BE IT RESOLVED By the Common Council of the City of San Diego, as follows:

It is hereby deemed and declared by the Common Council of the City of San Diego that the expenditure of the sum of two hundred thousand dollars (\$200,000.00) for the purpose of the acquisition, construction and completion of a system of water works for the City of San Diego and the inhabitants thereof, whereby water is taken and pumped from the bed of the San Diego River and served to said City and the inhabitants thereof through the City's distributing system to meet an emergency in case the city should not be able to obtain sufficient water by other means, is impracticable and unwise; and it is further deemed and declared by said Common Council that said expenditure is impracticable and unwise because of the fact that heretofore the sum of one hundred thousand dollars (\$100,000.00), being a portion of the total amount of two hundred thousand dollars (\$200,000.00) hereinabove referred to, has been

expended by said City in the acquisition, construction and completion of a system of water works in Mission Valley in the County of San Diego and State of California, whereby water is taken and pumped from the bed of the San Diego River and served to the inhabitants of said City through the City's distributing system, the purpose of such installation being to meet an emergency in case the City should not be able to obtain sufficient water by other means, and for the further reason that the Common Council believe that said system of water works as now installed in said San Diego River at the cost of approximately one hundred thousand dollars (\$100,000.00) is sufficient to meet the needs and demands of the City and the inhabitants thereof in emergency cases when a sufficient supply of water cannot be obtained by other means, and that the expenditure of a further and additional sum of one hundred thousand dollars (\$100,000.00) for the purpose of further increasing the number and capacity of said wells and pumps constituting said system of water works would be impracticable and unwise. The said sum of one hundred thousand dollars (\$100,000.00), the expenditure of which for the purpose of further acquiring, constructing and completing a system of water works as hereinabove described and herein declared to be impracticable and unwise, having been raised by the sale of municipal bonds of the City of San Diego of the par value of one hundred thousand dollars (\$100,000.00), voted and issued for the purpose of the acquisition, construction and completion of a system of water works for the City of San Diego and the inhabitants thereof, whereby water is taken and pumped from the bed of the San Diego River and served to said City and the inhabitants thereof through the City's distributing system, the purpose being to meet an emergency in case the City should not be able to obtain sufficient water by other means, and being a part of an entire issue of municipal bonds in the amount of two hundred seventy-five thousand dollars (\$275,000.00) and known as the Water Development Bonds of the City of San Diego, California; said bonds having been issued under and pursuant to and in full compliance with the Act of the Legislature of the State of California, entitled, "An Act authorizing the incurring of indebtedness by cities, towns and municipal corporations for municipal improvements and regulating the acquisition, construction or completion thereof," which became a law February twenty-fifth, 1901, and amendments thereof, and having been authorized by the vote of two-thirds of the duly qualified electors of said City voting at a special election duly and regularly called and held in said City on the twenty-first day of October, 1913.

Passed and adopted by the said Common Council of the said City of San Diego, California, this 16th day of February, 1916, by the following vote, to-wit:

THAT THE PUBLIC INTEREST OF THE CITY OF SAN DIEGO, CALIFORNIA, DEMANDS  
CERTAIN MUNICIPAL IMPROVEMENTS.

IT IS HEREBY RESOLVED AND DETERMINED By the Common Council of the City of San Diego, that the public interest and necessity of the said City and of the inhabitants thereof, demands the acquisition, construction and completion by said City of the following improvement of the present water system of the City of San Diego, namely:

The acquisition, construction, completion and installation of a wooden pipe line and flume between Dulzura Creek and the Upper Otay Reservoir, and from the Upper Otay Reservoir to the outlet tunnel of the Lower Otay Reservoir. The cost of said wooden pipe line and flume is estimated at one hundred thousand dollars (\$100,000.00).

IT IS FURTHER RESOLVED AND DETERMINED, that the above described municipal improvement and addition to the City's water system is convenient and necessary to carry out the objects, purposes and powers of said municipality, and that the cost of said improvement will be too great to be paid out of the ordinary annual income and revenue of the municipality.

1. Plans and specifications for the work required in order to make said improvements;
2. An estimate of the cost of said improvement and of the incidental expenses in connection therewith;
3. A diagram showing the district above referred to, and also the boundaries and dimensions of the respective subdivisions of the land within said district, each of which subdivisions shall be given a separate number in red ink upon said diagram.
4. A proposed assessment of the total amount of the costs and expenses of the proposed improvement upon the several subdivisions of land in said district in proportion to the estimated benefits to be received by such subdivisions, respectively, from said improvement; provided, that whenever any portion or percentage of the cost and expenses of such improvement is ordered to be paid out of the treasury of the municipality, as hereinabove provided, the amount of such portion or percentage shall first be deducted from the total estimated cost and expenses of such improvement, and the assessment upon property, proposed in said report, shall include only the remainder of said estimated costs and expenses. BE IT RESOLVED, By the Common Council of the City of San Diego, as follows:

That permission be and is hereby granted Swift & Company, a corporation, to install two five hundred barrel crude oil tanks with concrete catch basins, as prayed for in their petition filed March 25th, 1916, in the office of the City Clerk, and being Document No. 98274.

That said tanks shall be installed subject to the following conditions set forth in a communication from the Chief Engineer of the Fire Department, filed March 29th, 1916, and being Document No. 98404:

Location to be as far removed as possible from any building and from the water front.

Tanks to be placed in a pit or reservoir sunk as low as practicable, said pit to be large enough to retain at least one and one-half times the contents of the two tanks. The pit shall also have a masonry floor and retaining wall with ladder or stairway of non-combustible material leading into it.

Top of tanks to be located below the level of the lowest burning point and the oil shall be conveyed to the burners by a pumping system.

Pumps used in connection with the supply and discharge of the tanks shall be located outside of the pit or reservoir walls and at such a point that they will be accessible at all times, even if the oil in tank or reservoir should be on fire.

Tanks shall be covered with an air and water tight top having a non-inflammable upper surface which shall be properly vented through a pipe not less than six inches in diameter. This vent is to be capped with a return bend provided with a copper screen.

All oil conveying pipes to be laid under ground but they must not break through the

reservoir walls unless they are set in place before the concrete wall is constructed thus permitting the concrete to be poured around and over the pipes. This rule does not apply to pipes passing under the reservoir and laid well below the surface of the ground. Separate pipes shall be used for discharging oil from and supplying oil to the tanks.

Gate valves for cutting off the oil supply in case of accident shall be installed where readily accessible and as near as practicable to the point where the supply pipe leaves the tank.

The tanks shall not be cross connected within the pit or reservoir and the pumps shall draw the supply from only one tank at a time. A tank when being filled shall be shut off from the system and the pumps supplied from the second tank.

Filling pipes to have water tight screw caps which shall be kept securely closed at all times except when the tank is being filled.

Said tanks shall be installed subject to the further condition that the location and installation shall be under the direct supervision of the Chief Engineer of the Fire Department of the City of San Diego.

The permit herein contained shall be considered and is hereby declared to be revocable by the Common Council of said City, and the Chief Engineer of the Fire Department is hereby charged with the responsibility of reporting to the Common Council the failure or refusal of the applicant, Swift & Company to comply in every respect with the requests, demands and directions of said Chief Engineer of the Fire Department, and in the event that said Chief Engineer shall report to the Common Council any such failure or refusal to comply with such demands, requests and directions, then said Common Council shall immediately upon such report from the Chief Engineer of the Fire Department, revoke, rescind and cancel the permit herein granted.
