said district being placed in one of the five zones hereinabove described, and may either recommend the granting of said petition or proposition of the Common Council, or deny the same. In case said Planning Commission recommends the placing of said district within one of the five zones hereinabove designated it shall be the duty of said Commission to file such recommendation in writing with the Common Council within thirty days from the date of said hearing. In the event that the Common Council decides to uphold such recommendation it may by ordinance incorporate said territory so recommended by said Planning Commission into one of the five zones hereinabove designated, and from and after the date of the taking effect of said ordinance the property described in said ordinance shall become a part of the zone therein designated and shall be subject to all the restrictions and limitations of this ordinance. Said ordinance shall be published in the official newspaper of The City of San Diego for a period of five consecutive days.

Any interested person may appeal from the decision of the Planning Commission by filing a written notice of appeal with the City Clerk. If the Common Council deems it necessary or expedient so to do, it may set the matter for hearing on such notice to interested parties as it may deem proper, and the decision of the Common Council upon said appeal shall be final and conclusive as to all matters and things involved in said appeal.

#### SECTION 14.

It shall be the duty of the City Engineer of The City of San Diego to prepare a zone map of said City specifically outlining thereon the various districts brought within the zones herein outlined. Each zone shall be shaded in a different color, and shall clearly show the boundaries of each zone. The map shall also contain a legend specifically describing the restrictions and limitations of each zone, in so far as they determine the location and locations of commerce, trades and enterprises, and the location of all buildings arranged or intended for special uses in The City of San Diego. It shall be the duty of the Planning Commission to notify the City Engineer of all changes in said zone map, and to furnish said Engineer with descriptions of all districts brought within any of the five zones.

#### SECTION 15.

The City Planning Commission may, upon the verified petition of any property owner filed with said Commission stating fully the grounds of the application and all facts relied upon by petitioner, recommended to the Common Council exceptions to any of said restrictions

established by this ordinance in any of said zones or districts, and the said Common Council may by resolution, by three-fourths vote, permit the erection, reconstruction, alteration or enlargement of any building, structure or improvement in any of said zones which is restricted against said building, structure or improvement, upon such terms and conditions as said Common Council may deem proper under the special circumstances so shown to exist wherever said Common Council shall be satisfied from a consideration and investigation of the facts stated in said petition that such exception or permit is necessary for the preservation and enjoyment of any substantial property right or rights of the petitioner, and not materially detrimental to the public welfare or injurious to the property or improvements in said zone or district thereof. Upon the filing of such petition the City Planning Commission shall render a report to said Common Council thereon within thirty days thereafter, and mail a post card notice of the fact of the rendition of such report to such petitioner, and if said report and recommendation be against the petitioner he may appeal to the City Council by written notice of appeal filed with the City Clerk. If the Common Council deems it necessary or expedient so to do it may set the matter for hearing upon such notice to interested parties as it may deem proper, and the decision of the Common Council upon said appeal shall be final and conclusive as to all matters and things involved in said petition.

#### SECTION 16.

Where uncertainty exists with respect to the boundaries of zones, as shown on said zone map, the following rules shall apply:

(a) The zone boundaries are either streets or alleys unless otherwise shown, and where the colors of said zone map are approximately bounded by street or alley line said street or alley shall be construed to be the boundary of such zone.

(b) Where the zone boundaries are not shown to be streets or alleys, and where the property has been or may hereafter be divided into blocks and lots, the zone boundaries shall be construed to be lot lines, and where the colors on said zone map are approximately bounded by lot lines, said lot lines shall be construed to be the boundaries of such zone.

(c) In unsubdivided property the zone boundary lines on said zone map shall be determined by the scale contained on such map, and where uncertainty exists the zone boundary lines shall be determined by the City Planning Commission upon written application from said zone map and record thereof kept on file in the office of the City Planning Commission.

#### SECTION 17.

**INTERPRETATION — PURPOSE:** In interpreting and applying the provisions of this ordinance, they shall be held to be the minimum requirements adopted for the promotion of the public health, safety, comfort, convenience and general welfare. It is not intended by this ordinance to repeal, abrogate, annul or in any way im-

pair or interfere with any existing provision of law or ordinance, or any rules, regulations or permits previously adopted or issued, or which shall be adopted or issued pursuant to the law relating to the use of buildings or premises, or relating to the erection, construction, establishment, alteration or enlargement of any buildings or improvements; nor is it intended by this ordinance to interfere with or abrogate or annul any easement, covenant or other agreement between parties; provided, however, that where this ordinance imposes a greater restriction upon the erection, construction, establishment, alteration or enlargement of buildings, structures or improvements in said several zones, or any of them, than is imposed or required by such existing provisions of law or ordinance, or by such rules, regulations or permits, or agreements, the provisions of this ordinance shall control.

#### SECTION 18.

Any person, firm or corporation, violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than five hundred dollars (\$500.00), or by imprisonment in the City jail for a period of not more than six (6) months, or by both such fine and imprisonment.

Each such person, firm or corporation shall be deemed guilty of a separate offense for every day during any portion of which any violation of any provision of this ordinance is committed, continued or permitted, by such person, firm, or corporation, and shall be punishable therefor as provided by this ordinance.

#### SECTION 19.

If any section, sub-section, sentence, clause or phrase of this ordinance is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not effect the validity of the remaining portions of the ordinance. The Common Council of The City of San Diego hereby declares that it would have passed this ordinance, and each section, sub-section, sentence, clause and phrase thereof irrespective of the fact that any one or more other sections, sub-sections, sentences, clauses or phrases be declared invalid or unconstitutional.

#### SECTION 20.

The City Clerk shall cause this ordinance to be published once in the official newspaper of The City of San Diego, and shall post true copies thereof for at least ten days in three public places in The City of San Diego, to wit: one copy in the office of the City Planning Commission; one copy at the G Street entrance to the City Hall; and one copy at the Broadway entrance to the Court House.

#### SECTION 21.

This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 22nd day of January, 1923, by the following vote, to-wit:

#### ORDINANCE NO. 8858.

AN ORDINANCE GRANTING TO THE VITRIFIED PRODUCTS COMPANY, A CORPORATION, PERMISSION TO CONSTRUCT, OPERATE AND MAINTAIN A SPUR TRACK ACROSS TAYLOR, CONGRESS AND JEFFERSON STREETS IN THE CITY OF SAN DIEGO, CALIFORNIA.

WHEREAS, the Vitrified Products Company, a corporation, has petitioned the Common Council of The City of San Diego, California, to grant it permission to construct, operate and maintain a spur track along, upon and across Taylor, Congress and Jefferson Streets, in said City; and it appearing that the public interest and convenience of said City require such permit to be granted, NOW, THEREFORE,

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. Permission is hereby granted to Vitrified Products Company, a corporation, to lay down, construct, operate and maintain, a spur track upon, over and across Taylor, Congress and Jefferson Streets, in said City, at the location particularly shown upon the blue print map attached to Document No. 146266 of the documents of The City of San Diego, which said blue print map is by reference thereto made a part hereof.

This permission is granted and accepted upon the following express conditions:

First, - That said spur track shall be kept and maintained at the official grade of such streets over which the same shall pass, as such official grade is now or may hereafter be established or changed, and the City hereby reserves the right to grade, curb, sewer, macadamize, pave, gutter, culvert, or otherwise improve or repair or reimprove any part of said street over which said spur may be laid, and to lay down or relay pipes for water, gas, electrical conduits, sewers or other purposes.

Second, - That said Company shall pave or repave, and keep in repair said street, between the rails of each track, and also between the tracks, and for at least two feet on each side thereof, and that said company shall allow any other person doing business along the line of said spur to use the same upon such compensation as the Common Council shall determine to be reasonable for such privilege, and further that cars shall not be permitted to stand on the tracks in the intersections of said Union Street with other streets in said City.

Third, - That all cars shall be operated upon such spur track in such manner as to cause the least possible obstruction to ordinary public travel along or across the same, and no cars shall be allowed to remain on said spur tracks for a longer period of time than is necessary to expeditiously load or unload the same.

Fourth, - The rights and privileges granted by this ordinance are made upon the further condition that said spur shall be at all times subject to regulation of the Common Council, and the City may at all times insist and have the right, at the election of said Common Council, to take over the said spur from the said company, its successors and assigns, on the payment of the appraised value thereof, one of the appraisers to be named by the said Common Council, one by the said company, and in case they cannot agree, those two to name a third; provided, that nothing herein contained shall be so construed as to prevent the Common Council from altering, amending or repealing this grant, or amending or repealing this ordinance in any and all respects.

Fifth, - That said The City of San Diego shall have the right to use said spur track at any time, without costs to said The City of San Diego.

Sixth, - That the permission granted by this ordinance shall be revocable at the will of the Common Council of The City of San Diego.

Section 2. It is expressly provided that nothing herein contained shall be construed to extend the permit or time of any franchise heretofore granted either to petitioner, or to any other steam railway company.

Section 3. The Above permission is granted upon the further express condition that the Vitrified Products Company shall pay to The City of San Diego the sum of twenty-five dollars (\$25.00) per year, payable in advance, as rental for each year that said spur track is in place. This rental shall be subject to change at the pleasure of the said Common Council.

Section 4. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this

20th day of November 1922, by the following vote, to-wit:  
 Ayes--Councilmen Heilbron, Held, Stewart and Weitzel.

City Clerk of the City of San Diego, California.

BY Y. A. JACQUES, DEPUTY.

O R D I N A N C E N O. 8 8 7 9.

AN ORDINANCE ESTABLISHING A CITY POUND, AND PLACING SAID POUND IN CHARGE OF THE MANAGER OF OPERATION OF THE CITY OF SAN DIEGO, CREATING THE POSITION OF POUND KEEPER, PROVIDING FOR SAID POUNDKEEPER'S APPOINTMENT, FIXING THE COMPENSATION THEREOF: PROVIDING FOR THE PREVENTING OF CERTAIN ANIMALS RUNNING AT LARGE IN THE CITY OF SAN DIEGO, PROVIDING FOR THE LICENSING OF DOGS, PROVIDING FOR THE DISPOSAL OF UNLICENSED DOGS, AND REGULATING THE KEEPING OF DOGS IN THE CITY OF SAN DIEGO, CALIFORNIA, AND REPEALING ORDINANCES NUMBERED 5844, APPROVED OCTOBER 13, 1914, 5883, APPROVED NOVEMBER 4, 1914, 6206, APPROVED JUNE 7, 1915, AND 6785, APPROVED OCTOBER 18, 1916, 8448, APPROVED AUGUST 9, 1921.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. That there is hereby established in The City of San Diego a City Pound for impounding estrays, and the same shall be maintained in said City as a City Pound upon the following described land, to-wit:

Lot 4, block 540, Old Town, and being the premises heretofore and now used by said City for a city pound.

Section 2. The Manager of Operation of The City of San Diego shall have charge of the direction and supervision of said pound.

Section 3. There is hereby created in the Operating Department of The City of San Diego the position of Poundkeeper.

Before entering upon the discharge of his duties the Poundkeeper shall give good and sufficient bond in the sum of One thousand dollars (\$1000.00), conditioned for the faithful discharge of his duties, and said Poundkeeper shall receive for his services such compensation as is provided in the annual budget ordinance of The City of San Diego.

Section 4. That the Humane Society of The City of San Diego be, and said society is hereby authorized to appoint four (4) deputy poundkeepers, who shall serve as such deputy poundkeepers without compensation, and which appointments shall be subject to the approval of the Common Council of said The City of San Diego. That said society shall submit the names of such deputies to the Common Council, and if said Common Council approve and ratify such appointments the same shall be in full force and effect.

SECTION 5. That said Poundkeeper be, and he is hereby instructed and directed to wear during all the time in which he is on duty or acting as such Poundkeeper, upon the outside of his coat, in plain view, a metal star at least two inches in diameter with the inscription "Poundkeeper" thereon; that all of such deputies be, and they are hereby directed and required to wear during all the time in which they are on duty, or acting as such deputy poundkeepers, on the outside of their coats, in plain view, a metal star at least two inches in diameter, with the inscription "Deputy Poundkeeper" thereon.

Section 6. It shall be unlawful for the owner or person having the control and custody of any horse, colt, mule, donkey, burro, ox, bull, cow, calf, hog, pig, sheep or goat, to permit the same to run at large within the corporate limits of The City of San Diego, such limits being as defined and described in the Charter of The City of San Diego.

Section 7. It shall be unlawful for any person owning or having control of any of the above-mentioned animals to graze or pasture the same, or cause the same to be grazed or pastured, or permit the same to graze or pasture, upon any land within the limits of said City hereinbefore mentioned, except upon land owned or leased by the owner of such animal or animals, and unless such animals are securely fastened so that the same shall not run at large within the meaning of this ordinance; provided that no such animal shall be picketed or staked out in such a manner as to permit it to cross or trespass upon lands of adjoining owners, or upon any traveled street or sidewalk within the said corporate limits of said City.

Section 8. Whenever the Poundkeeper of The City of San Diego shall discover, or be notified by any person that any animal or animals above mentioned are grazing, pasturing or running at large, or picketed or staked out so as to permit it or them to cross or trespass upon the lands of adjoining owners or upon any traveled street or sidewalk, in violation of this ordinance, it shall be his duty, and he is hereby directed to immediately take it or them in charge and put it or them in the City Pound, as herein provided, and within twenty-four hours thereafter have three (3) notices posted in three conspicuous places, and one published in the official newspaper of the City for ten days, describing such animal or animals so impounded, giving the marks or brands or other distinguishing points, with the date of the posting of such notices, and unless the owner or owners thereof come and claim said animal or animals so impounded within ten days from and after the date of such notices,

and prove the ownership of said property, and pay all lawful charges thereon, as herein-after provided, said Poundkeeper is hereby authorized, and it is made his duty to expose said animal or animals for sale at public auction to the highest bidder for cash, and the proceeds of such sale, together with all fines, charges, fees and other expenses chargeable against said animal or animals, according to the schedule of charges hereinafter specified, shall be delivered to the Treasurer of The City of San Diego, together with a full description of the animal or animals sold as aforesaid, and the said Poundkeeper shall deliver to the purchaser of any animal or animals sold as aforesaid a bill of sale thereof, which shall vest the title of said property in the purchaser. Provided, however, that the Police of The City of San Diego shall be, and they are hereby required to look after and take charge of any and all horses and teams found running at large within the limits of the following described territory in said City, to-wit: That certain territory in said City bounded on the north by the north line of C Street, on the east by the west line of Eighth Street, on the south by the south line of L Street, and on the west by the west line of Fourth Street, and said Police shall turn the same over to the Poundkeeper if not claimed by the owner within two hours. Upon receiving said animal or animals from the Police as in this exception provided, the Poundkeeper shall proceed to keep and sell the same as hereinabove provided.

Section 9. That the following charges and fines are hereby imposed for any violation of any of the provisions of sections 6, 7 and 8 of this ordinance:

For any horse, colt, mule, donkey, burro, ox, bull, cow, calf, hog, pig, goat, or sheep taken into custody by the Poundkeeper, or any deputy of his, fifty cents (50¢);

For driving any such animal to and placing the same in the pound, one dollar (\$1.00), and in addition the sum of fifty cents (50¢) per day, not including the day in which such animal may be impounded, for keeping any such animal; and the further sum of one dollar (\$1.00) for each animal that may be advertised, and five per cent. (5%) commission on the amount of the sale, if any such animals are sold; all of which is hereby made a lawful charge against the owner or owners of any such animals impounded, and shall be a lien upon such animals for the payment thereof.

Section 10. That it be and it is hereby declared to be unlawful for any person owning or having the control of any dog to suffer, allow or permit the same to run at large upon any street, lane, alley, park, or other public place within the corporate limits of said The City of San Diego, or permit or allow any dog to be kept or to remain upon any premises under his immediate control within the corporate limits of said city unless an annual tax of one dollar (\$1.00) for a male dog and three dollars (\$3.00) for a female dog for each current year or fractional part thereof be so paid; and unless such dog has around its neck a collar having attached thereto a metallic tag or plat, issued by the Tax Collector of said City, having thereon the number of the license issued for said dog, and figures indicating the year for which said license has been paid. Such annual license tax so paid shall expire on the thirty-first day of December of each year.

Section 11. It shall be the duty of any and all persons owning or harboring any dog within the corporate limits of The City of San Diego, to keep the same in such a manner that the peace and quiet of the neighborhood and traveling public shall not be disturbed. That any person violating any provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding ten dollars (\$10.00), or by imprisonment in the City Jail for a period not exceeding five (5) days, or by both such fine and imprisonment.

Section 12. Every dog found within the corporate limits of The City of San Diego in violation of this ordinance shall be impounded, and if not claimed and taken away by the owner within five (5) days, and the costs and charges for keeping such dog, at the rate of twenty-five cents (25¢) per day and one dollar (\$1.00) additional for impounding the same shall not be paid by said owner or by any person claiming such dog, it shall be the duty of the Poundkeeper to kill or cause to be killed such dog, and the carcass thereof to be delivered at the city garbage dump within four (4) days after the expiration of the aforesaid five (5) days of redemption; provided, however, that said Poundkeeper may sell such dog for said costs and charges at private sale at any time within said four (4) days and after the expiration of five (5) days of redemption above provided for.

Section 13. It shall be unlawful for any person to harbor or keep within The City of San Diego, any dog afflicted with mange or any contagious or infectious disease. It shall be the duty of the Poundkeeper to immediately kill any dog in his possession known to be afflicted with mange or any contagious or infectious disease and dispose of the carcass thereof, as provided in Section 12 of this ordinance. Upon receipt by the Poundkeeper of any such dog, or of any dog, if the said Poundkeeper shall have reason to believe that the same is afflicted with rabies or hydrophobia, or has been bitten by any dog afflicted with or suspected of being afflicted with rabies or hydrophobia, or that has been exposed to the infection of rabies or hydrophobia, the said Poundkeeper shall separately confine and keep so confined such dog, and shall immediately notify the Health Officer or his deputy thereof. The Health Officer, or his deputy, shall thereupon make such examination of such dog as the said Health Officer or his deputy may deem necessary. If upon such examination, the Health Officer, or his deputy, shall determine that such dog is afflicted with rabies or hydrophobia, he shall so notify the Poundkeeper and the said Poundkeeper shall thereupon immediately kill such dog and shall cause the remains and carcass thereof to be cremated in the City Incinerator.

It shall be the duty of the Poundkeeper to keep every such dog suspected of having rabies or hydrophobia so confined for such time as the Health Officer or his deputy may direct, and such dog shall not be redeemed or released except upon an order, in writing, signed by the said Health Officer, or his deputy.

Section 14. It shall be the duty of the Poundkeeper and of each of the deputy poundkeepers and of every Police Officer and special officer of The City of San Diego to kill any dog found in or upon any public street, alley, or other public place, or in or upon any lot or premises, known to have rabies or hydrophobia, or known to have been bitten by any dog having rabies or hydrophobia.

Section 15. It shall be unlawful for any person to interfere with, oppose, or resist any Poundkeeper, or any Police Officer, or any special officer of said City, or the Health Officer, his assistants, deputies or inspectors, or any employee of the Health Department while engaged in the performance of the duties prescribed by the provisions of this ordinance.

Section 16. The Health Officer, his assistants, deputies, and inspectors, and the employees of the Health Department are hereby empowered to enter upon private property for the purpose of ascertaining whether any dog kept or harbored thereon is afflicted with rabies or hydrophobia.

Section 17. That it be and is hereby declared to be unlawful for any person, being the owner of or having in charge, care, custody, or control, any bull dog, bull terrier, or any vicious dog, male or female, to suffer, allow or permit such animal to be or go upon any sidewalk, street, alley, public place or square within The City of San Diego without being securely muzzled. Such muzzling shall be of such a kind and nature as to make it impossible for such dog to seize or bite any person, animal or thing.

Section 18. It shall be the duty of the Poundkeeper to impound any dog found within the said City in violation of any of the provisions of this ordinance provided, however, that any dog or dogs found within the said City limits accompanying persons residing outside of said City shall be tied and secured by such persons upon receiving notice from the Poundkeeper or from the Police Officer so to do; and upon failure of such parties after such notice to comply therewith then such dog or dogs shall be impounded and dealt with as hereinbefore prescribed.

Section 19. That all fees, licenses, taxes, charges and fines collected pursuant to this ordinance by said Poundkeeper, or his deputies, or said Humane Society, or by the City Tax Collector, or any one else in behalf of said City, shall be paid into the Treasury of said The City of San Diego at least once in every week, and placed to the credit of the City Pound Fund. All fines collected in the City Justice's Court for the violation of municipal ordinances or statutes of the State of California providing humane laws affecting animals, unless the disposition of such fines is in said ordinances or statutes otherwise provided, shall, after having been paid into said City Treasury in due course, be placed to the credit of the City Pound Fund. The proceeds of any and all sales of any animals as hereinabove provided for, after deducting all expenses and charges herein provided for, shall be placed in the Treasury of said City to be paid to the owner or owners of said animals so sold, upon proper proof of ownership of said animals, but if not called for by the owner within one year from the date of the sale of said animal or animals, the same shall be placed to the credit of the City Pound Fund.

Section 20. It shall be the duty of the Poundkeeper to make a report or statement under oath to the Manager of Operation of said City on the first day of every month, which report or statement shall be filed with the Clerk of said Common Council by the said Manager of Operation, and a copy thereof furnished to the City Auditor. Said report shall contain an itemized statement of the number and kind of animals taken into custody or impounded, and the number of dogs killed or impounded for the month next preceding the making of such statement, and the fees and charges collected, and from whom collected.

Section 21. The compensation of the Poundkeeper shall be paid monthly in good and lawful money of the United States, for services rendered during the preceding month, and shall be payable out of the City Pound Fund.

Section 22. Any person or persons who shall violate any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than one hundred dollars (\$100.00), or by imprisonment in the City Jail for a period not exceeding fifty (50) days, or by both such fine and imprisonment.

Section 23. That Ordinance No. 5844, approved October 13, 1914, Ordinance No. 5883, approved November 4, 1914, Ordinance No. 6206, approved June 7, 1915, Ordinance No. 6785, approved October 18, 1916, and Ordinance No. 8448, approved August 9, 1921, be, and the same are hereby repealed.

Section 24. That all ordinances and parts of ordinances in conflict with this ordinance or parts of this ordinance are hereby repealed.

Section 25. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

		Credit Estimated Revenues-----	910,285.00
		Amount for Tax Levy, Year 1923 -----	\$1,829,399.00

SECTION 24. Each department of the City of San Diego shall limit its expenditures to the amounts and for the purposes herein set forth under the respective departmental titles and designated by serial number.

SECTION 25. No transfer from one fund to another shall be made unless by special direction of the Common Council manifested by Ordinance. Every requisition issued in conformity with Ordinance No. 5051, in addition to all other matters, shall contain the maximum amount of the charge to be made against the item drawn upon, and no expenditure shall be made which exceeds the maximum figure contained in the requisition therefor, and any claim based upon an amount exceeding the maximum amount contained in said requisition shall be invalid as against the City of San Diego. Each requisition shall be presented to the City Auditor for his approval as to funds before any indebtedness thereon shall be incurred and before any claim based upon said requisition shall become a legal charge against any item contained in this ordinance. It shall be unlawful for any department to expend during any one month of the ensuing fiscal year more than one-twelfth of the amount allotted to said department for said fiscal year, except as may be by Ordinance of the Common Council otherwise provided, and except that all items contained in this Ordinance prefixed by a star (\*) shall be exempt from said one-twelfth allotment.

