RESOLUTION OF INTENTION NO. 9818.

(University Avenue)

RESOLVED, that it is the intention of the Common Council of the City of San Diego, California, to order the following street work to be done, to-wit:

That the roadway of University Avenue, in said City, from curb line to curb line, from the southeasterly line of University Boulevard produced southwesterly, to the west line of First Street, including the roadway of all intersections of said University Avenue with cross streets, between said points, and also the roadway of said University Avenue leading into all alleys, between said points, (excepting such portions of the said University Avenue and said intersections of streets, between said points, required by law to be kept in order or repair by any person or company having railroad tracks thereon), be paved with asphalt pavement, laid upon a concrete base, according to the specifications therefor contained in Ordinance No. 4111 of the ordinances of said City, and according to, and as shown upon, the plans, drawings and typical cross-sections contained in Document No. 47075, on file in the office of the City Clerk of said City, and copies of which are on file in the office of the City Engineer of said City.

And as a part of said work, the construction of concrete curbing upon the said University Avenue, on both sides thereof, from the southeasterly line of University Boulevard produced southwesterly, to the west line of First Street, including the returns in all intersections of said University Avenue with cross streets, between said points, (excepting such portions of the said University Avenue and the said intersections of streets, between said points, already curbed with concrete at the time of the adoption of this resolution of intention), according to the specifications therefor contained in Ordinance No. 1140 of the ordinances of said City, and according to, and as shown upon, the said plans, drawings and typical cross-sections contained in said Document No. 47075.

And also, as a part of said work, the construction in the said University Avenue, of the following twenty-four inch re-inforced concrete culverts, to-wit: two of said culverts at each of the intersections of said University Avenue with Second Street and Tenth Street; and one of said Culverts at the intersection of said University Avenue with Sixth Street; (excepting a portion of each of said culverts extending across and under the railway tracks of the San Diego Electric Railway Company), according to, and as shown upon, the said plans, drawings and typical cross-sections and specifications contained in said Document No. 47075.

All of said plans, drawings and typical cross-sections and specifications contained in said Document No. 47075, are hereby approved and adopted as the plans, drawings and typical cross-sections and specifications to be followed, in connection with the specifications contained in said Ordinances No. 4111 and No. 1140, in said paving of, and said work upon, said University Avenue, and the said intersections of streets, between said points; and by reference thereto all said plans, drawings and typical cross-sections contained in said Document No 47075,

and said specifications contained in said Ordinances No. 4111, and No. 1140, are incorporated herein and made a part hereof.

WHEREAS, on or about June 15th, 1911, the City of San Diego, California, through its Common Council, entered into a contract with the Glazed Cement Pipe Company for furnishing and delivering to the Sewer Department of said city of so much glazed cement sewer pipe and wyes as may be required in the laying and construction in said City of certain lines of sewer, more specifically set out in said contract, being Document No. 42764 on file in the office of the City Clerk of said City, and

WHEREAS, thereafter, on December 11th, 1911, there was adopted by this Common Council a resolution, being No. 9728, in which it was recited that said Glazed Cement Pipe Company had produced less than one-half of the quantity of pipe required by said contract, and that it appeared that said company was unable to furnish the amount required by said contract, thereby causing a long delay in the completion of the construction of said sewers, and said resolution

cited the manager of said company to appear before said Common Council on Monday, December 18th, 1911, at 10:30 a.m. and show cause, if any he had, why said contract should not be cancelled, and

WHEREAS, on said date said hearing was duly continued until Saturday, December 23rd, 1911, at 9 a.m., and

WHEREAS, on said last mentioned date said hearing was had, at which time testimony was given by Arthur S. Bent, manager of said company; by James Dix Schuyler, hydraulic engineer, and former City Engineer Olmstead of Los Angeles, both of whom testified to the excellent constructed, and that they would have accepted ninety per cent. of the pipe qualities of the pipe, rejected, and further, that they would prefer the class of cement pipe furnished to vitrified pipe at the same price, or even at a slightly higher price for concrete pipe, now be it

Resolved, That after a thorough hearing of the subject matter, preceded by a visit to the works where said sewer pipe was thoroughly examined and severe tests made, and after examining sections of cement pipe taken from ^{the} C Street sewer, where it has been successfully used for four years, it is the opinion of this Common Council that all pipe being used from said works does comply, practically, with the requirements of the contract, and it is therefore recommended that the Superintendent of the Department of Fire and Sewers continue the use of such pipe.

RESOLVED By the Common Council of the City of San Diego, California, that the public interest and convenience of said City require that the street work hereinafter described be done, and therefore the said Common Council hereby orders the following street work to be done, to-wit:

That D Street, in said City of San Diego, for the entire width of said street, from property line to property line, from the east line of 26th Street to a point 500 feet east from the east line of 30th Street, including the entire width and length of the intersections of said D Street with all cross streets, between said points, (excepting the intersection of said D Street with 30th Street), be graded to the official grade thereof, according to the specifications therefor contained in Ordinance No. 3510 of the ordinances of said City.

Also, as a part of said work, the construction in said D Street, between 26th Street and 27th Street, of one thirty-inch re-inforced cement pipe culvert, and its accessories, and also two concrete street intakes, and two twelve-inch corrugated steel pipes, leading from said intakes into said culvert, according to, and as shown upon, the plans, drawings and typical cross-sections and specifications contained in Document No. 45834, on file in the office of the City Clerk of said City, and copies of which are on file in the office of the City Engineer of said City.

And also, as a part of said work, the construction in said D Street between 27th Street and 28th Street, of one thirty-inch re-inforced cement pipe culvert, and its accessories, and also two concrete street intakes, and two twelve inch corrugated steel pipes, leading from said intakes into said culvert, according to, and as shown upon, the said plans, drawings and typical cross-sections and specifications contained in said Document No. 45834.

And also, as a part of said work, the construction in said D Street, between 29th^{Street} and 30th Street, of one thirty-inch re-inforced cement pipe culvert, and its accessories, and also two concrete street intakes, and two twelve-inch corrugated steel pipes, leading from said intakes into said culverts, according to, and as shown upon, the said plans, drawings, and typical cross-sections and specifications contained in said Document No. 45834.

All of said Plans, drawings and typical cross-sections and specifications contained in said Document No. 45834, and said specifications contained in said Ordinance No. 3510, are, by reference thereto, incorporated herein and made a part hereof.

The said Common Council found, upon estimates of the City Engineer of said City, that the cost of said proposed work or improvement will be greater than fifty cents per front foot along each line of the said D Street, so proposed to be improved, including the cost of intersection work assessable upon said frontage; and said Common Council determined that serial bonds bearing interest at the rate of seven per cent. per annum shall be issued to represent the cost of said work or improvement. "March 14, 1912.

Mr. Ed. Fletcher,
1548 D Street, San Diego, Calif.

Dear Sir:---

Yours of the 12th inst., touching the claim of your Company against the City on account of the Linda Vista Irrigation District assessment, is received.

I notice your quotation from Mr. Sweet. So far as your claim is concerned, I do not understand why you do not present it to the Auditing Committee. Certainly that body has never yet refused to direct a warrant to be issued, and may never do so. Should there be a refusal, however, either on the part of the Auditing Committee to allow the claim, or on the part of the Auditor to issue your warrant, your attorney will no doubt advise you properly as to the remedy. I believe that the Council, in passing the ordinance making the appropriation, and the City Attorney in advising that such appropriation could lawfully be made, have each gone as far in serving you as it is within their power to do.

Respectfully,,
