R E S O L U T I O N NO. 47496

BE IT RESOLVED by the Common Council of the City of San Diego, as follows:

That the following statements embody the sentiments of this Common Council with regard to the division of the gasoline tax between counties and cities:

"The gasoline tax division as between counties and cities is a very much discussed problem of today, and while we are quarreling about it, forces are at work constantly to decide the law unconstitutional, which would handicap the completion of many worthy contemplated necessary highways.

It seems the proper steps to take therefore, to quiet this feeling is an agreement whereby a certain percentage of the amount raised in this manner be allocated to main trunk arteries of public use where same come within city limits.

This seems the proper step for the reason that many of the above mentioned roads are really state or county highways, and should not be assessed against the property direct, which in many cases could not and should not bear the burden. Then again it is unfair to bond the cities for this, because the bulk of gasoline tax is being paid by the cities themselves.

This is particularly true of San Diego County which has many miles of main trunk highways within the City limits.

Some counties have a good understanding between City Council and Supervisors, and the money is used to the satisfaction of all concerned. However, this is not the case in San Diego County and it is our earnest desire that the State Legislature take the necessary steps to allocate enough out of this fund to help surface and maintain the main trunk arteries leading in and out of our City.

It is not the intention of the Common Council of the City of San Diego to use this fund in maintaining City Streets but only on trunk highways some of which have been declared secondary highways by the State Highways Commissioners."
