Upon the conditions and limitations set forth in said application:

1. PERCENTAGE PAYABLE TO THE CITY. The grantee of said franchise, successors or assigns, shall file with the City Clerk of The City of San Diego during the first fifteen days of February of each year after the taking effect of the ordinance granting the said franchise and during the same period of each successive year thereafter, during the existence of the franchise, a statement verified by the oath of the grantee, successors or assigns, showing the total gross receipts arising from the use, operation and possession of said franchise for the preceding calendar year (or fraction thereof for the first and last years as the case may be), and shall thereupon pay to the said City Clerk for the City of San Diego the aggregate sum of two per centum of said gross annual receipts as shown by said statement, and this franchise being a renewal of a right already in existence the payment of said percentage of gross receipts shall begin upon the taking effect of the ordinance granting this franchise. Any refusal of said grantee, successors or assigns, to file said verified statement and to pay said percentage of said gross annual receipts within the time above provided shall constitute ground for forfeiture of said franchise and all rights granted thereby. The Mayor and the Common Council may after said statement is made inspect and examine the books of the grantee of this franchise and may cause the same to be examined by an expert accountant and may examine under oath any and all of the officers or agents of the railway company for the purpose of ascertaining the gross annual receipts under this franchise.

It is the intent and purpose of this section to relieve the owner of a franchise or privilege to operate street cars on the streets of The City of San Diego of the cost of new surface pavement between the tracks of said owner and for two feet on each side thereof on the streets to be hereafter paved, and to require the owner of said franchise or privilege to lay a suitable foundation for the operation of car lines over a paved street.

Nothing herein contained however shall relieve the said owner of said franchise or privilege of his or its obligation to keep those portions of the streets occupied by the said owner constantly in repair flush with the streets and with good crossings, and to keep that portion of the pavement now existing or which may hereafter be placed between the rails, and for two feet on each side thereof, and between the tracks if there be more than one, in good condition.

5. **CITY'S RIGHT TO ACCESS TO STREETS.** That the right to grade, sewer, pave, or otherwise improve or alter or repair the streets, or change the grade thereof, shall be reserved to the said city, such work to be done so as to obstruct the railroads as little as possible; the grantee, successors or assigns, shall shift and re-shift the rails so as to avoid the obstruction created thereby, and shall waive any and all claims for damage against said city caused by reason of such grading, paving or improving, or altering or repairing said streets.

6. **ROADBED LOCATION.** That the location of any tracks shall conform in all cases with the official grade of the streets where the same have been graded, and in other cases to be laid as near to the natural grade as practicable, and when at any time any part of routes shall be graded or the grade thereof altered or changed by said Common Council, the said railroads shall be made to conform therewith by said grantee, successors or assigns. That turn-out tracks may be so constructed and maintained as to curve off the main track and across the curbs and sidewalks and lead into car barns, repair-shops, machine-shops, depots and other buildings, but a substantial gutter shall be maintained under such tracks.

7. **LOCATION OF TRACKS.** That the tracks shall be constructed and laid so that each of them shall be when practicable of equal distance from curb lines or as nearly so as the condition or width of the street will permit.

8. **ENGINEER.** That the City Engineer shall give the established grade of the streets along the line of construction and set stakes indicating the grade; he shall see that the tracks are constructed in conformity with the terms and requirements of the franchise, and for such services he shall receive such fees as are provided therefor and the same shall be paid by the grantee, successors or assigns.

9. **TIME LIMIT FOR CONSTRUCTION.** Work to construct the railroads not already constructed shall be commenced in good faith within not more than four months from the granting of the franchise, and if not so commenced within said time, said franchise shall be declared forfeited, and the railroads shall be completed within not more than three years from the granting of the franchise, and if not so completed within said time said franchise or privilege so granted shall be forfeited; provided, that for good cause shown the Common Council may by resolution extend the time for completion of construction not exceeding three months.

10. **TRANSPORTATION OF FREIGHT.** Transportation of freight may be carried on over streets between the hours of 11 p.m. and 6 a.m. only or at other times which the Common Council may approve.

11. **CESSATION OF OPERATION.** In case the grantee of the franchise or privilege, successors or assigns, shall cease to operate said railroads for a period of ninety days consecutively after the same shall have been fully constructed and completed, except in case of unavoidable accident or other matters not within the control of the grantee, successors or assigns, the said franchise or privilege shall be and is hereby declared to be forfeited, and the grantee, successor, or assigns, shall remove the tracks and put the streets in good condition.

12. **RIGHT TO REPEAL.** The grant of the franchise or privilege shall be subject to the right of the majority of the electors of the City of San Diego, voting at any election at any time thereafter to repeal, change or modify the said grant, and the ordinance granting such franchise or privilege shall contain a reservation of such right to repeal, amend or modify said ordinance.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage and approval.

Section 3. The City Clerk of said City is hereby directed to cause this ordinance to be published at least once in the city official newspaper of said city; to-wit: THE EVENING TRIBUNE.

ORDINANCE NO. 10196

AN ORDINANCE APPROPRIATING THE SUM OF \$166.66 FROM THE RESERVE FUND FOR THE RELIEF OF G. F. KORTE AND HELENA KORTE.