SECTION 26. There is hereby appropriated out of the General Fund of the City of San Diego to the departments named in the foregoing sections of this ordinance the various sums of money specified therein, for the purpose of conducting the business of said departments of the city government during the fiscal year beginning January 1st, 1923.

SECTION 27. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the urgency in this case are that by reason of the provisions of the charter requiring the Common Council and Auditor to estimate the probable expenditures of the various departments of the City for the ensuing fiscal year, and the additional fact that the tax rate for said fiscal year shall be based upon said estimated expenditures, it is necessary that an ordinance limiting the amounts to be expended by the various departments should be in effect as of January 1st, 1923.

AUDITOR'S CERTIFICATE. I Hereby Certify that the appropriation made, or indebtedness incurred, by reason of the provisions of the annexed ordinance, can be made or incurred without the violation of any of the provisions of the Charter of the City of San Diego, California.

#### ORDINANCE NO. 8919.

AN ORDINANCE AMENDING ORDINANCE NO. 6248 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, ENTITLED, "AN ORDINANCE REGULATING THE USE OF THE STREETS OF THE CITY OF SAN DIEGO, CALIFORNIA, BY SELF-PROPELLED MOTOR VEHICLES CARRYING PASSENGERS FOR HIRE, AND PROVIDING FOR THE LICENSING OF SUCH VEHICLES AND FOR A PENALTY FOR THE VIOLATION OF THIS ORDINANCE," APPROVED JULY 10th, 1915, BY ADDING THERETO A NEW SECTION TO BE KNOWN AS AND NUMBERED 4a; AND REPEALING ORDINANCE NO. 8494 OF THE ORDINANCES OF THE CITY OF SAN DIEGO, APPROVED SEPTEMBER 26th, 1921.

BE IT ORDAINED by the Common Council of the City of San Diego, as follows:

Section 1. That Ordinance No. 6248 of the Ordinances of The City of San Diego, entitled, "An Ordinance regulating the use of the streets of The City of San Diego, Cali-

fornia, by self-propelled motor vehicles carrying passengers for hire, and providing for the licensing of such vehicles and for a penalty for the violation of this Ordinance," approved July 10th, 1915, be and the same is hereby amended by adding thereto a new section to be known as Section 4a, and to read as follows:

Section 4a. That in lieu of the bond or policy of insurance provided for by Section 4 of this Ordinance, it shall be lawful and it shall be permitted, for any person driving or operating not more than thirty-five (35) such auto busses, to deposit with the City of San Diego, municipal bonds of the said The City of San Diego, in an amount not less than Five Thousand Dollars (\$5000.00), together with instructions to the said The City of San Diego, to use said bonds to satisfy any judgment of any court of this state after said judgment shall have become final; provided that said judgment shall be rendered against such person so driving or operating such auto bus or auto busses by reason of any accident to person or property, negligently or otherwise, caused by the operation of said auto bus or auto busses; and provided further, however, that for every person owning or operating more than thirty-five (35) auto busses there may be deposited with The City of San Diego in lieu of giving such bond or receiving such policy of insurance, in addition to municipal bonds in an amount not less than Five thousand Dollars (\$5000.00) as hereinbefore in this section provided, bonds in the amount of One Thousand Dollars (\$1000.00) for each additional seven cars or less, over the number of thirty-five, so operated. In the event that judgment shall be entered against any person depositing bonds as above required and permitted, such person shall, immediately thereafter and before again operating any auto bus in The City of San Diego, deposit with the said The City of San Diego, additional bonds equal to the amount of the judgment rendered, or shall give the bond or secure the insurance required by Section 4 of this Ordinance.

Section 2. That this Ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

The cost of said improvement is estimated at thirty thousand dollars (\$30,000.00).

(b) The acquisition, construction and completion of the permanent pavement (asphalt concrete pavement) of Imperial Avenue, in The City of San Diego, from the City limits on the south to the city limits on the north, through that district in said The City of San Diego commonly known as Encanto; all as more particularly set forth in those certain specifications and estimates on file in the office of the City Clerk of said City, marked Document No. 147496-1/2, and endorsed: "Specifications and estimates for paving Imperial Avenue, between 32nd Street and 40th Street, 40th Street, between Imperial Avenue and County Highway, and Imperial Avenue through Encanto." The cost of said improvement is estimated at forty thousand dollars (\$40,000.00).

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$70,000.00 for the acquisition, construction and completion of the permanent pavement of Imperial Avenue, between 32nd Street and 40th Street; of 40th Street, between Imperial Avenue and a point 250 feet south of the south line of Imperial Avenue, connecting with the County Highway; and of Imperial Avenue, from the city limits on the south to the city limits on the north, through that district in The City of San Diego commonly known as Encanto?"

PROPOSITION TWO.

Shall The City of San Diego incur a bonded indebtedness of thirty thousand dollars (\$30,000.00) for the improvement of the 1400 acre public park in The City of San Diego, known as Balboa Park, by the acquisition, construction and completion of the permanent pavement (asphalt concrete pavement), of that certain road or boulevard located in said Balboa Park, extending from the northerly end of 12th Street in The City of San Diego, through Balboa Park, and connecting with the existing pavement at the Exposition Grounds in said Balboa Park; all as more particularly set forth in those certain specifications and estimates on file in the office of the City Clerk of said City, marked Document No. 147496, and endorsed: "Specifications and estimates for paving the extension of 12th Street in Balboa Park?"

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$30,000.00 for the improvement of Balboa Park by the acquisition, construction and completion of the permanent pavement of that certain road or boulevard in said Park extending from the northerly end of 12th Street through Balboa Park, and connecting with the existing pavement at the Exposition Grounds?"

PROPOSITION THREE.

Shall The City of San Diego incur a bonded indebtedness of three hundred twenty-five thousand dollars (\$325,000.00) for the acquisition, construction and completion of improvements, extensions and additions to the water distributing system located in The City of San Diego, as follows:

(a) The purchase and installation of approximately 94,679 lineal feet of cast iron water main; the cost of which is estimated at two hundred forty thousand dollars (\$240,000.00);

(b) The purchase and construction of a steel stand pipe of an approximate capacity of 1,200,000 gallons, to be located adjacent to the University Heights Reservoir; the cost of which is estimated at eighty-five thousand dollars (\$85,000.00);

All as more particularly set forth in those certain specifications and estimates on file in the office of the City Clerk of said City, marked Document No. 147592, and endorsed: "Specifications and estimates for the construction of extensions and additions to the water distributing system of The City of San Diego?"

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$325,000.00 for the acquisition, construction and completion of improvements, extensions and additions to the

water distributing system located in The City of San Diego, by the purchase and installation of cast iron water mains in certain streets in said City, and the purchase and construction of a steel stand pipe of an approximate capacity of 1,200,000 gallons, to be located adjacent to the University Heights Reservoir?"

#### PROPOSITION FOUR.

Shall The City of San Diego incur a bonded indebtedness of \$495,500.00, for the acquisition, construction and completion of the following municipal improvement, namely: The improvement of Municipal Pier No. 2, in the Bay of San Diego, by the construction and completion of an apron wharf, transit shed, paving, drainage, trackage and equipment on said pier; all as more particularly set forth in certain drawings and specifications on file in the office of the City Clerk of said City, marked Document No. 147513, and endorsed: "Communication from Harbor Commission: Estimates and Plans for completion of apron wharf, transit shed, paving, drainage, trackage and equipment on Municipal Pier No. 2?"

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$495,500.00 for the improvement of Municipal Pier No. 2, in the Bay of San Diego, by the construction and completion of an apron wharf, transit shed, paving, drainage, trackage and equipment on said pier?"

Section 2. The objects and purposes for which said indebtedness of seventy thousand dollars (\$70,000.00) is proposed to be incurred are for the acquisition, construction and completion of the permanent pavement (asphalt concrete pavement) of Imperial Avenue, in The City of San Diego, between 32nd Street and 40th Street; of 40th Street, in said City, between Imperial Avenue and a point 250 feet south of the south line of Imperial Avenue, connecting with the County Highway; and of Imperial Avenue, in said City, from the city limits on the south to the city limits on the north, through that district in said City commonly known as Encanto.

#### ORDINANCE NO. 8924.

AN ORDINANCE PROVIDING FOR THE CREATION IN THE CITY OF SAN DIEGO, CALIFORNIA, OF FIVE ZONES, CONSISTING OF VARIOUS DISTRICTS, AND PRESCRIBING THE CLASSES OF BUILDINGS, STRUCTURES AND IMPROVEMENTS IN SAID SEVERAL ZONES, AND THE USE THEREOF: DEFINING THE TERMS USED HEREIN, AND PRESCRIBING THE PENALTY FOR THE VIOLATION HEREOF.

BE IT ORDAINED by the Common Council of the City of San Diego, as follows:

Section 1. DEFINITIONS: For the purpose of this ordinance certain terms used herein are defined as follows:  
All words used in the present tense shall include the future; all words in the plural

number shall include the singular; all words in the singular number shall include the plural number; the word "lot" includes the word "plot".

ALLEY: The word alley, when used in this ordinance means a public way, intersecting a block or portion of a block, and designated on the Zone map hereinafter referred to.

ACCESSORY: The word "accessory" means a subordinate building or portion of a main building, the use of which is incidental to that of the main building, and located on the same lot or parcel of land.

APARTMENT: The word "apartment" means a room or a suite of two or more rooms in a tenement or apartment house, occupied or suitable for occupation as a residence for one family doing its own cooking on the premises.

BUILDING: The word "building" means a structure for the support, shelter, or enclosure of persons, animals or chattels; and when separated by division walls of masonry from the ground up and without openings, then each portion of such building shall be deemed a separate building.

BUSINESS OR COMMERCE: The word "business," and the word "commerce," mean the purchase, sale or other transaction involving the handling or disposition of any article, substance or commodity for profit or livelihood, or the ownership or management of office buildings, offices, recreation or amusement enterprises.

DISTRICT: The word "district" means an entire city block, or any part thereof, or two or more contiguous blocks.

INDUSTRIAL BUILDING: The term "industrial building" means a building devoted to the storage, repair, manufacture, preparation or treatment of any article, substance or commodity whatsoever, and includes buildings used as stables and garages.

INDUSTRY: The word "industry" when used in this ordinance means the storage, repair, manufacture, preparation or treatment of any article, substance or commodity whatsoever, including the operation of garages and stables.

LOT: The word "lot" means a parcel of land abutting on at least one street or alley. Where alley exists the rear line of a lot having a frontage on two parallel or approximately parallel streets shall be considered as equi-distant from those streets, except where the full length or depth of such lot is less than 125 feet, in which case it shall be deemed one lot.

LOT LINES: The term "lot lines" means the established division lines between parcels of property, public or private.

PUBLIC STREETS: The term "public street" means the land dedicated to or condemned for use as a public highway or established as such by use for public street purposes.

STORY: The word "story" means that portion of a building included between the surface of any floor and the surface of the next floor above it, or if there be no floor above it, then the space between the floor and the ceiling next above it.

STREET LINE: The term "street line" means the boundary line between street and abutting property.

USE: The word "use" means the purpose for which a building is designed, arranged or intended, or for which it is or may be occupied or maintained.

Section 2. In order to designate, regulate and restrict the location and locations of commerce, business, trades and enterprises, and the location of all buildings designed, arranged or intended for special uses, five (5) classes of districts, which shall be known as "A" Zone, "B" Zone, "C" Zone, "D" Zone and "E" Zone, which said several zones and the districts of each thereof, are hereby established. The boundaries of said districts and of each of them are to be determined and defined in the manner and in accordance with the provisions of this ordinance, as hereinafter set forth.

It is the intent and purpose of this Common Council that as soon as the Common Council, with the assistance of the City Planning Commission, is able to make a comprehensive survey and study of all the portions of The City of San Diego in detail, to have various portions of the City brought within and covered by the zones hereinabove outlined, and that as soon as the necessity for zoning particular districts appears urgent to the Common Council, said districts of the City will be defined and bounded and placed in one of the above mentioned zones, and that as rapidly as possible all of the City will be brought within the five zones hereinabove outlined.

Section 3. Except as hereinafter provided the use or uses or all buildings, improvements and premises existing in any of the said zones or districts thereof, respectively, at the time of the adoption of this ordinance may be continued.

Except as hereinafter provided no building, structure or improvement now existing shall be altered or enlarged, and no building, structure or improvement shall be erected, constructed or established which is designed, arranged or intended for occupancy or use in any of said zones or district restricted by this ordinance against such erection, construction or establishment.

Section 4. "A" ZONE. No building, structure or improvement shall be erected, constructed, established, altered or enlarged in A Zone which is designed, arranged or intended to be occupied or used for any purpose other than a single family dwelling, together with the usual accessories located on the same lot or parcel of land, including a private garage containing space for not more than four (4) automobiles; provided that only one such single family dwelling house shall be erected, constructed, established, altered or enlarged upon any one lot or parcel of land, which said lot or parcel of land shall be not less than forty (40) feet in width, other provisions of this ordinance to the contrary notwithstanding; and provided that the above provisions pertaining to the minimum width of lots in said A Zone shall not apply to any lot officially recorded in a map or plat in the office of the County Recorder of San Diego prior to the date of the adoption of this ordinance; provided, further, however, that no such single family dwelling shall be erected, constructed, established, altered or enlarged upon any portion or portions of such recorded lot or lots as shown upon any official map or plat recorded in the office of the County Recorder of San Diego County unless such portion or portions of such lot or lots shall be not less than forty (40) feet in width.

Section 5. "B" ZONE. No building, structure or improvement shall be erected, constructed, established, altered or enlarged in B Zone which is designed, arranged or intended to be occupied or used for any purpose other than dwellings, tenements, hotels, lodging or boarding houses, churches, private clubs, public or semi-public institutions of an educational, philanthropic or eleemosynary nature, railroad passenger stations, and the usual accessories located on the same lot or parcel of land with any of said buildings, including the office of a physician, dentist or other person authorized by law to practice medicine, and including private garages containing necessary and convenient spaces for automobiles.

Section 6. "C" ZONE. No building, structure or improvement shall be erected, constructed, established, altered or enlarged in C Zone which is designed, arranged or intended to be occupied or used for any purpose other than a store or establishment for the conduct of a wholesale or retail business; place of amusement; office or offices; studios; conservatories; dancing academies; carpenter shop; cleaning and dyeing works; painting, paper hanging and decorating store; dressmaker, laundry, millinery store; photograph gallery; plumbing shop; furniture, storage, roofing or plastering establishment; tailor; tin-smith; undertaker; hospitals and sanitariums; upholsterer; dog hospitals; cat hospitals; commercial garages; and other similar enterprises or institutions; or for any purpose permitted by this

ordinance in the A Zone or B Zone.

Section 7. "D" ZONE. No building, structure or improvement shall be erected, constructed, established, altered or enlarged in the D Zone which is designed, arranged or intended to be occupied or used for any of the following specified trades, industries or purposes: Ammonia, chlorine or bleaching powder manufacture; asphalt manufacture or refinement; brick and tile, terra cotta manufacture or storage; boiler works; creosote treatment or manufacture; crematory; distillation of coal, wood or bones; fat rendering; fertilizer manufacture; gas (illuminating or heat) manufacture; glue manufacture; gun and powder, fire works or explosive manufacture and storage; incineration or reduction of garbage, offal, dead animals or refuse; iron foundry; lamp black manufacture; lime, cement and plaster of paris manufacture; paint manufacture; petroleum pumping, refining and storage; pickle, sauer kraut, sausage or vinegar manufacture; railroad yard or round house; raw hides and skins, curing and tanning; rolling mill, scrap iron, junk or rags storage or baling; slaughter of animals or fowls; smelting of iron; soap manufacture; stock yards; stone mill and quarry; sulphurous, sulphuric, nitric or hydro-chloric acid manufacture; tallow, grease and lard manufacture and refining; tar roofing or tar water-proofing manufacture; tobacco (chewing) manufacture; or similar obnoxious purposes.

Any building or structure designed to be used for any other trade or business, or for purposes of storage business, industry or commerce of any kind may be erected in said D Zone if not prohibited by law or ordinances now in force or which may hereafter be enacted.

Section 8. "E" ZONE. Any building, structure or improvement may be erected, constructed, established, altered or enlarged in the E Zone without restriction as to its design, arrangement, intended use or purpose, provided such building, structure or improvement, or the use or purpose thereof, is not prohibited by law or ordinance now in force or which may hereafter be enacted.

Section 9. Except as hereinafter specifically provided, it is not intended by this ordinance to modify or abrogate or repeal any ordinances, rules, regulations or permits previously adopted or issued pursuant to law, relating to the use, management or conduct of buildings, structures, improvements or premises; provided, however, that where this ordinance imposes a greater restriction upon the erection, establishment, alteration or enlargement of buildings than is imposed or required by such ordinance, rules, regulations or permits, the provisions of this ordinance shall control.

Section 10. Any building may be altered or enlarged to the extent of not more than fifty per cent. (50%) of its assessed value; provided, however, that if any such building is altered or enlarged to more than fifty per cent. (50%) of its assessed value, such building shall conform to the restrictions herein set forth for the zone or district in which said building is located, except where a permit is issued as provided in Section 15 hereof.

Section 11. The Building Inspector shall not issue any permit for the erection, construction, establishment, alteration or enlargement of any building, structure or improvement in any of the zones contrary to the provisions of this ordinance, and every application for a building permit shall state therein the purpose for which the proposed building, structure or improvement is intended.

Section 12. No building, structure or improvement shall be occupied or used for any purpose other than the purpose permitted in the zone or district in which such building, structure or improvement is situated, except as provided in Sections 3 and 15 hereof.

Section 13. Any property in The City of San Diego may be brought within any of the five zones hereinabove outlined, and made subject to the restrictions of said zones as in this ordinance set forth, in the following manner:

The Common Council shall either on its own motion or upon the filing with said Common Council of a petition signed by a majority of the property owners residing in the district to be affected, which said petition shall recite a description of the territory and designate the zone in which said territory is sought to be included, cause the City Engineer to prepare a plat or map showing the boundaries of the proposed district, together with a description thereof within ten days from the date of such reference. Thereupon it shall be the duty of said Common Council to refer said plat or map to the City Planning Commission, which Commission is hereby authorized, directed and empowered to fix and determine a time for hearing on said petition, or upon said action of the Common Council. Notices of such hearing shall be given to the property owners within the proposed district by publication of a notice thereof in the official newspaper of The City of San Diego, and by posting such notices along the streets and alleys of the proposed district at not more than three hundred (300) feet in distance apart on each street so posted, but not less than ten (10) in all. The notices shall be headed "Notice of Zone Hearing," in letters of not less than one inch in length, and shall in legible characters recite the boundaries of the proposed district, the zone into which said district is sought to be placed, a brief outline of the restrictions of said zone, and the date and place of hearing on said petition, together with a statement that any property owner may appear and be heard on said petition or motion before said Planning Commission. Said notices shall bear the printed signatures of the President and Secretary of the City Planning Commission.

Upon the day and at the time set for said hearing any person interested may appear and be heard before said Planning Commission. The Planning Commission is hereby authorized to take testimony as to the necessity for said district being placed in one of the five zones hereinabove described, and may either recommend the granting of said petition or proposition of the Common Council, or deny the same. In case said Planning Commission recommends the placing of said district within one of the five zones hereinabove designated it shall be the duty of said Commission to file such recommendation in writing with the Common Council within thirty days from the date of said hearing. In the event that the Common Council decides to uphold such recommendation it may by ordinance incorporate said territory so recommended by said Planning Commission into one of the five zones hereinabove designated, and from and after the date of the taking effect of said ordinance the property described in said ordinance shall become a part of the zone therein designated and shall be subject to all the restrictions and limitations of this ordinance. Said ordinance shall be published in the official newspaper of The City of San Diego for a period of five consecutive days.

Any interested person may appeal from the decision of the Planning Commission by filing a written notice of appeal with the City Clerk. If the Common Council deems it necessary or expedient so to do, it may set the matter for hearing on such notice to interested parties as it may deem proper, and the decision of the Common Council upon said appeal shall be final and conclusive as to all matters and things involved in said appeal.

Section 14. It shall be the duty of the City Engineer of The City of San Diego to prepare a zone map of said City specifically outlining thereon the various districts brought within the zones herein outlined. Each zone shall be shaded in a different color, and shall clearly show the boundaries of each zone. The map shall also contain a legend specifically describing the restrictions and limitations of each zone, in so far as they determine the location and locations of commerce, trades and enterprises, and the location of all buildings arranged or intended for special uses in The City of San Diego. It shall be the duty of the Planning Commission to notify the City Engineer of all changes in said zone map, and to furnish said Engineer with descriptions of all districts brought within any of the five zones.

Section 15. The City Planning Commission may, upon the verified petition of any property owner filed with said Commission stating fully the grounds of the application and all facts relied upon by petitioner, recommend to the Common Council exceptions to any of said restrictions established by this ordinance in any of said zones or districts, and the said Common Council may by resolution, by three-fourths vote, permit the erection, reconstruction, alteration or enlargement of any building, structure or improvement in any of said zones which is restricted against said building, structure or improvement, upon such terms and conditions as said Common Council may deem proper under the special circumstances so shown to exist, whenever said Common Council shall be satisfied from a consideration and investigation of the facts stated in said petition that such exception or permit is necessary for the preservation and enjoyment of any substantial property right or rights of the petitioner, and not materially detrimental to the public welfare or injurious to the property or improvements in said zone or district thereof. Upon the filing of such petition the City Planning Commission shall render a report to said Common Council thereon within thirty days thereafter, and mail a post card notice of the fact of the rendition of such report to such petitioner, and if said report and recommendation be against the petitioner he may appeal to the City Council by written notice of appeal filed with the City Clerk. If the Common Council deems it necessary or expedient so to do it may set the matter for hearing upon such notice to interested parties as it may deem proper, and the decision of the Common Council upon said appeal shall be final and conclusive as to all matters and things involved in said petition.

Section 16. Where uncertainty exists with respect to the boundaries of zones, as shown on said zone map, the following rules shall apply:

(a) The zone boundaries are either streets or alleys unless otherwise shown, and where the colors of said zone map are approximately bounded by street or alley line said street or alley shall be construed to be the boundary of such zone.

(b) Where the zone boundaries are not shown to be streets or alleys, and where the property has been or may hereafter be divided into blocks and lots, the zone boundaries shall be construed to be lot lines, and where the colors on said zone map are approximately bounded by lot lines, said lot lines shall be construed to be the boundaries of such zone.

(c) In unsubdivided property the zone boundary lines on said zone map shall be determined by the scale contained on such map, and where uncertainty exists the zone boundary lines shall be determined by the City Planning Commission upon written application from said zone map and record thereof kept on file in the office of the City Planning Commission.

Section 17. INTERPRETATION - PURPOSE: In interpreting and applying the provisions of this ordinance, they shall be held to be the minimum requirements adopted for the promotion of the public health, safety, comfort, convenience and general welfare. It is not intended by this ordinance to repeal, abrogate, annul, or in any way to impair or interfere with any existing provision of law or ordinance, or any rules, regulations or permits previously adopted or issued, or which shall be adopted or issued pursuant to the law relating to the use of buildings or premises, or relating to the erection, construction, establishment, alteration or enlargement of any buildings or improvements; nor is it intended by this ordinance to interfere with or abrogate or annul any easement, covenant or other agreement between parties; provided, however, that where this ordinance imposes a greater restriction upon the erection, construction, establishment, alteration or enlargement of buildings, structures or improvements in said several zones, or any of them, than is imposed or required by such existing provisions of law or ordinance, or by such rules, regulations or permits, or by such easements, covenants or agreements, the provisions of this ordinance shall control.

