A RESOLUTION DETERMINING THAT THE PUBLIC INTEREST AND NECESSITY OF
THE CITY OF SAN DIEGO DEMAND THE ACQUISITION AND CONSTRUCTION OF
CERTAIN MUNICIPAL IMPROVEMENTS.

IT IS HEREBY RESOLVED and determined by the Common Council of the City of San Diego, California, that the public interest and necessity of said City require the acquisition, construction and completion by the City of the following improvements, namely:

(a) The dredging out of the bottom of the Bay of San Diego to a depth of thirty-five (35) feet below lower low water of the following described area:

Beginning at a point where the south line of Broadway produced will intersect the government bulkhead line; thence south along said government bulkhead line a distance of 200 feet to a point; thence at an angle of $74^{\circ} 0'$ to the right to an intersection with the U. S. pierhead line; thence north along the U. S. pierhead line to a point 330 feet north and 1000 feet west of the point of beginning; thence east a distance of 1000 feet to the U. S. Bulkhead line; thence south a distance of 200 feet along said U. S. Bulkhead line to the north line of the municipal pier; thence west along said north line of said municipal pier a distance of 800 feet to the northwest corner of the municipal pier; thence south along the west end of said municipal pier a distance of 130 feet to the southwest corner of said municipal pier; thence east along the south line of said municipal pier a distance of 800 feet to the point of beginning.

Also the dredging out of the bottom of the Bay of San Diego to a depth of thirty-two (32) feet below lower low water of the following described area:

Beginning at a point where the U. S. pierhead line would intersect a line drawn from a point, which point is south $74^{\circ} 0'$ west of a point on the U. S. bulkhead line 200 feet south of the intersection of said U. S. bulkhead line with the prolongation of the south line of Broadway; thence along said described line to the intersection of the thirty-second contour plane, as shown on a certain map and plan on file in the office of the City Clerk, and filed March 12, 1914, marked Document No. 74139; thence northwesterly along the thirty-second contour plane to a point where said thirty-second contour plane intersects a line drawn west from a point 330 feet north of the prolongation of the south line of Broadway; thence east along said last described line to a point where said line intersects the U. S. pierhead line; thence south along said U. S. pierhead line to the point of beginning.

Also the dredging out of the bottom of the Bay of San Diego to a depth of thirty (30) feet below lower low water of the following described area:

Beginning at a point on a line, which line is 330 feet north of and parallel to the prolongation of the south line of Broadway, said point being 410 feet west of the intersection of said described line with the U. S. bulkhead line; thence at an angle of $32^{\circ} 2'$ to the right a distance of 349.16 feet; thence at an angle of 90° to the left a distance of 215 feet; thence at an angle of $122^{\circ} 2'$ to the left a distance of 410 feet to the point of beginning.

Also the dredging out of the bottom of the Bay of San Diego to a depth of twenty (20) feet below lower low water of the following described area:

Beginning at a point on a line, which line is 330 feet north of and parallel to the prolongation of the south line of Broadway, said point being 410 feet west of the intersection of said described line with the U. S. bulkhead line; thence at an angle of $32^{\circ} 2'$ to the right a distance of 349.16 feet; thence at an angle of 90° to the right a distance of 371 feet to a point at the beginning of a curve; thence on a curve to the left, with a radius of 325 feet, with a central angle of $32^{\circ} 2'$ to the left to the point of tangent; thence north a distance of 400 feet to a point; thence at an angle of 90° to the right a distance of 450 feet to an intersection with the U. S. bulkhead line a distance of approximately 1070 feet to a point; thence west 410 feet to the point of beginning.

Also the dredging out of the bottom of the Bay of San Diego to a depth of fifteen (15) feet below lower low water of the following described area:

Beginning at a point on the U. S. bulkhead line, which point is approximately 1400

feet north of the intersection of the U. S. bulkhead line with the prolongation of the south line of Broadway; thence a distance of 450 feet; thence north a distance of approximately 1215 feet; thence east along the prolongation of the south line of Date Street to an intersection with the U. S. bulkhead line; thence south along the U. S. bulkhead line to the point of beginning.

The dredged material to be filled in between the said bulkhead line and the line of ordinary high tide on the shore of said Bay, to a level of approximately eight (8) feet above mean high tide, and extending as far south as the said south line of Broadway extended west, and filling from said line northerly as far as the material dredged as aforesaid may fill the space between the constructed bulkhead and the said shore line to the aforesaid level. All of said dredging to be done and all of said material to be placed and deposited according to the general plans and specifications thereof shown in that certain document on file in the office of the City Clerk of said City, and being numbered Document No. 74139, filed March 12, 1914.

(b) The construction and equipment upon the municipal pier in San Diego Bay, located at the foot of Broadway, in said City, of an immigrant station, an administration building, and sunken railroad tracks, the installation and construction of switches upon the tracks now laid on said municipal pier, and the extension of said tracks from said municipal pier across the tide lands east of and adjacent to said municipal pier and bulkhead, and the alteration of the tracks now upon said municipal pier, to provide for and allow running of standard gauge railroad cars thereupon, together with the installation, construction and equipment of said municipal pier and bulkhead with water pipes, heating pipes, lighting system, derricks, scales, fire apparatus, trucks, one traction engine, one power launch, closets, floats and gangplanks, fenders, sills, and such tools, lines, and other equipment necessary to properly furnish and equip said municipal pier and bulkhead; the placing of rip rap along the north end of the municipal bulkhead and along the south side of the municipal pier, the construction of a drain from Atlantic and B Streets across said tide lands to the municipal bulkhead, the construction of a drain from Atlantic Street and Broadway across said tide lands to the municipal bulkhead, and increasing the thickness of the asphalt paving in the store house on the municipal pier.

The total cost of all the said improvements is estimated by this Common Council at Four Hundred Thousand Dollars (\$400,000), which cost will be too great to be paid out of the ordinary annual income and revenue of the municipality.

Said improvements are otherwise known as the Harbor Improvements of the Bay of San Diego, and are to be made in order to comply with that certain Act of the Legislature of the State of California, entitled "An Act conveying certain tide lands and lands lying under inland navigable waters situate in the Bay of San Diego to the City of San Diego in furtherance of navigation, and commerce and the fisheries, and providing for the government, management and control thereof", approved May 1, 1911.

All of which improvements will be necessary to carry out the objects, purposes and powers of the municipality.

Passed and adopted by the said Common Council of the said City of San Diego, California, this 16th day of March, 1914, by the following vote, to-wit:

RESOLUTION SETTLING DISPUTES AND DIFFERENCES BETWEEN MESMER & RICE
AND CITY OF SAN DIEGO REGARDING MUNICIPAL PIER.

BE IT RESOLVED By the Common Council of the City of San Diego, as follows:

WHEREAS, The City of San Diego on the 31st day of August, 1912, contracted with Mesmer & Rice for the construction in the harbor of San Diego of a certain pier and other structures; and

WHEREAS, this Council did by Resolution No. 16630 on the 5th day of March, 1914, accept said pier as fully completed according to contract, plans and specifications, conditioned on the settlement of certain items referred to in Document No. 73470, filed February 18, 1914, and being communication from Harbor Engineer Edwin M. Capps, reporting the completion of said pier; and

WHEREAS, This Common Council has endeavored to the utmost of its ability to arrive at a fair and just settlement of said differences and has endeavored to obtain from said Harbor Engineer all available data and figures covering the subjects mentioned in his said communication. And this Council having examined all the records and data on file in the various city offices, including all reports, figures and data of said Harbor Engineer, on file, and having been informed that there was no other data on the subject except such as was on file; and after having carefully considered and weighed all of the available data at its command;

NOW THEREFORE, the said Common Council does hereby settle with said Mesmer & Rice for all matters covered by said Harbor Engineer's communication, in the following manner, to-wit:

CREDIT TO THE CITY OF SAN DIEGO.

5432 sq. ft. of asphalt not laid \$.078	\$423.70
21 barrels cement spoiled, at \$1.83	38.43
130 Fender Piles not placed, at \$11.54	1500.20
80 Riverside cement sacks not returned	8.00
235 Golden Gate Cement sacks not returned	23.50
464.5 concrete pile at 10 cents	<u>46.45</u>
	\$2040.28

Falsework piles outside of pier are permitted to remain until removed during dredging operations.

Work of grouting under dock is considered by this Council as offset and balanced by stripping of the concrete piles by the contractors, although not required by the contract.

Ironing out asphalt surface to drain rain water considered duly performed under plans and specifications.

87000 cubic yards of dredging under the dock at cost of \$8700.00, is considered as fully equalized and balanced by the additional expense incurred by the contractors in using falsework and driving through undredged material, together with other expense not required or covered by the original contract, and as shown by the following figures:

Dredging 87000 cu. yds. at 10¢	\$ 8700.00
Scow, 300 days at \$6.00	<u>1800.00</u>
	\$10500.00
Falsework, 786 piles at \$7.50	\$ 5895.00
460 caps at \$6.24	2870.40
Driving 786 piles at \$6.00	4716.00
Pulling 786 piles at \$3.00	2358.00
Extra cost driving 525 fresh piles	525.00
Bolts 850 at 20¢	<u>170.00</u>
	Total \$16534.40
	Less <u>6153.50</u>
	\$10380.90

460 second caps at \$3.125	\$ 1437.50
786 piles (second hand) at \$6.00	<u>4716.00</u>
	\$ 6153.50

It is considered and resolved by this Council that there is no difference in value between the original specified pile and the substitute pile as placed under the alternate plans and specifications furnished by said City.

Passed and adopted by the said Common Council of the said City of San Diego, California, this 16th day of March, 1914, by the following vote, to-wit:
