RESOLUTION NO. 69284

WHEREAS, Robert W. Flack has been City Manager of the City of San Diego since

August 1, 1935; and

WHEREAS, he has submitted his resignation to the City Council; and WHEREAS, the best measure of the services of a public official to a community is a comparison of the conditions existing at the end of his term with the conditions existing at the beginning of his term; and

WHEREAS, the services of Robert W. Flack as City Manager of the City of San Diego have been of inestimable value to the City of San Diego, as is shown by the following state

ment of the undisputed accomplishments of his administration:

During the past four years the City tax rate has been reduced 90 cents. In 1934 the rate was 2.86; the present rate is 1.96. This is the first time in ten years and the second time in twenty years that the City tax rate has been below 2.00. During the same four years the County tax rate was reduced only 5 cents and the City school rate increased 12 cents, both rates being based upon the same assessed valuations as City rates. After taking into consideration increased assessed valuations, the average owner of a small home paid 20 per cent less in City taxes in 1938 than in 1934.

When Mr. Flack came to San Diego the City departments were housed partially in ancient and dilapidated City buildings and partially in rented quarters. During Mr. Flack's administration the fine new Civic Center was built, a model Police Headquarters, Jail and Court-room building was constructed, and the City shops and other City structures were expanded and repaired.

During this period, half of the equipment of the fire department, dating back to 1912, has been replaced with the latest models, with the resulting reduction in insurance rates, and the equipment in the police department and the public works department has been brought to a state of repair and efficiency.

During this same period Main Street, El Cajon Avenue, Home Avenue, the Richmond Street Extension and many other streets have been improved and the Washington Street Bridge will soon be under construction.

Mr. Flack, through the organization of a Citizens Water Committee, has aligned the citizens behind a unified water program. During his administration, El Capitan pipe line has been built, Hodges Dam has been repaired, the All-American Canal contract has been ratified, and the San Dieguito purchase contract has been refinanced at a saving of 850,000.00 in interest.

The pay of City employees has been adjusted to meet the rising costs of living during this four year period, and the City has adopted the five-day week for City employees without any additional costs in wages or salaries.

All of the above improvements have been made without the issuance of a single bond and the bonded indebtedness of the lity has been reduced by nearly 3,000,000.00 in the past four years. These improvements were accomplished on a pay-as-you-go basis, accompanied by a reduction in the tax rate. In a large measure this accomplishment was due to Mr. Flack's trained, efficient and intelligent management.

During the past four years major crimes, such as burglary, robbery, hold-ups and auto thefts, have been reduced and the rate of these crimes in San Diego is now far below the national average, the California average, or the rates for comparable cities in California. The liquor laws are more adequately enforced for protection of minors and the public than they were before. Ticket-fixing has been abolished. Streets, public places and residential districts have been cleared of prostitutes. Sex crimes have been reduced to a minimum. Four years ago it was estimated that there were 3,000 slot machines in the City of San Diego. There were also a number of luxurious dens in operation. The slot machines and the

gambling dens, together with all major forms of gambling, have been entirely eliminated during Mr. Flack's administration. The 1938 San Diego County Grand Jury, after a thorough investigation of the police department, rendered a report which was highly commendatory of that department. Mr. Flack's efficient and honest supervision of the police department has been largely responsible for this result.

In the fall of 1937 Mr. Flack organized a Safety Council and, as a result, traffic deaths in 1938 were 31% less than in 1937. He inaugurated a safety program among City employees with a resulting reduction in accidents to City employees and a saving of 30,000.00 per year in compensation insurance premiums. He also has provided leadership in the organization of a Major Disaster Plan which has attracted nation-wide attention. Upon his recommendations, the City Council cancelled a rubbish disposal contract at a saving of 36,000.00 per year to the City. In all these matters Mr. Flack has supplied leadership and organization ability, and his efforts have resulted in a saving of money and lives.

During Mr. Flack's term of office the population of the City has increased by 20%, but the cost of government has not increased proportionately. The City departments are now properly housed as a result of improvements made during his administration. The efficiency of all departments has been increased. No bonds have been issued and the tax rate has been reduced. Wages have been increased, hours have been shortened, but the total number of employees has not been greatly increased, due to increased efficiency. Mr. Flack has a right to be proud of his record and we are proud of his record.