Section 18. Any person, firm or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than five hundred dollars (\$500.00), or by imprisonment in the City Jail for a period of not more than six (6) months, or by both such fine and imprisonment.

Each such person, firm or corporation shall be deemed guilty of a separate offense for every day during any portion of which any violation of any provision of this ordinance is committed, continued or permitted, by such person, firm or corporation, and shall be punishable therefor as provided by this ordinance.

Section 19. If any section, sub-section, sentence, clause or phrase of this ordinance is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of the ordinance. The Common Council of The City of San Diego hereby declares that it would have passed this ordinance, and each section, sub-section, sentence, clause and phrase thereof irrespective of the fact that any one or more other sections, sub-sections, sentences, clauses or phrases be declared invalid or unconstitutional.

Section 20. The City Clerk shall cause this ordinance to be published once in the official newspaper of The City of San Diego, and shall post true copies thereof for at least ten days in three public places in The City of San Diego, to-wit: one copy in the office of the City Planning Commission; one copy at the G Street entrance to the City Hall; and one copy at the Broadway entrance to the Court House.

Section 21. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

WHEREAS, it was by said resolution resolved, declared and determined that the public interest and necessity of said The City of San Diego and the inhabitants thereof demand the acquisition, construction and completion by said City of a certain municipal improvement described in said resolution and hereinafter in the body of this ordinance set out, and that said municipal improvement is necessary and convenient to carry out the objects, purposes and powers of the municipality; and

WHEREAS, it was by said resolution resolved, declared and determined that the estimated cost of said municipal improvement is two hundred fifty thousand dollars (\$250,000.00), and that said sum will be too great to be paid out of the ordinary annual income and revenue of the municipality; and

WHEREAS, the cost of said improvements and of each of the expenditures proposed will be too great to be paid out of the ordinary annual income and revenue of the municipality, NOW, THEREFORE,

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. There is hereby ordered, called and proclaimed a special election of the qualified voters of said The City of San Diego, at which said election there shall be and there is hereby submitted to said voters the following propositions, namely:

PROPOSITION I.

Shall The City of San Diego incur a bonded indebtedness of four hundred thousand dollars (\$400,000.00), for the acquisition, construction and completion of a second main water conduit from the Lower Otay Reservoir to the Bonita Wye, in the County of San Diego, State of California; all as more particularly set forth in those certain drawings and specifications on file in the office of the City Clerk of said City, marked Document No. 147804, and endorsed: "Communication from Hydraulic Engineer; Plans, specifications and estimate of cost, Otay Reservoir-San Diego, Second Main Conduit?"

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$400,000.00 for the acquisition, construction and completion of a second main water conduit from the Lower Otay Reservoir to the Bonita Wye, in the County of San Diego, State of California?"

PROPOSITION II.

Shall The City of San Diego incur a bonded indebtedness of two hundred fifty thousand dollars (\$250,000.00), for the acquisition, construction and completion of improvements, extensions and additions to the San Diego Public Library, namely:

(a) The construction and completion of additions to the main library building on E Street, in said City, and the purchase and installation of library equipment for said library building; the cost of which is estimated at two hundred thousand dollars (\$200,000.00);

(b) The purchase of a lot, and the construction and completion thereon of a concrete and tile building, to be located in Logan Heights, in The City of San Diego, together with furnishings and equipment for library purposes for said library building; the cost of which is estimated at twenty thousand dollars (\$20,000.00);

(c) The construction and completion of a cement and tile building in University Heights, in The City of San Diego, together with furnishings and equipment for library purposes for said library building; the cost of which is estimated at fifteen thousand dollars (\$15,000.00);

(d) The purchase of a lot, and the construction and completion thereon of a cement and tile building, to be located in Ocean Beach, in The City of San Diego, together with furnishings and equipment for library purposes for said library building; the cost of which is estimated at fifteen thousand dollars (\$15,000.00);

All as more particularly set forth in those certain drawings and specifications on file in the office of the City Clerk of said City, marked Document No. 147697, and endorsed: "Plans, specifications and estimate of cost of additions to main library and three branch library buildings."

This proposition shall be presented and printed upon the ballot hereinafter in this ordinance provided for as follows:

"Shall The City of San Diego incur a bonded indebtedness of \$250,000.00 for the acquisition, construction and completion of extensions and additions to the San Diego Public Library by the construction and completion of additions to the main library building on E Street; the purchase of lots in Logan Heights and Ocean Beach, and the construction and completion thereon of branch library buildings; the construction and completion of a branch library building in University Heights; and the purchase and installation in said main library additions and in said branch library buildings of furnishings and equipment for library purposes?"

Section 2. The objects and purposes for which said indebtedness of four hundred thousand dollars (\$400,000.00) is proposed to be incurred are for the acquisition, construction and completion of a second main water conduit from the Lower Otay Reservoir to the Bonita Wye, in the County of San Diego, State of California, in order to deliver the quantity of water required for consumption by the inhabitants of The City of San Diego from the Lower Otay Reservoir to The City of San Diego.

Section 3. The cost of said proposed public improvement, being the acquisition, construction and completion of a second main water conduit from the Lower Otay Reservoir to the Bonita Wye, is estimated at four hundred thousand dollars (\$400,000.00).

Section 4. The amount of the principal of the indebtedness to be incurred for the acquisition, construction and completion of a second main water conduit from the Lower Otay Reservoir to the Bonita Wye, is four hundred thousand dollars (\$400,000.00), all in gold coin of the United States, which indebtedness, if incurred, shall bear interest at

the rate of five per cent. per annum, payable semi-annually, in like gold coin.

Section 5. The objects and purposes for which said indebtedness of two hundred fifty thousand dollars (\$250,000.00) is proposed to be incurred are for the acquisition, construction and completion of improvements, extensions and additions to the San Diego Public Library, as follows:

(a) The construction and completion of additions to the main library building on E Street, in said City, and the purchase and installation of library equipment for said library building;

(b) The purchase of a lot, and the construction and completion thereon of a concrete and tile building, to be located in Logan Heights, in The City of San Diego, together with furnishings and equipment for library purposes for said library building;

(c) The construction and completion of a cement and tile building in University Heights, in The City of San Diego, together with furnishings and equipment for library purposes for said library building;

(d) The purchase of a lot, and the construction and completion thereon of a cement and tile building, to be located in Ocean Beach, in The City of San Diego, together with furnishings and equipment for library purposes for said library building.

Section 6. The cost of said proposed public improvement, being the acquisition, construction and completion of improvements, extensions and additions to the San Diego Public Library, is estimated as follows:

(a) The cost of the acquisition, construction and completion of additions to the main library building on E Street, in said City, and the purchase and installation of library equipment for said library building, is estimated at two hundred thousand dollars (\$200,000.00);

(b) The cost of purchasing a lot, and the acquisition, construction and completion of a concrete and tile building thereon, to be located in Logan Heights, in said City, together with furnishings and equipment for library purposes for said library building, is estimated at twenty thousand dollars (\$20,000.00);

(c) The cost of the acquisition, construction and completion of a cement and tile building in University Heights, in said City, together with furnishings and equipment for library purposes for said library building, is estimated at fifteen thousand dollars (\$15,000.00);

(d) The cost of purchasing a lot, and the acquisition, construction and completion thereon of a cement and tile building, to be located in Ocean Beach, in said City, together with furnishings and equipment for library purposes for said library building, is estimated at fifteen thousand dollars (\$15,000.00);

The whole cost of which acquisition, construction and completion of all of said improvements, extensions and additions to the San Diego Public Library, is estimated at two hundred fifty thousand dollars (\$250,000.00).

Section 7. The amount of the principal of the indebtedness to be incurred for the acquisition, construction and completion of said improvements, extensions and additions to the San Diego Public Library, is two hundred fifty thousand dollars (\$250,000.00), all in gold coin of the United States, which indebtedness, if incurred, shall bear interest at the rate of five per cent. (5%) per annum, payable semi-annually in like gold coin.

Section 8. The total amount of indebtedness proposed to be incurred is six hundred fifty thousand dollars (\$650,000.00), all in gold coin of the United States, with interest to be paid on so much of said indebtedness as may be incurred at the rate of five per centum (5%) per annum, payable semi-annually in like gold coin.

Section 9. Said special election shall be held in The City of San Diego, California, on Tuesday, the 3rd day of April, A.D. 1923, and said special election shall be conducted as in this ordinance and in the Charter of said City and in the laws of the State of California provided.

Section 10. The manner of holding said special election and the voting for or against incurring said indebtedness shall be as follows:

The ballot provided in said special election shall be so printed as to state the said propositions set out in Section One of this ordinance in manner and form following:

Electors voting at said election shall indicate their choice on the propositions by stamping a cross (X) in the voting square at the right of the word "Yes," or in the voting square at the right of the word "No." If an elector shall have stamped a cross (X) in the voting square after the said printed word "Yes," his vote shall be counted in favor of the proposition at the left of said word and square; and if an elector shall have stamped a cross (X) in the voting square after the printed word "No" his vote shall be counted against such proposition. In all particulars not recited in this ordinance such special election shall be held as provided by law for holding municipal elections in such municipalities as is The City of San Diego.

Section 11. For the purpose of said special election the election precincts, polling places and officers of election are hereby established, located, designated and declared to be and shall be the same as those set forth in Resolution No. 28801, of the resolutions of The City of San Diego, entitled, "A Resolution proclaiming a General Election in The City of San Diego, California," adopted by the Common Council of The City of San Diego on February 5, 1923, and which said resolution proclaimed and called a general election of the voters of said The City of San Diego for the election of candidates for filling certain municipal offices, with which said general election the special election called pursuant to the provisions of this ordinance and that certain Act of the Legislature of the State

of California, entitled, "An Act authorizing the incurring of indebtedness by cities, towns or municipal corporations for municipal improvements, and regulating the acquisition, construction or completion thereof," which became a law February 25, 1901, and amendments thereto, is consolidated.

Section 12. The City Clerk of said The City of San Diego is hereby directed to procure and have printed the requisite number of ballots and sample ballots and other printed matter, and to procure whatever supplies may be necessary for use in said special election.

Section 13. The City Clerk of said City is hereby directed to cause this ordinance to be published once a day for seven days immediately after it goes into effect and prior to the day of said election, such publication to be made in the official newspaper of said City, to-wit: The Evening Tribune.

Section 14. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

AUDITOR'S CERTIFICATE. I HEREBY CERTIFY that the appropriation made, or indebtedness incurred, by reason of the provisions of the annexed ordinance, can be made or incurred without the violation of any of the provisions of the Charter of the City of San Diego, California.

WHEREAS, in pursuance of Ordinance No. 8922 of the ordinances of The City of San Diego, entitled, "An Ordinance calling a special election in The City of San Diego, California, and submitting to the voters thereof propositions for the incurring of a bonded indebtedness," which said ordinance was passed by the Common Council, by a two-thirds vote thereof, on the 22nd day of January, 1923, and was duly approved by the Mayor of said City on said 22nd day of January, 1923; by which said ordinance there were submitted to the qualified voters of The City of San Diego propositions for the incurring of a bonded indebtedness by said City for the purposes set forth in said Resolutions numbered 28693, 28694, 28705 and 28706; and

WHEREAS, at the special election held in said City in pursuance of said Ordinance No. 8922, on the 20th day of March, 1923, two-thirds of all the voters voting at said election authorized the incurring of a bonded indebtedness by said City for

I.

(a) The acquisition, construction and completion of the permanent pavement (asphalt concrete pavement) of Imperial Avenue, in The City of San Diego, between 32nd Street and

40th Street, and of 40th Street, between Imperial Avenue and a point 250 feet south of the south line of Imperial Avenue, connecting with the County Highway. The cost of said improvement is estimated at thirty thousand dollars (\$30,000.00), as specified in said Resolution No. 28693.

(b) The acquisition, construction and completion of the permanent pavement (asphalt concrete pavement) of Imperial Avenue, in The City of San Diego, from the City limits on the south to the city limits on the north, through that district in said The City of San Diego, commonly known as Encanto. The cost of said improvement is estimated at forty thousand dollars (\$40,000.00), as specified in said Resolution No. 28693.

The whole cost of which acquisition, construction and completion of both of said municipal improvements is estimated at seventy thousand dollars (\$70,000.00), as specified in said Resolution No. 28693.

## II.

The improvement of the 1400 acre public park in The City of San Diego, known as Balboa Park, by the acquisition, construction and completion of the permanent pavement (asphalt concrete pavement), of that certain road or boulevard located in said Balboa Park, extending from the northerly end of 12th Street in The City of San Diego, through Balboa Park, and connecting with the existing pavement at the Exposition Grounds in said Balboa Park. The cost of said improvement is estimated at thirty thousand dollars (\$30,000.00), as specified in said Resolution No. 28694.

## III.

The acquisition, construction and completion of improvements, extensions and additions to the water distributing system located in The City of San Diego, as follows:

(a) The purchase and installation of approximately 94,679 lineal feet of cast iron water main; the cost of which is estimated at two hundred forty thousand dollars (\$240,000.00);

(b) The purchase and construction of a steel stand pipe of an approximate capacity of 1,200,000 gallons, to be located adjacent to the University Heights Reservoir; the cost of which is estimated at eighty-five thousand dollars (\$85,000.00);

The whole cost of which acquisition, construction and completion of both of said municipal improvements is estimated at three hundred twenty-five thousand dollars (\$325,000.00), as specified in said Resolution No. 28705.

## IV.

The improvement of Municipal Pier No. 2, in the Bay of San Diego, by the construction and completion of an apron wharf, transit shed, paving, drainage, trackage and equipment on said pier. The cost of said improvement is estimated at four hundred ninety-five thousand, five hundred dollars (\$495,500.00), as specified in said Resolution No. 28706.

NOW, THEREFORE, in order to carry into effect the determination of the voters of said City, as expressed at said special election:

BE IT ORDAINED by the Common Council of The City of San Diego as follows:

Section 1. That bonds of said City to the amount of seventy thousand dollars (\$70,000.00) shall be issued for the acquisition, construction and completion of the permanent pavement of Imperial Avenue, in The City of San Diego, California, between 32nd Street and 40th Street; of 40th Street, between Imperial Avenue and a point 250 feet south of the south line of Imperial Avenue, connecting with the County Highway; and of Imperial Avenue, from the city limits on the south to the city limits on the north, through that district in The City of San Diego commonly known as Encanto, as particularly described in Sections one and two of said Ordinance No. 8922, calling said special election.

There shall be seventy (70) of the said bonds issued, each of which shall be of the denomination of one thousand dollars (\$1000.00), and they shall be numbered from one (1) to seventy (70) consecutively. The order of payment shall begin with the smallest numbered bonds, and shall continue from the less to the greater, five (5) of said bonds becoming due and payable annually until all of said bonds shall have been paid.

MUNICIPAL IMPROVEMENT BOND, IMPERIAL AVENUE  
IMPROVEMENT FUND. SPECIAL ELECTION MARCH 20, 1923.

KNOW ALL MEN BY THESE PRESENTS, That The City of San Diego, a municipal corporation of the State of California, acknowledges itself indebted for value received, and hereby promises to pay to bearer ONE THOUSAND DOLLARS on the first day of July, 19\_\_, with interest thereon from the date hereof until said principal sum is paid, at the rate of five per cent. (5%) per annum, payable semi-annually on the first days of January and July of each year on the presentation and surrender of the respective coupons hereto annexed as they severally become due, both principal and interest of this bond being payable in lawful money of the United States of America, at the office of the Treasurer of said City, or at the National City Bank, New York, N.Y., at the option of the holder hereof.

This bond is issued for the purpose of acquiring funds with which to pay for the improvement of Imperial Avenue, between 32nd Street and 40th Street, 40th Street, between Imperial Avenue and a point 250 feet south of the south line of Imperial Avenue, and Imperial Avenue through Encanto, in The City of San Diego, with a permanent pavement, as particularly specified in Sections one and two of Ordinance No. 8922 of the ordinances of The City of San Diego, approved by the Mayor thereof on the 22nd day of January, 1923, and issued under and pursuant to, and in full compliance with the Act of the Legislature of the State of California, which became a law February 25, 1901, and amendments thereof, authorizing the incurring of indebtedness by cities for municipal improvements, and the Charter of said City, and the Constitution and other laws of said State, and in full compliance with certain ordinances and proceedings of the Common Council of said City.

It is further certified, recited and declared that all the acts, conditions and things required to exist, happen and be performed precedent to and in the issuance of this bond have existed, happened and been performed in due time, form and manner as required by law; that this issue of bonds has been authorized by the vote of two-thirds of the duly qualified electors of said City voting at a special election duly and regularly called and held in said City on the 20th day of March, 1923; and that the amount of this bond, together with all other indebtedness of said City does not exceed any limit prescribed by the Constitution of said State, or by any statute or law thereof; and that before the issuance of this bond provision has been duly made as required by the Constitution and laws in that behalf for the collection of an annual tax sufficient to pay the interest on such indebtedness as it falls due, and also to constitute a sinking fund for the payment of the principal thereof on or before maturity and within forty years from the date of this bond.

The full faith and credit of said The City of San Diego are hereby irrevocably pledged for the punctual payment of the principal and interest of this bond.

IN WITNESS WHEREOF, said The City of San Diego has caused this bond to be signed by the Mayor and Treasurer of said City, and countersigned by the Clerk thereof, and at-

tested by the corporate seal of said City hereto attached, and this bond to be dated the first day of July, A.D. 1923.

On the first day of \_\_\_\_\_, 19\_\_, The City of San Diego, California, on presentation of this coupon at the office of the Treasurer thereof, or at the National City Bank, New York, N.Y., will pay to bearer \_\_\_\_\_, in lawful money of the United States, for semi-annual interest on above bond.

\_\_\_\_\_  
Treasurer of The City of San Diego, California.

Section 5. Said bonds shall be made payable to bearer, in lawful money of the United States, and shall bear interest in like lawful money from the date of said bonds until paid, at the rate of five per centum (5%) per annum, and shall be paid on presentation and demand at the office of the City Treasurer of The City of San Diego, or at the National City Bank, New York, N. Y., at the option of the holder thereof.

The said bonds shall be dated on the first day of July, A.D. 1923, and shall become due in the order of their numbering, and to the amount hereinabove provided, on the first day of July, of each year, until all of said bonds shall have been paid. Interest on said bonds shall become due and payable semi-annually on the first day of January and the first day of July, of each year. Said bonds shall each contain the promise of The City of San Diego to pay the amount for which it is issued, with interest as foresaid, at the time and in the manner above specified, and shall refer to the election authorizing the issuance of such bonds and the purpose for which such indebtedness is incurred. The amount of the principal of each bond shall be printed upon the face thereof in large figures and with ink of a different color than that of which the body of the bond is printed, and it shall be certified in such bond that all the conditions and requirements of any ordinance of said City, the Charter thereof, and the General Law of the State of California, touching the incurring of such indebtedness by a municipal corporation, have been fully complied with.

There shall be attached to each bond one coupon for each semi-annual payment of interest accruing thereon, which coupons shall be so arranged to come due, one in each six months until and including the maturity of the principal specified in such bond. Each coupon shall have printed on it the number of the principal bond to which it is attached,

and the name of the fund in the aid of which the bond is issued, and such number and name shall be printed in larger type and different colored ink than the body of the coupon, and such coupons shall in addition be numbered from one (1) consecutively up to the last.

Section 6. The Mayor of said City, the City Treasurer and the City Clerk of said City are each hereby authorized and directed for and on behalf of, and as the act and deed of the City, to sign, in his official capacity, each and every of said bonds substantially in the form hereinbefore provided; and the Clerk is in addition directed to affix the corporate seal of said City to each of said bonds, and such signing and sealing shall constitute and is hereby declared to be a sufficient and binding execution of each and every of said bonds by the City. The City Treasurer is also authorized and directed to sign his name as Treasurer of said City to each and every of the coupons attached to each respective bond; provided, that it shall be a sufficient signature of all of such coupons if the signature of the Treasurer is printed upon such coupons, and the signing of the said coupons by the City Treasurer in the manner and form aforesaid shall constitute and be a sufficient and binding execution of each and every of said coupons by said City.

Section 7. For the purpose of paying the principal on said bonds as they shall come due, and the interest thereon as such interest shall accrue, the legislative branch of said City shall, at the time of fixing the general tax levy and in the manner provided by law, levy and collect each year, until such bonds are paid, or until there shall be a sum in the treasury of said City, set apart for that purpose, sufficient to meet all sums coming due for principal and interest on any of said bonds, a tax sufficient to pay the annual interest on such bonds and also such part of the principal thereof as shall become due before the time of fixing the next general tax levy. Said taxes shall be levied and paid in addition to any other tax levied for municipal purposes, and shall be collected at the same time and in the same manner as other municipal taxes are collected, and shall be used for no other purpose than the payment of said bonds and accruing interest.

Section 8. There is hereby established a sinking fund, to be kept by the Treasurer of The City of San Diego, for each of the funds provided in Sections 1, 2, 3 and 4 of this ordinance, and the proceeds of the taxes levied as aforesaid shall be paid into such sinking fund as soon as the same shall be collected, and shall remain in such sinking fund until required for the payment of the principal and interest to be made upon said bonds and coupons. When the respective payments of principal and interest of said bonds and coupons shall fall due, the Treasurer of said City is authorized and directed to pay out of the moneys in said fund the respective sums of principal and interest as they shall fall due on each several bond and coupon, as demand shall be made therefor and upon the surrender of such bond and coupon.

Section 9. Said bonds shall be sold, and in the following manner, to-wit:

The City Clerk shall, when so directed by the Common Council, cause notice to be published in the official paper of said City for ten (10) days previous to the date of sale hereinafter mentioned, to the effect that sealed bids for the purchase of the whole or any part of such bonds as may be determined by the Common Council, will be received at his office until eleven o'clock A.M. of the day of the meeting of the Common Council next following the completion of such notice, and that said bonds will be sold to the highest bidder or bidders therefor by the Common Council of The City of San Diego, and that the same shall not be sold for less than par. Each bid shall be accompanied by a check certified by a responsible bank equal to one per centum (1%) of the amount of the bid, payable to the City Treasurer of said City, as a guaranty and assurance that the bidder will take so much of said bonds as he shall bid for, and will pay the price bid therefor, should the bonds be awarded to him.

The Common Council shall at its first regular meeting after the time fixed for the placing of bids, consider such bids as may have been offered, and shall sell bonds to the highest bidder; provided the right shall be reserved to reject any and all bids.

The successful bidder or bidders shall be required to take so much of said bonds as he shall bid for, and shall be awarded to him by the Common Council, at the rate fixed and upon ten days' notice from the City Clerk that said bonds are executed and ready for delivery. In the event of the failure of any such purchaser to take the amount and number of bonds awarded to him upon his bid by the Common Council for ten days after giving the notice last aforesaid, his check accompanying his bid and the sum for which it is drawn, shall be forfeited to the City, and the money shall be paid into the City Treasury.

IN THE EVENT OF THE FAILURE OF THE Common Council to sell said bonds at the time for which bids have been requested as hereinabove provided, the same may be sold without any further advertisement to any bidder for the best price that can be obtained, but for not less than par, which shall be construed to mean the face of the bond plus accrued interest to the date of delivery.

Section 10. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

#### ORDINANCE NO. 9001.

AN ORDINANCE GRANTING THE RIGHT TO THE SAN DIEGO ELECTRIC RAILWAY COMPANY, A CORPORATION, AND ITS SUCCESSORS, TO USE CERTAIN STREETS, ALLEYS, TIDE AND SUBMERGED LANDS IN THE CITY OF SAN DIEGO, CALIFORNIA.

BE IT ORDAINED by the Common Council of The City of San Diego, as follows:

Section 1. The right to construct, operate and maintain a standard gauge commercial railroad in The City of San Diego for the period ending September 1st, 1952, is hereby granted to The San Diego Electric Railway Company, a corporation, and its successors, upon, over and along certain streets, alleys, tide and submerged lands over and along the following general route, namely:

Commencing in the intersection of Broadway with Kettner Boulevard; thence running northerly upon Kettner Boulevard to Chambers Street, upon Chambers Street; thence northwesterly upon and across block 168, Middletown, across California Street, upon Hancock Street, to a point between Mason Street and Smith Street; thence northwesterly across private right of way, across Smith Street; thence northwesterly across private right of way, across Wallace Street; thence northwesterly across private right of way, across Taylor Street; thence northwesterly across private right of way, to the intersection of Kurtz Street and Rosecrans Street; across the intersection of Kurtz Street and Rosecrans Street; thence northwesterly across private right of way to Midway Drive; thence across Midway Drive, produced northerly; thence northwesterly across private right of way to the intersection of West Point Loma Boulevard and Bacon Street; thence northerly on West Point Loma Boulevard to the south end of Mission Bay Bridge, to a connection with the present tracks of the Bay Shore Railroad Company; also from the intersection of Bacon Street and West Point Loma Boulevard southerly along Bacon Street to a point between West Point Loma Boulevard and Lotus Street, to a connection with the present tracks of the Bay Shore Railroad Company, all as more particularly set forth in that certain map or plat on file in the office of the City Clerk, marked Document No. 149519.

Section 2. The said San Diego Electric Railway Company, and its successors, shall have the right to construct a double-track, standard gauge, road, and also switches, sidetracks, turnouts, cross-overs, crossings, spurs and depots, and such other appurtenances and adjuncts as may be necessary for the convenient use of the same on, over and along said route, and to operate the same with electricity, or in case of emergency such other lawful motive power as may be authorized by the Common Council of said City.

Section 3. This grant is made upon the condition that the said grantee, or its successors, shall at all times keep that portion of the streets occupied by its tracks in good condition, constantly in repair, flush with the street, and with good crossings, and in the event that the streets on which such franchise is granted shall be paved either by the city or under proceedings authorized by the General Laws of the State, said grantee shall be required to pay for only that portion of any construction in excess of that covered by the specifications for the improvement of the rest of the street, and which shall be necessary to provide a safe and suitable foundation for the operation of said railroad over a paved street. Nothing herein contained, however, shall relieve the grantee of its obligation to keep those portions of the streets occupied by the grantee constantly in repair, flush with the streets, and with good crossings, and to keep that portion of the pavement now existing or which may hereafter be placed between the rails and for two feet on each side thereof, and between the tracks, if there be more than one, in good condition.

The language of this section is intended to apply to all tracks of said grantee, including switches, sidetracks, turnouts, cross-overs, crossings and spurs.

This grant is made upon the further condition that the laying of the said tracks, switches, sidetracks, turnouts, cross-overs, crossings and spurs shall in all cases conform to the grade of said streets which have been graded, and in all other cases be as near to the natural grade as practicable, and when at any time any part of any of said streets shall be graded, or the grade thereof altered or changed by the Common Council of said City, the bed of the road and the tracks thereon shall be made to conform therewith by the grantee, or its successors.

Section 4. That the City Engineer of said City shall give the established grades of the said streets along the line of construction of said tracks, switches, sidetracks, turnouts, cross-overs, crossings and spurs, and set stakes indicating the said grade. He shall see that the said railroad is constructed in conformity with the terms and requirements of this ordinance, and for his services as herein required he shall receive such fees as are provided therefor, and the same shall be paid by the said grantee, or its successors.

Section 5. That said The City of San Diego reserves the right to grade, sewer, pave, macadamize, improve, alter or repair all, or either, of said streets, or any part thereof, and to lay down, or to relay, pipes for water, gas, sewer, or other purposes; such work to be done by said City so as to obstruct or injure said railway as little as possible; and that the grantee and its successors shall shift and reshift its railroad and rails so as to avoid any obstructions made thereby.

Section 6. This grant of a franchise is further conditioned that the grantee and its successors will during the life of this franchise pay to The City of San Diego two per cent. of the gross annual receipts arising from its use, operation or possession within The City of San Diego. The payment of said percentage of gross receipts shall begin at once, and shall continue throughout the life of this franchise, and in the event said

payment is not made said franchise shall be forfeited.

Section 7. The right of the Common Council by ordinance to regulate the rate of speed, and to protect the public from danger or inconvenience in the operation of such railroad is hereby expressly reserved. All trains operated by the grantee of said franchise shall be operated with a view toward providing adequate transportation to the people of The City of San Diego between the termini of the route herein set forth and described, and in the territory served by said railroad.

The Common Council may by resolution, if in its judgment the public convenience demands such regulation, provide that the grantee of this franchise shall so operate its railroad as to stop its trains for the purpose of taking on or letting off passengers at such places as may be designated by said Common Council in said resolution.

The grantee of this franchise shall operate one through train each way between Kettner Boulevard and Broadway and Ocean Beach at least once every forty minutes from six o'clock A.M. to twelve o'clock P.M. each day, and shall operate one through train each way between Kettner Boulevard and Broadway and Mission Beach at least once every forty minutes from six o'clock A.M. to twelve o'clock P.M. each day.

Section 8. Work to construct railroads along or upon any public street or highway, a franchise for which shall have been granted in accordance with the terms of this Ordinance shall be commenced in good faith within not more than four months from the granting of this franchise, and if not so commenced within said time said franchise so granted shall be declared forfeited, and shall be completed within not more than three years thereafter, and if not so completed within said time, said franchise so granted shall be forfeited; provided, however, that for good cause shown, the Common Council may by resolution extend the time for the completion thereof not exceeding three months.

Section 9. The grant of this franchise, right and privilege is subject to the right of the majority of the electors of said City, voting at any time at any election thereafter to repeal, change or modify the said grant, and the right of the electors of The City of San Diego voting at any election at any time to repeal, change or modify this grant is hereby reserved to said electors.

Section 10. In the event that the grantee of said franchise shall refuse to comply with the terms and provisions of this franchise, the Common Council may declare this franchise forfeited, and all rights and privileges herein granted shall thereupon cease and determine.

Section 11. Within ten days after the acceptance of this franchise, the grantee thereof shall file with the Common Council a bond running to said City, with at least two good and sufficient sureties, to be approved by said Common Council, in the penal sum of ten thousand dollars (\$10,000.00), conditioned that the grantee of this franchise shall well and truly observe, fulfill and perform each and every term and condition of this franchise, and that in case of any breach of condition of such bond, the whole amount of the penal sum therein named shall be taken and deemed liquidated damages, and shall be recoverable from the principal and sureties on said bond.

Section 12. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 25th day of April 1923, by the following vote, to-wit:

#### ORDINANCE NO. 9007.

An Ordinance amending Section One of Ordinance No. 5754 (adopted August 21, 1914) of the Ordinances of the City of San Diego, California, being an ordinance granting to Bay Shore Railroad Company, a corporation, and to its successors and assigns, a right, permit, franchise and authority to construct, maintain and operate a general commercial railroad for the carriage of passengers and freight, goods, wares and merchandise, express and mail matter, along and upon certain streets and places in the City of San Diego, State of California.

BE IT ORDAINED, by the Common Council of the City of San Diego, as follows:

Section 1. That Section One of Ordinance No. 5754 of the Ordinances of The City of San Diego, California, be and the same is hereby amended so as to read as follows:

"Section One: That the said City of San Diego hereby grants to Bay Shore Railroad Company, a Corporation, and to its successors or assigns, the right, permit, franchise and authority to construct, maintain and operate a general commercial railroad for the carriage of passengers and freight, goods, wares and merchandise, express and mail matter, including side-tracks, turn-outs, switches, spur tracks, and any and all other things necessary and incident to railway construction, maintenance and operation, and to erect and maintain either a single or double pole line for the support of overhead trolley, support arms, or span wires, and to suspend electric wires therefrom to be used in the operation of said railroad, through, over, across, upon and along any and all public avenues, plazas, streets, alleys, navigable waters, highways, and pueblo, tide, submerged and overflowed or other lands in the said City of San Diego, a route described as follows, to-wit:

Commencing at the center of the intersection of Voltaire Street and Bacon Street in the City of San Diego, County of San Diego, State of California, as shown and delineated on the map of Ocean Bay Beach, said map being filed in the office of the County Recorder of said San Diego County, June 22nd, 1909, said map being numbered 1189; thence northeasterly along said Bacon Street to the center of the intersection of said Bacon Street with West Point Loma Boulevard, 200 feet more or less; thence continuing on West Point Loma Boulevard on a curve northerly and crossing Block One Hundred Three (103) of said Ocean Bay Beach, and Block Sixty (60) of said Ocean Bay Beach to the mean high tide line on the southerly side of the channel of Mission Bay; thence in a northerly direction crossing said channel of Mission Bay to the mean high tide line on the northerly side thereof; thence continuing northerly along and upon Pueblo Lot No. 1803 to the southerly line of Block Three Hundred Eighty-nine (389), as shown on the map of Pacific Beach, which said map was filed in the County Recorder's office, September 28th, 1898, said map being numbered 854.

Said franchise, right, permit and authority to commence with the date of granting the same and to continue, exist to and end upon the 31st day of December, 1952.

1. The grantee of said franchise or its assigns, must, during the life of the same, pay to the City of San Diego two per cent. of the gross annual receipts of the person, partnership or corporation to whom said franchise is awarded, arising from its use, operation or possession. No per-centage shall be paid for the first five years succeeding the date of the franchise, but thereafter said percentage shall be payable annually, and in the event said payment is not made, said franchise shall be forfeited. Within sixty days after the expiration of each year for which said two per cent. is payable, the grantee of said franchise, successors or assigns, shall file with the Clerk of the City of San Diego a statement verified by the oath of said grantee, successors or assigns, showing the total gross receipts arising from the use, operation or possession of said franchise, and shall thereupon pay to said City Clerk, for the said City of San Diego, the aggregate sum of two (2) per centum of said gross annual receipts, as shown by said statement.

Any refusal of said grantee, successors or assigns, to file said verified statement, and to pay said percentage of said gross annual receipts, within the time above provided, shall constitute ground for forfeiture, of said franchise, right, permit and authority, and all rights granted thereby.

The Mayor and the Common Council may, after said statement is made, inspect and examine the books of the grantee of this franchise, right, permit and authority, and may cause the same to be examined by an expert accountant, and may examine, under oath, any and all of its officers or agents, for the purpose of ascertaining the gross annual receipts under this franchise.

2. Motive Power. That the cars and trains upon said railroad shall be propelled by steam or electricity, or both, or other modern motive power, said electricity to be carried or transmitted by storage batteries, or by wires, or by conductors erected, or constructed either over or underground, provided that other motive power may be used in case of accident or unavoidable delay in procuring equipment.

3. Condition of Streets. The owner of the franchise or privilege shall at all times keep that portion of the street occupied by his or its tracks in good condition, constantly in repair, flush with the street, and with good crossings, and in the event that the street on which said franchise or privilege is granted shall be paved either by the City or under proceedings authorized by the General Laws of the State, the said owner of said franchise or privilege shall be required to pay for only that portion of any construction in excess of that covered by the specifications for the improvement of the rest of the street and which shall be necessary to provide a safe and suitable foundation for the operation of car

lines over a paved street. It is the intent and purpose of this section to relieve the owner of a franchise or privilege to operate street cars on the streets of The City of San Diego of the cost of new surface pavement between the tracks of said owner and for two feet on either side thereof on streets to be hereafter paved, and to require the owner of said franchise or privilege to lay a suitable foundation for the operation of car lines over a paved street.

