Provided, however, that as to those parts of said "B" street and said intersections of streets therewith to be occupied by the culverts hereinafter provided for, the concrete base of said pavement shall terminate where it joins said culverts as shown by the drawings for said culverts, which drawings are hereinafter more particularly identified (said base being identified upon said drawings by the words "asphaltic concrete"), and the asphalt surface of said pavement shall be continued over said culverts and beyond the curb lines of said "B" street, and of said intersections of streets therewith, to the extent as shown by, and in the manner and all in accordance with, the said drawings for said culverts (said asphalt surface being identified on said drawings, viz, "Asphaltum 2").

And provided that as to those parts of said "B" street and said intersections of streets therewith to be occupied by the "gutter bridges" hereinafter provided for, the said pavement shall terminate where it joins said gutter bridges, as shown by the drawings for said gutter bridges, which drawings are hereinafter more particularly identified.

Also, that there be constructed on said "B" street between said west line of Fourth street and a point 25 feet east of the east line of California street, and upon the intersections of streets with "B" Street and streets intersecting "B" Street between Fourth Street and a point 25 feet east of the east line of California Street, all the culverts with their appurtenances shown by the drawings for culverts hereinafter more particularly