Mr. Flack has always been courteous and cooperative in his relations with the members of the Council. He has at all times clearly understood and practiced the principles of the Council-Manager form of government. He has relieved the Council entirely of the burden of administrative detail and has recognized that the Council is the policy-making group. He has accepted responsibility on administrative matters and has not interferred on policy matters, but has at all times been willing to discuss and counsel with the Council upon both administrative and policy matters.

The results of his administration may well be summarized in the impartial statement of Public Administrative Service in its publication "City Manager Government in San Diego" Chicago, 1939, on Page 71, as follows: "Substantial administrative improvement has been made since 1935 under the continuous administration of a competent manager with adequate authority."

NOW, THEREFORE, BE IT RESOLVED that the City Council hereby regretfully accepts the resignation of Robert W. Flack as City Manager of the City of San Diego, said resignation to become effective as of close of business on May 31, 1939.

Passed and adopted by the said Council of the said City of San Diego, California,

BE IT RESOLVED by the Council of the City of San Diego, as follows: That the City Manager is hereby authorized to make the following application to the United States Beach Erosion Board, for a co-operative beach erosion study along the shore of the Pacific Ocean at Mission Beach, Ocean Beach and in the vicinity of the channel at the entrance to Mission Bay:

"The District Engineer, U.S. Engineer Office, 751 S. Figueroa Street, Los Angeles, California.

Dear Sir:

In accordance with provisions of an act approved June 26, 1936 (49 Stat.1982), the City of San Diego, California, desires to make formal application for a cooperative study of the problems at Pacific Beach, Mission Beach, and Ocean Beach, for determining the best method of stablizing the inlet to Mission Bay and preventing further erosion of the beaches in the vicinity. It is desired that this study be prosecuted jointly by the United States, through the Beach Erosion Board, and by the City of San Diego.

I. Authority. The City of San Diego is incorporated under the laws of the State of California and is the owner in trust, by deed from the State of Califor-

nia, of all tide and submerged lands within its boundaries.

II. Engineering representative. The City of San Diego designates H.W.Jorgen-

sen, City Engineer, as it engineering representative in this study.

III. Location map. A map showing the location of the study is attached hereto. IV. Outline of proposed study. A study on which to base plans for construction to prevent erosion and flooding of property in Mission Beach and in Ocean Beach and in the vicinity of the channel entrance to Mission Bay. It is requested that the proposed study be made to determine the most suitable means of protecting the beaches from further erosion. It is suggested that the study include the following items:

(a) Study of shore line changes between Bird Rock and Point Loma, from all

available authentic maps.

(b) Same as for offshore area (6', 12' and 18' curves).(c) Profiles approximately normal to the shore line, referred to a permanently monumented base line and extending from the bulkhead, street, or dune line to the 30-foot m.l.l.w. contour, in the following areas:

1. At intervals of 250 feet between the southerly end of the Mission Beach seawall and Narragansett Street, Ocean Beach, including cross sections of the inlet shoreward to Mission Beach bridge. 2. At intervals of 500 feet along the Mission Beach front between the southerly end of the sea wall and Ventura Place, and a-

long the Mission Beach bay shore between the bridge and Ventura Place. 3. At intervals of 1,000 feet along the remainder of the ocean beach between the northerly limits of Pacific Beach and the southerly

limits of Ocean Beach.

(d) Current measurements, to be made with colored water shoreward of the plunge line and with floats seaward of the plunge line at four stations, two on profile lines approximately 1,000 feet each side of the inlet, and one each on the profile line nearest to Ventura Place, Mission Beach, and nearest to Narragansett Street Ocean Beach. Observations to be made at two-hour intervals throughout the period of the study. Weather conditions, wind direction and velocity, direction of approach, height, and period of waves, to be recorded during each period of observation.

(e) Float measurements of currents into and out of the inlet, from the bridge seaward, and in Mission Bay, between Venture Place and the bridge, to be made with surface and subserface floats, observed from shore by two transits. Sufficient ob-

servations to be made to cover one complete tide cycle.

(f) Tide readings during the entire period of the study, to be made with a

portable automatic recording tide gage on the Mission Bay bridge.

(g) A study of wind and weather conditions from existing records, study to consist of a wind rose from existing records covering as long a period as possible, an historical account of the effects on the beach of all types of storm conditions, and a study of offshore storms and their resulting effects on shore.

(h) Sand samples to be taken on the each at approximately midtide elevation on profile lines at 1,000-foot intervals over the area between the northerly limits of Pacific Beach and the southerly limits of Ocean Beach. Each sample to be analyzed for median diameter, specific gravity, and porosity.

(i) Plans and specifications of existing beach protective structures and of

all other structures located seaward of high tide line.

(j) Aerial and ground photographs of the beaches within the area of the study to show the condition of the beach and the effects of storms, currents, etc., as far into the past as such photographs exist.

(k) Borings to be made at the high water line at approximately 1,000-foot intervals to depth of 18 feet below mean lower low water or to rock where en-

countered above that depth.

(1) Report on streams entering the ocean within the limits of the area under study, including data on type of flow, floods, debris carried to ocean, effect on beaches, and any proposed flood control measures with their probable effects on the regimen of the streams.

(m) General diagrammatic sketch, showing the character of the shore line and beach.

(n) Report by Beach Erosion Board.

y. The City of San Diego proposes to perform the following items of the outline in paragraph IV: item (c), item (d), item (e), item (g), item (i), and item (j). The above items are estimated to represent approximately 50 percent of the total cost of the proposed investigation. It is understood that the remaining items will be accomplished by the United States." Presented by: F.A.RHODES

RESOLUTION NO. 69938

WHEREAS, The City of San Diego for a number of years has maintained and used a very narrow, ungraded road through the bean fields of Henry G. Fenton and Emily B. Fenton in order to reach the Savage Dam, the Otay filter plant and the Lower Otay Recreational Area; and

WHEREAS, said road is impassable during and after heavy rains, and at other times the use of said road has been and now is very unsatisfactory, both to the City and the owners

of said land; and
WHEREAS, it is now necessary that a safe road be provided for The City of San Diego
in order to more adequately operate and maintain the Savage Dam, the Otay filter plant and
the Lower Otay Recreational Area, as well as for the general public in its use of the
recreational facilities of said Lower Otay Reservoir; and

WHEREAS, such a safe road with a minimum grade elevation of 502.2 feet U.S.G.S. which equals Reservoir Contour 155, has been located by the City Engineer's Office around the west side of Lower Otay Reservoir and extending from the projected location of County Road No. 558 to the south line of Rancho Janal, near Savage Dam, as shown on said City Engineer's Drawings numbered 5685-L and 5685-L, as changed on August 18, 1939; and

WHEREAS, in order to provide for a 100 foot right of way, as shown on said drawings, it will be necessary to traverse certain portions of the lands of said Henry G. Fenton

and Emily B. Fenton; and
WHEREAS, said Henry G. Fenton and Emily B. Fenton are willing to exchange certain
lands sufficient to provide for said 100 foot right of way for certain lands of the City,
all bordering on the Lower Otay Reservoir; and

WHEREAS, the Hydraulic Engineer of The City of San Diego addressed a communication to the City Manager, dated September 5, 1939, recommending the exchange of said lands for

the purposes aforesaid, which communication is now on file in the office of the City Clerk of said City as Document No. 315536, reference to which is hereby made for further particulars; and

WHEREAS, at a meeting of the City Council held on September 12, 1939, said Hydraulic Engineer explained the situation in detail to said City Council and advised said Council that said exchange of lands would be of great benefit to The City of San Diego and the inhabitants thereof in that it would make the Savage Dam, the Lower Otay Recreational Area and the Otay filter plant accessible at all times and would likewise permit the public to more adequately use the recreational facilities of said Lower Otay Reservoir area; and

WHEREAS, the City Manager recommended to said Council the exchange of lands in accordance with the terms aforesaid, and the said recommendation of the Hydraulic Engineer;

WHEREAS, said Hydraulic Engineer has advised the City Council that the lands of the City to be exchanged, as aforesaid, are no longer required in connection with the impounding and storage of water in the Lower Otay Reservoir, provided, however, that the City retains the exclusive right to any and all water over and under the land to be deeded to the Fentons, as aforesaid; NOW, THEREFORE, BE IT RESOLVED, By the Council of The City of San Diego, as follows:

RESOLUTION NO. 70375

BE IT RESOLVED by the Council of the City of San Diego, as follows: That the City Manager is hereby authorized to make the following amended application to the United States Beach Erosion Board, for a co-operative beach erosion study along the shore of the Pacific Ocean at Mission Beach, Ocean Beach, and in the vicinity of the channel at the entrance to Mission Bay:

"The District Engineer, U.S. Engineer Office, 751 S. Figueroa Street, Los Angeles, California. Dear Sir:

In accordance with provisions of an act approved June 26, 1936 (49 Stat. 1982), the City of San Diego, California, desires to make formal application for a cooperative study of the problems at Pacific Beach, Mission Beach, and Ocean Beach, for determining the best method of stablizing the inlet to Mission Bay and preventing further erosion of the beaches in the vicinity. It is desired that this study be prosecuted jointly by the United States, through the Beach Erosion Board, and by the City of San Diego.