Nothing herein contained, however, shall relieve the said owner of said franchise or privilege of his or its obligation to keep those portions of the streets occupied by the said owner constantly in repair flush with the street and with good crossings, and to keep that portion of the pavement now existing or which may hereafter be placed between the rails, and for two feet on each side thereof, and between the tracks if there be more than one, in good condition.

4. Track Specifications. That the track shall be constructed at the standard gauge of four feet, eight and one-half inches within the rails, and shall have a space between it and said side tracks, turnouts and switches of not less than five feet three inches.

5. Single or Double Track. That the grantee or its assigns, shall have the right to lay and maintain either single or double tracks, as the condition of business may warrant, but the laying of a single track shall be deemed a compliance with the conditions of this franchise, right, permit and authority, and shall in no wise impair the right of said grantee, or assigns to subsequently lay a second track paralleling the first track.

6. Rail Specifications. That good and substantial steel rails shall be used in the construction of said track.

7. City's Right to Access to Streets. That the right to grade, sewer, pave, macadamize, or otherwise improve the said streets, or change the grade thereof, shall be reserved to the said City, such work to be done so as to obstruct the said railway as little as possible; the grantee or its assigns shall shift and reshift the rails so as to avoid the obstruction created thereby; the grantee and its assigns shall waive any and all claims for damages against said City caused by reason of such grading, paving or macadamizing, or otherwise improving, altering or repairing said streets.

8. Tracks on Graded Streets. That the laying of said track and all sidetracks, cross-overs, spur-tracks, turnouts, switches or curves shall conform in all cases with the grade of said streets where the same have been graded, and in all other cases to be as near to the natural grade as practicable, and when at any time any part of this route shall be graded, or the grade thereof altered or changed by said Common Council the bed of the road and the tracks thereon shall be made to conform therewith by said grantee or its assigns, so that the tops of the rails will be flush with the surface of the street. That the overhead system may be of single or double pole construction. That all spur tracks or other turnout tracks, may be so constructed and maintained as to curve off the main track and across the curbs and sidewalks and lead into car barns, repair shops, machine shops, depots, and other buildings, but a substantial gutter shall be maintained under such tracks to provide the necessary drainage thereof.

9. The City Engineer's Services. That the City Engineer shall, under the direction of the said Common Council, give the established grade of the streets along the line of construction of said railway and set stakes indicating the said grades. He shall see that the said railway is construction in conformity with the terms and requirements of the franchise, right, permit and authority, and for his services as herein required, he shall receive such fees as are provided therefor, and the same shall be paid by the grantee or assigns.

10. Location of Tracks on Streets. That all tracks which shall be laid hereunder shall be constructed and laid so that each of them shall be, when practicable, in the center of streets, or as nearly so as the condition or width of the streets will permit.

11. Location of Switches. That no switch shall be constructed or maintained within fifty feet of any cross street, and the location of such switches and all turnouts, shall be changed at the expense of the grantee or its assigns whenever so ordered by said Common Council.

12. Time Limit for Construction and Completion. Work to construct the railroad shall be commenced in good faith within not more than four months from the granting of the franchise, right, permit and authority, and if not commenced within said time, said franchise, right, permit and authority shall be declared forfeited; and the said railroad shall be completed within not more than three years thereafter, and if not so completed within said time, said franchise, right, permit and authority so granted shall be forfeited; provided, that for good cause shown, the Common Council may by resolution, extend the time for completion thereof, not exceeding three months. Provided that in case any person to whom said franchise, right, permit and authority shall be awarded, successors or assigns, shall have already constructed or acquired a railroad, or shall have acquired, or shall acquire the right to the use, or the right to operate over a railroad along and upon the streets and places herein described, or any part thereof, such railroad and construction shall, in said event, be deemed a compliance with this paragraph, and with all the conditions hereof as to construction hereunder to the extent that the same are in accordance with the conditions and limitations herein contained, and shall also be deemed a compliance with the conditions of this paragraph as to commencement of work.

13. Cessation of Operation. In case the grantee of the franchise, right, permit and authority, successors or assigns, shall cease to operate said railway for a period of ninety days consecutively after said railway shall have been fully constructed, and completed, except in case of unavoidable accident or other matters not within the control of the grantee, or successors or assigns, the franchise, right, permit and authority shall be and is hereby declared to be forfeited, and the said grantee, successors or assigns shall thereafter remove the tracks of said railway and put the streets in good condition.

14. Right to Repeal. The grant of said franchise, right, permit and authority shall be subject to the right of the majority of the electors of said City, voting at any election at any time, thereafter, to repeal, change or modify the said grant and the ordinance making such grant shall contain a reservation of such right to repeal, amend or modify said ordinance.

Section 2. That this ordinance shall take effect and be in force from and after thirty-one days after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 30th day of April, 1923, by the following vote, to-wit:  
AYES--COUNCILMEN Bruschi, Heilbron, Held, Stewart and Weitzel.

Upon the following conditions and limitations:-

1. The grantee of said franchise, successors and assigns, shall file with the clerk of the City of San Diego during the first fifteen days of February of each year after the taking effect of the ordinance granting the said franchise, and during the same period of each successive year thereafter until the first day of September, 1952, a statement verified by oath of said grantee, successors or assigns, showing the total gross receipts arising from the use, operation or possession of said franchise for the preceding calendar year (or fraction thereof for the first and last years as the case may be), and shall thereupon pay to the said city clerk, for the said City of San Diego, the aggregate sum of two per centum of said gross annual receipts as shown by said statement. This franchise is a renewal of rights already in existence and the payment of said percentage of gross receipts shall begin upon the taking effect of the ordinance granting this franchise.

Any refusal by said grantee, successors or assigns, to file said verified statement and to pay said percentage of said gross annual receipts within the time above provided shall constitute ground for forfeiture of said franchise and all rights granted thereby.

The Mayor and Common Council may after said statement is made, inspect and examine the books of the grantee of this franchise and may cause the same to be examined by an expert accountant and may examine under oath any and all of its officers or agents for the purpose of ascertaining the gross annual receipts under this franchise.

2. MOTIVE POWER. That the cars upon said railway shall be propelled by electricity used through the overhead system, or in case of accident or unavoidable delay in procuring equipment, by mule or horse power.

3. CONDITION OF STREETS. The owner of the franchise or privilege shall at all times keep that portion of the street occupied by his or its tracks in good condition, constantly in repair, flush with the street, and with good crossings, and in the event that the street on which said franchise or privilege is granted shall be paved either by the City or under proceedings authorized by the General Laws of the State, the said owner of said franchise or privilege shall be required to pay for only that portion of any construction in excess of that covered by the specifications for the improvement of the rest of the street and which shall be necessary to provide a safe and suitable foundation for the operation of car lines over a paved street. It is the intent and purpose of this section to relieve the owner of a franchise or privilege to operate street cars on the streets of The City of San Diego of the cost of new surface pavement between the tracks of said owner and for two feet on either side thereof on streets to be hereafter paved, and to require the owner of said franchise or privilege to lay a suitable foundation for the operation of car lines over a paved street.

Nothing herein contained, however, shall relieve the said owner of said franchise or privilege of his or its obligation to keep those portions of the streets occupied by the said owner constantly in repair flush with the street and with good crossings, and to keep that portion of the pavement now existing or which may hereafter be placed between the rails, and for two feet on each side thereof, and between the tracks if there be more than one, in good condition.

4. TRACK SPECIFICATIONS. That the track shall be constructed at the standard gauge of four feet eight and one-half inches within the rails, and shall have a space between it and sidetracks, turnouts and switches of not less than five feet three inches.

5. SINGLE OR DOUBLE TRACK. That the grantee or its assigns shall have the right to lay and maintain either single or double tracks as the condition of business may warrant, but the laying of a single track shall be deemed a compliance with the conditions of this franchise, and shall in no wise impair the right of said grantee or its assigns to subsequently lay a second track paralleling the first track.

6. RAIL SPECIFICATIONS. That good substantial steel rails shall be used in the construction of said track.

7. CITY'S RIGHT TO ACCESS TO STREETS. That the right to grade, sewer, pave, macadamize or otherwise improve or alter or repair the said streets, or change the grade thereof, shall be reserved to the said City, such work to be done so as to obstruct the said railway as little as possible; the grantee or its assigns shall shift and re-shift the rails so as to avoid the obstruction created thereby; the grantee and its assigns shall waive any and all claims for damages against said City caused by reason of such grading, paving or macadamizing, or otherwise improving, altering or repairing said streets.

8. TRANSFERS. That the successful bidder for said franchise shall issue passenger transfers for passage in one continuous direction to all other lines of street railway

owned or operated by said successful bidder in the said City, and shall also issue similar transfers from such lines owned or operated as aforesaid, to the lines covered by this franchise.

9. TRACKS ON GRADED STREETS. That the laying of said track and all side-tracks, cross-overs, spur-tracks, turnouts, switches or curves shall conform in all cases with the grade of said streets where the same have been graded, and in all other cases to be as near to the natural grade as practicable, and when at any time any part of this route shall be graded, or the grade thereof altered or changed by said Common Council the bed of the road and the tracks thereon shall be made to conform therewith by said grantee or its assigns. That the overhead system may be of single or double pole construction. That all spur-tracks or other turnout tracks may be so constructed, and maintained as to curve off the main track and across the curbs and sidewalks and lead into car barns, repair shops, machine shops, depots and other buildings, but a substantial gutter shall be maintained under such tracks to provide the necessary drainage thereof.

10. LOCATION OF TRACKS ON STREETS. That the tracks shall be constructed and laid, that each of them shall be, when practicable, of equal distance from curb line to said streets, or as nearly so as the condition or width of the streets will permit.

11. LOCATION OF SWITCHES. That no switch shall be constructed or maintained within fifty feet of any cross street and the location of such switches and all turnouts shall be changed at the expense of the grantee or its assigns whenever so ordered by said Common Council.

12. CITY ENGINEER'S SERVICES. That the City Engineer shall, under the direction of the said Common Council give the established grade of the streets along the line of construction of said street railway and set stakes indicating the said grades. He shall see the said railway is constructed in conformity to the terms and requirements of the franchise, and for his services as herein required, he shall receive such fees as are provided therefor, and the same shall be paid by the grantee or its assigns.

13. TIME LIMIT FOR CONSTRUCTION AND COMPLETION. Work to construct the railroad not already constructed shall be commenced in good faith within not more than four months from the granting of the franchise, and if not so commenced within said time, said franchise shall be declared forfeited; and the said railroad shall be completed within not more than one year thereafter, and if not so completed within said time, said franchise so granted shall be forfeited; provided, that for good cause shown, the Common Council may by resolution extend the time for completion thereof not exceeding three months.

14. CESSATION OF OPERATION. In case the grantee of the franchise or its successors or assigns, shall cease to operate said railway for a period of ninety days consecutively after said railway shall have been fully constructed and completed, except in cases of unavoidable accident, or other matters not within the control of the grantee, or its successors, or assigns, the franchise shall be and is hereby declared to be forfeited and the said grantee, its successors or assigns, shall thereafter remove the tracks of said railway and put the streets in good condition.

15. RIGHT TO REPEAL. This grant of said franchise and authority shall be and is subject to the right of the majority of the electors of said City, voting at any election at any time thereafter to repeal, change or modify the said grant, and such right is hereby reserved."

Section 2. That this ordinance shall take effect and be in force from and after thirty-one days after its passage and approval.

Passed and adopted by the Common Council of the City of San Diego, California, this 30th day of April, 1923, by the following vote, to-wit:
