WHEREAS, we are informed by an expert brick maker that the shale is of a quality that will make fine vitrified or pressed brick; and

WHEREAS, we understand the pavement of the streets by a foundation of concrete, a layer of sand and paved with vitrified brick is by far the best class of pavement, and that the same can be laid with much less cost than other pavements, and such a pavement can be repaired with a very much reduced cost over other classes of pavements; and

WHEREAS, we are informed by our Engineer that a brick pavement is far better in districts where heavy hauling is made necessary; and

WHEREAS, we are of the opinion that it would be advisable to have our Engineer send samples to various brick making concerns to have our shale tested and if such a test should check with the opinion of the expert brick maker, then we would recommend an establishment of a vitrified brick yard to make and burn brick and sewer pipe for use of the City; NOW, THEREFORE,