I. Authority. The City of San Diego is incorporated under the laws of the State of California and is the owner in trust, by deed from the State of California, of all tide and submerged lands within its boundaries.

II. Engineering representative. The City of San Diego designates H.W.Jorgensen, City Engineer, as its engineering representative in this study. III. Location map. A map showing the location of the study is attached hereto.

IV. Outline of proposed study. A study on which to base plans for construction to prevent erosion and flooding of property in Mission Beach and in Ocean Beach and in the vicinity of the channel entrance to Mission Bay. It is requested that the proposed study be made to determine the most suitable means of protecting the beaches from further erosion. It is suggested that the study include the following items:

(a) Study of shore line changes between Bird Rock and Point Loma

from all available authentic maps.

(b) Same as for offshore area (6', 12' and 18' curves). (c) Profiles approximately normal to the shore line, referred to a permanently monumented base line and extending from the bulkhead, street, or dune line in the following areas:

1. At intervals of 250 feet between the southerly end of the Mission Beach seawall and Narragansett Street, Ocean Beach, including cross sections of the inlet shoreward to Mission Beach bridge, to the 30-foot m.l.l.w. contour.

2. At intervals of 500 feet along the Mission Beach front between the southerly end of the sea wall and Ventura Place to the 30-foot m.l.l.w. contour.

3. At intervals of 1,000 feet along the remainder of the ocean beach between the northerly limits of Pacific Beach and the southerly limits of Ocean Beach, to the 30-foot m.l.l.w. contour.

4. Along the Mission Beach Bay shore, between Ventura Place and the bridge, at intervals of 500 feet to a distance of 600 feet from shore.

The channel from the east portion of the bay is directed against this area of the shore and erosion occurs during ebb flow.

(d) Current measurements, to be made with colored water shoreward of the plunge line, at four stations, two at profile lines approximately 1.000 feet each side of the inlet and one each at the profile line nearest to Ventura Place, Mission Beach and nearest to Narragansett Street, Ocean Beach. Observations to be made at each position not less than 3 times daily for a period of about one month. Wind and wave data to be recorded during each period of observation. Distance of high and low water lines from base line, at each observation point, to be measured and recorded once each day during the observation period.

(e) Current measurements, to be made with surface and subserface floats, on the four profile lines cited in paragraph IV (d), in the inlet, and on one line in Mission Bay, between Ventura Place and the bridge. Simultaneous observations shall be made as nearly as practicable. In all cases, float runs shall cover at least one complete tidal cycle.

(f) Tide readings during the entire period of the study, to be made with portable automatic recording tide gauges located on the Mission Bay Bridge and

at the end of Crystal Pier, Pacific Beach.

(g) A Study of wind and weather conditions from existing records, including preparation of wind diagrams covering as long a period as possible; an historical account of the effects on the beach of all types of storm conditions, including storms at sea; and a complete record of weather conditions, wind direction and velocity, and direction of approach, height, length, and period of waves during all field operations in connection with the study.

(h) Sand samples to be taken on the beach at approximately midtide elevation on profile lines at 1,000-foot intervals over the area between the northerly limits of Pacific Beach and the southerly limits of Ocean Beach. Each sample to be analyzed for median diameter, specific gravity, and porosity.

(i) Plans and specifications of existing beach protective structures

and of all other structures located seaward of high tide line.

(j) Aerial and ground photographs of the beaches within the area of the study to show the condition of the beach and the effects of storms, currents, etc., as far into the past as such photographs exist.

(k) Borings to be made at the high water line at approximately 1,000foot intervals to depth of 18 feet below mean lower low water or to rock where

encountered above that depth.

(1) Report on streams entering the ocean within the limits of the area under study, including data on type of flow, floods, debris carried to ocean, effect on beaches, and any proposed flood control measures with their probable effects on the regimen of the streams.

(m) General diagrammatic sketch, showing the character of the shore

line and beach.

(n) Report by Beach Erosion Board. V. The City of San Diego proposes to perform the following items of the outline in paragraph IV: item (c), Item (d), item (e), item (g), item (i), and item (j). The above items are estimated to represent approximately 50 percent of the total cost of the proposed investigation. It is understood that the remaining items will be accomplished by the United States."