WHEREAS, The City of San Diego recently entered into a contract of compromise with G. F. Korte and Helena Korte for the purpose of settling certain claims for damages held by said G. F. Korte and Helena Korte against The City of San Diego for the alleged destruction of a road crossing Barrett Reservoir, now occupied and flooded by The City of San Diego; and

WHEREAS, under the terms of said agreement there is now due and owing to the said G. F. Korte and Helena Korte from said The City of San Diego the sum of one hundred sixty-six and 66/100 dollars (\$166.66), NOW, THEREFORE,

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. There is hereby appropriated out of the Reserve Fund of The City of San Diego the sum of one hundred sixty-six and 66/100 dollars (\$166.66) for the relief and benefit of G. F. Korte and Helena Korte.

Section 2. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval. The facts constituting the urgency in this case are these: That the claims and litigation arising out of the destruction of the road hereinabove mentioned are such that if successful the City would be compelled to abandon portions of Barrett Reservoir, which at the present time is part of the impounding system of The City of San Diego, and contains water essential for municipal use; therefore this payment is made in order to protect the immediate needs of the public from the municipal water supply, and is for the preservation of the public health and safety.

SECTION NO. 27. Each department of the City of San Diego shall limit its expenditures to the amount and for the purposes herein set forth under the respective departmental titles and designations by serial number.

SECTION NO. 28. No transfer from one fund to another shall be made unless by special direction of the Common Council manifested by Ordinance. Every requisition issued in conformity with Ordinance No. 5051, in addition to all other matters, shall contain the maximum amount of the charge to be made against the item drawn upon, and no expenditure shall be made which exceeds the maximum figure contained in the requisition therefor, and any claim based upon an amount exceeding the maximum amount contained in said requisition shall be invalid as against the City of San Diego. Each requisition shall be presented to the City Auditor for his approval as to funds before any indebtedness thereon shall be incurred and before any claim based upon said requisition shall become a legal charge against any item contained in this ordinance. It shall be unlawful for any department to expend during any one month of the ensuing fiscal year more than one-twelfth of the amount allotted to said department for said fiscal year, except as may be by Ordinance of the Common Council otherwise provided, and that except all items contained in this Ordinance prefixed by a star (\*) shall be exempt from said one-twelfth allotment.

SECTION NO. 31. This is an ordinance for the immediate preservation of the public peace, health and safety, and one of urgency, and shall take effect and be in force from and after its passage and approval.

The facts constituting the urgency in this case are that by reasons of the provisions of the charter requiring the Common Council and Auditor to estimate the probable expenditures of the various departments of the city for the ensuing fiscal year, and the additional fact that the tax rate for said fiscal year shall be based upon said estimated expenditures, it is necessary that an ordinance limiting the amounts to be expended by the various departments should be in effect as of January 1st, 1926.

Respectfully submitted,

Approved by S. J. Higgins, City Attorney

By FRANK M. DOWNER Jr., Deputy.

Presented by H. L. Moody, City Auditor.

If at any time, for any cause, the license of a dance hall or place mentioned within the provisions of this ordinance shall be forfeited or revoked, at least one month shall have elapsed before another license or permit shall be given for dancing or conducting such place of amusement in or upon said premises unless the Common Council for good cause shall decide otherwise.

The sidewalks, curbs and concrete gutters provided for herein are to be constructed according to the plans, drawings and typical cross-sections adopted and approved by the Common Council of said City, on file in the office of the City Clerk of said City, and copies of which are on file in the office of the City Engineer of said City, and shall conform to the lines, levels and official grade of the street upon which said work is to be constructed, or to such modified grade as shown on said plans, drawings and typical cross-sections, said lines and levels to be shown on the ground by stakes to be set by the City Engineer of said City.

Section 2. WORK: The work to be done shall be as follows: (a) Preparing the foundation for the sidewalk and gutter and digging the trench for the curb. (b). Constructing and laying the curb, sidewalk and gutter prescribed in the Resolution of Intention. (c). Furnishing all material and labor necessary to perform said work and to complete the same. (d). Removing from the street and sidewalk adjacent to the work, all surplus material and debris.

Section 3. GRADING: The foundation upon which the sidewalk, curb and gutter is to rest shall be brought to the proper sub-grade, as indicated by stakes set by the City Engineer. All soft and spongy material shall be removed to a depth of at least six inches below sub-grade and replaced with good material, and the whole foundation shall be tamped and rolled until it is solid. In all cases where the soil upon which the cement work is to be laid is adobe, it shall be removed to a depth of four (4) inches below the sub-grade. The adobe on the surface of the foundation remaining shall then be broken up into material not much coarser than pea-size, which material shall then be brought to sub-grade by filling with damp sand, or decomposed granite which shall then be thoroughly compacted by rolling or tamping, and kept moist until the cement base is deposited.

DIMENSIONS.

Section 4. CURB: Unplastered curb shall be eight (8) inches in thickness at the top, ten (10) inches in thickness at the bottom, and sixteen (16) inches in depth, and shall be constructed with a batter of two (2) inches on the face, unless otherwise specified in special plans and specifications for any particular work.

Plastered curb shall, in addition to the above requirements, be plastered with a coat of cement mortar as follows:

The face of the curb for a depth of at least thirteen (13) inches shall be plastered with a coat of cement mortar not less than one-quarter (1/4) inch in thickness, and the top of said curb shall have a finish coat of cement mortar not less than one-half (1/2) inch in thickness, unless otherwise specified in special plans and specifications for any particular work.

The radii of all curbs shall be ten (10) feet at street intersections and two feet at alley intersections, unless otherwise specified in special plans and specifications for any particular work.

Section 5. SIDEWALK: One-course sidewalks shall be not less than four (4) inches in thickness, unless otherwise specified in special plans and specifications for any particular work.

Two-course sidewalks shall be constructed with a concrete base not less than four (4) inches in thickness, with a cement mortar wearing surface of not less than one-half (1/2) inch in thickness, unless otherwise specified in special plans and specifications for any particular work.

All sidewalks shall be of the width, and constructed at the locations shown upon the plans, drawings, and typical cross-sections for the work. In blocks where cement walks have already been constructed, any new work shall be located to conform to the same.

There shall be a rise of three eighths (3/8) inch per foot in the grade of the sidewalk from the curb line to the property line.

Section 6. CONCRETE GUTTERS: Concrete gutters shall be constructed of the dimensions shown upon the plans, drawings and typical cross-sections for the work. The concrete shall be thoroughly tamped until all stones are below the surface and then troweled to a true surface slightly roughened.

MATERIALS.

Section 7. CEMENT: All cement used shall be Portland cement and must conform to the following requirements and be subject to the following tests which will be open to the contractor. Samples for tests may be taken from every package delivered or proposed to be used upon the work, and unless they meet the requirements herein specified, such package or packages of cement will be rejected. No cement will be accepted, tested or permitted to be used unless delivered in the original unopened packages with the manufacturer's name and the brand of cement thereon. All samples or Portland cement required by the Superintendent of Streets, or his authorized agent, shall be given him free of charge and he shall have authority at any time to take such samples as he, or his agent may desire. All tests made will be made in the cement testing room provided by the City of San Diego for that purpose. Briquettes for testing tensile strength of cement will be made both of neat cement and of cement and sand in the proportions hereinafter specified.

The specific gravity of cement shall be not less than 3.10. Should the test of

the cement as received fall below this requirement, a second test of the cement as received ~~may be made upon a sample ignited at a low red heat. The loss in weight of the ignited cement shall not exceed four per cent.~~ may be made upon a sample ignited at a low red heat. The loss in weight of the ignited cement shall not exceed four per cent.

Fineness: The cement must be evenly ground and when tested with the following standard sieves must pass at least the following percentages by weight:

No. 100 sieve having 100 meshes per lineal inch, 92%.

No. 200 sieve having 200 meshes per lineal inch, 75%.

Tensile strength: Neat briquettes one inch square in section shall attain a minimum tensile strength as follows:

At 24 hours in moist air, 175 pounds.

At 7 days (1 day in moist air and six days in water), 500 pounds.

At 28 days (1 day in moist air and 27 days in water), 600 pounds.

Briquettes one inch square in section made of one part Portland cement and three parts of standard testing sand, shall attain a minimum tensile strength as follows:

At 7 days (1 day in moist air and 6 days in water), 175 pounds.

At 28 days (1 day in moist air and 27 days in water), 250 pounds.

Cement testing neat below 600 pounds at 28 days and showing a retrogression below the seven-day test, will be rejected.

The sand test must in all cases show an increase in strength at 28 days over the seven-day tests.

Soundness: Pats of neat cement about three inches in diameter, one-half inch in thickness at the center and tapering to a thin edge, shall be kept in moist air for a period of twenty-four hours. A pat will then be kept in air of normal temperature for at least twenty-eight days. Another pat will be exposed in an atmosphere of steam, above boiling water, in a loosely closed vessel for five hours. These pats to satisfactorily pass the requirements must remain firm and hard and show no signs of distortion, checking, cracking, blotching or disintegration.

Neat cement shall develop initial set in not less than thirty minutes, but must not develop hard set in less than one hour nor more than ten hours. No cement will be permitted to be used in the work until after the seventh day test as above prescribed.

Section 8. SAND: All sand shall be fresh water sand, clean and with grains varying in size. All sand shall pass a one-quarter inch screen and 95% shall be retained on a hundred mesh screen, and shall be free from sticks, excess mica and other deleterious matter.

Section 9. ROCK: The rock to be used for the coarse aggregate shall be sound, clean, hard and durable crushed stone or crushed gravel, free from all foreign matter and shall contain no soft, flat or elongated particles. All crushed stone or crushed gravel shall pass a 1-1/2" screen and be retained on a one-quarter inch (1/4") screen. Not less than thirty-five per cent. (35%) nor more than fifty per cent. (50%) by weight shall pass a three-quarter inch (3/4") screen.

Section 10. WATER: Water shall be fresh, clean and free from all oil, acid, strong alkalies or vegetable matter.

Section 11. PROPORTIONING MATERIALS: Concrete for one-course sidewalks and unplastered curbs shall be composed of one (1) part Portland cement, two (2) parts sand, and three (3) parts rock.

Concrete for two-course sidewalks and plastered curbs shall be composed of one (1) part Portland cement, two and one-half (2-1/2) parts sand, and five (5) parts rock.

Concrete for concrete gutters shall be composed of one (1) part Portland cement, two (2) parts sand, and four (4) parts rock.

Should a deficiency of mortar exist in the concrete mixture, it shall be remedied by varying the proportion of broken stone, and not by adding a greater proportion of sand.

Cement mortar finishing coat shall be composed of one (1) part Portland cement and one and one-half (1-1/2) parts coarse, sharp, screened sand.

All proportions shall be obtained by actual measurements in boxes or wheelbarrows, and no material shall be used that has not been thus measured.

All mixing shall be done in batch mixers.

A sack of cement in the original package weighing not less than ninety-four (94) pounds shall be considered to have a volume of one cubic foot.

Section 12. FORMS: Forms shall be substantial and unyielding, set true to line and grade and properly braced.

Section 13. MIXING CONCRETE: All mixing shall be done in batch machine mixers of an approved type, and mixing shall continue after all materials, including water, are in drum, and before any portion is discharged, for at least one minute at a minimum speed of twelve (12) revolutions per minute. It shall be understood that not more than forty (40) batches shall be mixed in any one mixer during the period of one hour. The capacity of the drum shall be such that only whole bags of cement are used in each batch, and the volume of the mixed material in each batch shall not exceed the mixer manufacturer's rated capacity of the drum. The drum shall be completely emptied before receiving the materials for successive batches. Only sufficient water shall be used in the concrete to obtain a workable mix and the water shall not exceed six and one-quarter (6-1/4) gallons to each sack of cement when the aggregates are dry. The contractor will be required to provide a measuring device on his mixer by which the amount of water used in each batch can be accurately measured, and which will positively prevent the use of more water than that determined as the proper amount. The Superintendent of Streets or his inspector will make tests of the material on the ground to determine the quantity of water to be used, and all concrete shall be mixed in the presence of the inspector.

Section 14. CONSISTENCY: The consistency of the concrete shall be such that it will "quake" under light tamping.

Section 15. PLACING OF CONCRETE: All surfaces on or against which concrete is to be laid shall be thoroughly watered just previous to placing the concrete. Concrete, after the addition of water to the mix, shall be handled rapidly in as small masses as is practicable from the place of mixing to the place of final deposit, and shall be deposited and manipulated in a manner that will permit the most thorough compacting and to prevent pockets.

Section 16. CEMENT MORTAR: The cement, sand and water in the specified proportions, shall be thoroughly mixed in accordance with the provisions of Section 13 of this ordinance, in sufficient quantity to produce a mortar of the desired consistency and the whole thoroughly mixed until a homogeneous mass is produced.

Section 17. RETEMPERING: Retempering of concrete or mortar will not be permitted, and mortar or concrete that has begun to set before ramming is completed shall be removed from the work.

Section 18. ONE COURSE SIDEWALK: After the concrete has been placed between the forms as provided in Section 15 of this ordinance, it shall be struck off with a steel shod gauge. Where the width of the sidewalk is six (6) feet or less, the gauge shall be arched upward at least one-fourth (1/4) inch and the highest part of the arch shall be located one-fourth (1/4) of the width of the sidewalk from the high side. After finishing, the top of the sidewalk shall not be below a line stretched between the tops of the side forms. If it is below this line, the height of the arched gauge shall be increased. A long handled

edge tool, at least eight (8) inches wide and twelve (12) inches long and with a one and one-half (1-1/2) inch flange and having an radius of one-half (1/2) inch shall be used for edging.

It shall then be tamped with a heavy tamper, preferably one having a face consisting essentially of a grid composed of parallel metal bars, until at least three-eighths (3/8) of an inch of mortar has been brought to the surface. The concrete shall then be tamped with a light tamper, preferably one, the face of which is composed of a wire screen having a square opening not less than one-eighth (1/8) inch not more than one-fourth (1/4) inch in size, until all waves and other irregularities in the mortar surface caused by the heavy tamper have been eliminated. Any other medium may be used which will accomplish the same result; that is, the bringing of not less than three-eighths (3/8) inch of mortar to the surface.

The surface shall then be troweled with a steel trowel to a true smooth surface. Preliminary troweling may be done with a long handled trowel or "fresno", but the final surface must be made with a hand trowel. The walk shall be marked off into squares of approximately twenty-four (24) inches, the grooves to be cut not less than one-quarter (1/4) inch in depth. Contraction of the concrete in setting shall be provided for by constructing walks in sections of not more than twenty (20) feet in length.

Section 19. TWO-COURSE SIDEWALK: After the concrete has been placed between the forms as provided in Section 15 of this ordinance, it shall be leveled off with a template and tamped to not less than one-half (1/2) inch below the finished grade. The surface of the concrete must be smooth and uniform and shall be tested as to grade with a gauge notched at each end and extending one-half (1/2) inch below the tops of the side forms.

The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free voids. The finished walk shall be troweled to a true smooth surface. The edge of the walk and curb shall be finished with a edging tool made for the purpose. The walk shall be marked off into squares of approximately twenty-four (24) inches, the grooves to be cut not less than one-quarter (1/4) inch in depth. Contraction of the concrete in setting shall be provided for by constructing walks in sections of not more than twenty (20) feet in length.

Section 20. UNPLASTERED CURB: All forms shall be thoroughly cleaned each day and coated with a light oil as often as necessary to prevent the concrete from adhering to them. After the concrete has been placed between the forms as provided in Section 15 of this ordinance, the concrete shall be thoroughly spaded away from the forms with a spade, or similar tamping tool, until there are no rock pockets at either form. The front forms shall not be removed in less than two (2) hours or more than six (6) hours. Back forms shall not be removed until the face of curb has been finished. Immediately after stripping the forms the curb shall be troweled. Grout composed of one part of cement to one part of finish mortar sand shall then be applied to the face of the curb by means of a brush. The curb shall then be troweled smooth, edged on top and jointed. The top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter (1/4) inch in depth. Contraction of the concrete shall be provided for by constructing curbs in sections of not more than twenty (20) feet in length.

Section 21. PLASTERED CURB: After the concrete has been placed between the forms as provided in Section 15 of this ordinance, the concrete shall be leveled off with a template and tamped to not less than one-half (1/2) inch below the finished grade.

Front curb forms shall not be removed from the concrete in less than one-half (1/2) hour after the concrete has been tamped into place. Back forms shall not be removed until after face of curb has been plastered. The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free from voids. The finished curb shall be troweled to a true smooth surface. The edge of the curb shall be finished with an edging tool made for the purpose. The top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter (1/4) inch in depth. Contraction of the concrete in setting shall be provided for by constructing curbs in sections of not more than twenty (20) feet in length.

Section 22. CONTRACTOR'S NAME: The concrete sidewalks and curbs shall be legibly stamped with letters not less than two (2) inches in length, with the name of the contractor constructing the same and the month and the year of such construction.

Section 23. STREET NAMES: All returns of concrete sidewalks shall be plainly and legibly stamped with letters not less than three (3) inches in length, with the names of the streets and avenues upon which the return fronts and with arrows showing the course of the streets.

All stamping herein provided for shall be done by and at the expense of the contractor and no cement sidewalk or concrete curbing will be accepted by the Superintendent of Streets unless stamped as herein provided.

Section 24. PROTECTION FROM WIND AND SUN: Immediately after the concrete, which has been brought to the required grade and cross-section, and finished as above specified, has received its initial set, it shall be covered with canvas or burlap, which shall be kept continuously wet for a period of time not less than four (4) hours, nor more than twelve (12) hours. As soon as said covering has been removed, it shall be protected from wind and sun by a covering of earth not less than two (2) inches in thickness, which shall be kept thoroughly wet for a period of seven (7) days.

#### GENERAL REQUIREMENTS.

Section 25. WORK AND PLANS: The contractor shall, for the price bid, furnish all labor, materials and equipment necessary to execute the work in every respect, in a thorough, workmanlike manner in accordance with the plans, profiles, typical cross-sections and specifications and to the satisfaction of the Superintendent of Streets. All work shall, during its progress and to its completion, conform to the lines, elevations and grades shown on said plans and profiles. A copy of the plans and specifications furnished by the City Engineer shall be kept upon the work at all times during its progress and access thereto shall at all times be accorded the City Engineer or the Superintendent of Streets.

Section 26. EXAMINATION OF GROUND: Bidders must examine and judge for themselves as to the location of the proposed work, the nature of the excavation to be made, and the work to be done. The plans for the work will show conditions as they are supposed, or believed by the City Engineer to exist, but it is neither intended nor to be inferred that the conditions as shown thereon constitute a representation by the city or its officers that such conditions are actually existent, nor shall the city or any of its officers be liable for any loss sustained by the Contractor as a result of any variance between conditions as shown on the plans and the actual conditions revealed during the progress of the work or otherwise.

Section 27. SUITABLE APPLIANCES: The Contractor shall use such methods and appliances for the performance of the work embraced under these specifications as will secure a satisfactory quality of work and rate of progress.

Section 28. SETTING STAKES: The Contractor shall give twenty-four (24) hours' notice in writing when he will require the services of the City Engineer for laying out any portion of the work. The Contractor shall dig all holes necessary for line and grade stakes, and shall preserve all stakes set for line, grades or measurements of the work in their proper places until authorized to remove them by the City Engineer. Any expense incurred in re-

placing said stakes, which the Contractor may have failed to preserve, shall be borne by the Contractor.

Section 29. **INSPECTORS:** The Contractor shall prosecute the work only in the presence of an inspector authorized by the Superintendent of Streets and any work done in the absence of said inspector shall be subject to rejection. The Contractor shall furnish the inspector, the City Engineer and the Superintendent of Streets reasonable facilities for obtaining full information respecting the progress and manner of the work and the character of the materials.

Section 30. **MATERIALS AND SAMPLES:** All materials must be of specified quality and fully equal to samples, where samples are required. The Contractor shall furnish to the City Engineer for test, whenever requested and free of charge, samples of all materials proposed to be used in the work. Rejected material must be immediately removed from the work by the Contractor and shall not be brought again upon the work.

Section 31. **LABOR:** Any superintendent, foreman, laborer or other person employed on the work by the Contractor, who fails or refuses to perform the work in the manner specified herein, shall be discharged immediately and such person shall not again be employed on the work.

Section 32. **PRESERVATION OF MONUMENTS:** The Contractor shall not disturb any monuments or stakes found on the line of the improvements without permission from the City Engineer, and he shall bear the expense of resetting any monuments or stakes which may be disturbed without permission.

Section 33. **REMOVING OBSTRUCTIONS:** The Contractor shall remove trees where required by the plans of, or where the proper completion of the work requires their removal. The Contractor shall also remove all stone, debris or other obstructions, of whatever kind or character, encountered in making the improvement.

Section 34. **OBSERVING CITY ORDINANCES:** The Contractor shall observe all of the ordinances of the City of San Diego in relation to the obstruction of streets, keeping open passageways and protecting the same where they are exposed and would be dangerous to travel.

Section 35. **CROSS STREETS:** No more than one-half (1/2) of the roadway of any cross street shall be closed at any one time.

Section 36. **BARRIERS, LIGHTS, ETC.:** The Contractor shall erect and keep erected, by night and day, a fence or proper barrier along the line of the work and across the ends of the same in order to guard the public effectively from danger of falling into trenches or from upsetting their vehicles against the earth thrown up during the progress of the work, and he shall post all proper notices and signals to the public of the state of the streets while the work is in progress. A red light must be maintained at night at each end of the barrier from sunset until sunrise.

Section 37. **PUBLIC UTILITIES:** In case it should be necessary to move the property of any owner of a public utility or franchise, such owner will, upon proper application by the Contractor, be notified by the Superintendent of Streets to move such property within a specified reasonable time, and the Contractor shall not interfere with said property until after the expiration of the time specified. No cement will be accepted, tested or permitted to be used unless delivered in the original unopened packages with the manufacturer's name and the brand of cement thereon. All samples of Portland cement required by the Superintendent of Streets, or his authorized agent, shall be given him free of charge and he shall have authority at any time to take such samples as he, or his agent may desire. All tests made will be made in the cement testing room provided by the City of San Diego for that purpose. Briquettes for testing tensile strength of cement will be made both of neat cement and of cement and sand in the proportions hereinafter specified.

The specific gravity of cement shall be not less than 3.10. Should the test of the cement as received fall below this requirement, a second test of the cement as received may be made upon a sample ignited at a low red heat. The loss in weight of the ignited cement shall not exceed four per cent.

Fineness: The cement must be evenly ground and when tested with the following standard sieves must pass at least the following percentages by weight:

No. 100 sieve having 100 meshes per lineal inch, 92%.

No. 200 sieve having 200 meshes per lineal inch, 75%.

Tensile strength: Neat briquettes one inch square in section shall attain a minimum tensile strength as follows:

At 24 hours in moist air, 175 pounds.

At 7 days (1 day in moist air and six days in water), 500 pounds.

At 28 days (1 day in moist air and 27 days in water), 600 pounds.

Briquettes one inch square in section made of one part Portland cement and three parts of standard testing sand, shall attain a minimum tensile strength as follows:

At 7 days (1 day in moist air and 6 days in water), 175 pounds.

At 28 days (1 day in moist air and 27 days in water), 250 pounds.

Cement testing neat below 600 pounds at 28 days and showing a retrogression below the seven-day test, will be rejected.

The sand test must in all cases show an increase in strength at 28 days over the seven-day tests.

Soundness: Pats of neat cement about three inches in diameter, one-half inch in thickness at the center and tapering to a thin edge, shall be kept in moist air for a period of twenty-four hours. A pat will then be kept in air of normal temperature for at least twenty-eight days. Another pat will be exposed in an atmosphere of steam, above boiling water, in a loosely closed vessel for five hours. These pats to satisfactorily pass the requirements must remain firm and hard and show no signs of distortion, checking, cracking, blotching or disintegration.

Neat cement shall develop initial set in not less than thirty minutes, but must not develop hard set in less than one hour nor more than ten hours. No cement will be permitted to be used in the work until after the seventh day test as above prescribed.

Section 10. SAND: All sand shall be fresh water sand, clean and with grains varying in size. All sand shall pass a one-quarter inch screen and 95% shall be retained on an hundred mesh screen, and shall be free from sticks, excess mica and other deleterious matter.

Section 11. ROCK: The rock to be used for the coarse aggregate shall be sound, clean, hard and durable crushed stone or crushed gravel, free from all foreign matter and shall contain no soft, flat or elongated particles. All crushed stone or crushed gravel shall pass a 1-1/2" screen and be retained on a one-quarter inch (1/4") screen. Not less than thirty-five per cent. (35%) nor more than fifty per cent. (50%) by weight shall pass a three-quarter inch (3/4") screen.

Section 12. WATER: Water shall be fresh, clean and free from all oil, acid, strong alkalies or vegetable matter.

Section 13. PROPORTIONING MATERIALS: Concrete for one-course sidewalks and unplastered curbs shall be composed of one (1) part Portland cement, two (2) parts sand, and three (3) parts rock.

Concrete for two-course sidewalks and plastered curbs shall be composed of one (1) part Portland cement, two and one-half (2-1/2) parts sand, and five (5) parts rock.

Concrete for concrete gutters shall be composed of one (1) part Portland cement, two (2) parts sand, and four (4) parts rock.

Should a deficiency of mortar exist in the concrete mixture, it shall be remedied by varying the proportion of broken stone, and not by adding a greater proportion of sand.

Cement mortar finishing coat shall be composed of one (1) part Portland cement and one and one-half (1-1/2) parts coarse, sharp, screened sand.

All proportions shall be obtained by actual measurements in boxes or wheelbarrows, and no material shall be used that has not been measured.

All mixing shall be done in batch mixers.

A sack of cement in the original package weighing not less than ninety-four (94) pounds shall be considered to have a volume of one cubic foot.

Section 14. FORMS: Forms shall be substantial and unyielding, set true to line and grade and properly braced.

Section 15. MIXING CONCRETE: All mixing shall be done in batch machine mixers of an approved type, and mixing shall continue after all materials, including water, are in drum, and before any portion is discharged, for at least one minute at a minimum speed of twelve (12) revolutions per minute. It shall be understood that not more than forty (40) batches shall be mixed in any one mixer during the period of one hour. The capacity of the drum shall be such that only whole bags of cement are used in each batch, and the volume of the mixed material in each batch shall not exceed the mixer manufacturer's rated capacity of the drum. The drum shall be completely emptied before receiving the materials for successive batches. Only sufficient water shall be used in the concrete to obtain a workable mix and the water shall not exceed six and one-quarter (6-1/4) gallons to each sack of cement.

when the aggregates are dry. The contractor will be required to provide a measuring device on his mixer by which the amount of water used in each batch can be accurately measured, and which will positively prevent the use of more water than is necessary to obtain the proper consistency.

Section 16. CONSISTENCY: The consistency of the concrete shall be such that it will "quake" under lighting tamping.

Section 17. PLACING OF CONCRETE: All surfaces on or against which concrete is to be laid shall be thoroughly watered just previous to placing the concrete. Concrete, after the addition of water to the mix, shall be handled rapidly in as small masses as is practicable from the place of mixing to the place of final deposit, and shall be deposited and manipulated in a manner that will permit the most thorough compacting and to prevent pockets.

Section 18. CEMENT MORTAR: The cement, sand and water in the specified proportions, shall be thoroughly mixed in accordance with the provisions of Section 15 of this ordinance, in sufficient quantity to produce a mortar of the desired consistency and the whole thoroughly mixed until a homogeneous mass is produced.

Section 19. RETEMPERING: Retempering of concrete or mortar will not be permitted, and mortar or concrete that has begun to set before ramming is completed shall be removed from the work.

Section 20. ONE COURSE SIDEWALK: After the concrete has been placed between the forms as provided in Section 17 of this ordinance, it shall be struck off with a steel shod gauge. Where the width of the sidewalk is six (6) feet or less, the gauge shall be arched upward at least one-fourth ( $1/4$ ) inch and the highest part of the arch shall be located one-fourth ( $1/4$ ) of the width of the sidewalk from the high side.

After finishing, the top of the sidewalk shall not be below a line stretched between the tops of the side forms. If it is below this line, the height of the arched gauge shall be increased. A long handled edge tool, at least eight (8) inches wide and twelve (12) inches long and with a one and one-half ( $1-1/2$ ) inch flange and having a radius of one-half ( $1/2$ ) inch shall be used for edging.

It shall then be tamped with a heavy tamper, preferably one having a face consisting essentially of a grid composed of parallel metal bars, until at least three-eighths ( $3/8$ ) of an inch of mortar has been brought to the surface. The concrete shall then be tamped with a light tamper, preferably one, the face of which is composed of a wire screen having a square opening not less than one-eighth ( $1/8$ ) inch nor more than one-fourth ( $1/4$ ) inch in size, until all waves and other irregularities in the mortar surface caused by the heavy tamper have been eliminated. Any other medium may be used which will accomplish the same result; that is, the bringing of not less than three-eighths ( $3/8$ ) inch of mortar to the surface.

The surface shall then be troweled with a steel trowel to a true smooth surface. Preliminary troweling may be done with a long handled trowel or "fresno", but the final surface must be made with a hand trowel. The walk shall be marked off into squares of approximately twenty-four (24) inches, the grooves to be cut not less than one-quarter ( $1/4$ ) inch in depth. Contraction of the concrete in setting shall be provided for by constructing walks in sections of not more than twenty (20) feet in length.

Section 21. TWO-COURSE SIDEWALKS: After the concrete has been placed between the forms as provided in Section 17 of this ordinance, it shall be leveled off with a template and tamped to not less than one-half ( $1/2$ ) inch below the finished grade. The surface of the concrete must be smooth and uniform and shall be tested as to grade with a gauge notched at each end and extending one-half ( $1/2$ ) inch below the tops of the side forms.

The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free from voids. The finished walk shall be troweled to a true smooth surface. The edge of the walk and curb shall be finished with a edging tool made for the purpose. The walk shall be marked off into squares of approximately twenty-four (24) inches, the grooves to be cut not less than one-quarter ( $1/4$ ) inch in depth. Contraction of the concrete in setting shall be provided for by constructing walks in sections of not more than twenty (20) feet in length.

Section 22. UNPLASTERED CURB: All forms shall be thoroughly cleaned each day and coated with a light oil as often as necessary to prevent the concrete from adhering to them. After the concrete has been placed between the forms as provided in Section 17 of this ordinance, the concrete shall be thoroughly spaded away from the forms with a spade, or similar tamping tool, until there are no rock pockets at either form. The front forms shall not be removed in less than two (2) hours or more than six (6) hours. Back forms shall not be removed until after face of curb has been finished. Immediately after stripping the forms the curb shall be troweled. Grout composed of one part of cement to one part of finish mortar sand shall then be applied to the face of the curb by means of a brush. The curb shall then be troweled smooth, edged on top and jointed. The top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter ( $1/4$ ) inch in depth. Contraction of the concrete shall be provided for by constructing curbs in sections of not more than twenty (20) feet in length.

Section 23. PLASTERED CURB: After the concrete has been placed between the forms as provided in Section 17 of this ordinance, the concrete shall be leveled off with a template and tamped to not less than one-half ( $1/2$ ) inch below the finished grade.

Front curb forms shall not be removed from the concrete in less than one-half ( $1/2$ ) hour after the concrete has been tamped into place. Back forms shall not be removed until after face of curb has been plastered. The surface of the finish coat shall be well floated and thoroughly troweled into the body of the concrete before the latter has set so as to form one compact mass, free from voids. The finished curb shall be troweled to a true smooth surface. The edge of the curb shall be finished with an edging tool made for the purpose. The top and face of the curb shall be marked into sections approximately four (4) feet in length, the grooves to be cut not less than one-quarter ( $1/4$ ) inch in depth. Contraction of the concrete in setting shall be provided for by constructing curbs in sections of not more than twenty (20) feet in length.

Section 24. CONTRACTOR'S NAME: The concrete sidewalks and curbs shall be legibly stamped with letters not less than two (2) inches in length, with the name of the contractor constructing the same and the month and the year of such construction.

Section 25. STREET NAMES: All returns of concrete sidewalks shall be plainly and legibly stamped with letters not less than three (3) inches in length, with the names of the streets and avenues upon which the return fronts and with arrows showing the course of the streets.

All stamping herein provided for shall be done by and at the expense of the contractor and no cement sidewalk or concrete curbing will be accepted by the Superintendent of Streets unless stamped as herein provided.

Section 26. PROTECTION FROM WIND AND SUN: Immediately after the concrete, which has been brought to the required grade and cross-section, and finished as above specified, has received its initial set, it shall be covered with canvas or burlap, which shall be kept continuously wet for a period of time not less than four (4) hours, nor more than twelve (12) hours. As soon as said covering has been removed, it shall be protected from wind and sun by a covering of earth not less than two (2) inches in thickness, which shall be kept

thoroughly wet for a period of seven (7) days.

The right is reserved to the owners of public utilities and franchises to enter upon the street for the purpose of making repairs or changes of their property made necessary by the work. The City of San Diego shall also have the privilege of entering upon the street for the purpose of repairing sewers, and water pipes, or making house connections therewith, or repairing culverts or storm drains.

Section 43. After the completion of any of the work or improvement mentioned in Section 1 of this ordinance, in the manner provided for herein in this ordinance, it shall be the duty of the City Engineer of said city to check up said work or improvement, particularly in matters of location, grade and dimensions, such report to be filed by said City Engineer with the Superintendent of Streets. WHEREAS, it is the opinion of this Common Council that the practice of patronizing and operating such slot machines or vending machines is detrimental to the youth of the City of San Diego: NOW, THEREFORE,

BE IT ORDAINED By the Common Council of The City of San Diego, as follows:

Section 1. It shall be unlawful for any person, persons, firm or corporation, or its officers, agents or employees within the City of San Diego, having the custody and control of any slot machine or vending machine operated by depositing coins or checks therein and which in addition to delivering a fixed and certain article of merchandise or articles of merchandise in return for coins deposited therein, also sometimes delivers a certain number of trade checks or tokens redeemable in merchandise to the patron or operator, to permit persons under the age of twenty-one (21) years to patronize or operate such machines.

Section 2. It shall be unlawful for any person under the age of twenty-one (21) years of age to knowingly and wilfully operate or patronize within the City of San Diego, California, any slot machine or vending machine which, in addition to delivering a fixed and certain article or fixed and certain articles of merchandise, also sometimes and when indicated in advance by said machine, delivers to the operator or patron a certain number of trade checks or tokens redeemable in merchandise.
